played in improving the native breeds; on the higher grounds, where sheep cannot well be reared, and chiefly among the poorer classes, unable to procure a more valuable stock of horned cattle, goats are very numerous, and menacings to pick up their subsistence where no other domestic animal could live, contribute greatly to the comfort if not to the wealth of their possessors. Among wild animals are bears and wolves, found both in the Alps and Jura, chamois, found chiefly among the loftiest mountains of the Alps; wild boars, not uncommon in some Bern, Vaud, and Aargau tracts, in some Jura, and occasionally in the Grisons; badgers, foxes, hares, otters, birds of prey of large dimensions, and many varieties of winged game. The lakes and rivers are well supplied with fish, among which are several varieties of salmon found chiefly in the Rhine and the waters connected with it, salmon-trout of large size, chiefly in the lakes of Constance and Geneva, and common trout in almost all the rivers and lakes. The only insects deserving of notice are bees, the rearing of which forms an important occupation in several cantons, and silk worms, almost confined to cant. Tessin. In the last canton, too, are found vipers, the only venomous reptiles of the present kind known in Switzerland, and some scorpions.

Manufactures and Trade.—Through the geographical position and the configuration of the surface place Switzerland under considerable disadvantages, manufactures of various kinds were established in it at a very early period and have extended rapidly in recent times, in face of the formidable competition to which they are subjected. The factory system, however, is little known and the far greater part of the tissues are produced by domestic looms not kept in regular operation throughout the year, but chiefly during the winter and in the evenings when the ordinary labours of the field have ceased. The quantities of goods thus made are great, but the difficulty of transporting the exact amount is much increased. Among the staple articles of Swiss manufacture are silk goods, chiefly in Zürich and Basel, cotton goods also chiefly in Zürich, and to a considerable extent likewise in St. Gall and Appenzell, linen and hempen cloth in Aargau, Thurgau and St. Gall, jewellery and watches in Geneva, Vaud, Neuchâtel, and Bern, cutlery and various articles of hardware in Schaffhausen, writing and stained paper at Basel, leather and skins chiefly in Bern, Vaud, Zürich, Geneva, Basel and Aargau, see at Lausanne, Cort, Motiers, and various other places, straw hats, and various articles in straw, in Aargau and Lucerne, musical instruments at Glarus, and mathematical instruments at Bern. These articles furnish of themselves the materials of a considerable export trade, and to these must be added cattle, cows, butter, cheese, cherry brandy, timber, charcoal, medicinal plants, &c. the most important imports are corn, rice, salt, salt-fish, wine, colonial produce, fine woollens and various articles in iron and copper. In addition to this ordinary trade, Switzerland shares in the very important transit which is carried on between France, Germany, and Italy. The nature of the country throws very extraordinary difficulties in the way of this traffic, but the means which have been employed to lessen or remove them are almost as extraordinary as the difficulties, and the great roads which now lead across some of the loftiest passes of the Alps will long be pointed to as among the most remarkable of engineering achievements. Nor have the ordinary communications of the interior been neglected. In almost every canton as far as the nature of the surface will admit, the roads are both well made and carefully kept, and though the impetuosity of the rivers greatly hinders their navigable importance, and leaves little scope for the construction of extensive canals, many hydraulic works have been executed on a scale of no mean extent, considering the limited resources of the country and the obstacles to be overcome. Among others may be mentioned the two canals of the Rhône one connecting it with the Lake of Wallenstadt, and the other connecting it through that lake with the Lake of Zürich. One of the great difficulties for some which Switzerland still wants, and by a little mutual concession might easily obtain, is a uniform system of weights and measures, at present every canton is still on retaining its own, and the consequence is that proper standards nowhere exist, and commercial transactions often cannot be completed without perplexing calculations both as to the amount and the price of articles proposed for sale. The difficulty is somewhat relieved by the general use of French

and German units, and it may be observed, as a general rule, that the Swiss is nearly one-half more than the French franc, or about 1 s. 6d. sterling.

Government and People.—The cantons of Switzerland, 26 in number are united together as a federal republic for mutual defence, but retain their individual independence in regard to all matters of internal administration. By the constitution adopted by the federal diet, September 12, 1848, the federal assembly is composed of two divisions—the national council, and the council of the states or the senate. The national council is named by the cantons—one member to each 20,000 but when a surplus of above 10,000 exists, an additional member is elected. The members are chosen for three years. Each canton, and when divided each half canton, is entitled to send one member at least. The senate consists of forty-four members—two for each canton, the half cantons sending one each. The federal council, composed of seven members, elected for three years, is chosen by the national council from among the Swiss citizens eligible for the national council. Only the Confederation, represented by the two councils, has the right to declare war, make peace, and to conclude treaties and alliances. The Confederation alone is charged with the official relations between the cantons and with foreign governments. The federal tribunal, of 11 members and 11 substitutes, is named by the federal assembly for three years. This tribunal judges in civil cases between the cantons, or between them and the Confederation, also between the Confederation or cantons on the one part, and individuals on the other. For cases of discipline it divides into two sections, to constitute the chamber of accusation, the jury, and the court of session. On November 29, 1848, Bern was chosen to be the federal city. The different languages spoken in Switzerland evidently show that the people have not a common origin but belong to different races. In the W., where French is spoken they are supposed to be descendants of the ancient Burgundians, whose territories included both sides of the Jura, in the S. where German is spoken, a common origin is indicated with the Germans of Swabia and the Tyrol, and in the E., both the language and physical features are Italian, though those on the S. of the Alps indicate this more strongly than the inhabitants of the Grisons, who exhibit several peculiarities, and speak a kind of corrupt Latin called Romansh. Rise apart from these peculiarities of origin and language, the Swiss have it so long in a state of confederation that they have acquired a decided national character and may now be viewed as forming a single people. Thus viewed, they are hardy, active, industrious, temperate, brave, patriotic, well educated, moral and religious, and in all these respects will not lose by a comparison with any people in the world. They are not, however, without their faults. One of the most prominent of these is their excessive love of money. This makes them selfish and mercenary, and unscrupulous as in the mode of life which they pursue, provided money can be made by it. Hence, notwithstanding their remarkable love of freedom they are anxious to hurt themselves out in internal disputes which are usually supposed to be least compatible with the enjoyment of it, and are ready to enlist in the service of any foreign power with perfect indifference as to the justice or injustice of the cause in which they may be required to spend their blood. While thus engaged, the only virtues on which they repose themselves is fidelity to their pay-master. The only forms of religion generally professed are the Protestant Presbyterian, as modelled by Calvin and Zuinglius, and the R. Catholic. The former counts above three-fifths and the latter embraces about two-fifths of the whole population.

History.—The Swiss first become known to us as c. 105, when part of them, under the name of Tigurini, in alliance with the Cimbri defeated a Roman army, and slew the consul, L. Cassius, who headed it. About 60 years afterwards we find them, under the name of Helvetii, attempting to migrate to a holy land, but driven back after a signal defeat by Julius Cæsar. This proved the commencement of their subjection to the Roman yoke, and after vainly struggling for independence the whole country appears to have become resigned to its fate about A.D. 70. Near the beginning of the 6th century the northern hordes burst in and formed permanent settlements, the Alemanni making themselves masters of the N. and the Burgundians of the S.W. districts, while at a later period the

Gothic period possesses of the R.R. All these nations were ultimately subdued by the Franks, whose empire, about the middle of the 6th century, extended over many countries, and included, among others, the whole of Helvetia. On the disruption of the Frankish Empire, shortly after the death of Charlemagne, Helvetia was divided into five portions, an E. or German, which, falling to the share of Louis of Bavaria, was incorporated with the duchy of Swabia; and a W. or Burgundian, allotted to Lothar, who held the title of Emperor and King of Italy. This latter portion was afterwards incorporated with the kingdom of Upper Burgundy, which was formed by Rudolf in 899, and lasted till 1016, when it came into the possession of Henry IV., Emperor of Germany. He having been previously in possession of the E. part, or Swiss Helvetia, was now master of the whole country.

As the German emperors could not govern it in person, they appointed heretogs or vicars, whose office appears to have become hereditary. One of the most conspicuous of these, Berthold of Zähringen, appeared in 1087, became the founder of a kind of dependent dynasty which ultimately extended over the greater part of Helvetia, and continued in his family till 1218, when the house of Zähringen became extinct. The country, still subject to the German emperors, appears now to have become subdivided into a number of lordships, free cantons, and imperial towns, all invested with peculiar rights and privileges. Among the lordships, that of Habsburg, by a series of fortunate events, gradually obtained such pre-eminence, that in 1273, Rudolph, one of its members, was elected Emperor of Germany and became founder of the house of Austria. Rudolph availed himself of his new powers to extend the influence of his house, and endeavored to bring all Helvetia under his personal sway but was strenuously resisted at many quarters, and more especially by the free cantons of Schwyz, Uri, and Unterwalden. The designs of Rudolph, though sufficiently apparent, had been prosecuted with some degree of wisdom and moderation; but on his death in 1291 his son and successor Albert threw off all disguise, and by his violence and tyranny soon brought matters to a crisis. The cantons holding their franchises under the empire, had been governed by imperial lordships, but Albert endeavored to change the nature of the franchises, by substituting for imperial fief lordships, so as to make it appear that the country instead of being a part of the empire, formed part of the patrimony of his house. The vigilance and firmness of the cantons obliged him to appoint imperial lordships as before, but he endeavored to take his revenge by selecting men not only devoted entirely to his own interest, but bent on committing all kinds of extortion and oppression. Resistance was resolved upon, and in 1307 a few peasants met secretly on the Rütli, and boldly bound themselves by oath to achieve the independence of their country, or perish in the attempt. The struggle which ensued forms the brightest page in Swiss history. The great victory of Morgarten in 1315, led to the establishment of a federal pact between the three cantons, and formed the nucleus of the existing Confederation. Other cantons gave in their adhesion, and the number already amounted to eight, when a second great victory at Sempach, in 1386, at humbled Austria, that the shortly after concluded a 30 years truce. Dissensions continued to favour the confederates, and the limits of their territories extended rapidly on every side. A quarrel with Ulrich at one time threatened disastrous consequences but was happily terminated in 1446 and a new war in which Austria really engaged only enabled the Swiss to wrest from her the greater part of her remaining possessions in Switzerland. In 1476 a formidable enemy appeared in the person of Charles the Rash, Duke of Burgundy, who entered Switzerland at the head of a powerful army. He was not more successful than Austria, and the victory of Murten, in 1476, showed manifested his forces. In 1661 dissensions which had arisen among the cantons, and even threatened the existence of the Confederation, were terminated by the moderate and patriotic counsels of Nicolas van Fies, and many years of peace and prosperity enabled the Swiss to prepare for meeting the last great effort which was made against their independence from the empire of Germany. This was in 1499 when Maximilian the emperor, as the legal lord of the Swiss, called upon them to furnish a contingent of troops, and as their refusal, declared war against them. A succession of defeats left him no inclination to con-

time it, and a year had scarcely elapsed before peace was concluded. Shortly after the Swiss commenced the very questionable practice, from which they have not entirely desisted, of taking themselves out as mercenaries, to fight the battles of foreign powers, mostly in return for the pay or plunder which they secure from them. But we have now arrived at the commencement of the 19th century, when Switzerland had an opportunity of engaging in a most honorable warfare. In 1815, the promulgation of indulgences provoked opposition, as in Germany, and Zwingli appeared as the pioneer of a series of distinguished reformers, who ultimately succeeded in gaining over a majority of the cantons to their principles. Since then, Switzerland has long distinguished herself by the asylum afforded to refugees from other countries, when driven from their homes by the tyranny or bigotry of their rulers. Subsequent to the struggles connected with the Reformation, no events of much interest occurred till 1798, when the French revolutionists commenced their aggressions by seizing the territory of the Bishop of Basel. Their designs, at first thinly disguised, were more and more openly manifested; and at last Switzerland, though not without several noble struggles to maintain her independence, was, in 1803, degraded by what is called the Act of Mediation into a kind of French protectorate, 19 cantons retaining a nominal independence, while three, Geneva, Neuchâtel, and the Valais, were formally extinguished by being incorporated with France. The overthrow of Napoleon made Switzerland again free, and a Confederation, composed of 26 independent cantons, was re-established and formally recognized and guaranteed by the congress of Vienna in 1815. At this period the constitutions of the different cantons presented numerous varieties but the general tendency since has been to give a complete ascendancy to the democratic principle, and introduce universal suffrage.

SWORDS, a market to and par Ireland, co. and 8 m. N. by R. Dublin to bank river Swire. Houses irregularly built, most of them much ruined. It has a Protestant church and a R. Catholic chapel, a small open common, several schools, including a borough school, in which lectures on chemistry &c., are occasionally given but neither manufactures nor trade. There is here one of the round-towers of Ireland, 90 ft. high. Area of par 9675 ac. **Pop.** 3965

SWRATAUCH, or **SWRATAUCH** a vil. Bohemia, circle and 21 m. S. E. Chrástín, with a Protestant church a school and manufactory of linen and serotoware. **Pop.** 1834.

SWATKA a market in Bohemia, circle and 80 m. from Chrástín, with a church. **Pop.** 1066.

SWYNARDE, a vil and coal. Belgium prov E. Flanders, on the Scheldt, 8 m. S. Ghent with manufactory of linen brick-works, an oil and a flour mill. **Pop.** 1906.

SYANG a small Indian Archipelago, Gilolo Passage lat. 0° 20' N., lon. 159° 54' E.; low and flat.

SYDENHAM a chapelry England, co. Kent par Lewisham, in a beautiful and suburban district studded with handsome seats and villas, on the London and Croydon railway, 6 m. S. E. London. It possesses an elegant district church, and Wesleyan and Independent chapels, and has become an object of national notice, as the seat of European fairs from having been selected as the site of a new Crystal Palace, opened by her Majesty Queen Victoria, on June 10 1854, and formed ably out of the materials of that which stood in Hyde Park in 1851 but superior to it. It is in its structure and in the completeness of its arrangements as a permanent depository of science and art. Though not so long as its predecessor it greatly exceeds it in its general dimensions, by the increased height of each part the introduction of two additional transepts, the larger size of the central transept, and an under story, rendered necessary on the garden side by the slope of the ground. Some of the chief details of the former building have also been removed, by the arched roofs given to the centre divisions, and the projection internally of pairs of columns for the support of the main arched ribs. The entire length is 1806 ft. the length of centre transept, 408 ft. length of end transepts, 512 ft.; the width of nave is 78 ft., the width of centre transept, 120 ft.; and the width of end transepts, 78 ft. The height from the floor to the centre of the roof of the nave, and of end transepts, is 106 ft.; and the height from the floor to the centre of the roof of the centre transept, 170 ft. In addition to all that was done in Hyde

Park for the illustration of modern art and monumental. Sydenham Palace contains an extensive museum of antiquities, including part of the Egyptian collection, and of modern art in botany, zoology and mineralogy, together with casts of the more extraordinary antiquities, animals, and figures illustrative of ethnology, by exhibiting individuals of the various races habited and placed as they lived. The gardens, which are of great extent, and provided with fountains and water-works on a larger scale than those of Versailles, are magnificently laid out so as to combine instruction with recreation. SYDENHAM or OWEN'S SOUND, a str. Canada West on Owen's Sound, a part of the great Georgian Bay of Lake Huron, 119 m. N. W. Toronto. It was laid out in 1846, and is rising rapidly. It has four Protestant churches, and several good schools. manufactures of cloth, iron, and leather and numerous flour and saw mills. Pop. about 1200.

SYDENHAM ISLAND Pacific Ocean. See NANOUTT. SYDENSTONE, par Eng. Norfolk 2530 ac. Pop. 555. SYDLING (St. Nicholas) par Eng. Dorset 5028 ac. Pop. 675.

SYDNEY a tn. British America, cap. Cape Breton, on a narrow tongue of land at the head of a fine bay, which forms a spacious and secure harbour. lat. 45° 19' N. lon. 60° 31' W. It consists of about 80 houses is well situated as regards the fisheries, and has near it rich coal-mines.

SYDNEY a seaport in Australia, cap. New South Wales, beautifully and advantageously situated on Sydney Cove, on the E. side of Port Jackson 7 m. from the heads lat. (Fort Macquarie) 33° 51' 42" S.; lon. 151° 14' E. (n.) It stands partly on a small fringing promontory, having Darling Harbour on the W. and partly in a narrow valley, and viewed either from the sea or adjoining heights on the main

much taste in their external appearance, but are substantially built of brick or stone, many of them with small but neatly laid-out gardens; and several of the streets, among which George Street and Pitt Street deserve special notice, present ranges of handsome edifices and elegant shops, which may vie with those in some of the great capitals of Europe. It has extensive and increasing suburbs—W. Pyrmont and Balmain, across Darling Harbour, E. Woodstock, or Harbourside Town; S.E. Paddington and Surry Hills S. Zetland and Chippendale; and S.W. Carpendarum Newton, and the Glebe. The most important public buildings are the churches, which include five Protestant Episcopalian three Presbyterian, two R. Catholic, six Methodist, one Baptist, and one Quaker. The other buildings and institutions most deserving of notice are the government-house, a very handsome structure of white freestone, in the Elizabethan style, and finely situated among well-wooded grounds on a height overlooking Sydney Cove. Sydney university occupying a commodious building and furnishing a good education in classics, mathematics, and natural philosophy; a R. Catholic college, a normal, and several other superior schools; the new court-house, and adjoining it the new jail built on a superior scale, with a view regard to the classification of prisoners; theatre, a museum, the legislative and executive council chambers consisting of a handsome range of stone-buildings, with a noble colonnade, forming a verandah and balcony, the new barracks, a large but plain series of buildings, the custom-house, public library public markets, the benevolent asylum and two hospitals. society for the promotion of the fine arts and floral and horticultural societies.

Sydney has not yet reached the period when any great number of its inhabitants must look to manufactures as a

source of employment, but the trade is very extensive and enjoys facilities of which few other ports can boast. Its haven about 15 m. long, and in some parts 3 m. broad is completely landlocked and indented by numerous creeks, with depth of water sufficient to allow the largest vessels to enter, and lie close to the warehouses which line the shores. To make the accommodation more complete, a circular quay has been erected at an expense of more than £27,000. Nor have the means of defence been altogether overlooked. On the highest ground within the N. portion of the town, an admirable site for a citadel has been selected, and partly constructed. Several other forts occupy commanding positions within the cove, and were the defences made complete, by the erection of batteries on the two lofty headlands which, about 1½ m. apart, form the

entrance of Port Jackson and George's Head, which immediately fronts it, a hostile approach by sea might justly be regarded as all but impossible. The principal exports of Sydney are wool, tallow, and hides, and the produce of the southern whale-factory, particularly whale-oil and whale-bone, the principal imports are grain and provisions, including tea, coffee, sugar &c. wine and spirits, soap and candles, wearing apparel, furniture, carriages, and various articles of ordinary manufacture, so that, as a whole, the trade is a very important one. In 1800 the value of the imports amounted to £7,800,000 and of the exports to £5,600,000. The great

load, presents a very pleasing and even imposing appearance. During the first years of its existence, it consisted of a number of paltry huts, huddled together in scattered irregularity without any preconceived arrangement, and that part of the town, notwithstanding numerous alterations and improvements, is still its least inviting quarter. But elsewhere the streets intersect each other at right angles, and are so spacious that not fewer than 36 of them have carriage-ways of not less than 36 ft., and foot-ways of not less than 12 ft. wide. All these streets are well paved or macadamized, remarkably well kept, and lighted with gas. The houses seldom exhibit

stage of wool was exported in 1861-4 to the following extent—

Report of Wool from SYRACUSE

Year	Wool	Value
1861	18,225,345 lbs	\$1,792,295
1862	17,207,000	1,643,622
1863	12,294,207	1,222,000
1864	10,229,000	—

The discovery of gold in the colony (see *NEW SOUTH WALES*) has given an immense impetus to the trade of Syracuse, and added another most important article of export.

Gold brought to SYRACUSE from the Mines.

Year	Ounces	Value
1861	161,894	252,504
1862	180,550	284,230
1863	173,890	282,130
1864	148,000	234,518
1865	167,120	238,725
1866	120,000	176,552
1867	148,128	236,100
1868	162,255	250,000

In regard to the means of transport within the town itself and in the largest city, Sydney is by no means deficient. Omnibus, hackney-coaches, and cabs are numerous in its streets as in those of the other cities of the United Kingdom. Stage-coaches run regularly to all the most important towns and steamers ply daily between Sydney and Parramatta, and at longer intervals to Melbourne, Adelaide, Launceston &c. For ordinary recreation a large area, about 2 m. in extent, and called Hyde Park, has been judiciously reserved and already forms one of the chief attractions of the place. One side of it is appropriated as a botanical garden the other extending along the shore, and raised a few feet above the rippling waves, is laid out in winding walks and terraces, arbours, shrubberies, and verdant slopes. The management of the city is vested in a corporation which has the power of meeting its expenditure by levying a police-rate. Though the population is of a very heterogeneous description, the good order of the community is seldom disturbed. Sydney was founded in 1788, and named in honour of Viscount Sydney the colonial secretary of state. It made comparatively little progress till the time of Governor Macquarie, who caused a survey to be made of the whole locality marked out a regular plan for future buildings, and made many other important improvements. It received its charter of incorporation in 1842. In 1846 it had 28,866 (1861), about 100,000.

SYHOON, or **SINHOUS** (anc. *Sarus*), a river Asiatic Turkey rises among the mountains of Taurus, N F Beilan, flows first N W past Adana, and 35 m below falls into the Mediterranean. total course, about 120 m.

SYLT, an Isl. Denmark. See *Selt*.

SYLVA, a river, Russia, rises in lat. 57° 30' N in a branch of the Ural Mountains, gov. Tver, flows generally E N W., joining the in of Kungur and after a course of nearly 500 m. joins L. bank Tschud uera, 24 m. N E Perm.

SYMI an Isl. Asiatic Turkey S.W. coast Anatolia, 18 m. N W Rhodes, at the mouth of the gulf of the same name (anc. *Syme Dorada*), lat. 36° 30' 45' N lon. 27° 54' 15' E. (a). It is 6 m long, and 4 m broad high, rocky, and barren, rising to about 1000 ft. above sea-level, composed of grey limestone. outline irregular, rocks bold and steep. Deep indentations mark both its N and S extremities. The soil is extremely unproductive. Commerce and enterprise have rendered this sterile spot a thriving mart. It is a depot for sponge and wool. The former article is found in the rough bearing sea, and employs the male population during the summer to procure it.—**SYME**, the cap. and only town on the island, is a thriving place, at the head of a bay on the N E angle of the island. The harbour is long and narrow with deep water and vessels lie close in. Pop. about 1000.

SYMINGTON, two pers. Scotland.—1 *Ayr* 4 m. by 13 m. Pop. 902.—2, *Lincoln*; 3 m. by 13 m. Pop. 536.

SYMI HELIOPOL, a town in Russia. See *Symonopol*.

SYMITHOEN (RAJAH) a vil. and com. Belgiana, prov. Hainaut, 3 m. E. Maa with a brewery a blacksmith, flour-mill, and lands in agricultural produce. Pop. 1157.

SYKORM, a vil. and com. Belgiana, prov. E. Flandre, 10 m. S.W. Ghent; with a church, schoolhouse, hospital, orphan asylum, and two communal schools; some weaving, breweries, and corn and oil mills. Pop. 2767.

SYRA (anc. *Syros*), an Isl. of the Archipelago, belonging to Greece, and included in the N Cyclades, 11 m. S. Andros, lat. (E. side) 37° 28' 54" N; lon. 24° 56' 45" E. (a); length, N to S, 16 m.; greatest breadth, nearly 7 m. The coast is bold and rugged, with numerous indentations, one of which, on the E., where the capital of same name stands, furnishes an excellent harbour; the interior is intersected by hills and narrow valleys, and though in some parts almost sterile, partly from a deficiency of water, is generally covered with a soil of great fertility, producing in abundance wheat, barley, cotton, wine, and figs. The climate, cooler and more humid than that of the surrounding islands, has the reputation of being very salubrious.—**SYRA**, the town near the site of the ancient Syros, consists of a number of tolerably spacious streets, and well-built houses. It is the see of a bishop, and the residence of a British consul, and has several churches, and a considerable trade greatly favoured by its port, and the visits of the Austrian and French steamers, which call regularly here. During the war of independence, Syra became the centre of the Greek commerce, and made very rapid progress, increasing in population from 5000 to nearly 30,000. The peace, by restoring the freedom of other ports, deprived it of the prosperity which it owed to adventurous circumstances, but its natural advantages are still great enough to make it of considerable importance. F (1853), about 30,000.

SYRACUSE (Latin, *Syracusae*), a town and seaport on S.E. coast, Isl. Sicily cap. prov. of its name lat. 37° 5' N lon. 16° 18' 30" E. (a). It stands on the island of Ortygia,

a tongue of land projecting S. from the mainland, and separated from it by a canal or fosse. To the W of the island is the great harbour, so capacious, so easy of access, and so secure, as to make it one of the best ports in the Mediterranean to the E. is the little harbour. It is rather strongly fortified being inclosed by walls flanked with bastions, and defended by other works. The town is very indifferently built, and the houses, though tolerably regular, are narrow and dirty. The principal edifices are the cathedral, partly on the site, and partly actually composed of an ancient temple of Minerva; the church of St. Philip, and numerous other churches, several

ral caravans, a collage, picture-gallery, concert-house, library, and bazaar. The celebrated fountain of Arethusa (which is now only a small pool of not very pure water, and is used for the most ordinary domestic purposes. Trade, once so important, has gradually dwindled away and is now almost confined to insignificant exports of oil, corn, fruit, wine, hemp, and salt-petre. Modern Syracuse, both in extent and appearance, is a mere shadow of what it was in ancient times. The island to which its site is now confined was only one of four quarters, others stretching far on the mainland, Acrodrus to the E., Tyabe to the N., and Neapolis to the N.W., crowned by the strong fortress of Epipoli, including a space the extent of which, including Ortigia, was at least 200 m. and containing a population which has been extravagantly estimated at a million, and may possibly have reached a fourth of it. There are many remains which attest the former magnitude and magnificence of the city, but the work of devastation has been rapid and complete, and the remains are far fewer than might have been anticipated. The best preserved and most interesting are those which, though the work of human hands, could scarcely be destroyed. They are called temples, or prisons, and consist of immense and deep excavations cut in the solid rock, with steep sloping sides, which made access impossible and must have admir-

THE EAR OF DIONYSIUS AT SYRACUSE.—From Light's *Modern Sicily*

bly served the purposes of the inhuman tyrants into whose hands the city repeatedly fell. In connection with the fortress of Neapolis, is the famous cavern known by the name of the Ear of Dionysius, along which, by means of grooves carefully cut and polished, the slightest whisper of the prisoners is supposed to have been readily conveyed. Among the distinguished persons to whom Syracuse gave birth may be mentioned the poets Theocritus and Moschus, and above all the celebrated mathematician and mechanist, Archimedes. Pop. 16,806.—The province, occupying the S.E. portion of the island, length and breadth 63 m., is mountainous but includes the most fertile, but now neglected and partially marshy plains of Catania. Pop. 175,700

SYRACUSE, a town, U. States, New York, at the junction of the Oswego and the Erie canals, and on a branch railway connected with the trunk line between Buffalo and the Hudson, about 140 m. W. Albany. In 1850 it consisted of a few scattered and indifferent wooden houses, and has since sprung up, as if by magic into a large and handsome town, with spacious and well-built streets, churches with glittering spires, splendid hotels, large and lofty stone warehouses and canal-

basins crowded with boats. In addition to the extensive traffic for which its railroads and canals afford it unrivalled facilities it has large salt-works, supplied with brine from the pits of Saline, in the vicinity, and manufacturing chiefly coarse salt, by solar evaporation, to the extent of nearly 800,000 bushels annually. Pop. (1850) 23,371.

SYRIA (Turkish *Sham-el-Jezir*) a country, Asiatic Turkey, between lat. 31 and 37° N. and lon. 35° 30' and 50° E. and bounded, N. by the Taurus range, separating it from Asia Minor, N.E. the Euphrates, E. the Syrian desert, S.E. and S. Arabia, S.W. Egypt, and W. the Mediterranean. greatest length, N. to S. about 420 m. greatest breadth, about 190 m.; area, nearly 50,000 sq. m. The coast has some low sandy tracts but is in general though not deeply indented lofty and precipitous, rising, particularly in Mount Carmel, to the height of 3000 ft. It has few good harbours, and is often lined with shoals, which make its navigation dangerous. The most remarkable feature of the interior is a mountain-chain, which, continued from the Sinai peninsula in the S., stretches over the whole length of the country, till it becomes linked with the Taurus in the N. The S. part of this chain, where it enters Palestine, consists of two parallel ranges. The W. range, lowering as it proceeds N., assumes the form of a plateau, which has an average height of about 2500 ft. in the vicinity of Jerusalem, but afterwards sinking rapidly, has at the N. extremity of the plain of Edessa, near the foot of Mount Tabor a height of rather less than 450 ft. At this point, however, it assumes a new elevation, and, taking the name of Lebanon or Libanus attains in its culminating point the height of 9000 ft. The E. range forms a continuation of the great chain of W. Arabia, pursues the same direction as the W. range, and though it also rests on a plateau which towards Damascus, has a height of above 2000 ft., is in general of moderate elevation. On approaching Libanus it takes the name of Anti Libanus, the only space between them being occupied by a longitudinal valley known by the name of Coles Syria. Notwithstanding its much lower average elevation, the culminating point of the whole chain occurs in Anti Libanus, which in Jebel-el Shakh about 30 m. W. of Damascus attains a height variously estimated by some at 10,000 ft. and by others at more than 12,000 ft. This mountain, visible from almost all parts of Syria, forms an important landmark for the guidance of its caravans. The mountain chain now described divides Syria into three regions—a W. consisting of a narrow belt of lowland, extending between the sea and the mountains sometimes sandy but generally fertile, a central, occupied by the principal mountains of the chain, and an E. consisting for the most part of a bare, arid, sandy plateau occasionally relieved by a few oases. The principal rivers are the Euphrates, confined to a part of the N.E. frontier and the Jordan or Ghor which, rising on the N. of Jebel el-Shakh, continues its course almost due S. through a valley remarkable particularly in its S. part, for its great depth beneath the level of the sea. In the course of the Jordan are the lakes of Merom and Tiberias, the latter justly celebrated as the scene of some of our Saviour's miracles; and at its mouth is the far larger lake of the Dead Sea, which also occupies a memorable place in Scripture history and still attests, in the volcanic rocks lining its shores, and the mineral ingredients of its waters, the fearful catastrophe which overthrew and buried the cities of the plain. The climate of Syria is salubrious among the mountains, but excessively hot, unhealthy and often pestilential, along the seashores. Much of the soil, more especially in the valleys of Lebanon, is remarkable for its fertility, and if its natural advantages were not more than counteracted by its wretched political condition, it might easily at least in its cultivable parts, be rendered one of the richest regions of the world. Among its principal products are corn, cotton, fruit in almost endless variety, indigo, sugar-cane, grapes, mulberries, olives, and tobacco. Its forests also are extensive, and include among their trees, though now only to a limited extent, the famous cedars of Lebanon. The chief domestic animals are camels, oxen, goats, sheep, mules, asses, and horses. Grapes is abundant, and the bees yield honey in such quantities, and of such excellent quality, as to form an important branch of rural economy. The minerals, as well as the general policy of the country, have been imperfectly explored, the only metal of any consequence appears to be iron. Both manu-

between and trade are in a very languishing condition. The former, once celebrated, are now confined to a few of the principal towns, among which may be mentioned Damascus, which is still in some request for its silks and sword-blades; the other leading articles are cotton goods, soap, glass, and confectionery. The trade is chiefly confined to Alexandria, Tripoli, and Beyrout, especially the last, which is the only commercial port of Syria that has made much progress in recent times. The inhabitants, roughly estimated at about 3,000,000, consist chiefly of Greek, stationary Arabs, and

1, Male of Hama; 2, Woman of Hama; 3, Man of Hama.

Turks among the mountaineers the most celebrated tribes are the Druses, Maronites and Arianites. There are also several nomadic tribes, as Turcomans in the N. Kards on the banks of the Euphrates, and Bedouins in the Syrian desert. The Turks and Arabs are Mahomedans; the Greeks generally belong to the Greek church; the Maronites form a peculiar Christian sect. For administrative purposes Syria, formerly composed of four pashaliks of Acre, Aleppo, Damascus, and Tripoli, is now divided into three governments or *vilayets*—Haleb, subdivided into four provinces or *sanjaks*, of which Haleb, or Aleppo is the capital. *Saida*, subdivided into eight *vilayets*, cap. *Saida* or *Sidon*, and *Syria* proper subdivided into four *vilayets*, cap. *Damascus*. Syria, at an early period, became part of the Assyrian Empire, and afterwards passed to the Persians under Cyrus, and the Greeks under Alexander. It afterwards became the centre of the empire of the Seleucids, from whom it was conquered by the Romans, during whose domination (Antioch and his celebrated queen Zenobia, established a short-lived kingdom at Palmyra. On the division of the Roman Empire into a W. and E. Syria fell to the latter but was taken by the Arabs in 635. It was governed by caliphs till 968, and then passed under various masters, till it was conquered by the Seljuk Turks in 1078. It was partly wrested from them by the Crusaders, who founded in it the kingdom of Jerusalem which lasted till 1268, when it was taken by the Mamelukes, who united it with Egypt, and retained possession of it till 1517 when the Ottoman Turks added it to their empire. The most important events in the modern history of Syria are its conquest by Mahomet Ali in 1835 and its restoration to Turkey, in 1840, by the intervention of the great European powers.

SYRIA or **SYRIEN**, a co. Austria, in the E. of Belovien, bounded N. by Hungary, E. the Danube, and S. by the Black sea, 522 sq. m. It is traversed throughout its whole length by the *Franks Mountains*, and is at once among the most beautiful and romantic, as well as the most fertile parts of the Austrian dominions. It is alike productive of corn, wine, fruit, and oil, and is particularly

celebrated for its places and water-melons, which the warmth of the climate brings to great perfection. Its capital is Vienne. Pop. 168,400.

SYRIA (SEYLA and SEYLA). The SEYLA, and SEYLA, a river, rises in the N. E. of gov. Vian, enters gov. Novgorod flows easterly N.E.W., and joins L. bank Wismutka, after a course of about 300 m.

SYRISKELE, a vil. and com. Hungary, prov. W. Flanders, 40 m. E. Bruges. It has manufactures of linen, a brewery, two oil-mills, and a trade in corn and cattle. Pop. 1784.

SYTCHFWER, or **SYTCHWERA**, a co. Russia, gov. and 98 m. N.E. Smolensk; with two churches several manor-houses and breweries, and com. transit trade. Pop. (1850) 3306.

SYZHAN, a co. Russia, gov. and 78 m. S. Simbirsk, cap. circle, on a height above the Syzhan and Kryzma, both of which here join r. bank Volga. Though, after Simbirsk, the last town in the government, it is poorly built, and has unpaved streets. It contains two wooden and eight stone churches, and a monastery; and has manufactures of soap and leather a fishery, and a trade in corn and cattle. Pop. 7493.

SZAAAR, a vil. Hungary, Thither Danube, on Szabolcs, 1 m. from Bihak, with a church and a trade in grain. Pop. 1184.

SZABAD SEALLAS, a vil. Hungary Thither Danube, Little Kumania, 84 m. N.W. Hias with a Protestant church, a courthouse, and a trade in wine. Pop. 4220.

SZABADHELY, a vil. Hungary Thither Theos, co. and 8 m. from Arod, on the Maros with a Greek church, and a trade in corn, cattle, sheep, and swine. Pop. 1440.

SZAHADI (Fuz), a vil. Hungary, Thither Danube, co. and 12 m. from Vacsapin with two churches, and a trade in corn. Pop. 1310.

SZABADJA (SZENT KIRALY), a vil. Hungary, Thither Danube, co. and 8 m. from Vacsapin with two churches, and a trade in corn and wine. Pop. 1494.

SZABOLCS, a co. Hungary, bounded, E. by Kompin N.E. Ungvar and Beregh, E. Szabolcs, S. Bihar S.W. Great Kumania, and W. Heves and Borsod area, 2186 sq. m. It may be described as an extensive sandy plain, interspersed with extensive mountains. The principal river is the Tisza, which makes a large loop round the N. and W. part of the county and receives the *Iszmer*. Some parts of the county are fertile alluvium, and even many of the sandy districts have such an admixture of fertile soil, that the corn raised more than satisfies the home consumption. Besides cereals, fruit, tobacco, and melons thrive well. Great numbers of cattle and sheep are fed on the rich meadows. Both game and fish abound. This county is divided into the four districts of Kleinsandorf, Dada, Neudorf, and Bacher. The cap. is Nagy Kall. Pop. 225,990.

SZAKAL, a vil. Hungary, Thither Danube, co. and about 70 m. from Tisza, on the small of the Kapos with a church, and a trade in corn and wine. Pop. 1634.

SZAKALEAZ, a vil. Hungary, Thither Theos, co. and 3 m. from Temesvar on the Borogiano. It contains a C. Catholic parish church. Pop. 3722.

SZAKALOVACZ, a vil. Hungary, 7 m. from Weiskirchen, with a Greek church. The inhabitants belong chiefly to an Illyrian frontier regiment. Pop. 1144.

SZAKOS (MAGYAR and TÖRÖK), two adjacent places, Hungary Thither Theos, co. and about 55 m. S.W. Temesvar, with a Greek church. Pop. (Habsburg-Magyar), 2677, (Balkans) 1665.

SZAKTS, a market in Hungary Thither Danube, co. Tisza; with a church, and some trade in cattle, wood, and wine. Pop. 7771.

SEALAD a co. Hungary, bounded, N.E. by Vacsapin; S.E. Semreh from which it is partly separated by Lake Balaton; S. Civil Croatia, from which it is separated by the Drava W. by the N.W. Eisenburg, area, 1605 sq. m. A ramification of the *Tablitz* proceeding from Styria into co. Eisenburg, entering co. Sealad, divides into two branches, and proceeding N. crosses the *Tablitz* in that direction fifty. The rest of the county is deeply indented, except towards the Balaton Lake, where it becomes flat and marshy. The principal rivers are the Drava, the Mur, and the Sank. The soil, which is well cultivated, is fertile in all kinds of cereals, particularly wheat. Considerable attention is paid to the rearing of stock. The forests are extensive, and both game

and fish abound. This county is divided into six districts—*Szék-keresztes* (the capital), *Szék-keresztes*, *Tusnáti Kapornak*, *Lélek*, and *Mezők*. Pop. 257,386.

SZALATNA (MAAG) or *TELEK SZALATNA*, a market in Hungary, co. Szék, r. bank Szék, 6 m. E. N. D. Alshai with two churches and a mineral spring. Pop. 1491.

SZALATTA, a vil. Hungary, Thither Thais, co. Bihar with two churches. Pop. 4378.

SZALKA, several places, Hungary—1, A market in Hükör Danube, co. Hód, on the Ipoly, 6 m. from Gán with a church, and a trade in corn, wine, and cattle. P. 1178—2, A vil. Thither Danube, co. Tolna, in a well-wooded district, 20 m. from Buda. It has a Lutheran church. P. 1469.

SZALOK, several places, Hungary—1 (Alsz) A vil. co. Barcs, 80 m. from Eger; with a church.—2, (Eger) A vil. co. Hód, 2 m. from Eger; with a church, and a trade in wine. Pop. 1635.—3, (Tócsa) A vil. Hód Thais, co. Hód; with two churches, and a trade in corn. Pop. 1900.—4, (Zagy) or *Gros-Schlagendorf*, A vil. Hód Thais, co. Sopron, at the foot of the Carpathians, 9 m. S. W. Kismark with two churches, manufactures of linen, several distilleries, a trade in corn, flax, and cattle, and mineral-springs, with a bathing establishment. Pop. 6004.

SZALONAKA, a vil. Hungary. *See SZALONKA*.

SZALONKA, a market in Hungary Thither Thais, co. Bihar, 60 m. S. W. Margit, with a church, and a considerable trade in cattle. Pop. 7219.

SZALT, a vil. in Syria, parish, Damascus, 45 m. N. E. Jera salom. The houses are usually small, with flat roofs reeling upon an arch; the streets are narrow and dirty, and form successive terraces. Number of houses altogether about 500 of which 300 are Turkish, and 200 Christian.

SZAMOBOD, or *Szombod*, a market in Austria Croatia, co. Agria 93 m. N. E. Carlsbad with a church, Franciscan monastery, a castle, and several schools and a copper-mine. Pop. 2265.

SZAMOB, a river, Austrian dominions formed in Transylvania by the Great and the Little Szamos, the former coming from the S. Carpathians on the E. and the latter from the S. W., and forming a junction near the town of Dacs. The united stream proceeds very circuitously in a N. W. direction, enters Hungary, and joins the bank Thais, where it is joined by the Krasna, after a course of about 220 m. It has no alluvial of any consequence.

SZAMOB-URVAH, in Transylvania. *See ARHEVENSZOD*.

SZANAD, a vil. Hungary, Thither Thais, co. Torontal, 3 m. from Stein-am-Anger. Pop. 2874.

SZANISZLO a vil. Hungary, Thither Thais, co. Szék, near 4 m. from Nagy Karoly, with a Greek church, and a trade in corn. Pop. 2169.

SZANTO a market in Hungary, Thither Thais, co. Abaujvar, near the N. shore of a lake at the foot of the Fohay Hills with two churches. Good wine and tobacco are raised in the vicinity. Pop. 4995.

SZANFO—1, A vil. Hungary, co. and 12 m. from Pusht, with a church. Pop. 1199.—2, A vil. co. Tolna, 30 m. from Buzony, with a chapel, a mill, and a trade in corn, cattle, timber and wine. Pop. 1203.

SZANTOVA, a vil. Hungary, co. Bacs L. bank Danube, 8 m. N. E. Buda. It contains a R. Catholic church and has some trade in cattle, corn, and wood. Pop. 2887.

SZANY a market in Hungary, Thither Danube, co. and 87 m. S. E. Oedenburg, with a church, chateau, and the ruins of an old castle. Tobacco is extensively grown in the district. Pop. 5160.

SZARAYOLA, or *SARAYOLA*, a vil. Hungary, Thither Thais, co. Torontal, on the Maros, with a Greek church, and a trade in corn and cattle. Pop. 3629.

SZARFOLD a vil. Hungary, Thither Danube, co. and about 30 m. from Oedenburg, with a parish church, and a trade in corn, cattle, and timber. Pop. 1024.

SZARKAD a market in Hungary, Thither Thais, co. Bihar, on the Gyepes, 80 m. S. W. Grosswarden, with a Protestant church and a trade in corn. Pop. 3824.

SZARHOD, a vil. Hungary, Thither Danube, co. and 60 m. N. E. Fehér, on the Maros, with a R. Catholic and several Greek churches, a Benedictine monastery and school, a considerable trade, and several annual fairs. The inhabitants are chiefly Jews. Pop. 6744.

Vol. 11

SZARTSLA, a vil. Hungary, Thither Thais, co. Torontal, 8 m. from Batsch, with a Greek parish church, and a trade in corn, cattle, and timber. Pop. 1853.

SZARVAS, a market in Hungary, co. and 89 m. W. N. W. Baka, in a plain on the Körös, with two churches, an economical institute and industrial school, and a considerable trade in corn and cattle. Pop. 1840, 17,500.

SZARVKEO or *VOSZAR*, a market in Hungary, Thither Danube, co. Oedenburg 4 m. from Gross-Heden, with a parish church. Pop. 1704.

SZARZ-DALVA, or *DEMOZ*, a vil. Austria, Transylvania, 12 m. from Schleiberg, with two churches. Pop. 1114.

SZARZ, Broom a market in Austria, Transylvania, co. and N. E. Thorda, r. bank Maros, here navigable. It contains two Protestant, and several other churches, a normal and other schools, a civil and military hospital, a casino, and orphan asylum. It is the seat of a superior civil and criminal court and has manufactures of woollen and leather, and an important trade in iron, wood, honey wax and wine. Szaraz-Beg is supposed to occupy the site of the Roman Rhodomon, and near it are the remains of the Roman salt-mines, *Salinae Minorae*, where a bathing establishment has been erected and is much frequented. Pop. 5000.

SZARZFALU, or *SARAFALA*, a vil. Hungary Thither Thais, co. Ugocsa, 3 m. from Nagy-Baclos, with a Greek church, and a trade in tobacco. Pop. 1269.

SZARZKA, or *SARZKA*, a vil. Hungary Thither Thais, co. Krasova, m. plain on the Maros, 14 m. S. W. Oravica. It is the seat of a mining district, and contains a R. Catholic parish church. In the neighbourhood are mines of iron, copper and lead. Pop. 2026.

SZARZVAROS a market in Austria. *See BACOS*.

SZARHAI, or *SARHAI*, a vil. Hungary, cap. co. of its name, in a marshy plain on the Szamos, 69 m. N. E. Grosswarden. It is divided by the river into two distinct market towns, Szarhar on the left, and Nemethi which was once fortified and has some of its fortifications still remaining, on the r. bank. It is very indifferently built, and has only its principal street paved. It is the see of a bishop, contains a cathedral, two Protestant and two Greek churches, a secondary lyceum, gymnasium, normal school, and Franciscan monastery, and has a considerable trade in corn wine, bread, fish, and wool. There are salt-mines in the neighbourhood. Pop. 15,800.—The court for Szarhar (Vernagy) area, 1705 sq. m. is in the E. and S. E. mountains, being traversed by lofty ridges, the highest of which are the Bihard and Feketehegy in other directions it is flat and partly marshy particularly along the course of the Krasna, where the moraine of Etsed extends without interruption for about 18 m. from Gross-Karoly to the banks of the Thais. The principal rivers are the Thais, which forms part of the N. boundary, and its tributaries the Szamos, Krasna, and Tur. The plains, were sufficiently elevated above the waters, are of great fertility producing abundance of wheat, maize, fruit, flax, hemp, and tobacco. The greater part of the lower slopes are occupied by vineyards, and above them are extensive plantations of chestnuts. The loftier ridges are well covered with wood and the intervening valleys afford excellent pastures, on which great numbers of cattle, sheep and swine are reared. The rearing of bees also is an important branch of rural economy and the honey and wax obtained from them form considerable articles of export. Both game and fish are in the greatest abundance. The minerals are of considerable importance, and include gold, silver, copper, zinc, and particularly salt. Szarhar is divided into four districts—Nagy-Banya, Kraszka, Szarhalka, and Nyir. Pop. 344,800.

SZATSAI, a vil. Hungary, co. Marmaros, 80 m. from Balghet, with a Greek church and a synagogue. Pop. 1373.

SZECZELIN, a vil. Russian Poland, 80 m. S. W. Angustowo, on a small affluent of the Bober. It has a large market-place, spacious and paved streets, two churches, a Jewish college, with a scholastic establishment, a convent of the Sisters of Mercy, a large synagogue, and several other schools, and is much frequented annual fairs. Pop. 1845.

SZECHER a prov. China. *See SHENYU*.

SZECELLEN or *SZECELLEN*, a market in Hungary, co. Hód, 16 m. S. S. E. Schenau, with a church, and a trade in corn, wine, and wood. Pop. 1057.

228

SZEBEN (Kun), or **KANNA**, a tn. Hungary, co. Bara, on the *Tura*, with a *Floris* college and a gymnasium. P 3780.
SZEBENY, a market in Hungary, Hither Danube, co. Neograd, on the *Ipoly*, 2 m. from Balass-Gyarmath; with a church, Franciscan monastery and ruined castle, a magnificent chateau, and some general trade. Pop. 3380.

SZEBEWOZE, a market in Hungary. See *Gala-Szeves*.
SZEGEDIN, a tn. Hungary Thither Thais, co. Coegrad, is a marsh, 7 bank Thais, 80 m. W Arad. It is divided into the town proper, the fortress, the upper and under suburbs and the desert. The town proper has no walls, but is tolerably well built, containing many handsome houses, and spacious but unimproved streets. The parish church here, surmounted by a tower, is in possession of the *Piarists*, who have also a college, with gardens. The fortress, close on the Thais, is surrounded with walls and ditches, and entered by two bridges. It is regularly garrisoned, and has its own church, and a house of correction. In the upper suburb there is a Minorite church and cloister, and a large mill-magazine; in the lower suburb, a Franciscan church and monastery, and a hospital. The town-market consists of a row of houses, with vines are called the wine-gardens behind, and in its vicinity the terraces, large barracks, and some industrial establishments among others, extensive cloth and tobacco factories. The trade, which is important, is chiefly in tobacco, salt, wool, cotton, corn, and cattle. A great many barges are built here. Pop. (1846) 25,900.

SZEGHALOM, a vil. Hungary Thither Thais, co. Bekes, 66 m. S.W. Margitsa with a church, a quarry, and four mills. Pop. 5479.

SZEGYAR, a vil. Hungary Thither Thais, co. Coegrad, 80 m. S.E. Pesth with a church, handsome country buildings, and a considerable trade in corn, cattle, and fish. Pop. 4801.

SZEMER, 24 m. from Lappa, with a Greek parish church. Pop. 1614.—2, for *Szepes* Thither Thais, co. Krasova, near the Karas, 15 m. S. Bolas, with a handsome church. Pop. 3004.

SZEKELY-Kisvasszony, a market to Hungary Transylvania, still Udvarhely in a somewhat sterile district on the Great Kolos. Its staple manufacture is serge, which have an extensive sale. Pop. 4600.

SZEKELY, a market in Hungary, two nearly contiguous vils. Hungary, co. and 16 m. from Tokos, with two churches, and a trade in corn, timber and tobacco. Pop. 2985.

SZEKELYHID, a market in Hungary, co. Bihar, 26 m. S.E. Debrecen with two churches, and the remains of an old fortress. Pop. 5720.

SZEKEREM, or **SZEKER**, a vil. Hungary, Transylvania, co. Hunyad, 53 m. W N.W. Hermannstadt with two churches, and the most important gold and silver mines in Transylvania. Tellurium is also found here. Pop. 1643.

SZEKESRAT, a vil. Hungary Thither Thais, co. Temesvar, 17 m. from Arad, in a fertile district; with a Greek church. Pop. 2222.

SZEKESZARD, a tn. Hungary. See *SZEKESZARD*.
SZEKESZARD, a market to Hungary co. Banya, on an arm of the Danube, 9 m. N. Mohacs with a church, a handsome chateau, and some trade in corn, wine, and wool. P 3247.

SZEKESZVAR, or **SZEKESVAR**, a vil. Hungary co. and 25 m. N. Arad; with a Greek church the ruins of an old castle, and some trade in corn and cattle. Pop. 2798.

SZEKESZVAR, a vil. Hungary Thither Thais, co. and 30 m. S.E. Pesth, on the Targu with a R. Catholic church and a synagogue. Pop. 2653.

SZEKESZUT, two places, Hungary.—1, a market to the *Fiumara*—2, a vil. Hither Danube, co. Presburg, 6 m. from Munkacs with a handsome church. Pop. 1484.

SZELIST, a vil. Austria, Transylvania, in the land of the Szekes, 16 m. W Hermannstadt. It has several mills, and a trade in cattle and cheese. Pop. 1800.

SZELL, two places, Hungary.—1, (*Alte*), a vil. co. Pesth with two churches, and a trade in cattle and cheese. Pop. 1808.—2, (*Alte*), a vil. co. Presburg, 9 m. from Szekes with a fishery and a trade in cattle. Pop. 1879.

SZELLIN, or **SZELLIN**, a vil. Austria, Transylvania, 9 m. W Hermannstadt, in a deep valley, covered with orchards and vineyards. It has a Protestant and two

Greek churches, the remains of an old castle, and a trade in corn and wine. Pop. 3004.

SZELLY, or **SZELLY** (*Alte* and *Alte*), two nearly-contiguous vils. Hungary Thither Danube, co. Presburg, 20 m. from Tyrnau with a church. Pop. 5180.

SZELNICE, or **SZELNICE**, a market to Hungary, Hither Danube, co. Lipava, 6 m. N.W. Saint-Miklos; with a church and manufactures of salt-petre. Pop. 1183.

SZEMERK, several places, Hungary, particularly,—1, (*Szepes*) a vil. Thither Danube, co. Raab, 2 m. from Tsch, with a Protestant and a R. Catholic church, and a trade in corn and cattle. Pop. 1879.—2, (*Szepes*), a vil. Thither Danube co. and 30 m. from Oedenburg, with a church. Pop. 1022.

SZEMIAK, a vil. Hungary Thither Thais, co. and 10 m. from Arad, with two churches, and a trade in corn and cattle. Pop. 1904.

SZEND, a vil. Hungary Thither Danube, co. Komorn, 6 m. from Tsch, with two churches, a flour-mill, a fishery and a trade in wine. Pop. 1126.

SZENDIO, or *St. Andrew*, a market to Hungary Thither Thais co. Bekes, 1 bank *Ipoly*, 80 m. N. Munkacs. It has two castles, one in ruins and the other still habitable. R. Catholic church, synagogue, Franciscan monastery and sulphur-bath. The district is fertile, and produces much wine and tobacco. Pop. 2620.

SZENICZ, a market in Hungary, co. and 44 m. N.W. Neutra with two churches, a handsome chateau, and bathing establishment, several mills, important markets, and a considerable trade in corn, hemp, flax, and wine. Pop. 3000.

SZENOGRAD, or *Szenograd*, a vil. Hungary Thither Danube, co. Honth on the forehead of *ool* Bold and Neograd, with a church, a flour-mill and a trade in cattle. Pop. 1186.

SZENT, the Hungarian for *Saint*, and the prefix of numerous places, Hungary.

SZENT AGOTHA, or *St. Agatha*, a market in Austria Transylvania, co. Fogaras, on a small stream 30 m. from Alsó-Uta, with three churches. Pop. 2450.

SZENT ANDREA, or *St. Andrew*, several places, Hungary particularly,—1, a vil., co. Bekes, on the *Körös*, near the frontiers of Great Kumania, with a Protestant and a R. Catholic church. The ground in the vicinity is fertile, and offers offers from inundation of the river. Pop. 8740.—3, A market in, co. Tamas, about 6 m. from Kis-Betkerek, with a trade in corn and cattle. Pop. 2590.

SZENT ANNA (O and U), two nearly-contiguous market vils. Hungary co. Arad, with two churches. P 7090.

SZENT BAKKEX several places, Hungary particularly,—1, A market in, co. Bara, 1 bank *Gras*, 8 m. from Lave with an ancient Gothic church, and a trade in corn and wine. Pop. 1240.—2, A vil. co. Pesth 1 bank Danube, over which there is here a ferry 5 m. from Kalocsa. It has a trade in corn and timber. Pop. 1191.—3, A market in Transylvania, co. Lower Wessingburg, near Nagy-Enyed, with three churches. Pop. 919.

SZENT GALL, a vil. Hungary co. and 5 m. from Veszprem with a Protestant church, a saw and three other mills, and a trade in cattle and timber. Pop. 3203.

SZENT-GOTARD, a market in Hungary Thither Danube, co. Eisenburg, in the valley of the Raab, 2 m. from Raab-Karantur; with a church, an abbey, and a trade in wine. Montezuma defeated the Turks here in 1644. Pop. 850.

SZENTA, or *Szenta*, a market in Hungary, co. Raab, 7 bank Thais, 10 m. S. Kis-Kun, in a beautiful plain. It has two churches, and is famous for the victory which Prince Eugene gained over the Turks in 1693. Pop. (1846) 14,800.

SZENTES, a tn. Hungary Thither Thais, co. Coegrad, 29 m. N.E. Szeged; with a considerable number of well-built houses, a Protestant church with a handsome tower three other churches, and a townhouse, and a considerable trade in corn, cattle, and wool. Pop. (1846) 20,600.

SZEPETNEK, a vil. Hungary Thither Danube, co. Szabol, 8 m. from Nagy-Kanizs; with a church, and a trade in wood and cattle. Pop. 1461.

SZEPFALU, South-west or *Szentes* a vil. Hungary, Thither Thais, co. Temesvar, 4 m. from Galamburg, with a R. Catholic church. Pop. 1764.

SZERDAHELY (*Vacon*), a vil. Hungary Thither Danube co. Presburg, 8 m. from Tyrnau with a church. P 2461.

SZERED, a market in Hungary, Hither Danube, co. and 20 m. E. N. E. Pressburg, near the Wang, here crossed by a bridge. It has a church and handsome chateau, and a trade in wood. Pop. 3900.

SZEREDNYE, a market in Hungary Hither Theiss, co. and 11 m. S. E. Ungvár, with a church and two churches, several mills, and a trade in wine. Pop. 1780.

SZEREMLO, a vil. Hungary, Hither Danube, co. Pesth, about 9 m. from Baja with a church. Pop. 1478.

SZERENCS, or **SEKESZVAR**, a market in Hungary, Hither Theiss, co. and 88 m. S. W. Zemplin with a Protestant and a Greek church, a porchouse, the ruins of an ancient castle, and a considerable trade in wine and cattle. Pop. 2195.

SZESZUPPE, a river, Europe, rises in the N. E. of Russia Poland, wolded Angustow, forms part of the boundary between Russia and Prussia, enters prov. E. Prussia, and after a course of about 150 m. N. N. W., joins the bank Memel or Neman.

SZETSANY two places, Hungary:—1, A vil. co. Temes, about 4 m. from Guttenberg, with a church. Pop. 2294. —2, A vil. Thither Theiss, co. Temes 5 m. from Nagy Bekerek; with a R. Catholic and a Greek church, a mill, and a trade in corn and wood. Pop. 1547.

SZEXLAUD, a vil., or **SEKESZVAR**, a market in Hungary, Thither Danube, co. Tolna, 81 m. S. W. Pesth, on the Barva, and not far from the Danube, from whose inundations it is guarded by large dykes. It is for the most part well built; contains a Protestant and a R. Catholic church, a county-building, and high-school; and has an extensive silk mill, and a considerable general trade. Pop. (1846), 10,500.

SZIGETH several places, Hungary, particularly:—1 (*Siget, Anloeg, or Anloeg*), A to Thither Theiss, co. Maros, at the confluence of the Isz with the Theiss 221 m. E. N. E. Pesth. It contains a Protestant and a R. Catholic church, a synagogue, and county-building, and has a trade in salt, obtained from mines in the neighbourhood. Pop. 7000. —2 (*Szigetvár*) (anc. *Scorobur*) A to Thither Danube, co. Eger, in a marshy but fertile district, r. bank Alma, 20 m. W. Felsökáro. It is walled and defended by a castle, contains two churches one of which was formerly a mosque; a Franciscan monastery, townhouse, and magnificent chateau. Sigeth repeatedly distinguished itself by a valiant defence in the Turkish wars. Pop. 3020. —3 (*Szigetmonostor*) A vil., co. and 6 m. N. W. Raab. Pop. 535. —4 (*Győr*) A to co. and hard by Raab. It has a church and synagogue and raises vegetables and fruit for the supply of the market of Raab. Pop. 3700.

SZIHALOM, a to. Hungary co. Borsod, on the Eger 18 m. S. E. Eger, with a R. Catholic church. Pop. (ecclesiastical), 2174.

SZIKSZO, a market in Hungary, Hither Theiss, co. Abaujvar, in a plain, 10 m. N. E. Miskolc, with a church and a synagogue. Pop. (agricultural), 8689.

SZILLAS several places, Hungary:—1 A vil. Thither Theiss, co. Temes, 8 m. from Keszto with a Greek church. Pop. 1296. —2, A vil. Hither Theiss, co. Torna, on the Holdra, 20 m. from Komorn; with a R. Catholic church, a mill, and a trade in wine and cattle. Pop. 1906.

SZILBAR, a vil. Hungary Hither Danube, co. Bacs, 8 m. from Palanka, in a fertile plain with a considerable trade in grain and cattle. Pop. 1878.

SZILL, two places, Hungary:—1, A market to Thither Danube, co. and 26 m. from Oedenburg, with a R. Catholic church, and a trade in corn. Pop. 1785. —2, A market to co. Himgath, 10 m. from Kaposvár, with a trade in corn and cattle. Pop. 1511.

SZILVAS, or **PFALDENWALD**, a vil. Hungary, Hither Theiss, co. Borsod, about 12 m. from Eger, with a Protestant church, a flour and a paper mill, and a trade in wine and wood. Pop. 1101.

SZINA, or **SEKESZ**, two places, Hungary:—1, A vil. Hither Theiss, co. Abaujvar, 8 m. from Keszto, with a church, a synagogue, and a trade in corn. Pop. 1822. —2, A market to, co. Zemplin, 18 m. N. E. Nagy-Mihály, with a R. Catholic church, a castle, with fine gardens and breeding-stud, several mills, and a trade in corn. Pop. 1391.

SZINTÉRS, a vil. Hungary, Thither Theiss, co. Arad 8 m. from Blomatz, with a Greek church, and a trade in corn, cattle, and timber. Pop. 1492.

SZINTER-VARADNA, a to. Hungary, Thither Theiss, co. South, 81 m. S. W. Seged, with a Protestant and a R. Catholic church, a synagogue, castle, and extensive manufactures of earthenware. Pop. 3850.

SZERMA **SEKESZ**, a vil. Hungary, co. Borsod, in a plain, 8 m. from Miskolc, with a church, a castle with fine gardens, and a trade in cattle and excellent white wine. P. 1265.

SZIVACZ (O) a to. Hungary Hither Danube, co. and 20 m. N. E. Bacs, in a plain, on the Tisza, with a R. Catholic and a Greek church, a synagogue, and a trade in corn, wine, and cattle. Pop. 6645.

SZKALITE a vil. Hungary, Hither Danube, co. Trencsin, 8 m. from Lecsau with a church, and some trade in wood. Pop. 2180.

SZLATINA several places, Hungary particularly:—1 A vil. Thither Theiss co. Maros, on the Theiss, 2 m. from Belgeth with a R. Catholic church, extensive salt-mines, and a remarkable stream of natural gas, which issues from the ground, and has kept burning for many years. Pop. 1002. —2 A vil. Thither Theiss, co. Krasovo, 3 m. from Szasza with a handsome church, and several distilleries. Pop. 1035.

SZOBUSZ, or **HAJOSKÖRÖS**, a vil. Hungary Thither Theiss, co. Szabolcs, in a plain r. bank Kishely, 11 m. S. W. Debrecen, with two churches, and a trade in cattle. P. 16,000.

SZOBOTISZ, a market in Hungary Hither Danube, co. Nitra, 48 m. N. N. E. Pressburg, with an old ruined castle, two churches, a synagogue, and manufactures of cutlery and earthenware. Pop. 3185.

SZOLLÖS (*Nagy*) a market in Hungary Thither Theiss, co. Ugocsa, near r. bank Theiss, 41 m. W. N. W. Seged with a Protestant, Greek, and two R. Catholic churches, a chateau Franciscan monastery, county buildings and some trade in corn cattle wood, and wine. Pop. 3352.

SZOLNOK, a market in Hungary Thither Theiss, co. and 29 m. S. by K. Hely. It is a marshy district, r. bank Theiss, at the junction of the Pesth canal, and a little below the confluence of the Zagyva. It was once defended by a citadel, which is now in ruins, contains a Franciscan monastery now used as the church and a Turkish mosque, converted into a chapel and has a trade in fruit, wool, salt, and fish. A number of remarkable fossil-bones, among others those of the mammoth have been found here. Pop. (1846) 10,800.

SZOLNOK, or **ZALNA** a vil. Hungary Thither Danube co. and 27 m. S. W. Weissenburg with a church and a school. Pop. 1876.

SZOMBATHELY:—1, (*Magyar and Nemes*) two vil. facent vils. Hungary, Thither Danube, co. Vasvár, on the frontier of co. Komorn and Hahhwasenbourg, with a church, a chateau, and a trade in corn and wood. Pop. 1671. —2, A to. Hungary. See **GRÖDMESEN**.

SZOMOLYAN, or **SEKESZ**, a market to Hungary co. Pressburg 9 m. from Modor, with an elegant castle, and a trade in wine. Pop. 1818.

SZONTA a vil. Hungary Hither Danube, co. Bacs, near the Veroc, about 10 m. from Zombor, with a handsome church, and a trade in corn, fax, wine, cattle, and fish. P. 3100.

SZONY (O) a market to. Hungary, Hither Danube, co. and hard by Komorn, r. bank Pannia. It has two churches, a handsome chateau, and a trade in cattle. It is supposed to occupy the site of the ancient Bagratum. It has repeatedly been visited with violent shocks of earthquake. Pop. 1702.

SZOPOR (*Alao and Felső*) two nearly contiguous vils. Hungary, co. Hely, on the K-rsna, 50 m. from Zilah with a Greek church. Pop. 2067.

SZUREZ, or **SZARAS**, a vil. Hungary co. Temes, on the Theiss, 4 m. S. E. Seged, in a fertile wine, tobacco, and cattle and swine raising district. Pop. 2200.

SZOVATTA a vil. Hungary, Thither Theiss, co. Szabolcs, 11 m. S. W. Debrecen, with a Protestant church. Pop. 2437.

SZREDISTIE (*Nagy*), a vil. Hungary Thither Theiss, co. Temesvár, 8 m. from Veroc with a church, and a trade in wine. Pop. 1768.

SZTANICH, a market to Hungary, co. Bacs, 50 m. S. W. Seged. It has a R. Catholic and a Greek church a trade in corn and cattle, and no unusual fax. Pop. 4672.

SZETAPAR (O) or **AL-SZETAPAR**, a vil. Hungary, Hither Danube, co. Bacs, 60 m. S. W. Seged, with a Greek church, and a trade in corn, cattle, fax and wine. Pop. 2040.

SETARA a market in Hungary, Hither Thelma, co. and 26 m. N by E. Zemplin with a R. Catholic church, a hand some chateau, and two flour-mills. Pop. 1031.

SETAREKÓ a vil. Hungary, Hither Danube, co. Solna, about 5 m. from Csaba with a church. Pop. 1615.

SETHOPKO, or **SEZACROV**, a market in Hungary, Hither Thelma, co. Zemplin, 25 m. N.E. Eperjes with a church, Protestant chapel and old castle. Pop. 7630.

SEZUS (Also and **FEZOS**), two nearly-contiguous vil. Hungary, Hither Danube, co. and 8 m. from Treutschin with a church and the ruins of an old castle. Pop. (Also-) 1887 (Folow.) 2171.

SEZUBAN — 1. A market in Hungary, Hither Danube, co. Thurocz, near 1 bank Wag, here crossed by a wooden bridge, 4 m. N.E. St. Marton, with a Protestant and R. Ca-

tholic church, a synagogue, and two chateaux. Pop. 1435. — 2. A vil. Hungary, Hither Danube, co. Neutra, 9 m. from Bajmoss with a church, and a trade in wine, beet-root, and madder. Pop. 1011.

SEZUDOS, a vil. Hungary, Hither Thelma, co. Maros, 10 m. from Seged, with a Greek church. P. 1805.

SEUTRA (Also and **FEZOS**) two nearly-contiguous vil. Hungary on and 5 m. from Treutschin, in a well-wooded district, near the frontiers of Moravia. They have a R. Catholic church and the ruins of an old castle. Pop. 3753.

SEYDLOWIEC, a tn. Russian Poland, 30 m. S.W. Radom, with a trade in articles of steel and iron timber, mill and grind stones, lime, corn, and hides. Pop. 8000.

SEYLOW, a tn. Russian Poland, gov. Radom, S.E. Kielin. Pop. 1510.

T.

TA SLAKS, or **HONG-CHU-KIANG**, a river China, rises in the E. of prov. Yunnan, traverses prov. Quingow W to E enters Quingow, and a little above Canton, unites with the Pe-king in forming the Canton river. Total course, about 700 m.

TA KIEN-BOU a fortified in China prov. Sechoen, on the Young-po-ho 150 m. W S.W. Tching-tou.

TAAL, a lake, Luzon. See **BATANGAS**.

TAAOS or **TARS** is to Arabia. See **TALX**.

TAAISINGE, or **THORNBOROUGH** [Latin *Tandendia*, or *Inula Tansungu*], an isl. Denmark, S.E. of Funen, from which it is separated by the Strait of Brendelborg 8 m. long N to S; 4 m. broad, area 70 sq. ge. m. It is well wooded, very fertile, and abounds in game. Its N end rises about 340 ft. but the rest of the island and especially the S.W., is a plain very little raised above the level of the sea. Pop. 4300.

TAB (anc. *Arum*), a river Persia, rises in the Bakhti Mountains, flows first S.E. then W N.W., separating in the lower part of its course Persia from Khazistan, and after a course of 160 m. falls into the N. part of the Persian Gulf. It is navigable by barges of 20 tons.

TABAGÓN (Bar *Misunt*) a vil and par Spain, Galicia, prov. and 36 m. from Pontevedra, 1/2 bank Minho with a church a school, oil mill and several flour mills. Pop. 1152.

TABARCA a small isl. Mediterranean Sea, off E. coast, Algeria; lat. 36° 58' N. lon. 8° 45' 30" E. (r.)

TABARCA **NUOVA TABARCA**, or **ISLA FLORA**, a small isl. Mediterranean Sea, coast of Spain, prov. and 5 m. S. all crate lat. 38° 9' N. lon. 0° 30' W. about 1 1/2 m. in length and 5 fathoms in breadth. Pop. 500.

TABARIA a tn. and lake, Palestine. See **TURKIA**.

TABASCO, or **GUAYALOA**, a river, N. America, rises in Guatemala flows N.W. into Mexico, crosses dep. Chiapas, turns N.E. and crosses dep. Tabasco, and after a course of about 280 m., falls into the Gulf of Mexico at Porto-Victoria or Tabasco. Its chief affluents are the Comitan.

TABASCO, a dep. Mexico bounded N. by the Gulf of Mexico, E. dep. Yucatan, S. Chiapas, S.W. Oajaca, and N.W. Vera-Cruz. It is one of the smallest dep. of the Confederation, lat. 17° to 18° 40' N. lon. 91° 50' to 94° 40' W. length, W to E, measured on the parallel of 18° N., about 200 m. mean breadth, about 60 m., area, 15,500 sq. m. In proportion to its extent it has a long stretch of coast-line, containing among other remarkable indentations that of the large lagoon of Tuxtepec on the N.E. with its beautiful islands of Lagunas, Carmen, and Puerto-Real. The surface consists almost entirely of a great flat, sloping gradually to the sea, but in many parts so low that it is subject to inundations, which often isolate the villages, and leave no means of communication except by canoe. The streams, though numerous are short and shallow and being too sluggish to form an open passage to the sea, are generally obstructed at their mouths by bars and flats. The more important are the Usumacinta and Tabasco, which, entering from opposite sides of Chiapas, gradually converge and have a common outlet, the

Chiltepec, Des Bores, Tupilco, Santa Anna, remarkable for the size of its estuary the Tonala, Uxapapan and the Guachapa or Escu, forming part of the boundary between Tabasco and Vera-Cruz. The climate is exceedingly hot, particularly along the coast, and owing to the fatness and swampiness of the surface, very unhealthy. A large portion of the state is still covered with primeval forests of oak, cedar mahogany and ironwood, with occasional open spaces in which indigo and vanilla are found growing spontaneously. The principal cultivated crops are maize, coffee pepper, sugar, palm-tree, and some tobacco. The streams abound with fish, and the bees of the forests yield large supplies of honey and wax. The inhabitants are chiefly Indians of the Mije, Zoque and Cendele tribes. Pop. (1859), 53,550.

TABASCO sometimes called **VILLA DE SAN JUAN-BAU** **TEMA**, and **VILLA HERMOSEA DE TABASCO**, a tn. Mexico, cap above dep. 1 bank Tabasco, on the frontiers of Chiapas. It is one of the oldest towns of the Confederation, and figures in the early proceedings of Cortes, who gained one of his earliest and greatest victories here and though not large, is well built. Being accessible from the sea by vessels of light draught, it has some direct foreign trade, but has a much more important inland trade carried on with Guatemala and the adjoining states. Pop. 4000.

TABERNAS, a tn. Spain, Andalusia, prov. and 16 m. N.E. Almeria, on the E. side of an extensive crowded by a ruined castle. It has a parish church a courthouse, a primary school, and some trade in agricultural produce. Pop. 4700.

TABERNES-DE-VALENCIA, a tn and com. Spain, prov. and about 23 m. from Valencia. S. slope of Mount Croco. It has a parish church, a courthouse and prices, three schools, the remains of an ancient castle, manufactures of thread and woollen cloth, and several rice and flour mills. Pop. 5104.

TABIEANTINGIE, a considerable vil. Isl. Sumatra, in the Mesongkale table-land, 57 m. E. by N. Besoecong with a large old temple, and some mosques.

TABLAS, one of the Philippine isls., S.E. Mindoro and N.W. Fuzuy, of an oval shape, 30 m. long, by 9 m. broad with three small villages, a fort garrisoned by a small garrison, and a valuable saltery.

TABLAT, or **ST FIDES** a vil and par Switzerland, can. and within 1 m. of St. Gall. It is well built and contains a handsome parish church and two schools. Pop. 4160.

TABLE BAY an inlet of the Atlantic, St. Africa, Cape Colony, on which lies Cape Town lat. (N.W. point) 33° 58' 15" E., lon. 18° 34' 30" E. (m.) It is about 6 m. wide at its entrance, and capable of sheltering the largest fleet. It enters from the N., and is well protected towards the S.E. and E., whence comes the prevailing wind—**TAKLA MOUNT**, from which the bay is named, lies to the S. Its highest part being right over Cape Town. It is about 3500 ft. high, level on the top, and falls down nearly perpendicularly at the E. and still it joins the Devil's Mount, a rugged peaked mountain, nearly as high as the former, and separated from it by a small gap. The W. end of Table Mount is also nearly perpendic-

lar a considerable distance downward, and then has an abrupt declivity, till it joins the base of another mount called the Sugar Loaf or Lion's Head, which is about 2100 ft. high. The mountain is of primitive formation, and owes its name to its peculiar shape and flattened summit.

TABOIA (Cape), Van Diemen's Land, N coast, 40 m. W by N Port Sarah; lat. 40° 50' S. lon. 145° 45' E. It has a flat aspect with steep cliffs, which may be seen 36 m. off.

TABOIA, a tn. and par Portugal, prov. Beira-Baixa, L bank Mondego, about 13 m. S S E. Viseu. Pop. 1920.

TABOIAÇO, a tn. and par Portugal, prov. Beira-Alta, 15 m. E Lamego. Pop. 840.

TABOGA, an isl. Central America in the bay and immediately opposite to the town of Panama, from which it is about 9 m. S., length, N W to S E, about 2 m. The village upon it has a handsome church. The excellent anchorage afforded by the harbour of Taboga has given it great importance since the establishment of ocean-steamer to ply between Panama and San Francisco. They have their station here, and several commercial houses have erected large establishments. There is now a regular steam-ferry between Panama and Taboga.

TABOGUILLA, an isl. Bay of Panama, 1½ m. N E. isl. Taboga, several which it is separated by a channel, from 15 to 30 fathoms deep. It is about 1 m. long, very fertile, and along with Taboga, is considered the garden of Panama, which it supplies plentifully with fruit and vegetables.

TABO, an isl. Chuk off N E coast, Isl. Chiloe, about lat. 43° S., lon. 78° 10' W. It consists of a number of detached hummocks, connected by low shingly banks, partly overflowed at high water. Its highest summit does not exceed 150 ft.

TABOR, a tn. Bohemia, cap. circle, on an eminence above the Lusatians, 6½ m. S. S. E. Prague. It is well built, has a handsome Gothic church, a deanery church, and a castle, built by the celebrated Hussite chief Ziska, on the site of a castle which bore the name of Hrubata. The Hussites gave to both the Scripture name of Tabor, and supplied them with water from a brook which they called Jordan. Tabor thus became a stronghold of the Hussites, and makes a conspicuous figure in their history. Pop. 4398.

TABOR, an isolated mountain, Asiatic Turkey, Syria, peak and 22 m. S S E Acra, and 6 m. E Samarth, to the W of the Sea of Tiberias. It rises about 1800 ft. above sea-level, and when viewed from the N W has the appearance of a truncated cone, given it by its summit, which is flat, forming a plateau about 700 yards long by about 300 broad. It is composed of limestones. It is repeatedly mentioned in the Old Testament, and though not named in the New Testament, has been generally supposed to have been the scene of the Transfiguration. This tradition, however, is not earlier than the 4th century, and appears to have originated in the appearance of the mountain, which is described in the record of that wonderful event, as a "high mountain apart." Other mountaintops of Galilee might justly be described in similar terms, and some collateral circumstances strongly militate against the tradition.

TABREEZ, TARRIS, or TARRIS, a city, Persia, cap. prov. Ascrihan, L bank Agh, 25 m. above its entrance into Lake Urmia. lat. 38° 10' N., lon. 46° 57' E. It lies at the inner extremity of an amphitheatre with hills on three sides, and an extensive plain on the fourth. It is surrounded by a wall of sun-dried brick, with bastions, and entered by seven or eight gates. A large portion of the population resides outside the walls, and the plain around is covered with gardens, producing the finest fruits in the greatest abundance, particularly grapes. The citadel is the most conspicuous building in the city. It was originally a mosque, and is 600 years old. It consists of a lofty edifice of brick, and though much damaged by earthquakes, is still a noble structure. Within the walls of the citadel there are a cannon-foundry and barracks. The amount of European goods imported into Tabreez, by way of Constantinople, in 1846-5, was £708,304, consisting mostly of cotton and woollen manufactures, principally British; other articles, sugar, wax, tea, paper, iron, hardware, &c. The exports from the city

to Turkey, for the same year, amounted to £269,057 and consisted of tobacco, safflower, gull-ants, woolens, chiefly shawls, wax, printed and dyed cottons, and plain silks, raw silk, beans, &c. Though still an important city, Tabreez has greatly degenerated from what it was in ancient times; the glowing descriptions of old travellers, who speak of its splendid castle,

THE GATES OF TABREEZ.—After Fuchs.

and its hundreds of extraordinary and mosques, being no longer applicable while its immense population of 550,000, according to ancient writers, has dwindled down to 80,000, the highest credible estimate of the present population.

TABRIA, a tn. W Africa, N Y B, 80 m. N by K. Kungu. It consists of two towns one on each bank of the May Yarrow connected together by a wooden bridge. Pop. about 18,000.—(Lander's Records.)

TACARIGUA, a seaport Ecuador. See ATACAMA. **TACARIGUA**, a large and beautiful lake, Venezuela, about 6 m. S W Valencia. It is upwards of 80 m. long and 6 m. to 4 m. broad, 1470 ft. above sea-level and full of small islands, which, as the loss of water by evaporation exceeds the influx, are increasing in size. The banks in some parts are thickly clothed with plantains, mimosa and trip-lane, 'surpassing,' says Humboldt, in picturesque beauty the vineyards of the Pays-de-Yaud.

TACABONTE, a vil. and com. Canaries, Isl. Tenerife, 3 m. from Laguna, in a beautiful and fertile plain. It has a handsome church, a convent, a prison, and two primary schools, some manufactures of domestic linen, and a considerable trade in fruit and fish. Pop. 3011.

TACAZZE, or TACAZZA. See ATAZZA.

TACHAU, a tn. Bohemia, circle and 81 m. W by N Pilsen, with a castle, situated on an eminence above the market-place a deanery church, townhouse, monastery infirmary, and hospital and an excellent spring. Pop. 2982.

TACHBROOK-BROOK, a par Eng. Warwick, 8446 ac. Pop. 658.

TACKLLEY, par Eng. Oxford, 8850 ac. Pop. 629.

TACLAGUE, a tn. Tibet, on the R. bank Gogra lat. 30° 34' N. lon. 81° 5' E. 14,500 ft. above sea-level. It is a permanent mart for wax and borax. To the fairs held in October and November the principal articles brought from Tartary are wool, woollen cloths, gold, and some tea.

TACLOBAN, a tn. Philippines, cap. prov. and on the N E coast, Isl. Leyte, at the S E. entrance of the Straits of San Juanico. It has a governor's house but as on the whole a poor wretched place, with some cotton manufactures, a factory, and a trade in coconuts and tobacco. Pop. 2508.

TACNA, a tn. Peru, dep. Arequipa, L bank of the small river of the same name, about 30 m. from the sea, and 1700 ft. above its level. lat. 18° 0' S. lon. 72° 10' W. It is a commercial place, being the depot of European merchandise for the S. mountain-districts and the greater part of Bolivia. Arica, 25 m. S. W., is the port of Tacna. Pop. 8000.

TACO an establishment of the Hudson's Bay Company, at the mouth of a river of same name in Port Beaulieu, on the coast of Kammen America, opposite to Adamsville Island, lat. 57° 54' N. lon. 138° 57' W. It consists of a fort with good bastions, lofty pickets, and strong bastions, and has a little harbor, almost land locked by lofty mountains. The

eleven times weighing 150 lbs., is very numerous in the vicinity and furnishes the chief subsistence of the members of the establishment, consisting of a head-manager with an assistant, and 23 men. It is visited by seven tribes of Indians, three living on islands and four on the mainland, and numbering about 4000 souls. The river is navigated by canoes for 100 m., and presents a stupendous cataract between lofty mountains rising abruptly from the water's edge.

TACUARY a river, Brazil. See **TACUARY**.

TACULINESTONE, per Eng. Norfolk, 1580 a. P. 601

TACURA —1 (see *Chapman*). A volcano, Bolivian Andes, W Cordillera, 18 m. N E. Tacua, 19 740 ft. high.—2 An Indian vil. at the foot of the volcano, 12,090 ft. above sea-level.—3 A peak nearest from the volcano.

TACUQUIME-TACUA, a river, British N. America. See **TAQUA**.

TACUBA, or **TACUBA** [from *Talagon*] a tn. Mexican Confederation, dep. and 9 m. W N W Mexico with a number of beautiful residences, and an archbishop's palace. It was to this place Cortes retired when driven out of the capital in 1520. An image in the church, called the Virgin of Remedios, has often been carried to the capital to give relief in seasons of difficulty or distress. Pop. about 2500.

TACUMSHIN per Mel. Westford 8154 a. P. 875.

TACUNGA (LA), a tn. Ecuador often visited by earthquakes, on an extensive plain, watered by the San Felipe, at the foot of the Andes 50 m. S Quito. It is a large well-built place, with straight and spacious streets, has several churches and convents, manufactures of woollen stuffs, and a considerable trade in mules. Pop. about 12 000.

TACUTU, a river S America, rises in the Sierra Yanina, in the N E. of Brazilian Guiana flows first N, then S W and after a course of about 160 m. joins the bank Parana at Fort St. Joseph. Its chief affluents are the Mabu, Manacuru, and Xuruma, all of which it receives on the right.

TADLASTER, a market in and per England, York (W Riding). The town, in a beautiful valley on the Wharfe, here crossed by a handsome bridge and on the Harrogate and Ribblesdale railway 9 m. S York has 11 straight, well built, and well-lit streets a beautiful old Gothic church with a tower several dissenting chapels, a grammar and several other schools and vestiges of an old castle denominated by Oliver Cromwell. Tadcaster occupies the site of a Roman station called *Calcaria*, and is mentioned by Bede under the name of *Calceaster*. Area of par. 6019 a. Pop. 2973.

TADJURAH a seaport, Africa. See **TADJOURA**.

TADLEY per Eng. Hants 1047 a. P. 876.

TADLOW per Eng. Cambridge 1717 a. P. 169

TADMARTON per Eng. Oxford, 2500 a. P. 450.

TADNOR, a railway city, Syria. See **PALESTINA**.

TAE-CROW-ROK, a city China, prov. Chekiang 1 bank river of same name, about 45 m. from its junction with the sea. There are several islands adjacent to the entrance to the river which is lat. 28° 42' N. lon. 121° 28' E.

TAE-KIAN, an isl. China, Chinese Archipelago. The centre is an extensive plain, with many villages. Near the E. extreme, also, the hills separate, leaving a level plain across the island. It is densely peopled.

TAEK TAE, or **TAEK** a tn. Arabia, Yemen, once the capital of the country, on N side of Mount Saba 85 m. E N E. Mecca. Saba is a group of mountains attaining a height of perhaps 7000 ft., covered with plantations of coffee and khadi and with villages clustering at every point difficult of access. So populous and productive a district might be naturally supposed to insure the prosperity of the adjacent town, but wars and dissensions have ruined Taek. On a rock 400 ft. high, projecting from Saba, stands the citadel called *Kahrah*, while below lies the town, encompassed by a wall of brick, faced with stone, and so broad that six or eight horsemen can ride abreast on it. Thence walls come inclosing a population of 10,000, on the present desolate and unproductive of the place, it is difficult to estimate the number of its inhabitants.

Of its five great mosques, two remain, and are said to be still very handsome. The place is abundantly supplied with water by an aqueduct from Saba.

TAF a river S. Wales, rises in Brecknockshire, at the foot of Brecon Pass flows S. S. W., then S. E. to its mouth in Carmarthen Bay at Llangartha, where it forms a considerable estuary, total course, about 62 m.

TAFALLA, a tn. Spain prov. Navarra, 21 m. S. Pamplona; with a townhouse, an hospital, a mint, palace, where the kings of Navarra once resided, and which, with the city walls, are the only remains of Tafalla's ancient splendour, two churches, two convents, one of them used as school, a nursery, several hospitals, a prison, and two distilleries, five steamers, four oil and three flour mills, and several brandy-distilleries. In 1815 the French, after a vigorous defence, surrendered this place to Mina. Pop. 4830.

TAFELNEH —1 A fortified maritime tn. Morocco, 45 m. S. S. W. Mogador. Pop. 3000 —2, A lofty headland, about 5 m. N the town.

TAFPOERH, an isl. Indian Archipelago, between Celebes and Gilolo lat. 1° N lon. 126° 10' E. On its N coast is a reef, and also a bay with 20 to 30 fathoms water, and good landing ground.

TAFILLET, a principality, Morocco, E. of the Atlas range. Its capital of same name, near lat. 31° 45' N. lon. 4° 5' W is formed of several villages or *etats*. The inhabitants, chiefly composed of Berbers, are noted for their skill in the preparation of leather. They also manufacture silk stuffs, carpets, and woollen coverings and carry on a considerable trade with the tribes of Boudan, especially with the town of Timbuktu. Excellent figs are sent in considerable quantities to Europe. Pop. 10 000.

TAFIT a tn. French prov. Tarn, is a beautiful plain watered by the Dordogne 21 m. S. W. Tarn; famous for its manufactures of carpets, which are considered the finest in Persia. Near it is a lead-mine. Pop. about 6000.

TAFYLE, a tn. Arabia, near the S. frontiers of Syria, 75 m. S. S. E. Jerusalem in a well watered and wooded district. It furnishes provisions to the pilgrims from Syria.

TAGAI, a tn. Russia, gov. and 88 m. W Kambirsk, on the Tagalika. It is built chiefly of wood, but has a church of stone, several towers, four mills and a trade in corn. P. 1248.

TAGAL, or **BOHOL** a small group of uninhabited isles, (W Pacific, Caroline Archipelago) near lat. 71° 41' N. lon. 182° 50' E. It consists of a number of islets, thickly covered with trees, and connected by coral-reefs, with apparently deep water in the centre.

TAGAL, or **TAGAL**, a prov. Isl. Java, bounded, N by the Java Sea, E. prov. Pekalongan, S. Bandoeng, and W Cheribon 45 m. E. to W by 25 m. N to S. To the S it is mountainous culminating in the volcano of Slamet, rising 11 417 ft. above sea-level. From these hills it flows down N towards the sea, spreading out into a wide plain, intersected by 46 streams of various magnitudes, all flowing N to the Java Sea. In general the hills are covered with woods and shrubs, and with a black fertile soil excellently adapted for coffee, indigo, sugar rice, and such as likewise are suited, and many cattle and a few horses are reared. Tigers are numerous, and sea and river fish abundant. Pop. 240 000.

—**Tagal**, the CAPITAL, is a small town and seaport, 168 m. E by S. Batavia lat. 6° 50' S. lon. 109° 12' E. with a neat townhouse, a tasteful governor's house a government school, a roomy market-place, and several dock-building yards. The harbour is small and shallow. Inhabitants engaged as smiths, carpenters, masons, fishermen, and in re-dyeing which is better understood here than elsewhere in Java. Pop. 7000. **TAGANROG** on Russia, gov. Ekaterinburg, is a lofty and rocky tongue of land which projects into the Sea of Azov, opposite the mouth of the Don, 28 m. W N W Azov; lat. (church of St Michael) 47° 19' 19" N. lon. 38° 57' E. (N. It is a place of considerable strength, being both surrounded by walls, and defended by a citadel and other works. Though built chiefly of wood it has an imposing appearance. It is the seat of an admiralty a court of commerce, and several other courts and public offices contains 10 churches, of which three are of stone; a Greek monastery a gymnasium, normal school, exchange, barracks, and quartermen; and has manufactures of cottonware and cordage, a full-dressery brick-works, tallow-melting establishments, numerous distilleries and building-yards, at which a considerable number of vessels are constructed. The harbour though the deepest in the Sea of Azov, is shallow, not admitting vessels which draw more than 10 ft.; but its situation secures to it a considerable trade, which has, however, in late years much fallen off. The principal exports are iron, wine, brandy, salt, hides, furs, leather, tallow, and grain, particularly wheat; the imports, wine, fruit,

linen, woolen, cotton, and silk tissues; olive-oil, perfumes, drugs, &c. **Taparog** was a French residence of the late Emperor Alexander, who built a small palace here, and died in it in 1825. Pop. (1848) 32,473.

TAGEWEILLEN, a vil. and par Switzerland, cant. Thurgau, 1½ m. W.S.W. Constance, with a church P 1070. **TAGGIA**, a tu France, dep. Alpes Maritimes, 4 m. N.N.E. St. Remo, near a stream of same name. It is an ancient place, supposed by some to be the Roman Tabus. The houses are generally mean in appearance, but there are several imposing palaces or mansions, no fewer than nine churches, several monasteries and nunneries, a courthouse, college, and hospital. Taggia and the vicinity suffered much by an earthquake in 1881. Pop. 3880.

TAGHADOE, par Irel. Kildare, 4138 ac. Pop. 377. **TAGHBOY**, par Irel. Galway and Roscommon 18,096 ac. Pop. 2792.

TAGHEEN par Irel. Mayo 6887 ac. Pop. 2051. **TAGHEKANIC** or **TADONIC**—1 A mountain range, U. States, on the frontier of New York Massachusetts, and Connecticut. It forms a continuation of the Green Mountains is about 50 m. long, separates the waters of the Hudson from those which enter Long Island Sound and in its highest summits attains the height of about 8000 ft.—2 A vil. New York 40 m. S. Albany, with a woolen factory, and several saw and flour mills. Pop. 1540.

TAGHMACONNELL, par Irel. Roscommon 18,327 ac. Pop. 5043.

TAGHMOY—1 A an. an. tn. and par Ireland, co. and 7 m. W. Wexford. The N.E. part of the town is composed of stone and slated houses, generally well built, the remainder consists of mud cabins, thatched. It has a neat church, E. Catholic chapel, and two schools. Pop. (n.) 1082. Area of par. 10,125 ac. Pop. 3119.—2 A par Irel. Westmeath, 3438 ac. Pop. 798.

TAGHSHENOD, par Irel. Longford, 5713 ac. P 1517. **TAGHSHINNY**, par Irel. Longford 4881 ac. P 1575.

TAGIL, a river, Russia, rises on the E. slope of the Ural Mountains 86 m. N.W. Ekaterinburg flows N. through a valley where it expands into several lakes then E.N.E. and after a very winding course of nearly 200 m. follows back-Tura. **TAGILAK**, a tu Russia, gov. and E. Persia, on a river of its name, with extensive mines and smelting-furnaces both of iron and copper. Platinum and gold are likewise obtained in the vicinity. The lacquering of iron-plates with a composition capable of resisting the action of boiling water, forms an important branch of business here. (Erman's Siberia.)

TAGLIAMENITO, a river Italy Venetia, rises in Mount Mauro on the frontiers of prov. Udine and Belluno 4000 ft. above the sea, pursues a very rapid and precipitous course almost due E. past the town of Tolmezzo then turns S., divides into several arms, and at the harbour of its own name falls into the Adriatic. Total course, about 180 m. In dry seasons the water becomes so shallow that waggons pass through in many parts; but at other times it becomes suddenly flooded, and spreads itself over a width of from 1500 to 3000 yards. It is navigable for about 10 m.

TAGLIOCOZZO a tu. Naples, prov. Abruzzo-Ulter II 10 m. W.N.W. Avezzano. It has four parish and several other churches, a diocesan palace, and two hospitals. It was founded by the Gaeta; became the capital of a duchy and in its vicinity in 1288, Charles of Anjou defeated Conradus, son of the Emperor Conrad IV. Pop. 8860.

TAGLIUNO a vil. and com. Italy Lombardy prov. and 12 m. S.E. Bergamo, r. bank Olto. It is well built and has a trade in corn, silk, and wine. Pop. 1918.

TAGODASI, a tu. Morocco, on the summit of a mountain, 98 m. N.E. Morocco only. Pop. 7000.

TAGOLANDA, a small Isl. Indian Archipelago, off N.E. end, Isl. Celebes, lat. 2° 33' N. lon. 125° 58' E. about 20 m. in circumference. It is populous.

TAGUE, the principal river in Spain, and which divides the peninsula into two nearly equal parts. It takes its rise in the mountains which separate New Castile from Aragon, between Albaricin and Ordesa-de-Aragon (prov. Teruel) for about 24 m. it flows N.W., then nearly W. for 20 m., during which it receives the waters of the Molina or Galla, then S.W. for about 70 m., augmented by the waters of the Guadalea and other streams. It next bends W. between Bal-

monte and Calatayud, and while it preserves generally that direction until it passes Alcantara, in Portugal, it receives successively the waters of the Jarama, united with those of the Henares and Tago, the Guadarrama, the Algodora, the Tietar, the Alagor, whose volume is nearly equal to last one; and numerous other streams both in Spain and Portugal. A few miles W. of Abrantes it turns S.W., and falls into the Atlantic at Lisbon after having washed in its course which extends about 450 m. exclusive of windings, Aranjuez, Toledo, which is embosomed in the form of a horse-shoe; Talavera, Almoraz, Alcantara, and Badajoz. Its banks are generally rugged precipitous and destitute of vegetation and the plains through which it flows arid and uncultivated, it being difficult to make its waters available for the fertilization of the soil. Notwithstanding its volume, the Tague is not navigable to any considerable distance from the sea. Ancient writers give glowing accounts of the Tague, which contrast strangely with its present aspect; they extolled on its golden sands its exquisite fish, its wooded and fertile banks, its ships freighted with merchandise, and the flourishing and populous cities which it washed. Grains of gold are indeed still found, but scarcely sufficient to afford a miserable subsistence to the few poor persons engaged in collecting and washing the sands, and there is good trout-fishing, especially near its source.

TAHAL, a tu. Spain Andalusia, prov. and 1½ N. Almaria, indifferently built with a church courthouse, school hospital, and a trade in agricultural produce. Pop. 1607.

TAHATE a tu Arabia, Yemen is a beautiful valley, 9 m. from Zeled. It was once a place of importance, and is still well built of stone, and contains several mosques. Indigo is cultivated in the vicinity.

TAHITI or **TAHITI**, the principal of the Society Islands lat. 17° 19' S. lon. 149° 29' W. (n.) This beautiful island is about 12 m. long N.W. to S.E., and is an elongated range of highland which being interrupted in one part, forms an isthmus about 3 m. broad, which connects the two peninsulas, the larger Tahiti proper and the smaller named Tavaroo. From a low margin of sea-coast the land rises to a very considerable height on both extremities of the island while some highly fertile plains or valleys intersect the ranges in different parts. The highest summit in the

A TAHITIAN FANCY.—after H. A. Odo.

island is 8500 ft. above sea-level, another attains 6979 ft. From these two peaks, ridges diverge to all parts of the coast, throwing off spurs as they descend. The fertile portion of Tahiti lies in the valleys, which are of small extent, and in the plain which stretches from the sea-shore to the spurs of the mountains. These produce tropical plants in great abundance and luxuriance. The climate is warm, but not overpowering. The cottages of the natives, who seem fully to appreciate the beautiful scenes around them, are found in pleasant and lovely spots, and are usually surrounded by neatly-kept

Indocrotes. In these are to be seen growing the bread-fruit, yam, and orange, and sometimes extensive groves of tall coconut trees.

The cottages are of an oval form, usually about 30 ft. or 40 ft. long, and 20 ft. broad; the walls formed of bamboo; the floor of natural earth. There are no partitions, but mats or matting is employed as an occasional screen. The natives are a good-humoured, gay, happy, and cheerful people, and are further described as honest, well-behaved, and obliging. They have been converted to Christianity by the labours of missionaries; and there are now few of those who cannot both read and write. The island forms part of a native sovereignty, is divided into seven districts, and is the seat of a supreme court. Several vessels of about 150 tons have been built here; these have been employed in the trade to New B. Wales, whither they carry sugar, coconut oil, and arrow-wood, the principal productions of the island, and whence they bring back in return hardware, cloths, calicoes, &c. Most of the vessels that visit Tahiti are whalers, averaging under 100 annually. Tahiti was discovered in 1806, by the Spanish Quila, and was afterwards visited by Wallis, Bougainville, and Cook. Estimated pop. 5000.

TAHOORA *Tahora*, or *Kaia*, the most W. of the Sandwich Islands of which anything is known. lat. 21° 59' N. lon. 160° 20' E. It is small, elevated and uninhabited, but frequented by flocks of birds.

TAHOORWA *Tahorwa*, or *Kadoolawa*, one of the Sandwich Islands, off S.W. point of New; lat. 20° 25' N. lon. 156° 50' E. length 14 m., breadth, 5 m. It is low, almost destitute of verdure and looks as if it had been once a part of New. It is used as a kind of penal settlement.

TAHRAH a tn. and fortress, Hondoortan, prov. Cutch 30 m. S.E. Luckpet-Dawder lat. 23° 30' N. lon. 68° 30' E. The fort is an irregular building, defended by round-towers, flanked by a large tank on each side the town on the S., and the suburbs on the W.

TAHRAH a tn. Central Egypt, prov. and 36 m. S.E. Suez. 1 tank N.W.

TAHUA, Marquesas is. See *CHATHAM (Savai)*.

TAHUNA a populous city China, prov. Shansee, cap. of, near the Great Wall, 180 m. W. Pekin. It is situated in a mountainous country exposed to the incursions of the Tartars, but is well fortified and has a numerous garrison. It has a considerable trade in prepared silk. Near it various sorts of medicinal plants grow, and marble, porphyry, lapis-lazuli and jasper are obtained.

TAIWAN of *Taiwan* a tn. China, cap. lat. Formosa, on the S.W. side lat. 23° 5' N. lon. 120° 25' E. It is of great extent, and was formerly the seat of a considerable trade, but its harbour, though protected from all winds, is now so much silted up, that it only admits small vessels.

TAIYUEN a large and populous city China, cap. prov. Shansee, 1 tank Fuen-ho, 270 m. S.W. Pekin, with considerable manufactures of felt-carpets.

TATABANA, a vil. and par. Brazil prov. and 50 m. W. Parahiba, r. bank Parahiba with a church and school. Excellent cotton is raised in the environs. Pop. 1400.

TAIUMU—, A cape, Siberia, on the N. of gov. Yen-seak, forming the W. side of bay of same name, the E. side being formed by Cape Barrovo. The most N. extremity of Asia is taken to the S.E. of the Bay of Taium, into which it discharges itself by a stream of some name.

TAIN [see *Tignes*], a tn. France, dep. Drôme, 10 m. N.W. Valence, 1 tank Rhone, over which there is a very suspension-bridge, connecting it with the town of Tournon. It is agreeably situated at the foot of a steep hill called the Herminette, is tolerably well built, has a church, a cotton-mill, a granite-quarry, and a trade in wine, particularly that named Herminette. Pop. 2180.

TAI⁴, a royal hr., airport, and par. Scotland, co. Ross, S. shore, Dornoch Firth, 36 m. N.W. Aberdeen. It has two principal streets, somewhat irregular, but very well kept, a parish church, a Free and a U. Presbyterian church, a school-house, academy, and other four schools; an industrial school for girls, a mechanics' institute, and some retail trade. Pop. (1841), 2569. Area of par., 19 m. by 5 m. Pop. 3578—[*Local Correspondent*].

TAINTIGNER, a vil. and com. Belgium, prov. Hainaut, 5 m. S. by W. Tournay with four breweries, a salt-refinery brick-kiln, and three flour-mills. Pop. 3731.

TAIRO, *Taira*, or *Kiro's Island*, S. Pacific, Low Archipelago; lat. 10° 4' 25' S. lon. 148° 50' 45' W. It is nearly of a circular form, surrounded by a narrow reef, above which no part of the surface rises more than 5 ft.; has a deep and apparently productive soil, and business a lagoon, well supplied with the pearl-oyster. Though not regularly inhabited, it appears to be occasionally visited by pearl-fishers.

TAJOORA, *Tajoura*, or *Tanjoura*, a seaport in, E. Africa, Adal, cap. dist. and on an extensive bay of same name, lat. 10° 46' 32' N. lon. 43° 0' 30' E. It consists of about 300 houses, framed with wood and covered with matting; and has two stone-mosques, an excellent wall, with a plentiful supply of good water; a considerable trade in slaves and salt, and a spacious harbour with a roadstead not well sheltered, but deep enough for the largest vessels. Tajoura is governed by a sultan, who is chief of the Adal tribes, and subject to the Pasha of Egypt. Pop. about 1500.

TAJUNA a river Spain, rises in prov. Guadalajara, and derives its waters from the sierras of Alarcón, Clares, and Ciruelos; flows about 94 m., exclusive of windings, and discharges into the Jarama, about 7 m. N. by E. Aravaca.

TAJURRAH a seaport, Adal, see *TAJOORA*.

TAK or *Tux*, a tn. Afghanistan, 26 m. W. of the Indus lat. 33° 14' N. lon. 70° 50' E. It is surrounded by a high, strong mud-wall, surmounted by towers; within is a citadel of burned brick, having a lofty tower at each of the four corners, surmounted with conical roofs. It has some transit trade.

TAKA, a tn. Central Asia, Khanate and 65 m. N. Khiva, consisting of 500 houses.

TAKELLY par. Eng. Essex, 8154 ac. Pop. 691.

TAKHTI-SOLEMAN [Throne of Solomon; and *Shah*], a remarkable hill and collection of ruins in Persia, prov. Azerbijan 125 m. S.E. E. Tabreez; lat. 36° 30' N. lon. 47° 10' E. The hill appears at first as if isolated, but this is not strictly the case. On the S.W. and N. faces, it presents a steep acclivity to the valley, but at the N.E. and S.E. corners, the ground rises gradually and on the S.E. face it is but slightly elevated above the country. The brow of the hill is covered by a wall about 3 m. in circuit, and having 37 bastions; the whole, where entire, of excellent masonry. Within the walls are the ruins of an ancient city, of a temple, and some other buildings, of the history of which nothing is certainly known.

TAKINOB, a lake, European Turkey, Macedonia, near the head of the Gulf of Comana, with which it communicates by a short channel. It is 18 m. long, 3 m. broad and receives the river Struma, and several smaller streams.

TALAI, a river in the N. of Afghanistan rises in the Lashino Mountains, lat. 36° 14' N. lon. 73° 0' E.; flows S.W., and after a course of 130 m., joins the Pajkora or Lunday.

TALAEAN, a vil. Spain, Extremadura, prov. and 22 m. N.E. Cáceres, on a rising ground surrounded by hills. It has a townhouse, prison, granary, primary school for both sexes, a church and in the vicinity two hermitages. P. 1862.

TALACHDOD, par. Wales, Brecon; 1815 ac. P. 187.

TALAK a vil. India-beyond-the-Ganges, prov. and 28 m. R. by E. Arracan, lat. 20° 20' N. lon. 95° 35' E. It consists of a number of huts, occupied chiefly by Burmese traders, who obtain from the people on the E. side of the Aracan Hills, cotton, thread, bone-ware, elephants' teeth, and Burmese silk, in exchange for beads and tobacco. British cons. res.

TALAMONIA, a vil. and com. Italy, Lombardy, prov. Sondrio 2 m. E. Morbegno, 1 tank Adia. Pop. 2138.

TALANDA, *Talanti*, or *Atalanti*—, [anc. *Zargus*], a channel, Greece, separating the N.W. part of Negropont from the N.E. of Livada, and communicating, by comparatively narrow passages, with the channel of Negropont on the S.E., and that of Trilkeri on the N.W. length, about 45 m., breadth, 5 m. to 15 m.—, A small vil. in the above channel—, 3 A. to [see *Open*], dist. and 15 m. N.N.E. Livada, at the foot of a mountain of same name. It is the seat of a bishop, is defended by a citadel, and carries on some trade. Pop. 5609.

TALANTI, Greece, see *TALANDA*.

TALAVERA *de la Rima*, a tn. Spain, New Castle, prov. Toledo, 64 m. S.E. Madrid, on the Tago. It had formerly three walls, dividing it into different sections; two of these are still preserved. This ancient but decayed town is straggling, dirty, ill paved, and inconvenient; but the walls, towering among the houses, give it a picturesque appearance. It has a handsome townhouse, a prison, granary theatre, vs

rious primary and advanced schools, several hospitals, various secondary and universities, a Jesuit college, and four parish churches. There is also a fine but dilapidated bridge and a pleasant almshouse. Near it is the hermitage of Santa Anna del Prado, which is known as a pagan temple, and where pagan rites, called *Las Monjas de Calceves*, continued to be celebrated down to 1897. Talavera is famous for its silk fabric, but this branch of industry has greatly fallen off; the number of persons now employed in spinning and weaving in the royal factory not exceeding 400. The other manufactures consist of ceramics, leather, and soap; and there are flour, oil, and chocolate mills, and a tanning-mill. In the vicinity, on the 27th and 28th of July 1893, Sir Arthur Wellesley, with 16,000 British, defeated 84,000 French under Jourdan Victor and Joseph Bonaparte. Pop. 6883.

TALAVERA-DE REYES, a poor vil, Spain, Extremadura, prov. and 10 m. E. Badajoz, 1 bank Guadiana; rendered very unhealthy chiefly by the putrid exhalations from the pigsties, dunghills, and stagnant pools with which the town and neighborhood abound. It has a townhouse, several schools, a nursery, a church and several oil and flour mills. P. 2289.

TALBENNY par Wales, Pembrokeshire; 1425 ac. P. 235.

TALBOT, an isl., U. States, off N.E. coast Florida between the mouths of the St. Johns and the Nassau. It is about 9 m. long, 4 m. broad, and produces much cotton.

TALCAGUA, a vil, or TACACAGUA, a vil and small settlement, Chile, on the peninsula which forms the S.W. side of Conception Bay. Near it are the remains of fortifications in a very dilapidated state. The anchorage is the best on the coast; and coal has been discovered, and worked to some extent, in the surrounding district, though the quality is said to be inferior.

TALCAN an isl. B. America, off W. coast, Patagonia, and between it and the Isl. of Chilo, lat. 43° 45' S. lon. 78° 58' W. It is the largest of the group known by the name of Desventuradas, being about 12 m. long, by 1 m. broad, and has a deep inlet on the E. side affording good anchorage.

TALIENT, a fortified town, Morocco, prov. Sus, on the coast, 100 m. S.W. Tetouan.

TALGARTH, par Wales, Brecon, 16,900 ac. P. 1328.

TALI a large and populous town, China, prov. and 180 m. W. N. Yunnan W. bank Lake En-hai. Near it excellent tea is grown and fine marble is found.

TALIABO (KORAK) an isl. Indian Archipelago 130 m. N. W. Borneo, lat. (S.W. point) 2° 5' N., lon. 124° 30' E. 37 m. long E. to W. by about 17 m. broad. Its hills on the N. side are steep cliffs, but the S. side is free of them on the W. are some reefs. Sago grows freely and is the chief food of the islanders, who are reputed to be cunning, faithless, cowardly and murderous in disposition. The females are used as slaves. Fish is superabundant.

TALICOTI ca. in Hindostan, dist. Darwar, on an offshoot of the Kistna, 160 m. S.W. Hyderabad. It is surrounded by walls, and defended by a fort situated near its centre, and has a trade in printed calicoes, brassware, and sundries. Pop. 5500.

TALISH, TALASH, or TALASHIN, a Russian dist. or khans, forming the most S. part of Transcaucasia, and bounded N. by the Mogan plain or desert, E. the Caspian Sea, S. the Persian prov. Gilan and W. prov. Azerbaidjan from which it is separated by a lofty mountain range, which may be considered as a ramification of the Caucasus, and a connecting link between it and the Elbrus. It is well watered by numerous small streams, which send their waters to the Caspian, and has a climate whose excessive heat is tempered by the mountain and sea-breezes, and a soil generally remarkable for its fertility, and productive in grain, tobacco, wine, cotton, and silk. The inhabitants are brave and hardy, are more nominally than really subject to Russia. The capital is Astara, a fort situated on the S. frontier and not far from the Caspian.

TALISSE, a small isl. 7 m. off N. coast Celebes.

TALK-O'-U-HILL, a vil and chapelry, England, co. Stafford on elevated ground commanding a view of nine counties, near the Trent and Mersey canal, 5 m. N. W. Newcastle-under-Lyme. It has, besides the chapel, which is a small brick-building, a place of worship for the Wesleyans, a national school, a stone-cellar in the centre of the village, where a market used to be held, extensive collieries and quarries, and a sulphurous spring, much used in outcrops affections.

Vol. XL

It is said to have derived its singular name from a salt or conchoid of war held here by Charles I., during the civil commotions. Pop. 1978.

TALLA a vil, and com. Tazony compart. and 15 m. N. W. Azores, 1 bank Salento near its confluence with the Arno. It has a parish church, and some trade in cattle, timber and chocolate. Gray or Guido of Azores the inventor of unsealed notes is said to have been born here. Pop. 3201.

TALLAGHT, par Irel. Dublin; 21,868 ac. Pop. 4367.

TALLAHASSEE, a vil, U. States, cap. Florida, on a commanding height washed by a small stream about 26 m. from Fort Leon in Apalachicola Bay with which it is connected by railway and 194 m. E. Mobile. It is of recent origin, having only been commenced in 1824, after it was selected to be the capital. It is laid out with great regularity in spacious streets and public squares, and contains among its principal edifices, Episcopal Presbyterian, and Methodist churches, an academy, a state-house, courthouses, and jail.

TALLAND par Eng. Cornwall 2965 ac. Pop. 1605.

TALLANSTOWN, par Irel. Louth, 5210 ac. 1. 637.

TALI APOOSA a river U. States rises in Georgia flows S.W. into Alabama and mingles with the Coosa, at Fort Jackson, in forming the Alabama. Total course, about 120 m., for 86 m. of which it is navigable, except in the dry season.

TALLARUBIAL, a vil Spain, Extremadura prov. and E. Badajoz; with a coquina, prison, hospital, endowed primary school, church and several chapels; linen weaving, an oil-press and three flour-mills. Pop. 2121.

TALLATON, par Eng. Devon 2565 ac. 1. pop. 445.

TALLEY par Wales, Carmarthen, 1167 ac. P. 1005.

TALLINGTON par Eng. Lincoln; 600 ac. Pop. 787.

TALLOW a small town, and par. Ireland, on and 884 m. W. by S. Waterford, with a fine old church, a St. Catharine chapel, several schools six almshouses, fever hospital, post-office and a parochial library. Many of the females are employed in lace-work. Area of par. 5615 ac. Pop. 5501.

TALLYA a vil, Hungary. Either Thales, ca. and 80 m. S.W. Zemplin, at the foot of the Tokay Hills with two churches a synagogue, and a considerable trade in the fine wines grown in the district. Pop. 5710.

TALPAS, a vil, Hungary, either Thales, ca. and 44 m. N.E. Arad on the Black Koros with a Greek church 1. op. 1862.

TALVIG a small seaport and par Norway prov. Fin mark, on a circular bay in the fiord of Alesund, 49 m. E. N. E. Tromsø. It has a church, in which the service is conducted alternately in the Norwegian and the Lappish tongues, an elementary school and a trade in dried fish and render and fox skins. Pop. (par) 3156.

TALYLYN par Wales Monmouth, 15182 ac. P. 1128.

TAMAMES, a vil Spain Leon prov. and 32 m. S.W. Salamanca. In 1808 the Spaniards, under the Duke of Parque, here defeated the French under General Marchand. P. 915.

TAMAR or THUTAKAKA, a vil Russia, Koryokh Co. on the Black Sea, on the extremity of a peninsula or island of same name formed by the mouth of the Kuban and at the S.E. entrance of the Strait of Rade. It occupies the site of the ancient Phazacaia, the walls of which still enclose it, though the interior is interesting only from its ruins. The few houses actually occupied are miserable huts, partly sunk in the ground, and covered with turf. On August 6, 1858, after a silence of 35 years, an eruption took place of Mount Karsakof, about 2 m. from the town of Tamar. It threw up smoke and smoke, and caused utter confusion.

TAMARJAH, a bay Brazil, on one of the best harbours on the coast of Pernambuco, 40 m. S.E. W. Capa Santo-Agostinho lat. 43° 48' S. lon. 22° 15' W. An opening in the reef which forms the coast forms the entrance to the bay which never has less than 4 to 5 fathoms of water. As the reef is low the waves break over it in high winds, and leave vessels without shelter from the S. and N.E.

TAMANDUA, a vil Brazil, prov. Minas-Geraes, 85 m. W. Ouro-Preto; with four churches, and a considerable trade in hides and cattle sent to Rio-de-Janeiro. Pop. (dist.) 5009.

TAMAR—1. A river, England, runs near the N. extremity of Cornwall, upon which it becomes the boundary between Cornwall and Devon, for a distance of about 40 m. The Tamar becomes a wide estuary near Beer-Alston, and further on below Balaish, forms the harbour of Harnose, 129.

and ultimately terminates in Plymouth Sound. The country of the Tamar is remarkable for its picturesque beauty.—2. A river Van Diemen's Land, district of Lauenstein, falls into Port Dalrymple, and is navigable for vessels of 800 tons to the town of Lauenstein, a distance of 25 m. or 80 m.

TAMARA, the largest of the lakes of E. coast of Sierra-Leone, lat. 12° 28' N., lon. 12° 42' W. (n.).

TAMARIDA, a serpent n., beautifully coloured on a body of same name. N. shore, lat. Ecuador. It was once a Portuguese station of some importance, and defended by forts, still partly existing; but is now composed of about 100 struggling houses, surrounded with date-trees and gardens.

TAMARITE, an ancient tn. Spain, Aragon, prov. Huesca, 64 m. E. Saragossa. It has a townhouse, two churches, a theatre, hospital, college, mathematical and other schools; a promenade, and several fountains. Pop. 1877.

TAMARU ariver, Napier, rises near San Giuliano, prov. Fianchi. Source S. and S.E.E., enters the Papai prov. of Buenos Aires, and within it, joins r. bank Calvo; total course, 50 m.

TAMAR (Tamar), two places, Hungary.—1. (or Thomsberg), a market tn., properly forming a suburb of Gran. l. op. 1228.—2. A tn. Huber Danube, co. Bacs, on a navigable canal, 5 m. from Lj. Verhas; with two churches, and a trade in corn and cattle. Pop. 5653.

TAMASY a market tn. Hungary Thutler Danube, co. Tolna, 17 m. S.W. Simontornya, with a R. Catholic church, a castle, and a trade in wine. Pop. 305.

TAMATAM a group of three low coral-islands, N. Pacific, connected by reefs, with a lagoon inside, and well inhabited. lat. 7° 22' N., lon. 149° 36' E.

TAMATAVE, or **TAKATATVE**, a maritime tn. E. coast, Madagascar, lat. 18° 10' S., lon. 49° 28' 30' E. (n.). The harbour is approached by narrow channels formed by coral reefs and the town consists of about 80 habitable dwellings, surrounded by palm-trees. Pop. about 2000.

TAMALIPALIS [formerly **NEW SANDWICH**] a dep. Mexican Confederation, founded by Texas, from which it is separated by the Rio-Grande-de-Norte. N.W. dep. Coahuila, N. Nuevo-Léon and San-Luis-Potosí, S. San-Luis-Potosí and Vera-Cruz and E. the Gulf of Mexico, greatest length, N.W. to S.E.E., 400 m., medium breadth about 130 m. area, 30,334 sq. m. The coast is low and fringed with lagoons varying from 20 to 16 m. in width, and separated from the sea by belts of sand, and the mouths of almost all the rivers are so encumbered with bars, as to make their navigation difficult and dangerous.

In the N. part of the state the flatness of the coast is continued to some distance inland and thence rises into elevated though still comparatively level plains. To the S. the surface becomes finely diversified by mountains, hills, and valleys. The most remarkable mountains are the serras of Maricao, Xerco, and Corral, and the serras of Palma and Carco. Many fine valleys extend in the intervals between the mountains. The most important streams are the Rio-del-Norte or Grande, already mentioned, the Fernando or Tigra which besides reaching the coast, also communicates by a branch with the lagoons Madre the Barbon, which falls into the N. of the same lagoon, the Santander, and the Tampoco, which forms the chief boundary between the state and the S. of San-Luis-Potosí. The climate of the interior is temperate and healthy, but on the coast, especially in the hot season is almost pestiferous. The soil is generally fertile and the vegetable products include most of the most esteemed grains, woods, fruits, and flowers, both of the temperate and the torrid zones. Cattle in vast numbers—horses, mules, sheep, and goats, to a less extent—are reared on the pastures and a considerable trade, both in them and in other articles, is carried on chiefly with the states of San-Luis-Potosí, Zacatecas, and Querétaro. The foreign trade is carried on chiefly at the ports of Tampoco-de-Tamulipas and Matamoros and includes in its imports large quantities of manufactures both from Europe and the N. American Union. Its capital is Victoria. Pop. (1856), 100,064.

TAMBACH a tn. Saxa-Coburg, princip. and 9 m. S.E.W. Gotha, with a church, manufactures of iron, tin and glass ware, and several mills. Pop. 1351.

TAMBLAN ISLANDS, an island group, Olden Sea, between Borneo and Singapore, they lie N.W. and S.E., and are moderately elevated. Great Tambelan, the largest in the group, is lat. 1° N., lon. 107° 35' E., on its W. side is a

good anchorage, and good shelter from west winds. A few goats, poultry, &c., may be had here; but natives very poor.

TAMBOV, a gov. Russia, bounded, N. by Nijni-Novgorod and Vladimir, W. Riazan and Tula, E. Orel and Voronez, and S. Saratov and Penza, lat. 51° 30' to 55° N.; lon. 38° 40' to 48° 50' E.; greatest length, N. to S. 870 m.; greatest breadth, 196 m., area, 19,938 sq. m. It forms an extensive plain occasionally broken by low hills. In the S. it assumes the appearance of a steppe, and is so thinly wooded, that large tracts are absolutely without a tree. In the N. the surface consists generally of a light unfertile sand, contains numerous marshes, and has several extensive forests, yielding good ship-timber. The government is well watered, and is nearly equally divided between the banks of the Volga and the Don. The former receives the drainage of the N. portion chiefly by the Moksha, and its affluents the Tura and the Vid; the latter receives the drainage of the S. portion, directly in the W. and indirectly in the E. by its principal affluent the Verca. About one-half of the whole surface is arable, one-fourth under permanent meadows and pastures, and one-fifth in wood. The corn raised leaves a large surplus for export. After corn, the principal crop is hemp, which is grown very extensively and of excellent quality. On the meadows and pastures vast numbers of excellent horses, cattle, and sheep are reared. The last are particularly attended to; and the Spanish and Italian varieties are common throughout the government. The only mineral of any consequence is iron, which supplies several blast-furnaces. The staple manufactures are woollen and linen cloth. After these, the most important is soap. The trade, greatly facilitated by the Tura and the Moksha, is important, and consists in corn, cattle, honey, soap, butter, cheese, wool, hemp and iron. The government is divided into 12 circles, of which Tambov is the capital. Pop. (1860), 1,785,000.

TAMBOV a tn. Russia, cap. above gov., 1400 m. lat. at the confluence of the Shadma, 233 m. S.E. Moscow. It is an ancient place, surrounded by a dilapidated rampart, and is built chiefly of wood. It contains 18 churches, of which seven are of stone, a monastery with wooden towers, a gymnasium, military school, university, and infirmary, is the residence of a governor, the seat of a bishop, and the seat of several important courts and public offices and has manufactures of woollens and silicoths, an alum-works, a considerable trade with Moscow and St. Petersburg in tallow, leather, wool and provisions. Pop. (1851) 19,411.

TAMBE [see **Tamara**], a river Spain rises in Gallizia on the W. slope of the Sierra which separates provs. Lago and Corvera, flows S. E. W. and falls into the Atlantic a little below Oporto, in the bay of that name. Total course, 60 m.

TAME two rivers, England.—1. Coe Stafford and Warwick rises near Watnall, flows E. and N. and after a course of 38 m., falls into the Trent 7 m. N. Tamworth.—2. (or **Thame**), Coe Bucks and Oxford after a S.W. course of 40 m., falls into the Isis below Dorchester giving to the former the name of **Thames**.

TAME, a market tn. England. See **THAMES**.
TAMEGA, a river which rises in Spain, Galicia; flows S.W. S.W., enters Portugal and traverses the N.W. part of prov. Trás-os-Montes, and joins r. bank Douro about 35 m. E. Oporto, total course, 100 m., of which about 35 m. are in Spain and 64 m. in Portugal.

TAMERTON FOXGROVE a vill and par. England, co. Devon, on a creek of the Tamar 5 m. N. by W. Plymouth. It contains a number of fine mansions, and has a church and a richly-endowed free school. Area of par. 6,150 ac. Pop. 1147.

TAMERTON (Nunton), par. Eng. Cornwall, 5261 ac. Pop. 516.

TAMIAGUA a small seaport in Mexican Confederation, dep. and 70 m. S.E. Tampico, E. side lake or lagoon of the same name, lat. 21° 16' N., lon. 97° 17' E. The houses are built of adobe, and in a straggling manner close to the lake. Some years since it was celebrated for its fishery which has now greatly declined. The town, being on low land, is very unhealthy.—The lake is about 55 m. long, by 20 m. broad, divided from the Laguna-de-Tampico by a neck of land, and on the E. from the Gulf of Mexico by a narrow strip of mudflats, 1 m. to 2 m. broad, covered mostly with low brush-wood, but in many places with lofty trees. The water of the lake is quite fresh and clear, and abounds in fish and alligators.

TAMIR, a river Central Asia, Mongolia, country of the Kaliks, flows E.N.E. and joins I. bank Orkhon, total course, 90 m.

TAMISE (Flemish, *Tamisa*; ana. *Tamase*) a. tn. and river, Spain, prov. B. Vizcaya, I. bank Scheldt, 22 m. N.E. Ghent; with a pretty church, chapel, commercial house, hospital, a fine theatre, several schools, and a mixed textile-manufacture of sailcloth, cotton goods, hats, pottery, tobacco, leather, chimney oil, mustard, soap, candles, cordage, and slugs; also breweries, distilleries, salt-refineries, a bleachfield, and dye-works with a trade in corn, flax, linen, leather, &c. Pop. 7055.

TAMIAGHT three pers. Ireland:—1, Londonderry and Tyrone, 4865 ac. Pop. 2489.—2 (*Finglen*) Londonderry, 16,080 ac. P. 5647.—3 (*O'Crilly*), Londonderry, 23,713 ac. Pop. 63,021.

TAMINGTAR, a tn. Nepal between the Arun and Sorya; lat. 37° 18' N, lon. 85° 32' E. Pop. about 6000.

TAMMERFORS, or **TAMMERFORS**, a tn. Russia, Finland, circle and 44 m. N.W. Tavastehus, beautifully situated on a river of same name, which connects Lake Nijoki with Lake Pyhäjärvi. It is the principal centre of manufactures in Finland, having several dye-works, fulling-mills, a paper and a cotton-spinning mill, and a considerable foundry. Its annual fair held in February, is much frequented. Pop. (1841) 8066.—(*See Finland*, par. *Finland*, E. Circle).

TAMOOK one of the smaller Soloo Islands. lat. 6° 28' N, lon. 121° 56' E.

TAMPA, a bay Gulf of Mexico. *See BERTHO* (BAY).
TAMPAICO, or **SANTA ANA DE TAMAUCAPIA**, a seaport in Mexican Confederation dep. Tamaulipas, 128 m. S.E. Victoria, on the Panuco, which, 5 m. below, enters the Gulf of Mexico; lat. 21° 50' N, lon. 96° W. It is built on a rising slope of ground. The streets are wide, and are laid out at right angles to each other; and have a respectable appearance, something some very fine houses, both of brick and stone, many of them in the old Spanish style, with flat roofs. It has two churches, a tower built to commemorate the defeat of the Spanish invasion in 1838, a prison, a monument in honour of the president Santa Ana, a custom-house, two hospitals and a Protestant burying ground. It carries on a considerable trade with Great Britain and the U. States. The town being situated among marshes, large vessels cannot approach it. Its bar is dangerous, and its harbour is considered unsafe. Pop. about 7000.—THE LAKE OF TAMPAICO is a shallow lagoon at the N. extremity of dep. Vera-Cruz, 30 m. long, by 10 m. broad. It communicates N. with the united mouth of the Tula and Tampico rivers, and E. with the Lake of Tamaulipas. It is celebrated for its prawns, which are very large. Immense quantities of them are caught, and besides supplying the vicinity, a large quantity is salted and dried, and sent to the interior for sale.—THE RIVER TAMPAICO, after an E. course, enters the Gulf of Mexico near Tampico, its bar being in lat. 23° 15' N, lon. 97° 46' W. Total length, 200 m. (*See Mexico*).

TAMSWEG, a market in Upper Austria, circle and 69 m. S.E. Salzburg, at the confluence of the Tauern and Muir in the valley of Isère. It is well built, and has a church, a school, a burgher-hospital and several mills. Pop. 2380.

TAMWORTH, a bor. market in and par. England, co. Bedford and Warwick. The town, 22 m. N.E. Bedford at the confluence of the Tame and Avon is partly in both the above-named counties. It is a large and well built, and surrounded by rich and luxuriant meadows. It has a handsome town hall, situated in the market-place, a large and ancient church, places of worship for Wesleyans, Baptists, Independents, and R. Catholics, a free grammar-school, Mr. Robert Peel's school, national and infant schools, and numerous charities, including an almshouse, endowed by Thomas Guy founder of Guy's hospital, London, a library and reading-room. Tape and paper are manufactured here to some extent. Tanning, calico-printing and brewing are also carried on. Tamworth sends two members to Parliament. Area of par., 12,450 ac. Pop. 8655.

TANA ELV, a river, Europe, rises on the frontiers of Finland and Norway; flows N.E., forming part of the boundary between the Russian and the Norwegian territories, finally enters Norway, and flowing almost due N. falls into the Fenssørd, in the Arctic Ocean, after a course of about 160 m. It abounds with salmon.

TANAGA, one of the Aleutian isls., lat. 51° 56' N, lon. 178° 10' W (a); about 83 m. long E. to W., and 4 m. broad. At its S.W. point is a volcano, and close by, a bay, about a m. broad, and 8 m. long. Water is abundant.

TANAH, a tn. Lower Egypt, near the centre of the delta of the Nile, celebrated for its festivals, held twice a-year, in honour of a famous Moslem saint called Sayid Ahmed al-Bedawee, who is buried in it.

TANAH FENIR, a tn. lat. Sumatra, state and 30 m. from Jambi. The curious water dragon a blood-henace, and re. tana. Pop. 4000.

TANAKEKE, a small tel. Java Sea, 17 m. off S.W. extremity of Celebes lat. 5° 38' S, lon. 119° 17' E (a); about 13 m. in circumference, surrounded by a cluster of small islets.

TANANARIVO, a tn. Madagascar cap. of Ankova and of all Madagascar, situated at the centre of the island, lat. 18° 56' S, lon. 47° E. 4000 ft. above sea-level. Pop. about 35,000.

TANARO (Latin, *Tanarus*) a river, Savoy, rises in Mount Tignes, near the pass of that name, in the Maritime Alps. Flows easterly to N.E. joins Arta, Aiti, and Alessandria, and about 10 m. below, joins R. bank Po. Total course 160 m., of which 45 m. commencing at Aiti, are navigable at least by barges. Its principal affluents are Belbo, Bormida, Elero, Poio Stura, Borja, and Verca.

TANCOB, a tn. and par. Portugal, prov. Beira-Baixa, 10 m. S.E. Thamar, on bank Tagus; with an hospital and almshouse. Pop. 530.

TANDAH, a tn. Hindoostan, prov. Bengal; lat. 24° 49' N, lon. 85° 15' E. surrounded by swamps and stagnant water, and consequently unhealthy.

TANDERAGEE, a tn. Ireland, co. and 10 m. W. by 8 Armagh strikingly situated on an eminence. It has as established church two Wesleyan Methodist chapels, and a Presbyterian meeting-house several schools, and considerable manufactures of linen, but the chief employment is agricultural. Pop. 1409.

TANIK, a vil. Punjab on the Chenab, princely Lahul lat. 32° 33' N, lon. 77° 3' E. about 6000 ft. above sea-level.

TANDRIDG, par. Eng. Surrey 8944 ac. Pop. 694.

TANEGA Soma an isl. Japan S. Kiuasu from which it is separated by the Strait of Van Diemen, length 80 m. average breadth, about 15 m. It is high and mountainous, but well cultivated.

TANEY, par. Ire. Dublin 4568 ac. 3 op. 8029.

TANFIELD, a vil. and chapelry, England, co. Durham on a height above the Howghwell 7 m. S.W. Gateshead. It is irregularly built; and has a chapel, two parsonage, and extensive collieries. Pop. 3490.

TANFIELD (Warr), par. Eng. York 3129 ac. P. 636.

TANGFRMUND, a tn. Prussia, prov. Saxony gov. and 32 m. N.E. Magdeburg, I. bank Elbe, at the confluence of the Tanger. It has several public offices, a church, and two hospitals. Manufactures of woollen cloth, shot, and slaves several oil-mills, some shipping, and a trade in corn and cattle. The first mayor of Brandenburg resided here. Pop. 4216.

TANGIAR, or **TANORA** (ana. *Tanora*, or *Tanora*) a seaport in Morocco, near the W. entrance of the Strait of Gibraltar S.E. of Cape Spartel lat. (point of home) 35° 47' 13' N, lon. 6° 49' 50' W (a). It stands on a height near a spacious bay, and rising in the form of an amphitheatre presents a very striking appearance when approached from the sea. It is surrounded by walls, and defended by a castle and several forts, but with exception of the main street, which traverses it E. to W. and is tolerably well built, it consists of wretched houses, huddled together in narrow dirty lanes. The only exception to the general wretchedness of the buildings are furnished by the residences of the European consuls, and those of a few wealthy merchants. The principal buildings are the castle, or *alcazar*, occupying a commanding height, but in a very dilapidated state several mosques, one of which is handsome several Jewish synagogues, and a R. Catholic church. The harbour which was once capacious, and protected by a mole, is excellently situated, and was formerly very much frequented by vessels from almost all the maritime countries of Europe, but now has allowed it to fall into complete disrepair, and it is now both inconvenient and difficult of access. The trade, now chiefly confined to Gibraltar, and a few places on the Spanish coast, is very limited; the internal traffic is chiefly with Tizena and Fez.

Tangier is said to have been founded by the Carthaginians, from whom it passed to the Romans, and afterwards successively to the Goths and Arabs. It was taken by the Portuguese in 1471 and ceded by them, in 1662, to the British, who erected a mole which gave protection to the largest

8900 sq. m. This is one of the most valuable parts of British India, and the granary of the Madras territories. Most part of the surface, forming the delta of the Coleroon and Cavery rivers, is a low, level and highly cultivated plain, intersected by numerous rivers, and covered by rice-ground with coconut groves interspersed.

South of this tract the country is more elevated and undulating. Dry grass, some cotton, and coarse tobacco are here produced. Pulses, garden-plants, fruits, coriander, cummin, lin, dago, &c., are raised. Iron, wax, nitre glass, &c. are received from the adjacent districts. Silks, muslins, and cottons are woven at Tanjore, Combackoon, and Negapatam ship-building and rope-making are carried on in the last-named place. Copper tunnels and oils are made elsewhere. The district is noted for good roads, productive salt-pans exist near Point Calymere. It is assessed under the village system. Hindoo institutions prevail here in great perfection; and the architecture of the pagodas is very uniform throughout Tanjore. This district became a British possession in 1799. Pop 1,138,739.

TANJORE, a city, Hindoostan, presid. Madras, cap. above said, in a fertile plain, about 45 m. from the sea, and 170 m. S. by W. Madras lat. 10° 45' N. lon 79° 12' E.

This fortified town, about 4 m. in extent, contains the palace of the rajah, numerous pagodas, and irregular streets. Out side of it are other quarters, an English church, the British residency and a remarkable pagoda, with a tower 200 ft. in height, and a sculptured bull, which is one of the triumphs

TANGIER, from the Field of Marston.—From Taylor, Voyages, 1780, p. 100.

vessels and kept possession of it for 22 years. It declined rapidly on falling into the hands of the Moors. Pop estimated at 10,000.

TANGIER ISLANDS a small group U States, Virginia, in Chesapeake Bay N. part of mouth of Potomack Bay. TANGIRAHAD a river U States, rises in Mississippi flows S. into Louisiana, then S. by E. to Lake Pontchartrain, 16 m. W. S. W. Madisonville, total course about 80 m.

TANGI EY per Eng. Islands 1561 sq. Pop. 278

TANGIERE, per Eng. Seas 774 sq. Pop. 221

TANGNOU a mountain-range Chinese Empire, halts country lying nearly along the parallel of 50° N. and between lon 90° and 100° E. It commences on the frontier of Siberia, where it detaches itself from the Altai stretches in a S. S. E. direction and separates the basins of the Yenisei from the streams that flow to the great central plateau of Asia.

TANINGE, TANNING, or TANNINGSS, a. in France, dep. Haute Savoie, prov. Faucigny, 9 m. E. N. E. Honnaville at the foot of a lofty rock, commanding a beautiful view. It has a court of justice, a school established in the buildings of an old convent, manufacturers of silk, leather and rural implements, silversmiths, extensively worked for exportation, and a seam of lignite. Pop. 820

TANIS, or SAN, a. in Lower Egypt, on a branch of the Nile, 10 m. above its mouth in Lake Menzalah. It is now scarcely a village of huts, but its ancient importance is attested by the height and magnitude of its mounds, which extend 1 m. N. to S. and nearly 3 m. E. to W. The most celebrated of the ruins are those of the temple, which stood in an enclosure about 1500 ft. long, by 1250 ft. broad. They consist of fragments of walls, columns, and fallen obelisks. The last, to the number of 10, all of the time of Memnon the Great, are composed of granite, and when erect, must have varied from 50 ft. to 60 ft. in height. These in the Zone of Scripture and in its field or plain, now a barren waste, were performed the miracles which compelled Pharaoh to let the children of Israel go.

TANJORE, a dist. Hindoostan, presid. Madras, extending along the E. to Cochin and south; lat. 9° 50' to 11° 25' N. lon. 78° 45' to 79° 55' E. bounded N. by the dist. of S. Arcot, and W. by those of Trichinopoly and Madras, area,

THE GREAT PAGODA TANJORE.—From Maclure's View in India.

of Hindoo art. In the rajah's palace is a group by Flaxman. The best residences at Tanjore are substantially built of brick and lime and often tastefully decorated; the inferior dwellings, and those in the adjacent villages, are of mud and tiled or plastered. Many of the inhabitants are weavers. Tanjore is connected by good roads with the chief towns of its district, and with Trichinopoly. It was besieged and taken by the British in 1778. Pop. 60,000.—(Rep. on the Topography and Statistics of the Madras S. Dist. Trigon. Survey, &c., Madras Asiatic Soc.)

TANKARDSTOWN, two part. Irek. —1, Kildare and Queen's co. —2, Limerick; 1710 ac. P. 544.

TANKERSLEY, per Eng. York, 6404 ac. P. 1928

TANN, a. in Bavaria, Lower Franconia, r. bank Ulzen, here crossed by a bridge, 32 m. N. by E. Witzburg. It is surrounded by walls, contains a Protestant church, three schools, and a posthouse, and has manufactures of woollen and linen cloth; oil, wax, and other mills and a trade in fruit. Pop. 1263.

TANNA, a. in Germany, Rhenus-Schlesia, on the Western, S. S. E. Schlein, with a shore. Pop. 1487

TANNA and, S. Pacific, New Hebrides lat. 19° 50' 54" S, lon. 169° 45' E (p. 1). It consists chiefly of a high range of mountains, with an active volcano. Excepting the latter, the whole island is well wooded and contains abundance of fine coconuts, yams, taro, sugar-cane, and wild figs. The natives use a stout reed, and were cannibals, but now have several missionary teachers resident among them.

TANNA is in Hindooism, on the E. shore of Isl. Salaseta, 30 m. N.N.E. Bombay. It is a neat and flourishing place, defended by a small but regular fortress, and containing a considerable contingent of British troops. It is inhabited chiefly by Hindoes, and the descendants of Portuguese, who, both in habits and colour greatly resemble Hindoes.

TANNADICE, par. Scot. Forfar; 88,000 ac. P. 1517
TANNINGTON, par. Eng. Suffolk 1602 ac. P. 248
TANBOR, par. Eng. Northampton 2050 ac. P. 256.

TANTALEM, a large Isl. Gulf of Bham, about 1 m. from the coast of Lower Siam, v. extremely Pointe Lager lat. 8° 50' N. lon. 100° 50' E. It is 80 m. long and 18 m. broad at the widest part, average breadth about 12 m.

TANWORTH, a vil. and par. England, co. Warwick, near the canal from Birmingham to Stratford, 4 m. N.W. Arden with a church, independent chapel two endowed schools, and manufacture of wick yarn. Area, 9400 ac. Pop. 1899.

TARMINA (anc. *Tauromenos*) a in Sicily prov. and 30 m. S. by W. Messina, on one of the summits of Mount Taurus. It is a place of some strength but though formerly an important town, has now a dull, deserted look. It contains several churches, particularly that of San Francesco, partly composed of an ancient Greek temple, and said to be the first church erected in Sicily. A Dominican convent, and old Baroque castle. Among earlier antiquities are a theatre, a necropolis, aqueduct, and supposed temple of Apollo. Some trade is carried on in wine and hemp, which are shipped at a small port in the adjoining bay. Pop. 4000.

TAOS, a in Upper Texas, 60 m. N. Santa Fe lat. 37° 3' N. lon. 105° 40' W.

TAUUM, or **TOAK**, a Turkish Kurdistan 80 m. S. Kerkuk, on an affluent of the Tigris.

TAPAGUE or **TAPAGUE** a vil. and par. Brazil about 10 m. N. of Bahia, on a peninsula in the Bay of All Saints with two churches, and a summer-residence of the archbishops of Brazil and extensive building-docks.

TAPAJOS, a river, Brazil, formed by the confluence of the Arinos and Jurunas, on the N. frontiers of prov. Mato Grosso; lat. 9° 30' S. The united stream, taking the name of Tapajos, enters prov. Para, flows N.E. at first in a narrow stream hemmed in by mountains, but afterwards in a broad and deep channel, receives the Preto and several important tributaries almost all on the right, and finally at Santarem joins r. bank Amazon, of which it is one of the main tributaries. Its navigation is impeded only by two cataracts, and though it is not so deep as the Madeira, it contains much fewer obstructions, and furnishes both a shorter and an easier channel for the traffic of the towns of Mato Grosso and Galaba.

TAPANILUACANGA, a vil. Brazil, prov. Minas-Gerais, 20 m. S.W. Minas Novas, in a basin enclosed by verdant and wooded hills. It was a place of some importance while the mines were productive, but has since greatly decayed. It has a church, and about 100 white-washed houses covered with tiles. The inhabitants practice the ordinary handicrafts and are cabinet-makers, carpenters, masons, &c., but the employment being very limited, they live in very penurious circumstances, while they despise agriculture, and consequently leave the fertile land around them almost uncultivated.

TAPPE, a vil. Hungary, Thither Thes, co. Comrad, on the Theiss, 3 m. from Segesdig with a church, and an extensive trade in raw wool. Pop. 1879.

TAPENTANA, one of the Sooolo Ids., S. Basilien lat. 6° 14' N. lon. 123° 5' E. (p. 1), with a regular peaked high mountain on the W. part, and lowland stretching out to the E.

TAFERA, a vil. Brazil, prov. Minas-Gerais, in an extensive valley where there was once a mine of gold, now exhausted, 23 m. S.W. Serro. It has a church, and manufactures cotton-cloth, contemporaries with a red and blue strip, towels and napkins, which are exported to Rio-de-Janeiro, and also hats of cotton in imitation of felt.

TAPIAU, a on Prussia, prov. R. Prussia, gov. and 18 m. E. S. E. Königsberg r. bank Prigeli, with a coast of justice a church, castle, and houses of correction, manufacture of carpets and hosiery, and some general trade. Pop. 2328.

TAPISI, or **TAYCHU**, a river, S. America, rises in the N.E. of Peru flows N.W. expanding into a lake of same name, enters Ecuador and after a course of above 300 m., joins r. bank Pato or Loxley.

TAPLOW par. Eng. Bucks 1900 ac. Pop. 704

TAPOLOSAHY two places, Hungary — 1 (Kis- or Kis-) A market in Hither Transylvania, co. Bara, 6 m. W. Königsberg, with a handsome church, elegant shuteen and manufacture of woollen cloth. Pop. 1051 — 2 (Nagy- or Gross-) A market in co. and 18 m. N. N.E. Neutra, with a church a ruinous castle, and large horse and cattle fairs. Pop. 2475.

TAPOOL, a small Isl. Sooolo Archipelago, S.W. of Isl. Sooolo lat. 5° 40' N. lon. 120° 50' E. It abounds in small cattle, goats, and yams, and has plenty of fresh water.

TAPPANGLY BAY in Sumatra, S.W. coast lat. 1° 45' 48" N. lon. 96° 45' E. (p. 1), an extensive harbour, or rather series of coves and harbours, formed by the different islands in it, where ships may lie sheltered from all winds. There is a village of the same name at the head of the bay.

TAPPANTOWN, a vil. U. States, New York, 120 m. S. Albany, with two churches and a few stores. Major André was executed here on a spy Oct. 2, 1780.

TAPTEL **TUPIT** or **TAPIT** a river, Hindooism rises in prov. Gundwana flows first W. S.W. passing Boorbanpoor then nearly due W. across prov. Candahar and Gulerak, and after a course of about 400 m. falls by several mouths, into the Gulf of Cambya 30 m. below Sora, and 30 m. S. of the mouth of the Nerbada. The principal effluents of the Tapite are the Poorra, Ghien and Pannara, which all join it on the left.

TAQUARI, two rivers, Brazil — 1 (or *Tacuary*) Rises in prov. Mato-Grosso flows N.W. then S.W. and receives numerous streams and finally joins r. bank Paraguay lat. 19° 18' S. total course, above 300 m. It abounds with fish and in some places is interspersed with islands. About 120 m. from its mouth a cataract impedes the navigation. — 2 (or *Taquary*) Rises in prov. São-Pedro-do-Rio-Grande, in the Serra-Geral lat. 18° S. flows S., and after a course of about 140 m. joins r. bank Jacuhy. It is navigated by small craft for about 80 m.

TAR, a river U. States, N. Carolina, flowing S.E. by E. and entering Pamlico Sound by a wide estuary, after a course of about 180 m. near Washington.

TARA — 1 A town, Ubersa, gov. and 280 m. E. S. E. Tobolsk, cap. circle, on a considerable height near the confluence of the Agacha with the Irtysh here crossed by a bridge. It is surrounded by an earthen rampart, and defended by a fort and has five churches, a mosque, manufactures of ordinary and morocco leather hats, and velvet a fishery, and several annual fairs. An active trade is carried on with Bokhara and China. Pop. (1842) 5086 — 2 A river Siberia, rises in the Barabinsk steppes gov. Tomsk flows W. S.W. into gov. Tobolsk, then N.W. and joins r. bank Irtysh near the town of same name, after a course of about 160 m.

TARA, par. Ind. Month 1824 ac. Pop. 422

TARADELL (San Geronimo), a in and com. Spain, Catalonia, prov. and about 35 m. from Barcelona. It has a public square adorned with a fountain, a church, courtyards, and school manufactures of bombazine and corduroy and some trade in these articles, and in agricultural produce. P. 178.

TARAKAI or **GIAP** or **TARTAK**, an arm of the Sea of Japan, which extends N. between Manchuria and the Isl. of Tarakai, having a length of about 400 m., with a breadth of 160 m. At the N. extremity where it becomes extremely shallow it communicates with the Gulf of Nagasaki, or estuary of the Amur.

TARAKAI, **KARATO**, or **RAKHANRA**, a large Isl. extending along the E. coast of Manchuria, from which it is separated by the Gulf of Tartary, the N. part tributary to China, the S. to Japan. Some have alleged it to be a peninsula, connected by a belt of sand with the coast of Asia, about 170 m. from the N. extremity. It is about 600 m. long and 25 m. to 120 m. broad lat. 40° to 54° 30' N. lon. 123° to 126° E. area, about 50,000 sq. m. The end of the land is separated from the Japanese island of Yezo by the Strait

of La Pagona and at its extremity is indented by a large bay, extending 50 m. from S. to N. called the Bay of Aniva. Two ranges of mountains commence respectively at capes Chillon and Aniva, the two most S. points of the island, stretching N.W. and N.E., and meeting at Barrial peak lat. 47° 33' N., lon 141° 40' E. The mountains on the W. side slope suddenly, and approach very near to the water's edge, leaving however in most cases a level strip, which is generally covered with lofty trees. The opposite shore, on the contrary is very low and sandy. N. of this mountainous region is a level tract of sandy and swampy ground, but the west N. division is hilly and fertile. The climate appears to be colder than that of most other places under the same latitude, and the island is entirely covered all the year round with fogs of astonishing density. Fir, oak, birch, and maple abound in the forests, and large quantities of timber are exported to Japan for building purposes. Gooseberries, raspberries, and strawberries are the principal fruits. Salmon and herrings are very plentiful, they are cured and prepared for the foreign market. Whales are found in great numbers along the E. coast, and in the Straits of La Pagona, and seals will be huddled in largely exported. Bears and martens are the only wild animals mentioned. The inhabitants are Ainu, of the same race as those which inhabit the island Yezo and are 5 ft. to 5 ft. 6 in. high. Their only manufacture is a kind of cloth, made from willow bark. Other articles of clothing being procured from Japan and Manchuria. Their food consists mainly of fish and roots, especially garlic and the root of a kind of lily.

TARAKLI, or **TEKELI**, a tn. Asiatic Turkey. Anatolia, on a stream of same name, 100 m. S.E. Constantinople. It consists of about 400 houses, and appears to be a wealthy place with manufactures of articles in bone and wood, dyewoaks, and a trade in wine and silk, exclusively produced in the vicinity. Taraki is supposed to be the ancient Hierapolis.

TARABCON a to Spain. New Castle, prov. Orense, 45 m. S.E. Madrid. It contains a palace, erected by the Duke of Rivas, which may vie with the best at Madrid. Two schools, several fountains, four hermitages, and a fine parish church, and has numerous oil-mills, manufactures of flax and plain cloth, and a trade in wine. P. (approximate), 4575.

TARABAT, or **TARABAT**, an isl. Scotland, so. Inverness, one of the Outer Hebrides, 2 m. off W. coast, Harris, and at the entrance to West Loch Turbert. It is of irregular form, high rocky and conspicuous, with hardly any soil about 4 m. long, and 2 m. broad at the widest part. Inhabitants engaged in fishing and sheep-rearing.

TARANTA, a vil. Naples, prov. Avellino-Citra, S.E. W. Lucania near bank Avenio with two churches. P. 1190.

TARANTALOE, or **TARANTARA** a div. France dep. Savoie bounded N. by Faussey, N.W. by Upper Savoy, W. by S. Maurienne, and E. by Piedmont. Length E. to W. about 39 m. mean breadth about 21 m. area 839 sq. m. Its surface is very mountainous throughout, being covered on the E. by the Cottian Alps, which here present the lofty summits of Mont Iserein and Little St. Bernard. The principal stream is the Isère. The rugged nature of the ground visits is generally for regular agriculture, though there are some fertile valleys in which a good deal of corn is grown, but the chief dependence is on the pastures, which rear great numbers of sheep and cattle. The minerals also are of considerable value. Pop. (1852) 45,841.

TARANTASCA a vil. and com. Italy. Piedmont, div. and 4 m. N. Com. near bank Grana, with a church, three convents, a townhouse, school, and charitable endowment. Pop. 1869.

TARANTO [anc. *Tarentum*], a tn. Naples, prov. Otranto, and at the N. extremity of the gulf of same name, 65 m. S.E. Matera. It stands on a lofty and narrow, defended by a citadel, is the seat of an archbishop, and has a harbour, once deep and spacious, but now very much silted up. It is well built, and contains many handsome private mansions and public edifices. Among the latter are a cathedral, and several other churches, 10 monasteries, one of which is particularly handsome; five hospitals, a diocesan seminary, a very large orphan and foundling, and two other hospitals. The manufactures include linen, cotton, velvet, muslin and gloves of the finest of the *Trame* variety,

of which great numbers are taken in the gulf. The scarlet dye of Taranto, long famous, still enjoys some repute. The trade is of little importance. Taranto was at one time a large and powerful city, which had 14 neighbouring towns subject to it, could furnish an army of 8000 cavalry, and 3000 foot-soldiers, and recovered the Adriatic with its fleets. It was taken by Fabius Maximus, during the second Punic war, and given up to pillage. The destruction was afterwards completed by the Saracens, and hence there are few remains of ancient buildings. Pop. 16,000.

TARABTO (anc. *Tarus*), a gulf formed in the S.E. extremity of the Italian peninsula, by the Ionian Sea. Its entrance, formed in the S.W. by Point Alife, and in the N.E. by Cape Santa Maria de Lavea, is about 70 m. wide, and the gulf is nearly 80 m. deep. It receives, among other streams the *Rumanti*, *Arce*, *Sarno*, and *Casale*.

TARAPACA, a tn. Peru, cap. prov. of same name, on a mountain-terrace, about 12 m. above its mouth in the Pacific lat. 19° 55' S. lon 69° 35' W. It consists of houses of adobe and seldom more than one story high. Further up the ravine of the terrace, are the Indian settlements of Pachico, Laocoma, and Puchucura, near the last of which are old gold, silver, and lead mines of the Spaniards. The province, lat. 19° to 21° 30' S. lon. 68° 15' to 70° 22' W. is bounded, N. by prov. Arica, W. the Pacific, S. the desert of Atacama, and E. Bolivia; greatest length, N. to S., 150 m. breadth 180 m. The coast is arid and bold mountains of porphyry often rising abruptly from the sea, from 3000 ft. to 6000 ft. This maritime tract, about 80 m. wide, is very rugged, and owing to the prevalence of sand and salt, is in general almost destitute of vegetation. Behind it is the puna or great plain of Tamaracqui, which has an average height of about 5000 ft. and stretches through the whole length of the province, with a breadth of 80 m. The plain reaches the base of the Andes, which have here several very lofty summits, including that of the *Lirima* or *Chimura*, supposed to be 24,000 ft. or 25,000 ft. high. Immediately beyond, terminating the province on the E. is an elevated undulating region with considerable depressions, some of them affording good pasture, and land on which some millet is raised and others covered by lakes containing fish. The province yields much large quantities of silver that it has been designated the *Potosi* of Peru. It also has rich copper-mines, from which the first cargo was sent to England in 1821 and immense deposits of nitrate of soda. It is divided into four *corazones*—Tarapaca, Pica, Sibaya, and Camilla. Pop. 11,000.

TARARU [anc. *Tarentum*], a tn. France, dep. Rhone, 30 m. N. Lyons. Its prosperity is of very recent date, and is owing to the successful introduction of the manufacture of fine muslins, of which from 8,000,000 to 4,000,000 pieces are annually produced in the town and surrounding country, employing about 50,000 persons. The other manufactures are silk goods and woollens. Pop. 8800.

TARABCON [anc. *Tarus*], a tn. France, dep. Bouches-du-Rhone advantageously situated 1 hour Rhone opposite

THE CHURCH OF TARABCON.—Boulevard of the same name.

Boulevard, with which it communicates by a suspension-bridge, 50 m. N.W. Marseille. It is surrounded by walls, flanked

with towers, and entered by three gates. The streets are wide and regular, and most of them are lined with cascos. The principal buildings are the old castle, seated on a height overlooking the river; the church, a handsome Gothic structure of the 11th century; the church, a handsome Gothic structure of the 11th century; with a finely-embellished portal; the townhouse, courthouses, theatre, general hospital, and public library. The manufactures consist of woollen cloth, serge, silk goods, hampers and cotton cloth, vermicelli, soap starch and sordage. There are also bread-dustilleries, wax-candle ories, tanneries, brick-works, and building-yards for barges. The trade is in wine, brandy, oil hemp, wool, wood, coal, medicinal plants, lucerne-seed and madder. Pop. 9180

TARABP a vil. and par Switzerland, can. Grisons. Lower Engadine, r bank Inn, on a plateau about 4000 ft. above sea-level. 40 m E. by S. Col. It has an old castle still habitable, finely situated on a conical hill and has recently become a place of considerable resort, in consequence of the discovery of a mineral-spring, which has led to the erection of various hotels and lodging-houses. Tarabp is the only E. Catholic village in the Engadine. Pop. 400.

TARAWA, or **KORU** in French, Gilbert Archipelago, lat. 1° 39' N lon. 178° 5' E. It is 20 m. long, N W to S E, of coral formation with a lagoon partially wooded, and inhabited by natives in a very savage state.

TARAZONA [anc. *Tarazona*] an episcopal city, Spain, Aragon, prov and 67 m. W N W Saragossa, on the Quales, here crossed by several bridges. The city proper forms a kind of amphitheatre, its streets resembling an irregular star, the whole producing a fine effect. Tarazona has various schools of elementary and advanced education, a seminary, an academy, an hospital, a house of refuge, a theatre, and the very ancient episcopal palace, once the residence of the kings of Aragon. There are also four parish churches, several convents, hermitages, fountains and a beautiful park. The cathedral, founded about the 13th century is externally a tasteless medley of Byzantine and Gothic architecture, but the interior is very grand and imposing and although many successive ages have contributed to its embellishment, there is no incommensurable Tarazona formerly supplied a large proportion of the inhabitants of Spain with cloths and habes, now quite an insignificant branch of its industry. It still has manufactures of hampers shoes and of hats, 11 oil and 12 flour mills, and a tannery but the inhabitants are now chiefly engaged in agriculture and cattle-rearing. Here were celebrated, in 1170 the nuptials of Alonso VIII of Castile, with Leonora, daughter of Henry II of England. P 6418

TARAZONA, a tn. Spain, prov Albacete, 112 m. S. E. Madrid. It has a townhouse, prison, hospital, two schools, a parish church and a hermitage. Pop. agricultural 6557

TARBAKAT, a bur. Chinese Turkestan between Cobdo and the Kirghis steppe, and inhabited chiefly by emigrants from the latter. The chief town, called Taguchuk by the Kirghis, and Buzhing-chung by the Chinese, is situated in lat. 46° 5' N, lon. 82° 38' E; near the S. base of the Tarbagat Mountains, a lofty chain between the lakes Zassan and Halkak; N. and contains about 600 houses, half of which belong to the garrison. It is one of the most fortified towns under the control of the commandant at Kuldika, and a place of some trade with the Kirghis. There are about 2500 Manchou and Chinese troops stationed here, with two residents invested with high powers to superintend the trade and intercourse across the frontier. (Middle Kingdom)

TARBAT par Sect. Rouz; 6400 m. Pop. 2151

TARBENA, a tn. Spain, Valencia, prov and about 86 m. N. E. Alicante, with a church, courthouses, primary school and the ruins of an old Moorish castle, manufactures of linen, several oil-mills, and a trade in corn, oil, and silk. P 1978

TARBERT a small town in Ireland, co. Kerry, 84 m. W by S. Limerick, at the head of an inlet of the Glenties, called Tarbert Bay. It possesses a neat church, a E. Catholic chapel, and a small Methodist meeting-house. The bay affords the best anchorage on the S. side of the county. Pop. 995

TARBERT (Tarbat), a small seaport tn. Scotland, co. Argyre, picturesquely situated on a very narrow isthmus, which joins the districts of Kintyre and Knapdale. It has an Established chapel, a Free church, and a good herring-fishery. Steamers from Glasgow ply regularly to Tarbert, where passengers and goods are taken across the isthmus, on

their way to Islay, &c.—(WATER TARBERT). A vil. about 1 m. from above, across the isthmus, with a good quay at the head of W Tarbert Loch, an arm of the sea, 10 m. long, by about 1 m. broad. Steamers ply regularly from W Tarbert to Islay.

TARBES [anc. *Castrum Augustoranum*], a tn. France, sup. dep. Hautes-Pyrenees, beautifully situated, 110 m. S. Bordeaux, in full view of the Pyrenees, 1 bank Adour, here crossed by a handsome bridge. It is a well-built cheerful-looking town; kept remarkably clean by means of canals supplied from the river; and possesses due promenades and three good squares. Its principal edifices are the cathedral a modern structure, erected on the site of the old castle of the counts of Bigorre, of which Tarbes was the capital, the church of St. John, the church of the Carmelites, with a remarkable spire, the prefecture occupying the old episcopal palace, the civil hospital, college, and barracks. The manufactures consist of leather and paper and the trade, which is important, includes, besides these articles, white wine iron, cattle and agricultural produce. Tarbes is the see of a bishop, the seat of a court of first resort and of commerce, and possesses a communal college, ducanary, seminary, and agricultural school. It is mentioned by Caesar under the name of Bigorra, and afterwards, under the Romans, became one of the principal cities of Aquitania. On the decline of the empire it was ravaged in succession by the Goths, Vandals, Alains, and Visigoths. It afterwards passed to the English monarchs as part of the dowry of Queen Eleanor and remained in their possession for 800 years. The Black Prince held his court at Tarbes. Pop. 11,838

TARBOLTON, a burgh of barony and par. Scotland, co. and 7 m. N. E. Ayr. The village covers a considerable space of ground, and contains many neat houses. It has a hand some Established, a Free, and a Unitarian church, a subscription library a savings bank, and two or three schools. Weaving in the various departments of cotton, woollen, linen &c. chiefly for Glasgow houses, constitutes the principal occupation of the inhabitants. Area of par. 12,500 ac. P 2894

TARCCAL a market to Hungary Hither Thelm, co. Zemplin, dist and 2 m. W Tokay in a remarkably fertile country. It has two churches, and a trade in the excellent Tokay wine, and in fruit, corn, and cattle. Pop. 1000

TARDEBIGG par Eng Worcester and Warwick 6994 ac. Pop. 6423

TARDENOIS, an ancient dist. France which depended on the Soudan and the gov. of Ile-de-France. It is now included in the S. part of department Aube. Lu-France-Tardenois was its capital

TARDES, a river France, dep. Creuse flows immediately N N E. into dep. Allier and about 7 m. above Montluçon joins 1 bank Cher, total course 40 m

TARDOIN, a river France, rises in S. of dep. Haute-Vienne, flows easterly W enters dep. Charente, turns N N W passing Rochefort-sur-mer and little below, is lost in the ground near Cognac total course, nearly 50 m.

TARHM, or **TAROUT** a tn. Persia, prov Laristan, 200 m. S. E. Shiraz. It is surrounded by a deep ditch, and lofty and battled walls, flanked with towers; has very narrow streets, three mosques, a caravanserai, an indifferently furnished bazaar and a considerable trade with Bender-Abas, to which it sends corn, in exchange for sugar coffee, and Indian produce. Pop. 3000

TARFF a small stream, Scotland, co. Perth, dist. of Athole, rises in the mountains which form the N. boundary of the county and flows E. to Glenmore, where it joins the Tilt

TARIFA a maritime to Spain prov Andalusia, and 53 m. N. W Cadix, W of the Strait of Gibraltar being 16 m. W by S. Point of Europa and 25 m. S. E. Cape Trafalgar, lat. 36° 8' N; lon. 5° 36' W and forming the most S. point of Spain. It has two large and six small squares, one of the former used as a vegetable market and irregular narrow, and the middle one several but clean streets, an hospital for the poor, a granary, several schools, two parish churches, several hermitages, and a very ancient Moorish castle, the residence of the Gennetas, now the abode of galley-slaves. The fortifications including Tarifa, which were built by the Moors, consist of 26 towers and the same number of curtains, forming an irregular quadrangle but the real strength of the place lies in the rocky island, 100 by 600 yards, which projects into the sea, and on which is a fortress and a light-house, 135 ft. high, visible for 50 m. It has manufactures of leather, vermicelli,

centurion; several four-mills, and a limited shipping trade. Tarja derives its name from *Tarf* (an Arabic word) which here was used by the Moors, the Moors, and, to reconvert, before the invasion from Africa. It afterwards became a frontier bay of great importance. Sancho IV took it in 1299. Alonso Perez de Guzman held it against the Moors in 1504. In 1540 it was again besieged by the Moors of Tunis and Granada, but after five weeks, the siege was raised by the king of Castile and Portugal, who defeated the Moors. In 1811 it was defended by Colonel (now Lord) Gough, with 1200 British and 600 Spaniards, against a French force of 10,000. The Duke of Wellington had disapproved of the success, because we had no right to expect that comparatively a small number would be able to hold Tarja, commanded as it is at short distances, and surrounded in every direction and unprotected with artillery and the walls scarcely cannon-proof. The enemy however retired with disgrace infinitely to the honour of the brave troops who defended Tarja. — (Dress, Feb. 1, 1812) p. 8118.

TARJA, a dep. Bolivia lat. 21° to 22° S. lon. 63 to 67° W. estimated area, 15,000 sq. m. drained by the Tarja and its tributaries. It chiefly consists of high mountains and fertile valleys, with extremely rich pastures, feeding vast numbers of cattle and sheep. The capital, Tarja, is on the bank of the stream of the same name, and not far from its source. It is small, but well built and contains 2000 inhabitants. — The river runs in the Mountains of Tacora, in the S. of Bolivia. Sows E.S.E., forms part of the boundary between Bolivia and La Plata, enters the latter, flows N., and joins the Yernoy, after a course of about 150 m.

TAREHAN (Cape), the most W. point of the Crimea. Black Sea lat. 45° 30' 45" N. lon. 32° 29' 45" E. (N.) There is a highness on the cape, exhibiting a bright fixed light, which in clear weather may be seen at a distance of 17 m.

TARNI, **TARNROD** or **TORNHAGALOVA**, a m. Transcarpathian district, prov. Dagestan, in a large and deep valley which opens outward towards the Caspian Sea, 71 m. S.E. of Kizlar. It stands among immense masses of rock, among which it runs partly in the form of an amphitheatre, and is commanded by a strong fort. The houses are built with flat roofs, and the streets are very irregular, but all the houses are well supplied with excellent water by means of aqueducts. A considerable trade is carried on with Persia, and the district around is well cultivated. Considerable attention is paid to the rearing of silk worms. Pop. about 10,000.

TARLAND, a burgh of barony Scotland, co. and 39 m. W. Aberdeen. The houses are neatly built, and to each is attached a small portion of land, in the cultivation of which the inhabitants are partly employed. It has a neat plain Established church, a library and a savings bank. Close by the village is a large meal-mill.

TARLAND and **Muir**, par. Scot. Aberdeen; 6 m. by 4 m. Pop. 1197.

TARLTON par. Eng. Lancashire 5405 ac. P. 1945. **TARMA**, a m. Pers. cap. dep. Juma, 120 m. N.E. Lina. It is a favorite resort of travelers from different parts of the country, especially Lina. Its inhabitants are all agriculturists and mostly all the resident families emigrate during harvest-time to little farms in the vicinity. Pouches or loose cloaks are manufactured here, of great beauty and fineness. Pop. 6000.

TARN (anc. *Turnus*), a river France, rises on S. slope of Mount Lozère, near Florac, dep. Lozère, flows N.W. through dep. Aveyron and Tarn, passing Alby terms N.W. through Haute-Garonne into Tarn-et-Garonne, where it passes Montauban, and shortly after turning almost due W. passes Moissac, and joins r. bank Garonne about 8 m. below. Its principal affluents are, on the left, the Dordogne, Dourdon, Euse, and Agout; and on the right, the Tescou and Aveyron. Its whole course is 250 m., of which about 100 m., beginning at Alby, are navigable.

TARN a dep. France, bounded on the N and N.E. by dep. Aveyron N.E. Hernalt, S. Ande, S.W. Haute-Garonne, and N.W. Tarn et Garonne; lat. 43° 25' to 44° 15' N. lon. 1° 30' to 2° 55' E.; greatest length, E. to W., 52 m. average breadth, 60 m. area, 2185 sq. m. The surface is intersected by hills, which generally terminate in flat summits, on which, as well as their sides, cultivation is successfully carried on. Only a few of the hills are rocky and

barren, or so high as to be beyond the reach of the plough. Among the trees is the celebrated pike called the *Bois de Montauban*, 4500 ft. above the sea-level. Between the hills are several plains of considerable extent, on which, as well as the lower slopes, all the ordinary cereals are grown, in quantities more than sufficient to meet the home consumption. In some of the higher districts, hemp of excellent quality is raised, but there the principal crops are rye, oats, buckwheat, chestnuts, and walnuts. A considerable extent of the surface is devoted to the culture of the vine, the produce of which, to the extent of a half, is consumed on the spot, or converted into brandy, while the remainder is exported. The domestic animals are generally of good breed. The sheep yield good wool, which is mostly consumed by the manufacturers of the department. The horses are in much repute for light cavalry. The principal rivers are the Tarn, the Agout, the Aude, the Dordogne, the Vézère. The minerals include iron and coal, both of which are partially worked, and there is also a mine of manganese. Fine and common broad-cloth serge, casimere, flannel and other woollen stuffs, common and table linen, pique, hosiery, muslin, cotton cloths, hosiery, carpets, liquors, and confectionery are manufactured; there are cotton and silk mills, brass and distilleries, paper-mills, tanneries, dyerworks, and four glass-works. The trade is chiefly in corn, wine, fruit, dried prunes, honey, wax, indigo, pastel, cattle, iron, coal, and timber. Tarn is divided into four arrondissements—Alby (the capital), Castres, Gaillac and Lavaur; subdivided into 55 cantons, and 815 communes. Pop. (1855), 363,073.

TARN-ET-GARONNE, a dep. France, bounded N. by dep. Lot, E. Aveyron and Tarn, S. Haute-Garonne, and W. Gers and Lot et Garonne; lat. 43° 47' to 44° 33' N. lon. 0° 55' to 1° 55' E. It is nearly in the form of a triangle, with its vertex in the E. and its base in the W. greatest length, E. to W. 42 m. breadth, 28 m. area, 1405 sq. m. The surface is generally flat, but somewhat undulating and has a gradual slope to the W. It is occasionally broken by low hills or narrow valleys, and attains its greatest height in the S. and E. where there is a range of hills, in which several streams take their rise. The whole department belongs to the basin of the Garonne, which traverses it E. to N.W. and receives within it the accumulated waters of the Tarn and Aveyron, which are both navigable. There is very little land which can be re-cultivated. Absolutely waste. About two-thirds of the area are arable, one-eighth is in wood and one-tenth in vineyards. Much of the arable land lies along the banks of the river and consists of a rich alluvium, on which heavy crops of wheat, maize, hemp, and tobacco are grown. The best vine-districts lie between the Tarn and the Garonne, and much of the wine produced is of excellent quality. Rather more than one-third of the produce is consumed on the spot and the remainder is exported or converted into brandy. Fruit of all kinds abounds, and the mulberry is extensively cultivated for the rearing of silk-worms. The breeds of domestic animals are of an indifferent description, with exception of mules, which are reared with considerable care, are very numerous, and form a principal source of wealth to the inhabitants. Poultry also, particularly ducks, geese, and turkeys, are reared on a large scale. Game of all kinds is abundant, and the rivers are well supplied with excellent fish. The minerals include iron in considerable quantity, a little coal, and some marble. Building-stones are found in almost every district. The most important manufactures consist of common woollen cloth and serge, linen goods, silk hosiery, cutlery, quills, straw, leather, soap, paper, and earthenware. The trade is extensive in corn, four, wine, brandy, produce, oil, saffron, and some of the above articles of manufacture. The department is divided into three arrondissements—Montauban (the capital), Castel Sarrazin, and Moissac; subdivided into 74 cantons, and 123 communes. Pop. (1855), 327,553.

TARNOGROD, a m. Russian Poland, 62 m. S. Lublin, with some general trade. Pop. 1750.

TARNOPOL, a m. Austrian Galicia, cap. circle, L. bank Sereth, 70 m. E.S.E. Lemberg. It contains a Russian Catholic and a Greek Catholic church, a castle, Jesuit college, a philosophical theological institution, gymnasium of boys, school for the orphans, and several other schools, and has numerous factories, but the inhabitants are chiefly employed in agriculture. Pop. (1848), 16,988.

TARNOW a tn. Austrian Galicia, esp. circle, on a hange above bank Rhine, have created by a covered wooden bridge, 40 m. S.E.E. Grosse. It is the far the most vast well built, is the seat of a bishop, has courts and offices for the circle, a hospital, cathedral, Franciscan monastery, gymnasium, synagogue, high school, and infirmary, and manufacturers of linen, articles in tawny, and leather. Pop. 16,148.

TARNOWITZ, or **TARNOWITZ** GIZA, a tn. Prussia prov. Silesia, and 40 m. S.E.E. Oppeln with a court of justice, a printing directory for Upper Silesia, and other public offices, a Protestant and a Catholic church, a synagogue, townhouse, two schools, hospital, and a trade in horses and cattle. Near it are extensive smelting establishments, and valuable mines of silver, lead, zinc, and iron. Pop. 28,022.

TARO, a river, Italy, rises in N slope of the Apennines, in the Sardian States, div. Genoa. Flows first S.E., then entering Parma, flows circuitously N.N.E., passes Borgotaro, and joins I. bank Po at Tortoise, about 13 m. N.W. Parma; total course, 75 m. Its principal affluents are the Ema and the Sticco.

TAROUCA, a tn. and par. Portugal, prov. Baixo-Alentejo, 7 m. S. Lamego, on a small stream of same name. P. 1693.

TAROUN a tn. Persia. See TARKAN.

TARPURLEY, a market tn. and par. England, co. and 19 m. S.E.E. Chester. It has a neat appearance, an ancient church of red sandstone, a place of worship for Wesleyans, and an endowed school. Area of par., 955 ac. Pop. 3,622.

TARRAGONA, a prov. Spain, Catalonia, bounded N. by prov. Lerida, E. Barcelona. S. the Mediterranean Sea, along which it stretches about 90 m., between the rivers Cenia and Foix, and W. by prov. Tarragona, Castellon-de-la-Plana, and Sagunto. Area, 1,865 sq. m. Like the rest of Catalonia, it is in general mountainous, the principal range being that of Prades, whose numerous offshoots run out at the coast, leaving between them extensive and fertile plains, such as that of Tortosa. The hills abound with forests of pine and oak the most extensive of which is that of Poblet, about 25 m. in circumference, and there is also abundant pasture for cattle. The cultivation of the vine holds an important place in this province, and its wines have obtained considerable reputations in foreign countries as well as in Spain. It also yields grain, vegetables, alfalfa, almonds, oil, silk, hemp, soda, barilla, timber and firewood, and possesses mines of lead, copper, silver, and manganese, as well as quarries of limestone and white sandstone. Its principal rivers are the Foix, Goya, Francoli, Ebro, Cenia, and Algars. Manufacturing industry is here in a state of active progress, almost every place of any importance exhibiting a spirit of enterprise, such as Ebro, Valls, Vendrell, La Riba, Tortosa, Amposta, Sta. Coloma de Queralt, and many others, which are full of manufactories of all kinds of silk, woollen, velvet, and cotton fabrics, handkerchiefs, ribbons, paper, leather, liquorice, cork, cordage, soap, oil, machinery, and above all, brandy. Its commerce consists chiefly in the exportation of the above products of industry as well as of the wines of Priorato, the plain of Tarragona and Vendrell, and the importation of grain, cotton, &c. Education is in a state of disgraceful neglect, considering the general prosperity of the province. Pop. 290,000.

TARRAGONA a city Spain, Catalonia, esp. above prov., 378 m. N.E. Madrid. 1. bank Francoli, on a hill from 500 ft. to 600 ft. above sea-level, on the shore of the Mediterranean. lat. 41° 9' N., lon. 1° 20' E. Portion of the primitive walls, the erection of which is attributed to the Celts, together with several ruins of the same colossal masonry still remain on the summit of the hill, the former serving as a foundation to the magnificent wall built by the Romans, which, frequently repaired, still constitutes a great part of the present circuit of fortifications. The city is divided into the high and the low town, the latter being modern, and built near the harbour. In general the streets of the former are irregular, some of them very narrow, and few of them paved, and, excepting in the principal quarter, they are in a filthy, neglected and ruinous state. The houses, many of which are built of stone, are generally built, and adorned in marble and other costly materials, and are derived from the quarries in the neighbourhood, and are partly from the ruins of the temples and palaces raised by the ancient rulers of Tarragona. On the other hand, the new town, which stretches upwards from the shore to within 100 yards of the walls of the old town, in the form of an

amphitheatre, is laid out into broad and regular streets, crossing each other at right angles. This city possesses but few public buildings distinguished by architectural beauty. One of the finest is the archiepiscopal palace, a handsome modern edifice, with an Ionic portico in front, and a magnificent staircase with arches resting on a colonnade of jasper. It has likewise a large circular an elegant theatre, a townhouse, granary, fish-market, flesh-market, abattoir, foundling hospital, asylum for orphans, casual houses, lunatics, various educational institutions, a museum, three nurseries, several suppressed convents, some of which have been converted into barracks; and a prison. But the most important and gigantic structure in Tarragona is the mole, begun in 1780, and intended to be 1550 yards long, of which about 1500 yards are completed. Besides the remains of Roman buildings already referred to there are many others of greater or less importance in the city and its environs, including an amphitheatre and a circus, an aqueduct and about 3 m. off, the tower of the Saepe. The manufactures include soap and brandy, and there are flour and oil mills. The principal trades are those connected with navigation, salt-making, soap-making, and carpentry, &c. In 1848, 4044 vessels (127,415 tons) cleared outwardly, and 9093 vessels (99,473 tons), inwardly.

Tarragona is said to have been settled by the Phenicians. Under the Romans it was raised to be capital of the province by Augustus. It was taken by the Goths, who also made it their capital. The Moors, under Taki, utterly destroyed it, and the ruins remained uninhabited for four centuries. About the beginning of the 13th century it began to be rebuilt, and grew to be a frontier fortress and nothing more; for Christian conquerors entered at Barcelona, while Moorish traffic proffered it alone. It was taken by Peterborough in the war of succession, and in 1818 it was invested by Suchet who took it by storm. In the time of the Roman Tarragona contained, it is said, 1,000,000 inhabitants, now the pop. is 18,014.

TARRANT seven par. Eng. Dorset.—1 (*Cowford*) 600 ac. P. 77.—2 (*Cowford*) 2435 ac. P. 475.—3 (*Hinton*) 2278 ac. P. 819.—4 (*Kyneton*) 1902 ac. P. 521.—5 (*Lambroton and Mendon*) 5818 ac. P. 878.—6 (*Reston*) 636 ac. P. 66.—7 (*Shalston*) 1221 ac. P. 196.

TARRASA two places, Spain, 1st. (*Spain*). A tn. Catalonia, prov. and 16 m. N.W. Huesca. It has two principal entrances, one of them formed by a magnificent triumphal arch and broad straight, paved, well-lit streets, two squares, a courthouse, a porch, an endowed school, a church, a chapel of ease, and a beautiful promenade with seven avenues of trees. The fine cloths of Tarrasa have been long celebrated. Of these 8000 pieces were annually manufactured until lately but the number is now reduced to about 4000. Bases, Hannels, serge, tawny, &c. are also produced in considerable quantities. This branch of industry is now on the increase. Cotton thread and laces are likewise made, and dyeing is carried to great perfection. Pop. 6226.—2 (*San Pedro de*). A vil., close to above town with a church. The chief employment is cotton-weaving. Pop. 1717.

TARRAGA a tn. Spain. Catalonia, prov. and 25 m. W. Lerida; with a townhouse and prison, two primary schools a rather large hospital for the infirm poor a barracks, church, hermizage, cemetery, and two promenades three flour and nine oil mills. Pop. 3190.

TARRING NEWTON, par. Eng. Sussex; 986 ac. P. 74. **TARRING** (Warr) par. Eng. Sussex 1336 ac. P. 684.

TARRINGTON par. Eng. Hereford 2224 ac. P. 534.

TARRINSAY, an islet, Scotland. See TARRINSAY.

TARRYTOWN, a vil., U. S. York, N. York; 1. bank Hudson, 37 m. N. New York city; with several churches and an academy. Sleepy Hollow—the scene of Rip Van Winkle's story, is in the neighbourhood. Mayor Andri was captured here. Pop. about 1000.

TARSA, a tn. Naples, prov. Calabria-Citra, 18 m. S.E. Castroville. It is walled; has two parish churches and the ruins of an ancient castle. Several, a celebrated anecdote of the 17th century, was told here. Pop. 1500.

TARSUS, or **TARSON**, a city, Asiatic Turkey, parh. and 20 m. W.S.W. Adana, r. bank Cydnus, about 12 m. from its mouth in the Mediterranean; lat. 34° 56' 50" N., lon. 34° 54' 45" E. It contains a castle, and upwards of 5000 good houses, situated among beautiful gardens. The houses are low, spotty of stone, and tarsoo-roofs. Near the city are

some remarkable remains, supposed to be those of a temple dedicated to Jupiter or the moon. Turns is said to have been founded by the Assyrian king Sardanapalus. It was taken by both Cyrus and Alexander and is famous as having been the native city of the apostle Paul. Pop. about 7000.

TARTARAGHAN, par Iran, Aragh; 8666 sq. P. 6714.

TARTARO a river, Italy, Venetia, runs to the Adriatic; flows S. and E. past Villafraia, and joins with the Castagnaro in forming the Biadice canal, total course, 60 m.

TARTARY a name commonly but erroneously applied to all that wide band of country extending through Central Asia from the east of Japan and Okhotsk in the E. to the Caspian on the W. and including Manchouria, Mongolia, with the country of the Kafkas, Seogaria, and E. Turkistan, all comprised within the Chinese Empire, Independent Turkistan (Bokhara, Khiva, the Kirghiz steppes, &c.) and all the E. part of the Russian dominions in Asia. It has been even held (Def. Gen. 18) to include a large portion of European Russia, as far N. as the govs. of Kazan and Perm, and W. to the river Don, thus comprising most part of the govs. Orenburg, Astrakhan, Ekaterinoburg, the Cossack provinces, and the Crimea, which last has been called Little Tartary. A considerable portion of the population in this European division is of the Tartar or true Turkish race, and was formerly under the Turkish scepter; and a tribe of Tartars is also settled in Bulgaria, W. of the Black Sea. But the Manchouks and Mongols are not true Tartars for Turkey, and that name was improperly transferred to them in Europe from their having been confounded with the latter who were conquered by the Mongol Genghis-Khan. In a more restricted and proper sense Tartary is identical with Turkistan (which see).

TARTARY (GULF OF) See TARTAKAI.

TARTAS [anc. Tartaesus] a N. France, dep. Landes, on the Midouze, here crossed by a bridge, 70 m. S. Bordeaux. It has a small manuf., manufactures of linseed-oil vinegar, and leather, and carries on a considerable trade in corn, wine, bread, fruit, cotton wool, various matters, game, and Mayenne items.

TARTLAU or **TARTULAU** a market in Austria, Transylvania, E.N.E. Kronsand, on a small stream. It has spacious streets, houses generally well built, a Protestant church surrounded with a castellated wall, containing cellars in which most of the merchandise of the town is deposited. Pop., chiefly German, 4000.

TARTULZ, a vil. Hungary Thither-Thomas, co. Szathmar 13 m. from Aranyos-Medgyes, with a Greek church. P. 1914.

TARVIN, par Scot. Aberdeen 9 m. by 6 m. P. 2469.

TARVIN a vil. and par England, and 5 m. E.N.E. Chester near the Canal from Chester to Lancaster and the railway from Chester to Ormskirk with an ancient church, three chapels of ease, several Dissenting chapels, a grammar and a superior private school; sandstone-quarries, and an annual cattle-fair, inhabitants chiefly employed in agriculture. Area of par, 10,571 ac. Pop. 3511.

TARVIS (Latin, Trevis) a market to Austria, Carinthia, circle and 10 m. S.W. Villach, near L. bank Gailitz. It has extensive iron-works and manufactures of shovels. Two battles were fought here, one in 1797 and another in 1809. Pop. 180.

TASHBURGH, par Eng. Norfolk; 918 ac. Pop. 475.

TASCH AJAK, a N. Central Asia, khansate, so close to Khiva as to be almost its suburb. It is an old place, and was once of considerable importance, but a large part of it has been buried by shifting sands. It consists of 150 houses.

TASCH-HADJ, a N. Central Asia khansate and 43 m. N.W. Khiva, on a canal led from the Amoo. It lies high has about 200 earthen huts, a citadel of the khans, with a garden; and a fortress in the form of a regular square, surrounded by an earthen wall of great thickness, and entered by two gates. Between the canal and the fortress stand a row of houses forming the bazaar. The articles exposed for sale are cotton and mixed silk goods, grain, fruit, furs, and some articles of hardware. The inhabitants are Uzbek, Turcomans, and Karakalpak.

TASCO, a N. Mexican Confederation, dep. and 65 m. S. by W. Mexico, on the frontier of the Sierra Madre, 5658 ft. above sea-level; though now comparatively insignificant, it became, soon after the Spanish conquest, the centre of a most important mineral region, at first worked only for tin, but

afterwards found to be more productive of silver. Among its buildings is a very handsome parish church.

TASH-JURAN, or **KURAN**, a N. Asiatic Turkey, Anatolia, 1 bank Gök Irmak, lat. 41° 28' N., lon. 34° 37' E.; has baths, khans, manufactures of leather and iron wares; and is said to consist of 1500 houses.

TASHKEND, or **TASHKENT**, a N. Independent Tary, ca. khansate of same name, on the Tashkent, near its mouth, flows with the Sir-Darya or Jaxartes, in a fertile oasis covered with gardens, 90 m. N.W. Kokan. It is surrounded by a lofty wall of dried bricks, about 12 m. in circuit, and is entered by 15 gates. The streets are very narrow, and, however, in consequence of the crowding of the houses, not of the number of gardens and vineyards, whose walls approach so nearly as to leave only lanes between them. The water, led from the river by canals, furnishes a copious supply to numerous fountains, and almost every house has its cistern and its bath. Most of the houses are composed of mud, and have a very mean appearance. The principal buildings are the castle or residence of the khan, surrounded by walls and ditches, several large mosques, a very extensive bazaar, numerous colleges, and a number of old temples surmounted by cupolas. The manufactures of silk and cotton goods are said to employ about a half of the inhabitants. The only other manufacture of any consequence is gunpowder, which is made of tolerably good quality and appears to have been known from a very early period. The manufacture of iron is in a very primitive and imperfect state. The trade, carried on chiefly by caravans, is very extensive, and consists in imports of blue woolen and silk stuffs, indigo, and the precious metals, brought chiefly from Bokhara and Russia. Leather, other-oxide linen, looking-glasses, razors and combs of European manufacture, Urals iron and copper, obtained from the Russian possessions in Europe or Siberia. The chief returns for these imports are cattle, obtained from the Kirghiz, nitre, and large quantities of so-called sedary-seeds. Pop. estimated at 80,000.

The **KHAKATIA** is bounded N and E. by a range of mountains, separating it from the Black Kirghiz and at its foot, lies low so to be covered with perpetual snow, S.E. by the Kokan S.W. Bokhara; and W. the desert of Kara. It consists chiefly of a large and fertile oasis, watered by the Sir Darya, which traverses it in a N. direction and is augmented on its E. bank by numerous streams. The chief feature in the climate is the excessive heat of summer, during which not a drop of rain ever falls. In spring however, and also in autumn, it falls copiously and induces a very luxuriant vegetation. In winter, the cold, though considerable, is not severe. Snow is frequent, but never lies long, and ice on the rivers is quite unknown. The principal crops, sown usually in March and September, are rye and wheat, often grown together, rice, barley, and millet, and the produce is so abundant that twenty-fold is considered only as average. Artificial grasses are cultivated, often in gardens, for the horses and camels which are kept in the town, and form the chief domestic animals, and such is the scarcity of timber, that willows and aspens are regularly grown for fuel, and for this purpose occupy in gardens as much space as fruit-trees. Other plants cultivated to some extent are cotton and the mulberry for feeding silk-worms. Owing to the long summer-drought, all cultivation requires the aid of irrigation, the means of which are supplied by numerous canals, some of them 12 m. long. Instead of receiving water, the people trust to the Kirghiz for their supply. The principal minerals appear to be iron and copper, though it is alleged that gold was worked in ancient times, and may still be found.

The people of Tashkend closely resemble those of Kokan and Bokhara in person, language, manners, and religion. Their early history is involved in obscurity and the unsettled rights of rival dynasties still keep up an incessant political commotion. Towards the end of last century they chief claimed the dignity of Khan, and lived at the same time within the city, in fortified castles. At this time the mirals rose so great that it was not safe to walk the streets unattended. Yous Khodja, one of the chiefs, at last gained the ascendancy, and succeeded, as well in restoring order, that the Sultan, in 1800, found the state in a flourishing condition. Since then various changes have taken place, and it is understood that the Khan of Kokan now rules Tashkend by a deputy.

TASHLEDJE, a N. European Turkey, Bouda, 66 m. A.M. Bouda-fort; the use of a Greek bishop. Pop. 4000.

TASLEY, par Eng Soley; 1881 ac. Pop. 68.
TASMANIA, see Van Diemen's Land.
TASMAN'S HEAD, Van Diemen's Land, most S. point of Bruny island; lat. 42° 35' S., lon. 141° 55' E.
TASMAN'S PENINSULA, Van Diemen's Land, S.E. coast of the island, forming the E. side of Storm Bay.
TASNAD, or **TASNERZANUS**, a ts in Hungary, co. Szabolc, 12 m. from Nagy-Karoly, with several churches, a synagogue, and the ruins of an old castle. Pop. 3070.
TASSIN, a ts., W. Africa, on a circular height washed by a small bay deep and rapid river, 80 m. N. E. Free Town. It is a large place, fenced with mud-walls about 9 ft. high, and pierced at intervals of 2 ft. or 3 ft. with holes for musketry. The houses are large, commodious, and in good repair surrounded by walls, and having yards behind them the only religious edifice is a mosque, which is merely a shed in ruins.
TASSELSUDON the modern cap. of Bostan; lat. 27° 5' N., lon. 99° 40' E., about 380 m. N. N. E. Calcutta, a highly cultivated valley intersected by the Tehentobou. The castle or palace of Tassensudon is situated near the centre of the valley and is a stone building of a quadrangular form. The temple is a very lofty building of a quadrangular form, each from 16 ft. to 30 ft. high. Near Tassensudon many workmen are employed in forging brass goods, and various ornaments displayed about their religious edifices and there is also a considerable manufactory of paper, fabricated from the bark of a tree which grows in great abundance near the city.
TASSWITZ, a vl. Austria, Moravia, circle and 32 m. N. W. Enns with a church, a school, and a large mill P. 1148.
TATA, **TOMIA**, or **DORIS**, a ts. Hungary. See **DORIS**.
TATAY, a seaport in Philippines, cap. prov. Cebu, 100 m. N. E. shore, Isl. Palawan. It is a poor place, defended by a small fort; has a church and a governor's house, and is never free from insubstantial fever. Pop. 3925.
TATENHILL, par Eng Stafford, 9408 ac. Pop. 2528.
TATHAM, par Eng Lancaster; 8501 ac. 1 pop. 654.
TATHWELL, par Eng Lincoln, 4814 ac. Pop. 429.
TATHON, an Isl. France, off N. E. coast dep. Manche, strongly fortified, and forming one of the defenses of the roadstead of La Hague.
TATRA a group of mountains, Europe belonging to the W. Carpathians (see 46).
TATHANG, or **THANNGWANG**, a vl. Austria, Transylvania, dist. and S. E. Kronstadt on a small stream of same name. It has two churches and an ambulatory spring P. 1981.
TATSEEN LOO, a ts. China, prov. Szechuan, on the Chinese military frontier, whence troops and caravans start for Tibet; lat. 30° 8' 24" N. lon. 108° 8' E. It is surrounded by good walls, and otherwise fortified in the Chinese fashion, and has large annual fairs, at which all the imports and exports of Tibet are brought to market. Pop. about 60,000.
TATSHILL, par Eng Surrey; 1815 ac. Pop. 168.
TATTA, a ts. empire and 210 m. S. by E. Morocco, on the borders of the desert. It is a considerable caravan station, and the seat of a great annual fair. Pop. about 10,000.
TATTA, a ts. Branda, at a variable distance W. of the India, near its divergence into the great eastern and western arms of its delta, and 48 m. S. S. W. Hyderabad lat. 24° 44' N., lon. 68° E. It stands on a slight eminence, composed of the remains of former buildings, ruins of which extend around it to a distance of 10 m. on its S., and 3 m. on its N. W. side. Throughout this extent, over an area 80 m. in circuit, all ancient towns have succeeded each other on different sites, as the Indians have altered its character; during the foundation of the river the town is nearly inundated, and after its subsidence, all the vicinity is unhealthy owing to stagnant pools. The external appearance of the town is picturesque, its lofty fat-roofed houses being interspersed with fine trees but the dwellings are unsanitary and internally Tatta is mean and gloomy. All the houses are furnished with windmills on the roof, to procure ventilation in the intensely hot season. The town has some manufactures of cotton goods and kemp—fabrics of cotton and silk, with gold-thread interweaving, but its commercial importance has greatly declined. It is supposed to be the birthplace of Alexander's historians. In 1555 it was pillaged by the Portuguese, and in 1625 destroyed during Akbar's invasion of W. India. A British factory was founded here in 1756.
TATTARAN, one of the Sootoo Is., between Basilan and Malacca Is.; lat. 6° 10' N., lon. 122° 0' E.

TATTENHALL, par Eng Cheshire; 4194 ac. P. 1294.
TATTENHOLM, par Eng Shetland; 690 ac. Pop. 66.
TATTERFORD, par Eng Norfolk; 959 ac. Pop. 68.
TATTERSEET, par Eng Norfolk; 1789 ac. Pop. 188.
TATTERSHALL, a small market tn. and par. England, co. and 17 m. S. E. Lincoln, on the Bain. It has a marketplace in which is an octagonal column formerly surrounded by a cross; a handsome cruciform church a Wesleyan chapel, a national school, and a reading-school. Bawing is carried on here to some extent, and there is a considerable trade in malt. Area of par. 4590 ac. Pop. 967.
TATTINGSTON, par Eng Suffolk; 1637 ac. P. 597.
TATAI one of the Sandwich Islands. See **AROCI**.
TAUBATE, a ts. Brazil, prov. and 100 m. E. N. E. São Paulo. It has a handsome parish and two other churches, a Franciscan monastery, a manufactory, and numerous saw-works and distilleries. The inhabitants of the district are very industrious, and the Indians among them make numerous articles of separate tobacco, cotton, coffee, sugar, millet, and haricots are grown and many cattle are reared. Pop. (dist.), 10,000.
TAUBER a river, Germany, issues from a lake of same name in the Hunsrück, on the confines of Würtemberg and Bavaria, 9 m. S. S. W. Rottenburg, flows N. W. W. then W. S. W., enters Baden, flows N. W. W. past Dinslakenheim, where it becomes navigable, and joins L. bank Main, near Wertheim after a course of about 85 m.
TAUCHA, a ts. Saxony circle and 7 m. E. N. E. Leipzig r. bank Parde with manufactures of cloth, a brewery, and three annual fairs. Pop. 3095.
TAUCZ, a vil. Hungary co. and 25 m. from Arad, at the foot of Mount Ezerova on the side of which are two large churches in ruins. It has several mills, and a trade in cattle, sheep, swine goats and honey. Pop. 1180.
TAUGHBOYNE, par Irel. Down, 15,774 ac. P. 4651.
TAUGON a town, a ts. France, dep. Charente-Inférieure on a height, 16 m. N. N. E. La Rochelle, and near L. bank Sèvre-Nantaise. Pop. 1400.
TAUGAON, or **TANGAON** a ts. Hindoostan, prov. Benares, 115 m. S. S. E. Bombay. It is fortified and has a celebrated temple of Ganesha, with a lofty pointed, pyramidal porch of seven stories, numerous images crowding its interior, and three black jumalas or agates.
TAUIGNAN, a ts. France dep. Drome, is a rich wine district, 16 m. S. E. Montelimart, with a square adorned with a fine fountain silk mills, tanneries, and life-works. P. 1218.
TAUNDA, two small ts. India.—1, Prov. Oude, r. bank Gogra, 35 m. S. E. Fyzabad, lat. 26° 53' N. lon. 82° 33' E.—2, Prov. Malwah, r. bank Anas, about 15 m. W. Jabalpur, lat. 22° 58' N. lon. 74° 25' E.
TAUNTON, a market tn. and mun. and par. par. Eng., co. Somerset, in the centre of a beautiful and fertile vale on the Thorne of Tone have crossed by a stone-bridge of two arches, on the Taunton and Bridgewater canal, and on the Bristol and Exeter branch of the Great Western railway 88 m. S. S. W. Bristol. It is surrounded by orchards, gardens, and rich meadows and consists of spacious and well paved streets, and houses mostly of brick, but generally commodious and handsome. It is lighted with gas and supplied with excellent water. The principal buildings and objects of note are the parish churches of St. James and St. Mary Magdalene, the former an elegant and commodious, the latter a magnificent structure, in the Decorated and late English styles, consisting of a chancel, nave, and four aisles, and a fine quadrangular tower, pinnacled and richly ornamented, and 155 ft. high a district church built of beautiful white flint, and surmounted by a neat tower two independent, two Wesleyan, two Baptist, and Quaker R. Catholic, Unitarian, Brethren and Bible Christian chapels; free grammar national British, infant, and other schools a Wesleyan college, a Taunton Institution, consisting of a library, and the museum of the Somersetshire Archaeological and Natural History Society, a mechanics institute, an old market-house, situated in a spacious open area called the Parade, and consisting of a large brick building, in the lower arches of which the corn-market is held, while the upper part contains a goldsmith and assembly-room, the castle, still in good preservation, and containing excellent accommodation for the militia and other troops; a theatre, hot and cold baths, an hospital, an eye-infirmary, a

house of correction, and several almshouses. The written manuscript, of which this town was long celebrated, has given way to that of silk, which employs a considerable number of hands in making casings, perianths, sermons, and mixed goods. Seron has also its mills, and the site of the breweries is celebrated. The trade comes chiefly in imports of Welsh coal, and exports of agricultural produce. The two weekly markets are well supplied with fish and other provisions; there are also monthly markets, chiefly for live stock; and two annual fairs. Taunton is of great antiquity and appears, from the discovery of urns with Roman coins, to have been a Roman station. About 700 A.D., Iud, king of the West Saxons, built a castle here. Near Taunton another castle was built by William the Conqueror. It figures in English history, and during the civil war, when held by the Parliamentarians, made a celebrated defense against the Royalists. The Duke of Monmouth was proclaimed king here in 1685, and the inhabitants, in consequence, suffered much from the cruelties of the notorious Jeffries during his 'bloody' tenure. Taunton has returned two members to Parliament since 1285. P 14 176

TAUNTON a m. U. States, Massachusetts, in a beautiful district, commanding some picturesque lake scenery at the junction of a river of same name with the Mill, and on the railway from Boston to New Bedford, 55 m. S. Boston. It is well built and contains a great number of handsome old houses, ranged around and in the vicinity of an inclosure called Taunton Green, which is adorned with fine trees, and gives the whole place a peculiar charm. At a short distance from the Green is Mount Pleasant cemetery beautifully laid out, and containing a chaste monument, erected by the ladies of Taunton to the memory of Miss Elizabeth Foul a lady of family who left Taunton in England, and settled here with the bold design of planting a church among the Indians in its wilderness. The public edifices include 10 churches, a court-house, adorned with an Ionic portico, two academies, a town-house, and jail. The manufactures consist of Merimaule ware, which, in regard both to quality and beauty of polish is said to equal any that is imported. Goods made on a very extensive scale various articles in leather, hats, shoe-bonnet, chairs, brooks, books, etc. Iron-works, established here as early as 1652, are still prosperous, and there is also a large number of cotton and paper mills, print works, foundries, etc. The Taunton harbor navigable for small vessels, enables the inhabitants to have soon coasting trade, in addition to that furnished by the above manufactures. Pop. (1850), 10,481

TAUNUS, or Hartz, a mountain range in the W of Germany N. of Frankfurt-on-the-Main, and S. of the Werra-forest, stretching through the S. of Kassel in a W. W. direction, till it becomes linked with the Hunsrück, and separating the valley of the Main from that of the Lahn. Its culminating point, the Feldberg, situated N. W. of Frankfurt has a height of 2180 ft. Its rocks are composed chiefly of aluminous, graywacke, and clay-slate, basalt, long supposed not to be present, has recently been discovered, forming a kind of nucleus in the heart of other rocks. The mountains, particularly towards the E., are rich in minerals including iron, lead, copper, and silver. It is in general well wooded. The name of Taunus is sometimes confined to the N. part of the range, the W. part taking the name of Kinrick, or Hayzick.

TAUR, a v. l. Tyrol, Austria, near Hall. It has a church, a school, and a feudal castle. Pop. 1850

TAURANGA a harbor New Zealand, S. W. side of the Bay of Plenty, in the North Island, or New Ulster, lat. 37° 57' S. lon. 176° 11' E. Its S. headland is formed by the isolated, conical hill, Manganui, about 1500 ft. high, and connected with the mainland by a low isthmus. There are several islands near the entrance, and though there are four fathoms water on the bar, the channel is so narrow, and turns so sharply, that it could not easily be taken by a large vessel.

TAURANO, a vil. Naples, prov. Layore, E. B. E. Nola; with two churches and a convent. Pop. 1590.

TAURASI a m. Naples, prov. Principato-Ultra, N. W. San Angelo di Lombardi, near a bank Colore; with three churches and a Dominican convent.

TAURIDA (German, Taurien) a gov. in the S. of Russia, bounded N. by Khersonskiy N. W. Kherson, from which it is separated by the Dnieper, S. W., A., and S. E. by the Black Sea; and E. by the Sea of Azov; greatest length, N. to S., 270 m., breadth very various, but averaging about 170 m. ;

area, 13,321 sq. m. It is very irregular in shape, and being united to the land only where it narrows with the Black Sea, for about 90 m., may be regarded as one large peninsula, subdivided again into two minor peninsulas, of which that in the S., now called the Crimea, and well known in ancient times as the Chersonesus, is the more notable; the isthmus which connects it with the N. portion being at its narrowest not more than 8 m. The S. peninsula consists almost entirely of an extensive steppe, generally without a tree, and in many parts composed of parched and saline sands, where vegetation is almost extinct; but in other parts composed of fertile loams, capable of raising any kind of crop, and often covered with verdant pastures. This steppe continues across the isthmus into the Crimea, and stretches S. as far as the Salghir, which, though a small stream, is the largest properly within the government, but beyond this river a considerable change takes place, the surface becomes beautifully diversified, and gradually rises, till in the S. it forms a range of lofty hills running parallel with the coast, and known by the name of the Mountains of Elia, chiefly composed of limestone, and culminating in Tschudi-Dagh, 4700 ft. The climate is on the whole temperate, but winter is often severe, and the streams are covered with ice. The warmest spots are to the S. of the Elia, but the lagoons along the coast make them unhealthy, and fevers are very frequent. The E. coast along the Sea of Azov is particularly pestiferous, and by a narrow belt induces a long expanse of stagnant water known by the evocative name of the Putrid Sea. The natural fertility of considerable tracts in the Crimea made it at one time to be regarded as the granary of the Black Sea, and even in the N. peninsula there are many spots capable of yielding abundant crops of all kinds of grain; but owing partly to a severity of frosts, and partly to the indolent habits of the population, the produce is comparatively insignificant. Agriculture is much less in favor than the rearing of cattle, and the people show a decided preference for animal food and dairy produce. Besides corn, considerable quantities of hay, hemp, flax and tobacco are grown, and in some parts cotton has been cultivated. The fruit of all kinds is abundant. Many of the hills in the S. are clothed with fine timber. The principal mineral substances are salt, sulphate, and naphtha. Marbles of good quality is quarried, and fine agates and rock crystals are occasionally found. The extent of sea-coast furnishes ample scope for fisheries. That of the sturgeon is carried on to a considerable extent. Little progress has been made in manufactures and trade. The former are almost confined to leather and candles; the latter includes, in very limited quantities, corn and fruit, indigo, honey, and salt. The population is much mixed, and includes Russians, Germans, Greeks, and Armenians, in considerable numbers, but the great majority are Tatars. Taurida is divided into seven circles—Simferopol (the capital) Perekop, Eupatoria, Theodosia or Kaffa, Aluski, and Orskov. The chief seaport is the naval station of Sevastopol. P 584,000.

TAURIS, a m. Persia. See Tauriz.

TAURISANO, a m. Naples, prov. Otranto, S. E. Gallipoli, with a church and two almshouses. Pop. 1300.

TAURUS, a mountain-chain, Asiatic Turkey, usually considered as commencing in the E. on the Taurus, at the N. end of the Taurus, near the mouth of the Taurus, and extending parallel to the coast of the Mediterranean, for about 400 m., terminating in the N. of the Gulf of Aden. In the E. it takes the name of Jebel-Kurim, in the W. that of Hamdan Oglu Balahar. It sends off several branches, of which the most remarkable are Alma-Dagh, which proceeds S. into Syria, and becomes linked with the chain of Lebanon; and the Anti-Taurus, which proceeds N. E., sending out ramifications which become linked with Ararat, Elbrus, and Caucasus.

TALB, DAWSON, or FORT, a walled m. Bohemia, circle and 17 m. W. by N. Klattau; with a castle, three churches, high school, hospital, and Augustinian monastery; and important manufactures of ribbons. Pop. 6015.

TAUBET, a m. Spain, Aragon, prov. and 27 m. N. W. of Saragossa, a bank Arba, near its confluence with the Ebro. It has a square, a church, two schools, an hospital, church, convent, numerous hermitages, and manufactures of liquorice, saffron, and coarse blankets, and two flour-mills. P. 3661

TAVANNES (German, Zandsteden), a vil. and par. Switzerland, cant. and 22 m. N. W. Bern, at the foot of Pierre Pertuis; a well-built place, with an ancient church. P. 1666.

TAYASTHUUS, a tn. Finland. See **TAWASTHUS**.
TAYDA, a river, Adalia Esmia, gov. Tobolsk. It is formed by the junction of the Sorva, Nevda, and Palin, which have their sources on the E. side of the Ural Mountains; flows S.E., and after a course of about 200 m., joins I. bank Tobol, about 60 m. above Tobolsk.

TAYENNA, a tn. Naples, prov. Salerno, N.W. Lucania. Near it is a sulphurous spring. Pop. 1500.

TAYENNA, a tn. Naples, prov. Calabria-Uliva II. 11 m. N.W. Ottaviano, 1 bank All., with five churches, adorned with fine pictures by Fred., commonly known by the name of the Calabrus, a native of the town. Pop. 2280.

TAYEBE, or **TAYBA**, a vil. and par. Switzerland, cant. and 3 m. E.N.E. Fribourg, with one of the finest parish churches in the canton. Near it are the remains of the old castle of Magesburg, the ancient Montecassin. Pop. 2448.

TAYERSHAM, par. Eng. Norfolk. 2059 ac. Pop. 907.

TAVIANO, a tn. Naples, prov. Ottavio, 7 m. S.E. Gallipoli, not far from the Gulf of Tarento. It has two convents and an hospital. Pop. 1500.

TAVIGNANO, a river, Corsica, rises near the centre of the island, flows N.E., then S.E., and falls into the Mediterranean, after a very circuitous course of about 50 m.

TAVIRA, a tn. and seaport, Portugal, prov. Algarve, at the mouth and on both sides of the Roca, which forms a small harbour and is crossed by a bridge of seven arches. It is well and regularly built, and has several handsome squares adorned with fountains; an elegant governor's palace, and two parish churches, an hospital, orphan asylum, and house of retreat. The coasting trade is considerable, and a great number of the inhabitants are engaged in fishing. Pop. 8640.

TAVISTOCK, a market tn. and par. England, co. Devon, in the picturesque valley of the Tavy which is here crossed by two bridges, and on the Plymouth canal 11 m. Plymouth. It stands partly on the rocky sides and partly at the bottom of the vale, is irregularly built and has an ancient and spacious church, with a tower rising on each side, beneath which a thoroughfare passes. Independent, Wesleyan, Friends, and Unitarian chapels, a free school occupying a new and handsome building, national, British, and infant schools, a literary and scientific institution, a library the remains of a celebrated monastery, a workhouse, manufactures of serge and woollen cloths, a large iron-foundry, a weekly market, chiefly for corn and several large cattle and general fairs. There are copper-mines in the vicinity, and lead, tin, manganese, and iron are abundant in the district. Sir Francis Drake was a native of Tavistock. It sends two members to Parliament. Pop. (n.), 5090. Area of par., 10,700 ac. Pop. 8147.

TAVOLARA [anc. *Harsucca*], an inlet of N.E. coast, isl. Sardinia, near the entrance of the Bay of Terranova; lat. (N. point) 40° 54' 48" N. lon. 9° 46' E. (s.) It is rather less than 3 m. long, by about 1 m. broad, and consists of a mass of compact limestone, which attains the height of nearly 1000 ft.

TAVOUB, or **Umm** [anc. *Calbaj*], a river, Asiatic Turkey, Anatolia, rises in Mount Dababji, flows S.E.W. and falls into the Mediterranean N.E. of the island of Rhodes at the harbour of Kalamoti, after a course of about 80 m.

TAVOY, or **TAVAT**, a tn. Nepal, prov. and isl. Further India, Tenasserim provinces. The river I. bank rises about 35 m. above its mouth, lat. 14° 6' N. lon. 98° 10' E. (s.), occupies a low situation, which, during the rainy season, becomes almost a swamp, and is defended by a fort, and surrounded partly by an outer and wholly by an inner wall, the latter built of burned bricks, and about 2½ m. in circuit. The bazaar is well supplied, and the trade is considerable. Near the town a mass of native loadstone occurs, and at a short distance from it is a hill entirely composed of specular iron-ore.

The river has a very intricate navigation in the depth, which is many places varies from 5 to 6, 10, or 18 fathoms, becoming in others not more than 2 or 2½ fathoms.

The river-course is a diversified and often elevated surface, but consists chiefly of low tracts, on which the great staple product is rice. The soil is generally fertile, and delicious fruits are abundant.—The **MEAN** forms the largest and most N. of the extensive chain which fronts the Tenasserim coast, and is called the **Mergol** or **Tenasserim Archipelago**. It is a ridge and comparatively narrow belt, stretching about 18 m. N.W. to S.E.E., with an average breadth of not more than

2 m. The shoals and islands make the navigation dangerous, but on its N. side there is a good and well-sheltered harbour, which has received the name of Port Owen.

TAVY, a river, England, co. Devon, rises in Dartmoor, flows S.E.W., and enters the Tamar, 2 m. N.E. Dulwich.

TAVY, a river, England, co. Devon, rises near the centre of the county; flows to Barnstaple, then runs W., and joins the Tawridge, at the mouth in the Bristol Channel.

TAWALLY an isl. Indian Archipelago, opposite the S.W. end of mt. Gilolo lat. 0° 50' S. lon. 137° 3' E. (s.) It is about 35 m. long, by 5 m. broad.

TAWASTHUUS, a tn. Russia, Finland, co. or lla of its name, on the E. shore of a lake of same name, 80 m. N.E. Abo. It is almost entirely built of wood, but with considerable regularity; the houses being generally of two stories. It contains a church, stately seated on a height, and an arsenal, and has some general trade, and two annual fairs. Adjoining it is the large settle of Kronoberg, now converted into a prison where, in 1847 there were 700 prisoners. P. (1841), 2171.

TAWEE-TAWEE ISLANDS, See **Sootoo**.

TAWNASH par. Irel. Elgo 3735 ac. Pop. 913.

TAWROW, or **TAWROWKALA**, a tn. Russia, gov. and 12 m. S. Voronez, on a river of same name. It was once fortified by Peter the Great, and provided with extensive docks, with the view of making it an important naval yard, but the extension of the Russian territories, and the acquisition of ports in the Black Sea caused the design to be abandoned and Tawrow has gone to decay. It still contains two churches. Pop. 1000.

TAWSTOCK, par. Eng. Devon 6283 ac. Pop. 1884.

TAWTON (BISHOP), par. Eng. Devon; 4263 ac. Pop. 20,004.

TAWTON (NORTH), a vil. and par. England co. Devon, near the Taw, 12 m. N.W. Crediton; with a church, a chapel of ease, an independent chapel, manufactures of woollen goods and a free-stone-quarry. Area of par., 5814 ac. P. 1906.

TAWTON (SOUTH), par. Eng. Devon; 10,879 ac. P. 1768.

TAXAL, a vil. and par. England, co. Chester on the Peak Forest canal 4 m. W. Chapel-en-le-Frith, with a church a Wesleyan chapel, a bleachery-mill, collieries and quarries of slate and pavement. Area of par. 5088 ac. Pop. 698.

TAY, a large river Scotland, on Perth formed by two head streams, the one issuing from the N.E. end of Loch Tay and the other from Loch Lys, a small lake on the borders of Argyleshire. The two streams unite about 2 m. N.E. Loch Tay, whence the river flows about 18 m. N.E., after which its course is generally S.E. past Dunkeld and Perth, below which it opens out into a broad firth, 1 m. to 2 m. broad having an E.N.E. direction, separating the Perth and Forfar on the N. from on Fife on the S. and terminating below Dundee in the North Sea, between Buttinness and Ferry port-on-Craig total course, 120 m. to 180 m. area of basin, 2250 sq. m. The tide flows up the river to a point about 1 m. above Perth, in spring-tides, and rises at the latter about 10 ft. above the bed of the stream. Vessels of 600 tons ascend to Newburgh, and those drawing 9 ft. to Perth. Its principal tributaries are the Garry and Erchie from the N., and the Brae, Isla, Almond, Bannock, &c. from the W. During the upper part of its course, the Tay flows with a rapid descent through a wild and highly romantic country and subsequently, from Perth downwards, through the richest and finest valley in Scotland.—**LOCH TAY**, co. and 25 m. N.W. Perth, is a picturesque sheet of water, 15 m. long, and about 1 m. broad, receiving at its S.W. end the Lochy and the Dochart, and discharging at its N.E. end at Kinnore by the Tay. It is 100 ft. to 600 ft. deep, well supplied with fish, and on its N.W. shore rises Ben Lawers, 5946 ft.

TAYA, a tn. Spain, Catalonia, prov. and about 7 m. from Barcelona; with a church, manufactures of cotton and linen goods, and a trade in wine and oranges. Pop. 1907.

TAYA—1 A group of high barren islands, six or seven in number China Sea, 12 m. off N.E. coast, isl. Hainan. They extend N.E. by N., and S.W. by S., about 15 m. the most N. being in lat. 19° 58' N., lon. 111° 14' E.—2, A small isl. Indian Archipelago, S. of Lingga; lat. 0° 46' S.; lon. 104° 58' E.

TAYARAS, a tn. Philippines, near E. coast, isl. Luzon, cap. prov. of same name, 62 m. S.E. Manila. It is a large place, with spacious regular, clean, and well-paved streets, and well built houses, many of them of stone, and containing

well-supplied crops; and has a governor's house, a church, a convent, and a considerable line and some other goods. Pop. 21,418. — The province, bounded N. by the Bay of Lourenço or Luena, and provs. Cameroons; E. Cameroons; S. the Mindoro Sea, and W. provs. Laguna and Batangas; is traversed, N. to S., by the central chain of the island, containing several extinct waters; generally well wooded, but is composed for the most part of low and humid plain, often flooded by the rains which fall almost without intermission, and make intermittent rivers very prevalent. Manufactures, particularly of cotton textiles, have made considerable progress and there is a good trade in various kinds of timber, rice, wax, pitch, ovens, and excellent honey. Pop. 83,049.

TAYF or **TAYSA**, a town in Arabia, at the foot of Mount Khazneh, in a fertile and well-cultivated district, 70 m. E. Mecca. It is large, handsome, and defended by several forts. It has a large mosque, held in great veneration by the Mahommedans, who attribute to the town and district a sanctity nearly as great as that of Mecca itself.

TAYGETUS, a peak, Morea. See **ELIAS**.
TAYNTON two towns, Eng.:—1 Gloucester; 2601 ac. Pop. 681.—2, Oxford 1780 ac. Pop. 379.

TAYTAQ, or **TAYTAQONDORU**, a cape, W. coast, Patagonia, lat. 48° 58' S., lon. 78° 5' W. It forms the S.W. point of the land containing the Chinese Archipelago, and is one of the most remarkable promontories on the coast, rising rugged, barren, and steep to the height of nearly 8000 ft.

TAZ, a river Shinarump, rises on the frontiers of gov. Tabolsk and Yenisei flows N.N.E. through a marshy country inhabited by the Ostiaks, and after a course of nearly 800 m., falls into the Bay of Tanais, which communicates with the Gulf of Ob.

TAZEEN a vil. Afghanistan, E. foot of the pass of the Huk-Kotal, 26 m. from Cabool lat. 34° 31' N.; lon. 69° 55' E. It was one of the scenes of the massacre of the British troops, in their attempted retreat from Cabool, in January 1842. Here, subsequently the British actually defeated a greatly superior force of Afghans.

TCHABKAN, or **DIABKAN**, a river Chinese Empire, Kalka river which after a W. course of about 500 m., enters the Lake Mts-Aral Noor near lat. 48° N., lon. 90° E.

TCHABLIAN, or **TCHIANAK**, a ca. European Turkey Albania, peak, and 18 m. N. Gouti, with about 250 houses.

TCHAD **TRAD**, or **CHAD**, a lake, Central Africa, between Bornu on the W., Kano on the N.E. and Baghram on the S.E. Wadai on the E., lies at a considerable distance from the lake. The same T had does not appear to be known on the shores of the lake itself, and the travellers who first brought it into use have omitted to state whence they derived it. There is reason for suspecting that it belongs to some dialect of the Hausa language (Hocquemans learned to apply it to the Quorra) and means, probably a great river or piece of water. The lake was first distinctly pointed out by Leo Africanus (16th century) the name Sen, which he seems to give it, being a misreading of his unpointed Arabic for Shari; the name of the Arab tribe inhabiting the S.E. shores of the lake—the Sherry of Deubana, and Shunk of Dr. Barth.

The geographical position of Lake T had depends on that of Kouka, the capital of Bornu, which has been recently ascertained to be lat. 12° 55' N., lon. 12° 50' E. or about a degree W. of the place here supposed to be it. The N.W. shore of the lake, where it reaches Shari, is not far from its N. limit, but is about lat. 14° 15' N., lon. 12° 50' E. From N. to S. it has probably an extent of 150 m. or 160 m. Its width, from E. to W., was estimated by Major Denham to be 120 m., but Dr. Overweg, relying chiefly on native information, reduces this to 60 m. or 80 m. The last-named traveller embarked on the lake at Modum, a boat-harbour a little to the E. of Kouka. For seven hours he made his way through narrow channels between small islands covered with stately reeds, in which numerous hippopotamuses hid shelter and at last entered the final or open water. Steering N.E. for two days—the best being found at night to a floating island of reeds illuminated by fire-flies—he reached a labyrinth of islands, the largest of which did not exceed 5 m. in length. On one of these islands (Behirau) he spent four days, being treated with the greatest kindness by the natives. He then sailed farther E., still among islands, with now and then a view of the open sea, but he does not appear to have seen

the shore N., E., or S., and was disoriented by the islands from attempting to find on the S. side of the lake, where war in which they were implicated were taking place. Having touched at several islands, he returned to Modum, after six weeks spent with the very interesting and hospitable native population.

The inhabitants of the islands in the middle, and on the N.E. side of the lake, are the Bidjama, an independent and pagan nation, but by no means savage, as Miffere reported. They seem to be of mixed origin, their islands having afforded a refuge, probably in the course of ages, to the persecuted of all surrounding nations. They are well made, and active, with jet-black or dark-brown complexion, and regular features. At the present day there are many Kambou and Shunk (Shari or Arab shopkeepers) living among them. The Bidjama of both sexes are decently clothed in cotton, generally black. They wear sandals also, and a profusion of ornaments. Some of the islands are densely peopled, having a large village to nearly every square mile. Cattle and goats are abundant, corn and cotton are the chief objects of cultivation. In respect of their boats, too, the Bidjama are comparatively well off; they know how to build boats with plank and Dr. Overweg saw one thus constructed which measured 48 ft. in length, and 6 ft. in breadth. The boats are propelled with long poles, the use of oars, as well as of sails, being unknown. The people also habitually swim from island to island, aided by small boards or hand-fins.

This great fresh-water lake is comparatively shallow, its depth being found, by Dr. Overweg, to vary from 8 ft. to 15 ft. These measures probably indicate its mean condition, for at different seasons and periods it undergoes great changes falling at times so low that the channels between the islands are laid dry while at other times it inundates all the lower grounds, and forces the people to retire to the hillsides. It is well stocked with fish and water-fowl which prefer, however, the vicinity of the marshy islands on the W. shore to the open water. Turle of enormous size, and crocodiles also, are said to be there associated with the hippopotamus; these latter and the crooks among them. Lake T had receives besides many small streams, the Yoo, which flows into it from the hills of Hausa in the W., with a course of perhaps 400 m. It descends rapidly, and is dry at its mouth during five months of the year. But its chief tributary is the Shari, a great and navigable river descending from the S. through Baghram. The absolute elevation of Lake T had would appear, from Dr. Vogel's observations, to be 850 ft. The country around it is everywhere low land, on its W. and E. shores at least, extremely fertile, and it is easy to foresee that whenever the arts of civilized society shall find their way into Central Africa, the banks of this great reservoir will become a most luxuriant garden, rendered doubly admirable by the close vicinity of the fabulous desert to the N. and E.—(Denham and Clapperton's *Travels: Account of the Progress of the Expedition to Central Africa*, by Ang. Petermann.)

TCHADDA, **TRAD**, **CHAD**, or **CHADDA**, a great river Central Africa, which, flowing W., joins the Quorra below Nyff, in lat. 7° 47' N., lon. 7° 3' E. With respect to the name, the remarks already made on the name of the lake are here applicable. T had is certainly a general term, and not a proper name, and may be found, in native records, applied to the river of Kano as well as to the Quorra itself. The two great rivers, the Quorra and T had, which unite just below Nyff, are called by all the natives dwelling on them, respectively the White and Black Rivers, or, in Nyff, Feroce and Feroji; in Egghar, Ujimmul Fufa and Ujimmul Doda. The river commonly called the T had is the Black River—the Feroji or Ujimmul Doda. Higher up it is known as the Zandé; that is, the Water, in the language of the Kordofani; and still farther up, in Fobla, entitled by the Fallahs Amdawa, it bears the name of Bama. The Black River was mentioned in 1653, by Oldfield and Lark, about 80 m. and said to be a fine stream, with a more rapid current than the Quorra, but with little population on its banks. Its upper course was unknown to the natives near its mouth, but it has been recently discovered unexpectedly by Dr. Barth. The traveller, proceeding E. from Kouka by Mandana (a route described so far by Denham with exaggerations), arrived, after a march of 270 m., at the Bama (Mother of Waters), the chief river of Adina, 2 m. wide, and nearly 10 ft. deep. It is said

to come from the S.E., a distance of nine days' journey. A little above this point, which is near Yola, the capital of Adamawa, the Bame is joined by the Fara, another great but inferior river, descending from the S.W. from the same heights, probably, which feed S. the waters of Calabar. The river Bame; a great and navigable stream, which overflows fertile plains and fertilizes rice-fields of boundless extent, is the Tied of our maps, and is described by the natives of Adamawa, who seem, however, to be little versed in navigation, as few from danger or impatience. From the mouth of the Tied to Yola is in a straight line, about 490 m. A very slight elevation in the great plains of Adamawa separates the basin of the Bame from that of the Shary, so that a little advance in civilization might lead to the junction of these navigable waters and of Lake Tied with the ocean. The rulers of Adamawa are the warlike and enterprising Fula, whose political ascendancy and susceptibility of improvement entitle them to special attention. —[Lafit and Oldfield's *Narrative*, 1834. Allen and Thompson's *Narrative*, 1848; Barth, in *Journal of Roy. Geog. Soc.*]

TCHADIE-DAQU, or **TERT**, a mountain, Russia, in the S. of the Crimea. See **TAURUS**.

TCHADOBET, a river, Siberia, rises in the E. of gov. Yemsk, not far from the N.W. frontiers of Irkutsk; flows very circuitously, first N.E., then S.W., describing almost a semicircle, and after a course of about 200 m., joins r. bank Verkhne-Tunguska about 50 m. above Drogobuzhsk.

TCHAGAN, or **TCHAGAN-KOUAN** the Chinese Empire, Mongolia, 900 m. N. N. E. Pekin. It is large, handsome, and recently created, has broad, clean, and crowded streets, houses regularly built and several extensive squares adorned with magnificent trees. The shops are clean, and very well furnished with Chinese productions, and sometimes even with European merchandise, obtained through Russia.

TCHALATDERE, or **SALATDERE** (anc. *Gromoula*), a river, Asiatic Turkey, rises on the E. side of Mount Ida, flows N. E., and falls into the Bos of Marmora, after a course of about 45 m.

TCHALBAK, or **TCHERBAK** a river Russia, rises in W. of gov. Caucasus, enters the country of the Cossacks of the Black Sea, flows W., expanding into several lakes, and falls into the E. side of the Sea of Azov, total course, 150 m.

TCHANG, a prefix to the names of cities and towns, China, the most important of which have been given under **CHANG**, (which see).

TCHANG-KIANG, a city China. See **CHING-KIANG-POO**.

TCHAO-KING, a city China. See **CHAO-KING**.

TCHARYTIN, a river, Siberia, rises in the Altai Mountains, in the E. of gov. Turaik; flows first N.W., then N.E., and joins l. bank Ob near Bjuk, after a very rapid and winding course of about 220 m.

TCHAUZI, a river Russia. See **CHAUZI**.

TCHERKESARI, a river Russia, gov. 75 m. W. N. W. Kasa, r. bank Volga, at the confluence of the Tschelcharka. It is built of wooden houses, huddled together very irregularly in unpaved streets. It has 16 churches, four monasteries, a considerable manufacture of leather and a considerable trade in wax, honey, tallow and corn. Pop. (1851) 4382.

TCHERCHIK, or **TCHERCHIK** (anc. *Genoa*) a seaport in Asiatic Turkey on a spacious bay of the Archipelago opposite to the island of Chios, 40 m. W. Smyrna. It is defended by a large citadel, built by the Genoese and is famous for the victory gained off its port by the Roman fleet over that of Antiochus. Near it are thermal-springs.

TCHILABINSK, a river Russia, gov. Orenburg 220 m. N. E. N. E. Ufa, on the Mijia. It is surrounded by a wooden wall flanked with towers, and defended by several castles and a tower, and has two churches, and a trade in corn and cattle. Pop. (1849) 3204.

TCHENG, or **TCHENG-PING**, a river, Chinese Empire, rises in a mountainous district near the capital of Manchuria, flows N. E., then W., receives the Songpin, and shortly after joins r. bank Amur, after a course of about 100 m.

TCHETKA, a river, Russia, rises in E. of gov. Viatka flows S. W., then almost due W., and joins l. bank Viatka about 17 m. E. of the town of Viatka; total course 300 m.

TCHERCHIMBEH, See **CHERCHIMBEH**.

TCHERDIN, a river, Russia, gov. and 164 m. S. from r. bank Kama. It is one of the oldest towns in the govern-

ment, and has six stone churches, one of them richly decorated; a monastery, a nursery, several inns, and a trade in corn and fur. Pop. 3500.

TCHEREMSHIN, a river, Russia, rises in gov. Orenburg; flows N. W. into gov. Kasa, then S. W. into gov. Simbirsk, and joins l. bank Volga, after a course of about 180 m.

TCHERPOVETZ, a river, European Russia. See **CHERPOVETZ**.

TCHERIKOV, a river, Russia. See **CHERIKOV**.

TCHERKASK, two towns, Russia. See **CHERKASK**.

TCHERKESKIA, a country S. E. Europe. See **CHERKESIA**.

TCHERNIGOV, a gov. and in Russia. See **CHERNIGOV**.

TCHERNOYARSK, a walled and fortified town, Russia, gov. and 100 m. N. W. Astrakhan, r. bank Volga. It is entered by a single gate and has two stone churches, a school, two almshouses; extensive warehouses, an important trade on the Volga, as well as a trade in cattle, and a valuable fishery. Pop. 1600.

TCHIGAIN, a river, Russia, gov. and 140 m. S. S. E. Kiev, r. bank Tsimara. It is now an insignificant place, but was once the capital of the Cossacks of the Ukraine. It suffered much in 1878 during the wars with the Turks.

TCHIKIRI, a river Manchuria. See **CHIKIRI**.

TCHIKOTAN, or **SHANGHAI**, the most S. of the Kurile Isles; lat. (central) 43° 58' N. lon. 140° 48' 30" E. about 6 m. long by as much broad. A good harbour is said to exist on its S. W. part.

TCHIN, and **TCHINE**, prefixes to the names of cities and towns, China. See **CHIN** and **CHINE**.

TCHIN-AN, two small rivers China, Chean group, S. E. Chean about lat. 30° 22' N. lon. 112° 56' E.

TCHIN-AN, a river and lake Mongolia. See **BAIKAL**.

TCHING-AN, a remarkable cape, N. L. coast, Siberia, in Behring's Sea; about lat. 64° 40' N. and lon. 178° 40' W. It rises almost vertically from the sea to a great height, and is rendered conspicuous by a red band intersecting it from its summit to its base.

TCHIRKOVATZ, a river Turkey. See **CHIRKOVATZ**.

TCHIE, a river Russia, rises in W. of gov. Don Cossacks, flows S. E., and after a course of 160 m. during which it expands into a number of lakes, joins r. bank Don.

TCHIRKIS or **TCHERKES**, a walled in Asiatic Turkey Anatolia 80 m. E. Dol, near the source of the Berlin, which is here crossed by a bridge. Pop. 8000.

TCHIRMEN, a river Turkey in Europe, on a height near an affluent of the Maritsa, 24 m. N. W. Adrianople. It has a castle, and a mosque crowned by a fine cupola. Pop. 3000.

TCHIRME, a river Asiatic Turkey. See **CHIRME**.

TCHIRTOPOL, or **TCHIRTOPOL**, a river Russia, gov. and 61 m. S. E. Kasa, of very recent origin.

TCHISUOVA, a river Russia, issues from a small lake on W. slope Ural Mountains, enters Eksternburg province first very circuitously N. W., then turning W., joins l. bank Kama, 10 m. above Perm, after a course, partly navigable, of about 400 m.

TCHONG-LOO or **PILO**, a river China, prov. Kansa, 155 m. N. W. Lan-chow, with a considerable trade. **TCHONG-LOO**, a river China, rises in the S. W. of Manchuria, enters Mongolia, flows S. E., and after a course of about 160 m. joins r. bank Nomi by several branches.

TCHORAK, a river, Asiatic Turkey. See **CHORAK**.

TCHORLOU, a river Turkey in Europe, near l. bank river of same name, 65 m. W. N. W. Constantinople. It is surrounded by ruined walls, and has a mosque, a khan and an almshouse. Pop. about 4000. —The river rises in a branch of the Balkans, flows N. W., then nearly due S., and after a course of 45 m. falls into the Bos of Marmora 4 m. S. Rodosto.

TCHORUM, or **CHORUM**, in Asiatic Turkey. See **CHORUM**.

TCHOUKON-V, or **TCHOUKON-V**, a river Russia, gov. and 20 m. S. N. Kharuk, at the entrance of the Tsimara with the Donets. It is surrounded by earthen ramparts and a fosse and has seven churches, all of wood; a school, numerous tanneries, manufactures of prepared sheepskin, which are made into cloaks, middles, and girdles and a considerable general trade. The inhabitants are Cossacks, who have the headquarters of one of their regiments here. Pop. 10,000.

TCHUI, or **CHUI**, a river, Asia, which issues from l. of Tien-Shan, near the W. frontiers of the Chinese Empire; about

lat. 42° 30' N; lon 77° E.; flows directly W N W through the country of the Kirghiz and Independent Tatars, and after a course of nearly 600 m., discharges itself into Lake Kaban-Kiak lat. 40° 30' N.; lon. 67° 30' E. Its chief affluents are, on the right, the Adji-Bukhain; and on the left the Kerkhota, Akmeta-Balak, and the Little Tobol. In spring its current is very impetuous, and in the depth of autumn broad and shallow lakes are formed in its vicinity by the heavy rains.

TOBUKCHI, or **TOBUKCHIK**, a people inhabiting a country of some extent, forming the N.E. extremity of Siberia, and extending from the mouth of the Kolyva R. to Behring's Strait, between lat. 63° and 73° N., and lon. 160° E. to 170° W., area, 314,740 sq. m. They bear a considerable resemblance to the native tribes of the opposite coast of America, subsist chiefly on fish, on the milk and flesh of the reindeer, and on the deer, and are said to be both independent and jealous of their freedom. Most of them live on the banks of the Anadir the basin of which lies almost wholly within their country.

TOBULUM, a river, Asiatic Russia, rises in S.E. of gov. Tomsk, flows directly N. then W N W, and after a course of 500 m. discharges into the Ob above Mordinsk.

TOBURY, par Eng. Lincoln; 2850 ac. Pop. 692.

TOBURY, par Scot. Forth; 7 m. by 2 m. 1 op. 844
TEAN (Urran), a vil. and dist. England, co. Stafford, on the Teas, 3 m. S. of Cheddle, with a number of manor and elegant villas, a handsome church Independent and Wesleyan chapels, a school, blacksmiths, and one of the most extensive manufactures of tape in Europe. Pop. 1800.

TEANA, a tn. Naples prov. Basilicata, 30 m. E.N.E. Lagoagrate, r. bank Sappotino. It is defended by a fort and has two almshouses. Pop. 1200.

TEANO (anc. Tuscum, cap. of the Sidicini) a tn. Naples, prov. Lucera, dist. and 15 m. W N W Caserta, S.E. side of the Bay of Naples, an extinct volcano. It is the residence of the bishop, consists of narrow streets and has a handsome cathedral, with 16 columns of granite supporting its roof, and other remains of ancient structures in its interior two colleges and three parish churches, two monasteries, a seminary a thesaurus of ancient Roman theatre and amphitheatre in ruins, and the massive and very extensive remains of a baronial castle of the Duke of Seana, with stabling for 800 horses. Near it are chalybeate springs, laid in high repute, an ancient church dedicated to a Greek saint, Paridis, who is believed to have been destroyed a dragon; and a cemetery, famous for the miracles alleged to be performed in it by its patron saint, Anthony. Pop. about 8000.

TEAPY ISLAND an isl. S. Pacific. See EASTER.

TEBALEN, a tn. Arabia, Yemen, about 170 m. S.E. Mecca. It is a large place, defended by a castle situated on a steep rock and has a weekly market.

TEBAE, a tn. Spain, New Castile, prov. and 43 m. S. Caenon, with a church, seminary, primary school, and a trade in corn, oil, silken, and honey. Pop. 1422.

TEBESSA (anc. Tervetia) a tn. Algeria, prov. and about 75 m. S.E. Constantine, beautifully situated at the foot of the N. slopes of the Moutains of Ben-Rouman, not far from the source of the Chelouf. It has in front of it a large and well-watered plain, and around it many beautiful gardens is ordered by two gates, one of them in the form of a triumphal arch, and evidently of Roman construction. Its principal buildings consist of Roman remains, including a fortress, which is still nearly entire. In the lower part of the town is a small temple, which is perfect, but has been converted into a soap-work. The inhabitants are chiefly employed in the cultivation of the fields and gardens, but have some trade in books and shoes, tobacco, dates, carpets, leather, hardware, &c. Pop. 15,000 to 16,000.

TECH a river France, which descends from the N. slope of the Pyrenees, dep. Pyrénées-Orientales flows E.N.E., and near Carat falls into the Mediterranean; total course, 45 m.

TECHA, or **TEIANA**, a river, Russia, rises in S. of gov. Nijon-Nagorod, flows N., then W. to the frontiers of Vladimir and joins r. bank Obia above Maren; total course, 110 m.

TECHER, a river, U. States, Louisiana, which rises near Red River, and after a winding S.E. course of 120 m., enters the outlet of Christendom Lake. It has 8 ft. water on the bar and 20 ft. of shoal, and is navigable for 160 m. to Thibodaux.

TECKLENBURG, a tn. Prussia, prov. Westphalia, gov.

and 18 m. N.E.E. Münster, on the Teuchelberg-Wald, with a court of law, a Protestant church, a parsonage, the ruins of an old castle; manufactures of linen, and a trade in coffee. Pop. 1246.

TECOLM, par Irei Queen's co.; 1022 ac. Pop. 344.
TECSE, or **TECSEVA**, a market in Hungary, co. Maros, r. bank Theiss, 14 m. W N W Balgatz; with three churches, distillery, and mill-wheels. Pop. 1351.

TEDAVNET, par Iril-Mongolia; 26,500 sq. m. 37,942

TEDSBURN (St. Marks), par Eng. Devon; 4488 ac. Pop. 661.

TEDDINGTON, a vil. and par. England, co. Middlesex, on the Thames, 11 m. W S.W. London, with a parish church, a national and an endowed female school, and one of the largest manufactories of wax-candles in the Kingdom. Area of par, 1120 ac. Pop. 1146.

TEDLA or **THEDA**, a tn. Morocco, dep. prov. of its name, in a beautiful valley on a branch of the Umerbagh, not far from the foot of Mount Atlas, 135 m. N.E. Marous city. It is a place of considerable importance; with manufactures of woollen cloths and shawls, which furnish a considerable export, chiefly to Italy. Pop. estimated at 10,500.

TEDNEST a tn. Morocco, about 73 m. W N W Marocco city; lat. 31° 45' N. lon. 6° W. on the lawns, an affluent of the Tensift. Pop. about 4000.

TEDEI a tn. Morocco, prov. Sus-el-Aam, about 25 m. E.N.E. Toudant; lat. 30° 15' N., lon. 6° 16' W.; with an immense population, estimated at 12,000.

TEEDSTONE WAPPA, par Eng. Hereford, 668 ac. P. 69
TEEDEN or **TEEDEN** (anc. Oshale), a river, rises N.E. of Meahed, in the Persian prov. Khuzestan, flows through the N.E. corner of that province, and is lost in the sands of the desert, after a course of nearly 350 m.

TEEN or **TEEN**, a tn. China, prov. Petchalee, advantageously situated in an angle formed by the junction of the Er-ho and Pai ho, 30 m. above the mouth of the latter, in the Gulf of Petchalee, and 58 m. S.E. Peking. It stretches several miles along the banks of the river, and consists of unpaved streets, and houses built of mud, many of the latter, though of mean exterior well furnished, with accommodations in the best Chinese style. The shops are generally filled with Chinese, but sometimes also with European manufacturers and the heads of the native population and the upper classes of the native trade, at least on the coast of Canton. More than 500 junks arrive annually from the southern parts of China, Cochin-China, and Siam, and according to Guttsch, the thronging of the river with vessels, and the amount of business going on, strongly remind one of Liverpool.

TEES, a river England, rises near Cross Fell, in Cumberland, and flowing S.E., and latterly N.E., marks the S. limit of the county of Durham, to its mouth in the N. Sea, where it forms an estuary of considerable extent. Its whole course is between 70 m. and 80 m., the last 15 m. or 20 m. of which is extremely tortuous.

TEESTA, a river, Asia, rises in Tibet, on the N. side of the Himalayas, near the mountain Chumalari, lat. 28° 28' N. lon. 62° 0' E. It is formed by the junction of three head-streams, which unite at lat. 27° 30' N. lon. 58° 0' E., when it finds a passage through the Himalayas, and subsequently joins, by two separate branches, the Brahmapootra and the Ganges the confluence, which unites with the latter near Dacca, takes the name of the Atri.

TEFFONT two pars. Eng. Wilt. — 1, (Zylis, or *Rapad*) 242 ac. Pop. 177. — 2, (*Magpie*) Pop. 251.

TEFLER, or **TEFLER**, a tn. Russian Empire, gov. of its name, cap. of the Transcaucasian province, in a narrow valley between r. bank Euphrates, crossed by a wooden bridge and a lofty height crowned by the citadel. When first seen its appearance is very imposing, but the impression thus produced is not confirmed by a nearer inspection. It is nearly of a triangular shape, is surrounded by a wall with six gates, and consists of three distinct parts: — *Teffler proper*, on the S. or 1 bank of the river; *Kala*, or the fortress, further up on the W. or r. bank; and the suburb of *Isht* or *Alchab*, with which communication is maintained by the bridge above-mentioned. The streets, with few exceptions, are narrow, irregular, and dirty in the extreme; and the houses present long ranges of dead walls, formed of huge flat stones and alternate layers of stone, the windows in which, owing to the fear of glass.

are for the most part filled with cottons or cloth paper. The general appearance of the city, and the dark barren hills in the vicinity, throw a kind of gloom over the place, though the streets are well filled with passengers who give indication of much commercial activity. The best part of the town is the Kale, where the Russians who occupy it have made considerable improvements. The most remarkable buildings are those of the citadel, which, though in ruins, still presents majestic heavy battlements and towers; the cathedral, a very ancient edifice, of large dimensions and fine architecture; numerous other Greek and Armenian churches, several of them handsome; a Persian mosque; a gymnasium and other schools; the governor's house, and other government buildings and offices; the palace of Yermakof, a large and extensive structure, with good gardens; the arched Turkish and Persian caravanserais, forming double rows of piazzas, rising one above another, and only indifferently supplied with foreign goods; the bazars with a good display of fruit, and both

TEFZA.—After M. Dehshat de Westphalen.

common and costly wares; and the baths, supplied from hot sulphurous-springs in the vicinity. For recreation there is a large public garden, laid out with fine shady walks and avenues; and there is also a botanic garden on the Kar about 2 m. below. The manufactures include carpets, silks, shawls, &c., and the trade, chiefly in the hands of the Armenians, is very extensive, Tefza forming a greatemporium for the trade between Russia, Persia, and Turkey. The staple articles of trade, in addition to the above manufactures, consist of immense quantities of Russian and German prints, handkerchiefs and similar goods. Wine also, grown in the neighborhood is in great demand in the neighbouring districts, but from being conveyed not in casks but in skins besmeared with naphtha, acquires a disagreeable flavour, not relished except by those who have become inured to it and hence not much esteemed by strangers. The foundation of Tefza, whose true name is said to be Tephelut or Tephuz-kalaki, meaning 'warm town,' is attributed to a powerful monarch of the name of Yousibeg, who, about A. D. 469, subdued all the countries between the Black Sea and the Caspian. It was afterwards much enlarged and embellished, and rose to great importance. It was destroyed by Aga Muhammad in 1793, and though afterwards rebuilt, has never attained its former dimensions. The Russians became its masters in 1801. It suffered dreadfully from cholera in 1830. Population (1848), 30,925.—The GOVERNMENT, one of the four into which Transcaucasia was divided in 1846, is bounded, N. by the Caucasus; N. E. by the Persian Gulf, S. by the Persian Gulf, from which it is separated by the Araxes; S. W. and W. by Asia Minor; and N. W. by the Black Sea, 24,484 sq. geo. sq. m. It consists of several towns, Gori, Tbilisi, Elizabetopol, Erivan, Khankendzhan, and Akhmetopol, besides including the Ossetian territory, and nearly corresponds with the former division of Georgia, or Georgia, and Erivan.

TEFZA, a in Marocco. See TOWNS.

TEGAL, Java. See TAGAL.

TEGAL-SARI, a in Java, prov. Madras, with a school for catechists, where about 3000 youths are educated.

Vol. II.

TEGERHY, a walled tn. Fenns, 140 m. S. E. Moscow, with a citadel.

TEGERENSEE, a vil. Upper Bavaria, on the Aalbech and N. shore of Lake Ammer, at the foot of the Alps, and at the entrance of the valley of Aach into the Tyrol, 21 m. S. Munich. It contains a royal castle, once a Benedictine abbey; a church, and an infirmary, and has a trade in wood, cattle, and fruit; a marble-quarry, with sawing and polishing machines, and several mills. Pop. 580.—LARS TEGENSEE is about 5 m. long rather less than 2 m. broad and 300 ft. deep.

TEGLAR, a market tn. Hungary. Thither Thales, or Hesbotes, 2 m. from Hadrian with a church, and a trade in cane and fruit. Pop. 1463.

TEGLIO TONDO or TEGLIO a vil. and com. Italy, Lombardy, prov. and E. Sondrio, r. bank Adda, with four churches & a blast furnace, and numerous mills. Pop. 5475.

TEGUICOGALPA a tn. Central America Honduras, 40 m. S. W. Comayagua. Gold, silver, and copper mines exist to the vicinity.

TEGUERST, a vil. Cambric, on N. W. of Isl. Teneriffe, with a church, court-house, manufactures of linen, and a trade in maize, fruit, and wine. Pop. 1162.

TEGUITE (SAN MATEO) a tn. Central America Isl. Lanzarote, in a valley, somewhat generally of small old houses, and ill-paved and irregular but clean streets. It has a town-house, a foundling hospital, a prison, a parish church, and several hermitages, but the most remarkable object in the town is a large pond or reservoir called La Marota, in which rain-water is collected during the winter, for the use of the cattle, and sometimes the inhabitants of the whole island. There are no manufactures, and commerce is limited to exporting

fruits, and importing the necessaries of life. In 1816 it was destroyed by pirates from Barbary, who carried off from the island 1000 captives. Pop. 5786.

TEHALLAN par Irak. Monaghan 5560 ac. P. 1906. TEHRAN the modern cap. of Persia, prov. Irak Ajemi, 211 m. N. Isfahan, lat. 35° 40' N.; lon. 51° 22' 50" E. on a low site in an angle of the mountains. It presents outwardly little of the appearance of a royal city. The houses are mass in the extreme, even for an Eastern town; and mighty ruins, covering in some instances extensive areas frequently meet the eye. The streets are narrow and irregular, destitute of pavements, unsheltered with Ebb, and full of dangerous holes. The bazars are extensive, and are roofed with tile, but filthy, being thronged with beasts as well as men. The principal building in the city is the Ark, or royal residence, consisting of a great number of buildings, courts, and gardens covering a large area, and enclosed within a high wall which separates it from the rest of the city. It is, however, destitute of all architectural pretensions, and the interior decorations are of a very indifferent kind. Just without the Ark is the royal boundary where the various operations of molting, castrating, hatching and pollarding are carried on. The British residency is a neat edifice, and the palace of the Russian minister is composed of an extensive range of very plain buildings. Pop. estimated at 10,000 to 12,000.

TEHINTCHIEW a river Asia rises on the frontiers of Tibet and Bootan flows S. across the latter, passing Tharshudon, enters Bengal, when it takes the name of Goudalhar or Goudah, and after a course of about 160 m. joins r. bank Brahmaputra, S. E. of Rangamati. In the upper part of its course it flows in a way through rocky gorges, and is precipitated in tremendous cataracts.

TEHREER, or TAYR, a in Hindostan, on the frontier of Bundelkand 200 m. W. S. W. Allahabad.

TEHUACAN, a tn. Mexico, dep. and 65 m. S. E. Puebla. Under the Aztecs, it was regarded as one of their most sacred spots, it still contains a number of well-built houses, and has a considerable trade in grain. Pop. nearly 3000.

TEHUANTEPEC, a town, river between, and Gulf. Mexico. The town, dep. and 180 m. S.E.E. Oajaca, on the river of its name, and about 10 m. from the Pacific, is cap. of a department of same name. It has manufactures of silk, and of cotton fabrics; fisheries of pearls, and of a mollusk (*Peruvia peruvia*) that yields a purple dye. Pop. 14,000.—The seven rivers in a mountainous district near the centre of dep. Oajaca, flows S.E.E. for about 150 m. to Tehuantepec, where it is joined by several streams, and about 30 m. below the junction, falls into the Pacific near the small part of Yucatan total course, 170 m.—The **TEHUANTEPEC** stretches from the Gulf of Tehuantepec in the Pacific to the Bay of Guasmasillo or Guasmasillo in the Gulf of Mexico, and thus separates the Pacific from the Atlantic Ocean. It embraces parts of dep. Oajaca, Vera-Cruz, and Tabasco. The distance between the two coasts, where narrowest, is about 140 m., but a considerable part of it is traversed by streams, and this together with the comparatively low heights of the cordillera, at one time suggested it as one of the most practicable lines by which a navigable communication might be established between the coasts.—The Gulf is formed by an indentation on the Pacific coast of Mexico and Guatemala, extending from lat. 22° to 23° N. with a breadth near the centre of about 70 to 90 m. **TEICHWOLKRAMENDORF** a vill. Saxo-Weimar circle. Neustadt with a parish church, and two mills. Pop. 1592.

TEIFY or **TIFY** a river N. Wales, rises in co. Cardigan flows S.W. and W., and enters Cardigan Bay, after a course of about 70 m. The tide runs perceptibly to the distance of about 1 m. above the mouth.

TEIGH, par. Eng. Rutland; 1867 ac. Pop. 147.

TEIGN, a river, Eng. Devon. It consists of two branches, which run nearly in the centre of the county and after uniting, flow S.E. and fall into the English Channel at Teignmouth.

TEIGNMOUTH a seaport and market in England, co. Devon, 12 m. S. Exeter lat. 50° 35' N.; lon. 1° 35' W., at the mouth of the Teign. It is divided into two parts by a small rivulet called the Tame. East Teignmouth, which is the more modern, is almost entirely surrounded by a water-surface has a church in the town site, and all the conveniences need to such places of resort—carriage-drives, promenades, public-rooms, bathing-establishments &c. West Teignmouth is the port and principal seat of business. It is irregularly built, but the principal streets are paved and lighted with gas. It has a spacious modern octagonal church, places of worship also for various dissenting bodies, and a safe and commodious harbour though somewhat difficult to enter on account of a shifting bar. There is a quay and a small dockyard. Some of the vessels belonging to this port are engaged in the West-Indian fishery. Coal and other are largely imported and the home fishery employs a considerable number of the inhabitants. Pop. 5012.

TEIGNMOUTH, two par. Eng. Devon.—1 (East), 745 ac. Pop. 1760.—2 (West) 468 ac. Pop. 2389.

TEINGRACE, par. Eng. Devon, 1339 ac. Pop. 187.

TEINITS-OS-NE-ELAS, a market in Bohemia, circle Carlsbad, r. bank Elbe, 17 m. W. Pardubitz with a parish church, school, and townhouse, saw and other mills and a trade in wine, wool, and felt. Pop. 1830.

TEISEWILZ, a market in Hungary co. Güns, on the Rine, 85 m. S.E.E. Munkacs; with a paper and an iron mill, and an asphalted spring. Pop. 1170.

TEITH, a river Scotland, co. Perth, formed by the junction of two head-streams, the one from Loch Lubnag, the other from Loch Vennoch, which in its turn is supplied from Loch Katrine through Loch Achray. They unite a short distance from Callander whence the Teith flows S.E. and falls into the Forth, about 8 m. N.N.W. Stirling.

TEJA, or **TEJAL**, a m. Maricao, 65 m. E. Pto. on a stream of some name, an affluent of the Selva. It has a handsome mosque, and numerous gardens. Pop. 11,500.

TEJEDA, a m. Canaries, Isl. Gran-Canaria, co. deposed to temper that the church has been several times torn up from its foundation. It has a townhouse and prison, primary school, church, hermitage, cemetery, and manufactures of coarse linen and woolen fabrics. One of the mountains by which it is overlooked, is perforated to the depth of about 1 m. in the form of a tunnel, and produces an abundant supply of excellent water. Pop. (agitational), 1865.

TEJEDA, a stream, Spain, Andalus, separating prov. Granada from prov. Málaga. It supplies numerous towns with water, and abounds with salmon.

TEK-MAAR, a river Armenia, which rises on the W. slope of the Mountains of Chikagong; flows first S.W., then nearly due S., parallel and near to the coast, and falls into the Bay of Bungalow, about lat. 30° 50' N. The lower part of its course is subject to inundation.

TEKE, or **TEKEDOR** a market in Austria, Transylvania, co. and 50 m. N.E.E. Klausenburg, r. bank Sajó; with three churches, and a mill-lake, from which much salt is made. Pop. 1611.

TEKE-DER, a river Turkey in Europe, rises in the W. side of the Little Balkan Mountains, flows generally S., and joins r. bank Erkam, 82 m. S.E. Adrianople total course, about 70 m.

TEKIR-DAG, or **TEKIR-DAG**, a mountain range, Turkey in Europe. It stretches across the neck of Gallipoli to a S.E. direction, from 1 bank Marica to the shores of the Sea of Marmara, about 10 m. S.W. Rodosto, and has a length of about 75 m.

TEKRIT, or **TEKRIT**, a in Asiatic Turkey, pers. and 98 m. N.W. Bagdad r. bank Tigris, on a cliff and on the side of a deep ravine. It occupies the E. side of an ancient city of the same name, the ruins of which are very extensive. The inhabitants are represented as extremely inhospitable.

TEKLAU, or **TEKLAU**, a m. Transcaucasian Russia, gov. and 83 m. E.N.E. Tiflis, in a beautiful valley, on a slope above the Terek-shirak, which has received the Alamo. It consists of three forts surrounded by walls, and separated from each other by deep ravines. contains a castle, and has several suburbs, chiefly occupied by Armenians, who carry on a considerable trade. Pop. (1843), 4000.

TELDE, a city, Canaries, Isl. Gran Canaria, E. from Las Palmas, in a beautiful plain called Vega Mayor, about 2 m. from the sea. It is divided into three large quarters, called Telde, Las Palmas, and San Francisco, with beautiful houses, the majority of which have gardens. The churches are built and straight. The one three squares in one of which are the townhouse and prisons, the parish church, an elegant structure, and the almshouse, and a busy fair is held every Sunday in another. It has a second church, several hermitages, four primary schools, an hospital for sick paupers, a cemetery and various fountains. On the sea-shore, to the E. of the town, there is a mineral spring, resorted to from all parts of the island. It has some manufactures of plain linen, and 11 flour-mills but agriculture is the chief occupation. Grain is exported to Las Palmas and the neighbouring islands, and colonial to Cadix, Marbella, and London also a considerable quantity of blue paving-stone, 1 yard square, to Cadix and America. Pop. 15,027.

TELEGD-MESZ, a market in Hungary co. Bihar 44 m. S.E. Debreczin, with a Protestant, a R. Catholic, and a Greek church. Pop. 1575.

TELEK KAI, a m. Hungary co. Csongrad, 17 m. N.W. Nagcsida, with a church. Pop. 2399.

TELEMBI, a river, Ecuador rises in W. slope of the Andes flows N., and joins l. bank Patia, on the confines of New Granada, a little above its mouth in the Pacific, after a course of about 80 m.

TELES, a vill. Tyrol, circle Imst, 1 bank Inn with a parish church, a Franciscan hospital, a court-house, and cotton-mill. Pop. 5000.

TELGART, or **TEUNGARTEN**, a vill. Hungary Higher Thuria, co. Göncir 22 m. N.W. Rosetten, with a Greek church, several saw-mills, and mineral-springs. Fine fountains are found in the vicinity. Pop. 1223.

TELOTTE, a m. Prussia, prov. Westphalia, gov. and 7 m. E.N.E. Münster, 1 bank Rhine with three churches, a chapel, and posthouse; manufactures of woollen and linen cloth and shawls, several mills, and a trade in cattle. P. 2123.

TELGULI, a river, Russia, rises on S. frontier of gov. Pskovsk, enters gov. Khovensk; and flowing S.E., falls into a bay of its own name, 95 m. E.E. Odessa, after a course of about 90 m. Its stream is continuous only in the wet season.

TELEORMAN, a river, Turkey in Europe, Walachia, rises in a mountain-slope, 80 m. N.W. Bucharest; flows circuitously S.E.E., and after a course of 90 m., joins l. bank Vele, about 90 m. above its mouth in the Danube.

TELESCOP, or **TELEP**, a tn. Asiatic Turkey, peak, and 18 m. N. W. W. Mosul, in a large and fertile plain, celebrated for the passage of Xerxes over it with the 10,000 Greeks, and the battle of Arbela fought upon it, and gained by Alex under the Great. Pop. about 4000.

TELKI BARYA, a vil. Hungary, Hither Theres, co. Abaujvar, 14 m. S.E. Kasabai; with chalybeate-baths. Pop. 1160. Rich gold-mines once existed in the vicinity, but the shafts were destroyed by an earthquake. New mines are now in operation. The Toldi Barya Hills, among which the village is situated, merge into the Tokay Hills.

TELLARNOUGHT, par. Irel. Wexford; 1654 ac. P. 823

TELLAHERRY, a seaport in Hindustan, Malabar coast; lat. 11 45' N; lon. 75° 33' E.; long the chief settlement on the coast of Malabar, but now considerably declined. Many rich natives, however still reside here. Tellaherry is the mart for the best sandal-wood brought from above the Ghats, and the cardamoms of Wynad, which are mostly exported from hence, are replaced the best on the coast.

TELLAFORD, or **TALAFORD**, par. Eng. Somerset; 757 ac. Pop. 134.

TELMA, a tn. Siberia, gov. and N. W. Irkutsk, with considerable manufactures of cloth, linen, glass, and paper. The operatives are all convicts. Pop. 3000.

TELCOMBER, par. Eng. Sussex; 1849 ac. Pop. 176.

TELTOW a tn. Prussia, par. Brandenburg gov. Potsdam; 11 m. S. W. Berlin; with a church, and manufactures of linen. Pop. 1963.

TELTOWN, par. Irel. Meath; 4266 ac. Pop. 1138

TELYCH, a tn. America, Maryland, circle and 16 m. S. S. W. Igloo, with several churches, a normal school, theatre, and manufactures of woollen cloth and tobacco. Pop. 8640.

TELU-SARAY, a haven, N. coast, Sumatra, where a considerable trade is carried on.

TEMACIN, or **EL-GURUNA**, a tn. N. Africa, Algerian Sahara, cap. independent dist. of same name in the midst of well-watered gardens planted with date-trees, 13 m. S. S. W. Taggart, lat. 34° 30' N. lon. 6° 50' E. It is surrounded by a loopholed wall, and a ditch filled with water in winter but dry in summer, and has six mosques, several schools, manufactures, chiefly of articles of primary necessity as carpentry smithwork, clothing arms, &c. and a considerable trade, chiefly with Taggart.

TEMASCALTEPEC, a tn. Mexico, dep. and 68 m. S. W. Mexico, in a deep valley. It formerly owed its prosperity to the rich mines of silver worked in its vicinity, but these have been abandoned the inhabitants have found a new source of wealth in the manufacture of cotton-shawls and robes. Pop. 5600.

TEMBLEQUE, a tn. Spain, New Castilla, prov. and 22 m. S. E. Toledo. It is an ancient place, which, from the losses of its site, has repeatedly suffered from inundations. It has a handsome church, an elegant palace, a courthouse and prison, two primary schools, manufactures of chocolate, large snuff-works, several flour-mills, and a trade in corn. It was sacked and burned during the Peninsular war. P. 3986.

TEMBUCOO, tn. Africa. See TEMBOCOO.

TEMBY, a river, S. E. Africa, which falls into Delagoa Bay. It is navigable for small craft for 45 m.

TEME, a river, S. Wales, rises 6 m. S. E. Newton, in Montgomeryshire flows E. between the co. Radnor and Hereford, and joins the Severn, 8 m. S. W. Worcester; total course, 60 m.

TEMERIN, a market in Hungary co. Bacs, in the midst of marshes, 10 m. N. Peterwaradin with a church, and some trade in cattle and fish. Pop. 6593.

TEMES, or **TEMESAR**, a river, Hungary rises in the Mountains of Karaneseben, belonging to the E. Carpathians, on the confines of Walachia and the Banat, and pursues an E. to S. W. course which, from its rise to its mouth, 1 bank Danube, a little below Pincova, forms a segment of an ellipse or parabola. It has no effluents of any importance, except the Blazna and the Bega. The principal towns which it passes are Karcseben, Karcseben, the pass of the Terezi, and Pincova. Its course, about 500 m. is partly navigable.

TEMESVARE (see THYSSA), a tn. Hungary, Banat, cap. co. of the same, in an extensive marshy plain on the Bega canal, 75 m. N. E. Belgrade. It is well fortified by walls and outworks, and is entered by three gates, beyond each of

which there is a suburb. The houses are of solid construction, the streets are spacious, and there are a number of regularly formed and handsome squares. The principal buildings are the cathedral, which is a handsome Gothic structure; the Greek church, also handsome, the R. Catholic parish church, synagogue, palace of the government, a very ornate edifice; two schools, theatre, two convents, Theres college, gymnasium, high school, normal school, arsenal and military hospital. The manufactures consist of woollens, oil, paper, tobacco, and wire. There are also several silk-mills. The transit trade, consisting chiefly of corn, is of great importance and is much facilitated by the Bega canal, which communicates with the Danube. Temesvar is the see of a Greek bishop, the residence of a R. Catholic bishop, and seat of a high court, with jurisdiction over three counties of the Banat. According to D'Anville, Temesvar is the ancient Thyssarus to which the poet Ovid was banished. In 1552 it was taken and sacked by the Turks, in whose possession it remained till 1718, when it was taken from them by Prince Eugene almost entirely rebuilt, and fortified so strongly as to be now one of the principal Austrian fortresses. In 1740 it stood a siege of 107 days by the insurgents, and was relieved by Haynaut but not before nearly every house had been damaged by the bombardment, and fever and cholera had made fearful havoc among the garrison. Pop. (1846) 19,100.—The court area, 1864 ac. sq. m. is for the most part an unbroken flat, extensively covered with lakes and morasses. The principal rivers are the Temes, which traverses it centrally, its affluents the Bega and Berzava the Maros, and the Krass. The soil is fertile and vegetation is very rank. When the ground is sufficiently dry, all kinds of grain, particularly wheat, are raised in abundance, and maize and rice are extensively cultivated. Fruit abounds, particularly apricots, peaches, apples and pears, and plums, of which a favourite spirituous liquor called *slivovitz* or *balva* is made. Other products are tobacco flax, hemp, milk, and wine. The domestic animals, though numerous, are generally of inferior breeds. It is divided into four districts—Temesvar (the capital), Andras, Leppa, and Vereshvina. Pop. 676,400.

TEMISCAMING a lake on the frontier between Lower and Upper Canada, lat. 47° N. lon. 80° W.; 67 m. long N. to S. by 10 m. broad. It discharges itself by a narrow channel into the Ottawa. On its shores are Indians who bear its name.

TEMISCOUATA, a beautiful lake, Lower Canada, 130 m. N. E. Quebec, 22 m. long 1 m. to 2½ m. broad, and sits frequently deep for vessels of considerable burden. It is encompassed by lofty mountains covered with thick wood almost down to its margin, and abounds with fish.

TEMNIKOW, a tn. Russia, gov. and 143 m. N. N. E. Tambor, r. bank Nistoda. It is an ancient place with two wooden and four stone churches, manufactures of sail cloth, and a considerable trade in corn. Pop. (1851) 5922.

TEMPE, a valley Turkey in Europe, in the N. E. of Thessaly between the mountains of Olympus on the N. and Ossa on the S. and watered by the Peneios or Peneus, which a little below falls into the Gulf of Salonica. The beauties of its scenery are much celebrated by ancient writers.

TEMPELBURG, a tn. Prussia, par. Pomerania, gov. and 44 m. S. E. Gd. with a Protestant and a R. Catholic church, manufactures of woollens and linen cloth, 1 factory tile-works, several mills, and a trade in cattle. Pop. 3369.

TEMPESCA, a river, Turkey, rises in the N. slope of Mount Argenteo or Egrina, in the S. E. of Servia flows E. continually N. W. and after a course of about 60 m., joins r. bank Morava, about 6 m. below Prilok.

TEMPIO, a tn. in Sardinia, div. and 38 m. N. N. E. Sassari cap. prov. on an elevated plain near the source of the Liscia. It has a respectable appearance, though the general effect is somewhat gloomy, owing to the red granite of which the houses are built, and their heavy wooden balconies. The principal buildings are the collegiate church, a large but heavy undisciplined building, a fine nursery, nearly if not wholly deserted, a palace, the residence of the Bishop of Agroparia, and a college with a church attached. The manufactures consist of fine linen and serge, and the trade is in fruit, wine, cheese, hams, bacon, and other salt provisions. P. 6837.

TEMPLE, three par. Eng.—1, Cornwall; 848 ac. Pop. 24.—2, Gloucester, in city of Bristol. Pop. 4006.—3, (Combe and Alford), Somerset, 1550 ac. Pop. 426.

Mineral Productions.—Iron is undoubtedly the most common mineral throughout these provinces especially between Ye and Tavoy. The best ore is found in the tertiary hills near Tavoy, not far from the sea-coast, where the ore yields 80 per cent. of the best melted iron; in fact, Haffer mentions the existence of a hill near Tavoy, 40 ft. high, 400 ft. broad, and 1000 ft. long, composed almost entirely of massive chondritic ore, so conveniently situated as to be easily wrought and exported to foreign countries. The ore is not of importance, and is generally diffused as iron in the S. districts. Gold, in limited quantity, is pretty generally diffused, and copper, blende, and antimony are found likewise in small quantities; and manganese-ore on a tributary of the Tenasserim river. Precious stones, chiefly rubies, garnets, and turquoises, are found in the territory E. of the Tenasserim river. Coal has been discovered in several separate basins in the lower part of the Margu province, and some of it is described as burning freely, evolving gas abundantly, and being completely free from sulphur and iron-pyrites.

Vegetable Products.—These provinces vie with any other tropical countries in fertility. Ambert province, in the N. wherever laid under culture for the purpose, is so exceedingly productive in rice, as to seem intended by nature to be the supplemental granary of India. The methods of cultivation and preparation are, however, so exceedingly rude, that very little of the rice produced finds its way into foreign markets. Margu gets its supply of the article from Moulmain. Cotton and sugarcane are well adapted to the soil, and, like mangoes, coffee, and tobacco, might be made profitable crops. Wheat is little raised, cassamum extensively so, for its oil the hotel vms, gambier or gambier trees, and areca-out are articles universally cultivated in the S., where scarcely a garden is to be seen without an abundance of areca-trees, yet the supply of rice is inadequate to the home consumption. Tobacco is smoked by both sexes of all classes of the population. The ulu-palm (*Nipa frutescens*) occurs plentifully in the S., where its leaves furnish the exclusive covering of houses, and its sap is converted into wine and sugar. The frum mangrove, tem, pine-apple, shaddock, and numerous other fruits abound, large quantities of the two first named are sent to Ava, for the royal table. Spices grow freely in the S. especially nutmegs, which almost equal in quality those of Penang and Singapore. Dyestuffs are in great abundance and variety and include the aroto which dyes luxuriantly Gum kino, storax, and gamboge of the finest quality are procurable the tree yielding the first is used extensively for fuel at Moulmain. The damar, palms chestnut, and castor-tree supply oils and varnishes. Other products are sandal-wood, the dragon's blood plant, the sugar-cane, caribbeans, hemp, and pumpkins culinary vegetables. The *Panus latifolius* has been discovered in and near the valley of the Salween, growing to 50 ft. or 60 ft. in height. The trunk districts do not extend farther S. than lat. 16°; but with respect to timber-trees in general, of which there are enumerated nearly 800 varieties, these provinces are, as already stated, an almost uninterrupted forest from the water's edge to the most elevated mountain-ranges.

Animals.—The tiger, leopard, panther and other felines animals abound in the hills, but the value of their skins seems to be quite unknown to the natives. Elephants are supposed to be more numerous than in any other part of the East, except Ceylon. They are most abundant in the S. the price of a full-grown male at Moulmain is estimated at £25. The rhinoceros, both single and double horned, abounds in the marshy districts. It is hunted almost exclusively by the Karens, who sell the horns and claws to the Chinese, for exportation into China. Buffalo are both large and numerous they are used as draught-oxen but the natives neither eat their flesh, nor use the milk or hides and the carcasses, like those of the elephant and rhinoceros, are allowed to remain in the open air to rot and decay. The wild hog is hunted by the natives, who esteem its flesh as a great delicacy, deer, which are plentiful, they leave to be a prey to the tigers. Several kinds of bees, differing from the European species, yield wax and honey.

Population.—The natives here include descendants of Burmese, Peguans, Shans or Siamese, Karens, Boelongs, a few Chakhs from the Coromandel coast, and half-castes between Malays and Portuguese. The Burmese are the most numerous. They devote themselves principally to agriculture,

and are strict Buddhists. The Pegans physically considered, are almost identical with the Burmese; but they speak a different language. Like the Burmese, also, they are Buddhists, receiving their early training in the monasteries, and almost solely occupied in husbandry. Great numbers of them are settled in the neighbourhood of Moulmain, where 30 Pegans may be found to one Burmese. Great numbers of Siamese settlers have been attracted by the security and good government introduced by the British. They are settled principally on the banks of the Tenasserim river, and being a hard industrious race, are partly employed in the cultivation of sugar acquired from the Chinese, but partly also as hunters and tanners of elephants, trappers of wild beasts &c. The Karens originally confined to the vicinity of the Isthmus of Krai, inhabit the country close to the mountains on the Burmese frontier and are seldom or never found close to the W. shore. They are an agricultural people, without any settled home, and seldom remain more than two or three years in the same spot, clearing the forest as they go, growing temporary bamboo-huts, clothed with palm-leaves, and sowing crops profusely in the rich virgin soil. Their religion is a rude heathenism, but the American missionaries are said to have been successful in converting many of them to Christianity. N.E. of Moulmain live a tribe called the Red Karens, described as living by robbery and plunder. Lowest of all in the scale of civilization among the tribes of Tenasserim are the Seelongs, frequenting the islands of the Margu Archipelago, a race of wandering fishermen, who build slight huts of bamboo during the monsoons and pass the rest of the year either in boats, or near the sea-beach under the shade of trees altogether ignorant of tillage, and content to live upon spontaneous products, as turtles, shell fish, wild fruit, and vegetables. They appear to entertain some vague notion of lovable beings, but they have no forms of religious worship, and are apparently ignorant of a future state. The Chinese, who live almost exclusively in the towns on the coast, follow the businesses of merchants, ship-owners and ship-builders, spirit-distillers, carpenters, mechanics, bankers and gardeners. There are a few American missionaries, also a few descendants of Portuguese who have intermarried with the natives, and some wealthy Armenians and Parsees living at the busy port of Moulmain.

Manufactures, Commerce, &c.—Here is little manufacturing industry beyond the weaving of cotton and silk goods, the formation of coarse pottery and iron cooking vessels, introduced by the Chinese from Bangkok, and ship-building pretty extensively carried on at Margu, Tavoy, and Moulmain. The weaving is conducted almost exclusively by women, and more or less in every house throughout the provinces a rude Indian loom is to be found at work. A pretty brisk trade is carried on by the natives with Rangoon Penang the Nicobar Islands, Acheen, Cutchagong and Decca, rice, tobacco, gambier, ivory birds'-nests, and teak wood are exchanged for betel nut raw and manufactured silks, woollen goods, white muslin, cutlery earthenware, Chinese umbrellas, petroleum, ambergris, opium, &c. The merchants of Moulmain and Tavoy are richer than those of the S. and their imports consist of cotton, muslin, goods, cutlery, barren, European and Margu and gardeners, sugar, rice, petroleum &c. Besides sea-borne trade, however, Tenasserim has a great deal of internal petty traffic carried on along its numerous creeks and rivers, which form indeed the principal channels of intercourse throughout the provinces. During the dominion of the Burmese, Margu was considered the capital, and Moulmain only a minor port but when the British took possession of the country, Ambert, at the mouth of the Marabon river, was founded, and this still continues to be the seat of the local government, and the residence of a commissioner from Penang, to which these provinces are subordinate. Moulmain, however, is in point of trade by far the most important place. Tavoy is small, but trades pretty extensively with Moulmain and Margu, which last town has a good and well-sheltered harbour, and is excellently situated for overland trade across the Isthmus to Bangkok. The territory is now divided into the provinces Ambert, Tavoy, and Margu.

History.—These provinces appear to have been visited by the Portuguese early in the 17th century. In 1687 certain English settlers were massacred at Margu, at a time when, in all probability, Tenasserim formed a dependency of Pegu.

The country afterwards became connected with them, from which, after much previous contention, it was wrested by Alexander, the founder of the present Barmess Agency, about the middle of the last century, and, notwithstanding repeated subsequent incursions of the Barmess, this country remained a portion of the Barmess Empire until it passed into the hands of the British by the peace of Tanabur, which terminated the Barmess war, in 1836. British influence has since that time vastly improved the condition of the people, by extinguishing border-wars, establishing security of life and property, providing for the proper administration of justice and the free exercise of religion, introducing improved implements for agriculture and manufactures, and furnishing a proper system of coinage, weights, and measures. It has been used as a penal colony from Hindustan; and 3000 Thugs transported to it have become, it is said, respectable settlers. The military force consists of two Anglo-Indian regiments. Pop. 115,481.—[*Trigon. Survey of India*, Haller's two Reports, *Jour. Asiatic Soc. Bengal*, 1838-40, Capt. Low's *History of Transganga*, *Jour. Asiat. Soc.*, vols. II.-v., *Jour. Ind. Archæol.*, vol. III., &c.; *Asiatic Journal of Bengal*.]

TENBURY, a market to and par England, co. and 17 m W by R. Worcester, 7 bank Teme. It has rather a mean appearance on the river, but good good houses, and has an Established church and a Dissenting chapel. Trade chiefly in hops, oil, and petty commerce and tanning and mineral-springs of considerable repute. Area of par., 5680 ac. Pop. 1758.

TENBY, a seaport to and par Wales, co Pembrokeshire, W side, Carmarthen Bay on the point and N E margin of a rocky peninsula generally well built of limestone. It has a new spacious old church, places of worship for Wesleyans, Independents, and Baptists assembly-rooms, a national and infant schools, several private assembly-houses, and some minor shops useful to the commerce of the place, and a considerable shipping trade with Bristol in fish of various kinds, and oysters, and a pretty extensive general house trade, chiefly with London. It is, besides, a bathing-place of great and increasing resort, celebrated for its fine sands, beautiful scenery, and agreeable climate. Pop. (in) 1892. Area of par., 2345 ac. Pop. 5208.—[*Local Correspondent*.]

TENCE, a in France, dep. Haute-Loire, r bank Lignon 7 m E. Yauguennet with manufactures of blue-lace and paper and a trade in deals. Pop. 1277.

TENDA, a in France, dep. Alpes Maritimes, 34 m N E Nice. It is a very dull walled place, with a court of justice, a parish church, several schools, and an hospital. P 2441.

TENDA-MAR, a dist., W Africa, Senegambia, isolated within a band of the Rio-Grande intersected by the parallel of 11° 50' N., and by the meridian of 15° W. It is of small extent, generally level and sandy extremely fertile in Indian corn, millet, and rice, and producing abundantly fine timber-trees, and the oil-palm. Iron of fine quality and salt, are obtained in some localities. Cattle, deer, and wild oxen abound, but there are very few herds of prey.—[*Mémoires*.]

TENDE (Coc-de), a pass in the Maritime Alps, a little W of the point where they become linked with the Apennines, on the borders of the Raurhian divs. Near and Col. height, 6100 ft. above sea-level. It is traversed by an ancient bent carriage-road, constructed by Victor Amadeo III. The summit is insulated by higher mountains on all sides except the E., in which direction the Mediterranean may be seen.

TENDRA, or TENDRA, an Isl. Russia, in the N of the Black Sea, and off the N.W coast of Taurida. lat. (N. end) 46° 51' 45" N. lon. 31° 22' E. (N. E.) It forms a very narrow belt of land, stretching N W to S.E. for above 80 m. A highness, 93 ft. above the sea, has been erected upon it.

TENDRE (Aarv.), a mountain, Switzerland, cant. Vaud, S.E. side of Lake Joux, from which it rises with much ascendancy, and presents a very imposing mass, 15 m. N W Louanens height, about 5730 ft.

TENDING, par Eng. Essex, 2267 ac. Pop. 653.

TENZEDOR, an Isl. Adèle Turkey, W coast, Anatolia, 15 m. N.W the Dardanelles; lat. 39° 50' 14" N.; lon. 26° 5' 45" E. about 6 m. long E. to W., and 5 m. broad. The channel which separates it from the main is 3 m. broad and 10 to 15 fathoms deep. Tenzedor is rocky bare, and desert towards the sea, but fertile inland, and has always been remarkable for the smallness of its farms, which are said to require labour and strength for 14 or 16 years. Corn, cotton, and fruits are

also produced. On the E. side of the island, near the sea, is the town of Tenzedor, consisting of about 500 miserable huts, defended by a white fortress mounting 41 pieces of cannon. A new fort has also been erected to the N.W. The port has a sort of pier, but is much exposed to all winds except the W. Several small islands are scattered about the island, and some dangerous shoals, which lie off its W and N.W points.

TENERIFE, the largest of the seven principal islands of the Canary group, not far from its centre, between Grand Canary on the E., and Gomera on the W. 30 m. N.W Cape Bojador on the African coast; lat. 28° to 35° 30' N.; lon. 16° 5' to 16° 55' W. It is of an irregularly triangular form, 80 m. long N.E. to S.W., and varying in breadth from 25 m. in the S.W., where widest, to 20 m. near the centre, and about 6 m. in the N.E.; area, about 1000 sq. m. It is wholly of volcanic formation, and is composed principally of enormous masses and cones of trachyte, lava, and basalt, which in their culminating point, the Peak of Teide, attain the height of 12,132 ft. above sea-level. The coast, which is very irregular, presents an almost uninterrupted succession of lofty cliffs, pierced by narrow precipitous fissures or ravines, with very few openings in which a vessel can find shelter. The Bay of Orotava, on the N.W., one of the best and most frequented anchorages of the island, was sheltered and almost filled up by torrents of lava from an eruption in 1706 and the only good harbour now existing is that of Santa-Cruz, on the N.E. where two rocky arms, projecting round N.E. and S.E., inclose a beautiful semicircular bay. The most remarkable feature of the interior is on the broadest part of the island towards the N.W., where the enormous Peak of Teide is seen piercing the clouds, and surrounded by a girdle, which gives it the appearance of a fortified town encircled by its base and bastion. The peak or cone, properly so called, is not more than 833 ft. high, but in consequence of the loose particles of pumice which cover its surface, is ascended with very great difficulty. The view from the summit is one of the most magnificent in the world. It extends over the whole of the Canary archipelago, while, from the transparency of the atmosphere, even remote objects are perceptible at the greatest distance. The crater which has its most elevated point on the N.E. and its lowest on the S.W., is about half a league in extent, and slopes, by an easy descent, to a depth of not more than an average of 100 ft. Though it seems to have been the original vent of the whole volcanic archipelago, it appears to have been for ages only a subsidiary, all the eruptions of the last 2000 or 4000 years having been made by openings through its sides. Below this crater, and immediately W of it, is another of much larger dimensions, forming the summit of Mount Chahorra, which, though isolated from the Peak of Teide, is connected with it for a great part of its height and still further on the W., at the foot of Chahorra, are other four cones, from which the last eruption took place in 1706. The only other eruption since the occupation of the island by the Spaniards in 1496, was that of 1708. At all times, however, the internal activity of the volcano is evidenced by frequent tremors of the region. Tenerife, taken as a whole, bears a considerable resemblance to Mount Etna. Towns and villages, with their fields, gardens, and vineyards, stretch along its base, and for some miles up its sides, next succeeds a woody region, composed of trees, chiefly olivaceous and oaks, with undergrowth of arbutus-leaved bushes at a lower and ferns at a higher elevation; beyond, and still higher, is a wide barren plain, covered with pumice-stones and blocks of lava, and inhabited only by a few rabbits and wild-goats. The portion of the surface available for cultivation has been estimated at about one-seventh of the whole. Very little of the occurs on the W. coast, which, with the exception of a belt and a few narrow valleys, is almost sterile. On the E., where the surface in many parts is more hilly than mountains, both the valleys and adjacent hills are generally cultivated and the finest fruits of the island are produced. In point of fertility, however, and general adaptation to the purposes of agriculture, no district surpasses that of Laguna, situated towards the N.E., where a plain, nearly flat, and bounded by hills, occupies a space of about 12 sq. m., on which heavy crops of grain are regularly raised. The principal productions of Tenerife are maize, wheat, potatoes, pulse, timothy, oranges, apples, grapes, honey, wax, silk, cochineal, and wine. The last, which forms the staple, furnishes an annual export of

25,000 to 30,000 pipes, which formerly found its principal market in the Spanish colonies of S. America, but is now sent chiefly to Great Britain and the U. States. The manufactures are very insignificant, but include, in addition to some coarse lines, woollens, and silk goods, some excellent specimens of furniture and cabinet-work. The Guanches, the original inhabitants of the island, almost all perished in vain endeavor to defend their freedom against the attacks of the Spaniards. The present inhabitants, consisting of a mixed race, in which Spanish features predominate, are estimated at about 85,000. Santa-Cruz is the capital.

TENERIFE (Isla, Cana. ind.), in Tenerife *San Cristóbal* (Isla). **TENES** (anc. Carthage), a small seaport in Algiers, prov. and 102 m. S. W. S. W. Algeria, at the head of a bay, a bank stream of same name, which forms a small harbour with an insecure anchorage. It has a mean and dirty appearance; but has some trade, having become the port of Oranville a new city, with which it communicates by a fine road constructed by the French soldiers. Before the time of Barbarossa, it was the capital of one of the petty kingdoms of the country, and formerly carried on a considerable trade in wax.

TENGISTOUN a m. in Persia, prov. Fars about 2 m. from the Persian Gulf, about 80 miles from Shiraz to Yermak. It is indicated by a deep ditch, and by walls backed with towers. Pop. about 3500.

TENGRI Nor., the largest lake of Tibet, lying mostly between lat. 31° and 31° 30' N., and lon. 90° and 91° E., and reported to be nine days' journey N. W. Lake (Hsiao Jen Zhi-shi, iv 238). It is upwards of 70 m. in length W. to E., by 55 m. in breadth, bordered N. by snowy mountains, elsewhere encompassed in summer by fine pasture-lands, which are resorted to by nomadic Mongols with their herds and flocks. On its W. side it receives the considerable river Tarkis-dang-bu, and on other sides several minor streams, but it appears to give origin to no river; its surplus waters being disposed of wholly by evaporation.

TENIAN, one of the Ladrone isles. N. Pacific; lat. 15° 2' N., lon. 145° 47' E. It abounds with limes and lemons, and has some cattle.

TENINBERG ISLANDS, a group of isles, Indian Archipelago, of which the chief is Timor; the others are Moole Mera, the Lemba Isles, Rotang, Pungu, Mail, Tom, Mahang, Labobar, Fresh-water Island, the Wasu Isles, the Serra Isles, Yordis, Lela, and Tergis Island. They extend from lat. 6° 40' to 8° 25' S., lon. 137° 40' to 137° E., and are mostly coral islands, surrounded by coral-reefs. On the larger islands are hills and low mountains, and some have plains covered with a vigorous vegetation, including palms and other useful trees. They are sometimes visited by whalers. The natives are distinguished from those of the surrounding islands by their language, and also by their form: they are tall well made, and have regular features. The men of the lower classes go entirely naked, and the women have only a small piece of cloth round the loins.

TENKÉ or **TENKÉ**, a vil. Hungary, Thibier Theiss, on Bihar, on the Black River, 18 m. S. of Grosswardein, with two churches, and a trade in wood and cattle. Pop. 1345.

TENNESSEE, a river, U. States, formed by the union of the Clinch and the Holston near Knoxville, in the E. part of the state of Tennessee, flows S. W., takes a semi-circular sweep through the N. part of Alabama, then flows N. through the W. part of Tennessee and Kentucky, and enters the Ohio, of which it is the largest tributary about 10 m. below the confluence of the Cumberland. Length, about 1500 m.; total fall, about 2000 ft. It is navigable 240 m. for steamers to Florence, at the foot of the Muscle-shoal Rapids, which are divided by a canal 56 m. long; and above these rapids there is unobstructed navigation for boats for 250 m.

TENNESSEES, one of the U. States N. America, lat. 36° to 37° 45' N.; lon. 81° 30' to 90° 10' W., bounded W. by Kentucky and Virginia, E. by N. Carolina, S. Georgia, Alabama, and Mississippi, and W. Arkansas and Missouri. extreme length, E. to W., 440 m.; extreme breadth, 116 m., area, 45,000 sq. m. A range called the Cumberland Mountains, crossing the state N. to S. W., divides it into E. and W. Tennessee. The former is intersected by ridges of hills, separated by intervening elevated valleys, which are very fertile; the latter, sloping from the central range N. to the Mississippi, is more level. The principal rivers

are the Mississippi, which waters the whole of the W. frontier; the Cumberland, which forms a long curve in the S. of the state, though it has both its source and its termination in Kentucky; and the Tennessee (which see). The climate is both temperate and healthy. Winter is rather long and severe; snow, seldom a foot in depth, disappears in eight or 10 days, and cattle remain in the open field throughout the year. The staple products are cotton and tobacco, and the culture of hemp and fax, which has long been extensive, continues to increase. Indian corn, oats, and wheat are the principal grain-crops. The rearing and fattening of stock are carried on under peculiar advantages, and immense numbers of hogs grow up almost without requiring care, on the mast of the forests. The forests, moreover, yield much valuable timber, turpentine, &c. The minerals include a little lead, and abundance of coal, iron, sulphate, salt, freestone, and limestone. In the strata of the last, numerous caverns are often met with resembling those for which Kentucky is so celebrated and containing fossil remains and impressions of the mastodon, and many other animals now extinct. The manufactures consist chiefly of coarse woollen and cotton goods, leather, cordage, and earthenware. Direct foreign trade has scarcely any existence, but large quantities of live stock, grain, beef, pork, &c., are annually sent to the S. states, and the grower staples are either sent down the river to the Ohio, or transported by the railroads which terminate at Chattanooga and Savannah. The principal religious sects are Methodists, Baptists, and Presbyterians. For the higher branches of education a number of colleges has been established, and for common educational purposes the funds are said to be complete, though as yet the schools in actual operation are comparatively few. By the constitution adopted in 1796, but thoroughly revised in 1854, the legislature is composed of a senate and a representative assembly elected biennially by the suffrage of all the male whites 21 years of age. Nashville is the capital. Tennessee long formed part of N. Carolina, but was formally severed from it in 1790, erected into an independent territory and in 1796 admitted into the Union. Pop. (1850), 1,004,655, of whom 239,461 are slaves.

TENNINIS, a seaport in Algeria. *See* TENNA.

TENNISTADT a m. Prussia, prov. Saxony gov. and 17 m. N. W. Erfurt, with three churches and an hospital, a sulphur-spring with bath-houses, manufactures of sulphate and paper, an oil and several other mills, and a trade in cattle. Pop. 2284.

TEARU, a river, Japan, Isl. Nippon, which it traverses N. to S., and falls into the Pacific a little W. of the Bay of Tokio. total course, about 100 m.

TENSAS, or **TENAW**, a river, U. States, issues from a lake in the S. E. of Arkansas, enters Louisiana, flows S. S. W. not far from and nearly parallel to the Mississippi, and after a course of nearly 120 m., joins it back Washita.

TENSIFT, a river, Morocco, descends from N. W. slope of the Atlas range flows W. W. and falls into the Atlantic, 45 m. N. N. E. Mogador. total course, 240 m.

TENTERDEN, a market in and mun. bor. England, co. Kent, well situated on a height surrounded by hop-plantations, 22 m. S. W. Canterbury. It consists chiefly of one main street, well paved and lighted with gas, and has a spacious and handsome church, with a lofty tower, to which a beacon was once attached, Walsayan Brynnet, Baptist, and Unitarian chapels, national, British, commercial, and other schools, an infirmary, an important corn-market, and an annual fair. Tenterden is a member of the Cinque-port of Rye, and the old popular saying that Tenterden alone was the cause of the Godwin made has been explained by alleging that the funds destined for the maintenance of Sandwich haven were expended in erecting Tenterden church. Pop. of bor., 1891.

TENTUGAL, a m. and par. Portugal, prov. Douro, 14 m. N. W. Coimbra, near a bank Mondego, with an almshouse. Pop. 1200.

TEOGH, a considerable river, S. Africa, an affluent from the N. of Lake Ngami.

TEOLO or **TEORA**, a m. in Italy, gov. Venice, prov. and 10 m. S. W. Padua, near the Basiliciana, with a parish church and an oratory. Pop. 1700.

TEORA, a m. Naples, prov. Principato Ultra, 7 m. S. S. E. San Angelo-de-Lombardi, containing a palace of considerable construction, with an ancient round-tower. Pop. 3800.

TROTINHUACAN, a *phalanx*, Mexico, about 15 m. N. W. of Toluca, surrounded on all sides except the E. by steep and mountainous, and unbroken for two miles, a conical pyramid which stands near its centre. The one, called *Totatitlan-Totatitlan* or House of the Sun, measures 625 ft. at its base, and terminates in a level platform 121 ft. high. The other, called *Motitlan* or House of the Moon is of less dimensions. Both are composed of stone pottery and cement, covered with remains of children and terra-cotta images, and are in a very dilapidated state, tangled alone and occupies having struck their roots deeply into their joints and crevices, and spread over them in all directions.

TEPELEHI (see *Asiatica*), a ruined city of European Turkey, Albania, on the Vojvina, 65 m. N. W. Janina. For many years the residence of the famous Ali Pasha. It was formerly strongly fortified, and is still surrounded by a high wall, though there are few buildings within its inclosure. Outside the walls is a short street of miserable huts, and beyond are a house, a barrack, and a boy's home. The palace of Ali, in which Lord Byron was entertained is now a mass of ruins. (See *Journal in Albania and Thracia*.)

TEPUIC, a *tu* Mexico, dep. and 110 m. W. N. W. Guadalajara, on the slope of a steep hill. It is a large place, built with considerable regularity, and rendered positively attractive by terraced gardens and pleasant promenades. Being much more healthy than the port of San Blas, about 50 m. to the W. almost all the merchants connected with the port reside in it. The vegetable-market of San Blas is chiefly supplied from its gardens.

TEPLITAN a *tu* Mexico, dep. Tabasco, 1 bank river of its name, 60 m. N. W. Ciudad Real. It stretches along the river for nearly 1 m., and is irregularly built of cane or bamboo, mud, and adobe. A considerable quantity of sugar-cane and maize is grown and rum is largely distilled in the district. The river an affluent of the Tabasco, opposite the town is about 100 yards wide, is deep enough for any vessel that can cross Tabasco but only small craft ascend so far. Pop. about 1200.

TEPLI, or **TEPLA** a *tu* Bohemia, circle and 27 m. N. W. Pilsen, on a small stream of same name. It contains a deanery church, school hospital and a very extensive Premonstratensian monastery richly endowed, and possessing a good library picture-gallery philosophical cabinet, and museum. Pop. 1754.

TEPLICZ, two places, Hungary. — 1. A market in Upper Transylvania, on Elze, 94 m. W. N. W. Lendava with a R. Catholic church a brandy-distillery and a trade in wood. Pop. 1060. — 2. (Kup or Tepfenau) A *rd.* Hübner Dunsch, co. Leptau, 20 m. from Viedina with a church. Pop. 1221.

TEPLITZ, or **TEPLITZ**, a *tu* Bohemia, circle Leitmeritz, pleasantly situated in a valley between the Erzgebirge and Mittelgebirge, 80 m. R. R. F. Dresden. It was once surrounded

by a wall, of which only a small part now exists; and contains a *stade*, with fine park and gardens, a deanery church, and several hospitals. But even all its celebrity is its thermal baths, which are the most renowned in Germany. The springs, 17 in number rise out of a *slender* porphyry, of which the *Teplitz* is chiefly composed, are of an alkali-sulphate nature, have a temperature varying from 60° to 100° and are very efficacious in cases of gout and rheumatism. The bathing establishment is very complete, and during the season, which commences in the month of June and July, the whole town is filled with visitors, including many of the aristocracy and members of the royal families of Prussia, Russia, and Austria. Pop. 3742.

TEQUEENDAMA, a *ruined*, New Granada, prov. and a little W. of Santa Fé. The river Bogotá, flowing through the valley of same name, becomes suddenly contracted from 140 ft. to 40 ft., and is precipitated over a precipice of 650 ft. into a rocky chasm, from which it descends to the banks of the Magdalena. The spectacle is described by Humboldt as one of the grandest in nature.

TER, a shallow river, Spain, Catalonia, prov. Gerona, rises in the Pyrenees near Lake Caracum; flows S. for about 35 m., then S. till it discharges into the Mediterranean, 68 m. N. E. Barcelona. Total course, about 100 m.

TER-PRIO, a *tu* Holland. See *Boas*.

TER-PRIO, a *tu* Holland. See *Gouras*.

TERA WANA, or *Tana Wana*, a lake, New Zealand, lat. Under about 6 m. S. E. Lake Rotorua 20 m. S. Bay of Plenty. It is only about 8 m. long but is fertilized as the gem of the lake-country of New Zealand, having its S. shore terminated by a lofty mountain in the form of a frustum of a cone, and its other rocky shores richly covered with vegetation. It is connected by a narrow and rapid stream with two smaller lakes the waters of which have a temperature of 65°.

TERAMO (see *Intermarina Præstabilis*), a *tu* Naples, cap. prov. Abruzzo-Ultra 1 in an angle formed by the confluence of the Tordino and Vomano. 50 m. N. E. Ancona. It was once surrounded by walls, which have almost entirely disappeared; consists of some spacious streets, with many houses occupied by wealthy families, and a greater number of narrow dirty streets, of a very dull and dilapidated appearance. It is the see of a bishop, and has several important courts and offices connected with the administration of the province; a cathedral of very early date, and originally a remarkable Gothic structure, but now sadly defaced by having been modernized; several convents, a royal college, a diocesan seminary, an ordinary and a founding hospital, and an orphan asylum. The manufactures consist of hats, paper-water, and cream of tartar, and there are some trade in corn, wine, oil, and coal of which some pits have recently been opened in the valley of the Tordino. The ancient city stood in the vicinity and its site is indicated by the remains of temples, baths, aqueducts, and an amphitheatre. In the plain below Teramo is the ruined castle of San Flaviano, where a very bloody battle without any decided result, was fought in 1460, between the army of the Duke of Anjou and the Milanese allies of Ferdinand of Aragon. P. (1850), 15,600.

TERANEH, a *tu* Lower Egypt, 1 bank Rosetta branch of the Nile, about 80 m. N. W. Cairo. It occupies the site of an ancient town, of which extensive remains still exist, and gives signs of considerable prosperity, owing to the general employment of the inhabitants in transporting cotton from lakes about 12 hours journey to the W.

TERCEIRA, an *Isl.* Atlantic, one of the Azores, and near the centre of the group; lat. 26° 50' N.; lon. 27° 10' W.; about 70 m. N. W. St. Michael greatest length, 20 m., average breadth, 13 m.; circ. 60 m. The coast almost everywhere presents bold and inaccessible cliffs. The interior rises by gentle slopes towards the centre, where it becomes mountainous, and then descends abruptly towards the N. W. The whole surface bears the impress of volcanic agency; and many enormous masses, composing heights and precipices, look as if they had recently been under the influence of fire. Many of these masses are composed of soft gneiss and tuff, which seem ready to crumble away or descend in large blocks at the first heavy rain; and in fact many large landslides have occurred burying villages and cities in their fall. The soil, composed of decomposed lava and other volcanic matters, possesses the greatest natural fertility, so that though ed

DER KUNSTGEWERBEMUSEUM (GARTEN SQUARE) VIERTEL—From Leipzig, Saxony via

by a wall, of which only a small part now exists; and contains a *stade*, with fine park and gardens, a deanery church, and several hospitals. But even all its celebrity is its thermal baths, which are the most renowned in Germany. The

livestock is managed in the most stately and wasteful manner, heavy crops of yams, grain, and peats of all sorts are raised. Fruit also of various kinds is very abundant, and oranges and lemons are now raised to such an extent as to furnish nearly a fifth of the whole of these fruits exported from the America. Some attention is paid to the rearing of cattle, of which rather a superior breed exists on the island. The sheep are wretched-looking animals, of little value in respect of carcass, but with fleeces of tolerable wool. Pimento is the only mineral which seems capable of being turned to any account. There are no manufactures worthy of the name. Idleness seems to prevail to a great extent among the islanders, and domestic virtue is in little repute. One great cause of this was the number of monasteries and nunneries, the ruins of which were notorious for the shameless violation of their vows. The capital of the island is Angra, which gives its name to a department including the three islands of Tarcoira, St. George, and Graciosa. Pop. 40,000.

TERCERO, a considerable river La Plata Confederation, flows Cordova and Santa Fe, formed by several streams having their sources in the mountains of Cordova, and uniting near Santa Cruz del Sur, lat. 32° S. lon. 64° W. From this point the river flows S.E. and S. to Ensenada, where it suddenly turns to the N.E., and ultimately falls into the Paraná, near Kaprivin Santo, total course, about 300 m.

TERCHOVA, a vil. Hungary, co. Trenčin, 13 m. from Bítch. It has a paper-mill, limestone-quarries, and a trade in wood. Pop. 3457.

TERDOPPIO a river Italy Piedmont, rises N of prov Novara a little S of Lake Maggiore; flows S S E and joins I. bank Po, after a course of about 58 m.

TEREBSER, several places, Hungary particularly—1 (Tib), A market in co. and 13 m. N N W Zemplin with three churches, a synagogue, a Pauline monastery cavalry barracks, a riding-school a handsome chateau, and the ruins of an old castle, which figures in the early Hungarian wars. Pop. 2906.—2 (Tib), A vil. Thilber Thene, co. Meathmar, with two united churches. Pop. 1045.—3 (Tur), A vil. Thilber Thene, no. Ugocsa on the Tur with a castle, two churches and a tower in ruin, castle, and wood. P. 1676.

TERER, a small town N. Behobekhan prov Saravani 70 m. N Shavri, lat. 39° 51' N lon. 66° 57' E The environs abound in productive orchards and gardens.

TEREIK, a river which descends from Mount Kaabek N side of the Caucasus in Gissulski; flows first N W in a narrow valley then E past the town of Mosdok, to lon. 46° E, where it turns S.E., reaches Kullar, where it divides into a number of branches, which fall into the Caspian; total course, about 300 m. Its most important affluents, which, as well as a vast number of mountain torrents, all join it on the right bank, are the Urush, Bekana, Bupa and Akhal. Its current is generally rapid, over a deep and rocky bed.

TERESA or CORACORAN, a tn Spain. See CORACORAN. TERESILKA, a river Russia, rises on N frontier of gov Saratov flows first S.E. then S.W., nearly parallel to the Volga, which it joins on the R bank, 30 m. N N E Saratov; total course, about 180 m.

TEREPOL, a tn. Russian Poland, 57 m. E S E. Silesia, 1 bank R., with some general trade. Pop. 1000.

TERETTE, a tn. Naples prov Lavara, 4.5 m. Sora, on the summit of an almost inaccessible height. It has three churches. Pop. 1820.

TERGA, a tn. Marocco, 70 m. N N E. Fez. Pop. 8000, chiefly employed as fishermen.

TERGOES, a tn. and port, Holland. See GORRA.

TERGOVITZ or THOROVITZ, a tn. Walachia, on the Jabolonica, 44 m. N W Bucharest. It is surrounded by old walls, contains a great number of ruinous houses, and has several churches and two convents. Pop. about 5000.

TERLING, prov Eng. Essex, 8 miles S. E. Pop. 900.

TERLIZZI, a tn. Naples, prov Bari, 19 m. S.E. Barletta. It contains a palace, with a good collection of pictures; two churches, one of them enriched by some pictures of Titian; two monasteries, and a nursery.

TERMINI [anc. *Thermos Eimerensis*] a tn. Sicily prov Agrig. 23 m. S.E. Palermo on a height in a rich and well-cultivated district, near the mouth of a river of the same name, which falls into the Tyrrhenian Sea. It ranks as a city of the third class, being surrounded with walls, and

defended by a strong castle, and contains several churches, and richly-decorated convents a college, two hospitals, and a female house of refuge. The harbour is good. The exports from it are corn, oil, olives, and other produce of the district. An active fishery also is carried on, chiefly for the supply of the market of Palermo. It has thermal saline-baths, temperature 93° F; in great requisit. Pop. 9008.

TERMINOS (LANTUA IN) a seaport in, and large town of the sea, Mexico, dep. Yucatan. The port is in lat. 18° 39' 34" N lon. 91° 50' 42" W (a). It is little more than a large village, about a third of it, including all the principal merchants' stores and houses, having been destroyed by fire in April, 1859. It has two small churches, but no other public buildings. Almost the only article exported is logwood of which upwards of 26,000 tons were exported in 1849. Pop. about 2000.—The LAKA, or lagoon, is about 45 m. long and 30 m. broad is partly in dep. Tabasco, and partly in Yucatan. Its N or seaward boundary is formed chiefly by the island of Carmen. Several rivers empty themselves into the lagoon, the principal of which is the Yalixado. The whole of the shores are low and swampy.

TERMONLO, a tn. Naples prov. Benevento, dist. 14 m. N N E. Lanzo, on a tongue of land which joins into the Adriatic. It is the see of a bishop, and has a cathedral and a convent. Pop. 3900.

TERMONAMONGAN, par Irel Tyrone 45,599 ac. Pop. 6890.

TERMONHARRY par Irel Roscom 8540 ac. P. 3044.

TERMONDE (Flemish, *Doornik*, Dutch, *Doornik*, French, *Doornik*, Latin, *Thermomunda*) a tn. Belgium prov H. Flandria, at the confluence of the Dender with the Scheldt here crossed by a large bridge, 12 m. N W Brussels, and a station on the railway from Malines to Ghent. It is strongly fortified and defended by a citadel surrounded by low marshy ground which can be laid under water. It contains four churches a townhouse, a courthouse, a lunatic and orphan asylum, a refuge for the aged, a prison, two arsenals, and barracks. It is also the seat of a court of first resort, of a chamber of commerce and a *conseil-de-grand-commerce*; possesses a college, several boarding and private schools, no scarcity of houses and architecture a municipal school, and has manufactures of woollen stuffs cotton organs, tulle, hats, linen tobacco, soap, oil, chloride of lime, salt, paper, leather, and famed mustard dye-works, bleach-fields breweries, and distilleries; and an important trade in oil corn hemp, flax, and linen. Termonde is not mentioned in any existing record before the 11th century. It afterwards became the capital of a lordship of same name, which extended N to Durne and W to near Ghent. In 1667 Louis XIV. besieged it with 50,000 men, but the garrison quitted the place and he was forced to retire after being nearly drowned. When afterwards besieged by Marlborough, in 1706, a drought of seven weeks rendered the same defence unavailing and it was soon compelled to make an unconditional surrender. P. 7872.

TERMONEENY, par Irel Londonderry, 4778 ac. P. 1876.

TERMONFECKIN, par Irel. Louth 8904 ac. P. 3387.

TERMONMAGUIRK, par Irel Tyrone, 89,176 ac. Pop. 9228.

TERNATE, an island group, Indian Archipelago, in the Molucces E of Celebes and N of Ceylon, comprising Gilolo, Morla, Kuan or Kow, Ternate, Tidor, Marboe or Putebakker, Mortier, Makien Kajo, and the Betan or Bataken group, and the Old and the New islands. The group is named from Ternate, a small island on the W coast of Gilolo; lat. (summit) 0° 48' N lon. 137° 18' E (a), the residence of the Sultan of Ternate, once the most powerful prince in the Molucces, whose sway extended not only over the greater part of the group, but also over a large part of Celebes. The island of Ternate is nearly circular, about 10 m. in diameter, and occupies almost exclusively of a conical volcano, 4480 ft. high, slightly wooded to a considerable height, and of which frequent and destructive eruptions have taken place. One of the most recent occurred in 1846. Cocoa-nuts, sugar, and other tropical products are plentiful, and tobacco and cotton are grown to some extent. Sulphur, saltpetre, pumice-stone, and lime are the chief minerals. A trade is carried on with the Soolop Islands, China, Java, Amboina, &c. The town of Ternate lies on the N. coast of the island. It is handsomely built, has broad, paved streets, a large, well-furnished market-place, a mosque,

and a Protestant church; and here, by the Dutch fort of Orvola, and the old city palace.

TERFATE, a gov. or prov. of the Dutch possessions in the East, including the Ternate Islands, part of Celebes, the N coast of Papua, and the adjoining islands of Waigoe, Salawatty, Myiwa, &c.

TERFATE, or **Ten-Naguen** in Holland. *See* **Naguen**.
TERNA (french *Terneuse*) a n. Italy, chief Spoleto, on an island formed by the N. 49 m. N. by E. Rome. It is the see of a bishop, and has a handsome cathedral, several other churches and convents, and some Roman antiquities, the principal of which are the remains of an amphitheatre. But the chief object of interest, which has made Terna familiar to Europe, is the celebrated falls which bear its name, though about 5 m. distant from it, and generally called in the locality the *Caduta delle Marmore*. They are artificial, having been originally formed by the Romans to carry off the surplus waters which were constantly inundating the rich plains of Eridi. The head of the river immediately above the falls is about 50 ft., and the velocity of the stream is about 7 m. an hour. The whole height, not less than 300 ft., properly forms three separate falls—the upper of 50 ft., the second or perpendicular fall of about 550 ft., and the third fall of 240 ft.—forming a long sheet of foam. Their magnificence is unrivalled in Europe. Terna is one of the most thriving and industrial towns of the country; and has important manufactures of woollens and silks. The historian Tacitus, and the emperor Trajan and Florian, were born here. Pop. 3245.

TERODANT, or **TERADANT** a n. Morocco, prov. S. 110 m. S.W. Marrakech, is a fertile and highly-cultivated dist. It is built of stone and surrounded with walls 25 ft. high, and of prodigious thickness. Its inhabitants are celebrated for their skill in dyeing and in tanning. Pop. 35,000.

TEROR, a n. Canaries, Isl. Gran Canaria with a large and handsome church, six episcopal palaces, and a primary school; manufactures of woollens and linen cloth; flour-mills and a trade in corn, wine, and fruit. Pop. 5938.

TERRA DEL CAIRO, a n. Naples, prov. Capitanata, W. Ravenna on a steep hill. Pop. 1600.

TERRA DEL FURNO, *See* **TIERRA DEL FURNO**.

TERRA-DEU-SOLZ, a n. and com. Tuscany 46 m. N.E. Florence, in a plain 1 bank Montano, with a court of justice, a church, a school, and mineral springs. Pop. 2543.

TERRA DE LAVORO, a prov. Naples. *See* **LA VORO**.

TERRA NUOVA a n. and com. Tuscany comp. Arrezzo n. bank Chiusina, in the Upper Val d'Arno, 30 m. S.E. Florence. It is surrounded by walls, has a court of justice, and a principal church, situated in a central square; four other churches, a convent, and superior school. Pop. 6233.

TERRA ROMA, a n. and com. Tuscany, comp. Pisa, 4 m. S. Viterbo, with a court of justice and a parish church. Pop. 1768.

TERRALINA (anc. *Amari*), a n. Italy doing, and 20 m. S.W. Syracuse, on a gulf of some name, near the S.E. extremity of the Pantaleon. It is the see of a bishop, and has a handsome episcopal palace, a cathedral, in a kind of Italo Byzantine style, on the site of an ancient temple which has furnished several of the pillars; a harbour built by the Emperor Antonine Pius, but completely filled up, and a small port at the termination of the canal of Termodia, with about 8 ft. water but the trade is very insignificant. The fishing, however, is active. On a height above the town are the ruins of the old castle of Theodorici. In 1798 the French took it by assault, and gave it up to pillage. F. 4146.

TERRALBA, a vill and com., Isl. San Marino, div. Capitanata, is a very unhealthy plain near a lagoon, 12 m. S.E.E. Oricola. It has a bakery, salt-works, and a trade in wine. Pop. 2500.

TERRANOVA, a convent n. N.E. coast, Isl. Sicily, on a bay of some name, div. Messini, prov. and 25 m. N. Taormina, with fishy, improved streets, a handsome church, a good harbour, and some trade. Pop. 1474.

TERRANOVA, a free place, Naples—1, a n. prov. Calabria-Città, dist. and 11 m. S.E.E. Cassertellari, near 1 bank Crati with two parish churches and four convents. Pop. 2180—2, a n. prov. Basilicata, 29 m. S.E.E. Ligonara 1 bank Marone; with a convent. Pop. 1104—3, a n. Calabria-Ultra 1, dist. and 9 m. S.E.E. Fald. It was founded at a very early period, and had claim to be one of the *Septem Urbes* in the province, when it was in great part de-

stroyed by the earthquake of 1783. It is now little more than an unhealthy village, though it still contains two churches.—4, (Ponente), a n. Principato-Ultra, N.W. Avellana, with three churches and an almshouse. Pop. 1130.

TERRANOVA (anc. *Gela*) a n. Sicily, prov. and 30 m. S.E.E. Castellana, at the extremity of an arid plain, where the river of the same falls into the Mediterranean. It was founded in the 13th century by the Emperor Frederick II., on the site of the ancient Gela, is defended by a strong castle, and contains several handsome churches, eight convents, and an hospital. The harbour is indifferent, but has some export trade in corn, wine, fruit, and particularly sulphur and soda. Scythian, who had retired to Sicily to the court of King Hiero, is said to have died here. Pop. 9000.

TERREASSON (Latin, *Terracina*), a n. France, dep. Dordogne, 1. bank Vézère, 30 m. N.E. Périgueux, with tanneries, brick and tile works, and a market for trifles. F. 1605.

TERRE-BONNE, a n. Lower Canada, on the river Des Prairies, 30 m. N. Montreal. It has a R. Catholic college, with nine professors and two masters; a large R. Catholic and an Episcopal church, a public and two private schools, manufactures of cloth, iron, and leather, and several grist and saw mills. Pop. (1833) 1129, (Jan. 1854), about 1400.

TERRE-HAUTE, a n. U. States, Indiana, on the Wabash, and Wabash and Erie canal, and at the junction of the Terre-Haute and Richmond and the Atlantic and Mississippi rail ways, 73 m. W. Indianapolis. It occupies a high bank about 60 ft. above the river, is well built, mostly of brick; and has 13 churches, numerous schools, a fine courthouse, townhall, and state bank; manufactures of agricultural implements, carriages, and soap two foundries, two breweries, two distilleries, a cooperage, an oil, a saw, and several flour mills and a considerable trade, partly in hops, of which about 50,000 are annually packed. There are rich beds of coal and iron in the vicinity. Pop. about 4900.

TERRENGLEA, par. Scot. Kirkcudbright; 5 m. by 5 m. l. op. 565.

TERRESSA, one of the Nicobar Is., Indian Ocean, belonging to the N. group. lat. 8° 30' N.; lon. 93° 15' E.; about 12 m. long N.W. and S.E. and 5 m. broad at the N.W. and but scarcely half so much at the S.E. end. When viewed from a considerable distance, it appears like two islands, the land towards each end, particularly the N. part, being much higher than in the middle.

TERRICIOLA, a n. and com. Tuscany comp. and 18 m. S.E. Pisa; with a court of justice, a large square, on the site of an ancient castle, and partly occupied by a handsome church of three naves with five arches and a trade in oil, fruit, and cattle. Pop. 9125.

TERRINGTON, three par. Eng.—1, York (N. Riding) 2630 ac. Pop. 753—2, (St. Clement), Norfolk, 24,236 ac. l. op. 2750—3, (St. John), Norfolk. Pop. 784.

TERREYGLASS, par. Ire. Tipperary; 1763 ac. F. 566.

TERSCHELING, Isl. Holland. *See* **BOUWLAND** (Ter-).

TERTENIA, a vill and com. Isl. Sardinia div. Cagliari, 15 m. S.E. Lanusei with a trade in corn, wine, and cattle. It is notorious for the number of murders perpetrated in it. Pop. 1130.

TERUEL, a prov. Spain Aragon with cap. of same name, bound N. by prov. Saragossa and Huesca; E. and S. Tarazona, Castellón-de-la-Pina, and Valencia; and W. Caspe and Guadalajara; area, 2963 sq. m. The principal mountain-range is that of Albaracín and its offshoots, intersecting the province E. to W. One of the loftiest portions of this mountainous region is the *Muela de San Juan*, whose summit is clothed with snow two-thirds of the year, and in whose recesses the Tagus, Gállego, Guadalquivir, and Júcar take their rise at a very short distance from one another, whence they direct their course in different directions to the Atlantic and Mediterranean. Besides the Albaracín and Guadalajara, this province is fertilized by the waters of the Alhama, Júcar, Martín, Segura, and other smaller streams. Between the heights the extensive and fertile plains. The productions consist chiefly of grain, wheat, silk, hemp, &c., saffron, and exquisite fruits, as well as numerous sheep, swine, and horned cattle. Abundance of timber and charcoal is also supplied from the mountains, in which there is also plenty of game. Here copper-mining industry is still confined to coarse cloth, bolina, blankets, raphes, plain Rones, shoes, and other

articles of hemp and aspartic, paper, soap, and leather, besides flax, silk, cotton, wool, and potatoes. Education is in a very backward state, but there is less crime here than in most of the other provinces of Spain. Pop. 350,000.

TERRUEL (anc. Turis), a city, Spain, Aragon, esp. above prov., 148 m. N.E. Madrid, 1 bank Guadalquivir or Turia. It is surrounded by weak old walls, with nine gates, which, with their Aragonese towers, give the city an imposing look when viewed from a distance. The interior is solid and gloomy. For the most part the streets are narrow, crooked and ill paved, but kept very clean, and provided with sewers. It has 14 squares, the principal one provided with arcades beautifully paved, and an old fountain in the centre; a cathedral, presenting a picture of the 11 000 virgins, by Antonio Buzquet, a rare Valencian artist, an episcopal palace, a parish church of St. Peter with its cloisters, where are preserved the remains of Juan Diego de Marcella and Isabel de Segura, the 'lovers of Teruel' so familiar to readers of Spanish plays, the church of Santiago, that of San Martin, with its Arabesque tower; and the Arco de Teruel, an aqueduct consisting of a double file of arches 160 ft. high. There are also a cloister, several convents, a hospital, an institution which is at the same time an asylum for the poor and a founding hospital, and several educational establishments for primary and advanced instruction. Outside the town is a bull ring capable of accommodating 9000 persons. Agriculture constitutes the chief employment of the inhabitants, and hemp in thread or wrought is the only article of export. The town and all the district were sacked in 1810, by Suchet. Pop. 7169.

TERVUELEN, a vil and com. Belgium, prov. Brabant, 7 m. E. Brussels, a magnificent royal chateau, having a walled park of 485 ac., a large church, in which several of the dukes of Brabant are buried. Here also is the breeding-stand belonging to the state. Pop. 1812.

TERWICK par. Eng. Sussex, 718 ac. Pop. 97.

TERWOLDE, a vil. Holland prov. Gelderland, 22 m. N.E. Arnhem, with a church. Pop. (agricultural) 1843.

TESCHEN, a to. Austria, Moravia, esp. circle, r. bank Olza, 63 m. N.E. Olmitz. It consists of the town proper, surrounded by walls with three gates, and of three suburbs, and contains an old castle with a small Gothic chapel of an oval form, a parish church, partly Gothic and partly modern, a Protestant church a large and majestic structure, a church of the Brothers of Charity remarkable alike for lightness and solidity of structure, an hospital with a church, an Elisabeth nursery, and a gymnasium with a library of 12 000 vols., and a cabinet of coins, minerals, and other natural curiosities. It has manufactures of woollens, combs, laces, and firearms; distilleries of roseoil, and a trade in woads and linen goods, wool, leather, wine, wax, and honey. The peace which terminated the war of the succession to Bavaria was signed here in 1779. Pop. 8400.

TESHO-LOOMBOO m. Tibet. See CHAKRA LO TOE-BOO.

TESOURA, a m. Brazil, prov. and 80 m. N.W. Goyas. It owes its existence to the great quantities of gold which were furnished for a time by the small stream of the same name, and attracted a considerable population, but since the washings ceased to be productive, many of the inhabitants have emigrated, and their houses have either been pulled down or left tenanted. — The river rises among mountains, about 70 m. N. E. Goyas, runs N. E., traversing the town of Tesoura, receives the Parna on its left, and joins r. back Araguaia, after a course of about 300 m.

TESSENDELOO, a vil. and com. Belgium, prov. Limburg 14 m. W. W. Hasselt. It has manufactures of woollen stuffs, two tanneries, an oil-mill, and a trade in agricultural produce. Pop. 2070.

TESSIN, a m. Mekslingen-Schwerin, on the Recknitz 15 m. S.E.E. Rostock. It is walled, and defended by two forts; has a parish church, a school, manufactures of linen and matts, and several breweries and distilleries. Pop. 2189.

TESSIN (Italian, Ticino) a river Switzerland, rises on the S. slope of Mount St. Gothard on the frontier of the canton of Leventina, thence it approaches Bellinzona, when it changes its direction to S.W. and shortly after traverses Lake Maggiore, proceeds S.E. E., forming the boundary between Piedmont and Lombardy, and shortly after passing Pavia, joins 1. Spok Eo; to total course, extensive of the lake, about 120 m.,

of which 45 m. are above, and 75 m. below the lake. None of the former, but all the latter, is navigable.

TESSIN (Italian, Ticino), a cant. in the C. of Switzerland, bounded N. by cant. Grisons and Uri, N.W. a small canton of Valais, W. and S.W. Piedmont, and S. and E. Lombardy. It bears a considerable resemblance to a triangle, with its vertex on the S., and base resting on the N.; greatest length, N. to S. 29 m. central breadth, 28 m.; area, 1087 sq. m. This canton, in respect of climate and general physical features, is divided into two very unequal parts by Mount Ceneri, which stretches across 14 K. to W. towards the head of Lake Maggiore. Both parts are so intersected in all directions by mountains of greater or less magnitude, that the whole canton may justly be regarded as one of the most magnificent in Switzerland. The N. and the larger part, however, is the more elevated, its N. frontier being formed by several of the loftiest of the Alps, the Splügen, St. Bernard, and Mount St. Gothard. From this frontier a considerable portion of which belongs to the glacier-region, the canton has a general slope towards the S., lofty mountain-ranges, which generally take a S. or S.E. direction, forming in the spaces which separate the lofty alpine valleys, each regularly traversed by an impetuous mountain stream. The smaller part of the canton lying on the S. side of Mount Ceneri, though by no means tame, is of a much less magnificent description, and exhibits in its scenery, elevations, and productions, the characteristic features of Italy. The whole canton, with exception of a very minute portion of the S. which sends its waters to Lake Como, is drained by Lake Maggiore, and belongs through it to the basin of the Po. The principal stream by which the drainage is performed, is the Tessin, which gives its name to the canton, and is augmented within it by several affluent. Besides these streams there are numerous lakes. The most important of all, Lake Maggiore has only a small part of its area within the canton. The others deserving of notice, either because of their magnitude or the magnificent scenery in which they are embosomed, are lakes Lugano, Musso, Origo, Stetta, Luzeudo, and Rotzo. The elevated and rugged surface of the N. part of the canton necessarily unites it for agricultural operations and confines the attention of the inhabitants to the rearing of cattle and the preparation of dairy produce, which constitute the great sources of their subsistence. In the S. part of the canton the scene completely alters, and alpine pastures are succeeded by magnificent forests of chestnuts on the higher slopes, lower still, by olive-vards and vineyards and towards the plains by waving corn-fields and many of the more delicate Italian fruits—figs and almonds, oranges, citrons, and pomegranates. The myrtle grows almost without culture, and in ordinary winters requires no shelter. The minerals of the canton are not of much consequence. In some parts of the S. part is partially wrought, and even a little coal has been dug, but probably the most valuable mineral the canton contains is marble, which is found in great abundance, and of various colours, particularly red and green. Where the mountains lie within the limits of forest vegetation, they are the haunts of almost all kinds of game. The streams and lakes are full of fish. The manufactures consist almost entirely of a few articles of domestic use and though there is some transit trade over the mountain-passes between Switzerland and Italy, many of the inhabitants, unable to find employment at home, annually migrate into other countries. The fact was not formally admitted to the Swiss Confederation till 1815. The government, at first oligarchical underwent considerable modification in 1830, and the grand council in which the legislative and all other power either actually or virtually centres, is chosen by all the citizens of 25 years of age possessing immovable property either in fee to the value of 25, or in life-rent to the value of 212. The inhabitants, like the country which they occupy, belong to the Italian type. They generally speak the language, profess the religion, and write sometimes indistinct in the last, are not unfrequently conversant for some of the worst habits of the Italians. For administrative purposes Tessin is divided into 8 districts—Bellinzona, Locarno, Lugano (each of which, as afterwards the seat of government, may be regarded as a capital), Bienna, Leventina, Mendiccia, Riviera, and Val Maggia, subdivided into 88 circles. Its constitution to the Confederation is 1804-cant, and an annual payment of 41100 Fr. (1880), 117,297; of whom only 50 are Protestants.

TESTACHIO, a vil. Naples, in a beautiful valley in the S. of Mt. Ischia. Pop. 1112.

TESTE-BE-BON (Telle, Ruchon), a important. France, dep. Gironde, 80 m. S.E.W. Bordeaux, with which it is connected by railway, S. short, Bay of Arcachon, where it has a small harbor, much frequented by sailing vessels, and at which a considerable trade is carried on, particularly in cattle, pork, tur, lampreys, and fish. Many of the inhabitants are engaged in fishing against and other fish. The only summer feature is portable. Pop. 3250.

TESTERTON, par. Eng. Norfolk, 512 m. Pop. 13.

TESTIGON, a group of islets, Caribbean Sea about 50 m. from N. E. coast, Yucatan, and about the same distance N. E. the island of Mangrove; lat. 11° 32' N., lon. 52° 12' W.

TESTON, par. Eng. Kent; 491 m. Pop. 208.

TEST, a river, France, rises in Mount Fraque, dep. E. Pyrénées flows bet. S.E. to Mont Louis, then N. E., past the towns of Fraque and Perpignan, and 6 m. below the latter falls into the Mediterranean, after a course of 75 m., of which 45 m. are used for floating.

TEST or **TERT**, a decayed m. Morocco, 8 m. S.W. Marrakech. Pop. 1000.

TETBURY, a market tn. and par. England, co. and 16 m. S.E. Gloucester, on a rising ground, near the source of the Lower Avon, with a spacious market-house a handsome church surrounded by a fine square, three Dissenting places of worship a grammar and a common school, an almshouse, and various other charities. Jars, cheese, and butter form the staple articles of sale. A cloth-manufacture is also carried on. N. of the town there is a petrifying spring. Area of par., 4583 ac. Pop. 3325.

TETCUTT, par. Eng. Devon 2181 m. Pop. 969.

TETE, or **TETTE**, a tn. E. Africa, cap. of a gov. of the Portuguese territory 110 m. N.W. Sena. It is situated on elevated ground, on the Zambezi, in the midst of a fertile district. It is large, well built, and healthy.

TETE-NAIVE, a pass leading from the valley of the Tivoli, in the S.W. of the Swiss can Valais, into the Val d'Aoste in Savoy. It leads across a densely wooded mountain ridge, the highest summit of which is about 7000 ft. though the pass nowhere much exceeds 4000 ft.

TETENY, a vil. Hungary. Hither Danube, co. and 7 m. S.W. Pesth near the Danube with a parish church, synagogue, and chateau. Pop. 1450.

TETEREV, a river, Russia, rises on the confines of Poland, in the S.W. extremity of Volynia flows N.E. through this government, past Jitomir, enters gov. Kiev, and joins r. bank Dniester a little below the confluence of the Pripiat, after a course of about 150 m.

TETEFOW, a tn. Mecklenburg-Schwerin, on a lake 16 m. E. Güstrow. It is walled, and has a Gothic church, a post-office and some general trade. Pop. 3752.

TETTFORD par. Eng. Lincoln, 2710 m. Pop. 792.

TETH, a vil. Hungary. Thither Danube, co. and 14 m. S.W. Raab, with two churches, and a trade in wood and cattle. Pop. 2568.

TETLE, or **TEMA-DE-TETLA** (La) a tn. Coahuila, in Fortification, in a fertile valley, with a church, a primary school, and some manufactures of linen. but the chief employment is agriculture. Pop. 1387.

TETNEY par. Eng. Lincoln 5325 m. Pop. 969.

TETSCHEEN, DENKON, or **WANTA** a tn. Holstein, circle Lauenburg, pleasantly situated r. bank Elbe, 30 m. S.E. Dresden. It stands at the foot of a lofty sandstone rock crowned by the old castle of Tetschen, in which there are a fine library of 20,000 vols., an armory, &c. a remnant of the town proper and the Elbe suburbs contains a dairy-church; and has breweries and distilleries, some shipping, and a considerable trade, particularly in corn and fruit. Pop. 1433.

TETSO, or **TEYANVO**, a market in Hungary, co. Maros, on the Theiss, over which there is here a ferry, 14 m. W.N.W. Seghed. It has an enriched spring, salt-mines, and a trade in wood and cattle. Pop. 1301.

TETSWORTH par. Eng. Lincoln, 1178 m. Pop. 512.

TETTENHALL, a tn. and par. Eng. W. and W. Stafford on the Worcester and Staffordshire canal, about 3 m. N.W. Wolverhampton. It has an ancient parish church, a Wesleyan chapel and manufactures of locks, hinges, bolts, spectacle-frames, &c. Area of par., 7600 ac. Pop. 5928.

TETTANG, a tn. Württemberg, circle Donau, capital, on the Topfelnach, 22 m. S.E.W. Ulm; with a church, several chapels, two castles, an hospital, manufactures of cherry-hammy, some mills, and a general trade. Pop. 1361.

TETUAN, a market m. Morocco, prov. Fez, on a rugged hill above the shore of the Mediterranean, 33 m. S.E. Tangier; lat. (mean-time) 35° 31' N.; lon. 6° 12' W. (a.) It is walled, fortified with towers, and defended by a castle, which crowns the heights on which the town stands, and is partly occupied as the governor's residence. It has narrow, unpaved, and dirty streets, and the houses, which, with their projecting balconies, almost meet across them and exclude both air and light, are, with a few exceptions, little better than hovels.

A SCENE IN TETUAN.—From Deane's Tourist in Spain and Morocco.

The only public buildings deserving of notice are the mosques, some of which are handsome. The harbour situated at some distance, at the mouth of the small river Maril, is altogether unfit for large vessels and the roadstead though affording sufficient depth of water, and well sheltered by a peninsula on the W., is completely exposed on the E. The trade with the interior is considerable, chiefly through the medium of Fez, from which it receives the goods brought by several caravans, and exports them chiefly to Italy, Spain, and France, in return for European manufactures. Pop. about 15,000.

TETWORTH, par. Eng. Huntingdon; 1446 m. P. 321.

TEUCHERN, a tn. Prussia, prov. Saxony gov. and 17 m. S. Merseburg on the Elbe, with a church. P. 1558.

TEUFEN or **TEUFER**, a vil. and par. Switzerland, co. and 5 m. N.N.E. Appenzell, with a handsome church and an orphan asylum. The greater part of the inhabitants are employed in manufacturing and undertaking woolen P. 8867.

TEULADA, a tn. Spain. Valencia, prov. and 80 m. N. B. Alicante, at a short distance from the Mediterranean. It has several spacious streets, a parish church, endowed school, hospital, manufactures of linen, and some general trade. P. 1686.

TEULADA, a vil. and com., in. Bavaria, div. and 26 m. S.W. Garmisch, in an unhealthy valley, on a small stream, a little above its mouth in the Bay of Rome, and 5 m. N.N.E. of the Cape of Teulada. It has quarries of white marble, and a mine of magnetite-iron. Pop. 2239.—The cave (see. Tegelberg), forming the most S. point of the island, is a singularly bold headland, nearly 500 ft. high, and presents a long range of precipitous cliffs, with a breadth of cliffs more than 2 m. It has a cliff summit, and shelves down on the N. to a sandy beach, partly occupied by a lake, which deposits fine soil.

TEUTOBURGERWALD, or **TEUT**, a mountain-chain, Germany, which commences between Biele and Schöppingen, to the W. N.W. of Osnabrück, and stretches N. across the district

of Padernora to the small town of Horn. Here it changes its direction to N.W., traverses part of Lippe-Deimling and Rhinisch Prussia, enters Hannover, and terminates near Osnabrück, where it becomes linked with a chain of hills which stretch from W. to E., and are known by the name of the Mountains of Minden. The highest parts of the chain are the Falkenberg near Horn, where its height is nearly 3000 ft. and the Hahenberg, near Vörden. In these localities, and generally in the S.W., it is covered with fine hardwood-trees. It slopes gently on the W. and very rapidly on the E. The main Egge is generally restricted to the S. west of the chain, and the Tautoburgerwald to the N. The drainage is shared by the Weser, Ems, and Rhine.

TEVA, a in Spain, Andalusia, prov. and 87 m. N.W. Málaga, in a valley. It has a townhouse, abattoir, hospital, storehouse, several fountains, a small and measure prison, two primary schools, two academies for girls, a church, a convent with a church open for public worship, and several hermitages. Agriculture forms the main occupation, but some are employed as muleteers, in making weapons, dressing and exporting mulberries, and in various flour and oil mills. Pop. 8353.

TEVEL, several places. Hungary particularly:—1, A vil. Thither Danube co. and 12 m. from Tolna with a church and some trade in wood and in tobacco. Pop. 2404.—2, (Adana), A vil. Thither Danube co. Vespriem 5 m. from Papa, with two churches, and a trade in corn and cattle. Pop. 1660.

TEVERE, a river Italy. See Tevere. TEVERONE, (river Asia), a river, Italy, rises on the frontiers of Russia, at the extremity of delez Fromone, flows S.E., then turns suddenly N.W. keeping parallel with a ridge of the Apennine hills. It reaches lat. 43° N., when it changes its direction to S.W. and keeps it till its junction with L. bank Tiber, about 5 m. N.N.E. Rome. Total course, 66 m., almost wholly through a picturesque valley. On it are the celebrated artificial cascades of Tivoli.

TEVERSHAM, par Eng. Nottingham; 2820 ac. P. 578.

TEVERSHAM, par Eng. Cambridge 1300 ac. P. 1288.

TEVIGT, a river, Scotland, co. Roxburgh, rises among the heights which separate Dumfriesshire from Roxburghshire, and after flowing in a N.E. direction about 55 m., joins the Tweed near Kelso.

TEW, two par. England, Oxford — 1 (Ground), 8140 ac. Pop. 541 — 2 (Lodge), 1600 ac. Pop. 237.

TEWIN, par Eng. Hertford 2615 ac. Pop. 522.

TEWKSBURY, a bur. market tm., and par England, co. and 10 m. N.E. Gloucester 1. bank Avon, near its confluence with the Severn. It consists of three principal and several smaller streets, all kept clean. The houses are chiefly of brick, and are well built, with exception of a few ancient dwellings composed of timber and brick, which still remain. It has a fine old church principally in the Norman style, with a beautifully-ornamented tower rising from the centre. Another church, of modern erection, Wesleyan, Independent Baptist, Quaker and R. Catholic chapels, a grammar, national, infant, and Dissenter schools, a dispensary, several minor charities, and a mechanics institute. Stocking-weaving is the principal trade of the place, but it is not so flourishing as formerly. There is also a silk factory. Area of par, 2383 ac. Pop. (par and bur), 5678.—(Local Correspondent).

TEXAS, one of the U. States of N. America, lat. 26° to 36° 30' N., lon. 98° 30' to 107° W., bounded N. by the Indian territories, N.W. New Mexico, S.W. and S. the Confederation of Mexico, S.E. the Gulf of Mexico, and E. Louisiana and a small corner of Arkansas; length, E. to W., 600 m., breadth, 400 m., area, 327,821 sq. m. The surface in the N.W. is covered with mountains, which, in proceeding S.E. outside into hills and undulating plateaus, succeeded, on approaching the Gulf of Mexico, by low alluvial plains. These extend inland from 30 m. to 50 m., are furrowed with deep ravines, and, except near the coast, form extensive prairie, or are covered with dense forests. The hilly region behind it consists chiefly of sandstone and limestone ridges, separated by valleys of considerable fertility and presenting scenery of great beauty and grandeur, though few of the hills exceed 500 ft. in height. In the mountainous region, composed chiefly of the primitive and oldest sedimentary rocks, many of the mountains are very lofty, and are covered with snow during the greater part of the year. Few countries are better

watered than Texas, though, in consequence of numerous obstructions, few of the rivers are navigable for more than 100 m. The general slope of the country gives all the rivers a direction more or less S. Among them, the most important is the Rio-Grande or Rio-Grande-del-Norte, which, proceeding from New Mexico, and skirting the base of a long range of mountains, forms the W. and S.W. boundary of the state. Another important frontier stream is the Red River, which, rising in the N.W., within the frontiers of Mexico, forms the far greater part of the S. boundary. The other large rivers taking their rise within Texas are the Rio-Grande, the Pecos or Puerco, a tributary of the Rio-Grande; the Nueces, with its affluent Frio and San Miguel; the Guadalupe, the Rio-Colorado or Red River of Texas, which empties itself into Matagorda Bay and is the most important central stream of the state; the Brazos, the San Antonio and Trinity which both empty themselves into Galveston Bay and the Sabine, which, during the latter and greater part of its course, is the boundary between Texas and Louisiana. No lakes of any importance appear in extent in the interior, but a long chain of lagoons, separated from the sea by a narrow belt of shore, stretches along the Gulf of Mexico. These lagoons, though encumbered at their entrance by bars have great depth of water within, and seem susceptible of being improved so as to become of great navigable importance. The soils of Texas include every possible variety but taken as a whole, are so fertile that the country, probably from some little exaggeration has been called the garden of America, and likened, in respect both of climate and productivity, to the fertile regions of N. Italy. The two great staples are cotton and sugar, both of which are largely cultivated on the coast, and for 100 m. up the principal rivers. In the same lower districts, maize and tobacco grow luxuriantly. The common cereals, wheat, rye, oats, and barley, thrive best in the hilly regions, and both there and at lower levels, fruits in almost endless variety are abundant. The mulberry thrives well, and silk might be obtained to an almost unlimited extent. The forests are magnificent, and contain large tracts of oak admirably adapted for naval purposes. The pastures also are often covered with the richest natural grasses, and the rearing of cattle is carried on to the greatest advantage. In the unsettled districts herds of buffaloes, wastages or wild horses, and deer are seen in thousands. The minerals have been imperfectly explored but identity of geological formation gives ground to presume that the gold and silver found in the ranges of Chihuahua and New Mexico are not wanting in the N.W. of Texas. The hilly region contains large deposits of ironstone, copper is found on the banks of the Brazos, and both lignite and coal in various places. Manufactures cannot yet be said to have an existence, and though the coasting trade is of some importance, the foreign trade is very limited. By the constitution of Texas, adopted in 1845 the legislative consists of a general assembly, composed of a senate elected for four years, one-half retiring every two years and a house of representatives, elected for two years, both bodies chosen by the universal suffrage of male whites of 21 years of age. Austin is the capital. The population in 1850 was 519,597 of whom 38,161 were slaves. Besides these, the aboriginal Indians are estimated at 25,000. They belong to various tribes, but the Comanches, by far the largest, number about 15,000, and can muster 2000 warriors. They have at times proved troublesome to the frontier settlements. The first settlement in Texas was made at Matagorda by the French who, in 1690 were expelled by the Spaniards, who extended their dominion over the whole territory. It afterwards became one of the states of the Mexican Confederation. Several colonies of American citizens, invited by the Mexicans, settled in the E. section, and gradually increasing in numbers, Texas revolted from the federal government, and, in 1836, declared themselves independent. Santa Anna attempted to reduce them, but failed, and is said to have acknowledged their independence. This, however was never sanctioned by the senate, and accordingly wanted legal confirmation when the American senators, in 1845 offered to make the whole country one of the U. States Congress accepted the offer, and thus gave rise to the recent war which proved so disastrous to Mexico.

TEXEL, an Isl. Holland, par N. Holland, separated from the Helder by the channel called Mars-Diep, 2½ m. breadth, lat. (W. point) 53° 5' N.; lon. 4° 2' E. It is about 14 m. long,

and 6 m. in extreme breadth; its N. part being composed of the former island of Alderham (about 1800). A good many sheep, which yield fine wool and a considerable quantity of cheese, and a number of harnessed cattle and horses are reared. Many of the inhabitants are also engaged in fishing and weaving. It contains one market-town (Burg), and six villages. Pop. 4794. The Dutch Admiral Van Tromp was defeated and slain off Texel by the English under Blake, July 31, 1666.

TEY, three par. Eng. Essex:—1 (Green); 2008 ac. P. 765. —2, (Lidde), 486 ac. P. 74—3, (March); 1314 ac. P. 473.

TEYNHALL, the seat N. of the Solway Islands; lat. 55° 52' N., lon. 1° 45' E.; small, very low and covered with trees.

TEYNHAM, par. Eng. Kent; 2645 ac. Pop. 643.

TEZA, or TAZA, a river, Russia, rises in the S. of gov. Kostroma, flows easterly to S. into gov. Vladimir, and joins the bank Klyazma, after a course of about 100 m.

TEZUCO, or TEZUCO, a m. Mexican Confederation, dep. and about 18 m. E. N. E. Mexico. E. shore lake of same name. Is ancient times it was the second city in this kingdom, and though still a place of some importance, now derives its chief interest from historical associations and remains of antiquity.

In the N. W. quarter, where a shapeless mass of pottery, bricks, and some large neatly-quared blocks of basalt are thickly overgrown with weeds, one of the palaces of Montezuma is said to have stood; and in the S. quarter are the massive remains of three vast pyramids, each measuring 400 ft. along the base of their fronts. They appear to have been sanctuaries or temples devoted, like those of the capital, to human sacrifices and other heinous rites. The modern town contains many handsome edifices, both public and private, has considerable manufactures of woollen and cotton goods, and carries on an active trade chiefly with Mexico. Pop. about 5000.—The LAKE, about 2½ m. E. city of Mexico, with which it is connected by a canal, is the largest and lowest of the five lakes in the same vicinity.

It is situated between N. to E., about 15 m. greatest breadth, 9 m. Its depth nowhere exceeds 10 ft., and in some parts is not more than 2 ft. or 3 ft., while its shores, little raised above its level, are swampy. Its waters are so strongly impregnated with salt as to leave a white deposit on its banks, and supply a number of salt-works which have been erected. The lake was once much more extensive than at present, and contained several islands, one of which the Mexico of the Incas was built. (See MEXICO, m.)

THALFINGEN a vil. Württemberg, circle Schwarzwald, 9 m. E. Balingen with a church, and manufactures of linen. Pop. 1667.

THAKENHAM, par. Eng. Essex; 1980 ac. Pop. 631.

THAL, a vil. and par. Switzerland, cna. and E. N. E. St. Gall with an old church. Near it is a mineral-spring, over which a bath has been erected and a castle, belonging to the Prince Hohenzollern-Sigmaringen. Pop. 2665.

THALE, a m. Prussia, prov. Saxony gov. and S. W. Magdeburg, at the foot of the Harz Mountains; with a church, a manufactory of sheet-iron, linoleum and two mills. P. 1865.

THALHEIM:—1 A vil. Saxony, circle Zwettau, bail. Rastburg with a church, manufactures of linen and cotton, and a cotton and three other mills. Pop. 1866.—2, A vil. Württemberg, circle Heilbronn, bail. Heilbronn with church and an old castle or ruin. Pop. 1214.—3 A vil. Württemberg, circle Schwarzwald, 7 m. N. W. Tübingen with a church. Pop. 1261.—4, A vil. Württemberg, circle Schwarzwald, bail. Rastburg, with a church, and the ruins of an old fortified castle. Pop. 1083.

THALMÄSSING or THALMUNGER, a market in Bavaria, on the Thallach, 25 m. S. by E. Nürnberg; with a deanery, two churches, and three mills. Pop. 1169.

THALWEILL, a vil. and par. Switzerland, cna. and 6 m. S. Zürich, on a height above W. shore, Lake of Zürich. It contains chiefly of a number of houses clustering round the church, whose twisted tower, rising up among trees, presents a strange appearance. The inhabitants are much employed in weaving cotton, and have also some general trade. P. 1759.

THAME, a market tn. and par. England, co. and 12 m. E. Oxford, on a gentle activity I. bank Thames, across which is a bridge of considerable length. It has a large, handsome, cruciform church, a free grammar, and another free school for educating and apprenticing boys, but no manufactures of any consequence, the bulk of the labouring class being engaged in handicraft. Area of par., 5610 ac. Pop. 3256.

THAMES, the most important, though not the largest river of Great Britain, is usually said to rise about 2 m. S. W. Crummock in Gloucestershire, near a bridge over the Thames and Severn canal, called Thames-head Bridge, but is more properly formed by the fids, Otford, Chisel, and Lodd, which have their sources on the E. side of the Otford Hills, and unite near Lockhead, where the country of Gloucester, Wilt, Berks, and Oxford border on each other. Its direct course, E. by E., to the Nore, where its estuary is considered to terminate in the German Ocean, is 124 m. Its indirect course to the same point is estimated at 315 m. Proceeding from Lockhead, where it becomes navigable for barges, it flows first N. N. E. then S. S. E., past Oxford and Abingdon to Reading, then N. W. past Great Marlow, and S. E. past Windsor to Staines. During the part of its course now described, it separates the county of Berks on its right, from those of Oxford and Buckingham on its left bank. From Staines it pursues a circuitous course E. to London, passing the towns of Chertsey, Kingston, Richmond, and Brentford, and separating the counties of Middlesex and Surrey below London its course, E. to the Nore, between Kent and Essex, is 47 m. Its principal affluents below those by which it is formed near Lockhead, are, on the left, the Windrush, River-Lodd, Chertwell, which joins it immediately below Oxford; the Thames, Colne, the River, which joins it at London; the Lea, which joins it at Ebbwast and the Roding; and on the right, the Kennet, which joins it immediately above Reading, the London, Wey, Mole, and perhaps the Moleway though one of the two broad arms into which it divides has its mouth directly opposite to the Nore, and the other is considerably beyond it. Thames-head Bridge is 376 ft. above sea-level; at the junction of the Colne above Lockhead, this height has diminished to 248 ft., showing on the whole distance of 23 m., an average fall per mile of 6 ft. Below this the average fall nowhere exceeds 2 ft. 3 in. At London bridge, where the height above sea-level is 4 ft. 3 in., the average fall per mile is only 9 in. from London bridge to the Nore it does not exceed 1 in. At London bridge the width of the river is 290 yards at Woolwich 490 yards, at Greenwich, 800 yards and 3 m. below, 1390 yards. The basin of the Thames has an area of 5160 sq. m. It thus occupies nearly one-eighth of the whole area of England, but belonging entirely to the upper part of the secondary and to the tertiary formations, is destitute of coal, and hence possesses no manufactures of importance, except those of the metropolis itself. It comprehends, however some of the richest agricultural districts of the kingdom, and surpasses all others in point of wealth, derived partly from its containing the seat of government, and still more from its vast commercial importance. Its depth, in the fair way above Greenwich to London bridge, is 12 ft. to 13 ft., while its tides have a mean range of 17 ft., and an extreme rise of 22 ft. Up to St. Katherine's docks, adjoining the Tower it is navigable by vessels of 800 tons, and to Blackwall by vessels of 1400 tons. As far as Deptford it safely floats vessels of any burden, though mudbanks beyond its estuary and at the Nore make the navigation rather intricate.

At London and below, the accommodation provided for shipping is of the most extensive and magnificent description. Nor has the navigation of its upper channel and the importance of navigable feeders, been overlooked by means of numerous canals, as the Thames and Severn, the Oxford, the Wilts and Berks, the Kennet and Avon, the Wey and Arun, the Buckingham, and the Regent and Faldington, communicating with the Grand Junction, immediate access is given from its banks to those of all the great rivers of the kingdom.

THAMES, a river Upper Canada, rises in the London dist.; flows directly W. S. W., and after a course of about 110 m., falls into the Lake of St. Clair. It is navigable for about 30 m. for vessels of considerable burden.

THAMMOS, or WAMM, a river, Near Zealand, Ulster, which rises in a mountainous district, about 18 m. W. Lake Roto-Rua, flows mostly N. N. W. and falls into a broad but shallow estuary of same name, called also Hauroki Gelf. It has a depth at its mouth of about 8 ft., and by means of the tide, which runs up for nearly 50 m., is navigable for small craft. Banks and shores covered as far as the falls of Mata-Mata, about 100 m. above its mouth.

THAMES-DEWON, par. Eng. Surrey; 2655 ac. P. 2651.

THANA, a small town, K. Farquhar, on the route from Ia here to Cankay; lat. $35^{\circ} 26' N$; lon. $74^{\circ} 16' E$; with a large road. The town is embosomed in groves of walnut and mulberry trees. Most of the inhabitants are shawl-weavers.

THANET (Jamaica), an island, N. E. coast, about 10 miles, washed by the open sea on the N. E. and S. E., and separated from the mainland by branches of the Stour—the Stour-estuary on the S. E. The middle stream on the S. W., and the North-gate-estuary on the S. W., greatest length, 6 m. to N. Farnham Point, 10 m.; greatest breadth, about 5 m. It has a gently undulating surface, consisting for the most part of rich arable land resting on outcrops of dry hard chalk, and has long been celebrated for its excellent culture. Within the historical period, it has undergone great geological changes, produced chiefly by the action of the waves. Its channel, which is now, particularly on the N. W. side, almost completely closed, was, during the Roman possession of Britain where narrowest, at least 12 m., and in other parts more than 4 m. wide, so that it was the main thoroughfare used by vessels proceeding northwards for London; nor did it cease to become passable for ships of some burden till the time of the Norman conquest. The tide itself, which was at that time nearly circular, has been gradually wasted away, so as to assume the form of an irregular oval, and the wasting process is so incessantly continued that the average annual waste of the cliff between the N. Farnham and the Reculver, a distance of about 11 m., has been estimated at 2 ft. and that of the chalk-cliffs on the S., between Ramsgate and Pegwell Bay, at not less than 8 ft.

THANINGTON par Eng Kent 1219 ac. Pop. 885

THANN, a town, France, dep. Haut-Rhin, on the Thur, and on the railway from Strasbourg to Basel 28 m. S. S. W. Colmar. It stands at the foot of a hill crowned by the ruins of the old castle of Engelbourg, contains a magnificent Gothic church, with a spire of open work, 233 ft. high, and has manufactures of printed goods, hosiery, starch, and chemical products and several cotton-mills. Pop. 5615

THANHAUSEN, a market in Bavaria, circle Swabia, on the Mindel here crossed by a bridge, 90 m. W. S. W. Augsburg. It contains a parish church and a castle. Pop. 1580

THANADAT a town, Saxony, circle and 9 m. S. W. Dresden, N. of the forest of its name. It is the seat of a royal forest agency, and has a bathing-establishment and several mills. Pop. 1783.

THARSTON par Eng Norfolk 1563 ac. Pop. 874

THARTHAR, a river, Armenia Turkey pass Bagdad. Its general course is S. E., and S. by E., when it is lost in sands and marshes near to and N. W. Bagdad. Its waters are in some places intensely bitter and salt.

THAB (a) an island, European Turkey, Aegean Sea, 105 m. W. by N. Gallipoli; lat. $40^{\circ} 41' 42'' N$; lon. $24^{\circ} 45' 46'' E$ (a), of a circular form, about 16 m. diameter. It is traversed by high wooded hills, yielding large quantities of ship-timber, the highest summit attaining an elevation of 3428 ft. The soil is fertile, and where cultivated, produces corn, fruit, oil and wine. These also exports was, honey and fine marble. On the N. E. side there is a village, and a good roadstead with 12 to 5 fathoms water, called Panagia harbour.

THATCHAM, a village, par England, no Berks, on the Kennet, which is here navigable, and the Kennet and Avon canal, 3 m. S. E. Newbury. It has a church, two chapels of ease, an independent chapel, a national school and a paper-mill. Area of par. 12,259 ac. Pop. 4259.

THAU, a lagoon, France, dep. Morbihan, separated from the Gulf of Lyons by the narrow belt of land on which the town of Cotes is situated, greatest length, S. W. to N. E., 13 m.; greatest breadth, 4 m. It receives the canal du Midi at its S. W. extremity, is connected in the N. E. with the lagoon of Magnanville, and communicates directly with the sea of Cotes. It is of considerable navigable importance, and is both well stocked with fish, and frequented by innumerable water-fowl, which are sent in great numbers, above 800 boats being at various seasons sent on the lagoons at one time.

THAUMACO (a) a town, European Turkey, prov. Thessaly, and 65 m. S. E. W. Larissa, on a steep declivity, the summit of which is crowned by an ancient castle.

THAXTED, a small town, par England, co. Essex, 14 m. N. W. W. Chelmsford, composed mostly of mean-looking houses. It has a handsome church in a conspicuous situation

on the top of the hill on which the town is partly built. Various Dissenting places of worship, several schools, and two or three churches. There are two theatres, one for playing screw, half, &c., by hand-actors, the other for making up bars. Area of par. 6219 ac. Pop. 3555. (Local Geography.)

THAYA, a river, Austria, rises in the mountains on the frontiers of Bohemia and Moravia flows E., nearly parallel with the Danube, and joins it near March shortly after quitting the S. of Moravia, on the confines of Austria and Hungary after a course of 120 m. Its only important affluent is the Igawa, which joins it on the left. In the lower part of its course it spreads out into the plain, forming extensive swamps, which make the district through which it flows unhealthy.

THEBEN, or DIVER, a market town, Hungary co. and 5 m. from Presburg, at the confluence of the March with the Danube. It contains the ruins of an old castle and has some shipping. Pop. 1820.

THEBERTON, par Eng Suffolk 1954 ac. Pop. 591

THEBES, or TIVA, a town, Greece Lavade, cap. dist. on an isolated hill, 30 m. N. W. Athens. Though one of the most celebrated cities of ancient Greece, nothing now remains to indicate its splendour or even existence, except a few marble columns, scattered over the plain. The modern town is built chiefly of wood, and has few Greek churches and three khans. The plains in the vicinity once celebrated for their fertility are very imperfectly cultivated, but still produce considerable quantities of corn, wine, oil, tobacco, and cotton. Pop. about 5000

THEBES (Coptic, Tufi) a celebrated anc. city, Upper Egypt, 300 m. S. S. E. Cairo, on both sides, but chiefly on the S. bank of the Nile, along which the ruins extend for about 8 m. The original extent of the city is not well known.

Diodorus gives it only a circuit of 140 stadia, or about 17 m. whereas Strabo nearly doubles this measurement by making the length alone 80 stadia, or 10 m. The accounts however are not necessarily contradictory and have been plausibly reconciled by assuming that the writers refer to different periods—Diodorus to a period anterior to Manes, and Strabo to a period subsequent to that sovereign in whose reign Thebes attained its greatest magnitude and magnificence. The spot that Heliopolis, or Heliopolis, applied to by Homer has sometimes been interpreted literally and it has been supposed that the walls of the city were actually raised to 100 gates. More careful investigations have made the existence of the walls themselves more than doubtful. Certain it is, that not the least trace of them can now be discovered and various circumstances concur to show that the city was not walled but open. In the absence of a better explanation the suggestion of Diodorus may be adopted, that Homer's epithet, if not a mere poetical license, referred to the propriety of temples rather than to gates properly so called.

A good idea of the power, wealth and splendour of Thebes is given by the fact that it could furnish 50,000 armed chariots. Its foundation is lost in antiquity, but it had long been one of the most distinguished cities of Egypt, and attained to almost unexampled prosperity at a period considered coeval with the reigns of David and Solomon in Judea, when it began to suffer by the rise of its rival Memphis, and lost much of its importance by the transference of the seat of government to the latter. It sustained a still severer blow during the invasion of the Persians under Cambyses, who captured and pillaged it, and its destruction was completed by Ptolemy Lathyrus, who, after a three years' siege, left it a heap of ruins. These ruins, however, bear ample testimony to its original grandeur and scope of them, considering their antiquity and the usage to which they have been subjected, are still in wondrous preservation. The most ancient and splendid of these ruins is the temple of Karnak, which covered an area of about 1½ m. in circuit, and received its embellishments from a succession of monarchs, who vied with each other in the lavishness of their expenditure upon it. Its principal front, forming its N. W. side, faces the river and is approached by an avenue of Colossalness, which terminated at two colossal statues of granite standing like towers. One of these, though it has lost its summit and cornice, still retains a great part of its original height. Beyond the towers is a large open court, 339 ft. by 375 ft., with a double line of columns in its centre, and a covered corridor on either side; and beyond the court is the grand hall of assembly, 379 ft. by 170 ft., with

THERMIGNON, or **THERMIGNON**, a in France dep. Ardennes, prov. Marais, 35 m E. St. Jean-de-Mariennes. It is an industrial town, but has iron-works, and a trade in cattle, cheese, and general merchandise, conveyed by way of Mount Canto into Fismes. Pop. 1934.

THERMOPTOLÆ, a celebrated pass, Greece, in the N. E. of Livadia, S. side, Gulf of Molo or Zaton, at the foot of the N. slope of Mount Oeta, and near the mouth of the Eliza or Spercheus. The pass, about 5 m long, is hemmed in on one side by precipitous rocks of from 400 ft. to 600 ft. in height, and on the other side by the sea and an impassable cornice. The width of the pass was anciently only 50 to 60 yards, but has since been nearly doubled by the retreat of the sea, and additional alluvial deposits. It was here that Leonidas and his 300 Spartans died in defending Greece against the invasion of Xerxes. The Polyandrium, an ancient tumulus, with the remains of a square pedestal built of blocks of red marble breccia, marks the spot. The thermal or hot springs, to which the pass owes its name, are in the vicinity, about half way between Thermopylae and Volonitis. They have a temperature of 111°, and are impregnated with carbonic acid, lime, salt, and sulphur.

THERSAOLONICA, European Turkey. See **SALONICA**. **THERSAI**, a prov. European Turkey bounded, N. by Macedonia, W. Albania, E. Greece, and S. the Gulf of Salonica. It is 96 m in extreme length N. to S., and 70 m in breadth area, estimated at 5500 sq m. It is traversed by several mountain-ranges ramifications of Mount Pindus which separate it from Albania but contains numerous fertile plains and valleys, equally renewed in ancient times as now for pasture and tillage. Cultivation extends a considerable way along the acclivities of the mountains. The principal crops are maize, wheat, rice, vines, silk, cotton, and tobacco. The high-lying tracts depasture large flocks of sheep, and wool forms a considerable article of export. The province is drained by the Salambria, which traverses it nearly in the centre, E. to W., recovering in its course, as tributaries, nearly every river in the province. Principal towns—Larissa, Trikala, Volo and Ambovala.

THETFOUR, a bar and market in England, partly in co. Suffolk, and partly in that of Norfolk, on both banks of the Ouse, here crossed by a handsome iron bridge, 79 m N. E. London, a station on the Norwich and Brandon rail way. It has a church with a square tower places of worship for Wesleyans, Independents, R. Catholics, and Friends, a free grammar and national and infant schools the remains of a Cistercian priory, of a university and some other religious structures. The manufactures comprise an iron-foundry, a large paper-mill, two agricultural-machine factories, some breweries, malting-establishments a flour-mill, and a tan yard. Pop. 4075.

THETFOUR, three pars. Eng. Norfolk.—1, (St. Mary 3960 ac. Pop. 1252.—2, (St. Andrew's, 260 ac. P. 1613 3, (St. Peter), 2240 ac. Pop. 1211.

THEUSING, **THUSING**, or **THUSING**, a in Bohemia, area and 15 m. S. E. Elbogen, with a castle, deanery church, townhouse, and hospital manufactures of woollens, and near a alum and vitriol works. Pop. 1904.

THIEX (anc. **Thetix**), a in and some Belgium prov. Liège, 1 km. E. of the city, 5 m. N. W. Spa. It is a mining place with the old ruins castle of Frankmont, seated on a steep rock. Thiex has manufactures of cloth and leather, two iron-works, and forges for making sheet-iron; a distillery, two breweries, quarries of freestone, limestone and black marble, and mines both of iron and calamine. It was once capital of a district called the margraviate of Frenchmont, and has ranked as a town since 1456. Pop. 4869.

THIAGUR, a in Hindostan, Carnatic, 53 m. W. S. W. Pondicherry; lat. 11° 43' N., lon. 79° 5' E. During the Carnatic wars of last century this was a strong place, and contained several ships.

THIAKA, one of the Ionian Islands. See **IONIA**.

THIAN-CHAI, or **CHANGHAI MOUNTAINS**, an extensive range of Central Asia, stretching from W. to E. along the W. part of its plateau, between Scythia on the N. and Chinese Turkestan on the S., from lon. 80° to 95° E. Its length is estimated by Humboldt at eight times that of the Pyrenees, and many of its summits rise to 16,000 ft., or 12,000 ft., far beyond the limits of perpetual snow. They

present numerous indications of volcanic agency. The Chinese records mention eruptions which occurred at least as late as the 17th century. One between the terms of **Tienan** and **Thian** about lat. 43° N. and lon. 91° E. is well attested; and another called **Unguiat**, situated in a coal-district, about lat. 45° 30' N. and lon. 85° E. is a solfatar, from which large quantities of sulphur and salt are obtained.

THIAN-CHAI-HAIOU, sometimes called **Lia** **Daeharia**. See **TONGKIAN** (Chinese).

THIBET a country Central Asia. See **TIBET**. **THIBET** and **THIBET**. See **TIBET**.

THIEBRODE, a vil and com. Belgium, prov. E. Flanders, on the Scheldt, 18 m. E. Ghent. It has four breweries, an oil and a flour mill. Pop. 1880.

THIELT two places, Belgium.—1, (anc. **Thietum**) A. in. prov. W. Flanders, 14 m. S. S. E. Bruges. It has a townhouse, surrounded by a Gothic tower, a college, a school of design, a musical society several boarding and primary schools, and benevolent institutions manufactures of cotton and linen goods, hats leather lace, cards, tobacco, glue, oil, soap and Francon blue a distillery breweries, ropewalks, leather-works, dye-works and blacksmiths and an important trade in cattle, and particularly in linen. Of the latter 80,000 pieces are annually sold in the weekly market. Thielt, supposed to take its name from **thia**, a lime-tree, had attained a high degree of prosperity by its woollen and linen manufactures when, in 1385 it was almost destroyed by fire. It never recovered the shock. Oliver Le Dain barber to Louis XI of France, by whom he was ennobled, surnamed the Devil, and ultimately hung for his crimes, was born here. Pop. 12,500.—2, A vil and com. prov. Brabant, on the Meuse, 24 m. E. N. E. Brussels. It has a brewery, a distillery, four flour mills and a trade in cattle and agricultural produce. P. 1636.

THIERACHE an ancient dist. France, which formed part of prov. Picardy and is now included in the N. of dep. Aisne. Game was its capital.

THIERACHERN, a vil and par. Switzerland, can. and 14 m. S. S. E. Bern, with a fine old church. Pop. 3835.

THIERS (anc. **Thierum** **Thierum**) a in France, dep. Puy-de-Dôme, on the crest and side of a hill washed by the Dore, 31 m. N. E. Clermont. It is situated six miles from the city, very striking appearance when viewed from a distance, but its houses, though solidly built, have low doors and narrow windows, which impart a mean and gloomy appearance and they are huddled together without any regularity, in steep, narrow winding streets. It has two ancient churches, and the remains of an old castle considerable manufactures of cutlery and ironmongery, woollen cloth, embroidery leather, and leather articles, ribbons, paper and playing cards, and a trade in millstones, left and carbon ware, and the above articles of manufacture. Pop. 8787.

THIEULAIN, a vil and com. Belgium, prov. Namur, 24 m. N. W. Mons, with two flour-mills, and a trade in corn, seeds, cattle and flax. Pop. 1184.

THIEUSIES, a vil and com. Belgium prov. Hainaut, 6 m. N. E. Mons, with manufactures of sherry, a brewery a distillery, a bark and two flour-mills. Pop. 1164.

THIMBLEBY, par. Eng. Lincoln 1770 ac. P. 492.

THIMISTERY, a in, and com. Belgium, prov. and c. E. Liège; with manufactures of cloth, worsted, bracks, a brewery and dye-works and a considerable trade in cheese. Pop. 3543.

THIONVILLE (anc. **Theodonis Villa**) a in France, dep. Moselle, on the Moselle river, 19 m. N. Metz. It stands on an almost perfect flat, is walled, and otherwise fortified, so as to rank as a fortress of the third class. It is generally well built, with spacious but irregular streets. It has a parish church barracks corn market, theatre, riding-school, colleges, and hospital manufactures of battery cannon and cherty leavies glass, and leather, a trade in corn, hemp and flax, and an annual fair of 15 days duration. Pop. 4026.

THIRKLEBY **THIRKLEBY**, par. Eng. York, 3577 ac. Pop. 554.

THIRNF, par. Eng. Norfolk, 650 ac. Pop. 305.

THIRSK, a bar, market town, and par. England, co. York (N. Riding), 28 m. N. W. of York city, on the York and Newcastle railway. It consists of the old and new towns, separated by a small stream called Cockhoe, over which are two substantial stone-bridges. It has a spacious market-place,

a baptisms church in the later English style, with a lofty unadorned tower; places of worship for Wesleyans, Independents, and Friends, several schools; and limited manufactures of coarse muslin and millinery and some mulling and tanning. Think needs a member to Parliament. Pop. (1891), 3319. Area of par., 3856 ac. Pop. 4704.

THINES, a vil. and com. Belgium, prov. Liège, 18 m. S.W. Huy, with two breweries, a malt-dust-quarry, saw-pits, and a trade in cattle, horses, wax, and hemp. P. 1851.

THINSELT, a vil. and com. Belgium, prov. and 144 m. S. Antwerp, with a church, townhouse, and primary school three breweries, a dyery mill-reducing several flour-mills, and handlooms for the weaving of linen fabrics. Pop. 1741.

THISTED, or **THISTAD**, a tn. Denmark, N. Jutland, cap. hall on the S.W. of the Vilde-dord, a branch of the Limfjord, 180 m. W. N. W. Copenhagen. It first received municipal privileges in 1574 from Frederick I. Its harbour only a winter-haven, admits vessels drawing 8 ft. The inhabitants live chiefly by agriculture, trade, and mauling. Pop. 2200.

THISTLETON, par. Eng. Rutland 1420 ac. Pop. 143.

THIVA, a tn. Greece. See **THANCA**.

THIVIERE, a tn. France, dep. Dordogne, 20 m. N. E. Périgueux. It is well situated but for the most part poorly built has manufactures of stone-ware, leather, paper and tiles, and a trade in corn wine, live cattle, and cheese, and several important cattle-markets. Pop. 1400.

THIZY, a tn. France, dep. Rhone, 50 m. N. W. Lyons with considerable manufactures of linen cotton, and calico. Pop. 1680.

TROCKINGTON, par. Eng. Northumberland; 6243 ac. Pop. 173.

THOGLI-CURRU, a salt-lake, Lodak, among the W. Himalayas, 15,500 ft. above sea-level, 60 m. S. E. Leh. It is about 3 m. long E. to W. and has swampy shores intensely saline and covered with saline plants, especially *Chenopodium*. From a water-curtain distinctly visible about 150 ft. above the present level of the water it appears to have covered a much larger space than at present, and to have been then fresh, as the whole of the surrounding plain consists of clay beds, containing prodigious numbers of fresh-water shells.

THOIRY, a vil. and com. France, dep. Savoie, 6 m. N. E. Chambéry on the side of Mount Margera, above the Dora. It has a parish church. Pop. 1354.

THOLEN, a tn. Holland, prov. Zealand 29 m. S. S. W. Rotterdam, on the island of Tholen, which is separated from the N. Holland coast by the Zuiderzee, a narrow arm of the Scheldt. It is an old, and was at one time an important place and possesses a harbour small townhouse, a large Protestant and a R. Catholic church, an orphan hospital, a musical society and several schools. The inhabitants are mostly fishermen, though there are ironworks, rope-works, and madder and corn mills. Tholen was formerly fortified but in 1846-7 the ramparts were converted into public walks. Pop. 1938.

THOLLENBEEK, a vil. and com. Belgium, prov. Brabant, on the Maros, about 19 m. S. W. Brussels with two breweries, a distillery, and numerous mills but the chief employment is weaving. Pop. 2523.

THOLLON, a vil. and com. France dep. Haute Savoie, prov. Chablais 39 m. N. E. N. E. Geneva, near S. shore of the Lake of Geneva. The inhabitants have a valuable fishery in the lake, and derive a considerable gain from the sale of rock crystals, many of which are found in the vicinity. P. 1316.

THOMAR, a tn. Portugal, prov. Beira-Alta, r. bank Nabia, 48 m. S. Coimbra. It is well built, and adorned with several churches, contains two parish churches, a college, hospital, and almshouse and has manufactures of silk, and a large cotton-mill driven by water. Near it are the ruins of Sahagun, supposed to have been founded by the Goths. P. 2768.

THOMAS (Fr.), an isl. W. coast, Africa, belonging to the Portuguese, in the Bay of Biafra. lat. (nautical) 0° 14' 42" N., lon. 6° 55' E. length, N. N. E. to S. S. W., 25 m. It appears to be entirely of volcanic formation, and is very mountainous, attaining in one of its central peaks the height of 7070 ft. The climate, especially in the valleys, is exceedingly hot and unhealthy. Vegetation is rank; the higher districts are well wooded, and the lower produce considerable

quantities of sugar, indigo, and cotton. Some small horned cattle and many sheep and goats are reared on the pastures, and wild swine are very abundant. The capital, which bears the same name, is situated on a tongue of land, and defended by a fort, and has a number of good houses, including three churches. The harbour is small but well sheltered. Pop. estimated at 15,000 to 20,000, most of them negro slaves.

THOMAS (Fr.), one of the Virgin Is., W. Indies, belonging to Denmark, 86 m. E. Porto-Rico Isl. (E. entrance to Fort Christian) 18° 20' 24" N.; lon. 64° 55' 45" W. (n.), greatest length, E. to W., 12 m. average breadth, about 8 m. area, 53 sq. m. It has a rugged and elevated surface, which attains its greatest height towards the centre, and descends sometimes gradually, but oftener abruptly to the shore. It was once well wooded, but the cutting down of the trees

has laid it open to the full force of the sun's rays, and it now suffers much from a deficiency of water. The soil being sandy and by no means fertile, the far greater part of the produce is unutilized. The area under crop is only about 2500 ac., of which nearly a half are planted with sugarcane. The whole island enjoys the privilege of a free harbor, and the trade is very extensive, St. Thomas being a depot of goods for many of the neighbouring islands. It has its central locality at the capital, Charlotte Amalie, which is annually visited by about 8000 vessels from Europe, N. and S. America, and the other W. India islands. In Europe the trade is chiefly with London, Liverpool, Glasgow, Havre, Bordeaux, Marseilles, Genoa, Lyons, Hamburg, Bremen, and Amsterdam. St. Thomas is a principal station of the W. India mail-steamers from Southampton, for which a large steam-packet leaves it every fortnight. Pop. estimated at 12,900.

THOMAS (Fr.) the **ARONA**, par. Eng. Cornwall; 1817 ac. Pop. 1008.

THOMASTOWN.—1 A market in and par. Ireland, co. and 10 m. S. S. W. Kilkenny 1 bank Noce, consisting of badly built brick and limestone houses, and a number of windmills. It has an Established church, a R. Catholic chapel, a courthouse, a national and a church of English school. Friars and handlooms were formerly manufactured here to some extent, but the branch of business has been of late discontinued. Pop. (n.), 1798. Area of par., 3043 ac. Pop. 3180.

—(Local Communities).—2. Par. Kilkenny, 555 ac. P. 97 **THOMASWALDAU** (ONZ and NUNZ), two nearly contiguous vils. Prussia, prov. Silesia, gov. Legnica, circle Dorsau, with a castle, two churches, innkeepers, and an oil, saw and other mills. Pop. 1350.

THOME or **THOMAS** (Fr.) a tn. Hindostan, Carnatic, near the seaboard, which here forms a small haven, about 6 m. S. Madras. It is of considerable extent, and contains a great number of churches belonging to a mixed race of Portuguese and natives, who produce the R. Catholics.

THOMIGSDORF, a vil. Bohemia, circle Chrudim; with a church school, and several mills. Pop. 1348.

THOMSON, par. Eng. Norfolk; 2880 ac. Pop. 406.

THONES, a tn. France dep. Haute Savoie, in the junction of three valleys, 30 m. N. K. Chambéry. It is built in the form of a triangle, and has a large public square, a handsome church, manufactures of agricultural implements and cherry-brandy a saw mill and several tanneries. P. 3480.

THONG (Ureza), a vil. and township, England, co. York (W Riding), on the Holm, and a branch of the Huddersfield and Sheffield railway, 6 m. S. Huddersfield. It is well built, has a handsome church with a tower, Independent and Methodist chapels, manufactures of woollen goods, and a mineral spring. The water of which resembles that of Harrogate. Pop. 2463.

THONIS (Fr.), a vil. Bielefeld, Prussia, gov. and 23 m. W Düsseldorf near the Rhine, with a church. P. 1838.

THONON a tn. France, dep. Haute Savoie, prov. Chambéry S. shore lake, and 19 m. N E the town of Geneva. It is a very ancient place, consisting of an upper and a lower town, both irregularly built; has a court of justice several churches, a handsome townhouse in the Italian style, manufactures of watchworks, and a trade in timber, corn, and wine. Amadeo IV., Duke of Savoy, was born here. Pop. 4425.

THOR (anc. Thuriis) a tn. France, dep. Vendée, 10 m. E. Angers, with an ancient church, and manufactures of saddles. Pop. 2027.

THORBA, or **THORBARNA** (Latin, Schœpols) a tn. Austria, Transylvania, cap. co. of its name, 1 bank Aranyos, 55 m. N W Hermannstadt. It is poorly built, has a Protestant, R. Catholic and Greek non-union church, a Franciscan monastery, county buildings, townhouse, gymnasium and military school and near it are extensive salt-mines. On a hill in the vicinity are the ruins of the Roman fort Balanus, and near it was fought a great battle, in which 14,000 men were killed the Danube. Pop. 8112.—The country bounded N. by Kienburg and Doboka, N. E. Galitsa and Moldavia, E. Czakler country, and S. Kolobierz and Lower Wassenburg, area, 1210 geo. sq. m. is traversed by lofty ridges of the Carpathians, belongs wholly to the basin of the Maros, which receives a considerable portion of its waters directly, and the remainder chiefly by the Görgény Lacus, and Aranyos. Much of the soil is of great fertility, producing all kinds of grain in abundance. The wine also is extensively cultivated, but the wine is only of indifferent quality. A considerable part of the surface is covered with forests, from which much valuable timber both for home use and export, is obtained. The principal mineral salt, which is worked in numerous mines and forms one of the principal sources of revenue. Pop. 67,400.

THORENS-BALIS, a tn. France, dep. Haute Savoie, prov. Geneva, 15 m. S. F. Geneva, with a court of justice, a college, a seminary, an old castle, formerly occupied by St. Francis de Sales, an hospital, manufactures of cotton or textile glass-works, and several tanneries. Pop. 2447.

THORSEBY two para. Eng. Lincoln.—1 (North) 2480 ac. Pop. 728.—2, (South) 993 ac. Pop. 166.

THORSEWAY, par. Eng. Lincoln. 2794 ac. P. 135.

THORPE (Barnes) See BARNESBOROUGH.

THORPE-SKIRBY-NORWICH a vil and par. England, co. Norfolk, 2 m. E. Norwich, on a hill above the W. station and Yare and on the Norwich and Yarmouth railway. It has a handsome parish church, with a square embattled tower and some good monuments a Dissenting chapel, a free school, and a county lunatic asylum. Area. 2528 ac. Pop. 3000.

THORSHINGTON, par Eng. Essex 1930 ac. P. 458
THORSHALLA, a tn. Sweden, in N. Nykoping, on the Ekstina, a little above its mouth on the S.W. shore of Lake Mälar, 57 m. W. Stockholm with a church and some trade. Pop. about 500.

THORSHAL N., in Friesland, S.E. coast, in Nieuw-Netherlands. It is the capital of the whole group and the residence of the principal authorities. It contains a church, a large school and an hospital. Its port, which is the most important in the group, is defended by a fort. Pop. 720.

THORVERTON, par Eng. Devon, 4036 ac. P. 1511
THOUANS (see Thouda) a tn. France, dep. Deux Seves, 48 m. N. Mort, on the Thouet. It is walled, and flanked with large towers, which, though now four centuries old, are still in good preservation. It contains an old castle seated on a rock of granite, which is surrounded on three sides by the river and thus more than 100 ft. above it has manufactures of druggs, woody, iron bars, and leather and a trade in corn, brandy, horses, mules, and cattle. P. 2327

THOUET or THOUD, a river, France, rises in dep. Deux Seves, flows first N.E., then almost due N., passing Parthenay and Thouars, enters dep. Maine-et-Loire, and joins the bank Loire at St. Hilaire, total course, 90 m. of which 15 m., commencing at Montreuil-Bellay, are navigable.

THOUIN BAY, Van Diemen's Land, Freymant's Peninsula, lat. 45° 10' S.

THOUBOUT (see Thorehout), a tn. Belgium, prov. W. Flanders, 11 m. S.W. Bruges. It has a handsome church, a convalescent home, a musical society, boarding and other schools, and several important establishments, namely distilleries of brandy, hats, leather, cordage, earthenware, salt, soap, tobacco, chisels and glass; a dye-works, and oil, flour

and malt mills. Near it are the ruins of the old castle of Wyndendale, the residences of the counts of Flanders. In the middle ages its trade was very extensive. Pop. 2996.

THOUAND ISLAND, a cluster of isls. N. America, in the St. Lawrence, a little below Lake Ontario, belonging partly to Great Britain and partly to the U. States, supposed to exceed 1500 in number, and stretching almost continuously along the river for nearly 90 m. They are generally covered with cedar and hemlock trees to the water's edge, and in the passages between them present much grand and beautiful scenery. On the British side, the largest islands are Grand and Howe and on the U. States, Carlton, Grubstone, and Wells.

THOYDON, three para. Eng. Essex.—1 (New) 2776 ac. Pop. 651.—2, (Garton) 8161 ac. Pop. 1287.—3, (Almton) 1500 ac. Pop. 194.

THRACE, or THRACIA a name which appears in very ancient times to have been applied generally to the almost unexplored countries in the E.E. of Europe, was afterwards employed more definitely to designate that portion of Turkey in Europe bounded N. by the Danube E. the Euxine or Black Sea; S. the Propontis or Sea of Marmora, and the Aegean Sea or Archipelago and W. the mountains separating it from Macedonia and Thessaly. At a later period it was used in a still more restricted sense, as nearly identical with Rumania proper or that part of Turkey lying between Bulgaria on the N. and the Archipelago on the S.

THRANDSTON, par Eng. Suffolk 1875 ac. P. 897

THRAPTON, a market tn. and par. England, co. and 22 m. N.E. by E. Northampton, on the Nene, here crossed by a bridge. It has a cruciform church, with a tower and spire and places of worship for Wesleyans and Baptists, three or four schools, several small charities and two friendly societies. The principal manufactures are whips and bobbin lace. Area of par. 990 ac. Pop. 1183.

THRECKINGHAM, par Eng. Lincoln 2270 ac. P. 180.
THREE HILLS ISLAND, in the S. Pacific, New Hebrides, about 50 m. S.E. Sandwich lat. 17° S. lon. 168° 19' E. It is about 12 m. in extent, and is remarkable for direct mountain, to which it owes its name. A dangerous reef extends about 5 m. W. by N., from its W. point.

THREE ISLES, Australia, N.E. coast, S.E. Cape Flattery lat. 18° S. lon. 145° 30' E. The principal one of the group, situated to the N. of an extensive reef, is 1 m. long composed of coral sand, the highest part not more than 12 ft. above high-water mark, with several groves of low trees, and is overtopped with tall sedge-like grass, the second is composed of a strip of heaped-up fragments of coral, separated from the reef by a belt of mangroves, the third is a mere clump of mangroves.—(Voyage of the Challenger.)

THREE KINGS, or MANAWA TARI, a group of isls. R. Pacific Ocean, N.W. of the N. Island of New Zealand, lat. 34° 15' S. lon. 172° 10' E. They are high enough to become visible in clear weather at the distance of 25 m., but have a barren aspect, and do not altogether extend over a space of about 8 m. each way. The E. island, which is the largest, is scarcely 1 m. long.

THREE RIVERS, a tn. Canada East, cap. district of Three Rivers, at the confluence of the rivers St. Maurice and St. Lawrence, 90 m. from Quebec, with which it is connected by electric telegraph, and on the line of the proposed railway thence to Montreal. It is one of the oldest towns in Canada, and was long stationary as regards manufactures or improvement, but recently it has become one of the most prosperous and improving places in the province—a change produced principally by the commencement of an extensive trade in lumber on the river St. Maurice and its tributaries, which had heretofore been neglected, and also by increased energy in the manufactures of ironware, for which the St. Maurice forges, about 11 m. distant from the town, have been always celebrated in Canada. Three Rivers is the residence of a R. Catholic bishop, whose diocese bears the same name; and contains a R. Catholic cathedral, a church of England, a Scotch kirk, and a Wesleyan chapel, an Ursuline convent, with a school attached, where over 300 young females are educated; two public and several private schools, a mechanics' institute, a Canadian institute, and a young men's improvement, and several other societies. It sends a member to the provincial parliament. Pop. (1856) 4686 (Jan. 1864) 6550.

THUILLERIE, a vil and com Belgium, prov Hainaut, on the Rhene, 24 m. E.S.E. Mone; with manufactures of soap and leather, a brewery a flour-mill and limestone and sandstone quarries. Pop. 1834.

THUIN, a tn and com. Belgium, prov Hainaut, 9 m. N.W. Charleroi, r bank Sambre. It is well built and clean has a handsome church, an almshouse, mutual society Latin college, and several primary schools, manufactures of wool len fabrics, leather coats, and charcoal, breweries, dye-works, and bleacheries, and an active trade in grain, cattle, wood, &c. Near it marble and iron are wrought, and for the smelting, &c., of the latter there are several blast-furnaces and other works. Pop. 5989.

THUIR, a tn France, dep. Pyrénées-Orientales, 9 m. S.W. Perpignan. It is surrounded by old walls, flanked with round-towers, is generally well built, and has a public square adorned with a fine marble-fountain, manufactures of leather paper and earthenware and a trade in wine, agricultural implements, and cattle. Pop. 2810.

THUIN a vil and com Belgium prov Hamant, 10 m. W. by R. Mone, on the railway thence to Valenciennes. The inhabitants are engaged in agriculture, rearing cattle, and in coal-mining. Pop. 2170.

THUM, a tn Saxony Kreis Zwettan 9 m. S Chemnitz with manufactures of leather, ribbons, and lace. Pop. 2095
THUN a tn Switzerland, can. and 16 m. S.E. Bern beautifully situated at the N.W. extremity of lake of its name, at the point where the Aar issues from it. It is surrounded with walls, and contains a number of handsome buildings, among others a townhouse, orphan hospital and a venerable

THE CASTLE, No. 2475. — From Geneva, looking up the Rhine.

looking church which stands on a height approached by a long flight of steps, and rises conspicuous, with its octagonal tower above all the other houses. Near the church is the ancient feudal castle of the counts of Kyburg, which has stood for seven centuries. Thun possesses several good schools and a library, and carries on a considerable trade, particularly in linen and cheese. Pop. (1850), 3473. — THE LAKE (German, Thunersee) is about 1254 ft. above sea-level, 10 m. long S.E. to

N.W., 2 m. broad, and about 720 ft. deep. As its S.E. extremity it receives the surplus waters of the Lake of Biel, by the Aar which again emerges from its N.W. extremity. Its other principal supply of water is received from the Rander which, after receiving the Simment, is conducted into the lake by an artificial channel, formed in 1714. The banks of the lake, near the town of Thun, are covered with villas and gardens. The N shore is precipitous, but not very interesting; the S.E. shore is magnificent, being terminated by two lofty mountains of remarkable appearance—the conical Niesen, and the Schönbühl so called from its curiosity projecting peak. There is a good deal of traffic on the lake. The navigation is safe, and a small steamer regularly plies upon it. It is well stocked with fish.

THILGARTON two para Eng — 1 Norfolk, 961 sq. Pop. 272 — 2 Wots 2770 sq. Pop. 886.

THURGAU [Valley of the Thur Latin, *Thurgovia* French *Thurgovie* Italian *Turgovia*] a can in the N.E. of Switzerland bounded, N by the Untere and Rhine, which separate it from Baden and am. Schaffhausen, W. cant. Schaffhausen and Zürich, S. St. Gall, and E. and S.E. the Lake of Constance, separating it from Baden, Württemberg, and Baden; greatest length E. to W. 29 m., greatest breadth, 30 m., area, 270 sq. m. capital Frauenfeld. The surface differs very much from that of most other Swiss cantons. There are no high mountains in it. Numerous smaller ridges intersect it in all directions and give great variety and often much beauty to its scenery. The loftiest summits nowhere rise more than 1000 ft. above the level of the Lake of Constance. The principal ridges, three in number, stretch generally in a N.E. direction, and divide the canton into three corresponding valleys—the central and largest of all traversed by the Thur, the F. sloping down from the interior toward the shores of the lake and the W. forming the valley of the Murg. The whole surface belongs to the basin of the Rhine, to which its waters are conveyed chiefly by the Thur and its affluents, and partly also, by the Lake of Constance including the Untersee. The climate in the S.W. near Rorschach on the coast of Zürich, is severe, but with this exception, is temperate. In geological structure, the canton belongs to the more recent gneissine-formations. The hills on both sides of the Thur and almost all their ramifications, consist for the most part of horizontal layers of boulders and gravel, fine-grained sandstone, and sandy clay. The sandstone is generally soft, and not well adapted for building purposes. In some districts a good limestone is found. Fossils of coal occur in several places, but in some which seldom exceed a few inches in thickness, and, in consequence, cannot be profitably worked. There are no other minerals deserving of notice. The soil, which is usually of a clayey nature, is of very indifferent fertility. The principal crop is spelt. After it comes wheat, rye, barley common oats, and especially potatoes. But the culture for which the canton seems best adapted is that of fruit and accordingly, not only in the gardens attached almost to all the houses are fruit-trees planted but large orchards are spread over the open country, and give it, particularly at the seasons of spring and autumn, a romantic

ably rich and pleasing appearance. In many places, also, the vine is successfully cultivated, and much wine of very good quality is produced. Wood, likewise, consisting of pine and beechwood, is abundant, and occupies about one-third of the whole surface; and grass, particularly meadow-land, is extremely plentiful. Of the latter, including both permanent and migratory birds, 85 species have been counted. Fish abound; the Lake of Constance alone containing 21 species, and the Ther 14. The manufactures consist chiefly of linen and hampes cloth, hosiery, ribbons, lace, muslin, buttons, and articles of coarseness. Trade, greatly facilitated by the Rhine and the Lake of Constance, is extensive, and includes, in addition to the above articles of manufacture, corn, wine, older dried fruit, and cattle. Rather more than three-fourths of the inhabitants are Protestants, and education is generally diffused. The doctors, consisting of the citizens of 25 years of age who possess about £10 in property, choose the grand council or legislature, which consists of 100 members, and is wholly renewed every two years by the annual retirement of a half. The executive is vested in a council of six, who hold office for six years. Two *Landmänner*, chosen annually, preside alternately for six months over each council. P. 66,519

THURINGERWALD, or **FORSTER** or **TURINER** a mountain-chain in the centre of Germany, commencing at the sources of the Werra and Schwarz, and stretching along the N. bank of the Werra, S.E. to N.W. as far as the mouth of the Kessel, near Eisenach, a distance of about 60 m. In the S.E. it is linked with the Frankenthal, and in the W. with a ramification of the Rhenish Alps. Its culminating points, situated to the N. of Zell, are the Beberg and the Schönbach, which have each a height of about 3265 ft. The mountains are composed chiefly of porphyry granite, and clay-slate and are well covered with wood, chiefly pine. The minerals include iron, copper, lead, cobalt, &c. The drainage is shared by tributaries of the Elbe, Main, and Werra.

THURINGIA (German *Markgrafschaft Thüringen*) an anc. margravate, Germany, situated between the Harz Mountains, the Elbe, the Thuringerwald, and the Werra. Its capital was Erfurt.

THUROCK, a co. Hungary, Hither Danube, bounded, N.W. by Transylvania, N.E. Arva, E. Lipitan, S.E. Szele, S. Bar, and S.W. Neutra area, 455 sq. m. It is generally mountainous, ramifications of the Carpathians traversing it in all directions. The principal streams are the Thurock, which flows through the county in a N. direction, and joins the Waag, forming part of its N. boundary. The principal grain-crop is bookwheat, but the far greater part of the land is fit only for pasture, or covered with wood. On the former great numbers of sheep and cattle are reared and from the latter much valuable timber is obtained. Considerable attention is paid to the dairy and to the rearing of bees. Game, both large and small, is abundant, and there are great numbers of wolves, bears, and foxes. The county is divided into four districts—Szent-Martony (the capital), Bistanya, Mosson, and Tóth Pécse. Pop. 45,115.

THURROCK, two pars. Eng. Essex—1 (Little) 1496 ac. Pop. 306—3 (Ward), 5607 ac. Pop. 754.

THURROCK (BAPT.), a small anc. market tn. and par. England, co. Essex, 1 m. N.W. Thaxted, 4 m. N.W. by W. Graveney, with a handsome cruciform church, in the Anglo-Norman style, two Dissenting chapels, several Sunday-schools, and an endowed charity-school, a small creek or harbour which receives boys, and other vessels as large as 800 tons, and a wooden pier 400 ft. long at which the London and Graveney steamers call several times a day. There is in the town a large brewery, and in the vicinity are extensive lime-quarries. Area of par. 1884 ac. Pop. 1713.

THURSO a burgh of burgh, seaport, and par. Scotland, co. Caithness, 20 m N.W. by W. Wick; lat. 58° 35' N; lon. 3° 31' W (N). It is agreeably situated on the shore of the bay of the same name, irregularly built but compact, particularly in the suburbs, some neat freestone-houses. It has an elegant Established church with a tower and spire 140 ft. high, a Free church, and chapel for Original Seceders, Baptists, and Independents, several schools, two public libraries, a reading and news-room and manufacture of linen and woollen cloths, and fishing-boats a tannery, and rope-work. The fisheries in the bay are extensive, and consist chiefly of haddock, cod, and lobster; and the salmon-fisheries around it are also valuable. The chief trade of the port is the exportation of grain, cattle, sheep, and other agricultural produce, also paving-stones, in the dressing of which many of the inhabitants are employed. On the W. side of Thurso Bay a pier is erected with a depth of 6 ft. at low water and 19 ft. at high-water spring-tides. Pop. (in 1850) 3908. Area of par., 22,040 ac. Pop. 5064.

THURSTASTON, par Eng. Cheshire, 2763 ac. P. 68.

THURSTON par Eng. Suffolk, 2200 ac. Pop. 759.

TIBENHAM, par. Eng. Norfolk 2286 ac. Pop. 777.

TIBER [Italian, *Tevere*, sans. *Tiberis*] a river, Italy, rises in the Apennines, par. Florence, Tuscany, flows first S. as a mountain-stream, then turning S. E. E., enters the Eugubian plain, flows S. E. E. traverses the city of Rome, shortly after quitting which, it flows S. W. and separating into two branches — the Fiumicino on the N. and the Fiumara on the S., forms the island called Tivoli Island, and falls into the Tyrrhenian Sea by two mouths. Its principal affluents are the Toppino, Nera, and Tevere on the left and the Nestore, Chiana, Arno, and Galera on the right bank. Its whole course is about 740 m., of which about 90 m., commencing at the confluence of the Nera, are navigable, but only with considerable precaution. Its water, always surcharged with a yellowish mud, is unwholesome, and its fish also are said to be of very indifferent quality.

TIBERIAS, or **TABARIA** a N. Palestine, peak and 82 m. E. by S. Acre, on the S. W. shore of the Lake Tiberias. It is enclosed landward by a strong wall, flanked with towers. It was partially ruined by an earthquake in 1837, and is now a dilapidated, filthy, and miserable place.

TIBERIAS, **TABARIA**, or **GHEZERAETH** (LAKE OF SEA OF), called also in Scripture the Sea of Galilee, in the N. of Palestine, 10 m. N. of the Dead Sea, and 654 ft. above its level. Length, N. to S., 14 m., central breadth 8 m. It is of an irregularly oval or rather crescent form, with its convexity towards the W. It occupies a basin, apparently of volcanic origin, 650 ft. below the level of the Mediterranean, and is surrounded by rugged and precipitous heights composed of limestone or basalt, which on the S. and E. shores rise abruptly from 800 ft. to 1000 ft., forming the abutments of the table-land of Galilee on the N. and the W. side terminates in the lofty plain N. of Mount Tabor. The water is deep and remarkable for its transparency, and the scenery, limited by many trevelling, is declared by Cicero to be finer than that of the English lakes, though perhaps inferior to Loch Lomond. It receives numerous small streams, but is fed chiefly by the Upper, and discharges itself into the Lower Jordan. It is well supplied with fish, and in early times was covered with fishing-boats, which gave employment to the inhabitants of its shores, but scarcely a single boat is now seen upon it. The hills which enclose it shelter it from general and long-continued storms, but it is frequently agitated by sudden gusts and squalls, and it appears to have been during occurrences of these that our Saviour's miraculous power in calming and walking on the stormy waves was displayed. These and many other scriptural associations make this lake one of the most interesting spots in the world.

TIBERTON, par. Eng. Hereford 1111 ac. Pop. 141.

TIBET, or **THIBET** [Latin, *Fus-ko-chin*, Snowy Region of the North; Chinese, *Tsang*, Hindoo, *Shtol* the name Tibet or Thibet being of Mahomedan origin] an extensive region, occupying all the S. portion of the great table-land of Central Asia, in its widest sense, extending between lat. 27° and 35° N., and lon. 78° and 101° E. bounded on the N. by the extensive Mongolian, and their continuation, which separate it from Chinese Tartaria, the heart of Gobi, and the

Koko-Nor (Blue Sea) territory; E. the Chinese provinces of Szechuan and Yunnan, S. the latter, the N. provinces of Burma, and the Himalayas, which separate it from Assam, Bhotan, Sikkim, Nepal, and the N. W. territories of British India W. the Himalayas, separating it from Cashmere and the Punjab, Kashmir, &c. Most part of the region so bounded, about 1800 m. in length W. to E., belongs to the Chinese Empire, but its extreme W. portion, called Little Tibet or Baidian, is included in the dominions of the Mahomedan empire of Cashmere. Ladak, adjoining this, is not under the Chinese rule its inhabitants recognizing only the spiritual authority of the Tald Lama; and Sihan or Sifu, bordering on China, is excluded by the Chinese from the jurisdiction of the Tibetan authorities. Tibet Proper thus limited, extends between lon. 78° and 90° E. and is divided into W. Tibet (interior or eastern), and Hon-Tsang (interior or western). Tibet: cap. of the former, Lassa, the residence of the Grand or Tald Lama, and the metropolis of the Buddhist religion; cap. of the latter, Chashe-lo-tun Bo, the seat of the Bantshin-Rambontshi.

Physical Geography — Tibet as a whole, is probably the most elevated country on the surface of the globe. Its plains average from 10,000 ft. to 11,000 ft. in height, and many of its mountains rise to more than twice that elevation. The latter generally extend in ranges parallel to those of the Himalayas, leaving between them numerous narrow valleys and deep ravines. In the E. however, the mountains run N. to S. including the upper courses of the rivers of Ultra-Gangetic India. Within the boundaries of Tibet rise nearly all the great rivers of S. and E. Asia, the Indus, Sutlej, Brahmaputra, Irrawadi, Salween, Monsoon, Mekong, Yang-tse-kiang, and Hoang-ho, besides the Gogra, and many other affluents of the Ganges. Lakes are numerous. The Tangri-Nor and Bonke-Nor are remarkable for their size, Lake Pailu surrounds like a ring a large island of its own shape. Manasarwar and Ravanshrade, near lat. 31° N., lon. 81° E., are regarded as sacred lakes, being situated nearly 15,000 ft. above the level of the sea. The great Kailash—the mythical Olympus of the Hindus, where the greatest rivers of India have their source. The principal passes connecting Tibet with India are the Ghang-Ghang (10,150 ft. in height) and the Niti Ghang (16,814 ft.), at both heads of the Ganges, the Dara Ghang (17,790 ft.), and the Mustang Pass from Nepal and a way at the head of the Konkri or Nantsoo river, between Nepal and Sikkim, to which ingress into Tibet from the S. is said to be easy. — *Geology* Several of these routes are practicable for horses.

Climate — The climate of Tibet is chiefly remarkable for its extreme dryness during most part of the year, and the clearness of the atmosphere. In the spring from March to May the weather is very variable, and thunder-storms, with occasional showers, are frequent. Near Lassa the trees bud in April. From June to September heavy rains are frequent, and swell the rivers which help to inundate the countries of S. Asia. But from October to March, so little moisture exists in the air that vegetation is all but wholly dried up. Monks and fish may be kept for all that period unchanged, and not injured by the cold, that Mr. Hue, in travelling from the Koko-Nor to Lassa, over one of the loftiest portions of Central Asia, states that he found acres of barley continually frozen, though kept close to his person under three garments of skins and one of woollen! — (*Scenes of Asia's Topography*, &c. 1846) Singular to say, however, the line of perpetual snow is considerably higher in Tibet than on the S. declivity of the Himalayan chain, a phenomenon supposed to be owing mainly to the radiation of the sun's heat from the icy plains. About lat. 31° N. the snow-line on the E. side of the Himalayas has been found not to reach below 16,828 ft. while on the S. slope (the Indian side) it descended to less than 13,000 ft. above the ocean, and it has since been discovered that the difference varies elsewhere between 20,000 ft. and 15,000 ft. Accordingly one kind of barley (*Ferodium Amuchensis*) is seen growing 14,700 ft. above the sea, and another species at a still greater elevation. Wheat succeeds well to 12,000 ft., herb-woods ascend to above 14,000 ft., and small bushes, which serve for fuel grow near lat. 31°, to 17,000 ft. above the sea, or nearly 1800 ft. higher than the limit of perpetual snow under the equator. Goats, pygmies, rhinoceros, opium-larks, leopards, hydropheas, and small-pox are amongst the most prevalent diseases. The barter of the Tibetans for

the hot-steam is excessive, and the benefits of vaccination being unknown, those afflicted with small-pox are commonly left exposed, and abandoned to their fate.

Natural Products.—Mr. Macgregor (that Tibet is at the same time the richest and the poorest country in the world—rich as regards its minerals, poor in all tending to the well-being of the people). The vegetable productions are very few. Little wheat, and much less rice is seen. At Dehli, indeed, near the W. frontier, cereals are said to be raised for exportation, but such a circumstance is rare in the country and can only take place in a very limited district. Some book where it cultivated, the potato has not been introduced. Black barley forms the basis of all Tibetan diet, and except it, and beans, turnips, radishes, white cabbage, fern, and nettle, which are used as culinary herbs, all vegetable products for food are brought from the countries on the S. or W. Union in a few sheltered valleys, as that of Lassa—where peaches and some other fruit trees flourish, and timber of unusual size (the Tibet is met with—wood of all kinds is very scarce and argol or the dung of animals pounded and mixed with earth, is the fuel chiefly used, and with which some materials are smelted. With this great paucity of vegetable products, it is very striking that animals, both wild and domestic, are numerous. Large drives of sheep and cattle exist in Tibet, especially in the E. part, where the herbage is richer than elsewhere. Sufas and the Koko-Nor territory are inhabited by nomadic and pastoral tribes, whose sole wealth is in their herds and flocks. The sheep are reared with care—driven northwards is an important article of food—and the skins, which are of great thickness, both constitute the clothing of the people, and are exported in considerable quantities to China.

The ibex (one species) is a large sheep, from 3 ft. to 5 ft. in height, from 5 ft. to 6 ft. in length, exclusive of the tail and, like all or most of the native quadrupeds of the land, covered with long hair or fur. It is the principal animal used as a beast of burden in the transit of merchandise across the Himalayas. The yak (the quadruped) furnishes excellent milk and butter. Its flesh is an important article of food, and its tall horns the elowry or fan in such general use in India. Large herds of wild oxen, of a formidable character, pasture alternately in the valleys and on the hills. The shaw-poot (Cervus Arctus) is an important source of national wealth, its woolly hair being used for the manufacture of the finest shawls, for which purpose large quantities of it are sent into Cashmere, together with hair of the yak, and of some breeds of dogs. This goat is of a small species, straight horned, and of various colours. Attempts have been made to naturalize it in other countries, but hitherto, as we believe, wholly without success, for the fineness of its coat declines where the cold is less excessive. The Tibetan horns in small spirited, and handsome and what are called wild mules have a well-shaped body and good carriage, though a large and ungainly head spoils their appearance. Tibet is the native country of the musk-deer and of the Cervus Sikkensis, a creature dwelling as mountainside the vapour of the American continent.—(See Asiatic Journal of Bengal, xix 468.) Several other kinds of deer, including wild goats, ibexes, hinds, hares, etc., are met with, as are numerous species of wild fowl and other birds; the tiger, elephant, and other formidable animals of the S. slope of the Himalayas are absent.

In mineral products Tibet is extremely rich. Gold is found in lumps, in veins, and in the sands of the rivers, W. of Lassa are several highly productive mines of this metal, and the quantity obtained, and used in gilding the temples and depositing in their treasuries as religious offerings, must be enormous. Government permits companies, engaging to pay in advance 500 lbs. of pure bullion to open mines; there are, however, many restrictions upon winning. At Ladang is a silver, at Kyrala an iron mine, and at Barlung mercury and native sulphur are found. In many spots there exists rock-salt in Lhasa and Gismalho, the latter local, so highly prized in China; and in Dromo, the turquoise.—(Guthrie, in *Enc. Jour.*, xi. 583.) Nearly all the lakes are brackish, and small, nitre, &c., in immense quantities, although as the soil is every where. The tribute to China is partly paid in bullion, but as the presents in return from the emperor to the Chinese surges in value for amount, a large quantity of gold finds its way back again to Tibet, the laborious caravans of which might be conveniently relieved by bills of exchange. The

reduction of iron and other ores is pursued domestically, even by the shepherds; but the scarcity of fuel is an insuperable obstacle to the progress of mining as well as manufacturing industry. Coal has not yet been discovered in Tibet.

Manufactures and Commerce.—The latest traveller in Tibet, M. Hue, reports that at Lassa, woollen cloths, turned pashas, immense-silk, formed of aromatic woods, and woollen parings, out of which the Tibetans uniformly take their meals, are made with acknowledged skill but that all the other manufactures are ill-conducted. The parings, one of which is always carried about the person, are of very various prices, and as much carelessly made as to be expended on them as on pipe bowls and tubes amongst tobacco-smokers in some other countries. Their character and quality are held to indicate the rank or taste of their possessors, and are a watch or jewellery worn in Europe. Moussour, who gives a detailed account of the method of weaving at Pit, in Little Tibet (*Travel*, 71-74) reports that very good silk is made from the hair of the yak. Greatest skill, 'The highest taste of the capital are good goldsmiths, and excel in the art of sculpture. Their idols are full of expression, and where- ever the grotesque and colossal form is not required by the tenets of their creed, the Tibetans imitate nature very well. They are moreover good jewellers. Their woollen manufactures have been full more than our cloth, and are in demand in China, and even introduced into India. The velvet made at the capital is celebrated for beauty of colour. In dyeing they excel; there is a peculiar gloss and freshness in their tunics. Their robes are exquisitely made, the robes are taken from the sacred river near Lassa, and are beautifully cut. Coral ornaments, &c., imported from India, are most carefully used and then again exported.—(*Journal of the Soc. As.* xi. 514.)

Tibet is a country of extensive trade, and has several marts of considerable importance. The principal trade is with China; this is conducted at Lassa, and at Singu, the city of the Chinese province Kham, from which place caravans, consisting of several hundred persons, go at fixed periods to the metropolis of Tibet with cattle, mules, horses, and camels, carrying tea, silver bullion, shawls or presentation scarves, broadens, and other silk goods, some cottons, fruits, tobacco, quinine, slippers, fur, porcelain and other Chinese produce, together with European cutlery and other manufactures; these goods are exchanged in Tibet for gold-dust, fine and coarse wools, wax-candles, incense, jade, tea, and Indian and European goods. The whole trade with China is estimated to amount in value to 3,000,000 taels (about 2700 000) yearly, and is said to be increasing. The caravans going from China into Tibet are often surprised and plundered by the holo or brigands, who invade the Koko-Nor territory and Sufas. A route exists through the latter country, from Lassa to the capital of the Chinese province Szechuen but it does not appear to be made use of for much trading intercourse. Chinese silk, musk, yak-tails, sable-fur, and gold are sent into Nepal in exchange for sugar and other natural produce, with manufactured goods from India. Booties, as well as Kham, derive all its imports from China by way of Tibet. From 2000 to 3000 Nepalese are said to be in Lassa as travellers and traders; and Miao states that the P-lo-mu or Bhotanas there, are the sole metallurgists, and also chemists and physicians. From Bhotan and Bhugal, Tibet receives piece-goods, tobacco, rice, indigo, paper, skins, mule-wood, opium, guns, &c.; from Assam, some rice, coarse silk, grass, and iron. Other imports from India come by way of Cashmere and of Lah (Ladakh) the trade with which is considerable at three large annual fairs. To Cashmere Tibet sends nearly all its shawl-wood, also bullion, tea, horses, rock-salt, turbanes, musk, goat and lamb skins, &c., in return the dried fruits, provisions, shawls, garments, silks, red wools, and Russian goods; some of which last are sent, Tibet from Chinese Turkestan, along with horses, wool, &c. Some of the *Kashmir* or *Mushroom* from Cashmere, who have settled in Tibet, make annual journeys to Calcutta, whence they bring back shawls, Jams, British shawls, shawls, some hardware, and cotton goods, but such is the fear and jealousy maintained by the Chinese authorities of their powerful British neighbours, that, except in the shipping season all intercourse between British India and Tibet is entirely shut out. Several English travellers, including Capt. General and Dr. Hooker, have been

approach on the highlands of the Himalayas at Chinese garrisons stationed, and proceeded from entering the Tibetan territory. The first Tibetan, who resided at Lassa for some years, was only able to penetrate it from the south by the circuitous route of Ladak, descended as a Mussulman trader, and favoured by his intimate knowledge of the Persian language. Except with the exception on the W. and N.W. the foreign trade of Tibet is mostly monopolized by the Chinese officials. The Mongols, in return for skins, wool, and live stock take back silks, porcelain, and tea. The commerce with the Chinese is of a singular nature, but on a more extensive scale. The capital is thrown in high bustle during the summer months, and much business is transacted within a short time. — (Gustaf) The country is rugged; it consists of silver fagots, and comes about the size of a shilling, with Persian, Indian or Tibetan inscriptions, and which are often broken in pieces of different fractional values.

People and Customs.—The Tibetans belong to the widely spread Mongolian family, and have a flattened face, elliptical jaws, small black eyes, a short nose, black hair, and little beard. They are of middle height, square built, and join much of the agility of the Chinese to the bodily vigour of the Tartars; gymnastic exercises and dancing are their favourite amusements. Their colour is in general somewhat swarthy, but amongst the upper classes are individuals as white as Europeans. In disposition they are reported to be mild, generous, and friendly religious, but less credulous and bigoted in matters of faith than the Tartars. Want of cleanliness is a common failing. Their diet consists chiefly of kumiss, or cakes made of barley, tea, with butter or milk, mutton, horse-flesh, and yak beef. Wheat bread is used only by the wealthy. Pork is sold in the capital, but it is dear. The peasantry are mostly clothed in sheep goat or jackal skins, and boots of great thickness. In the towns, woollens, chiefly of a red or yellow colour, replace the garments of skins, a wide robe, fastened at the right side and bound around the loins with a red girdle, boots of red or violet cloth, a blue cap, with a large border of black velvet, and a red ribbon, a bag of yellow stuff, for holding the porridge, and two garters, which, whether full or empty, are worn in the girdle, constitute the dress of the laity. The higher classes wear silks and cloaks lined with fur. They do not, like the Chinese, shave the head, and their hair is usually allowed to hang over the shoulders, but within the last few years Hun informs us that the darluis of Lassa have adopted the Chinese mode of wearing the hair in a queue, and adorning it with gold trinkets. In the left ear a gold ornament is often worn. The women wear a costume very like that of the men, with a short tunic under the robe, and the hair divided into two tresses. The lower classes adopt a yellow covering for the head, similar in shape to a cap of liberty for which females of the upper ranks substitute a kind of coronet, set off with pearls and jewellery. In accordance with a singular usage, most of them, when appearing in public, have the face smeared over with a black varnish, and those who must disfigure themselves in such a manner are held to be the most pious and correct in conduct. It is stated that this custom is the consequence of an order promulgated by a former ruler of Tibet, with the view of correcting public morals, and strange to say, it was immediately acquiesced in by the female population without a murmur. The women are not secluded as in Mahometan countries, but, as in China, they engage actively in commercial life, and all the stall-keepers and small shopkeepers are females. The practice of polyandry by which one woman becomes the wife of several brothers, is common in Tibet, as in Nepal and Bhotan though it is said to have been suppressed by the Chinese in certain districts.

A remarkable custom (though not peculiar to Tibet, since it prevails in most other parts of the Chinese Empire), is universal—the presentation of the bride. The bride is set alone within silk stuff of very fine texture, thrice as long as wide, and with a mystic sentence unwoven at both ends one is invariably exchanged at every visit of ceremony, is sent with every present, and accompanies every letter passing between persons in any rank of life, with the hearty good will that characterizes the act of shaking hands in Europe. M. Hue remarks:—It is impossible to explain to what an extent the people estimate the importance of the kumiss. Words or presents are deemed as nothing without it, the most insignificant

articles are embraced by it, and on the kumiss being offered, a favour cannot be refused without a breach of etiquette. The mode of salutation in Tibet is grotesque; it consists in moving the head, thrusting out the tongue, and something the right ear. The methods of salutation are various; the bodies of the sovereign lamas are preserved, by being dried and then enshrined; those of inferior lamas are commonly buried, and the ashes or portions of the body, such as a nail, hair, or tooth, are carefully inclosed in idols, which are sold by the presser to the devout at a high price. Burial is unknown. The bodies of the dead are exposed on heights, as is customary among the Persians or are committed to the rivers. Lastly is a mode said by Hue to be the most common of all, and certainly revolting enough to European notions, the corpse is cut into pieces, which are given to dogs, and in some instances sacred dogs are reared for the express purpose. Some other customs, however evince much more elevated feelings. In the city of Lassa, as Hue relates when the sun is about to set, the inhabitants meet in the principal quarters and public places, and chant hymns, joining in a solemn religious concert of a very impressive character. The practice of public meeting at sunset also prevails amongst the Persians of India, and it may be incidentally mentioned, that it is common in some parts of Switzerland, where, likewise, it assumes a religious character.

Arts, Sciences, and Lassa.—The great scarcity of fuel and of timber has prevented the Tibetans from excelling in architecture, and in others of the useful arts. At Lassa and elsewhere are certainly some magnificent and richly-ornamented stone-temples, and the houses there, built with terraces on the summit, are neatly whitened, and painted externally; but their interior is filthy as well as uncomfortable, the floor being only of stone or marble. In the W. the houses are built of pebbles cemented with clay or earth, many of the dwellings of the peasantry consist merely of woven stone, piled on each other without cement, and are like brick kilns in shape and a large number of the population live in caverns hewn in the mountainsides. Some suspension-bridges of iron and rope are laid across the rivers, but these are reported to be very inferior to similar works in China, an iron-bridge of 18 arches over a branch of the Yalu Chang-ho near (Chabé-lo-mé Hue), is the finest public work of its kind in Tibet, of which we have any account. The boats employed are commonly built of hides alone, and merchandise is conveyed by land wholly on the backs of domestic animals. Printing is an art in which the Tibetans make a more respectable figure than many other Asiatic nations most of the oldest libraries, or Buddhist monasteries have a printing-office attached, from which religious works are issued, and sold for the benefit of the establishment. Movable types are not employed, the books are printed with wooden blocks, and the leaves, which are separate, resembling a pack of cards, stamped on both sides, are held together between wooden covers. Manuscripts are well executed, the lamas write with hamp-oo-pens, on paper glazed with silk. The Tibetan sacred character bears a resemblance to the Sanscrit. It is read however, from left to right. The archimandrite figures in use are almost identical with the so-called Arabic numerals used by Europeans. The lamas have some knowledge of astronomy. Travelers found them acquainted with the signs of the zodiac, the altitudes of Jupiter, and the ring of Saturn. Their historical records are obscure in consequence of their indifference to precise dates, and a complicated chronology. Of their jurisprudence we have but an imperfect knowledge; their written laws are of high antiquity, their actual code is said to have been modified by the Chinese, since the political connection with China has existed. In Tibet, as in Mongolia, robbery and murder are severely punishable, but it would seem that retribution for offences is by no means certain. According to M. Hue, the individual who has been injured, or his immediate relatives must cite the criminal before the judicial authorities, or he goes unpunished.

The Buddhist Religion.—Tibet may be called the Popedom of Asia, it being the head, seat, and centre of the Buddhist religion, which numbers amongst its votaries by far the greater portion of the inhabitants of all the great table-land of Central and Eastern Asia, India beyond the Brahmaputra, Ceylon, China, Japan, Corea, Manchuria, and the S. part of the Russian Empire in Asia, together with a portion of the islands in Europe, the whole comprising certainly more than one

third of the entire human race. The country of Tibet is universally regarded as a sacred land by nearly all the Mongolian family of mankind, and it is resorted to in pilgrimage by vast numbers of devotees, whose offerings to the numerous priesthood compensate the Tibetans for the poverty of their land. It is believed that Buddhism and Brahminism, but two offshoots from a primitive religion which once prevailed over the whole of Asia beyond the Indus, and the heights of Pamir, but which became debased in Hindostan by the introduction of monstrous allegories, a polytheistic worship, and institutions, such as those of caste and relative degrees of purity, which were foreign to the original faith. Buddhism is considered in Tibet as the necessary independent Balm of the universe, and the beginning and end of all things. Like Krishna, he is worshipped under a triple form, and the Buddhists join with the Brahmans in acknowledging the four earliest incarnations or avatars of the same deity. Sakya, when they consider his fifth incarnation, as regarded by the Brahmans as the ninth avatar of Vishnu, the intermediate manifestations of which divinity are rejected by the Buddhists. Sakya is said to have been born at Kapile, in Oude, in the 6th century before Christ, and appears to have been a reformer of Brahminism, whose doctrines about B.C. 300 were actively spread by Asoka, a powerful king of Magadha in Hindostan, contemporary with Antiochus the Great. Gaya, the capital of Magadha, is accordingly viewed as holy by Buddhists, who occasionally resort to it in pilgrimage from across the Himalaya and in its vicinity is Buddha-Gaya, the supposed place of residence and apotheosis of Sakya, a gigantic image of whom, in the usual cross-legged sitting posture, is still extant there. From the time of Asoka, Buddhism extended rapidly in Hindostan. It appears to have reached Candamara about A.D. 241, Ceylon, quite early in the 4th century before Christ, and China, about A.D. 65. Nestor (Chinese Turkistan) received it in the 1st century of the Christian era, and Durand about A.D. 395. From Ceylon subsequently to the latter epoch, the faith of the new Buddha was conveyed into the other countries of Ultra-Gangetic India, where Sakya, or one of his followers, is worshipped under the names of Gautama, Saccana, Kauda, &c., but the Buddhists of those countries is of a degraded kind, and exhibits none of the intellectual superiority that characterizes it in Tibet, in which country, however, it is stated not to have been established till A.D. 267. In the 6th century A.D., a persecution of Buddhism began to be exercised on by the Chinese in Hindostan, and with such effect, that its extinction there is believed by some to have been complete by the end of the 7th century. It has even been asserted that there is now not a single native Buddhist in India, from the foot of the Himalaya to Cape Comorin, but a sect of Hindoos, termed the Ramilla-Vaishnavas, living in Gujarat, the Decan, and the Carnatic, worship the much avator of Vishnu, and the Jains, a pretty numerous sect of the population in W. India, entertain a faith and employ symbols closely allied to those of the Buddhists. The Buddhists, while they reject the multifarious pantheon of the Hindoos, admit an indefinite number of incarnations of Buddha, who is supposed to incarnate in successive the bodies of their chief kings or priests, and thus meet, the reproduction of time, the use of animal food, the practice of a contemplative life as the highest pursuit of humanity, and the belief of a final absorption into the deity, constitutes the chief points of difference between them and the followers of the Brahminical religion.

In the 14th century Buddhism in Central Asia was subjected to a new reformation. Tsong-Kaba, born in the Kokonor Territory about A.D. 1357, and having been instructed by Jams from the West, not far from Lams, where he announced his doctrines, and never to which he founded the great monastery of Kildan. The enormous, austere, and devotional exercises now prevailing in most of the monasteries of Tibet, the cross, mitre, shaven tonsure, two shoes, palmistry, exorcisms, omens, benediction by laying the hand on the head, chapel, architectural solemnity, martial retirement, worship of saints, feasts, processions, stanzas, holy-water &c., bearing so great a similarity to those of the R. Catholic church, are believed to have been introduced into the ritual and discipline of Tibetan Buddhism by Tsong-Kaba. It has been conjectured that the superstition which he had removed was swept away one of the R. Catholic priests, whom the new in-

tercourse between the W and E, after the conquest of Genghis-Khan and his successors, had invited to visit Central Asia. The fathers of the sect of Tsong-Kaba wear a yellow mitre; those adhering to the older ritual, the red, one of a red color, the latter prevail throughout the E. of Asia, while the reforms of Tsong-Kaba have triumphed in all the countries between the Himalaya, the Russian frontier, and the Wall of China. As respects the general character of the Buddhist religion, we shall here quote, without comment, the opinions of Mr. Malcolm, a Protestant missionary. 'It has no mythology of demons and fiendish deities, no augury or impure observances; no self-inflicted tortures; no tyrannical priesthood; no confounding of right and wrong, by making certain religious mendable in worship. In almost every respect it seems to be the best religion ever invented.'—(Trench, 322.)

The lamas of Tibet (lama, 'one who shows the way') form a very large proportion of the population, and reside in monasteries, many of which accommodate from 3000 to 4000 persons. In the single district of Lams, there are reported to be more than thirty great Buddhist establishments, each with nearly 15 000 lamas (7). They live there in separate apartments, and are supported partly from the revenues of the establishments to which they belong, and partly from their private resources. Many of inferior degree are compelled by poverty to engage in secular and menial duties, and some are even occupied in collecting argal or dung, and converting it into fuel for sale. The revenues of the monasteries are derived from lands, endowments of the Chinese sovereigns, and other eminent persons, and offerings of pilgrims, which last are formally announced after the daily prayers, and the proceeds are divided amongst the inmates in proportions corresponding to their rank. The place of each lama in his monastery is fixed by the number of sacred books he has acquired. The lamas are divided into four families—those of anytan, liturgy, medicine, and prayers, which last has the largest number of members, and is also stated to be the most esteemed. Those of the first-named family devote themselves to a life of contemplation, and are perpetually repeating the mystic sentence, *Aum nam padma, Aum*, which is inscribed on all temples, banners, kirtans, &c., and is believed to have a kind of talismanic power. The translation of this sentence is stated to be, 'O! the Jewel in the lotus Aum' and the first word is an invocation to Brahma, Vishnu, and Shiva, the last of the sacred letters of the Tibetan sacred character. Convents exist in Tibet for women as well as men and most families have some member belonging to the clergy.

The Grand or Tald Lama (properly Dalai lama) ['sea of wisdom'] who is at the head of the hierarchy, resides at the Buddha-La, a vast palace near Lams. He is deemed to be the principal living incarnation of Buddha and as such he receives actual worship. Like the Pope, in his temporal dominions, he is the sole religious and political head of the state, and he has nominally vested in him all the administrative and executive authority, with powers unaccounted for by any charter or writ, except those bestowed on him by the last time of Tsong-Kaba. When he dies, or in the Buddhist language *transmigrates*, he is sought for as animating some other living form, commonly the body of an infant who is an only child. Prayers and feasts are ordered in all the lamaseries; the lamas of the capital go in solemn procession around the Buddha-La, and the city of Lams, the same or mystic sentence is repeated night and day, perfumes are burned and meanwhile the chief authority devolves upon the *lamas*, or high colleges of lamas, whose collective sacerdotal dignity is not inferior to that of the Tald Lama himself. Those families who assume to believe that the deity is incarnated in the person of their infant, send notice of the same to the convent; this body chooses from amongst the number three children, who are brought to the capital. After other ceremonies, the names of the candidates are written on slips of paper which are placed in an urn, when the name first drawn out indicates the future Grand Lama, who is then treated in pomp around the capital, and installed for the rest of his life in the palace of Buddha-La. Some few benevolents attend the funeral of the Buddha-Kandashab, or lama of Chashab-sa-Bon. They are described by Capt. Turner, who, in 1858, visited that sovereign, or a mission from Calcutta, and was accordingly introduced to an infant 16 months old.—(See

TARNAK, Mission to Tibet. Timkovski, who, in the present century, went on an embassy from Russia to Peking, witnessed and describes the installation of a juvenile houboulon in Mongolia, in whose case similar and other expedients were adopted for ascertaining the true object to be elected, and verifying his divinity. All the houboulons, or spiritual governors of provinces, who receive their investiture from the Tald Lama, are, like him, believed to be incarnations of the deity, and the lamas who are heads of monasteries are also deemed to be living Buddhas. The chief of the supposed incarnations, next to the Tald Lama, are the Bantchen-Bambontshi, the Gulson-Tumba, the Tshang-kia-fu, or grand-master of the imperial court at Peking, and the Se-Doh-fu, whose peculiar function it is, by continual prayer, to prevent the melting of the snows on the Himalays, so as to avert a hostile invasion of Tibet from that quarter. The Bantchen-Bambontshi is scarcely inferior in sanctity to the Tald Lama, and it appears quite possible that a rivalry between his votaries and those of the latter may at some time produce serious reaction convulsions in Tibet. According to M. Hue, a widely spread notion prevails in A. Asia, that the next incarnation of the Bantchen-Bambontshi will take place, not in Tibet, but in Thian-shan-Paloo, in Chinese Turkestan. Prophecies are rife, that after alternate successes and defeats, his spiritual power, instead of that of the Tald Lama, will successively extend over China, Tartary, and the Russian Empire; and M. Hue remarks, that at no very distant date for the present Bantchen-Bambontshi is upwards of 60 years old; an enterprising adventurer in Turkestan, backed by an adequate number of partisans, might have only to assert confidently that he is the new incarnation to create a vast revolution throughout the Buddhist world. For further information concerning Buddhism see the *Asiatic Researches* passim, the *Asiatic Journal of Bengal*, vols. vi and vii; *American Asiatic Journal*, vol. i, the works of Tarnier, Klaproth, Timkovski, Hue, vol. II, &c. Gutzlaff in *Geog. Journ.*, vol. xi; and the *Chinese Repository*.

Government.—Although the supreme authority nominally rests with the Tald Lama, he is in reality supposed to be concerned wholly in divine contemplation and the civil government is exercised by the dalai or pomekhan, who is chosen from amongst the lamas and holds his office for life, or during the pleasure of the Chinese emperor. Under him are four halaks or ministers, not belonging to the sacerdotal tribe and who may rotate their offices for an unlimited period, unless dismissed by the Tald Lama. The two provinces of Tibet are subdivided into counties, each under the superintendence of a houboulon.

In each of the capitals is a Chinese governor with command over the military force. The total number of troops maintained by the Chinese government in Tibet has been stated at no more than 64,000, most of whom are cavalry, but in addition the Chinese authorities have power to sell in troops, ammunition, and supplies from the adjacent provinces Sechuan, between which and Lassa several detached garrisons are stationed. Near Lassa a large body of Mongolian horse is maintained, but the armed force kept within that city, and at Chakie-mu-See, is insignificant. Other principal posts for Chinese troops are at Tuckpoo, toward the Loos frontier. Phart, on the frontier of Sootan, a station of considerable strength, lately established at the head of the Kouki or Nuctone river, opposite Sukkim, several posts to check the incursions of the Gorkhas of Nepal at Gortopo, and some strong garrisons in the W. bordering the Lodak territory. The Chinese troops and mandarins are paid by the government at Peking; they commonly stay but three years in Tibet, unless on special permission from the emperor, and if they form matrimonial alliances there, on their return into China they almost uniformly leave their wives and families behind. In consequence of the rooted jealousy entertained of the Chinese by the Tibetans, they are prohibited from remaining in the country except in a military or official capacity. Hus says:—The Tibetans dread the Chinese, the Kachis despise them, and the Po-hou (Bhotanes) hate them. It appears pretty certain that should the authority of the Grand Lama and the somkhan in Tibet, the Chinese military governors maintain a general control; it is asserted, with much probability, that in every province, including the election of the chief lamas, the consent of the Emperor of China is necessary, and the Narvans of M. Hue

makes it clear that in 1646, he and his fellow-traveller were compelled to leave Tibet by the Chinese governor Kasha, in spite of the wishes of the Tibetan regent, who appears to have entertained no objection to their stay. The Kachis or Mussulmans who have immigrated from Cashmere and Beludistan and include the richest merchants of Lassa, &c., are subordinate to their own governor there, who is recognised by the Tibetan and Chinese authorities.

History.—No conqueror from the S. ever yet possessed himself of Tibet proper; Shah Jehangir, in 1640, attempted the conquest of How-tang; but the advance to Loh was disastrous, and his troops retraced their steps. Genghis-Khan brought Tibet under his rule, but he afterwards established the Tald Lama in the sovereignty; Timor also conquered the country but he interceded little in its internal regulations. The Tibetans remained, with few interruptions, subject to their own sovereigns till the time of the Chinese emperor Kang-he, whose emperors they finally acknowledged in 1727. Keen lang, about 1790, after successfully repelling an invasion of the Gorkhas, who had plundered Chakie-lum-Boo further extended the imperial rule in Tibet which the Chinese sovereigns have ever since with much solicitude preserved since their wielding the religious influence exercised by the Tald Lama over the Tartar and Mongolian tribes, is of such vital importance to them, that without it they could no longer hope to maintain their dominion in Central Asia.—(Humboldt, *Asia Centrale*, and *Asiatic Researches*, Gmelin, Lloyd, and Moorcroft, *Travels* Gutzlaff and Hooker in *Jour. Roy. Geo. Soc. Annals Journal of Bengal*, Htin, *Swedish Asia Voyages*, &c. in 1846.)

TIBET (LITTLE) a state. See BULGI. **TIBET** (MIDDLE), a region, Central Asia. See LADAW. **TIBI** a tn. Spain, Valencia, prov. and 18 m. N W. All counts with a church, courthouse, and prison, two elementary schools, manufactures of linen and paper and several oil and flour mills. Pop. 1571.

TIBOHINE par Ind. Rescomcom 44,098 ac. P. 15,718. **TIBORE**, a native state, Indian Archipelago, N coast, 24 fangsene, cucs & famed robber-nest.

TIBSHIELF, par Eng. Derby, 2280 ac. Pop. 806. **TIBURON**—1 An Isl. Gulf California lat. 29 N. lon 112 28' W. length 30 m. greatest breadth, 30 m.—2, A maritime in Hayti, 88 m W N W Cayes.

TIGAO, one of the Philippines Islands, off S point, lat. Luzon between it and lat. Makata lat. (N point) 12° 41' N. lon. 123 23' E. (N.) about 93 m long, by 7 m broad.

TICEHUES, a vil. and par England, co. Sussex, on the road from Tunbridge Wells to Hastings, 6 m S Lamberhurst. It has a parish church, two district churches Wesleyan and Baptist chapels, an agricultural association and a weekly corn-market. Area, 8903 ac. P. 2850.

TICHAU, or Tracrau a vil. Prussia, prov. Silesia, gov. and 60 m S. b. Oppeln with a church and a mill P. 2314.

TICHWA or TICHVIA a tn. Russia, gov. and 109 m. N E. N. verged on the Tikhvin, which is here navigable. It has three churches, a monastery and a monastery; tobacco and tallow-melting establishments, and a considerable trade in corn, salt, and brandy. In the vicinity is Stolbova, where peace was concluded between the Russians and Swedes in 1617. Pop. (1842) 5688.

TICLLO a canton and river of Switzerland. See TESSIN.

TICKENCOE par Eng. Rutland, 1256 ac. Pop. 98.

TICKENHAM, par Eng. Somerset 1037 ac. Pop. 434.

TICKHILL a market tn. and par England, co. York (W. Riding), 57 m S. York city in a fertile valley close to the York, with a handsome church, two Dissenting chapels; some mining and corn-mills, and a paper-manufactory. Near the town, to the S.E. are the remains of Tickhill castle, in which John of Gaunt resided. Area of par., 5614 ac. P. 3169.

TICKMACREYAN, par Ind. Andam., 20,507 ac. F. 5802.

TICKNALL, a vil. and par England, co. and 9 m. S. Derby. It has a modern parish church in the early English style, with a tower and handsome spire, and a beautiful window of stained glass. Baptist and Wesleyan chapels, two endowed schools, an hospital, manufactures of earthenware, and extensive lime-works. Area, 1867 ac. Pop. 1241.

TICONDEROGA, a vil. and township, U. States, New York. The village lies at the mouth of Lake George, 57 m. N Albany. At the distance of 7 m., on the shores of Lake

Champlain, are the interesting ruins of Fort Ticonderoga, celebrated during the French and revolutionary wars. P 2169

TICOO ISLANDS, W coast, Sumatra, three in number, small and woody about 14 in apart outermost is in lat 0° 25' N. lon 99° 50' E

TIGUA, a considerable vil Mexican Confederation, Yucatan 16 m S. by W 36 m. with a large and somber church, and connected with it by a spacious corridor, a gigantic convent, built entirely of stone, with massive walls, and 400 ft. in length. Tigua is distinguished amongst the villages of Yucatan by the number of its stone-houses by its superior society greater conveniences of living, its built-fights, and the beauty of its Mexican women. Pop. about 5000

TID-Ar a river Sweden, rises from the N. extremity of a lake on the frontiers of the Jönköping about 15 m N W the town of that name, flows N, then W expanding into Lake Oden then N W and after a winding course of nearly 80 m. falls into the E. shore of Lake Wener near Mariestad

TIDCOMBE, par Eng. Wils., 2331 ac. Pop. 918.

TIDENHAM a vil. and par England co. Gloucester, at the extremity of the peninsula formed by the Wyre and Severn 2 m. N. E. Chepstow. It has a church with a square tower a district chapel a Wesleyan chapel and two national schools. Several Danish and Roman encampments are still visible within the parish Area 9627 ac. Pop. 1753

TIDESWELL, a small market tn. and par England, co. and 35 m N W Derby houses generally of mean appearance. It has a fine cruciform church a Dissenting and a R. Catholic chapel and a free grammar-school. The chief branches of trade are cloth-weaving and mining. Area of par. 10,850 ac. Pop. 3411

TIDMAREH par Eng. Dorset 779 ac. Pop. 165

TIDMINGTON par Eng. Worcester 754 ac. P. 53

TIDORE, or **TIDOR**, one of the Tertiary islands Indian Archipelago W coast, Gilolo and N. from Ternate lat. 0° 40' N. lon 127° 35' E. (c.) It is about 31 m in circumference, of a round form, and composed entirely of a volcano, the sides of which are well wooded. It is well watered and populous and yields sugar cane-rice, bananas, &c. goats fowls, and some fish. The inhabitants are Mahometans, and have 25 mosques, all of very simple architecture. The sultan is tributary to the Dutch but at one time he was a powerful prince, holding under his sway all Gilolo and the islands to the coast of Tapan. The CAPITAL, also named Tidore lies on the E. coast, is surrounded by a wall and contains the sultan's residence, also a school and a large mosque

TIDWORTH, two par Eng. Wils. — 1 (North); 8069 ac. Pop. 385 — 2 (South), 2176 ac. Pop. 230

TIERRA LA VIEJA a tn and com. Spain, Old Castle prov. and about 24 m. from Valladolid, on a lofty hill. It has a parish church an old priory a conthouse a primary school, an hospital the remains of an ancient castle manufactures of linen and a considerable trade, partly general and partly in agricultural produce. Pop. 2000

TIEPENHOF a vil Saxony Westmar circle and S W Ezechon, on the Werra with a church, the works, and two mills. Near it are the ruins of the old castle of Kreyenberg. Pop. 1237

TIEFHARTMARKENDORF or **HARTENDORF** a vil Prussia, prov. Silesia, gov. and S W Legnitz. It contains a castle and a R. Catholic church and has manufactures of damask linens, and a saw and several other mills. P 1158

TIEGENHOF a market in W Prussia, gov. and 34 m S. E. Danzig on the Tige, with a handsome church, many features of linen and dye-works. Pop. 1747

TIFA, on Tanco, a tn Holland prov. Gelderland, 19 m. S W Arnhem r. bank West. It has a townhall, warehouse barracks, and storehouse a large open square called the Market, and five other market-places including pig, corn, cattle, and fish markets two Calvinistic churches, a Reformed and a R. Catholic church, town a charity-school and numerous other schools orphan hospital, deaf and dumb institution, natural history society, &c. It likewise possesses an ester and an ester harbour and carries on a considerable trade in grain, more especially cherries, in fowls grain, and potatoes. Pop. 4017

TIEL, **TIELLE**, or **TIELT**, a river, Switzerland, which carries the waters of the Lake of Neuchâtel into Lake Biel or Bièvre and thence into the Aar total course, and thence

of Lake Biel, 19 m. navigable throughout. The Orbe is likewise sometimes comprehended under this name.

TIEMBLEO (It.) a tn. Spain, Castile, prov. and 25 m from Avila with a church, a courthouse, a school, four-mills, and some transit trade. Pop. 1563

TIEN-PA, or **TIEN-PA** a city in port China, S. coast, prov. Cheung, lat. (estimated) 21° 24' N. lon. 111° 32' E. (c.) It is of considerable extent, and is walled round, but can be approached only in boats at high-water through creeks that intersect the extensive flat situated between it and the anchorage, which is rocky and secure. It is the principal place on the S. coast of China where salt is produced, and several hundred junks are employed in transporting it to Canton.

TIEN-PA, or **TIEN-PA** a city China. See **TIEN-PA**

TIENE or **TIENNA**, a market in kind of Italy, gov. Venetia, prov. and 12 m N W Vicenza with a court of justice, a church, numerous churches, manufactures of woollen and linen cloth and several silk-mills. Pop. 8800

TIERRA BOMBA an isl Caribbean Sea, N W coast, Venezuela, opposite the harbour of Carthagena

TIERRA DEL-FUEGO Land of Fire, Portuguese, **Terra-do-Fogo** French **Terra-de-Fogo**, German **Feuerland** a large group of islands at the S. extremity of S. America between lat. 52° 40' and 56° N. and lon. 58° 40' and 72° W. On the N. it is separated from the mainland of America by the long and intricate Strait of Magellan, while its other sides are washed by three great oceans—the Atlantic on the E. Pacific on the W. and Antarctic on the S. Besides numerous small islands, of which that of Cape Horn at its S. extremity may be mentioned as one of the most remarkable it consists of one very large island Eastern Tierra-del-Fuego or King Charles South Land, measuring E. to W., near its S. shore, 500 m., with a breadth N. to S. of 800 m. and of four much smaller but still very considerable islands—Navarino and Hecate on the S. separated from Eastern Tierra-del-Fuego by Beagle Channel and Clarence and Land of Desolation on the W. The whole of the islands are penetrated deeply by arms of the sea, which give them the most irregular shapes and are almost entirely composed of mountains of clay-slate, greenstone, and granite. These mountains are either covered with perpetual ice and snow—which has here its limit at about 4000 ft., while many of their summits exceed 5000 ft., and Mount Fitz-Rois on the R., supposed to be the culminating point, is estimated at 7000 ft.—or are clothed with stunted forests, chiefly of beech, growing out of a swampy soil, apparently almost the only kind of soil here and which, beyond 1000 ft. to 1500 ft. where the trees cease to grow, becomes covered with minute alpine plants. The term Land of Desolation, which Cook applied to the large W. island, is strictly applicable to the whole group and yet the scenery when mountain is seen rising behind mountains with deep intervening valleys, all covered by one thick, dusky mass of forest, is not without a degree of mysterious grandeur. At times, too, magnificent glaciers of a berry like blue, in fine contrast with the white expanse of snow are seen descending from the mountain-sides to the water's-edge. The climate is one of the most terrible which it is possible to imagine—mild rain, and snow accompanied by continued storms or violent and sudden gusts of wind, following each other in constant succession. Dublin, in the N. hemisphere, is nearly in the same latitude as Port Famine, near the centre of the Strait of Magellan in the S. hemisphere the former being in lat. 53° 21' N. and the latter in lat. 53° 55' S. Their respective climates are thus —

TIERRA DEL-FUEGO Land of Fire, Portuguese, **Terra-do-Fogo** French **Terra-de-Fogo**, German **Feuerland** a large group of islands at the S. extremity of S. The climate is one of the most terrible which it is possible to imagine—mild rain, and snow accompanied by continued storms or violent and sudden gusts of wind, following each other in constant succession. Dublin, in the N. hemisphere, is nearly in the same latitude as Port Famine, near the centre of the Strait of Magellan in the S. hemisphere the former being in lat. 53° 21' N. and the latter in lat. 53° 55' S. Their respective climates are thus —

	Summer Temperature.	Winter Temperature.	Influence of Sea-breeze and Wind.	Mean of Summer and Winter.
Dublin	55°-64°	38°-48°	50°-64°	46°-57°
Port Famine	50°-6°	28°-38°	35°-45°	41°-56°
Difference	5° 54'	10° 10'	15° 45'	5° 01'

This kind of climate, not more inhospitable to European feelings than ungenial to most European plants of warmer regions is far from being unfavourable to native vegetation; and hence in some places large woody-stemmed trees of fuselia and cordelia, which in England are treated as tender plants, were seen to full flower not far from the base of the mountains with two-thirds of its height covered with snow and with the temperature at 30° The only other vegetable production

particularly deserving of notice is a globular fungus of a bright yellow colour and the size of a small apple. It adheres in vast numbers to the bark of the heath-trees. When young it is elastic and turgid with moisture but after fertilization shrinking and growing tough, acquires a smalloothed and slightly sweet taste. In this state it is eaten by the natives uncooked, and forms a staple article of food, being with the addition of a few berries of dwarf-arbutus, the only vegetable of which they partake. Another remarkable vegetable product is the sea-weed called *Fucus goniatum*, which though not confined to this group, is here particularly abundant, forming great aquatic forests, and furnishing the hounds of innumerable shell fish, but for which the race of Fuegians could scarcely continue to exist. The zoology of the group is very scanty. Besides otters and phoxes, the only mammals are a bat, three species of mice, the fox, sea-otter, guanaco and deer. Birds, however, particularly sea-fowl, are numerous; and even humming-birds have been seen sipping the sweets of flowers after two or three days of constant rain, snow, and sleet during which the thermometer had been at the freezing-point. The natives of the N.E. part of Tierra-del-Fuego resemble the Patagonians in colour, stature, and clothing, those of the S.E. portion are low in stature, ill looking and badly-proportioned. Their colour is that of very old mahogany or rather between dark copper and bronze.

NATIVE OF TIERRA DEL FUEGO.—From Fitz-Roy's *Typhoon of the South*.

The trunk of the body is large in proportion to their compact and rather crooked limbs. Their rough, coarse, and extremely dirty black hair half hides yet brightens a villanous expression of the worst description of savage features. The women are short, about 4 ft. some inches with bodies also largely out of proportion to their height, and their features especially those of the old, are most repulsive. Their only clothing is a scanty covering of guanaco or seal skin. Their habits are extremely filthy, and their feeding gross and uncleanly, the most offensive substances being eaten in a state of putridity. They are, like many other savages, extraordinary mimics, imitating all sorts of sounds and motions with a marvellous and most amusing fidelity. Their huts are generally found built close to the shore, at the head of some small bay in a secluded spot, and sheltered from the prevailing winds. They are built of boughs or small trees stuck in the earth, and brought together at the top, where they are firmly bound by bark, sage, and twigs. The usual dimensions of these huts are 7 ft. or 8 ft. in diameter and about 4 ft. or 5 ft. in height. They have an oval hole to creep in at. The fire is built in a small excavation in the middle of the hut. The floor is of clay, which has the appearance of having been well kneaded.

Tierra-del-Fuego was discovered by Magalhães in 1520, and named 'Land of Fire' from the numerous fires he saw on its coast during the night.—(Detailed *South American Expedition*, *Typhoon of the Southern and Pacific*, *Sumner's* *Physical Geography Jour. Roy. Geog. Soc.* &c.)

TIFTAR, a river, Spitz, rises in New Castle, prov. Avila; flows S.W., enters Extramadura, and joins the Tago near Villaral-de-San-Christo. Total course, 90 m.

TIEZI, or **ATERNIO**, a river Brazil, rises in the Serra-de-Cubatã, prov. São-Paulo, about 80 m. from the sea. Flows N.W. very circuitously in a channel chiefly composed of granite, the rocks of which fill its bed, making its navigation both difficult and dangerous. After a course of about 600 m., it joins 1 bank Parana. Its only effluents of any consequence on the left is the Boracaba. On the right it receives the Capibari, Piraduba, Jacarepira-Mirim, Jacarepira-Açu, or Pipira. Boats proceeding from prov. São-Paulo to Mato-Grosso have to encounter in this river no fewer than 88 obstacles, two of which have each a perpendicular height of about 30 ft.

TIEZI a vil. and com. Isl. Berdulia, div. and 16 m. S.R.R. Beirut, in an unhealthy district. It has a trade in corn, cattle, and dairy produce. Pop. 2270.

TIERNO, or **BAYENAO** (Latin *Tyberis*) a river Naples, rises near Bajano, flows first E., then N.W., and falls into the Adriatic at the village of Campomarino, total course, 60 m. nowhere navigable.

TIFFIELD par. Eng. Northampton, 2550 sq. P. 154.

TIFFINE, a river, U. States, issues from a lake in state Michigan, enters Ohio, flows S., and joins the Maumee, 1 m. W. of Defiance. It is navigable 50 m. for small craft.

TIFLIS, the cap. of Georgia. See *TERRA*.

TIGER, an all. E. India, lat. 1° 45' S., lon. 143° 20' E. 1 m. long. E. to W. inhabited by ferocious savages.

TIGLIOLE, a vil. and com. Italy Piedmont, div. Ales sendra, prov. and 7 m. W. W. Ash. Towards the end of last century it was a dependency of the Papal States, and still contains the palace in which the Papal governor used to reside. It has a parish church, a communal school, and a charitable endowment. Pop. 2468.

TIGUAI h. a vil. and com. Italy Lombardy prov. and N. E. Brescia, on the heights which flank the side of the Lake of Garda. It has a parish and four auxiliary churches.

TIGUAI, a vil. and com. Italy Piedmont, div. Ales sendra, prov. and 7 m. W. W. Ash. Towards the end of last century it was a dependency of the Papal States, and still contains the palace in which the Papal governor used to reside. It has a parish church, a communal school, and a charitable endowment. Pop. 2468.

TIGNER, a vil. and com. Sardian Islands, div. Savoy, prov. Tarantaise, about 12 m. S.E. St. Marzio, 1 bank Isère. It is poorly built, but has a considerable trade in cattle, hides, and cheese. Pop. 1077.

TIGRE a dist. Abyssinia the limits of which are not well defined, in consequence of the changes of territory which are constantly taking place during the interminable wars of the petty chiefs who govern it and the adjoining district. At present it is understood to lie between lat. 12° and 15° 30' N., and lon. 37° 25' and 40° 15' E. It consists of an elevated plateau, forming the basis of mountain-ranges, some of whose summits, rising beyond the snow line are estimated at about 16,000 ft., and intersected by deep ravines and valleys, the largest of which is the bed of the Tacazzu. This river which receives all the drainage—except a portion in the N. which is received by the Mareb—enters the district in the S., and traverses it centrally first in a N. and then in a W. direction. The principal subtribes of Tigre, each of which appears to have its own chief, are Walake and Walake in the W. Wogara, Semien, and Sole in the S. Wodjrat, Adana, Agamia, and Seraw in the E. Bird in the N. and Tigre proper, Tembien, and Embaria towards the centre. The most powerful chief, who claims a kind of supremacy over the others, and partly exercises it, is the chief of Semien. The principal towns are Axum, Adowa, and Antalo.

TIGRE, or **PIREUSIA**, a river Ecuador, rises in the E. slope of the Andes, flows S.E., and after a course of about 300 m. joins 1 bank Amazon about 40 m. above the confluence of the Ucayali.

TIGRIS, a river, W. Asia, having its two principal sources in Central Armenia, both of which spring from the S. slope of the Anti-Taurus, near those of the Araxes and Euphrates, being only 15 m. S. from the latter. The general course of the river, though interrupted by numerous flexures, is S.E., passing Diarbekir, Mosul, and Bagdad, and joining the Euphrates at Korna; lat. 32° N.; lon. 47° 15' E.

about 100 m. from its embouchure in the Persian Gulf. At Bagdad the Tigris and Euphrates approach within 30 m. of each other, and hold a parallel course for about 80 m., when they diverge, and keep apart from 80 m. to 100 m., till they unite at Kurna. Below Diarbekir the river contains several islands. Its banks are thinly peopled, and the country about them is only partially cultivated; but the pasture-grounds are rich and well suited for the rearing of the nomadic tribes which come occasionally to the river from the neighbouring countries. From Mosul to Bagdad a distance of about 180 m., the Tigris may be considered as having an average width of 300 yards, with a current in March of 4½ m. per hour. For a portion of this distance, or about 24 m., the country is highly cultivated on both sides, but between that and Telukit all cultivation nearly ceases, and is but partially found between the latter place and Bagdad. Between Bagdad and Kurna the banks are steep, and overgrown for the most part with brushwood, the resort of lions and other wild animals. A considerable increase of the river takes place during the rains of November; subsequently it decreases, and swells irregularly at intervals. It attains its greatest height between the middle and the end of May, when its velocity is 7.25 ft. per second, and the discharge at Bagdad, in the same time, is about 164,105 cubic ft. After this time the river falls, with more or less regularity and inequality till the middle of June. The Tigris is navigable for rafts, at certain seasons, from Diarbekir to Mosul, a distance of about 296 m. Below the latter place it is more or less so throughout the year, and the descent to Bagdad is performed with great ease and speed. Large rafts, supported by 200 or even 300 inflated skins, are much in use for the transport of goods. During the flood-season the voyage is performed in three or four days, whereas at another time it requires fourteen days. (See *Journal of the Euphrates Expedition*, Rawlinson on the *Geography of the Lower Tigris*, *Journal of the Soc.*)

TIGRIS (Lettre) a branch of the Tigris. See **DIABEKIR**. **TIGRIS**, a vil. and town, on the Tigris, at a height in the W. of 60 ft. Below a church, a school, some manufactures of coarse linen, and some trade in corn and fruit. Pop. 2246.

TIGRIS, a vil. and town, on the Tigris, at a height in the W. of 60 ft. Below a church, a school, some manufactures of coarse linen, and some trade in corn and fruit. Pop. 2246.

appearance, lat. 18° 4' N. lon. 1° 45' W. It is in the form of a triangle, is surrounded by a wall about 8 m. in perimeter, and consists of a post-up mass of closely-packed buildings, mostly of clay and stone, with two stories high and often with beehive-shaped domes. Kano, a small town at the junction of the Niger with the Joliba or Niger, is considered its port, and is provided with a large artificial basin for the accommodation of boats, though the stream itself is so shallow as to be navigable on an average for not more than four months. The trade however, not so much by water as by caravans, for which Timbuctoo is the African central station, is a very important one, though less than that of Kano, the merchandise is superior in quality and of greater value. The town and district are governed by a sheikh, but the inhabitant, among whom many factions exist, are very mixed, consisting of the Senegal who form the great mass, Arabs of various tribes, Fellahs, and Taurica, with a small number of Senegals and Mandingoes. (Dr Barth's Letters, 1863)

TIMBERGOTTA, a to. Hindostan, N. Circars, 77 m. W by N Guntoor, lat. 16° 55' N, lon. 79° 25' E

TIMIMOUN, a to, N. Africa, Sahara, cap. dist. Gornac, oasis of Touat, lat. 27° 50' N, lon. 1° 40' E. It occupies a large space, consisting of 500 to 600 houses, separated from each other by gardens. It is surrounded by a loop-shaped wall of mud and ditch, and defended by a fortress seated on a height near its centre. It is one of the great centres of the traffic of the Sahara. Its principal offices are three mosques; it nominally belongs to the Emperor of Morocco, but has lately declared itself independent.

TIMOGUS, par. Irel. Queen's co. 2401 ac. Pop. 243

TIMOK (anc. Timocua) a river European Turkey forms part of the boundary between Bulgaria and Servia, and joins the Danube, 16 m. N. W. within after a N. E. course of about 100 m.

TIMOLEAGUE, a small is. and par. Ireland, co. and 21 m. S. W. Cork, on the S. side and near the head of the inlet running in from Courtinberry Bay. Sloops can approach the town, and lighters sail up the narrow tide river beyond it. Area of par. 2875 ac. Pop. 1000

TIMOLIN par. and in. Irel. Killarney 2390 ac. P. 1265.

TIMOOLE, par. Irel. Meath 1083 ac. Pop. 63

TIMOR, a large isl. Indian Archipelago separated on the W. from N. Dutch by Ombai Strait washed N. by the Banda Sea, and S. by the Indian Ocean. lat. (S. point) 10° 24' S. lon. 123° 35' E. (N. point) 11° 15' N. lon. 124° 35' E. It has a length of about 300 m., and a breadth of 40 m. It is tolerably regularly formed with several bays, and the N. E. and S. W. as mountains and in promontories. It is surrounded by banks and rocks; but has two safe harbours—Coamp on the S. the head-quarters of the Dutch, and Dell on the N. the chief place of the small portion still held by the Portuguese. In the N. is a lofty mountain (6000 ft.) and high mountains traverse the whole island. These hills are chiefly formed of limestone, with red shale in the lower parts, also clay-slate, granitic, slates, and porphyry; they are generally bare and rocky, destitute of timber and underwood, though in some places there are forests of considerable extent. Iron, gold and copper are found. Everywhere are traces of volcanic origin, and the whole island has frequently suffered from earthquakes. The streams are small, they mostly dry up in summer and their water is unwholesome being apt to produce diarrhoea. Various kinds of bamboo, maize, loddypalm, cotton, tobacco, sweet-potatoes, long, bread-fruits, pine-apples, melons, coconuts, eggs, mango, lemons, papaya, sandal-wood, &c. are among the most valuable vegetable products of this island, but the vegetation generally is poorer and less vigorous than that of the other islands of the archipelago, and many places are valueless and sterile. The domestic animals are buffaloes, oxen, horses, sheep, pigs and fowls; and in the woods are deer and a great many apes. Among birds, the rhinoceros-bird, the lorikee, and the cockatoo are to be remarked. The animals found on the N. W. side of the central mountain-chain resemble those of the rest of the archipelago, but those on the S. E. are strongly allied to the fauna of Australia. Near the river-mouths crocodiles abound, and on the stormy western kinds of turtles are found. Dangerous serpents and scorpions are numerous, and insects of the most various kind, and a sort of small bee are abundant. Pearl-oysters are obtained on the coast, on

the reefs, trepang is caught, and they yield besides coconuts, madrepore, &c. and above all a kind of coral called *laka*, much prized by the Japanese. The Timorese eat the young bees and the honey, but prepare the wax very ably and export it thus obtained on the K coast being the best. Agriculture is little attended to. The females, as in other parts of the archipelago, weave cloth in the forest, and the men engage in no sort of handicraft except the constructing of pines, the hammering of gold-plains, and the casting of rings and bells for decorating their houses. The natives are divided into the Timorese, inhabiting the W. part of the island, originally from Occum and subject to the Dutch the Balonesse, inhabiting the E. coast, originally from Gillofo, and subject to the Portuguese and the independent tribes of the interior. The natives are good marksmen and armed with sword and pistol, they hunt the wild buffaloes, horses, deer, and swine, but, though placed in the middle of the ocean, they neglect the fishing. Only prices are permitted to have more than one wife, for whom a price in gold or buffaloes is paid to the father. Small-pox visits the island every 10 or 12 years and depopulation is common. The trade, chiefly in the hands of Chinese, is carried on mostly through Coamp (see also) P. 200,000 (Van der Aa. Timorboek, Coamp-ed.)

TIMOR-LAUT one of the Timor Islands Indian Archipelago lat. (S. point) 8° 27' S. lon. 131° 7' E. It is about 65 m. long, by 25 m. to 30 m. broad. The natives have an infamous notoriety for treachery and cruelty.

TIMSBURY, two par. Eng.—1 Hunts, 1411 ac. Pop. 184 —2 Somerset 1148 ac. Pop. 1639

TIMWORTH par. Eng. Suffolk 1858 ac. Pop. 241

TINACORO or **VOLICARO** islands an uninhabited isl. S. Pacific, lat. 10° 23' N. lon. 165° 49' E. (N. point) It consists of a cone about 2000 ft. high falling towards the sea by a rapid slope. The lower portion about one-third, is covered with a luxuriant vegetation. The upper part is entirely barren. Smoke and flame have been seen issuing from its summit and on its S. W. side incandescent lava has been observed flowing down.

TINAJO, a to. (ancient, isl. Lanzarote). It contains chiefly of scattered houses, with a church and a primary school 1 op. 1844

TINCHERBAY (anc. *Tencherebren*), a to. France, dep. Orne, 45 m. N. W. Alençon with a court of commerce, a counting chamber of manufacturers and manufacturers of nails and ironware, kitchen-stoves, woollen and cotton stuffs, paper and leather. Under its walls, in 1116, Robert of Normandy was defeated by his brother Henry 1 op. 1916.

TINCLETON, par. Eng. Dorset 885 ac. Pop. 178

TINDARO, a promontory, N. coast of Sicily 4 m. N. E. Patti. A little S. E. of it is a church standing among the ruins of the ancient Tyndaris, the walls of which, as well as the theatre, can still be traced.

TINDELHILL, one of the mountain-groups of Norway between the hills Brattberg and Bukkord, lat. 65° N. lon. 6° E. connected with the Hardanger field on the N. W. and stretching S. E. for above 40 m. The loftiest summits are the Gonsels-feld, 6675 ft., and the Hammer-feld 5325 ft.

TINIO (anc. *Tinnio*) a to. Spain, Asturias prov. and about 32 m. W. S. W. Oviedo, on a mountain-slope above a bank Narcea with a church a handsome townhouse, many features of wooden and then goods, and flour-mills P. 1362

TING-CROO, two cities, China—1 Prov. Shantung cap. dep. on the Yellow Sea with a commodious harbour, lat. 37° 45' N. lon. 120° 50' E.—2 Fokien cap. dep. 140 m. N. W. Amoy

TING HAE, a to. China, prov. Chekiang, cap. of ul. Chu men on the S. side of the island about 3 m. from the beach, lat. (Joss-house Hill) 30° 0' 24' N. lon. 123° 6' 24' E. It is of an irregular pentagonal form with a surrounding wall 5 m. in circuit, having four gates. One-third of the space enclosed has no habitation. The wall is 18 ft. high, and 15 ft. thick surmounted by a parapet 14 ft. 8 in. high, and 2 ft. wide. A canal 32 ft. wide and 8 ft. deep nearly encloses the city, and enters it near the S. gate. Several canals traverse the city, and are a real nuisance. The chief street runs direct between the N. and S. gates, the others are more lateral. With exception of two temples, dedicated to ancestors and to the grandfather of the city, the buildings are of an inferior description those inhabited by the lower classes being mere hovels. Some

carving and cabinet-making are carried on, and there is a considerable trade. The city was founded and taken possession of by the British on the 5th July 1844, and a census taken in September same year. Pop. (1840), 25,000 to 30,000, (1846), 35,000.

TINGAN, a *tu*. China, lat. Hainan, cap. dist., *r* bank Lamon-king, about 30 m. S. Kiong-shou. It is large, surrounded by walls, and has straight and well-paved streets.

TINGEWICK *par* Eng. Buckingham. 2790 *sq*. *P* 877

TINGRETH, *par* Eng. Bedford 946 *sq*. *P* 106.

TINGWALL, *par* Wexham, and WREDSALL, *par* Scot. Shetland 27 *sq*. *P* 2574.

TINHOA, a *tu*. China Sea, lat. 18° 40' N. lon. 110° 20' E. formed by two hills extending N and S, separated by a low gap, or narrow neck of land, overgrown at spring-tides with steep cliffs fringing the sea. Good shelter may be found on the W side against all winds, excepting the S. or S W about 15 m. N.N.E. is a small island of middling height, called *Fales Tinhoa*.

TINIAN or *Bona Vista* one of the Ladrone isle. lat. 14° 58' N. lon. 150° 37' E. *P* 1, 9 m. long and 4½ m. broad celebrated for its fertility, and the number of its cattle. When visited by Freycinet in 1819, it had only 20 inhabitants.

TINISCHT, or *TINISCHT*, a *tu*. Bohemia, circle and 17 m. R.S.E. Königgrätz, *r* bank Adler, with a church, townhouse, school some manufactures of linen, a saw and other mills. *P* 1688

TINNEVELLY, a district, British India, S extremity of the Indian peninsula, presid. Madras lat. 8° to 10° N., lon. 77° to 78° 30' E. bounded, N by the dist. Madras, E and S by the Gulf of Manar and W by a wooded range of hills separating it from Travancore area 5700 *sq* m. The surface is mostly level or interspersed with hills of no great elevation. On the banks of the Tatticoor, Vijayar, and other rivers, are many paddy-fields, and other tracts well furnished with tanks, yield large quantities of rice. Cotton is produced to the lowlands, and dry grass in the uplands, which are pretty well-cultivated. In the S. the country is more sandy and bare than elsewhere, and abounds with palm groves in the E. are several water-tanks and salt marshes. The climate is more equable than might have been expected from the latitude, men seldom here during both winters, and some respectable passes in the W. are almost cut across, while the rest of the E. coast of India is perched with heat. In the Arun gale Pass which presents highly picturesque scenery is hostellum, a sanatorium greatly resorted to by invalid Europeans of the presidency. Before Ceylon belonged to the British successful attempts were made to establish cinnamon and other spice plantations in the district, but these are now mostly abandoned. Nitre is exported and some cottons, muslin fabrics, silks and ironwares are manufactured, chiefly at Palamcottai, the head military station. Tinnevely is associated under the native village system, and its inhabitants appear to be more prosperous than in some of the neighbouring parts of India. Most of the people are Hindoos, who preserve their customs in great purity, Mahomedans are few. Along the coast, from Tatticoor to Cape Comorin, are numerous fishing-villages, inhabited by E. Catholics. Chief towns—Tinnevely Palamcottai, Shermadev, and Manauar

TINNEVELLY the capital, and residence of the district judge and collector 50 m. N.N.E. Cape Comorin and nearly adjoining Palamcottai on the W side, borders a branch of the Tatticoor river on the E. It is large, populous, and surrounded on three sides by paddy-fields, and on the W by a dry and rocky height. *Pop.* (dist.) 1,068,423. (*Parl. Reg.*, 1832, *Madras New Almanac*, 1859) *ac.*

TINNYE, a *tu*. Hungary, co. and M W 10th with a Protestant and E. Catholic church. *P* 1521

TINOS (*ann. Tinos*) an is. Læssan Archipelago one of the Cyclades, immediately S.E. Andros, from which it is separated by a narrow channel called the Boeco-Floio, greatest length, N.W. to S.E. about 15 m., mean breadth, 5 m. It is one of the most agreeable and fertile of the Cyclades, is well watered by springs, has an excellent climate, and produces much barley, silk, wine, figs, oranges, and honey. The domestic animals are numerous, and consist of cattle, mules, asses, sheep, and goats. The mountains furnish fine marble of various colours, and silver mines were once worked to some extent. The manufactures consist chiefly of silk stockings

and gloves; and the trade in wine, oil, and brandy is extensive. The inhabitants are very industrious, but extremely superstitious. They have had a Greek metropolis, and a E. Catholic bishop; and since 1830, have held a cathedral to which numerous pilgrimages are made. *Pop.* 25,000.

TINTAGEL, *par* Eng. Cornwall; 4850 *ac.* *P* 1064.

TINTERN, *par* Irel. Wexford; 6888 *ac.* *P* 2163.

TINTERN-PARVA *par* Eng. Monmouth 337 *ac.* *P* 870

TINTIGNY, a *tu* and com. Belgium, *par* Luxembourg, 16 m. W Arlon; with manufactures of earthenware, a flour-mill, and tinsmiths. *P* 1866.

TINTO (*ann. Tinto*) a river Spain, Andalusia, rises in prov. Huelva flows S.E. and S.W., and falls into the Atlantic between Enliva and Palos; total course, 63 m. It derives its name Tinto from the green colour imparted to one of its head-streams by the copper-mines which it drains.

TINTO, or *ILACOK* a river Central America, which rises in a mountainous district, flows N.N.E. and falls into the Bay of Honduras. Its course, through regions almost entirely occupied by unexplored Indians, has been very imperfectly explored, but is supposed to exceed 180 m.

TINTWISTLE a *tu* and township, Northamptonshire, on an acclivity above the Ebury, where is E.S.E. Manaster with a church in the early English style, surrounded by a tower Independent and Calvinistic Methodist chapels, manufactures of cotton and woolen goods, stone-quarries, and two annual fairs. *P* 3037

TINWALD and *TRAILLALL* *par* Scot. Dumfriesshire; 6 m. by 4 m. *P* 1060.

TINWELL, *par* Eng. Rutland 1651 *ac.* *P* 287

TIOREN an is. in the Baltic, off W coast, Sweden, in Gottenburg, S. of Orust, and about 4 m. N. Morstern, greatest length about 9 m. greatest breadth, 3 m. It is very irregular in shape, and deeply indented by numerous creeks, two of which nearly cut across it, and are only separated by a narrow isthmus. It has some good natural harbours.

TIOGA a river, U. States, rises in the Alleghany Mountains, on N. frontiers of Pennsylvania, enters the state of New York flows E.S.E. re-enters Pennsylvania, and after a course of 90 m. of which 60 m. of which is navigable by barges, joins *r* bank Susquehanna.

TIORE, a *tu*. Tyrol circle Vorarberg, cap. dist. on the Saravus court of justice and a deanery church. *P* 1000

TIOYOE an is. off N.W. coast, Norway lat. 65° 60' N., lon. 13° 40' E. Unlike most of the islands in the vicinity its surface is almost unembellished with rocks, and forms truly a plain in striking contrast with the lofty precipices which rise at a short distance from it. It has a fertile soil, a parish church, and a fine manor-house.

TIPERAH (and *BULDOAB*), a dist. or collectorate, Hindoostan, in the S. part of presid. Bengal, lat. 23° to 24° 30' N. lon. 90° to 92° E. bounded, W by the Brainspoo, separating it from the dist. of Decca; S. Chittagong, N. Sylhet and Myrannagah and E. by a Khyan hill-country formerly tributary to the Burmese area, 4850 *sq* m. It is watered by the Goomtee and other streams, all of which have more or less a W course. Forests are extensive, and are inhabited by elephants of very large size. Principal products are rice, cotton, and betel-nut. Cotton goods were formerly made here in large quantities for exportation, but the manufacture has declined. Salt is made in the S., where the district touches the Bay of Bengal (Palamcottai town)—Cassilab and Odipour. This district was acquired by the British in 1768. *Pop.* 468,960. (*Bengal and Agra Gaz.* 1841 *Rep. Tyngton Ser. of India*, 1861) *ac.*

TIPITAPA, a river Central America, state Nicaragua, connecting Lake Leon with the Lake of Nicaragua. A vil- lage of the same name lies on its *r* bank.

TIPPER, *par* Irel. Kildare; 3288 *ac.* *P* 546

TIPPERARY an island co. Ireland, prov. Munster, bounded, N by Galway and King's co. E by King's, Queen's, and Kilkenny; S. Waterford; W. Cork; Limerick, Clare, and Galway; greatest length, N to S, 70 m.; breadth, 40 m. area, 1695 *sq* m., or 1,061,781 *ac.* of which 643,837 *ac.* are arable. The principal mountain-groups are the Knockma- down, in the S.W. part of the county, the Galtees, a short range between the Suir and the borders of Limerick; and the Keppel and Devil's Bit Mountains, forming a continuous range in the N. part of the county, and extending completely across

it from the Shannon to King's co. The Knockmolestown Mountains attain an elevation of 1700 ft. above sea-level, and the Galtees of 3000 ft., the latter are composed wholly of sandstone, and are in many parts, particularly on the N. side, extremely precipitous. The soil of the level country is a rich calcareous loam, of extraordinary fertility particularly in the tract called the Golden Vale, extending from Limerick to the confines of Kilkenny, and in another similar tract in the Ormond baronies. The soil is clay-late in the mountain-districts, and limestone in the more level portions, which form part of the great central plain of Ireland, and include some branches of the Boy of Allen. The mineral productions are coal, copper, and lead, and slates of a good quality are extensively raised near Killoe. Gravel was formerly and still is, the principal employment. The native Irish breed of long-horned cattle attain to a large size, and are found in the greatest perfection in this country. Dairies are numerous, affording an export of large quantities of butter. In 1851, when counted 55,110 ac. cats, 98,088 ac. barley, here, and rye, 22,764 ac., potatoes, 48,848 ac., and turnips, 80,303 ac. Flour and meal are extensively manufactured and exported. The woollen trade, which flourished in the 5th cent., is now almost entirely extinct. Tipperary is the most demoralised county in Ireland, and has long been disgraced by every sort of violence and outrage. It contains 12 baronies, and 168 parishes and returns two members to Parliament for the county. Principal towns—Coomel, Carrick-on-Suir, Nenagh, Thurles, Coshel, Tipperary, and Roscrea. Pop. (1841), 485,553; (1851), 351,487.

TIPPERARY, a market in Ireland, cap. above co., on a gentle slope towards the small river Arno, 98 m. S W Dublin, with which it is connected by railway. It consists of one principal and several smaller streets, all dirty and ill kept, houses of stone, but with few exceptions badly built and inconvenient. It has a handsome parish church a R Catholic chapel, and two Dissenting places of worship, a neat market-house, a savings bank, and an endowed and other two schools. The chief trade of the town is in butter, of which large quantities are sold in the season. Area of par. 4363 ac. Pop. 7601. Pop. (1841) 3577. —(Local Correspondent)

TIPPERKERRY, par. Incl. Kildare 3763 ac. P. 519
TIPPERON, or **TIPTON**, a vill. and par. England, co. Shropshire, on Staffordshire canal, 3 m. S E Dudley in the centre of a rich mining district. It has sprung up rapidly in recent times, and owes its prosperity to the numerous coal and iron works established in its vicinity. It has a parish and a dissenting church, and Independent, Baptist, Primitive Methodist, and Wesleyan Methodist chapels, and several national schools. Area of par. 3020 ac. Pop. 34,873

TIPUAN, a vil. Bolivia, near La Paz, on a stream of its own name. It consists of 180 houses, formed of the trunks of palm-trees, and is a dirty, unhealthy place. It rose in consequence of important mines in its vicinity, which being wrought out, the place has sunk into obscurity. —(Bull. Soc. Geo., 1853)

TIPUJINI a river, Ecuador, which rises about lat. 1° 30' S. lon. 76° 30' W. flows E., and joins r. bank Napo after a course of about 80 m.

TIRAJANA (San Bartolomé), or **TUTTE**, a m. in Camerun, in Gran Camerun, with a primary school, a church, and in the vicinity two hermitages, six flour-mills, and many flocks of palm-trunks, which, with olives and pine-tinches, are sold in Los Palmas. Pop. 3405

TIRAN, an isl. Red Sea, entrance to the Gulf of Akaba, the most W. of the Pirate Islands, surrounded with sandbanks.

TIRANA, or **TERRAZ**, a m. European Turkey, Albania, 128 m. N W Janina, with a fort outside the walls.

TIRANABRUGH, par. Incl. Galway 8088 ac. P. 719

TIRANO a m. Italy Lombardy prov. and 18 m. E by N Sondrio, cap. dist. in the Vallais, on the Adda. It is a handsome place with a number of elegant mansions, a superior court of justice, a magnificent park and an auxiliary church, a sanctuary of the Virgin which attracts numerous pilgrims, and a weekly market. Pop. 4398.

TIRAPOL, or **TIRAPOL**, a m. Russia, gov. Kherson, cap. circle, l. bank Dniester, in which there are here several finely wooded islands, 53 m. N W Odessa. It consists of regularly-built houses and straight and spacious streets with two churches, and some general trade. Pop. (1850), 5379

Vol. II

TIREBOLI, a seaport in Asiatic Turkey, prob. and 40 m. W Trebizond l. bank and at the mouth of the Kar-shoot or Tirkaboli-an, in the Black Sea lat. 41° 0' N., lon. 38° 50' E. It is unenclosed in wooded hills overlooking the sea, and has a ruined castle, several mosques, a bath, and a Greek church.

TREE, an isl. Scotland, co. Argyle, one of the Inner Hebrides, 15 m. W lat. Mull lat. (S. and N.) 56° 36' N. lon. 6° 57' W., about 13 m. long, and 3 m. to 6 m. broad. It is generally low and even, courts flat and sandy, soil various, for the greater part light and sandy in some places a tenacious clay in others a deep rich loam. Nearly in the centre of the island is a plain of upwards of 1500 ac., affording rich sown pastures. The rocks are generally of whinstone, granite, and primitive limestone. Marble, both white and of a variegated colour is found. There are two Established churches on the island a Free church, and several Dissenting places of worship. Pop. 8709

TREE and **Corra**, par. Scot. Argyle, 12 m. by 4 m. Pop. 5683.

TIREOCHIL, a m. Walachia, l. bank Schyl 145 m. W N Bucharest, on the road to Transylvania by the Valcea.

TIREOOTH, a dist. Hindoostan, presid. Bengal, prov. Behar, lat. 25° to 26° 40' N. lon. 85° to 87° E. stretching from Nepal on the N. to the Ganges in the S, and bounded W. by the dist. Saran, E. by Patna and S.E. by Bhagalpur, great length, 126 m., breadth, 80 m., area, 7400 sq. m. The Gumbuck forms a part of the W. boundary, and like all the other rivers, has a S. course to the Ganges. The surface is undulating, beautifully wooded, and in many places very picturesque; the climate is comparatively cool, and much more healthy to Europeans than to natives except in the jungles and swampy tracts termed the *terras*, on the Nepal frontier. This is one of the principal districts in India for the culture of indigo, rice, sugar, tobacco, maize, wheat, and other grains, cotton, and numerous fruits and other vegetable products, are raised, soda and nitre effluoresce on the soil in great quantities. About one-eighth only of the inhabitants are Mahomedans, the rest being chiefly Hindoos. Cotton, hempen, and woollen fabrics, combs, and pottery are manufactured. Principal towns—Montpurpoor (the capital) and Darbhanga. Pop. 2,400,000. —(Trigon. Survey of India, Bengal division, vol. 1, p. 1, 1841)

TIREOLO, a m. Naples, prov. Calabria Ultra l. dist. and N W Catanzaro, between the Corni and the Lamete with two parish churches and a convent.

TIRLEMONT (Tiernab, Thames, Latin, *Thema*) a m. Belgium, prov. Hainaut on the Grande Gette, and the railway from Louvain to Liège 20 m. E. Brussels. It is surrounded by walls, which are above 4 m. in circuit, but a large part of the space enclosed by them is occupied by gardens. It is entered by six gates and has generally well laid out streets, several squares, particularly that of the market, near the centre of the town in which are the townhouse, a modern edifice and the Gothic church of Notre Dame, founded in the end of the 13th century and rebuilt in the 15th century. On the top of a little hill stands the parish church of St. Germain, with a Romanesque tower. There are also an hospital and asylum for the aged, and excellent cavalry-barracks. Tirlemont possesses a college, an academy of design, an annual and private schools, a reading and a musical society, an orphic society and several religious confraternities; has manufactures of woollen stuffs and blankets, flannel and hosiery, felt, best-rope, sugar, soap, leather; also malt oil and flour mills, gin distilleries, and breweries, in which an esteemed white beer is made and a trade in corn, wool, harness, and wine, for which seven annual fairs are held. Pop. 8322

TIRLEY par. Eng. Gloucester 1850 ac. Pop. 536

TIRNOVA **TIRNOVA**, or **TEKNOVA**, a m. European Turkey Bulgaria, 76 m. W by S. Shumla, on the Jernia, enclosed by a wall. It has numerous mosques, churches, and synagogues, and is the see of a Greek bishop. Pop. 12,000.

TIRSCHENREUTH a m. Bavaria, Upper Palatinat, on the Nah, 34 m. E. Bayreuth, with a court of justice, three churches, and manufactures of woollen cloth. Pop. 3660.

TIRSI, or **ORUARDU** (ann. 2397), the largest river in isl. Rardun. It rises in riv. Benari, prov. Orléans, flows S.W., receiving numerous affluents, of which the largest is the Mezeril, and after a course of about 70 m., falls into the golf.

125

about 8 m. below the town of Orleans. It becomes formidable near its mouth in very dry seasons, but in winter often causes great damage by its inundations, from which large tracts are protected by means of expensive embankments.

TITTEL, or TITTEL, a vill. Hungary, co. Pest, at the confluence of the Tisza and the Danube, 23 m. E.S.E. Pest. It is the head-quarters of a Czarist battalion, and a steam-boat station; and has a R. Catholic and a Greek church, a German normal and a Greek school, an arsenal, and buildings. Pop. 1840.

TITSEKIN, par Irel. Cork, 1145 sq. Pop. 371.

TITICACA, a lake, S. America, on the S. frontier of Peru, and the N.W. frontier of Bolivia, in the centre of an alpine valley between two great southwards of the Andes; lat. 13° 15' to 16° 25' S.; and lon. 68° 40' to 70° W. greatest length, N.W. to S.E., 170 m.; greatest breadth about 70 m. area roughly estimated at about 4800 sq. m., height above sea-level, 12,850 ft. It is of very irregular shape, protruding far into the land in various directions, so as to form large bays, inclosed by projecting peninsulas. Two of these, towards the S., stretch so far across the lake, from opposite directions, as to leave only a very narrow channel, and thus divide it into two unequal portions, of which the N. is by far the larger

THE LAKE OF TITICACA.—From a sketch by Louis Agassiz, R.S.

It contains several islands, of which the largest bears its own name, and lies near the S.W. shore, almost close to a N. projection of one of the peninsulas now mentioned. It contains many ruins, and is celebrated in Peruvian history as the spot where Manco-Capac, the first Inca of the last Peruvian dynasty, miraculously appeared. The depth has not been accurately ascertained. No soundings deeper than 120 fathoms have been taken, but those were near the shore, it is believed that towards the centre the depth is much greater. The chief feeders of the lake are the Asangaro and Lagunillas, both of which enter it on the S. shore. The only outlet is the Desaguadero, which issues from its S. extremity and continues its course S.W. through the great alpine valley between the cordilleras.

TITILE par Eng. Hereford 1876 sq. Pop. 876.

TITILE, a mountain-range, Switzerland, con. of the Jura, on the frontiers of Uri and the Bernese Oberland. It is covered with glaciers, and attains the height of 11,414 ft. above sea-level.

TITO (It) a tn. Naples, prov. Basilicata, dist. and 7 m. S.W. Potenza, in a low and marshy situation with a very handsome church, and a convent. Pop. 4000.

TITSCHEIN (Nep.), a tn. Moravia, &c. KAUTSCHKE.

TITSEY par Eng. Surrey; 1996 sq. Pop. 154.

TITTLESHALL with GOSWICK, par. Eng. Northamp. 5364 sq. Pop. 618.

TITTMONING a tn. Upper Bavaria, cap. dist., on a height above 1. bank Isar, 55 m. N. Munich; with two churches, a chapel, a castle, a townhouse, and an inn. Pop. 1900.

TIUMEN, a tn. Asiatic Russia, gov. and 100 m. S.W. Tobolsk, cap. circle, at the confluence of the Tyumenka with the Tura. Though built almost entirely of wood, it is a handsome thriving place; and has extensive warehouses, several churches, a mosque, a Tartar school; a bazaar and market well supplied with tea, fish, clothing, and domestic utensils of all sorts. A little gold is obtained from the high banks of the river in the vicinity of the town. The inhabitants are chiefly Tartars. Pop. (1849), 14,337.

TIVERNO, or BERNASCO (anc. Tivernum), a river. Naples rises a little W. N.W. Benevento, prov. Benevento, flows first S. then turns N.E., and falls, after a course of about 60 m., into the Adriatic, 3 m. S.E.E. Termoli.

TIVERTON, a market tn. and man. and par. bur. England, co. Devon, pleasantly situated, 12 m. N. by E. Exeter, on a height, in an angle formed by the Exe and Lorman, the former of which receives the latter a little below, and is crossed by a handsome stone bridge, leading to a large suburb, called Weston, and on a branch of the Bristol and Exeter railway it consists of several well-formed streets and houses of respectable appearance; it is well paved, lighted, and supplied with water, and has a large and handsome parish church, with a lofty tower, an elegant chapel of ease, in the Grecian style; Independent, Baptist, and Wesleyan chapels, a free grammar, blue-coat, national British, and other schools; a spacious market-place, guildhall, assembly-rooms, theatre, and bridge, important manufactures of bobbin, forming the staple of the town; two weekly markets, five annual cattle and two general fairs. By the Tiverton branch of the Great Western canal, a good deal of coal and limestone, &c., is im-

ported. The borough of Tiverton is governed by a mayor, six aldermen and 15 councillors, and sends two members to Parliament. In the vicinity, on an eminence near the Eas, are the remains of an old castle. Area of par., 17 689 ac. Pop. 11 144.

TIVERTON, a vil and township, U States, Rhode Island, on the E passage of Narragansett Bay, and connected with Rhode Island by a long stone bridge, 13 m. S E by S Providence. It has extensive manufactures, chiefly of molasses, casimere, tweeds, thread, and coarser yarn. Some vessels engaged in the fisheries, and a considerable coasting trade. Pop. 4699.

TIVERTHALL, two pars. Eng. Norfolk:—1 (St. Marys), 1668 ac. P 355 —2 (St. Mary) 1125 ac. P 352.

TIVISSA, a tn. Spain, Catalonia, prov and 28 m. W Tarragona with a townhouse, prison, hospital, a parish church, and two females' manufactures of oil, was-chemical linen brooms, pumice and baskets of palm, capri-shoes, and shoes, and flour-mills, distilleries, and brick and tile kilns. On September 30, and October 2 and 7 1845, repeated shocks of an earthquake were felt here. Pop. 3787.

TIVOLI [anc. Tivoli] a tn. Papal States, 18 m. E N E Rome, 1 bank Tevere, on a steep hill, about 850 ft. above the sea, commanding a fine view of Rome and its environs. It is the seat of a bishop, and residence of a governor; has steep, narrow, and ill-paved streets, and houses in general poorly built, with a mediocrity of architecture, and some other churches. It is rich in ancient remains, among them may be mentioned the temple of the Tiburtina sybil, a beautiful circular building surrounded by Corinthian columns of stuccoed travertine, and adjoining it the temple of Vesta now converted into a church. One of the chief attractions of Tivoli is a series of fine artificial cascades formed by the Tevere. Neither the trade nor the manufactures are of any consequence. Both the climate and the inhabitants have a bad name. The former is described by a popular dith which bears that it is either ruin is falling or wind blowing or the death-bell tolling, and among the latter crimes against the person are very common. Pop. 6323.

TIXALL, par. Eng. Bedford, 2352 ac. P 331.

TIXOVER, par. Eng. Rutland, 1090 ac. P 115.

TIZZANA, a tn. and com. Tuscan comp. Florence, on a hill forming the W base of Mount Albano, about 7 m. from Pistoia. It has a public square of a rectangular form, occupied partly by a church and partly by a townhouse, and a trade in corn, milk, and particularly wine, some of which ranks as the best in Tuscany. Pop. 7714.

TIZZANO (Latin, Tivianum), a vil. and com. duchy and 25 m. S. Parma, near r. bank torrent Parma, in a bleak and mountainous district with an old castle, a primary school and two annual cattle-fairs. Many of the inhabitants emigrate for employment. Pop. 2978.

TJANJOR, a tn. in Java, cap. prov. Preanger, 53 m. S E Batavia. It is a most place, with straight broad streets, and suffered from an eruption of the volcano Gekok, and from an earthquake in 1834.

TJAYA, a tn. Tibet, 370 m. E by N Lassa lat. 31° 45' N. lon. 97° 45' E.

TJIDAN (Djé) a river Java, prov. Buitenzorg rises at the foot of Mount Pangangoro, and falls into the Java Sea, after receiving numerous affluents.

TJILATJAP a tn. Java, prov. Banjoemas S. coast 111 m. S W Bannang, on the bay of its name, with a good haven promising facilities for the shipping of produce. The nat. is formed by the island of Nioema Kembangan on which two forts are erected.

TJIMANOK (Djé) a river, Java, prov. Preanger flows N, and near Cape Indramajo, joins the Java Sea by two arms. It is of great advantage to the inland navigation of the province, and for sending coffee, &c., to the coast for exportation.

TJIRINGIN a maritime vil. Java, prov. and 80 m. S W Bannang, on the Strait of Sunda. It is the most flourishing place in the province. Inhabitants engaged in fishing and in agriculture. Pop. 1850.

TJÖRN an isl. Sweden. See THORX.

TLALPAM, or SAN AGUSTIN DE LAS CUYAS, a tn. Mexican Confederation, dep., and about 12 m. from Mexico, cap. dist. It contains a great number of beautiful villas, to which many of the inhabitants of the capital retire during the warm season, and is celebrated for its annual fair, which lasts three days, attracts numerous visitors, and furnishes scenes of gaiety and dissipation seldom equalled elsewhere.

TLALPACHUA (San Juan r. San Pablo), a tn. Mexican Confederation dep. Michoacan, cap. mining dist. of same name, in a beautiful mountainous region at the foot of the Cerro-del Gallo, 5386 ft. above sea-level. The mines have been almost abandoned, but its inhabitants chiefly Indians and Castles, still exceed 3000.

TLAMATH, a river U States, has its source in a lake of same name in Oregon flows W for some distance across part of California, then N W., traversing a corner of Oregon, and falls into the Pacific.

TLASCALTA, a tn. Mexican Confederation, between two mountains on the Abasco or Papagallo, 70 m. E by S. Mexico. It is famous in Mexican history and was once a place of great importance and though stripped of its ancient grandeur and reduced to small dimensions, is still a handsome town with regular streets and numerous specimens of tasteful architecture, both in its private dwellings and public edifices. Among the latter are the principal church, the town hall, bishop's palace, and a Franciscan convent, occupying the site of the chief temple of the ancient Tlascalans. In the town and its vicinity are numerous interesting remains. Pop. about 5000.

TIEMCEN TIEMERKE, or TIEMERKE (anc. Tremes, or Tremes Colonia) a tn. Algeria, prov. and 66 m. S W Oran in a commanding position. It is a place of considerable and has narrow streets, refreshed by numerous fountains. houses generally of one story, built of brick, stone, or clay and, none not being used externally, of a gloomy appearance. The Citadel is an extensive structure of rectangular form and in the neighbourhood are numerous interesting re-

TIVERTON — From the East, View of the Province of Alger. An.

marks of antiquity. It has manufactures of articles in iron Morocco-leather carpets, and various fabrics in woolen, cotton, and linen and is the seat of considerable trade, being from its vicinity to Morocco and the desert, the natural entrepot of the caravans coming from Fez, the desert furnishing ostrich-feathers, wool, and ivory, in exchange for groceries and manufactured articles. Tiemoen was occupied by the French in 1856 but was evacuated in 1867, in consequence of a treaty between General Bugeaud and Abd-el Kader. It was again occupied by the French in 1862. Pop. (1850) 9445. (Magasin Pittoresque.)

TLUMATECHAU, or TLUMACOW, a market in Austria, Moravia, circle Hradisch, near l. bank March 5 m. S E. Kremsitz with a church and a mill. Pop. 1253.

TMUTARAKAN a tn. Sumatra. See TAMAN.

TNIALA, a river, Russia, rises in W. of gov. Don Cossacks flows very circuitously S. S. E. and after a course of about 130 m., joins r. bank Don. TO-Benue a vil. Hungary, Hither Danube, co. Pesth, on the Thama, about 9 m. from Balutok, with a R. Catholic church, a factory, a flour-mill, and a trade in agricultural produce and cattle. Pop. 1649.

TOBAGO an Isl. British West Indies, Windward group; lat. (N point) 11° 25' N lon. 60° 25' W (a.); 24 sq. N E. Trinidad, 82 sq. mi. long, by 12 sq. mi. broad. Area, 63,064 sq. mi. It is one entire mass of rocks, rising with a steep ascent on the N E and descending gradually towards the S W., with some small but picturesque valleys intersecting. The highest part of the rock is towards the N E. extremity, where it attains

an elevation of about 900 ft. The N W part is the least mountainous on the E. It terminates in broken plains and lowlands. It is well watered by rivulets and streams, rising in the interior and pouring over the lowlands to the sea. It has several good harbours along the N coast for vessels of 150 tons, and a few also on the S coast. Tobago is beyond the range of hurricanes, but is extremely unhealthy in summer. The produce of the island consists exclusively of sugar molasses, and rum.

Tobago has a local legislature consisting of a Lieutenant-governor a legislative council and a house of assembly of 16 elected members. There are three Episcopal churches and two chapels, five Wesleyan, and two Moravian places of worship, four free or public schools, and five private ones. Tobago was discovered by Columbus in 1496, and was ceded to Great Britain by France in 1763. Principal town, Scarborough, on the S W side of the island, along the sea-shore. P. 13,027

TOBAIRA a tn. Spain, Murcia, prov. and 88 m. S. E. S. E. Albaceta. It has a townhouse an hospital, several primary schools, a parish church with a chapel of ease, a suppressed convent, and a fountain; manufactures of linen, serge, cottons, and also flour five oil and two fulling mills. Near it is a hermitage, and a tonic mineral-spring, with good stone-baths. Pop. 8518.

TOBBECURRY a tn. Ireland. See TOMBACURRY

TOBOL, a vil. and par. Switzerland, cant. Thurgau S W. Canton. with a R. Catholic church and school, and a house of correction. Pop. 1279

TOBER par. Irel. Wicklow, 1428 ac. Pop. 252

TOBERMORY, a seaport tn. Scotland, co. Argyll, cap. of Mull, at its N E. extremity, on the sound or strait of Mull, lat. 56° 28' N lon. 6° W It is beautifully situated at the extremity of the inner recess of a deep bay protected from the winds and waves by a low island. The houses stretch along the shore, and are generally well built, and of a neat appearance. There are an Established and a Free church, a school supported by Government, and a school of infirmity, a distillery, and some boat-building yards. The harbour is capacious and easy of access, and has two commodious quays. Inhabitants chiefly engaged in the coasting trade. Tobermory has of late years become a thriving seaport, and is frequented by numerous steamers, and by most of the vessels trading from the W ports of Britain to the N of Europe. It was commenced about 50 years ago, under the auspices of the Society for the Encouragement of the British Fisheries, to whom it still belongs. But its chief dependence is on the

steaming of ships navigating the sound, or that have been driven into it by adverse weather. Pop. 1547

TOBITCHAU, or **TOWACAW**, a tn. Austria, Moravia, circle Olmutz, on a height above r-bank March with two churches, a synagogue, and a castle. Pop. 1916

TOBLACH, a vil. Tyrol, circle Bruneck, dioc. Welsburg; with a church and an almshouse. Pop. 1689

TOBOL, a river, Siberia, rises in the W slope of the Ural Mountains, gov. Orenburg, on the frontier of Independent Turkey, flows easterly N N E into gov. Tobolsk, and joins L bank Irish at the town of Tobolsk, after a course of about 550 m. Its chief affluents are the Abaga, on the right; and the Ul, Irt, Tura, and Tarba, on the left.

TOBOLSK a gov. of W Siberia lat. 54° to 73° N lon. 54° to 80° E and bounded N by the Arcto Ocean, E. gov. Yeniseisk and Tomsk, S. Omsk and W. gov. Archangel, Perm and Orenburg; greatest length, N to S, about 1400 m. greatest breadth, 900 m. area, 423,460 sq. m. The surface is generally flat, though broken in some places by mountains of granite. On the W frontier the Ural chain separates it from Archangel. From the extent of the government, and the many degrees of latitude over which it extends, the climate necessarily varies much in different localities, and the capabilities of the soil for cultivation present strong contrasts. The N regions are covered with extensive marshes, bogs, and stunted trees. In the centre forests of great extent, and often containing magnificent timber, occur, further S. and more especially in the S E the land produces excellent natural pasture and becomes well adapted for cultivation. Even here however, there are some of a very sterile nature are not uncommon. The best trees prevail along the banks of some of the streams, and yield corn in sufficient abundance not only to supply their own inhabitants, but also those of other less favoured districts of the government. The whole of the government, with a very minute exception, belongs to the basin of the Ob, which drains a greater part of it directly, and is augmented within it by numerous important tributaries, of which the Irtysh, Ishim and Tobol are the most important. There are also many extensive lakes, which, as well as the rivers, are plentifully supplied with fish. Game in the forests abounds, and the hunting of it is for the time employs great numbers of the population. The minerals are understood to be of great value. Manufactures have not made much progress. The only articles deserving of notice are metals, glass, soap, and potash. Distilleries also are numerous. The transit trade carried on between China and the West is of great importance. The inhabitants consist of a mixture of Russians, many of them either exiles or descendants of exiles, Cossacks, Tatars, &c. The government is divided into nine circles—Tobolsk (the capital), Beresov, Jaltutorok, Ishim, Kurganok, Tark, Tumes, Tobolsk, and Turinsk. Pop. 600,000

TOBOLSK a tn. W Siberia, cap. of above gov., L bank Irish at the confluence of the Tobol; lat. 56° 13' N lon. 68° 20' E It consists of the town proper, situated on an elevated flat, and surrounded by a strong brick wall flanked with towers and bastions and of an extensive suburb, situated on the banks of the river, in a position so low as to be often exposed to inundation. The houses, almost all of wood with the exception of the public edifices, usually of brick or stone, are in general well built, and have a substantial and often a very handsome appearance. The streets, for the most part spacious, and laid out with much regularity, either parallel to the river or at right angles to it, have generally log-ways either in the middle or at the sides. The public buildings include a cathedral with five domes, a police, and a lofty belfry which, rising above the heights in the vicinity of the town, form a conspicuous object at a great distance. 17 other churches, most of them in the Byzantine

style, with windowed domes, and a tower at their E extremity, and several of these attached to monastic buildings; the governor's residence, a handsome structure, remarkable alike for its simplicity and its grand elegance; the archbishop's palace, the post-office, on a solitary scale, rendered necessary by the very extensive correspondence of which it is the center; the sound-house, situated, with some other public offices, in the large market-place; the bazaar in the same locality, not distant, like almost all the Russian Gasthof-Dwors, of a large quadrangular court, enclosed by rows of shops, standing under a common roof, and well supplied with all kinds of European and Chinese merchandise; the arsenal, barracks, hospital, and poorhouse; theatre, ecclesiastical assembly, central Lencastre, and other schools. The manufactures, not of much importance, and almost entirely domestic, consist chiefly of linen cloth, silk ribbons, caps lined with swan's-down, and covered with feathers, at once waterproof and ornamental; dresses of reindeer-skin, leather, soap, candles and glass. Tobolsk has a harbor on the Irtysh, which carries on a considerable trade, and presents a very busy scene, particularly in spring, when vast quantities of European merchandise are transported into it. The trade by land, carried on partly by the nomadic tribes, and partly by means of caravans from Bakhara and China, still proves important. It consists chiefly in furs, tea, Chinese silk, both Bokharian and Chinese cotton goods, skins, corn, mutton, and fish extensively taken in the Tobol and the Ob. Pop. (1842) 14,248.

TOBOSO (El), a *n* New Castle prov. and about 50 *n* from Toledo; with a handsome and richly-decorated church, two universities, a courthouse, and primary school, manufactures of wool, and a trade in wine, wax, and chocolate. This place has been memorialized by Cervantes, who gives the heroine on whom Don Quixote fixes his affections the name of Dulcinea del Tobo. Pop. 16,000.

TOBY'S CREEK, a river U States, which is formed at Cooperport, Pennsylvania, by the union of two streams, flows S.W., and joins a bank Allegheny at Foxburg, about 20 *n* below Franklin after a course of nearly 60 *n* during a large part of which it is navigated by boats.

TOCANTINS, a *n* Brazil, prov. and 210 *n* N.E. Goyas, a bank Maranhão, here crossed by a handsome bridge. The mines to which it owes its existence were at first remarkably rich, but have long ceased to be productive, though many of the inhabitants still persist in working them. It contains four churches, and a primary school. Some of the inhabitants feed cattle, but they are much annoyed by a wild tribe of Indians called Calapo.

TOCANTINS, a river Brazil, prov. Goyas, formed by the union of the Almas and Maranhão nearly in lat 14° S. It flows almost due N. receiving the Paranaíba, the Manoel Alves-Mahabre, the Boama, and the Manoel Alves-Septentrional on the right, and the Taboca and numerous small streams on the left. On reaching the N. confines of Goyas, it makes a large and circuitous bend to the W. till it reaches the town of São-João-de-Ins-Bernis, in lat 9° S. Here it is joined and doubled in volume by the Araguaya, and flowing almost due N. across prov. Para, and receiving in succession the Sande on the left, and the Mays and Gassima on the right, falls into the Para about 70 *n* S.W. the town of Belém or Pará. Its course, under its own proper name, is about 1000 *n* and at the town of Cametá, where the embouchure commences, its channel is about 8 *n* wide. The tide ascends to Fort Alcobaca, 800 *n* from the sea.

TOCAT is a *n* Asia Turkey. See TOKAT.

TOCCO two towns, England, a *n*, prov. Abruzzo-Citra, 16 *n* W.W. Chieti, near a bank Pescara with five convents and a hospital. Pop. 8040—5. A *n*, prov. Prinepato-Ultra, N.W. Avellino, at the N. foot of Mount Taburno.

TOCE, TOCCIA, or TOSA a river kind of Italy rises in Mount Griles, in the Helvetic Alps, on the frontiers of the Swiss cant. Tessin; flows S.E. traversing the valleys of Formazza, Antigorio, and Ussola, and after a course of about 48 *n*, falls into a small bay of some name on the W. shore of Lake Maggiore, opposite to the Borromean Isles.

TOCHIA, a *n* Spain, Andalusia, prov. and about 20 *n* from Seville. It contains a handsome modern church, and a primary school; and has manufactures of woollens, several oil-mills, and a transit trade in corn. Pop. 1082.

TODDENHAM, par. Eng. Wilts; 761 ac. Pop. 150.

TODUTO, a *n* Venezuela, a bank and near the source of river of same name, 85 *n* N.E. Truxilla, in a fertile and extensive valley in which much wheat is cultivated. It carries on an active trade in wheat and in salt from Coro and has some manufactures of woollen stuffs. The wood of the Tocuto shag having a high reputation for blankets and bayonettes. Pop. 6000.—The river rises in the N.W. declivities of the Parana-de-las-Rosas, about 80 *n* E. Truxilla, lat. 8° 0' N., lon. 68° 55' W. flows N.N.W. for 90 *n*, when it somewhat abruptly bends round to the N.E., and finally falls into the Caribbean Sea about 30 *n* N.W. from the Gulf of Truxilla. Total course above 200 *n*, of which 100 *n* are navigable from its mouth.

TODDERS, par. Eng. Dorset. 294 ac. Pop. 119.

TODDINGTON, an ancient market *n*, and par. Eng. land, co. Bedford 5 *n* N. Dunstable houses mostly of antique appearance, and irregularly built. It has a church in the later English style; two Dissenting places of worship, and six almshouses. Scaw plant is made to a considerable extent chiefly by young persons. Area of par. 5390 ac. P. 2438.

TODDINGTON, par. Eng. Gloucester. 1857 ac. P. 189.

TODENHAM par. Eng. Gloucester, 2477 ac. P. 462.

TODI [anc. *Thudones*] a *n* Italy, Umbria, 54 *n* S. by E. Perugia. It is the seat of a bishop and contains a Gothic cathedral with some fine frescoes, two other churches, and numerous convents and monasteries. Part of the ancient Etruscan walls still remain, and furnish one of the most perfect specimens of the masonry of Etruria. Pope Martin I. was born here, and in the neighbourhood Narnes, general of the Emperor Justinian, defeated and slew Totila king of the Goths. Pop. 2925.

TÖDIBERG a summit, Swab. Alps. See DÖRMERS.

TODMORDEN a *n* England Yorkshire (W. Riding) in a beautiful and romantic valley, on the Yorkshire and Lancashire railway 19 *n* N.F. Manchester. It consists of two principal streets, which are well built, well kept, and lighted with gas and has a handsome modern church with a square embellished tower an ancient church, very ruinous, a Unitarian, an Independent, and two Methodist chapels national and other schools, a benevolent society, a courthouse and public hall and extensive manufactures of cotton goods, both by hand and power looms. Pop. 7639.

TODMOROS, a vill Baden circle Upper Rhine, ball and near St. Blasien with a church. Pop. 1718.

TODTNAU a *n* Baden, circle of Upper Rhine, ball and 7 *n* N.E. Schwanau, in the Schwabwald at the foot of the Feldberg, with a church, manufactures of brushes and matches, and a paper and a cotton mill. Pop. 1277.

TODWICK, par. Eng. York. 1860 ac. Pop. 660.

TORBAN, a maritime vil. Java, prov. and 55 *n* E. by R. Rembang. It is large and busy, lies on an excellent bay, and has an active trade in wood and some boat building.

TOBOKERMOU a small ill. Indian Archipelago, Caroline Passage, lat. 2° 51' S. lon. 158° 56' 30" P., with a high hill at each end.

TOEM, par. Bel. Upperary. 12,276 ac. Pop. 3521.

TOFT, a *n* para. England—1 Cambridge 1243 ac. Pop. 580—2 (Monsie) Norfolk 3228 ac. Pop. 431—3 (near Newton), Lincoln 1293 ac. Pop. 77—4 (Tress), Norfolk, 1184 ac. Pop. 68—5, (West), Norfolk; 2051 ac. P. 191.

TODGEBURG, the name given to the long and fertile valley of the Thur in the Swiss cant. St. Gall. It stretches for about 40 *n*, from Wyl up to the source of the Thur, and is enclosed by lofty mountains on the N. by the Sesia, and on the S. by the peaks of the Kurrhorn. It was once governed by its own counts and is now subdivided into two districts.

It is well peopled by industrious inhabitants, who are chiefly employed in the cotton and woollen manufacture.

TOGYER, a vil. Hungary, Hither Thess., co. 1. local about 13 *n* from Margitta, with a Greek church, and a trade in cattle and timber. Pop. 1842.

TOIRANO, a vil. and com. Italy Piedmont div. Genoa, prov. and 5 *n* V. Albenga, a bank Bascione with a church and a remarkable schistose peak. Pop. 1416.

TOIROS, a *n* and airport, Brazil, prov. Rio Grande-do-Norte, at the mouth of a small river which falls into the bay of the same name, 15 *n* N. Natal. It is a well built thriving looking place with a general air of comfort. It contains a church, and a primary school; and carries on a considerable

trade in silk, leather, hides, salt-pork, and above all, cotton of excellent quality. The Bay of Toledo furnishes an excellent rockfish, in which vessels can lie in 4 to 5 fathoms, sheltered both from the S. and E. W. winds. P (dist.), 4000.

TOK, a vil Hungary Hither Danube, co. Pank, about 8 m. from Vorau with a Protestant church, and a trade in wine. Pop. 1337.

TOK, a river, Russia, rises about 50 m. N. W. Orenburg, flows easterly to N. and joins r. bank Samara a little above Samarkand, after a course of 120 m.

TOKA is in Hindostan, prov. Aunrahad, lat. 19° 25' N. lon. 75° 10' E. on a tongue of land formed by the confluence of the Pura with the Godavary. Though of small extent, and containing only one Hindu temple, it is a place of considerable religious resort. It has spacious and handsome ghats, descending to the water.

TOKAT, or TOGAT a ta. Alsace Turkey, pash. and 50 m. N. W. Sivas lat. 40° 7' N.; lon. 36° 30' E. It is surrounded on three sides by high limestone-hills, which render the heat intolerable, and is commanded by two abrupt and almost perpendicular peaks, consisting of crystalline marble surviving beds of crystalline schists, some of which are extremely hard and brittle, and break into large slabs, which are used as grave-stones by the Turks. The town itself is mean and dirty, the houses are mostly built of mud-bricks, dried in the sun, and which soon acquire to pass the streets

TOKAT. — From the S. E. See Pasha's Travels in Syria and Persia.

narrow and filthy and the bazars, with exception of the Bazaar, which is a solid stone built edifice are mean and ill supplied. In the centre of the town is a large and handsome Armenian church. There are also several handsome old khans and 15 mosques. There are here an extensive dyeing-establishment, another for printing on cotton, and manufacture of woollen, linen silk, and cotton fabrics, carpets, and copper vessels and also a copper-foundry at which the copper from the mines is refined before being sent to Constantinople. As a commercial mart, the importance of Tokat has passed away, the numerous fine khans are empty and there is little better or amusements in the streets. The missionary Henry Martin died here, October 18, 1812 on his journey home from India. Pop. about 100,000.

TOKAY, or THIA TOKAY a vil Hungary, Hither Theiss, co. and 27 m. S. W. Zemplin, on a lofty spur above r. bank Bodrog, near its confluence with the Theiss, which is here crossed by a large wooden bridge. It is surrounded by a chain of hills, covered with vineyards, which produce the famous wine bearing its name contains a Protestant, R. Catholic, Greek united, and Greek non-united church, and has several important mineral fountains. Cereals and other fine pebbles are found in the neighbourhood. Pop. 6712.

TOKEN BARRAGE on TOWANATON, a large group of Isl. Indian Archipelago, the most N. W. in lat. 6° 15' 30" S. lon. 123° 25' E. They are of moderate elevation, extending nearly N. W. and S. E., their W. sides forming the E. boundary of the channel, on the outside of Isl. Boeton. Most of them are uninhabited and cultivated, abounding in coco-nuts, but they are destitute of sugar-cane.

TOKO-LABO HARBOR, New Zealand. See COOKIN (FOOT)

TÖRÖLE a vil Hungary, Hither Danube, co. and S. Pesth, on Raasdorf on island of the Danube. It has a R. Catholic church, an old castle, and a considerable trade in wine and cattle. Pop. 1841.

TOLOSA (KAGY), a vil Hungary Hither Thain, co. Szepien, dist. and 24 m. N. W. Tokay, with a Protestant and a Greek church, a bathing-establishment, and several good mazon houses. Pop. 8633.

TOLEDO a prov. Spain New Castle, bounded N. by provs. Madrid and Avila, E. Cuenca, S. Ciudad-Real, and W. Cáceres, area, 4315 geo. sq. m. It is enclosed by chains of mountains, chiefly belonging to the Carpetan cordillera and the sierras of Guadalupe, and for the most part arid, preclious, and with but slight vegetation divided by deep glens and sombre valleys, which are difficult of access and cultivation and have little communication with one another those, however on the S. called Montes-de-Toledo, have their slopes and skirts covered with trees and plants, forming immense groves and tangled thickets. In the centre of the province are extensive plains, with a sandy and calcareous soil, destitute of trees but fertile and capable of growing all sorts of plants. The province is divided into two nearly equal parts by the Tago, and is watered by many of its tributaries—the Jarama, Guadarrama, Alberroche, and Tietar, on its right bank and the Algodor, Guajaras, Turoco, Zelena, Pasa, Sangreña, Gredon and others on the left. The Gigueta also, with its tributaries the Blasanas and Amarguillo flow through it towards the Guadana. Besides the cereals, its productions comprise lentils, peas, kidney beans, vetches, potatoes, chestnuts, barilla, melons, lemons and oranges, amies, quinquina, saffron, silk, flax, searvo, oil and wine it maintains, however, but a small number of sheep and goats, and still fewer oxen and horses and there are no horned cattle except those employed in tillage. This province is particularly rich in metallic veins, producing gold, silver, lead, iron, copper, quicksilver, and tin, silmar alum, blamish, coal, ochre and graphite are also met with. It was once celebrated for its manufactures, which have now sunk to comparative insignificance and consist chiefly of the silk stuffs and galleons of Talavera and Toledo, ordinary woollen stuffs, cordwain, soap, salinette, swords, &c. Almost all the products of the soil are required for home consumption, so that the exports are limited to the manufactures of Talavera, and that too in small quantity. The number attending school in this province does not exceed five per cent. of the population. Pop. 380,000.

TOLEDO [anc. Tolema], a city Spain, cap. above prov. and once the cap. of the kingdom, 67 m. N. W. Madrid; on a high, rocky site, 2400 ft. above sea-level, surrounded E. S. and W. by the Tago, which embraces it in the form of a horse-shoe. It is encompassed by two walls, originally Roman, but repeatedly repaired and enlarged by the Goths, Moors, and Spaniards. There are two bridges over the river at the extremities of the horse-shoe the height of both is about 100 ft. One of these leads to the gates of the city, which are defended by towers on each side and give entrance to a kind of esplanade, in which are two other gates, one leading to the Zoocodero—a name familiar to the readers of *Don Quixote* and *Lazarillo de Tormes*—and the other to the slower. Altogether Toledo has nine gates, some of which are fine specimens of Moorish architecture. Nothing can be more imposing than the view of the city when seen from afar; but within, decay is everywhere visible. The streets are steep and tortuous and though the town is deficient in water, it is clean. The houses, generally three or four stories high, are massive and spacious structures in the Moorish style, and each family has its own separate dwelling. Among the grand structures of this most picturesque old city towers the cathedral, in its centre, with multitudinous churches and convents, many now silent as the tombs, clustering around it. What the foreign foe began, the domestic reformer completed, and by the appropriation of ecclesiastical revenues the monks were taken away by which this priestly capital expired. Formerly it contained, besides the cathedral, 20 parish and six monastic churches, nine chapels, three colleges, 14 convents, 21 almshouses, nine hospitals for males, and one for females, but its population was then 200,000. The cathedral, built

on the site of an earlier one, which had been also a mosque, was founded in 1328 by St. Ferdinand, who himself laid the first stone and was completed in 1492. It is for the most part in the pure Gothic style. In its principal or W facade are three portals—the largest and most highly enriched in the centre—and a tower 824 ft. in height, which rises in a thin spire, encircled as with crowns of thorns. Its painted windows are superb. The length of the building is 404 ft., and it has five naves, supported by 84 piers the central one 160 ft. high. The library consists of 7000 vols., and has a good collection of Greek, Latin, and Arabic MSS. Cordova, Jaen, Carthage, Cuenca, Sigüenza, Segovia, Oama, and Valladolid are suffragans to the prince of Toledo. The chapter was truly imperial, and consisted of nearly 100 dignitaries and prebendaries. Some of the older archbishops were great in peace and war and among the most illustrious were Rodrigo, Fonseca, Mendoza, and Ximenes. Outside the town stands the basilica of Santa Leocadia, built in 1800, a shrine of great repute in ancient times, and in which were held many of the councils of Toledo. The parish churches now consist of two Musarabim and nine Latin, the former appellation being given to those in which the Gothic ritual was retained and which existed during the domination of the Arabs, one of whose episcopi was called Miza. Among the parish churches the most remarkable is Nuestra Señora del Tránsito. The grand altar is in the Gothic style but the edifice itself is Baroque, and the finest specimen of that architecture which Toledo

the educational establishments the most important are the solitary school, which contains 600 pupils; an academy for the higher branches of education attended by 18 pupils; a Seminary-Convent, founded in consequence of the suppression of the university to supply the want of ecclesiastical instruction, containing 97 students; a college for young ladies of rank a school of fine arts, in which 180 to 180 pupils are taught gratuitously in mathematics and drawing. There are also various public and private schools for primary education. The principal library in Toledo is that called the Provincial, composed of the ancient archiepiscopal collection and about 40 000 vols. gathered from the suppressed convents the aggregate number being now 70 000 vols. Attached to this library is a cabinet of mineralogy and zoology. There are also a lyceum for lyre and dramatic entertainments, an indif ferent theatre, and a museum containing 800 pictures, collected from the convents, with exception of several by Spagnoletto and a few others, they possess little merit. Outside the town are three planted promenades, and within the city are several without trees on the banks of the river the most frequented, however, is that in the Plaza de Zocodover, which forms a sort of triangle. Zocodover in Arabic signifies 'place for cattle and here were formerly held the bull fights, the game of chess the casino-deck, and the markets. Toledo has but few fountains, and the town is for the most part supplied from the river the water being carried up by donkeys. The Romans stamined the dedle with a gigantic viaduct and aqueduct, which ran from the Puerto de Té bases, distant 36 m. but which has now almost entirely disappeared. When the Moors conquered Toledo, there was an enormous wheel or water wheel, 90 cubits high, which stored up water by pipes, a work of the Jews, who introduced the hydraulics of the East. Charles V caused it to be repaired in 1563, and in 1568 it raised 600,000 buckets of water daily. It was afterwards damaged by an inundation, and never repaired, and the roofless engine-house now forms a picturesque ruin.

The celebrated manufactory of Toledoan swords is placed on the banks of the Tago, about 2 m S.W. of the city. The huge building which Charles III caused to be erected, is well provided with forges, &c., but life is now wanting. The few blades which are still made here are of a fine temper and polish, and so elastic that they are sometimes sold in boxes curled up like the mainspring of a watch. The manufactory of church and pontifical ornamented robes, unique in Spain perhaps in Europe, has

also greatly decayed, in consequence of the diminution of the cathedral revenues. The other manufactures consist of silk lace and ribbons, serges, taffets and silk handkerchiefs, stockings and caps, French, hats, earthenware bricks and tiles besides numerous oil and flour mills, nine chocolate-mills, three fulling mills, and seven silk dye-works.

When Toledo was taken by Marcus Valerius, 193 a.c., it was, according to Livy a small town, built on a strong position. Leovigild under whom the Gothic monarchy was consolidated, removed his court from Seville, and made Toledo the capital of Spain. The Goths, who have been unjustly stigmatised as destructive barbarians, repaired and improved the city, bridges, and Roman walls. Toledo opened its gates in 1808 to the French, who signalled their entry by the burning of the sumptuous Franciscan convent, with its important archives and library, and on evacuating the city in 1812, they set on fire the *alcázar*. Pop. 18,580.

TOLEDO a tn, U. States, Ohio, on the Maumee, near its mouth in Maumee Bay 124 m N.W. of Columbus. It extends for nearly 1 m. along the river and has Presbyterian, Episcopal Methodist, Lutheran, and R. Catholic churches. Important manufactures; but an important trade in course of rapid development. Pop. (1850), 8819.

TOLENTINO (anc. Tolentino) a tn. Italy, The Marches, 11 m S.W. Macerata, 1 bank Chienti. It is entered by a Gothic gateway which presents one of the most interesting and best preserved specimens of the castellated architecture

THE REMAINS OF ALCAZAR, TOLEDO.—From Chapoy. L. Engraver.

possesses. There still remain 19 monasteries, containing altogether about 180 nuns; and of the monasteries some are in ruins, and others converted to secular purposes. Growing as it were out of the rock, and commanding the W approach of the city rise the remains of the palace castle, built by King Wamba in 674, the masonry is truly Cyclopean. The *alcázar* or palace and fortress is the most striking feature of a city which is once defended and now adorns. This superb and gigantic edifice, placed in the most commanding site, was repeatedly altered and enlarged, until Charles V. introduced a considerable change in its plan, which was completed in 1551. The whole was burned, in the war of succession, by the Portuguese general, Alameda. Cardinal Lorenzana, who died in 1804, required the ruins, and converted them into a Casa-de-Cardinal, in which paintings were employed in silk weaving. These were gilded at the invasion by the French, who seized the funds and converted the asylum into a barracks, which was burned by Soult's troops when evacuating the half-ruined city. Besides the episcopal palace stands the town-house, built in 1618. Near the Zocodover is the Hospital-de-Crua, now used as a forwarding hospital, founded by the great Mendoza, Cardinal de Santa Cruz. This building was one of the gems of the world nor on any shading of Cellini surpasses the elegant portal. The general style of the edifice is the transition from Ford Gothic to the classical and Renaissance. There are also a Casa-de-Cardinal on Hospital-de-Ministerio, and several other charitable foundations. Among

of the middle ages and has a cathedral, originally a Gothic edifice, but very much altered. Tolosa has acquired some celebrity from the humillitine treaty which was dictated to Pope Pius VI in 1797 by the French, headed by Bonaparte. In 1815, a sanguinary battle, fought in the neighbourhood, sealed the fate of Murat, who, at the head of the Neapolitans, was defeated by the Austrians under Blücher. Pop. 9427.

TOLFA a tn. Popul State, delay and 11 m. E. N. E. Civie-Venolia. A rich area, belonging to the government, is extensively worked here, and furnishes the material of a considerable export. The stone-works are on a very large scale. Pop. 1069.

TOLKEMIT a tn. Prussia, prov. W. Prussia, gov. and 85 m. E. Danzig, S. shore, Frische-Haff with a R. Catholic church, an extensive fishery, and a mill. Pop. 2508.

TOLLAND, par. Eng. Somerset 834 sq. Pop. 147. **TOLLAND** a vil. and township, U. States, Connecticut, on the Williams and on the New London, Willimantic, and Palmer railway 18 m. N. E. by R. Hartford. It stands on an elevated plain; and has three churches, a courthouse, and jail. Pop. 1410.

TOLLARD-ROYAL, par. Eng. Wilts 2607 sq. P. 574. **TOLLENSSE**, a river Germany, rises in Mecklenburg-Strelitz flows easterly N. N. W. to Non-Brandenburg where it forms a lake of same name then about due N. past Treptow forming the boundary between Mecklenburg-Strelitz and the Prussian prov. Pomerania then to W. to Demmin, where it joins the Fenne, after a course of about 50 m.

TOLLER, two par. Eng. Dorset — 1 (Frimley) 500 sq. Pop. 54. 2, (Purton) 8143 sq. Pop. 527.

TOLLINGTON, par. Eng. Wotts 1240 sq. Pop. 157.

TOLLEBURY, par. Eng. Essex 10,658 sq. P. 1193.

TOLLEBURY three par. Eng. Essex — 1 (D. Argy) 3371 sq. Pop. 752. — 2 (Knaple) 2679 sq. Pop. 371. — 3 (Mayr) 2844 sq. Pop. 479.

TOLLO a tn. Naples, prov. Abruzzo-Citra, 7 m. E. Chiato, on a hill. It has two churches. Pop. 3160.

TOLMEZZO a tn. king of Italy gov. Venice, prov. Friuli, 25 m. N. W. Udine. It is surrounded by a wall and defended by a castle both in a dispirited state has several courts and public offices, three parish churches, an imperial manufacture of linen, and a cotton-mill. Pop. 2000.

TOLNA a co. Hungary bounded N. by Veszprém and Stuhlvesenberg, E. Pesth, S. Banya, and W. and N. W. Mészeg area, 1890 sq. m. With the exception of some hills, particularly in the S., it is generally flat, and in the E. is traversed throughout its whole length by the Danube, which, notwithstanding the numerous strong dykes built along its banks, often inundates extensive tracts, and has formed several morasses and islands. The chief river of the interior is the Sávitz. The soil is generally remarkable for its fertility, and grows large crops of corn, which after satisfying the home consumption, leave a considerable surplus for exportation. Wine also, both red and white, of good quality and tobacco, are extensively produced; and fruit abounds. Numerous fowls are fattened in the meadows, and the rivers are amply supplied with fish. Tolna is divided into four districts: Bácskány (the capital), Földvár, Vagyass, and Dombóvár. Pop. 163,366.

TOLNA, a market tn. Hungary, Timber Danube, co. of same name, r. bank Danube 35 m. N. E. Fünfkirchen with a handsome chateau, a potash-refinery and an important fishery in the Danube. Pop. 5771.

TOLGAR, or **TULGAR**, see **ST. ANDREW**.

TOLCZYN or **TOLCZYN**, a tn. Russia, gov. and 42 m. S. W. Mohilev, r. bank Dvina, with a R. Catholic and a Greek church, a synagogue, a monastery, and a Jewish school.

TULOMETA (see **Polesina**), a tn. regency Tripoli on the Mediterranean, 65 m. N. E. Benghazi with a small roadstead, and a magnificent reservoir of water the remains of a temple, theatre, an amphitheatre, a barracks, and other interesting antiquities.

TULON Noua, Mongolia. See **CHAO-NAM-SOON**.

TULONA a city Spain, Biscay, cap. prov. Guipuzcoa, 85 m. S. W. Bayona, on the Orre, across which it is approached by two magnificent bridges. It consists of six parallel and three transverse streets, well paved, and provided with lamps, and the houses, which are built according to a regular

plan are all of stone, and have iron-balconies. There are several squares, one appropriated to public diversions, and another paved as a market. Tolosa abounds in *casas-casales*, the family-houses of men of abundant pedigree. Among the public buildings and institutions are a spacious chamber, a fish-market, storerooms, custom-house, parish church, a sumptuous temple, with three naves, sanctuary with a church, used for public worship, suppressed convent, converted into a barracks, public chapel, two town-houses, various schools for primary and advanced education, a college, in which there are 11 professors, &c.; an academy of design and mathematics, and a benevolent institution with separate departments for purging the sick poor, indigent children, and orphans, and foundlings. The inhabitants of the suburbs are chiefly engaged in agriculture. In the town the principal branches of industry are the handicrafts of muscos, brick layers, cabinet-makers, carpenters, smiths who used before the establishment of the manufactory of arms in the Asturias, to make bayonets and swords for the army, but are now engaged in manufacturing agricultural implements for America, as well as the home market, balancers, kitchen-ranges, locks, &c. There are also two cast-iron works, two machine-shops, three paper-mills, and a large and handsome factory of fine cloth, besides various flour-mills. Tolosa was held by the French from 1806 to 1813; when the allied army under General Graham, compelled the garrison to evacuate. P. 8000.

TOLUTLAN or **TOLUTLAN** river Mexico (Michoacán) **TOLUX**, a vil. Spain, Andalucia, prov. and 30 m. S. W. Malaga, with a townhouse, two endowed schools, a church, and hermages four flour-mills, and three for oil. Pop. (agriculture), 1990.

TOLPUDDLE, par. Eng. Dorset 8089 sq. Pop. 554. **TOLTES**, or **CAESAR**, a vil. Hungary co. Feutr, about 9 m. from Kalocsa; with a trade in wine. Pop. 1307.

TOLU, a seaport tn. New Granada, prov. and 65 m. S. Cartagena, at the head of the Gulf of Morroquillo. It has a good harbour, and the adjoining country is fertile in corn, producing also dye-wood, and the aromatic balsam of Tolu. **TOLUCA**, a tn. Mexico, Confederation, dep. and 10 m. S. W. Mexico, beautifully situated in a valley of same name, 8006 ft. above sea-level. It is a well-built, handsome place and is celebrated for its heat and summer, its soap and candles. The lofty volcanic mountain called Nevado de Toluca is within the district.

TOLVA a tn. Naples, prov. Basilicata, dist. and 12 m. E. N. E. Potenza, with two convents, and three almshouses. Pop. 3580.

TOLWL 18th, or **TOLYMAN**, a tn. Russia, gov. Olenetz, not far from Lake Onega, and 90 m. from Petzavodsk. It has mines of copper, and slate-quarries. Pop. 1800.

TOLZ, a market tn. Upper Bavaria, cap. dist., r. bank Isar 25 m. S. Munich. It is well built, has four churches, three chapels a Latin school Franciscan hospital and infirmary manufactures of woollen and linen cloth, a wax-refinery, saltpetre works, numerous breweries, three iron and many other mills, and a trade in wood, horses, and cattle.

TOM, a river Siberia, rises in the mountains on the frontiers of Persia, Yeniseisk and Tomsk; flows easterly N. N. W. and about 26 m. below the town of Tomsk, joins r. bank Ob, after a course of about 220 m. Its chief affluents are the Mirema and Koonoma, which join it in the early part of its course on the left.

TOM-NO, a river China, descends from the mountains near the E. frontiers of prov. Shensi, enters prov. Szechuen, flows S. E. W., and joins r. bank Kiating a little below Faoing after a course of about 100 m.

TOMANTUL, a vil. Scotland, co. and 43 m. S. W. Raasay, on a tract of table-land overlooking the Aron, with a spacious square, and a neat substantial church. Pop. 641.

TOMASZOW, two places, Russian Poland — 1, A. tn., 70 m. S. E. Lublin with important manufactures of porcelain and stone ware, and a considerable trade in two beverages, called *windul* and *stusnak*, prepared from honey and fruit. Pop. 2500. — 2, A. tn., 62 m. S. W. Warsaw, on an elevated and healthy site, in the neighbourhood of immense forests, r. bank Pilica, which is here navigable, and crosses the Wiliborka. It was founded in 1573 contains a Protestant and a R. Catholic church, and a synagogue; and has extensive manufactures of

fine woolen cloth, and plain and printed cottons; dye works, two worsted-mills, a blast-furnace and other iron-works and being admirably adapted, carries on an extensive trade. Now it is extensive iron-mines. Pop. 5000

TOMBORO volcano. See BODAWA.

TOMBIGBEE, a river, U. States, rises in Mississippi; flows S. by E. through the N. E. of that state and the S. W. of Alabama, and after a course of about 500 m., joins the Alabama in forming the Mobile river. It is navigable for large vessels for nine months in the year and the steam-boats to Columbus in Mississippi. It has several affluents, of which the Black Warrior is the largest.

TOMBS (GREAT and LITTLE), two isls. near the entrance of the Persian Gulf, 20 m. N. W. of Is. Kishun. The one is 4 m. to 5 m., the other 3 m. to 3 m. in circuit. They are both low and flat, uncultivated, and uninhabited. The larger, at which Neerhaus anchored during his celebrated voyage, is partly covered with grass, and abounds with antelope.

TOMBUCTOO, a city, Africa. See TIMBUCTOO.

TOMBEELY par Isl. Luzon, 1334 sq. Pop. 281

TOMELLOSO, a tn. Spain, New Castile, prov. and 45 m. N. E. Ciudad Real, with a tithinghouse, prison, granaries, three schools, a church and a hermitage, some linen-weaving, and paper-manufactures. Pop. (agricultural) 4705

TOMFINLOUGH, par Isl. Clare 6788 sq. P. 5181

TOMGRANEY, par Isl. Clare, 14,159 sq. P. 6673

TOMHAGGARD par Isl. Wexford, 2180 sq. P. 325

TOMKINSVILLE, a vil., U. States, New York, 6 m. S. New York city, on the N. E. part of Staten Island overlooking the Bay of New York. It is the quarantine station of New York, and has as extensive barracks and several commodious hospitals.

TOMREGAN, par Isl. Cavan and Fermanagh, 10,678 sq. 1 op. 8406.

TOMSK, a gov. of W. Siberia lat. 45° to 61° N. lon. 75° to 90° E. bounded N. and N. W. by gov. Tobolsk, W. Omsk, S. the Chinese Empire, and E. and N. E. by Yeniseisk greatest length, N. to S., about 760 m. greatest breadth, about 600 m. Its E. frontier is covered by the Altai Mts. and, which occupy a considerable width in that direction, but descending rapidly, give the whole government the form of a vast inclined plane, descending towards the N., and giving the same direction to the numerous streams by which it is watered. These belong entirely to the basin of the Ob, which, rising in the S. of the government, traverses it circuitously but centrally and receives from it numerous tributaries, of which the most important are the Bie, Tobolsk, Tom, Tobolka, and Ket. There are also several large lakes, a chain of which, consisting chiefly of the Tuhany and Evreny, covers a large expanse in the W. The N. part of the government is generally wild and desolate, and is roamed over by nomadic tribes. Towards the S. the country improves in appearance, the climate becomes milder, good crops are raised, and in some parts even molasses grow in the open air. The pastures also become luxuriant, and the cattle fed on them constitute the chief riches of the inhabitants. The mountains in the S. have a nucleus of granite, generally overlain by clay and other strata, in which a great number of valuable minerals, including gold, silver, lead, copper, and iron, have been found, and are worked to a considerable extent. The inhabitants are composed of Russians, Cossacks, Tartars, and Ostiaks. For administrative purposes the government is divided into six districts—Tomsk (the capital), Barnaul, Kaimak, Kuznack, Kolyvan, and Tobolsk. Pop. 850,000

TOMSK, a to, W. Siberia, cap. of above gov. principally between a bank Tom and the ridge of hills which accompanies its bed. It consists partly of an upper town, built upon a hilly ground which has received the name of Yekaterinaya-Gora or Hill of Resurrection, and occupied by the Russians and better classes; and a lower town or suburb inhabited by Tartars and Boshaks. The great road leading to the frontiers of China passes through this part of the town. The lower town consists of low but regular wooden houses, from amid which the slender towers of several mosques are seen to rise; the houses of the upper town are larger and of more imposing appearance. The public buildings include nine churches, two of which are large and handsome structures; two synagogues, several mosques, a bazaar, a college and military school, two hospitals, and a workhouse for exiles.

Vol. II

The manufactures consist of coarse cloth, leather, and some fine trade, both general and transit, is extensive. It is carried on chiefly by barter, and consists in furs, fish, and cattle, obtained in exchange for articles of European, Chinese, and Boshakian manufacture. Pop. (1850) 18,349.

TONA (SAN ANDRÉS-DE-) a vil. Spain, Catalonia, prov. and about 35 m. from Barcelona; with a church, primary school, ancient castle, and a trade in agricultural produce. Pop. 1534.

TONAGHITY par Isl. Mayo 5007 sq. Pop. 884.

TONARA a vil. and comm. in Sardine, div. Cagliari, 35 m. N. W. Orlanosa; with a trade in corn. Pop. 2540

TONAWANDA, a vil. U. States, New York, 12 m. N. Buffalo, r. bank Niagara, at the junction of Tonawanda Creek with the Erie canal. It has a good harbour and carries on a considerable trade. Pop. 1000.

TONOO a vil. and comm. Italy Piedmont, div. and 22 m. W. N. Alessandria, with a court of justice, and a hand some church. Pop. 1892.

TONDANO, a tn. Indian Archipelago, off N. E. point of Isl. Celebes, prov. Manado; with a district of its name.

TONDELA, a tn. and par. Portugal, prov. Beira-Alta, about 12 m. S. W. Viseu. Pop. 1280.

TONDERN (Danish, Tonder) a tn. Denmark, duchy and 42 m. N. W. Schleswig, cap. bail., on the W. side. It was once famous for its lace, still manufactured to some extent and has a normal school, and the remains of an old castle, the wing of which is now used as a prison. Pop. (agricultural), 2850. About 8 m. W. is a vil. and par. called Middel-Tonder (Great Tonder). It is still the central locality of the lace manufacture, in which from 8000 to 10,000 persons of the surrounding districts are engaged. In the immediate vicinity is the old castle of Solstenborg. Pop. 1500.

TONDI, a maritime tn. Hindoostan, S. Carnatic, near the entrance of Dulak's Strait 70 m. S. by W. Tanjore. It was once a place of some importance, and the capital of Pondoman's country a large seminary founded on the N. by prov. Tanjore, still governed by its native prince, under British protection.

TONDIA or TONDINA, a river Turkey in Europe, rises on the S. slope of the Balkan on the frontier of Bulgaria flows E., passing a little to the S. of Kozanlik, then S. E. traversing Adrianople, and joins the bank Maritima, after a course of about 160 m.

TONDO, a tn. Philippines, in Luzon cap. prov. of same name, on the large rocky opposite to Manila. It consists chiefly of cane, bamboo, and nipa houses but has several good stone buildings, a governor's house, a handsome church, manufactures of silk and cotton goods, a valuable distillery, and a considerable trade, chiefly in the hands of Malays and Chinese. Pop. 17,430. —The TONOVICA, though one of the smallest in the island, having only a current of about 80 m., is one of the richest, most industrious, and best-peopled. It is bounded N. by prov. Balabau and Nueva-Espa, E. Nueva Esp., S. Laguna and Lake Bay and W. Cavite and the Bay of Manila is surrounded except towards the sea, by well-wooded mountains, furnishing excellent timber and raising considerable quantities of rice, a small quantity of sugar, and numerous varieties of excellent fruit, including mangoes, peaches, pine-apples, and oranges, and carries on a considerable trade for which both the port of Manila and its principal stream, the Binondo or Tondo, navigable by canoe, afford good facilities. Pop. 215,640.

TOOE, a river, England, co. Somerset, rises 6 m. N. W. Wivelacombe, passes by Taunton, and joins the Parret between Langford and Bridgewater.

TONG a vil. and chapel, England co. York, on a hilly but well-wooded chalet, 8 m. W. S. W. Leeds. It is mostly built, and has a chapel of ease, a Wesleyan chapel, a school, and manufactures of rope and twine. Many of the inhabitants are employed in wool-combing. Pop. 2797.

TONG, two par. Eng. —1, Kent, 1883 sq. Pop. 242 — 2, Dorset 3464 sq. Pop. 511.

TONGA ISLANDS, S. Pacific. See FRIENDLY.

TONGATABOO or TONGA TART, one of the most S. of the Friendly Islands, Pacific Ocean; lat. (W. point) 21° 4' S. lon. 175° 25' W. (a). It is of coral-formation very level highest point 60 ft. in the form of an irregular crescent, deeply indented by a lagoon 5 m. broad, and enter-

TOPLITZA, or **TOPLITZA**, a vil Austria, Transylvania, co. Thorenburg, in a mountainous district, on a stream of same name, near its confluence with the Mureș, about 40 m. from Timisoara. It has a Greek united and a Greek non-united church. Near it are mines of antimony. Pop. 1250.

TOPOLIA, a lake, Greece. See COFAR.

TOPOLOVEZ, a vil Croatia, generalship Warasdin, on several hills, about 12 m. from Bellovar. It is the head quarters of a frontier regiment, and has a B Catholic church. Pop. 322.

TOPOLOVEZ (SAGT), a vil Hungary, Thidhar Tholis, near co. Temesvar, near the canal of Bega, about 4 m. from Kikinda; with a Greek church. Pop. 1061.

TOPOLY, or **TOPA**, a river Hungary descends from the Carpathians co. Barcs; flows S.E. past Barfeld and Varsna and joins r. bank Oudava total course, about 60 m.

TOPOLYA, a vil Hungary Hither Danube, co. Bacs, 40 m. N.W. Peterwardein with a R. Catholic church a chateau and a trade in cattle. Pop. 6615.

TOPOFAR, a market in Hungary, co. Sümegh 4 m. N.E. Kapuvár with a church, and several flour mills. Pop. 1360.

TOPOVEZ, or **TOPOVA**, a vil Hungary Hither Tholis, co. Zips, at the foot of the Carpathians, 10 m. from Kiskamark. It has a Lutheran, a Calvinistic, and a R. Catholic church, two castles, manufactures of linen, and a trade in flax. Pop. 1177.

TOPOZERO a lake Russia, W part of gov Archangel lat. 65° 50' N lon 81° 50' E. It is very irregular in shape, but gradually widens out towards the W. till attaining its greatest breadth, it has some resemblance to a triangle; length, N.W. to S.E., about 50 m. mean breadth about 9 m. It contains several islands, and discharges itself in the N.W. by a short channel into Lake Pija.

TOPPEFIELD, par Eng Essex E320 as. Pop. 1061.

TOPSCHAU, a market in Hungary. See Donaucau.

TOPEHAM, a market tn., river-port, and par England, co. Devon. The town is situated on the r. bank Exa, at its confluence with the Clyst, a few miles inland from the seacoast into which the former expands, S.E. S.E. Exeter, the river part occupying rather elevated ground, the lower part being on a level with the river. It has an Established church, and several dissenting meeting-houses, and a national, an infant and some other schools. The manufactures comprise ropemaking anchor and chain cables carried on at Weir near the town some paper-making and ship-building. The shipping trade is chiefly in timber and hemp, with a coasting trade in coals. Many of the inhabitants are employed in fishing. Area of par. 1740 aa. Pop. 3377. (—*Local Correspondent*.)

TOPEHAM a vil and township, U States Maine, on the Androscoggin, here crossed by a handsome bridge connecting it with Brunswick, 23 m. S.W. Augusta. It has several churches, and a courthouse, numerous saw mills, and a large export of lumber. Pop. 2010.

TOR, or **TOUA**, a seaport in Arabian Gulf of Suez, opposite to the N. part of the highland of Zeitos, lat. 28° 16' N; lon. 38° 41' E. The town is situated at the N.E. part of the harbour and is inhabited principally by Greeks and Bohemian Ashks. The harbour is formed by a reef that projects from the N. extremity to the S., having a great reef on it at times. During the violent N.W. winds, ships bound to Suez are often obliged to take shelter in this port, where the water is better than in any other place on the Red Sea, but provisions or other articles of refreshment are not to be obtained.

TOR-OMAZA, a tn. Naples, prov. Principato-Citra, 15 m. N.E. of Valle, in an unhealthy situation. It contains a palace of the bishops of Pollastro, two churches, and a seminary. Pop. 2500.

TORÁ a tn. Nagys, prov. Lávora, N.E. Gesta, on a hill, with a collegiate church and a convent. Pop. 1390.

TORAE (Kis- and Nagy), two contiguous vils Hungary, Barak, co. Torontal, on the Bega canal, near Nagy-Bacsakut with a Greek non-united church, and a trade in cattle and oats. Pop. (Kis-Torak), 2986; (Nagy-Torak), 3316.

TORAL-UDLA VIDA, or **TORAL-UDLA-GUMENAS**, a tn Spain, prov. and 23 m. S. Leon, r. bank Esla. It has two parish churches, primary school palace of the Duke de Frías, courthouses, and prisons; manufactures of linen and a trade in corn. Pop. 5128.

TORANO, or **TORANO** two places, Naples—1, a tn, prov. Abruzzo-Ultra I. N.N.E. Teramo, in a low damp situation. Pop. 1186.—2, a tn., prov. Calabria-Clerici, N.N.E. Cosimo with a convent, hospital, and almshouse.

TORBAGY (Kis-), or **TORWALD**, a vil Hungary, Hither Danube, co. and about 8 m. from Puch, with a trade in good wine. Pop. 1213.

TORBAY—1 A spacious bay, S. coast, England, co. Devon formed by two capes about 4 m. apart, which leave a secure recess between, forming an arch approaching to a semi-circle, where there is a perfect shelter from W. winds. The Prince of Orange, King William III. landed in this bay in 1688.—2 A harbour, W. Australia, co. Flinders, lat. 35° 5' S.—3 A small bay, Newfoundland, 7 m. N.E. John. **TORRHISCON** (San Torrens), a tn. Spain Andalusia, prov. and 48 m. S.E. Granada. It has two squares a courthouse and prison, a granary primary school, parish church a hermitage, and two cemeteries; six brandy-distilleries, five oil and three flour mills. Pop. 2303.

TORRHIAN, par Eng. Devon; 3010 as. Pop. 229.

TORCELLO, or **TORCULO**, a tn. Italy Venetia, on an is. of same name, in the lagoons N.E. Venice. It was once a place of great importance, but now has only a few splendid and singular fabrics rising out of grass and marshy fields, with a few fishing-boats on the site on which the greater part of the ancient city stood.

TORDEMUOZ, a tn. Spain, Leon, prov. and 29 m. N.W. Valladolid, with three churches, a nursery, a hand some courthouses, two primary schools and the remains of an old castle, manufactures of serge, and a trade in corn and cattle. Pop. 1300.

TORDELA, a vil Spain, Catalonia, prov. and 87 m. N.E. Barcelona, 1 bank Tordera with a townhouse, parish church primary school, and three flourmills. Pop. (parish town) 1858.

TORDEILLAS a tn. Spain Leon, prov. and 19 m. S.W. Valladolid r. bank Duero here spanned by a handsome and solid old bridge of 10 arches. It has a townhouse, two primary schools, two squares, two convents, two churches, two pump-houses, and three hospitals. Many of the inhabitants are engaged in husbandry and there are various fulling and other mills, tanneries, and manufactures of woollen fabrics. Much red wine, strong and heady as port, is grown in these districts. Juana la Loca (crazy Jane) mother of Charles V. lived for many years in one of the convents of Tordeillas, watching the coffin of her handsome but ruthless husband. Pop. 3590.

TORDINELE, a vil Sicily, co. Syracuse, on the side Vuk with a R. Catholic parish church. Pop. 1373.

TORRELLA, two places, Naples—1, 4 m. Principato-Citra N.W. San Angelo de Lombardi with a convent, hospital, and almshouse. Pop. 2800.—2, a tn., prov. Salerno, 8 m. N.W. Campobasso with three churches, and an almshouse. Pop. 1200.

TORRELLA (San Felice-Na), a vil. Spain, Catalonia prov. and 48 m. N.E. Barcelona, 1 bank Ter with a primary school, a theatre, and a parish church, flour-mills, manufactures of cotton twist and fabrics, coarse woollens, and paper and articles of tannery and comb. both of horn wood and horn with which Torrelio supplies, through Barcelona, all the markets in the peninsula as well as the island of Cuba. Pop. 1734.

TORRENO, a tn. Spain prov. Leon on both sides of the Sil, here crossed by a bridge, 21 m. N.E. Villafraña, with a parish church, courthouse, and primary school manufactures of linen, and a trade in agricultural produce. Pop. 1341.

TORGAL, a tn. Prussia, prov. Saxony, gov. and 43 m. E.N.E. Merseburg, cap. circle, 1 bank Elbe, here crossed by a wooden bridge nearly 2 m. long. It is surrounded by walls flanked with bastions, and otherwise fortified so as to be a place of considerable strength has a court of law, and several public offices, four churches a courthouse, lycæum two burgher-schools, a poorhouse, orphan and ordinary hospital manufactures of woollen and linen cloth, some shipping, a fishery and a trade in yarn corn, and wood. In 1700 Frederick the Great here defeated the Austrians, and in 1814 the town was besieged by the Prussians, and taken. P. 6661.

TORGALOW a tn. Prussia, prov. Pomerania, gov. and N.W. Stettin, in a well-wooded country, 1 bank Trosse. It has a church, a blast-furnace, and other iron-works. P. 1065.

TORGET, a small Isl. Norway off S.W. coast, Nordland; about lat. 65° 30' N. Its most remarkable feature is the mountain of Torget, which seems to rise almost perpendicularly from the water to a height estimated by Von Behn at more than 3000 ft., terminates in a deep cleft forming the basin of a small lake, and is completely perforated, not far from its centre, by an immense cavern 6000 ft. long, and 600 ft. high. It appears to have been formed by a series of convulsions.

TORGET MOUNTAIN AND CAVE
From Voyages de la Commission Scientifique du Nord.

evidence of which is furnished by numerous fissures which have shattered the mountain, and cleft it in one place almost from top to bottom. According to a tradition common in the North, the ancient kings of Norway when crowned used to visit this cavern and prove the vigour of their arm by hurling a javelin through it. Torget thus owes its name to the resemblance which it bears at a distance to a three-cornered hat.

TORGNY (anc. *Torgny*), a town in France, dep. Manche, 9 m. S.E. of St. Lo, generally situated and tolerably well built with an old stone wall and for the most part of the commerce and a trade in horses, sheep, swine, and grain. P. 2051.

TORINO, or **TORON**, a town in Naples, prov. Abruzzo-Citra, 10 m. N.W. of Vasto with three churches. P. 2180.

TORITTO a town in Naples, prov. Bari, 14 m. N.E. of Altamura with an almshouse. P. 2560.

TORJOK, or **TORONOK**, a town in Russia, gov. and 40 m. W. of Tver, esp. circle, bank Tver, which here receives the *Kidovets*. It is built with considerable regularity the private houses of wood and the public edifices of stone, and the streets are generally spacious though unpaved. It has 25 churches, one of them a cathedral, a monastery a nursery, a normal school orphan hospital and large stone-hall. The staple manufacture is embroidery of silk, and gold and silver thread on leather, chiefly *argus* or morocco. The principal articles are reticles, slippers, boots and shoes, belts, and caps. The situation of the town, on the road from St. Petersburg to Moscow and on a navigable river, gives it great facilities for trade, which is carried on to a large extent in the above articles of manufacture, and in hemp, flax, corn, tallow horse-hair linen, &c. P. 15,000.

TORKSEY par Eng Lincoln 8170 ac. P. 488.

TORMARTON par Eng Gloucester, 2645 ac. P. 463.

TORMER, a river Spain which rises in the sierra which divide Retrenadura from Old Castile, flows N.W. past Salamanca, and falls into the Douro between Villavieja and Ferrocalle, total course, 107 m. Its principal tributaries are the Aravilla, Corneja, Margalán, Valmusa, and Peña.

TORMOGHAM was Torgogham, par Eng Dorset 1500 ac. P. 1147.

TORNA, or **TORNYA**, a market in Hungary, esp. co. of its name, in a plain near the Torna river, 19 m. S.W. Eszék. It contains handsome county-buildings, an elegant chateau, an old castle, and a bathing-establishment, and has a trade in wood, corn, and wine. P. 2190. The country, the smallest in Hungary, bounded, N. by Szep. E. by Abony, S. by Dorog, and W. by Gács, area, 172 sq. m., is traversed by mountain ridges, between which its fertile valleys, yielding

good crops of corn and much flax, wine, and tobacco. The pastures are excellent, and rear great numbers of cattle. The rearing of bees forms an important branch of rural economy, and the forests, which are large, abound with game. The minerals include iron, which is worked and smelted to some extent. P. 81,900.

TORNACIO, a vil and com. Italy Piedmont, div. Novara. It has a handsome church. P. 1539.

TORNAREUCIO, a town in Naples, prov. Abruzzo-Citra W.S.W. of Vasto with a church and three chapels. P. 1840.

TORNAYACAS, a town in Spain, Retrenadura, prov. and 88 m. N.N.E. of Oviedo, with a beautiful parish church, a handsome town house, primary school, and hospital; several flour-mills, and a considerable transit trade between Retrenadura and the Castles. P. 1484.

TORNEÅ, a seaport in Russia, Finland, head of the Gulf of Bothnia, gov. and 64 m. N.W. of Ulsborg, esp. circle, bank Torneå, by which it is separated from the Swedish town of Haparanda, on the peninsula of Sweden formed by the mouth of the river. It is built with considerable regularity but the streets being unpaved, are almost inaccessible to carriages the houses are all of wood covered with thatch and the whole place has a lifeless appearance. It contains two churches, one of wood and the other of stone; and has a considerable trade in deals, salted salmon and other fish, reindeer-skins, butter, tallow, &c. Steamers ply between Torneå and Stockholm. P. 656.

TORNEÅ, a river, which issues from the lake of Torneå Trask in Swedish Lappland, flows S.E. across the lake of W. Bothnia, then E. forming the boundary between Sweden and Russia, and falls into the N. extremity of the Gulf of Bothnia at the town of its own name, after a course of about 250 m. Its principal affluents are the Lamo and Moonie which both join it on the left. Its current is very rapid, and being much obstructed by rocks, forms both cataracts and cascades.

TORNIMARTE, a town in Naples, prov. Abruzzo-Citra, 7 m. W. by S. of Vasto with four churches, and two almshouses. P. 1545.

TORNOLÒ a vil and com. dioc. and 43 m. S.W. of Parma, bank Torò with a primary school, and a trade in cattle. P. 8246.

TORNYA, a market in Hungary Thudor Thien, co. of Szekes, on the Szekes river an arm of the Maros, 18 m. N.W. of Arad. It has two churches, a chateau, national school, and a trade in corn and cattle. P. 2659.

TORO (anc. *Abroscus*), a city, Spain Leon, prov. and 21 m. E. Zamora, on an eminence overlooking a beautiful and fertile plain watered by the Douro, over which there is a fine bridge. This ancient and decaying city is surrounded with walls of earth, and is entered by six principal gates, besides various smaller entrances. It is a dull and backward place, with dirty and ill-repaired streets. It has a handsome but unfinished town-house, begun in 1778, in one of the principal squares, and in another called the market-square, a fine clock tower, also a chateau, well-furnished barracks, numerous fountains, a forwarding hospital, and two hospitals for the sick. Various schools, 16 parish churches, six monasteries, and eight suppressed monasteries, almost all more or less ruined, brandy-distilleries, flour-mills, brick and tile kilns, and a trade in almonds, grain, and mill-stones. Toro was once a place of great importance, and its plains were the granary of the Goths. Near it was fought, in 1475, the battle between Alonso V. of Portugal, and Ferdinand the Catholic, which gave the crown of Castile to Isabella. Here again was held, in January 1508, the celebrated Cortes by which, after her death, Ferdinand's authority was recognized. P. 6985.

TORO (anc. *Bozra*), an island off S.W. coast, Isl. Sardinia, lat. 38° 51' 06" N. lon. 8° 23' 44" E. about 6 m. E. of the Isl. of St. Antonio, consisting of a bold rock, 500 ft. to 600 ft. in height.

TORO, a town in Naples, prov. Salerno, 6 m. E.N.E. of Campobasso, with three churches, a convent, hospital, and five almshouses. P. 2850.

TOROCEKO, or **TROUSCOO**, a market in Austria, Transylvania, 40 and 14 m. S.W. Terebenburg, near the Aranyos with a church, and important iron-works. Pop 1900

TOROK BACSA, or **US-BACSA**, a market in Hungary, co. Torontal, 1. bank Theiss 25 m. N.N.E. Peterwarden, in a somewhat marshy but fertile district, with a considerable trade in corn. Pop. 4690

TORONTAL, a co. Hungary, bounded N. by Csongrad and Comad, E. Temesvár, S. Dentaeh, Bemat regimental district, and W. Bacs, area, 1808 sq. m. It is flat throughout, consisting of extensive plains, interspersed with meadows, and intersected by large rivers, of which the most important are the Theiss, Maros Temes and Bega. The climate is hot, and far from healthy, but the soil is generally fertile, and produces much corn, maize, rice, flax, hemp, melons, fruit, and tobacco. The mulberry also thrives well, and a good deal of silk is obtained. Great numbers of horses and cattle are fed on the rich pasture, and considerable attention is paid to the rearing of bees. Torontal is divided into four districts—Gyros-Beskereth, Gyros-Szent-Kiltes, Ujpest, and Toront. Kunka. The capital is Gyros-Beskereth. Pop. 848,800

TORONTO (formerly called **YORK**) the cap. city of Canada West, co. York, about 810 m. W.S.W. Montreal. It occupies a rather low site on a beautiful and nearly unbroken bay on the N.W. shore of Lake Ontario, with which the bay communicates by a narrow entrance, and from which it is separated by a low sandy belt nearly 5 m. long, lat. 43° 39' N. lon. 79° 31' W. The town, which is in the form of a peninsula, is built with great regularity, the streets intersect at right angles, and are generally spacious, well paved, and lighted with gas. The houses are for the most part substantial, and in the principal thoroughfares have often an elegant appearance. The public buildings are numerous, and many of them are very handsome, the principal, in an architectural point of view, are the Episcopal cathedral, an excellent specimen of portico architecture, the K. Catholic cathedral also in the pointed style, Trinity college, a highly ornate building somewhat after the model of Trinity college, Cambridge. St. Lawrence-hall a stately pile, and the city hall, occupied as the city building. Ontario or Levey's hall, where the law-courts are accommodated, the normal school, the lunatic asylum

THE NORMAL AND MODEL SCHOOLS, TORONTO.

about 1 m. from the city, and several of the churches. Besides the cathedrals already named, there are 21 other churches including 4 of England, four Wesleyan, two E. Catholic, two Scotch Free church, one church of Scotland, and various others of each. Other important buildings and establishments are the university, the buildings of which are erected on a block of land of about 150 ac., and approached by well planted avenues, the Parliament-house, in which the provincial parliament meets for four successive years, alternately with Quebec, Trinity college, in connection with the church of England, the Upper Canada college, the Government-house, the lunatic asylum, and the law. Besides the university, which has 10 professors, Trinity college, which has six professors of law and arts and seven of medicine, and Upper Canada college, which has a principal and 12 masters, there are various other educational establishments, among which may be mentioned St. Michael's college (E. Catholic), Knox's college, the Congregational institute the United Presbyterian divinity hall,

the provincial, normal, and model schools, Toronto academy and a county grammar-school. The several edifices of literary institutions are the observatory, the Canadian institute the Athenaeum and newroom, and the mechanics' institute. The benevolent institutions are the lunatic asylum, a general and various other hospitals, a general and an eye dispensary a female emigration society, &c. The principal market is a handsome structure, situated in the E. section of the town; the markets are well supplied, the surrounding district being one of the most populous, most fertile, and best cultivated in Canada. The principal industrial establishments are foundries, tanneries, breweries, distilleries, sawmills, starch, glue, soap and candle factories, rope-walks, and paper and flour mills. The harbour which admits vessels of the largest size navigating the lakes, is remarkably well sheltered, and affords great facilities for its extensive trade consisting chiefly in flour, wheat, oats, wool, furs, and skins, planks, boards, and shingles. The total exports from the port of Toronto, for the year ending January 6, 1864, amounted to £231,490, 5s. 6d., and the imports to £1,165,866 14s. 5d. In 1863 the former amounted to £274,260 and the latter to £2,014,948. It was founded in 1794 and at first made little progress its population in 1880 being 2860 but in 1848 it had increased to 15,238 and in 1862 to 26,763. By the census taken in 1861 it was ascertained to have increased to 44,251

TOROPA, a river, Russia, issues from a small lake among the Valdai Hills, in N.E. of gov. Pskov flows S.S.W. forming several lakes by its expansions, and joins r. bank. Drives on the frontier of gov. Viatka total course 70 m. the greater part navigable by barges.

TOROPETA, a tn. Russia, gov. and 148 m. N.E. Pskov cap. droia, on N. shore of Lake Solovien, where the Toropa issues from it. It is a well built sharring place with a cathedral 13 other churches, and two monasteries extensive tanneries and other manufactures and a very important trade supplying all the surrounding districts with manufactured goods and colonial produce, and receiving in return corn, hemp, flax, and other products which are sent to the Toropa into the Dvina, and out to it by Riga. Pop. (1849) 5'44

TORQUAY, a seaport in and watering place, England co. Devon, pleasantly situated on a series of heights and depressions on the N. side of Torbay and on a branch of the South Devon railway, 21 m. S. Exeter. It consists principally of two streets, one of them about 1 m. long stretching through the vale towards Tor of several commanding terraces and of a great number of isolated cottages and villas, with gardens attached is substantially built of limestone, well lighted, well kept and tolerably well supplied with water and has two parochial churches, one of them a handsome structure with a lofty nave; two chapels of ease, a Wesleyan, Baptist, E. Catholic, two Independent, and some other Dissenting chapels, national infant, and other schools; a mechanics institute, assembly-rooms, subscription and reading rooms, a townhall with a square tower, a dispensary, museum, public gardens and baths a long pier forming an excellent promenade, a harbour in which spring-tide runs 18 ft. and a little trade, consisting chiefly of imports of timber and coals, and exports of earthenware, cider, yellow ochre, and fish. The progress of Torquay has been and continues to be rapid, owing to its situation as a watering-place. For invalids, the climate in winter is among the mildest and best in England. Pop. 1903

TORQUEMADA, a vil. Spain, Leon prov. and 18 m. E.N.E. Palencia, r. bank Pisuerga, with a primary school and church. Near it is a fine bridge of 25 arches over the Pisuerga. Pop. (agricultural), 2769

TORRALBA-DE-CALATRAYA, a tn. New Castle, Spain, prov. and 10 m. N.E. Ciudad-Rail, with a townhouse, prison,

several primary schools, a parish church, and a hermitage a hour and 15 oil mills, and 1500 women employed in the manufacture of lace, in connection with the factory at Almagro. Pop. 2890.

TORREJO two places, Portugal:—1 A tn. and par. Alentejo, 21 m. S.W. Evora. Pop. 817.—2 A tn. and par. prov. Douro, 20 m. S.E. Oporto. Pop. 1190.

TORREAZZA-COCCA, a vil. and com. Italy, Piedmont, div. Alessandria, prov. Voghera, with a small square, two parish churches, and three convents. Pop. 1865.

TORRE, numerous places, Naples, particularly:—1 A tn. prov. Calabria Ultra II, S.W. Catanzaro, near bank Arcisole. It suffered greatly by the earthquake of 1783. Pop. 1600.—2, *(del Gran)*, A tn., prov. and 8 m. S.E. Naples, E. shore, Gulf of Naples, at the S.W. foot of Mount Vesuvius. It is surrounded with fine villas and gardens; and contains a handsome collegiate and a parish church, three convents, and a large hospital. The inhabitants are chiefly employed in fishing, and go as far as the coasts of Corsica and Sardinia to fish coral about 300 vessels of 7 to 14 tons and each carrying 8 to 12 hands, are engaged in this trade. The town suffered much by a terrible eruption of Vesuvius, in 1794. The soil of the district, formed of decomposed lava, is remarkable for its fertility, and produces exquisite fruit and wine. Pop. 18,000.—3, *(dell' Annunziata)*, A tn. prov. and 13 m. S.E. Naples, on the E. coast of the Gulf of Naples, in a plain at the S. foot of Mount Vesuvius. It ranks as a fortress of the fourth class, being surrounded with walls, and defended by a strong tower. It is admirably situated on a commanding height, and gives the town its name. It contains two churches and a convent, and has manufactures of gunpowder, fireworks and paper. Pottery of all kinds is made here. The fishing in the bay is productive, and there is a considerable coasting trade. Pop. 4000.—4, *(della Padula)*, A vil., prov. Otranto, S.E. Gallipoli with a convent. Pop. 570.—5, *(della Noce)*, A tn. prov. Principato-Ultra, dist. Avellino with a convent and almshouse. Pop. 1275.—6, *(de Passeri)*, A tn., prov. Abruzzo-Ultra, 13 m. S. (Vivido-Petro), 1 hour, Pescara, with three churches, manufactures of earthenware, and a dye-works. Pop. 1156.—7, *(de Saverio)*, A small part on the E. coast, Calabria-Circ., the place at which Hannibal embarked on finally quitting Italy.—8, *(di Mare)*, A vil., prov. Basilicata, dist. and 24 m. S.E. Matera, near the mouth of the Basento in the Gulf of Taranto. It is supposed to be near the site of the ancient Metapontus, which was founded many centuries before the Christian era, and in which Pythagoras taught and died.—9, *(Maggiore)*, A tn. prov. Capitanata, 6 m. W. San Severo with a fine ducal palace, two churches, and two convents. Pop. 4530.—10, *(Santa Quaresima)*, A tn., Naples, prov. Otranto, 12 m. S.W. Brindisi; with a convent, hospital, and almshouse. Pop. 1500.

TORRE, numerous places, Spain, particularly:—1 *(de San Miguel)*, A vil. Spain, Extremadura, prov. and 37 m. from Cáceres, with a townhouse, prison, school, and a church, wine-presses, flour-mills, and a soap-manufacture. Pop. 1072.—2, *(de Esteban Andueza)*, A tn. New Castle, prov. and 20 m. N.W. Toledo with a handsome church, a courthouse with a fine colonnade, a palace, prison, primary school, flour-mills, and a trade in wine and fruit. Pop. 1121.—3, *(de Juan Andueza)*, A tn. New Castle, prov. and 45 m. S.E. Ciudad-Real, with a handsome church, a courthouse, primary school, and bull-dogs, manufactures of woolen and linen cloth, numerous distilleries and mills, and a trade in corn, wool, wine and brandy. Pop. 1140.—4, *(de Miguel Guerrero)*, A tn. Extremadura, prov. and about 20 m. from Badajoz with a church, which originally belonged to the Templars, a courthouse, endowed school, manufactures of soap, and oil and flour mills. Pop. 970.—5, *(de Santa Maria)*, A vil. Extremadura, prov. and about 20 m. from Cáceres with a church, school, an oil and two flour mills and a trade in beef and hides. Pop. 1026.—6, *(del Cerro)*, A tn. Spain, Andalusia, prov. and 4 m. W. Jaén. It has broad and paved streets, a square, in which stand a strong oil castle and a fountain; a townhouse and prison, several primary schools, and a parish church. Near it are two hermitages, the ruins of an ancient castle, several old watch-towers, and abundant quarries of gypsum. Pop. 5748.—7, *(de Fargita)*, A tn. Spain, Andalusia, prov. and 21 m. N.E. Jaén; with rather well-built houses, and paved

streets; a square, a good townhouse, a prison, two schools, two fountains, an hospital for the sick poor, and a parish church 17 oil-mills, and several brandy-distilleries. Pop. 3448.—8, *(de San Juan)*, A tn. Spain, Andalusia, prov. and 8 m. W. Jaén, near the Guadalquivir; tolerably regularly built, with paved and generally broad streets, and several squares, a townhouse and prison, an ancient dilapidated castle, five primary schools, a fountain in the chief square, bathees several outside the town; two hermitages, two convents, and two parish churches seven flour and 30 oil mills, an excellent and productive salt-works, five manufactures of cloth, soap, and more than 500 handlooms for fine linens worked by women. Pop. 5787.

TORRE-DE BUA, a vil. and com. Italy, Lombardy, prov. Bergamo, 2 m. N.E. Cesirino, in a well cultivated district, with two parish and five auxiliary churches. Pop. 1386.

TORRE-DE-MONCORTO, See Moncorvo.

TORRE-DE-LUSANA, a tn. Italy, Piedmont, div. Turin, prov. and 12 m. S.W. Fierovito, on a lofty conical hill, at the confluence of the Angrosca with the Po. It has six small squares, one of which forms a planted public walk. A court of justice, a Waldensian Protestant and a R. Catholic church a superior and an elementary school, an hospital, a charitable endowment and manufactures of silk and prepared chemicals skins. Pop. 2691.

TORRE-DE-MONCORTO, a vil. and com. Italy, Piedmont, div. Cuneo, prov. and 4 m. S.E. E. Mondovì, a poorly built place with a parish church a charitable endowment, and the remains of an old castle. Pop. 1675.

TORRE-PALAVICINA, a vil. and com. Italy, Lombardy, prov. Bergamo, 7 m. S.E. E. Romano, near bank Olivo; with a church, tile-works, lime kilns and spinning-mills. P. 1384.

TORREBLANCA, a vil. Spain, Valencia, prov. and 24 m. N.E. Castellon-de-la-Plana, with primary schools, a church, and two hermitages. Pop. (agricultural), 1791.

TORRECAMPO, a vil. Spain, Andalusia, prov. and 35 m. N.E. Cordova, at the meeting of four dells near the Guadalquivir. It has a townhouse and prison, two primary schools, church, and five hermitages several flour-mills, and small soap-manufactures two potteries, 14 looms for linen and linen, and dairy-manufacture. Pop. 2108.

TORRECILLA, several places, Spain, particularly:—1 *(de Alconete)*, A tn. Aragon, prov. Teruel, r. bank Mesquén, 70 m. from Saragossa. It is well built; has straight and well paved streets, a massive and richly-decorated church, a courthouse, and primary school and a trade in corn, wine, and silk. Pop. 1024.—2, *(de la Orden)*, A tn. Leon, prov. and 18 m. S.W. Valladolid; with a church, courthouse, prison, and primary school; manufactures of woolen, linen and hampden cloth, tile-works, and a trade in the articles of manufacture, and in corn and cattle. Pop. 1827.—3, *(de Camero)*, A vil. Old Castile, prov. and 16 m. S.W. Logroño; with a townhouse, prison a porchouse, four beautiful fountains, two schools, and three churches united, and a mine of bole, considered by some superior to that of Ardenia manufactures of cloth and paper, dye-works, a speculata and several flour-mills. Pop. 1948.

TORRECUBO, a tn. Naples, prov. Principato-Ultra, dist. and 25 m. N.W. Avellino with two churches, an hospital, and an almshouse. Pop. 1700.

TORREDERBABA, a small seaport, Spain, Catalonia, prov. and 10 m. W.W. Tarragona, in the Mediterranean; lat. 41 11 N. lon. 1° 34' E. It has an ancient castle, two primary schools, a townhouse, an hospital with a public cemetery a parish church, and a chapel and manufactures of salt, soap, brandy, hampden fabrics, and fishing-tackle. Pop. 1860.

TORREJON DE ARDOZ, a vil. Spain, prov. and 11 m. N.E. Madrid, with a townhouse, two primary schools, and a church. Pop. (agricultural), 1016.

TORREJON DE VILANOVA, a tn. Spain, New Castile, prov. and 18 m. S.W. Madrid; with a church, courthouse, primary school and old castle on an oil-mill, and a trade in agricultural produce. Pop. 1660.

TORREJONCILLO, a tn. Spain, Extremadura, prov. and 31 m. from Cáceres. The houses are ill-built, and the streets irregular, inconvenient, and ill-paved. It has a square with a fountain, in which stand the prison and townhouse; and it also has two endowed primary schools, a parish church, and several hermitages, manufactures of brown cloth, hats,

leather, cotton, wax, flour, oil, and falling mills, and a trade in cloth and wool. Pop. 6573

TORREJONCILLO DEL-REY a vil. Spain New Castle, prov. and 38 m. S W Orense, r. bank Sigüela. It has a priory and townhouse, in one handsome edifice a good fountain, a public and a private primary school church, and hermitage, domestic manufactures of coarse linens and grogram, two dye-works, a shoe-street, two oil, and five flour mills. This is the birthplace of Alphonso de Ojeda, who was the first to follow in the track of Columbus, and who, accompanied by Amerigo Vesputi, discovered a portion of the continent of S. America. Pop. (agricultural) 2084.

TORRELAGUNA a tn. Spain, New Castle, prov. and 82 m. N N E Madrid, with a townhouse, priory, three primary schools, and a church, a four-mill, and manufactures of gypsum, bricks, and linen. Pop. (agricultural) 8099.

TORREMANZANAS, a tn. Spain Andalusia, prov. and about 80 m. from Alicante, 1 bank Torve with irregular streets; many features of earthenware, tile-works, and several oil and flour mills. Pop. 1106.

TORREMILANO, now called Dos Torres, a tn. Spain Andalusia, prov. and 88 m. N N E Cordova, with a townhouse and priory, two primary schools, a church and several hermitages. Domestic manufactures of woollen fabrics and three flour-mills. Pop. (agricultural) 5008.

TORREMOCHEA a vil. Spain Extremadura, prov. and 15 m. S E Cáceres; with a townhouse, primary school and church falling and several flour mills, and some handlooms for brown cloth, also some traffic in that article, as well as in sheep and swine. Pop. 1908.

TORRENTE (JAMES), S. Australia. See AUSTRALIA.

TORRENTE, a tn. Spain, prov. and 6 m. N W Valencia, situated on a small eminence beside a moraine-torrent. The houses are large, and in general two stories, and are laid out in broad and comfortable streets and regular squares, in one of which stands a large tower apparently of Saracenian construction. There are three primary endowed schools, a parish church, two hermitages, and on a hill near the town a suppressed convent. In the vicinity are some country-houses also quarters of yellow marble, which a moderate heat changes into red, adorned with beautiful clouds. Industry—agriculture, two flour-mills, 70 oil mills, almost every proprietor who has proper convenience being provided with one of these machines. The natives of Torrenste are remarkably thrifty and laborious, and besides supplying Valencia with bread and other articles, many of them turn the principal towns in Spain selling oil, bees, and various fabrics. Bams are also employed in preparing emulsions of almonds, &c. Pop. 5021.

TORRENUOVA a tn. Spain, New Castle, prov. and 82 m. S E Ciudad Real, pleasantly situated among gardens, olive-yards, and vineyards, nearly enclosed by the Jabalon. It has a parish church, two primary schools, a courthouse and priory, manufactures of woollen and linen cloth, brick, and tile works, lime-kilns, and a trade in iron and oil. P. 1890.

TORREQUEMADA, a vil. Spain, Extremadura, prov. and 19 m. from Cáceres; with a church, courthouse priory endowed school, and very ancient tower, several flour-mills, and an important annual cattle-fair. Pop. 4040.

TORRES, a vil. Spain, Andalusia, prov. and 10 m. E Jaen, consisting of ill-built houses with a square, townhouse, and priory, two primary endowed schools, and parish church, 11 oil and six flour mills. Pop. 1992.

TORRES, two places, Portugal, prov. Estremadura—1, (Nova) A tn. 18 m. N by E. Santarém, on a flat watered by a small affluent of the bank Tagus. It is surrounded by walls, and defended by a strong castle, contains four parish churches, a Latin school, and almshouse; and has manufactures of cotton. Pop. 4264.—2 (Vedado), A tn., 1 bank Alentejo, which is here crossed by several bridges 35 m. N by W Lisbon. It is partly surrounded by old walls, and defended by a castle, but is not capable of much resistance. It contains four parish churches, two hospitals and a Latin school, carries on a considerable trade in wine, and has an

annual fair. In the neighbourhood are an aqueduct with Gothic arches, and the celebrated convent of Varradio. Torres-Vedras has been rendered familiar to British ears by the famous lines of defence which Wellington erected on the

TORRES VEDRAS.—From Vittoria. Property of Portugal and Spain.

neighbouring heights in 1810 and behind which his army lay, occupied till the decisive moment arrived, when it descended and compelled the enemy to a hasty and most disastrous retreat. Pop. 3386.

TORRES STRAIT the strait which separates Australia from Papua, its distance across, from Cape York the most N point of Australia, to New Guinea, being about 80 m. It is crowded with islands, shoals, and reefs rendering its navigation difficult.

TORRETTA a vil and non Franco, dep. Alpes Maritimes, near Levens with two small squares a church in a chapel a free school and the remains of an old castle. P. 1266.

TORREVEJIA a seaport, Spain Valencia, prov. and 28 m. S W Alicante, on the Mediterranean W from Cape Gerver. Lat. 37° 59' N. Lon. 0° 41' W. It has straight broad streets and three squares, but the clusters of hotels at the skirts of the town detract much from its beauty and symmetry. It has a townhouse, several primary schools, a parish church, and a cemetery several flour-mills, and some looms for linen, hempen, and cotton fabrics. The anchorage is good, but much exposed. There is an extensive and very productive salt lake in the neighbourhood, the produce of which constitutes the chief export of the port. About 866 vessels, of 27,625 tons, annually clear onwards. Pop. 8678.

TORRICE a tn. Italy deling and E S E Frascone, on a hill. Pop. 1040.

TORRICELLA a tn. Naples, prov. Abruzzo-Citra, 14 m. S W Lanciano, on a lofty eminence, with manufactures of coarse woollens, and a fair of two days. Pop. 2600.

TORRICELLA DEL-FRANCO, a vil and non Austrian Italy prov. and S E Cremona, near L. bank Po. It contains a parish church and has several mills. Pop. 1688.

TORRIDGE, a river England, co. Devon, which passes Torrington and falls into Huddard Bay. Course, about 40 m.

TORRIDON (Loch) an inlet of the sea, Scotland, W coast, co. Ross, 11 m or 12 m long consisting of three con. peninsulas, connected by narrow straits, the innermost basin being of considerable size.

TORRIGLIA a tn. Italy Piedmont, div. and N E Genoa, in the centre of an amphitheatre of hills among the Apennines. It has a handsome church, with a lofty spire; a small convent, and an ancient tower, forming the only remains of a very strong castle which it once possessed. P. 4672.

TORRIJO a vil. Spain Aragón, prov. Saragossa, on the slope of a hill above the Marchas here crossed by a stone bridge of three arches. It contains a church, courthouse, priory, primary school, and flour and falling mills. P. 1276.

TORRIJOS, a vil. Spain New Castle, prov. and 16 m. W S W Toledo, in a damp valley between the Tagus and a small range of hills. This much decayed place was once a walled town, and is still entered by two ancient gates, and surrounded by portions of earthen ramparts. It has a spe-

vines and sundry palaces of Count Alenquer, a townhouse, three-terraced houses, a small hospital for the sick poor, a large public school, a manufactory and parish church manufactory of soap, hair, and chocolate, and 17 oil and several flour mills. Pop. 1824.

TORKILE, a vil. and com. duchy and 9 m. N. Parma with a primary school, and a trade in corn, rice, wine, silk, cattle, and dairy produce. Pop. 3246.

TORRINGTON, a vil. several parcs. Reg.—(East) Lincoln, 1498 m. Pop. 1118.—3. (West) Lincoln, 1109 m. Pop. 133.—3. (North) Devon, 7400 m. Pop. 1115.—4. (Little) Devon, 2880 m. Pop. 623.

TORRINGTON (HARRIS), a market town and par. England, com. Devon, on the slopes and summit of a fine eminence rising steeply from the R. bank Torridge, 83 m. N. W. Exeter; houses chiefly of stone, irregularly built. It has an ancient church and three Dissenting chapels, a new modern market-hall, two charity schools and one or two commercial schools and two small public reading-rooms. Slave-trading is the principal business of the place, giving employment to many hundred females. There are also full-mongers, curriers, and tanners. General Monk was born in a hamlet in the vicinity, and hence the title of Earl or Viscount Torrington bestowed on him by Charles II. at the Restoration. Area of par. 8456 sq. Pop. 3308.—(Local Correspondent).

TORKHILL, a vil. chiefly prov. and 17 m. N. W. W. Ontario on an acclivity above the plain of Catus. Fine-spar is found here.

TORRITA SOTTO MONTI POLLICINO, a tn and com. Tuscany, 22 m. from Arezzo, built in the form of an oval and surrounded with fortified walls. It has a handsome parish and two other churches, a school hospital, theatre manufactory of woollens and hats, dye-works, a silk and several oil mills. Pop. 3939.

TORRUELLA DE MONTE, a tn Spain, Catalonia, prov. and 16 m. E. N. E. Girona, on the Tur. 4 m. from the Moit. terrace, at the foot of a hill crowned by an ancient castle. It has a townhouse, three primary schools, a church connected with which are two chapels, and manufactory of soap and brandy. Some fish are salted and exported. Pop. 8,000.

TORREX, a seaport, Spain, Andalusia, prov. and 34 m. E. Malaga, lat. 36° 48' N., lon. 5° 3' W., houses two and three stories, not well built, and with crooked and steep streets, two squares, a townhouse, several schools, a church, hermitage, and two fountains, three flour and two oil mills, two potteries, a brandy-distillery, a sugar-mill and fishery. Pop. (agriburial) 4174.

TORREBIA DEL CAMPO, a vil. Spain, New Castle, prov. Caen, and 60 m. S. E. Madrid with a townhouse, two primary endowed schools, a parish church, two oil and two gypsum mills. Pop. 1750.

TORRY, two villages, Scotland.—1. Co. Fife, 4 m. W. by R. Dunfermline, formerly in a flourishing state but greatly declined since the discontinuance of its extensive salt-works. Some coal is still exported from it.—2. Co. Kincardine, 1 m. S. by E. Aberdeen, on the R. shore of the Dee and harbour of Aberdeen. The inhabitants are mostly engaged in the fisheries. The fish taken consists of salmon, cod, haddock, ling, turbot, &c. There is a school in the village.

TORRY ISLAND, a rocky is. Ireland, S. coast, com. Donegal, lat. (light-house) N. W. and 55° 17' N. lon. 8° 15' W. It is about 24 m. long, and 1 m. broad. The N. side presents a range of cliffs 100 ft. to 800 ft. high, the land slopes down to the S. shore, which is flat. The inhabitants consist of about 70 families support themselves by fishing and tillage. On the N. point of the island is a light-house, the lantern of which is 122 ft. above sea-level.

TORRYHILL, par. Scot. Fife. 3 m. by 2 m. P. 1341.

TORSA, a small is. W. coast of Scotland, com. Argyll, between the land and the island of Luing, lat. 56° 17' N. lon. 6° 40' W. It has a quarry of excellent slate.

TORTEVAL, par. Guernsey, Pop. 655.

TORTHERWALL, par. Scot. Dumfriesshire, 5600 ac. P. 1812.

TORTINGTON, par. Eng. Sussex, 1181 ac. Pop. 104.

TORTOLA, one of the Virgin Islands, W. Indies, belonging to Great Britain, lat. 18° 34' S. N., lon. 64° 32' W. [N.], about 12 m. long E. to W., and 3 m. to 4 m. broad at the widest part, consisting of a mass of rugged and precipitous mountains rising E. to W., from one extremity of

the island to another. The shores are fringed with bays, harbours, and creeks, and, together with the adjacent cays, afford shelter and anchorage for a great extent of shipping.

TORTOLI, a vil. and com., is. Sardinia, div. Cagliari, prov. and 10 m. E. N. E. Lanuse, near the gulf of same name, on the E. coast. It is the see of a bishop, and has a large cathedral, an Augustine convent, and a considerable trade in wine and cheese, chiefly with Genoa. Pop. 1498.

TORTONA, a tn. Italy, Piedmont, div. and 12 m. E. Alessandria, cap. prov., at the foot of a bare and un cultivated hill, R. bank Scrivia. It is an ancient place, and was once of great strength, but its fortifications were completely destroyed by the French after the battle of Marengo so that now only some vestiges of the citadel and a single gate remain. It is not well built, the houses being generally arranged in narrow and ill-formed streets. In the only handsome square stands the cathedral, which has nothing remarkable except some paintings, and a finely-sculptured sarcophagus, containing among its figures a Phœnix, and a Caesar and Polixene. The other principal edifices are four parish churches, three convents, a royal college, a Latin and several other schools, a diocesan seminary, a civil hospital, a theatre, barracks, and a handsome cattle and corn-market. The manufactory consists of silk goods, bombasies and other stuffs, and there is a considerable trade in corn and wine. Tortona is the see of a bishop the residents of a commandant, and the seat of a superior law-court, and several public offices. It is the ancient Tortona, supposed to have been founded by the Gauls who invaded Italy under Brennus, and is mentioned by Ptolemy among the distinguished Ligurian cities situated between the Apennines and the Po. It has repeatedly suffered much from war. Pop. 10,821.

TORTORA, a tn. Naples, prov. Calabria-Citra, 45 m. N. N. W. Paola, on the flat summit of a lofty hill near the Gulf of Policastro. Pop. 1560.

TORTORELLA, a tn. Naples, prov. Principato-Citra, E. S. E. 11 Valle, on a rugged hill near R. bank Mercatello, with a counts church. Pop. 1069.

TORTORAJA, a vil. Sicily, prov. and 43 m. N. W. N. Messina. Pop. 2800.

TORTOSA (anc. *Duronis*), a city Spain, Catalonia, prov. and 48 m. W. Tarragona, on a hill-slope, 1 bank Ebro, here crossed by a wooden bridge. It is fortified on all sides, and some portions of the walls are of great antiquity. The town, which is entered by three gates, consists of irregular, ill-paved, narrow, and on the N. and S. steep streets; several small squares, and houses generally well built of granite, and three or four stories high. It has a townhouse, prison custom house, bull ring, ambulance, barracks, baths, episcopal palace, Gothic cathedral, with Louis chapel, numerous other churches and chapels, three monasteries six convents converted to secular purposes, an hospital for the sick, a foundling hospital, a theological school, a school for the higher branches of education, besides numerous primary schools and a lyceum, oil and flour mills, manufactory of soap fine cloth, cottons, leather, brassy common earthenware, cordage, linen, wax-candles, plain glass, starch, and baskets, ropes, &c., of palm and sisal, and an important trade, through its two ports, El Faner and Los Alfaques at the mouth of the Ebro, as well as directly—the river being navigable by vessels of 100 tons—

to the wheat of Aragon, timber from the Pyrenees, Aragon, and Catalonia, wine from Oudal, Calera, and other places, as well as that of the country oil, wool, alum, silk, barilla, soda, charcoal, liquors, tares, pitch, tar, sawwood, paper, fruits, &c. This city was wrested from the Moors by Louis-le-Débonnaire, in 811, but was soon recovered by them, and became a nest of pirates, and a thorn to Italian commerce.

Exquisite III. therefore proclaimed a crusade against it, and it was taken in 1148. In 1149 the Moors made a desperate effort to regain possession of the city, but were defeated, partly through the bravery of the women who mounted the battlements, while the men killed forth and routed the Moors.

Tortosa was taken in 1798 by the French under the Duke of Orleans. This bulwark of València and Catalonia was shamefully surrendered in 1811, by General Lalli, who was afterwards tried for cowardice and condemned to death, but received pardon from Ferdinand VII. Pop. 20,572.

TORTOSA, a tn. Asiatic Turkey, palat. and 30 m. N. Tripoli, on the Levant, opposite the is. of Rhodus. It once

plus the site of the ancient Orchades, and was formerly a place of importance, but now presents little more than the remains of its wall, and a large ruinous castle.

TORTIVAR, or **TORMANA**, a vil. Austria, Transylvania, 14 m. S.W. Kronstadt, on a hill above the Tisza with a R. Catholic and a Greek non-united church, a castle, and a custom-house. Pop. 8690.

TORTUGAS.—1. A group of islets or keys at the entrance of the Gulf of Mexico, 120 m. W. S. Cape Ymela, the S. extremity of Cuba, about lat. 24° 37' N., and lon. 83° W. They are 10 in. number, very low, and partly covered with mangrove-trees. On one of them, called Bush or Garden Cay, a lighthouse has been erected.—2. An island, W. India, N. E. coast of Cuba, from which it is only separated by a narrow channel called El-Savirral, length, N.W. to S.E. 38 m. breadth, about 8 m. It forms the entrance to the harbor of Las Navillas-del-Principe.

TORTWORTH, par Eng. Gloucester, 1661 ac. P. 257
TOSCAN, the Italian name of Tuscany (above see)
TOSCANELLA (see Tuscany) in Papal States, Italy, and 28 m. N. Civita Vecchia, on a hill washed by the Tiber. It is surrounded with battlemented walls and towers, and having been one of the strongholds of Francesco Sforza, has stood numerous sieges. After one of those by Charles VIII. of France, it was made a heap of ruins, and all its old buildings were destroyed, except two churches, one of which is adorned with pillars, mosaics, and antique sculptures. Salubrious is mixed in the neighborhood. Pop. 4000.

TOSCOLANO a town and com. Italy. Lombardy prov. and 21 m. N. E. Brescia, on a height above the W. shore of Lake Garda. It is an ancient place, supposed to occupy the site of the Roman Banoio, and in the 16th century was celebrated for its Paganino press, at which many valuable but now extremely rare editions of the classics were printed. It has a parish and two auxiliary churches, extensive manufactures of paper, several oil-mills, and a trade in wine, oil, silk, iron, and fruit. Pop. 3484.

TOSOLA, a vil. par Eng. Huntingdon 1850 ac. P. 230.
TOSLA, in **Toskana** (see Dagest) in Asiatic Turkey Anatolia, 80 m. S.W. Erzurum, in a fertile valley on the Derrek or Doros, an affluent of the Kizil Irmak, consisting of about 1000 houses, generally well built, with five mosques.

TOSNA, a river, Russia, rises in the N.W. of gov. Novgorod, enters gov. Petersburg flows N.W. and after a course of about 60 m. joins r. bank Neva. It is much used for floating timber to the capital.

TOSNA, a vil. and par. Switzerland can. and 12 m. N.E. Zurich, on the Tosa here crossed by a covered bridge. It contains the remains of a celebrated Dominican convent, now used as a corn and salt magazine. The Zurichers were defeated here in 1329 by Duke Albert of Austria. P. 1446.

TOSNA, a Spain, Catalonia, prov. and 20 m. S. Gerona, near a cape of same name in the Mediterranean, at the foot of steep, lofty, and almost inaccessible heights. It has a church, hospital, and primary school; manufactures of cotton goods and cork, a fishery and some customs-trade. Pop. 1663.

TOBT or **TOBNA**, in Prussia, prov. Sillesia, gov. and 28 m. S.E. Oppeln, cap. circle. It has a court of law, two churches, and a synagogue; manufactures of linen and shoon, and a trade in cattle. Pop. 1598.

TOSTAK, a river, Siberia, rises in gov. Yakutsk, near lat. 65° N. flows N.W. and joins r. bank Jana, after a course of about 400 m. Its chief affluent is the Adiga, which joins it on the left.

TORTOCK, par Eng. Suffolk, 940 ac. Pop. 848.

TOTALAN, a vil. Spain, Andalusia, prov. and 6 m. S.E. Malaga, on a hill with a church and a primary school. It sends deputies to Malaga. Pop. 1098.

TOTANA, a vil. Spain, prov. and 27 m. S.W. Murcia, intersected by a ravine. It has been reduced to half the size it had as no very distant date by war and epidemic diseases. It consists of ill built and irregular houses, and dirty and ill-paved streets; and has a substantial townhouse, various churches, a solid Tuscan parish church, besides several other churches, and two fountains, eight potteries, which produce much esteemed earthenware and a few looms for linen and a stock made of wool and iron-wire, called totes. Pop. 6664.

TOTANE, two par. Eng. Essex.—1. (Great), 6669 ac. Pop. 686.—2. (Little), 1883 ac. Pop. 898.

TOTHPALU, several places, Hungary.—1. A vil. on Tsch, about 8 m. from Waidom, on a hill in the Dobruja, with a Protestant church, a fishery a mill and some shipping trade. Pop. 2540.—2. A vil., on Tzpa, about 9 m. from Kikmark with several handsome villas, a R. Catholic church a mill, and mineral-springs. Pop. 1376.

TOTHILL, par Eng. Lincoln, 854 ac. Pop. 59.

TOTMA, a tn. Russia, gov. and 111 m. N.E. Volozhna, cap. circle, at the entrance of the Torna with the Sezhema. It consists chiefly of three large streets; contains 17 churches and three monasteries, and has extensive salt-works, and a considerable trade, carried on both with Archangel and Siberia. Pop. (1848), 8398.

TOTNESS, a town market tn. and par. England, on Devon, 24 m. S.E.W. Exeter, on the Dart, over which is a handsome bridge of three arches. It is well built; has a church in the later English style, and two Dissenting chapels two libraries, a small theatre, an assembly-room, and two or three schools. Some large weaving is carried on, but this branch of manufacture has fallen greatly off of late. There is a considerable shipping-trade, vessels of 100 tons being being now able to come up to the town at all times of the tide. The principal articles of export are cider, corn, grain, and wool. Great quantities of salmon are taken in the Dart. Totness sends two members to Parliament. Arms of par. combined with those of Bideford, 1643 ac. Pop. 8538.

TOTONICAPAN, a tn. corrugations of its name, Central America, Guatemala 80 m. N.W. Guatemala city. It has manufactures of some earthenware, wooden utensils, woven cloths, and a few other articles. Near it is a medicinal spring, and also a mine-spring from which a good deal of salt is extracted. P. 12,000.—The **COMMUNISMO** is bounded, N.E. by Vera-Paz, S.E. Solola, S.W. Quetzaltenango, N.W. Chiapas, and N. the lands of the Maya Indians, area, 8660 sq. m. The valleys here are well watered, and the land fertile, yielding good crops of wheat, maize, various fruits, vegetables, and some sugar the pastures also rear large numbers of cattle. The inhabitants are chiefly Indians, speaking the Quiché language.

TOTOUA, or **TOTOVA**, one of the Fudge Is., S. Pacific lat. 18° 58' S., lon. 179° 57' W. high and rugged, of volcanic formation, covered with luxuriant foliage and fertile, particularly in its valleys.

TOTTENHAM, a vil. and par. England, co. Middlesex near the Lea and the Eastern Counties railway 4 m. N.N.E. London. It consists of a long street of handsome but irregularly-arranged houses, and numerous detached villas, and has an ancient church, with a square embattled tower grown over with ivy, and several interesting monuments a district church, with turret at its angles; Baptist, Independent, Friends, Wesleyan, and R. Catholic chapels a grammar-school, several almshouses manufactures of various articles of earthenware and earthenware, a brewery and large flour and oil mills. Arms of par. 8409 ac. Pop. 9120.

TOTTENHILL, par Eng. Norfolk, 1660 ac. P. 412.

TOTTENHURGE, par Eng. Herts, 1897 ac. Pop. 635.

TOTTENNES, par Eng. Bedford 3294 ac. P. 735.

TOTTENSTON, par Eng. Norfolk, 1918 ac. P. 273.

TOTTINGTON, a town, Canada, a vil. and township, Erie land, co. Lanarcon on the East Lanarcon railway, 8 m. W.N.W. Bury with a neat district church, a Wesleyan chapel, an endowed school extensive manufactures of cotton goods, calico print-works, several collieries, and freestone-quarries. Pop. 10,591.

TOUAT, **TOAT** or **TWAT**, a territory or state of the Sahara, Africa; about lat. 26 to 27° N. intersected by the meridian of 1° E. estimated at nearly 700 m. in length N. to S. It contains a great number of villages, generally built of sun-dried bricks, and surrounded by date and other fruit trees; and is divided into five districts or independent chiefdoms, which, beginning at the N. are Mahara, cap. Tebalouma Gouara, cap. Timimoun D' Aungourent, cap. Kaabab el Hamra; Touat proper, cap. Sba and Tididit, cap. Isouak. The inhabitants consist of two distinct races. The one are Hall Touat, properly so called, who live in the towns and villages, call themselves Zenata, speak the language of that name, profess Mahomedanism, and though so black as negroes, are essentially distinguished from them by their equiline nose, thin lips, and other features. The other

rice consists of Arabs, who live in tents and speak Arabic, but use the Kanaka tongue in trading. The principal food of both races is mutton, emerald fish, better horseman's steaks, and corn. The last is imported from the Tail of Algeria by mulemen tribes. Among the principal articles of trade are gunpowder and antimony—the former manufactured at Sfax, and the other obtained from the mines of Tonsi—bismuth from Tikhalt, slaves, dates, better cheese, &c.

TOUBOUAI or **AUSTRAL**, a group of isls., S. Pacific Ocean, S. of the Society Islands and Low Archipelago lat. 21° 50' to 23° 45' S; lon. 159° to 147° 11' W. The principal islands of the group are Veritao the largest. Toubouai proper which is not more than 5 m. in extent, and Obeterra or Kouroukua, which rises to the height of 1800 ft. and has a numerous and bustling population.

TOUCQUE (La) [anc. Toulon], a river France, rises in dep. Orne flows about 20 N across dep. Calvados, and falls into the English Channel at the village of its name total course, about 60 m., of which 24 m., when favoured by the tide, are navigable.

TOUCY [anc. Tuscus] a tn. France, dep. Yonne, 15 m. S.W. Auxerre with an ancient church, manufactures of coarse woollens and leather, and a trade in wood. Pop. 1861

TOUL [anc. Toul] a tn. France, dep. Meurthe, 3 m. by 3 m. 1 pop. 501

TOUL [anc. Toul] a tn. France, dep. Meurthe, on a fertile plain on the Moselle here crossed by a handsome bridge of seven arches, 12 m. W. Nancy. It is a place of some strength being surrounded by walls flanked with bastions, but the houses are indifferently built, and the streets are irregular and badly paved with flints. It has a Gothic cathedral, founded in the 10th century with a fine facade 227 ft. high, and much-admired portal; the old collegiate church of St. Gengoul; a townhouse formerly the episcopal palace; college barracks, corn-market, civil hospital and hospital of Malou-Dieu, manufactures of stone-ware, leather and embroidery the latter of which employs more than 1000 hands and a trade in wine and brandy. Pop. 6002

TOULON-SUR-ARMOUX [anc. Tullorum ad-Armorum] a tn. France dep. Seine-et-Marne on the Armoix here crossed by a bridge of 13 arches 40 m. N.W. Mâcon It has a trade in corn, cattle, and wood. Pop. 1556

TOULON-SUR-MER [anc. Tula-Maria] a seaport in and after 1861, the most important naval arsenal of France, dep. Var admirably situated at the bottom of a deep double bay of the Mediterranean 30 m. S.E. Marseille lat. (observed) 43° 7' 30" N lon. 5° 56' E. (n.) It stands on a slope which ascends gradually from the sea, and terminates towards the

moorland, and with the exception of the S. and E., which are somewhat exposed, perfectly safe anchorage. In front of the bay is a projecting tongue of land, which stretches across so as nearly to close its entrance, and along which, as well as the adjacent points, numerous forts and redoubts have been erected, making a successful attack by sea all but impossible.

In like manner on the land side the fortifications are of the most complete description. In addition to the fortifications which surround the town, strong forts and outworks occupy all the important heights, and complete the defences. In the town itself, if we except the arsenal and other marine establishments which are on a scale of almost unrivalled magnificence, there is not much to excite interest. The houses are generally well built, but the space occupied by them is small compared with the extent of the population, and hence they are much crowded together without regularity, in narrow streets or small insignificant squares. The only edifice, unconnected with the marine which deserves notice are the cathedral, possessed of little architectural merit, and badly situated, the church of Notre-Dame, with a fine facade, the church of St. Louis, adorned with an elegant colonnade and the Hôtel-de-ville, a handsome structure facing the harbour. The port which is separated from the mainland by a mole, which are hollow and bomb-proof and based by batteries of 400 ft. long, consists of two divisions—the Port-Marchand or Darce-Vieille on the E. appropriated to merchant vessels, lined with a fine quay and handsome edifices and the Port Militaire or Darce-Neuve on the W., surrounded by the dock yard ship, arsenal, storehouses, cannon-foundry, park of artillery &c. Neither the manufacture nor trade are of much importance. The former consist of woollen-cloths, hosiery, soap, candles, and chemicals. Ship-building, also, is carried on to some extent and there are several dye-works, tanneries, and iron-foundries. The trade has increased considerably since the occupation of Algiers and is chiefly in corn, flour, salt-provisions, wine, brandy oil, capers, and fruit. There are two annual fairs, one of which lasts eight days. Toulon is the seat of a maritime prefecture, and a court of first resort and commerce and possesses a second class school of hydrography, a medical naval school academy communal college, botanical garden, museum of natural history marine zoölogy, and degree or bulks, in which on an average 8500 convicts are detained. Though a place of considerable and early there is nothing in its early history deserving notice. It owes its importance as a naval station to Louis XIV. who expended vast sums on it under the superintendence of Vauban.

The most memorable and disastrous event connected with it took place in 1793 when the British, to whom the royalists had surrendered it, having been forced to retire, after a siege in which Bonaparte gave the first decided proofs of his military genius, the republicans revenged themselves by giving up the town to pillage and the inhabitants to almost indiscriminate massacre. Pop. 25 145

TOULOUSE, an ancient cit. France which belonged to the prov. of Languedoc, and is now included in dep. Haute-Garonne and Tarn et-Garonne. Toulouse was the capital

TOULOUSE [anc. Tolosa Tolosa] a tn. France, cap. dep. Haute-Garonne, finely situated on the Garonne, where it is joined by the canals du Midi and Brienne, and on the trunk-line of railway which connects the Mediterranean with the Bay of Biscay 137 m. S.E. Bordeaux and 200 m. N.W. Marseille. It is built chiefly on the r. bank of the river but partly also on an island in its channel a handsome bridge across the river communicates with the large suburb of St. Cyprien. It is of an irregular oval form, and was surrounded with old walls flanked with towers, which have almost entirely disappeared to make way for extensive modern improvements. The appearance of the town by no means corresponds to the beauty of its site. It is almost entirely composed of clumsy antiquated houses of red brick, badly ornamented with clay and of a very gloomy appearance; and the streets are narrow, winding, ill paved, and dirty. Several parts of its town, however, are gradually assuming a modern and handsome appearance. Among others may be mentioned the Place-de-Capitole, a large and well-built square, adorned with four

W in a range of lofty hills. These, stretching their arms round, encompass the bay and nearly landlock it, forming a secluded and harbour where the largest fleet can find cover

basilica, one at each angle, and the chief place of public assembly, and the Place-Feytaud, a circular place with regular colonnades, and opening on the E. into a fine promenade, composed of three parallel alleys. The principal edifices are the *Hotel-de-ville* or capital, near the centre of the town, in the square to which it gives its name, a large structure, adorned in front with eight columns of red marble, and including, in addition to the municipal buildings, a theatre in the left wing; the cathedral, built about the beginning of the 13th century, but subsequently repaired and altered, so as to present a very incongruous appearance; the church of St. Martin, the oldest and most perfect of the ecclesiastical edifices, built of brick and stone, in the Romanesque style, and rendered conspicuous by a lofty octagonal tower formed by five tiers of arches; the church of St. Jean, with a remarkable bell-tower; the church of the Jacobins, surrounded by a lofty brick tower, and now converted into a barracks; the picture-gallery with many bad and two or three good paintings; the museum, with a good collection of Gallia, Roman, and Gothic antiquities; the *Convent des Inquisition* an obscure edifice, remarkable only for the atrocities which the tribunal to which it owes its name perpetrated within its precincts; and the *palais-de-justice*, in which the parliament of Toulouse used to hold its sittings, but now so completely modernized as to have lost all its ancient features.

The manufactures consist of coarse woollen cloth and woollen covers, silk and printed cotton goods, vermilion, *gout-de-fer-de-couleur* (black liver pig), starch, wax candles, military accoutrements, and porcelain. There are also numerous tanneries, both for common and Morocco leather; a famous flint powder and tobacco factories, dye-works, distilleries, and cotton-mills. The trade, general and transit, is important, being greatly favoured by the situation of the town, and facilitated both by water and railway communication. The chief articles are corn and flour, wine, brandy, colonial produce, iron and ironware, oil, soap, and fashions. Toulouse is the seat of an archbishop, the seat of an appeal court for *depts. Haute-Garonne, Aude, Tarn, and Tarn-et-Garonne*, and of courts of first resort and commerce; and possesses a chamber of commerce and exchange, a mint, a university, a secondary, a Protestant divinity hall, a diocesan seminary, facilities of law schools, and literature, a secondary school of medicine, veterinary school and school of artillery, an excellent botanical garden, agricultural society, antiquarian society and academy of sciences, inscriptions, and *belles-lettres*. It is a place of great antiquity, and rose to eminence under the Romans, who embellished it with a capital, amphitheatre, and other edifices, of which vestiges still remain. In the beginning of the 6th century the Visigoths became its masters, and made it the capital of their kingdom, which it continued to be till 506 when Clovis gained possession of it. Subsequently under Charlemagne it became the capital of Aquitaine. It was afterwards governed by independent counts, and in the 11th century fell a prey to the cruel blights of the Inquisition, who here established their infamous tribunal, and outraged multitudes of Albigenses and Vandales to the flames. The most memorable event in the modern history of Toulouse, is the defeat of the French by the British, under its walls in 1814, while ignorant that, by the abolition of Bonaparte, hostilities had ceased. Pop. [1822], 71,354.

TOULOUSE, a river Gironde, forming a part of the boundary between it and Mandourie. It flows N.E. then S.E., and falls into the Sea of Japan near lat. 43° 30' N, after a course of about 160 m.

TOULOUSE, a river China, which rises in a mountainous district near the S. frontier of prov. Kiangnan, enters prov. Kwantung flows S.W. to Hsiao-tchou then nearly W., and dividing into several branches, falls into the bay 11 m. N.E. of the town of Canton, after a course of about 250 m.

TOULOUSE, a village, France, dep. Vendôme, 18 m. S.E. Apt, named from a Roman tower which once stood here by. Pop. 1463.

TOULOUSE, a village, France, dep. Isère, 1. bank Bourgne, 41 m. N.W. Grenoble with manufactures of boot-root sugar. Pop. 2214.

TOULOUSE, an ancient prov. France, which consisted of an upper and a lower division, and had Tours for its capital. It is now included in dep. Indre-et-Loire.

TOULOUSE, a village, France, dep. Nord, 8 m. N.E. Lille, on the railway from Lille to Courtrai.

It is a tolerably regular and well-built manufacturing town, which has more than doubled its inhabitants since the commencement of the present century. It contains two churches, a townhall, and the remains of an old feudal castle; and possesses a communal college, *conseil-de-jeu-de-homme*, and chamber of manufactures. Its great staples are ordinary and table linen, muslins, cambric, and coarse cotton goods. It has also manufactures of carpets, numerous cotton and worsted mills, sugar-refineries, soap-works, dye-works, and distilleries. Pop. 15,885.

TOULOUSE, a town Chinese Turkistan, near the Tien-shan Mountains, 180 m. W. Kiamul. It is the residence of a prince invested with power over Toulou and five other towns.

TOULOUSE, two places, Belgium.—1. (the *Gouverneur St. Lambert-Libourne*), A vil and com., prov. S. Brabant, on the RR, 24 m. S.E. Brussels. It has a brewery and a trade in agricultural produce. Pop. 1702.—2. (the *Gouverneur St. Lambert-Libourne*), A vil and com., prov. S. Brabant, on the RR, 24 m. S.E. Brussels. It has several breweries, but agriculture is the chief employment. Pop. 1774.

TOULOUSE, a town, France, dep. Moselle, 2 m. S.E. Oberberg with the remains of an ancient castle and a slate quarry. Near it are several Druidical monuments. Pop. 1845.

TOULOUSE, or LOCHNAY (Flemish, *Lochnay*, Latin, *Thronon*) a town, Belgium, prov. Hainaut, 38 m. W. W. Mons, on the railway thence to Brussels, and on both sides of the Scheldt; which is here crossed by several handsome bridges, and enclosed by superb quays, finely planned, so as to form excellent promenades. It possesses strong fortifications, including an admirably-constructed citadel by Vauban, is entered by seven gates and consists in general of spacious streets and squares, lined by well built houses. The principal edifices and establishments are the cathedral, a very ancient structure, of Romanesque and Opital architecture, with five pointed towers a majestic interior of which the choir is particularly

THE MARKET PLACE TOUNAL, WITH THE CATHEDRAL AND BELFIEY.—From Prout's *Sketches in France and Germany*

adorned, many interesting remains of antiquity, and some good paintings, among which is one of the *Booth in Purgatory* by Rubens; seven other churches, of which that of St. Brice, with the tomb of King Childeric adjoining, is the most deserving of notice; the ancient convent of St. Martin, and its Gothic church now used partly as a townhouse and partly as a museum, with a park and botanical garden adjoining the belfry; a lofty tower in the market-place of unknown date, but supposed to have formed, in the beginning of the thirteenth century, the duplex of a castle, a large and imposing building in the Romanesque style, originally a cloth hall, and now converted into the principal guard-

house; a concert-room, with a colonnade *dehors* supporting a dance court; of first resort and commerce, *especially* of primary and secondary schools, a school of arts, an academy of design, painting, sculpture, and architecture; an unusual secondary, a picture-gallery, a public library, an observatory, a theatre, a deaf and dumb asylum, literary and musical societies, and several hospitals and similar benevolent institutions. The manufactures, which are extensive, employing about three-fourths of the inhabitants, consist principally of woollen and cotton hosiery, carpets, which have long been celebrated, porcelain, on a very large scale, linen and cotton tissues, leather, and lace. The trade, favoured both by the railway and the navigation of the Scheldt, includes, in addition to the manufactures, a large export of lime from quarries in the vicinity and besides a daily market for provisions, a weekly market for corn, flax, and linen thread, and three weekly markets for cattle, there are a number of important cattle and linen annual fairs, two of which last 10 days.

Tournai, formerly the capital of the Tournaisis, is one of the oldest towns of Belgium. It is supposed to be the Civitas Nervorum mentioned by Julius Caesar, because in 458 the residence of Meroveus, third king of the Franks and was often occupied by his successor, Childeric, who founded his cathedral, and died in it in 481. It was fortified by Philip the Fair in 1295, and afterwards figures much in history. Of its many sieges, that in which it was heroically defended by Marie de Lorraine, Princess of Guise against the Duke of Parma, is the most famous. Pop. 33,000.

TOURNAISIA, an ancient city, Belgium, which had Tournai for its capital. With the exception of a part belonging to W. Flanders, it is now included in prov. Hainaut.

TOURNIERS (Flemish, *D'Wey*) a vil. and com. Belgium, prov. Brabant, on an affluent of the Senne, 9 m. S. Brussels. It has manufactures of paper a brewery several sheep-mills, and a trade in corn. Pop. 2745.

TOURNOI (anc. *Tournensis*) a tn. France, dep. Ardèche, 25 m. N. Privas, at the foot of a steep precipice, r. bank Rhodan, opposite to Tala, with which it communicates by a handsome suspension bridge. It has a court of first resort an agricultural society a college, an old castle of the counts of Tournon, now used as a prison and a trade in wine, champagne, silk thread and silk goods wool and woollen cloth wood, &c. Pop. 3518.

TOURNAIS (anc. *Tournensis*) a tn. France, dep. Indre-et-Loire, r. bank Sèvre, here lined by a handsome quay, and crossed by a wooden bridge of five arches, 10 m. N. E. Mâcon. It contains an ancient church in the Romanesque style, two hospitals, a townhouse, and house of correction. In the public square there is a granite pillar, supposed to have belonged to a Roman temple. The manufactures consist of woollen and cotton weaves, machine-beds, silk, potash and boot-sole sugar, and the trade is in corn, wine, and building-stones. The painter Grosse, who died at Paris in 1805 was born here. Pop. 4216.

TOURPES, a vil. and com. Belgium, prov. Hainaut on the Little Dendre, 16 m. N. W. Mons, with manufactures of beer, a brewery a flour-mill, and a trade in agricultural produce. Pop. 1235.

TOURS (anc. *Turonis* or *Caesariacum*) a tn. France, dep. Indre-et-Loire, 1 bank Loire, on a flat tongue of land lying between the river and its tributary Cher, 190 m. S. E. W. Paris. The principal entrance to it is by a magnificent bridge across the Loire, consisting of 15 arches, and 1253 ft. long, and continued by a fine street, which traverses the town throughout its whole length, and constitutes its principal thoroughfare. The banks of the river are inclosed by a quay lined with handsome houses and finely-planted promenades. Great part of the town is new and many of the streets are spacious and elegant, but the older quarters are very indifferently built, and generally consist of streets which are narrow, irregular, full, and dirty. The principal offices are in the cathedral. Its W. front consists of three lofty portals crowned over the roof with a solid structure, surmounted by a window of astonishing dimensions and flanked by two female figures, 205 ft. high. The interior, which is of the purest Gothic, and lighted by beautifully-stained glass, is 245 ft. in length, and 85 ft. in height and, among other objects of interest, contains a fine marble monument of the two early children of Charles VIII. and Anne of Bretagne, by whose early death

the succession to the crown was thwarted. The other buildings chiefly deserving of notice are two towers, forming out-lying objects from every part of the town, the one called the tower of St. Martin or *Horloge*, from containing the principal clock; the other the tower of Christendom because his queen Luigarda was buried below it; and both remarkable as the only relics which the revolutions of 1793 have left of the vast cathedral of St. Martin of Tours, after it had been shut for 17 centuries; the church of St. Julian degraded into a coach-house, but still a fine pointed edifice of the 12th century; two circular and unadorned towers, inclosed within the walled-barracks, forming part of the earth built by Henry II. of England; the church of St. Clement, a simple and beautiful structure, with a fine portal, but now used as a corn-market; the archiepiscopal palace, regarded as one of the most handsome in the kingdom the prefecture, with a public library of 40,000 vols. and several remarkable MSS. picture-gallery and museum of natural history, the townhouse, courthouses, general hospital, and an elegant fountain of white marble, occupying the centre of the market-place. The manufactures consist of silk stuffs, ribbons, broad cloth, serge, rags, starch, and wax-candles; and the trade is in corn, wine, branched dried fruit, wax, hemp, wool, &c. Tours is the seat of an archbishop the seat of a court of first resort and of commerce, and possesses a chamber of commerce a society of agriculture, science, art, and *belles-lettres*, a diocesan seminary a secondary ecclesiastical school, and a communal college. It early acquired considerable importance, and under the Romans became the capital of Lugdunensis III. In more modern times it had become famous for its silk manufactures, and had so extended as to have a population of 80,000 when the restoration of the edict of Nantes deprived it of nearly half its inhabitants, and almost all its industry, and inflicted a blow on its prosperity from which it has never recovered. Tours has become a favourite residence of the English, whose numbers within it have been estimated at 8000. In the neighbourhood, about 1 m. W. of the town, is the castellated den of Plessis-les-Tours, of which an admirable description is given by Scott in his *Queen's Daughter*. Pop. 35,521.

TOURVEE, a tn. France, dep. Var, 8 m. W. Brignoles. It is generally well built, contains the ruins of an ancient castle, picturesquely seated on a conical hill which overlooks the town, and has manufactures of soap, paper-mill, tanneries and distilleries. Pop. 3223.

TOVARISOVA, a vil. Hungary either Danube, co. Bacu, 9 m. from Oluk, with a Greek church, and a trade in corn, cattle, and silk. Pop. 1893.

TOVARNIK, a market tn. Austria, Slavonia, co. Syrmia, near Vukovar with a R. Catholic and a Greek church Pop. 3695.

TOWCESTER, a market tn. and par. England, co. and 84 m. S. E. W. Northampton on the Tor, with a handsome church chiefly in the later English style, several Dissenting chapels, a grammar-school, three almshouses, and some minor charities. The manufactures are bobbin-lace, boots, and shoes. Area of par. 3790 ac. Pop. 3625.

TOWENDACK, par. Eng. Cornwall 2794 ac. P. 1057

TOWERSEY, par. Eng. Dorset 1300 ac. P. 443.

TOWIE, par. Scot. Aberdeen 4 m. by 3 m. P. 746

TOWN YSTRACHT, a vil. Scotland, co. Roxburgh, in the vale of the Bowmont, here crossed by a good bridge, 8 m. S. E. E. Kelso. It has two annual fairs, one for linen and wool, and another for cattle. A considerable number of gipsies reside in it. Pop. 618.

TOWNSTALL, par. Eng. Devon, 1796 ac. P. 1808

TOWTON, a township, England, co. York, 3 m. S. Tadcaster, and memorable as the scene of a sanguinary conflict in 1461, during the wars of the Roses. It is said that 110,000 men were engaged, and 36,776 slain. Pop. 173

TOWY (Twy), the largest river of S. Wales, next to the Wye. It rises in Carmarthenshire flows E. to Llanvyn-y-Cornwall, thence W. to the town of Carmarthen whence it flows S. W. to Carmarthen Bay into which it discharges itself by a wide estuary, total course, about 45 m. Yields of 300 tons second to Carmarthen.

TOWYN, par. Wales, Merioneth, 36,572 ac. P. 2749

TOYNTON, four pars. Eng. Lincoln, 1, (-42-5000) 5120 ac. Pop. 515-3 (Hghs) 1210 ac. Pop. 312-4.

(Low), 560 ac. Pop. 180-4, (St. Peter), 2630 ac. P. 439.

TOZER, or **TOZET**, a tn. regency and 250 m. S.W. Tunis; houses mostly well built, generally of one floor and chiefly of the ruins of a Roman town. In the centre is a large square, used as a market-place and there are two mosques, two baths and a bazaar; and many of the inhabitants are occupied as smiths, gunsmiths, joiners, and merchants. The Jews are dyers and goldsmiths, and the women card, spin, and weave wool.

TRABEJ, a river Russia, rises in S.W. of gov. Caucasus, enters gov. Poltava, flows past S.E. to Perevolnya where it receives the Alta, then S.W. and joins the bank Dnieper after a course of about 90 m.

TRABEN, a tn. Rhinisch Prussia, gov. and 89 m. S.W. Coblenz, at the foot of the Trarbach 1 bank Moselle here crossed by a bridge, opposite to Trarbach. It contains a parish church, and has a trade in cattle. Pop. 1228.

TRABOLAN par Irel. Cork, 890 ac. Pop. 890.

TRACHENBERG, a walled m. Prussia, prov. Silesia, gov. and 55 m. N.W. Breslau, on the Barthe. It has a court of law and several public offices, a castle, in which the Prince of Hohenlohe-Schillingsburg resides; a Protestant and a R. Catholic church, a townhouse, industrial and other schools, an hospital, orphan asylum, manufactures of fur, a fishery some transit trade by barges, and a trade in cattle. P. 2459.

TRACHTELWALD, a vil. and par Switzerland can. and 16 m. N.E. Bern. It consists of wall built houses, and has a handsome church, a new school house, and an old castle, with a tower and walls of immense thickness. P. 1528.

TRACTON par Irel. Cork 8662 ac. Pop. 1796.

TRACUNHAEM, a vil. and par Brazil, prov. Pernambuco, 40 m. W. Goiana. It contains a parish church, and raises a good deal of cotton. Pop. 4000.

TRADATE, a vil. and com. Italy Lombardy prov. and 11 m. S.W. Como near bank Olona. It is a cheerful-looking wall-built place; contains several handsome churches and private mansions, and has some trade in an excellent red wine produced in the district. Pop. 2145.

TRADE-TOWN, a maritime tn. W. Africa, Liberia, near the S.E. extremity of the colony.

TRAFALGAR, a cape, S.W. coast, Spain at the N.W. entrance of the Strait of Gibraltar. lat. 36° 10' N. lon. 6° 1' W. It is low and muddy, and terminates in two head lands on the E. of which is a round tower. The famous naval battle in which Nelson lost his life, after subduing the combined French and Spanish fleets, under the command of Villeneuve and Gravina, was fought off this cape, October 21, 1805.

TRAHIGUERA, a vil. Spain, Valencia, prov. Castellón-de-la-Plana, 19 m. S.W. Tortosa with a townhouse, several well-attended primary schools, a primary in hospital parish church, and two chapels and manufactures hempen-wools and earthenware, with which Trahiguera supplies all the towns round about. Pop. (chiefly agricultural), 1916.

TRAHIRAB, a tn. Brazil, prov. and 210 m. N.N.E. Goias, 1 bank Trahiras river, an affluent of the Maranhão. It has a healthy site, and a cheerful look, and contains a church and a school of mutual instruction. A good deal of gold is found in the stream after heavy falls of rain and there are also mines of tin, which is obtained in large quantities, and much used for sea-lanterns. Pop. (dist.) 3000.

TRAINA, a little-known tn. Sicily, prov. and 28 m. N.W. Catania, on a mountain. Its inhabitants are said to be in wretched circumstances. Pop. 7000.

TRAJIKIRCHEN or **TRAJIKIRCH**, a market in Lower Austria, in a plain on the Mühlbach, on the railway to Grätz, 14 m. S.W. Vienna. It is irregularly built and has two churches, one of them with a tall tapering spire, a porch, and manufactures of glass. Pop. 1115.

TRAITORS or **VERMADERS** the island, one of the Navigator's group, E. Pacific lat. 15° 57' S., lon. 175° 55' W. It has an elevated surface, but a fertile soil, and appears to be densely peopled.

TRAJANAPOLI See OLSKROVA.

TRAJETTO, a tn. Naples, prov. Lavoro, 10 m. N.E. Caserta, on a hill near bank Ausonia. It contains a collegiate and four other churches and a convent. It is built on the ruins of the ancient Minturnæ, among the remains of which Marcus sought an asylum from the pursuit of Sylla. P. 5160.

TRALES, a tn., near an tn., Newport, and par Ireland, co. Kerry, near the head of Tralee Bay, lat. 52° 17' N. lon.

10° 45' W. It consists principally of a main street, about ½ m. long, stretching in a tolerably straight line E. to W.; and of several other streets running at right angles with it, all of which are very indifferently kept. Houses mostly of limestone. It has an Episcopal and a Scotch church, a R. Catholic and two Dissenting chapels, a very handsome county-court-house, barracks, jail, workhouse, infirmary, and fever hospital, several public schools, with nearly as many private ones, a Protestant orphan society and a nautical school. The export trade in corn and provisions was at one time very considerable, but it has now all but entirely disappeared, the corn-stores having been converted into branch-workhouses. The only trade carried on now to any extent is in butter. Pop. (tn.), 18,759. Area of par., 4505 ac. Pop. 12849. (Local Correspondent.)

TRALLONG par Wales, Brecon 8994 ac. Pop. 818.

TRAMELAN or **TRANSMANAR** a vil. and par Switzerland can. and 25 m. N.W. Bern, near the source of the Rhine. It is well built, consists of 1. type and lower Transmanar and has manufactures of clocks and particularly of a kind of horse-hair plait much used by the female peasantry of the nation in their head-dress. Pop. 8817.

TEAMONTI, a tn. Naples, prov. Principato-Citra, 7 m. W. Salerno. It consists of several scattered hamlets and contains 14 parish churches, a monastery and nursery, and several other establishments. A great deal of charcoal is prepared here for the supply of Naples. Pop. 3500.

TEAMORE, a maritime tn. Ireland, co. and 64 m. N. Waterford, on the side of a hill in the N.W. corner of Traamore Bay. It has a very handsome church, a R. Catholic and a Methodist chapel, several schools, including some respectable boarding and other schools and two charitable institutions, one of which is a Dorcas society. There are numerous fine walks in the vicinity and one of the most beautiful beaches that may anywhere be seen. On these accounts, and the salubrity of its air, Traamore is much resorted to for sea-bathing. Pop. 1892. (Local Correspondent.)

TEAMUTOLA, a tn. Naples, Principato-Citra, 28 m. S. Potenza with a church, three chapels, convent and almshouse. Pop. 4000.

TEANA, a vil. and com. Italy Piedmont, div. Turin, prov. and 20 m. E.S.E. Susa, 1 bank Sangone. It is indifferently built. Pop. 1628.

TI ANCOBO, a tn. Brazil, prov. Bahia 10 m. S. Porto-Seguro, on the shore of a small bay of the same name. It has a church and a primary school. Inhabitants mostly Indians, employed in fishing and cultivating cotton. Pop. 1506.

TEANCOBO, a tn. Portugal prov. Beira-Alta, in a beautiful plain, 17 m. N.W. Le Guedra. It is surrounded by ancient walls flanked with 15 towers, and defended by a castle contains six parish churches, a Latin school hospital, and almshouse and has an annual fair of three days. Pop. 1269.

TRANEKJAR, a vil. and par Denmark lat. Langeland with the ruins of an old castle, once a strong fortress, on an isolated height.

TRANET, a vil. and par Scotland, co. and 7 m. W. by S. Haddington. It has a substantial Established church, and Free and U. Presbyterian churches. The inhabitants are mostly colliers. Area of par., 5454 ac. Pop. 4156.

TRANI or **TRANAVORON**, a tn. and seaport, Naples, prov. Bari on the Adriatic, 20 m. N.W. Bari. It is surrounded by a fosse and a wall flanked with bastions and is entered by three gates. The houses are tolerably well built, but the streets, with some exceptions, are narrow winding, and badly paved. The principal edifices are the cathedral and the castle. The former is ancient and spacious, but its style of architecture is indifferent, and many of its decorations are preposterous. In addition to it there are 20 parish churches, six monasteries, two seminaries, a large diocesan seminary, a theatre, and female orphan asylum. The harbour which is almost unenclosed by the town, once contained great depth of water but has so much silted up that small vessels only can enter.

The trade, however, is considerable, and consists chiefly in oil, silk, wine, and fruit. Trans suffers much from excessive summer-heats, and a great want of spring-water. The only alternative is the collection of rain-water by cisterns, almost every house being provided with one, and roofed so as to collect it most effectually. Cotton is grown in the district, and partly manufactured into coarse goods. Pop. 14,000.

TRANSMERE, a vil. and township, England, co. Chester, on the Mersey, a little S. of Birkenhead. It contains a great number of handsome villas and other residences, occupied chiefly by Liverpool merchants, and has a plain church, three Dissenting chapels, a school, and several objections. The Bay of Transmere, owing to the great depth of water in the Glid, and the shelter of surrounding hills, affords excellent anchorage. Pop. 6519.

TRANQUE, an isl. S. America, forming the entrance to a bay on E. coast, Isl. Chiloé. A range of hills, nowhere exceeding 500 ft. in height, runs through S. W. to S. E. The inhabitants appear to be few in number.

TRANQUEBARI, a ta. Hindoostan, on E. or Coromandel coast, 18 m. N. Nagapattam, in the presidency of Madras, and district of Tanjore lat. $11^{\circ} 1' 50''$ N. lon. $79^{\circ} 55'$ E. It stands between two arms of the river Cavery and is surrounded by ramparts faced with masonry, and having at the S. E. angle, the castle of Dancohor, containing a lighthouse and the government offices. The town is neatly built, and there are two Protestant churches, a Portuguese chapel, and Danish English, and Portuguese schools. The territory—area, 15 sq m.—is sandy or marshy and partly under cultivation for rice, dry grain, and fruit-trees, including vines. The bay at the mouth of the Cavery is always safe for small vessels, and the water is least violent in the month of Pondicherry. Some manufactures of cotton clothes and handkerchiefs, oil, soap, leather, and salt are carried on and these goods, with rice, paddy and skins, are shipped for Madras Ceylon and occasionally the Mauritius and Bourbon. Tranquebar was purchased by the British from the Danes in 1845. Pop. (1844) town and territory 15,426.

TRANSCALUCARIA, or **ROMA-XTUND-THE-CAUCASUS**, a new division of that part of the Russian Empire constituted by an ukase in 1845 bounded, E. by the Caucasus, W. the Black Sea and Asiatic Turkey, S. Asiatic Turkey and Persia, and E. the Caspian and consisting of the four govts.—Kutais, in the N. W., Teflis, in the W. and centre Shamachi, in the S. E. and E., and Derbend, in the N. E. The area, 50,324 sq. m., is apportioned among the four governments as follows—Kutais, 5195 3/4, Teflis, 24,484 80, Shamachi, 18,995 and Derbend 13,957 6. Aggregate pop. 2,648,000.

TRANSCALUCARIA, an independent state S. Africa, established by the Boers in 1848 lat. $22^{\circ} 25'$ to $28^{\circ} 20'$ N. lon. $26^{\circ} 30'$ to 32° E. It is bounded N. and N. W. by the Limpopo, E. by the Quabana Mountains and Natal, and S. by the K. G. river or Vaal river from which it takes its name, and the Orange River republic. It is well adapted for sheep and cattle rearing. Area, 60,480 sq. m. Chief tn. Potchefstroom. White pop. (1858) 40,000.

TRANSYLVANIA, [German, *Steinbürgen*; French, *Transylvanie*; Hungarian, *Erdely*] a grand princip. [Grossfürstenthum] forming the S. E. prov. of the Austrian Empire lat. $45^{\circ} 12'$ to $47^{\circ} 45'$ N. lon. $22^{\circ} 15'$ to $26^{\circ} 20'$ E. and bounded N. and W. by Hungary, S. and E. the Danubian Turkish provinces of Walachia and Moldavia, from which it is separated by the Carpathian Mountains and N. E. the Bukovina. It is of a very compact and tolerably regular square shape, greatest length, E. to W. 194 m. greatest breadth N. to S., 165 m. area, 17,900 sq. m. The surface is very much diversified, but certainly deserves to be characterized as mountainous the Carpathian chain not only covering its S. and E. frontier but sending out numerous ramifications, the most important of which, proceeding E. to W., give more or less of that direction to its principal streams. The culminating points of the mountains are situated near the S. frontier where Megel, not far from Hermannstadt, has a height exceeding 8000 ft. and Bistritzsch; near Kronstadt it is scarcely 100 ft. lower. Many of the isolated summits, also, are elevated and often present scenery remarkable for its grandeur. The mountains in the S., along the whole of the frontier E. to the Burea, a little W. of Kronstadt, are entirely composed of primitive rocks, of which granite usually forms the basis. These rocks are succeeded by graywackes which stretches almost without interruption across the country and N. to the sources of the Theiss. Still farther N., a great tract of the chain extends from the banks of the Aluta, at the point where it flows S. W., and thence upward to the foot of the Bukovina. To the W. of the primitive and crystalline rocks now mentioned, the sandstones of the carboniferous

system make their appearance, and are so largely developed as to occupy a considerable proportion of the whole province.

The whole surface belongs to the basin of the Danube, which receives a great part of its waters by a very circuitous process. A little to the N. of the centre of the province a branch of the Carpathian strata crosses to E. to W. and forms a secondary water-shed. All the country S. of it is drained by rivers which have a S. W. or W. S. W. direction, and thus reach the Danube without being obliged to make many windings. The chief of these rivers are the Aluta and the Maros, with its tributaries the Great and Little Kolos. But to the N. of the above water-shed the rivers, being barred in by it, take first a W. and then a N. direction towards the Theiss; and hence the waters of the N. part of Transylvania do not reach the Danube before they have made the circuit of a great part of Hungary. The principal rivers by which the drainage is thus effected are the Simonea, by far the largest the Krassna, and the Körös.

The climate is very much modified by the diversity of surface; the higher districts having a severe winter which not only covers the rivers with ice, but often extends itself far into the spring so as to cause serious injury to vegetation, while on the other hand the summer-heat of the lower grounds is at times extreme. On the whole, however the air is healthy the sky clear, and the temperature well adapted to bring all the more valuable plants of Central Europe to maturity.

In some of the loftier districts, almost bordering on the limits of perpetual snow, vegetation is necessarily confined within very narrow limits, but at lower altitudes magnificent forests begin to appear and not only furnish valuable timber, but add greatly to the productiveness of the lower grounds by the shelter they afford. Among the trees are several of economical value for the food obtained from them, and both the almond and chestnut are found thriving on the vicinity of Kronstadt at the height of 1900 ft. above sea level. In all quarters equisetic fruits, including apples, pears, plums, cherries, apricots and peaches, are to be had in abundance, and the culture of the vine in general over the country. The mulberry would thrive well, but little attention appears to be paid to it. Notwithstanding the general ruggedness of the surface, there are many wide valleys and extensive plains, admirably adapted to the ordinary operations of agriculture, and on these, though much more in consequence of their natural fertility than the skill displayed in managing them, rich harvests are reaped. The crops include, in addition to the ordinary cereals and pulse, maize, hemp, flax, tobacco, cotton and smaller. Domestic animals also are very numerous, and fine breeds of horses, cattle and sheep are reared. The most of the forests feeds large herds of swine. Game also both large and small is abundant, and the rivers are remarkably well supplied with fish. Bees do not receive much attention, but are so very numerous, as a wild state, that large quantities of honey and wax are obtained.

The minerals are very important. Almost all the streams contain gold in greater or less quantity in their sands, and so fewer than 25 gold-mines, and to be very productive, are in actual operation. Silver also is worked with success in three mines, and there is one mine of galenaifer. The other minerals of value are copper, lead, iron, antimony, arsenic, the coal, alum bitumen, sulphate, and salt. The last occupies immense tracts, and is evidently inexhaustible. Crystals and fine pebbles, including garnets, rhyncholites, amethysts, chalcocedon, apatite carnelians, and jaspers, are found in many quarters.

Manufactures have made little progress, and are chiefly in the hands of the German portion of the inhabitants. They consist chiefly of woollen cloth, flannel, and linen, particularly the last, which is made to some extent, though scarcely in sufficient quantities to meet the home consumption. Other manufactures, besides those connected with the working of the various metals and minerals, are paper, gunpowder, leather, porcelain and earthen ware, glass, iron and copper ware, furniture, and a great variety of articles in wood. The trade is in a great measure confined to the natural produce of the country. The most important exports are salt, to the amount of 70,000 tons annually; corn, horses, cattle, and swine, wax, honey, tobacco, wool, swine, hides, skins, iron, and antimony. The imports, introduced chiefly by active merchants,

who make their purchases at Vienna and Leipzig, consist of all kinds of manufactured tissues, military colonial produce, hats, glass, &c. The iron and commission trade is very limited in extent, and is entirely carried on by Armenians and Greeks.

The population of Transylvania, which amounts in all to about 3,000,000 souls, is very much divided, and consists of 255,000 Magyars or Hungarians, 285,000 Saxons, 237,000 Saxons, 1,100,000 Slovaks, 80,000 Rumanians or Gypsies, 9000 Armenians, 2000 Jews, and 300 Bulgarians. Arranged according to the forms of religion which they profess there are 323,000 Calvinists, 235,000 Lutherans, 552,000 united Greek, 677,000 non-united Greek, and 75,000 Unitarians. The chief territorial division is into the land of the Hungarians, the land of the Saxons, and the land of the Saxons. Another division is into eight counties, three districts, 17 municipalities, and 115 minor districts [Bourgeois]. The inhabitants along the E. and S. frontiers are subject to a kind of military discipline, holding their land under the tenure of providing for the defence of the country against foreign aggression. With this view the land occupied by them has been divided into frontier regimental districts, defended by four regiments of Infantry, two of these Saxons and two Walachian, and one regiment of Saxonian Hussars. The constitution of Transylvania is somewhat complicated: it is a dependency to the Hungarian part, but has some peculiarities of its own which possess large powers and privileges, defined by a decree or charter issued by the Emperor Leopold I. in 1691. According to this charter, Transylvania is a Grand Principality. The sovereign of Austria, as grand prince, possesses all the usual powers of the executive, as to confer titles, honours, and privileges, levy troops, declare peace and war and dissolve diets, coin money &c. To the states or diet [Diets] belongs the right of making and repealing laws relating to internal management, voting sums of money and taxes &c. They form two chambers [Zembla] and hold their sittings in Klausenburg, which accordingly is considered to be the capital. Besides the general rights belonging to the diet, composed of all the three nations, each nation has its peculiar territory, privileges and municipal constitution. In these respects the Hungarians and Saxons though differing in some points, are nearly identical. They are both subdivided into the three classes of nobles, burghers, and peasants, the last being, with few exceptions, *serfs*. The Saxons, on the contrary, have no political distinction of classes. In the eye of the law there are no nobles, no peasants, but all individuals are possessed of equal rights and equal freedom. Thus at least is the theory, but as there is nothing to prevent Saxons from voting to the rank of Hungarian nobles, and many of them do so, the practice is somewhat different.

Transylvania was known to the Romans under the name of *Desis Camulodunensis*, and was conquered by Trajan, who established a colony in it. Its name of Transylvania is said to be derived from the Latin words *trans* across, and *silva* and is said to have been given it by the people who lived beyond its W. frontiers, and to whom it was rendered almost inaccessible by a border of dense forests. Its German name of Siebenbürgen or Seven Castles, is derived from its seven walled towns, which are supposed to have been originally built, and are still chiefly occupied by Saxons. The Hungarian name Erdély is a derivative of Erdő (wood), and is equivalent to Woodland. After the fall of the Roman Empire the country was occupied successively by Goths, Huns, Avars, Slavians, and Hungarians. The last long retained possession of it, and governed it by princes or vassals. It has formed part of the Austrian dominions since 1699 and though from its proximity to Turkey and internal dissensions its tranquillity has been repeatedly disturbed it has made considerable advances in population, civilization, and general prosperity.

TRACONA a vil and com. Italy Lombardy 15 m W Sondrio near 1 bank Adda; with a parish church, and several district courts and offices. Pop. 1109.

TRAPANI (anc. Drepanum) a seaport in Sicily, emp. prov. of the same, 46 m. W E. W Palermo, on a peninsula shaped like a scythe, and hence its ancient name of Drepanum, or Scythe. It ranks as a fortress of the second class, being surrounded by walls, flanked with bastions, and defended by several castles. It has regular but badly-paved streets,

generally well-built houses; and numerous public edifices, including about 40 churches, of which none but the cathedral and church of San Lorenzo possess much architectural merit. The palace in which the provincial assemblies meet is a handsome edifice. The harbour is good, and is defended by two forts, which cross their fire—one on the mainland and another on the island of Columbaro, on which also a light-house has been erected. The chief manufactures are shell-work, and cord, ivory and slippers. The trade is considerable, particularly in soda and salt, the latter being extensively made in the neighbourhood. The fishing particularly of the tunny is actively carried on. Trapped being the capital of the province, is the residence of its chief authorities, and the seat of a high criminal and civil court. It also possesses a college, two seminaries, and two hospitals. At a short distance P. M. E. of the town is Mount San Giuliano, the ancient Eryx, one of the loftiest in Sicily much celebrated by the poets, particularly Virgil, who makes Aeneas, the father of his hero, die here. Pop. (1850) 24,938.—The mountain forming the W. portion of the island, and surrounded by the sea on all sides except the E. is 565 m. long N. to S. and 42 m. broad area, 1260 sq. m. The surface consists of an elevated ridge or plateau, which slopes down on three sides towards the shore, and on the land or E. side is connected with the final ramifications of the Madonia Mountains. The coastline is very much indented, and exhibits throughout its whole extent a continued succession of bays and promontories. Of the latter the most conspicuous are Cape San Vito, terminating a long peninsula in the N. and Cape Rose, which forms the most W. point in the island. Off the W. coast are a number of smaller islands which belong administratively to the province. The smallest of these skirt the shore, but the three largest—Favignone, Levanzo, and Marlinho—are at considerable distances from it. The soil of the province is generally fertile, and well adapted to the growth of grain, particularly wheat. Pop. (1850) 162,609.

TRAPANO or DRAPANO, two capes Turkey in Europe. The one, on W. coast of Asia Minor, is a headland of the promontory projecting into the sea between the gulfs of Saida and Arzyro, the other terminating the long peninsula of Macedonia which stretches between the gulfs of Candara and Monte Sento is in lat. 39° 56' 30" N. lon. 28° 57' 15" E. (h.) and has a height of 380 ft.

TRAQUAIR, par. Scot. Peebles, 6 m. by 5 m. P. 646. TRARACHA, a tr. E. Rhodus, France, gov. and 85 m. S W Coblenz, on a height above r. bank Moselle, here crossed by a bridge of boats. It is 11 ft. high, and has narrow dirty streets, a seat townhall of modern Gothic, a church, and a prison. Several windmills, and a trade in wax, shell, bark, wood wool, and cattle. Near it are copper and lead mines, and slate-quarries. The red wine grown here ranks as the best of the Moselle. On a height overlooking the town, and commanding the river, is the old castle of Gräfenburg, once deemed one of the strongest between Treves and Coblenz. Pop. 1494.

TRAS OS-MONTES, the most N.E. prov. of Portugal, bounded N. and E. by Spain from which, in the latter direction, it is separated by the Douro. S. by Beira-Alta, from which it is also separated by the Douro and W. by the Douro and Minho gulfs. E. to W. 30 m. breadth, 60 m. area 3125 sq. m. The surface is generally unproductive and owing to deficiency of water, some districts are parched. The streams, however, are numerous flow from N. to S. and belong, with a very limited exception in the N.W., to the basin of the Douro which forming the boundary of the province both on the E. and E. receives a considerable portion of its drainage directly. The most important streams besides the Douro, are the Tago, Oreg, Tago, Tago, and Tago. The valleys and well-watered plains between the mountain ridges are fertile, and produce in abundance all kinds of cereals, and a great variety of excellent fruits, particularly grapes, figs, peaches, oranges, almonds, and chestnuts. The greater part of the sunny slopes are covered with vineyards, from which much of perhaps the best wine in the world is produced. In the higher grounds the pastures feed numerous herds of cattle and flocks of sheep, while the sum of the forests is consumed by swine, for which the province has long been celebrated. In sheltered spots between the olive and the berry thrive wall and a great deal of silk is obtained. The

marketing of bees is much attended to, and several districts bear a high name for the excellence of their dairy produce, particularly cheese. The exports derived from these sources is considerable, that of wine occupying by far the first place. For climaterical purposes Transylvania is divided into four zones—Vile Reel (the capital), Bregana, Clavus, and Monorro. Pop. (1841) 300,840.

TRAISEN, a river Lower Austria, which descends from the N. slope of the Traisenberg near the frontier of Styria, flows N. E. and joins r. bank Danube, after a very circuitous course of nearly 55 m.

TRAISENHOFEN, a vil Austria. See DEARENHOFEN.

TRASILLOO (Latin, *Trans Silvum*) a m. and com. duchy of Modena, near Mass. Dunsie; with a court of justice, a parish church, and a chapel. Pop. 2165.

TRAU or **TRAUUN** (Latin, *Travunum*) a m. Austria, Dalmatia, circle and 80 m. N. W. Spalato, on an island of the same name, communicating by two long wooden bridges with the mainland on the N., and the island of Bra on the S. It is surrounded by ancient walls and other fortifications, in a very dilapidated state; and consists of old houses arranged in dark and narrow streets, but often rendered venerable by their antiquity and adorned in the Venetian style with balconies. It is the see of a bishop and has three churches three monasteries, a gymnasium and hospital. A trade in wine, oil, and fruit and a good harbour, much frequented by shipping. Pop. 8900.

TRAI N (Latin, *Trave*) a river Austria, rises in the N. W. of Styria flows first W. into Upper Austria, then N. E. expanding into several lakes, of which that of Traun is the most celebrated passes the towns of Hallstatt, Ischl, Gmünd, and Wells and joins r. bank Danube about 8 m. below Linz, after a course of 100 m. Its principal affluents are the Alben and Krems on the right, and the Ager on the left. It is navigable by small barges up to Hallstatt and by vessels of 60 to 70 tons to Lambach, about 10 m. above Wells but the navigation is difficult and dangerous, owing partly to the rapidity of the current and partly to the number of rocks and shoals. A fall of about 40 ft. occurs near the village of Fließ but the obstruction which it offered to the navigation has been removed by cutting a canal. The chief traffic is in the salt brought down from the mines of Salzbarg.

TRAUNSTEIN a walled town. Upper Bavaria, cap. dist. 1 bank Traun 50 m. S. E. Munich. It has a court of justice, and other public offices, three churches, a castle, and townhouse, salt-works, gunpowder-quarries, and a trade in corn, cattle, and flax. Pop. 2238.

TRAUTENAU New **TRAUTENAU**, or **TRUTENAU** (Latin, *Trutunum*), a m. Bohemia, circle and 26 m. N. by E. A. Huggitz. r. bank Aupa with a deanery church, townhouse, poorhouse, and hospital. It is the centre of the linen manufacture in the Riesengebirge, and has numerous mills, and an important weekly market for linen and yarn. Pop. 2405.

TRAVAGLIATO, a vil and com. American Italy prov. and W. S. W. Brucina with a large and beautiful church, and manufactory of iron and ribbons. Pop. 314.

TRAVANCORE, a native state, Hindostan, subsidiary to the presidency of Madras, and occupying that portion of the S. extremity of the peninsula, between lat. 8° 5' and 10° N. and lon. 76° 20' and 77° 30' E. bounded E. by the Ghats, separating it from the British districts Travancore and Malabar N. the Cochin territory W. and the Indian Ocean, its frontier terminating at the S. E. at Cape Comorin length N. to S. about 140 m. breadth decreases gradually from 60 m. in its N. part area, 4727 sq. m.—(1796). *Survey of India*. The mountains on the E. rise generally to between 4000 ft. and 5000 ft. in height (the Angulgar peak, to 7000 ft. in elevation) they are chiefly covered with forests of the best teak and other large trees, bamboo-jungles, &c., but in some places afford pasture-lands of tall grass, or abound with caraboon-plantations. Most part of the territory is abruptly hilly descending toward the sea, where the surface is flat, and presents extensive backwaters, as in Cochin. Rivers are plentiful the principal are the Peruvor and Pulikayoor canals and tanks for artificial irrigation are numerous in the S. W. The climate is generally considered healthy; during the S. W. monsoon, from June to September, a great quantity of rain falls, from March to May

however, the heat is great, and the forest-trees are very pestiferous. The soil is much more fertile than in the country N. of the Ghats, though unimproved lands occupy fully one-third of the territory rice, of which two crops are obtained yearly pepper, cardamom, cocones and areca nuts, and oil-seeds are the chief vegetable products cinnamon and nutmegs are raised near the hills pine-apples and plantains abound, grapes seldom come to perfection. The small berry, coffee, and tobacco thrive well and the Travancore government has lately made great efforts to extend their culture, and that of silk. Some sugar and salt are manufactured. Cattle and sheep do not thrive, and are mostly brought from Travancore and Cochin. Goats are numerous as are the tiger, cheetah, panther, elephant, and wild buffaloes in the remoter parts. The population includes also upwards of 80 000 Malabars or Mahomedans of Arab descent, and 170,000 E. Catholics and Syrian Christians. The lands are assessed on the ryotwary system, a fresh survey being made every 10 or 15 years. The dwellings are better than in many parts of India, and the middle classes of the population are usually able to read and write. The ruling family is Hindoo; the sovereignty and inheritance of property pass in the female line, as elsewhere on the Malabar coast. The country is in 22 districts, under the divisions of Travancore (the capital) and Quilon, besides which Kottar, Achenje, and Alleppey are the principal towns. The high court of appeal at the capital consists of four Judges—three Hindoo and one Christian, assisted by Mahomedans and Hindoo officers subordinate to it are five district courts, each having one Hindoo and one Christian judge. Travancore, the former capital is small, and now in decay. Pop. of state, 1 011 824.

TRAVL, a river Denmark duchy Holstein. It rises near the village of Barsa a few miles S. E. of the Lake Fide, and flows S. W., traversing Lake Warden, and near Gladeske turns round and proceeds E. till it reaches the territory of Lübeck. Here it takes a N. E. direction, traverses the town of Lübeck and shortly after turns suddenly E., and forms a large embouchure into the Gulf of Lübeck, total course about 60 m. At the town of Lübeck, it is from 40 to 50 yards broad, and is navigable by small craft. Below the town it has an average depth of 10 ft. to 12 ft.

TRAVEMÜNDE (North of the Trave), a tn. belonging to the free-town Lübeck and forming its port, lat. (right-house) 53° 57' 39" N. lon. 10° 52' 52" E. (v) It is situated on the Baltic, at the mouth of the Trave, and is a place of strength, being not only surrounded by walls, but defended by a dike. It is a cheerful well built place, and is very much frequented for sea-bathing. The harbour the entrance to which is shown by a light, has been formed at great expense, and is good though somewhat embowered by a sand-bank. Pop. 1470.

TRAVERS, a vil and par. Switzerland, can and 12 m. S. W. Neuchâtel on the Reuss. It is well built. The inhabitants are mostly clock and watch makers. Pop. 1381.

TRAVERSE, a lake, U. States in the territory of Minnesota, about 18 m. long by 9 m. broad. It occupies a depression about 100 ft. beneath the extensive prairie which surrounded it, and forms one of the most elevated plateaus of N. America. It contains several islands, and supplies the waters of a head-branch of the N. Red River. A narrow strip of land, in floods passable by boats, separates it from Millelacs Lake, whose waters flow by St. Peter's River to the Mississippi.

TRAVERSELLO, a vil and com. Italy, Piedmont, div. Turin prov. lives with a handsome modern church and a large townhouse. The soil is rich in mines of iron. P. 1447.

TRAVERSELLO, a vil and com. duchy and 13 m. S. E. E. Parma, 1 bank Taro, with a primary school, manufactory of cardamom, and a trade in corn, silk, cattle, and sheeps. Pop. 8423.

TRAVI, a vil and com. Parma, duchy and 18 m. S. S. W. Piacenza, 1 bank Trebia. It has a parish church, a primary school, the remains of an old castle, a quarry which produces good whetstones, and a trade in corn, wine, silk, and cattle. Pop. 3248.

TRAVNIK, a m. Turkey in Europe, cap. Bosnia, in a narrow valley indicated by mountains, r. Bosna. Lat. 45° 15' N. W. N. W. Constantinople. It is a poor town, consisting of narrow, winding, and dirty streets, lined by very indifferent houses and has a sultan's palace, the remains of

an old castle flanked with towers, and now converted into a prison; several mosques, khans, and lazarars; manufactures of sword-blades, and several articles of primary necessity, and a considerable trade, favored by the situation of the town at the junction of several thoroughfares. The vicinity is covered with vineyards and orchards. P. estimated at 10 000
TRAWAFYAYD, par Wales, Merioneth 31,800 ac. Pop. 1485.

TREBEGNIES, civil and com. Belgium prov Hainaut, 164 m. N. by N Mons. It has a church, a well-attended school, manufactures of woollen fabrics and rads, a distillery brewery, and some corn-mills. The castle of Trebegnies, in the vicinity, is a noble structure of the 9th century. P. 1831

TRE-CHATEAU (S), s. vii and com. Granby and 12 m. N. N. W. Parma, r. bank Thure. It has a church, with a good painting by Giovanni Calfani, a primary school, manufactures of lampen cloth, and a trade in corn, cattle, and excellent cheese. P. 8163

TREDDINGSTONE, par Incl Kilkeny 708 ac. P. 423

TREBBIN (New) — 1 A in Prussia, prov Brandenburg gov and 14 m. S. S. E. Potsdam, on the Havel. It has a parish church, and manufactures of lead-penoli. Pop. 1722.—2, A vii same prov and gov, cirila Ober Harnia, with a parish church. Pop. 1178

TREBIA, or **THEMBIA**, a river Italy rises in the N. slope of the Apennines, Piedmont, dir. Genua flows N. N. E. past the town of Bobbio, enters the delta of Parma and after a course of about 60 m., joins r. bank Po 3 m. E. Piacenza. It is not navigable, but is much used for irrigation

TREBIGNE (anc. Trebennum), a to. Turkey in Europe, prov Haragovina, cap. dist., 15 m. N. E. Ragusa. It is defended by a square fort flanked by four towers. Pop. 1000.

TREBISACOLA, a to. Naples, prov Calabria-Citra, dist. and 17 m. E. N. E. Castroville, near the W. shore of the Gulf of Tarento. It has three churches. Pop. 1200

TREBITSCH, or **Dauwitz**, a to. Austria, Moravia, cirila and 20 m. S. E. Igla, in a deep and narrow valley on the Igla. It is generally well built, contains a distillery and two other churches, castle, synagogue, school and Cistercian monastery, and has manufactures of woollen cloth, and important corn-markets. P. 5900

TREBIZOND a peash Asiatic Turkey extending along the coast of the Black Sea lat. 40° 20' to 41° 30' N. lon. 38° 10' to 41° 30' E., bounded, N. E. by the dist. Gurial and peash Akhalzik, S. Erzeroum W. Sivas, and N. the Black Sea. The picturesque beauty of the coast is particularly striking. The mountains rise immediately from the sea, from 4000 ft. to 5000 ft., clothed with dense forests, composed principally of chestnut, beech, walnut, silver poplar willow and occasionally small oak, elm, ash, maple, and box, the higher parts being covered with fir. The country generally is wooded and mountainous, that it does not produce grain sufficient for the consumption of the population, yet not a spot capable of cultivation appears to be left uncultivated. The climate of Trebizond is backward and liable to constant changes chiefly owing to the cold winds, with rain and fog, which are brought across the Black Sea. Figs and grapes do not ripen before October or November. The vines are trained to large trees, the branches of which prevent the fruit from receiving the benefit of the sun's rays. Notwithstanding the generally mountainous character of the country, it contains many fertile and well-cultivated tracts. Indian corn is the grain usually grown, and it is seldom that any other is used for bread by the people, while the country does not supply is procured from Gurial and Mingrelia. Hemp, flax, wheat, and barley are also cultivated. The inhabitants are a hardy, laborious, and bold race; they are skilled in the use of a short rifle, which every man carries slung at his side. Principal towns—Trebizond, Karsoum Threbit, Eski, and Erzeroum, all on the coast.

TREBIZOND or **TREBIZONDA** (anc. Trepezus, French, Trebizonde, German, Trepezum, Dutch, Trekesen) an important fortified seaport city Asiatic Turkey cap. of above peash. N. E. coast of the Black Sea; lat. 41° 1' N. lon. 38° 45' E. (S). It lies at the foot of a high range of undulating hills, Vol. II.

sloping gently to the beach, and everywhere well wooded. The houses outside the town are interspersed amongst trees and gardens, and shown off by the dark green hills immediately behind. To the E. of the town, on a small projecting rock, are the ruins of a castle, apparently Dynastic. Trebizond is divided into two quarters, the Greek and Turkish. The houses in the former are surrounded with gardens; streets are extremely narrow even for an Eastern town. The houses in the Turkish quarter which is within the walls, are generally larger and better built than those without, but have not the agreeable appearance of a garden. This part of the town is connected with the suburbs by a high and narrow bridge on each side, and is defended by strongly fortified gateways. The houses in both quarters are mostly of one story, built of stone and lime, and roofed with red tiles. The town has neither law nor lodging-houses, but it has 18 mosques and 10 Greek churches. The principal articles of trade in the harbor are alum and copper, brought from the mines in the interior, but the shops are well supplied with English articles

TREBIZOND.—From a Ship by Sir G. F. Moore.

and printed goods. The copper comes in a rough state, and is here manufactured into different articles for domestic or military purposes. The commerce of Trebizond has much increased in recent years, and especially since the establishment of steamers, by which this town has a direct communication with Constantinople, Odessa, and the Danube; and it still continues to be the chief outlet of the Persian trade, the goods being sent on by Erzeroum. In 1859, there entered the port 86 steamers and 150 sailing vessels; of the former 17, and of the latter 3, were British, and of the former 20 and of the latter 1 were Austrian, the remainder of the steamers, 51 and 110 of the sailing vessels, being Ottoman. The total imports amounted to £3 341 750. In the same year 319 steamers and vessels sailed the total exports amounting to £1 050,828. The exports consist chiefly of silk, wool, tobacco, wax, galls, oil opium and other drugs, honey, butter, timber for ship-building, the produce of Asiatic Turkey and silk fabrics. Cashmere shawls, carpets, ashraf, cotton, and camel-skins from Persia. The chief imports are cotton manufactures, sugar, coffee, and other colonial produce, salt, wheat, &c. Pop. 40 000

TREBIZITZ, a to. Prussia, prov Sillesia, gov and 14 m. N. N. E. Breslau, cap. cirila, at the source of the Schellbia. It is entirely surrounded by lofty hills, contains a Protestant and a R. Catholic church, several chapels, a court-house, a library and three hospitals, has a court of law and several public offices, manufactures of woollen cloth and worsted, the works, bark and other mills, and a trade in cattle. Pop. 4161

TREBOROUGH par Incl Boncomest 1798 ac. P. 148
TREBUJENA, a vil. Spain, Andalucia, prov and 24 m. N. V. E. Cadix, surrounded by small streams. It has three squares, a primary school church, two hermitages, and several bread-bakeries. Pop. (agricultural) 2889

TREBUR (Latin Treburum) a market in Hesse-Darmstadt, prov Starkenburg, 11 m. N. W. W. Darmstadt, with a church. A council met here in 822, and several kings of Germany held their court in it. Pop. 1897

TRECASTAGNE, a tn. Shetl. prov. and N.E. Canada, on the S. slope of Stn. Pop. 2406.

TREGATE, a tn. Italy Piedmont, div. and S. m. E.S.R. Novara, in a beautiful plain between the Ticino and Turpoppa. It has a court of justice, a handsome parish and four other churches, a convent of the Sisters of Charity and a public school. Pop. of com. 5077.

TRECHINA, a tn. Naples, prov. Basilicata S. Lago- nese, near the Gulf of Policastro. Pop. 1830.

TRECRITA, a tn. Italy Venetia, prov. Folinaria, 16 m. W.W. Berge with a church and several oratories; man- ufactures of hats, and a trade in silk, fish, and cattle. Pop. 3157.

TREDEGAR, a market tn. England, co. Monmouth, 12 m. W. by R. Aberystwyth, on the Shrothwy. It consists of five principal streets, four of them diverging from a square several smaller streets, and some detached houses. It has a hand- some town-hall and market-house, a church, English and Welsh Baptist, Independent, English and Welsh Wesleyan, and Cal- vinitic Methodist chapels, a weekly market, and three annual fairs. Near it are valuable mines of coal and ironstone, with extensive iron-works. In 1800 it consisted of three houses only. Pop. 8302.

TREDINGTON, two pars. Eng. —1, Gloucester 570 aa. Pop. 143.—2, Worcester 5385 aa. Pop. 1117.

TREDOZIO (Lazio, Tredecima) a vil. and com. Tus- cany, prov. Florence, in a valley r. bank Troncone, about 6 m. from Montecatini with a court of justice, church, castle and a trade in wine, maize, chestnuts, and cattle. Pop. 3502.

TREDUNOCK, par. Eng. Monmouth 1339 aa. P. 157.

TREDE, a river, Denmark, rises in Schleswig, in the marches S. m. S. of Flensborg flows S.S.W. then W. and joins r. bank Elbe at Frederichsholm, total course, about 40 m.

TRETON par. Eng. York 8511 aa. Pop. 663.

TREY-DANWY, par. Eng. Anglesy 1185 aa. P. 924.

TREY-DANWY, par. Wales, Montgomery; 15,168 aa. Pop. 1798.

TREY-LAN, par. Wales, Carmarthen 1308 aa. P. 92.

TREGARE, par. Eng. Monmouth, 2387 aa. P. 825.

TREGARON (Garnon to Glanwern) par. Wales, Cardigan,

39 188 aa. Pop. 2595.

TREGONY, a market tn. and par. England, co. Corn- wall, 11 m. N.E. Falmouth, L. bank Fal; with places of wor- ship for Independents and Wesleyans, and an hospital for decayed house-holders. Area of par., 60 aa. Pop. 846.

TREGUIER (anc. *Remble Novæ Onomastion*) a seaport tn. France, dep. Côtes-du-Nord 12 m. N.E. Lannion. It con- tains a handsome Gothic church, formerly a cathedral, with a cloister of great extent and beauty adjoining it, and an hos- pital. The harbour is excellent, having a depth of 20 ft. to 25 ft. at ebb, and 32 ft. to 35 ft. at the highest spring. The largest vessels find good anchorage in the road. The chief manufactures is linen-cloth. The trade is in clover-seed, oats, hemp, tallow, salt-fish, butter, wax, thread, &c. Several ves- sels are engaged in the mackerel and cod fisheries. P. 8302.

TREYNON par. Wales, Montgomery; 6700 aa. P. 718.

TREIGNAC, a tn. France, dep. Corrèze, 10 m. N. Tulle,

r. bank Vézère, here crossed by a bridge remarkable alike for the boldness and beauty of its construction. On a steep rock adjoining are the imposing ruins of an ancient castle, sur- rounded on three sides by the river. The mansehouse con- sists of hair and knive-stickings and the trade is in wax, wool and cheese. Pop. 3011.

TREIS, two places, Germany.—1, (see *de-Landau*), A tn. Hesse-Cassel Oberhessen, on a peninsula formed by the Landau. It contains the ruins of an old castle, and has two mills. Pop. 1187.—2, (see *Trivies*), A vil. Rhénish Prussia, gov. and 17 m. S.W. Cologne, on the Moselle. It contains a R. Catholic church. Pop. 1248.

TREISHAN ISLANDS, a cluster of small islets, W. coast, Scotland, co. Argyll, between the N.W. part of Is. Mull and the Is. of Coll; about lat. 56° 34' N.; lon. 6° 24' W.

TRELAWNY, or Loom, a river, England, co. Cornwall, flows E., and enters the English Channel, after a course of about 16 m. (see *Loom*.)

TRELLEACH *de-Berrew*, par. Wales, Montgomery;

11,492 aa. Pop. 1532.

TRELLECK, a vil. and par. England, co. and 3 m. E. Monmouth. It has a parish church, an endowed school on the national system, distillery-works, and a large town- ship surrounded by a deep fosse. From the banks of children in 2500 forest parks, iron-ore appears to have been worked and smelted here from a very early period. Area, 7061 aa. Pop. 1186.

TREMADOC, a small market tn. and seaport, Wales, co. and 14 m. S. by E. Caernarvon, on a tract of ground re- covered from the sea. It is of recent origin; and consists of a number of handsome houses lining the sides of a large quadrangle, with a lofty stone-pier in its centre. The har- bour, called Port Madoc, is about 1 m. from the town, has a number of good houses in the vicinity, admits vessels of 900 tons, and has a considerable trade, consisting chiefly in ex- ports of slate and copper-ore, and coal, lime, and timber.

TREMAIN, par. Wales, Pembrokeshire 1068 aa. P. 370.

TREMAINE, par. Eng. Cornwall 1045 aa. Pop. 95.

TREMLADE (La), a tn. France, dep. Charente-Infer- ieure, 1 bank and near the mouth of the Sèvre, 23 m. S. E. La Rochelle. It has a small, well-frequented harbour, manu- factures of brandy vinegar salt and glass; and a trade in wine, brandy, vinegar salt, and oysters. Pop. 2499.

TREMLLEUR, a vil. and com. Belgium, prov. and 9 m. N.E. Liège, on the Roenne, with manufactures of tinware, and a trade in corn. Pop. 1861.

TREMBOWLA, a tn. Austria, Galicia, circle and 18 m. S.E. Turcop, on the Sereth. It was once the capital of a principality of same name. Pop. 3030.

TREMBIRCHION or *Drumstronion*, par. Wales, Flint 3073 aa. Pop. 707.

TREMELOO, a vil. and com. Belgium, prov. Brabant, on the Dyle, 16 m. N.E. Brussels. Pop. (agricultural), 1668.

TREMENTINE, a tn. France, dep. Maine et Loire, 25 m. S.E. W. Angers. It has manufactures of cotton goods, linen, and serge. Pop. 1003.

TREMITIERI, a vil. Sicily, prov. and N. Catania, on the S. slope of Mount Etna. Pop. 1142.

TREMITI ISLES (anc. *Dianella Insule*), a group in the Adriatic, about 12 m. off N.E. coast of prov. Capitan- za, Naples. It consists of the five islands of San Domenico (the largest though only 4 m. in circuit) San Nicola, Caprari- o, Crastello and La Vecchia. They are generally rugged and mountainous, but partly under cultivation, and produce both grain, oil, and fruit. Caprari- o has a spacious harbour, and on San Nicola, which contains the principal town, there are both a castle and a fine monastery. The inhabitants live chiefly by fishing.

TREMEL, *Tremelza*, or *Stremelowa*, a tn. Bohemia, circle and 20 m. S.E. Taber with a church finely situated in the highest part of the town, a townhouse and important manufactures of linen and cotton goods, an oil, saw, and several other mills. Pop. 2505.

TREMELIN, a vil. and com. Italy Lombardy prov. and N.E. Brescia, on the top of the range which forms the W. side of Lake Garda. It contains a parish and two small churches; and has a blast-furnace, and other iron-works, and manu- factures of needles and other articles of hardware. Pop. 3006.

TREMP, a fortified tn. Spain, Catalonia, prov. and 30 m. N.W. Lerida, r. bank Noguera-Pallares. It has a townhouse, primary schools, prison, hospital, and a parish church; manu- factures of leather, brandy, coarse cloths and linens, and cotton fabrics; and a flour-mill. Pop. 1600.

TRENEGLOR, par. Eng. Cornwall, 2780 aa. P. 168.

TRENT, a river, England, rises in the north of Staffordshire, 4 m. N. Tharston, flows S. S.E. till it reaches the S.E. borders of Stafford, when it turns suddenly N.E., proceeds across the S. corner of Derbyshire, then N.E. E. past the town and through the county of Nottingham, then almost due N., forming part of the boundary between that county and Lincoln, enters the latter county and flows into the Humber at Trent Falls, after a course of 144 m., of which 117 m., measuring as far as Burton-on-Trent, are navigable by barges, and 25 m., as far as Gainsborough, by vessels of 200 tons. Its chief affluents are, on the right, the Sore, Tame,

Braz, and Dorcas, and on the left, the Rhyt, Dove, and Dorcas. Its navigable importance is much increased by a series of canals. It has an area of about 4000 sq. m.

TRENT (pro Eng. Somerset; 1590 sq. Pop. 58).

TRENT (German, *Trent*, Italian, *Trento*, Latin, *Trientum*), a town in Austria, Tyrol, cap. of the district, and picturesquely situated in a large valley surrounded by hills. It bank Elzeo or Adige, which is here navigable and crossed by a wooden bridge, 75 m. N.W. Venice. It is surrounded by castellated walls, which, with its church-towers, palaces, and

rehabilitated castle, give it, when seen from a distance, a very imposing appearance. Internally, also, it is regularly and well built. The houses are all in the Italian style, and the streets are for the most part wide and commodious, with good sidewalks as well as centre pavement, and with canals in which streams of pure water constantly circulate, and contribute both to health and disfigurement. It contains a handsome square, its centre ornamented by a beautiful marble fountain, an old Gothic castle of vast extent and picturesque appearance but

glorious in ruins; a cathedral, a noble structure entirely of marble, finished in 1312, in the round or Byzantine style; three other churches, one of which Santa Maria Maggiore, a modernized building of red marble, is historically interesting as the place where the celebrated council of Trent held its sittings; two episcopal palaces, a fine courthouse, a large town-house, a capacious theatre, a number of elegant private palaces, three convents, and a nursery, an ecclesiastical seminary, a high school, and school of design, a gymnasium, an orphan and a foundling hospital, an ordinary hospital richly

equipped, a porchouse, and a house of correction. There are scarcely any manufactures properly so called, but the number of silk-mills and distilleries is considerable, and an active trade is carried on, particularly in silk, wine, and brandy. Trent is the seat of a bishop and the seat of a civil criminal and mercantile court. It is a place of great antiquity and is said by Pliny to have been founded by the Etruscans of Etruria. It afterwards became a Roman colony and on the decline of the empire, was successively seized by the Goths, Lombards, and dukes of Bavaria. In the middle ages its bishops made themselves independent, and met in the Germanic diet at the residence of the empire. The only memorable event in its history is the council, assembled A.D. 1545, concluded a. 1563, which was held in it, and bore its name. Pop. 18,195.

TRENT Four a vil. Canada West, partly in a cedar-swamp on the Trent, which is here crossed by a swing-bridge, and falls into the Bay of Quinte, about 80 m. W. S. W. Kingston. It has an Episcopal and a R. Catholic church, a tannery, a distillery, and a large trade in lumber; immense quantities of which are floated down the river. Pop. about 950.

TRENTISHORE, pro Eng. Dorset, 1571 sq. P. 129.

TRENTOLA, a town, Naples, prov. Salerno S.W. Caserta, in a fertile plain, with a church and a chapel. Pop. 2400.

TRENTON a town, U. States, cap. of New Jersey, 1 bank Delaware, opposite the lower falls, at the confluence of Assunpink Creek, on the Delaware and Raritan canal, and on the Philadelphia and Trenton railway, which here crosses the Delaware on a handsome covered bridge, 59 m. S.W. New York. It consists of the city proper and the districts of HUDSON, Bloomfield, and Lambertville, which, though included in the separate borough of Trenton, are properly its suburbs. It is laid out with great regularity and has Presbyterian, Dutch Reformed, Episcopal, Friends, Methodist, and African Methodist churches, a state-house finely situated on a commanding height near the Delaware, a courthouse, the governor's house, a plain but commodious edifice, the state-prison built on the penitentiary system, within an area of 4 a. enclosed by walls 30 ft. high and 8 ft. thick; a lyceum, four academies, and various schools. The possession of extensive water-power created by artificial means from the falls on the Delaware and the waters of Assunpink Creek, has led to the erection of numerous mills and other manufacturing establishments, and the trade enjoying the advantages both of railway travel, and canal communication—the last afforded at an immense outlay the stone-aqueduct on which it here crosses Assunpink Creek having alone cost £250,000 sterling—is very extensive. The most memorable event in the history of the place is what is called the battle of Trenton, which took place in 1776, when Washington, by suddenly crossing

the Delaware, surprised a body of 1000 Hessians, and made them prisoners. Pop. (1850), 5760.

TRENTON, an incorporated town in Canada West, on the north-western shore of the Trent, at its entrance into the Bay of Quinte 65 m. W. Kingston. It has two Protestant churches, a R. Catholic church, a grammar-school, and three private schools; manufactures of cloth, iron, and leather, several flour and saw mills, and a distillery; and a considerable trade in exporting square and squared lumber to the U. States and Great Britain. Pop. 1600.

TRENTON, an ancient town (Latin, *Trentonensis*) situated in Hungary, cap. of its name, 65 m. N.E. Pressburg, on a rugged eminence crowned by a castle of great strength both by nature and art. It contains a Protestant and two R. Catholic churches, a synagogue, townhouse, county-buildings, and gymnasium, and has manufactures of woollens, brassware, in which a famous hear is made, distilleries of plum-brandy, and some general trade. Trenton is of early origin, and in the castle are a massive tower and a deep well both supposed to be of Roman construction. Pop. 2880.

TRENTON, a county, bounded N. by W. by Morris, and E. by Gloucester, 1861 sq. m., is traversed by two branches of the Carpathians, between which there is a valley of considerable extent, through which the Wang, the principal river of the county, flows. With exception of the more mountainous districts, which are generally covered with fine forests or good pasture, the greater part of the surface is fertile and well cultivated, yielding corn sufficient for home consumption, much fruit and garden produce, hemp, and flax. Among the minerals, coal is included, and there are several thermal springs of some celebrity. Woollen and linen manufactures have made considerable progress, and employ a great number of the inhabitants, who are almost all of Slavonian extraction and very industrious. Pop. 312 000.

TRENTANO a vil. and com. Italy, Lombardy, prov. Brescia, 8 m. S.W. Capriateo, on the Serbellus-Trianova canal with two churches. Pop. 1387.

TREPOFT (Lal) [anc. *Ullera Fortis*] a support in France, dep. Seine-Inférieure, at the mouth of the Elbe, in an extensive bay 44 m. N.E. Rouen. It contains an old church with a fine portal and has a good harbour which has recently been connected with the canal, manufactures of lace and fishing-nets, and a considerable fishery. P. 5914.

TREFFIO in CANTAGAZZO, a vil. and par. Tuscany, com. Florence, 6 m. from Cantagallo, with a parish church. P. 1190.

TRETTOW, two places, Prussia, prov. Pomerania, gov. Stettin—1 (Lal)—A. a village, on both sides of the Tollense, 25 m. N.E. Neu-Stettin, with a church, two hospitals, and a trade in wool and cattle. Pop. 8898—2 (Nw)—A. a village, in 57 m. N.E. Stettin, 1 bank Rega. It has a castle, two churches, and three hospitals, a court of justice, and several public offices; manufactures of woollen cloth, serge, and hosiery, and a trade in cattle. Pop. 6890.

TREPLZZI a town, Naples, prov. Otranto, N.W. Lecce in a flat and fertile district. It contains a convent. P. 8008.

TREQUANDA a vil. and com. Tuscany, 35 m. from Siena, with a church, several factories, a convent and a trade in oil, wine, chestnuts, and timber. Pop. 2893.

TREMA-MAN three vils. N. W. Sicily. See MEXIA.

TRES-MORRES, a bold and remarkable headland, W. coast, Patagonia, rising from the sea to the height of 3000 ft. and terminating a peninsula of same name, which stretches between the archipelago of Los-Onchos on the N. and the Gulf of Pecos on the S.; lat. 46° 56' 57" S. lon. 75° 28' W.

TRES-MURASME, a vil. and com. Val. Bardania, div. Sassari, prov. and 9 m. N.W. Cagliari; with a trade in corn. Pop. 1824.

TRES-PORTES a town in Brazil, prov. Minas-Gerais, 40 m. E. Lacerdo-Francis. It has a parish church, inhabitants are mostly agricultural.

TREBANA, or TREBANA, a vil. and com. diocese of Modona, 2 bank Magre with a church and the ruins of an old castle. Pop. 2373.

TRESCOE, one of the Scilly Islands, England, off S.W. extremity Cornwall, the largest of the group after St. Mary's, area, 800 a. Pop. 450. It has the remains of a monastery, a castle, and a fort called Oliver's Battery from having been built by the Parliamentarians in the time of Cromwell, inhabitants chiefly employed in fishing and in gathering sulphur.

TRESCORE, or **Trasconas** [Latin, *Transconaria*] a vil. and sang. Austria, Italy, pop. 9 m. R. Bergama, near a bank Cherso. It has several ancient monastic houses, in good preservation; a handsome church, and several oratories, a suppressed convent, used partly as a prison, and partly as a hospital; several elementary schools, an hospital, manufactures of bone-ware, iron-ware, linens, oil, flour, and silk mills, and much-frequented mineral springs. Pop. 2062.

TRESEKOWITZ, or **Trasconaria**, a market to. Austria, Moravia, cisleith. Britain, near Dürnbach; with a church. Pop. 1155.

TRESEMER, par Eng. Cornwall 1844 ac. Pop. 175.

TRESEWELL, par Eng. Hants; 1841 ac. Pop. 254.

TRETFIRE WITH MORRIS-CHURCH, par Eng. Hereford 1856 ac. Pop. 123.

TRETS (anc. *Tritto*), a tn. France, dep. Bonchard-de-Rhone, on the N slope of Mont Olympia, 30 m. N N E. Maccellia. It has narrow and irregular streets, lined by houses which are very differently built; an ancient baronial castle, a large townhouse, and elegant hospital, manufactures of heavily ribbed-ware, and tins. Pop. 1553.

TREUCHELLEN (dsh.), a market in Bavaria, Middle Franconia, 24 m. S. W. Nürnberg, near a bank Altmühl with a parish church, a synagogue, and two castles, one of them in ruins, and manufactures of lace, ribbons, and earthen ware, and various mills. Pop. 1583.

TREUBA, a tn. Saxony circle Zwicken, on an affluent of the Elster 5 m. S. E. Plessa with a church manufactures of muslin, Java, cotton, and tinware, quarries of building-stone and slate, and a trade in cattle. Pop. 4433.

TREUBENBRIEZE a villet in Prussia, prov. Bran denburg, gov. and 31 m. S. W. Potsdam, on the Havel with a church, an hospital, manufactures of woollen and flannel cloth, leather, and paper and several mills. Pop. 4796.

TRYPALGA, par Eng. Cornwall 1799 ac. Pop. 126.

TRIVANDRUM a tn. Hindoostan, cap of the state Travancore, in its S. part, 2 m. from the Indian Ocean, and 22 m. S. E. Quilon, lat. (near observatory) 8° 20' N, lon 77° 12' E. It consists of a quadrangular fort, with walls partly of granite and partly of earth, 1000 yards in length, by 500 in breadth outside of which on all sides, but chiefly on the N., is an extensive collection of buildings. The fort has five gates, and contains a celebrated pagoda, at which numerous festivals are held and attended annually by about 60,000 people a large reservoir a new palace, and the residence of the chief state-officers and high court of law into this citadel which has a pop. of about 5000 none but Brahmans or persons of high caste are permitted to enter. In the town outside, many of the dwellings are surrounded by gardens and the inhabitants comprise many descendants of Dutch and Portuguese families, and numerous native R. Catholics here are the royal's stables, barracks for two battalions of sepoy European contingents, and a new Protestant church. About 2 m. E. of the fort, on elevated ground, is the British residency and near it are the observatory an excellent establishment under British superintendence an hospital for all castes, and a good public cemetery Pop. (in) about 13 000; of intermediate districts of Travandrum (1836) 57,012.—(Madras Ad mense, 1840) Rep. on Med. Topog. of Madras Presid. 172, &c.)

TREVIANO, or **Govera** an mt. S. Pacific, Queen Charlotte's Archipelago; lat. 10° 40' S., lon. 155° 45' 30" E. is a region of steep mts in the N. W. part of the island of Niue or Santa-Cruz. It is nearly 10 m. in circuit.

TRÉVILÉZ, or **TRÉVILÉZ**, a tn. Spain, Archañuela, prov. and about 25 m. from Granada, S. side, Nevada, and not far from the celebrated peak Mulhaceta. It has a parish church, courthouse, prison, and primary school; several flour-mills and a trade in agricultural produce. Pop. 1590.

TREVES (German, *Trier*), a gov. Rhinish Prussia, bounded N. by gov. Aix-la-Chapelle E. Coblenz and detached portions of the duchies of Oldenburg and Coburg, and the palatinate of Bavaria, S. France, and W. grand duchy of Luxembourg, are, France, &c. m. The ancient bishopric for the most part to the valley of the Moselle, which traverses it essentially in a S. W. direction, and divides it into two distinct portions. Both of these become elevated as they recede from the river and terminate in lofty ridges, that on the left bank being partly covered by the Moselle and the high Vaux, and that on the right bank by the Hundsrücken and the Vögele.

Many of the mountains are basaltic. Their culminating point is the Krimmkepp, 2660 ft. The principal tributaries of the Moselle, within the government, are the Sauer, Saarn, and Nahe. The climate in the lower valleys is mild, but elsewhere thick and cold. Much of the surface is covered with wood, which supplies abundance of fuel both for domestic use and a number of blast-furnaces. Much of the higher ground is either waste or occupied as extensive sheep-walks. The extent of arable land is thus limited. The most fertile portions are on the lower slopes of the Eifel, where the subsoil is chalk. The principal crops are rye, barley, spelt, and potatoes. Flax is grown to some extent in favorable situations. In such situations the vines also thrive, and yield a considerable quantity of wine, part of which bears a good name. The minerals include iron, coal, limestone, gypsum, and roofing-slate. Manufactures have not made much progress. The most important is leather after it is tanned, grain, porcelain, and stone ware. For administrative purposes the government is divided into 18 circles, of which Treves is the capital. About five-eighths of the inhabitants are R. Catholics. Pop. (1849) 492,122.

TREVES (anc. *Augusta Stradunorum*, German, *Trier*), a tn. Rhinish Prussia, cap. above gov. in a luxuriant valley surrounded by low vine-clad hills & high Moselle, here crossed by an ancient Roman bridge, nearly 600 ft. long 57 m. S. W. Coblenz. It is considered the oldest city in Germany, and is by far the richest of its sites in Roman remains, though these are more remarkable for vastness than beauty, and are far outstripped by the remains both of Italy and France. Modern Treves consists of the town proper and of nine suburbs. It is surrounded by walls with eight gates, and is indifferently built, having few good public squares, and a great number of irregular and narrow streets. The buildings most deserving

THE MARKET-PLACE, TREVES.—From Rogers's *Belgium*.

of notes are the cathedral, an irregular structure in the earliest Romanesque style, supposed to be partly of Roman construction under the orders of the Empress Helena, who, moreover is the reputed depository of the Holy Coat, the exhibition of which, in 1844, attracted 1 000,000 pilgrims, and brought large sums into the treasury of the cathedral; adjoining the cathedral, and far superior to it in architectural merit, the Loebtrankirche (church of our Lady), one of the earliest and most elegant specimens of pure pointed Gothic; the palace of the archbishop and bishop's a handsome and extensive edifice, now converted into a barracks, and partly occupying the site of a vast Roman structure, of which a colossal fragment still exists, under the name of the *Heldenthurm* (Hercules's Tower); at the extremity of an open space in front of this structure, the ancient remains of the Roman bath in a very shattered state; to the E. of the baths, and outside the walls, the Roman

amphitheatre, scooped out of the hill of the Marburg, where the acclivity of the rock has preserved entire the form of the arena, but no buildings remain except two vaulted passages, and the Schwarzer Thor or Porta Nigra [Black Gate], one of the most interesting monuments of the town, decorated in front with rows of Tuscan columns, and presenting the massive simplicity of Roman structures, but thought to be of more recent origin. Other buildings and establishments worthy of notice are the town-library of 60,000 vols., the museum, gymnasium, theatre, two nanaseries, episcopal seminary provincial, industrial, and numerous other schools, the school of design savings-banks, borough-hospital, poorhouse, house of correction, &c. The manufactures consist of woollen and linen cloth, woollen, carpets, hats, porcelain, soap, glass, leather tobacco and refined-wax, and the trade, for which the Meuse affords great facilities, is chiefly in the above articles of manufactures, and in fruit and wine. Treves, when Julius Cæsar led his armies into the district, was the capital of a powerful people, whom he calls the Treviri. It afterwards, under Augustus, was made a Roman colony under the name of Augusta Treverorum, and became the capital of Gallia Belgica. Several of the Roman emperors often resided in it, and it attained to such magnificence that the poet Ausonius calls it the second metropolis of the empire. During the invasion of the Goths, Huns, and Vandals, it was almost annihilated, but revived and rose to great splendour under the archbishop-electors, who possessed extensive domains, often maintained large armies, and managed by their union of temporal and ecclesiastical sovereignty, to exercise great political influence in Germany. St. Ambrose, one of the fathers of the Church, was born, and St. Jerome, another of its fathers, studied here. Pop. (1846), 19,639

TRIVET, *pro* first March 4109 *sa*. Pop. 416.

TRIVETHIN-WYN-PORTWOOD, *pro* Eng Munmouth, 11,590 *sa*. Pop. 15,864

TRIVET, a town, Italy. — 1. *sa*. Treviso, a town, delago, and 9 in N Spoleto rising in the form of an amphitheatre on the W slope of Mount Sarnus. It has some trade as Pop. 8020 — 2. *sa*. Treviso; A town, and 40 in E.E.E. Rome, near a bank Trevoro. Pop. 1025.

TRIVIANA, a town in Spain Old Castle prov and 33 in W N W Logroño, with a church, an ancient hermitage a courthouse, prison, primary school and a trade in corn, wine, and fruit. Pop. 1724.

TRIVIO, a town, Naples, prov Principato-Ultra, and 11 in S.E. Arzano, in the heart of the Apennines. It is the seat of a bishop, and contains a cathedral and two other churches. Pop. 3000

TRIVIGLIO, or TRIVIGLIO, a town, and 10 in com. Italy Lombardy, prov Milan, prov and 13 in S by W Bergamo *sa* dist., near the railway from Milan to Venice. It has a very cheerful appearance, consisting of spacious and well-kept streets, and containing many elegant mansions. It is the seat of a court of justice, has a large and handsome parish church in the Gothic style, another handsome church, which belonged to a suppressed Augustinian monastery, a large ordinary and a founding hospital, several taneries numerous silk-mills, in which the greater part of the inhabitants are employed, and manufactures of candles, vinegar and mustard. Pop. 8003.

TRIVIGNO, a seaport to Austria. See Rovigno

TRIVISO [Latin, Trevisum, French, Treviso] a town, kingdom of Italy, prov and 15 in N N W Venetia, *sa* prov., on the Adige. It is surrounded by strong walls and towers, and enclosed by a wall of 1000 ft., supplied with water from the Adige, and is entered by three gates. It is an ancient place, and though not regularly built, has spacious streets and large squares, and a great number of handsome houses, generally lined by arcades, and often possessed of small but well-planted gardens, which give the town a very pleasing appearance. The principal buildings are the cathedral a fine but unfinished structure of the Lombards; the church of St. Nicolo, a large Gothic edifice the courthouse and new prison, townhouse, register-office, hospital, library of 80,000 volumes, a seminary, two theatres, both handsome buildings, and the sixth hospital. The manufactures consist chiefly of silk and cotton goods, and enlery, the trade is in corn, cattle, and fruit, and there is an important annual fair of 15 days. Treviso is the seat of a bishop, the seat of provincial and city courts and offices, and possesses a botanical garden, agricultural society and abundance of sciences and literature. It is a place of great antiquity, and is supposed to have been a municipal free-town under the Romans. On the decline of the empire, it was taken possession of by the Huns, then by the Ostrogoths, and afterwards by the Lombards, who made it the capital of their two marquisates, under the name of Maro Trevisana. During the feuds between the Guelphs and Ghibellines it formed part of the Lombardic league, and became independent. In 1344 it voluntarily placed itself under the government of Venice, whose fortress it has since followed Totila, king of the Goths, and Pope Benedict XI. was born in Treviso. Pop. (1846), 19,484. — TREVISUM, *sa*, 702 *sa*, *sa* *sa*, is hilly and almost mountainous in the N., but in all other directions consists of an extensive undulating plain watered by the Piave, Sile, and Livenza. It is one of the richest provinces of Lombardy, abounding alike in corn, wine, and cattle. Hemp and flax are extensively grown, and chestnuts are particularly abundant. The dairy attracts much attention, and the cheese bears a high name. There are several large forests, yielding fine timber, and copper is wrought. The only manufactures of any consequence are silk goods, woollens, paper, and various articles in copper, brass, iron, and steel. Pop. 286,100

TRIVOLLO, a town and par Portugal prov Beira-Alta, 18 in S.E.E. Lamego, near a bank Tavora. Pop. 612

TRIVOLLO, a town, France, dep. Ais, 30 in S.E. W Bour. It rises in the form of an amphitheatre on the side of a hill washed by the Saine, and crowned by the ruins of an old castle and has manufactures of tannery, jewellery, and gold and silver leaf. The Jesuits published here an encyclopaedia called *Dictionnaire de Trevoux* 1 *sa*, 1855

TRIVON, *sa* Eng Cornwall, 988 *sa*. Pop. 188.

TRIVORD, *sa* Eng. Sussex; 1200 *sa*. Pop. 174.

TRIVISA, a town, Hesse-Cassel Oberhessen, L. bank Schwinn, here crossed by a bridge 30 m. E.N.E. Marburg. It has manufactures of linen and paper a tannery, and numerous mills. Pop. 2549

TRIZZANO, a town, com. Italy Lombardy prov Milan, dist. and 3 in S.W. Corneo, on both sides the Naviglio-Grande, here crossed by a bridge. It contains a parish church. P. 1057

TRIZZO, a town and com. Italy Lombardy prov and 19 in N.E. Milan, r. bank Adda. It contains three churches; has manufactures of silk, and a considerable trade in corn and wine, greatly aided by the Marzocco canal, which communicates here. Pop. 3365.

TRIBAU, or TRIBUNA, a town, Austria Moravia, circle and 29 in W N W Olmütz, a station on the railway to Praga. It contains a castle, four churches, hospital, townhouse, planet college, and Franciscan monastery, and has manufactures of woollens and several dye-works. Pop. 8751

TRIBAU (Böhmische), a market in Bohemia, circle and 30 m. E.S.E. Olmütz, on the Bohemian railway with a church a townhouse, a bathing-establishment, and walk, justice and four mills. Pop. 5600

TRIBITZ, or TRIBOWITZ, a vil. Bohemia, on the Trobowitz and on the Bohemian railway 6 m. from Leitomischl, with a very ancient church, a school, and two mills. P. 1089

TRIBOLI seaport, Asiatic Turkey. See TRIZONO

TRIBULES, a town, Prussia, prov Pomerania, gov and 22 m. S.W. Stralsund r. bank Trebel, with a church, and a trade in cattle. Pop. 2706.

TRICALA, a town, European Turkey. See TRICALA.

TRICALOE, a town, S. India Cochin, r. bank Paravur 46 m. W Pondicherry, lat. 11° 15' N lon. 77° 15' E

TRICARICO, a town, Naples, prov Basilicata, dist. and 27 m. W.S.W. Matera. It is surrounded with ancient walls flanked with towers as the seat of a bishop, and contains a handsome cathedral, and three other churches, a diocesan seminary, four monasteries, and a nursery. Pop. 4800

TRICARE, a town, Naples, prov Otranto, dist. and 23 in E.E.E. Gallipoli, in a fertile plain near the Isola Sacra, with three churches, and manufactures of muscivore-jesters, and cotton goods made chiefly from cotton grown in the neighbourhood. Pop. 2789.

TRIERRO, a vil. and com. Italy Piedmont, dep. Novara, prov Verelli with a church and two parishes. P. 1227

TRICHINOPOLY, a dist. and in British India, prov. Madras. — The distance between lat. 10° 40' and 11° 25' N; and lon. 78° 10' and 78° 30' E is surrounded on the N and W

by the dists. S. Arcot, Salem, and Coimbatore, S. and E., by Madras and Tanjore. Area, 5000 sq. m. The surface is mostly level, but interrupted in the E. with several abrupt granite heights, on one of which the fort of Trichinopoly is seated. The river Covery flows through the district W to E, and along it are many rice-grounds. The soil, except near the river, is generally stiff and sandy and from March to May the climate is oppressively hot. Little rain falls annually, yet the country is about May laid under water drained from the Mysoore Mountains, which is carefully preserved during the rest of the year in artificial cuts and sluices, by which means two and sometimes three crops of rice are raised yearly. Tobacco, beet-root, cotton-roots, plantains and dry grains are cultivated and around the capital are good fruit-gardens. The hardware, cutlery, and jewellery of Trichinopoly are famous in India, especially in large quantities, indigo, nitre, cotton, and calico are also exports of consequence. Pop. 636,400.—The town is banked Covery lat. 10° 50' N., lon. 76° 44' E., is 80 m. W. Tanjore,

TRICHINOPOLY from the S.E.—From Journal's View in India.

and 201 m. (by road) S.S.W. Madras. The fort, about 1 m. in length N. to S., by ½ m. in breadth contains a granite peak 500 ft. in height, which commands all the surrounding country and its appearance from the W. is not unlike that of Edinburgh castle in miniature. On the rock are the citadel, a large and massive pagoda, and a square-pillared Hindoo office and in its E. face is a sculptured cave-temple. The fort has strong walls, from 20 ft. to 30 ft. in height and encloses a closely built native town, with the pay-office, arsenal, garrison-hospital, ordnance stores, jail, and a large missionary chapel. Beyond the walls, on the S. and W., are the various barracks, several hospitals, handsome residences for military officers, an extensive parade ground, a race-course, public rooms, St. John's church, with the tomb of Bishop Heber who was interred there in 1826. A R. Catholic chapel and various cemeteries. The country around is highly fertile, and abounds with populous villages, and the island of Seringapatam adjacent is renowned in India for the number size, and wealth of its pagodas. Trichinopoly is the head-quarters of the S. division of the Madras army. It is usually garrisoned by four regiments of native infantry and one of cavalry, a regiment of royal infantry, and a company of artillery the whole comprising between 4000 and 5000 men. Trichinopoly cloths and jewellery are famous and here are manufactories of cotton cloths, linen, muslin, and artillery and well-supplied barracks. Good roads connect the town with Madras, Hindigul Tanjore, and Madras. Pop. of the fort, and exclusive of troops 30,000.

TRICHOPOL (native, Trichinopoly) a tn. Hindustan, Cochin dominions under presid. Madras, 50 m. N. by W. Cochin. It consists of a walled enclosure 4½ m. in circuit, its remains, raised in 1794, surrounded an area over which several separate villages are situated, the most conspicuous being one around a Roman-Syrian church, and inhabited by Christians. The space also contains a citadel and palace, a college for 100 Brahmins, numerous pagodas, one of which has four towers, erected by as many Indian princes good

barracks, an hospital, magazine, and storehouse. It is celebrated throughout Malabar for its sanctity and is the place of a large annual festival, it is the most important trading centre in Cochin, and the station of a collector, Allah court, and a regimental company of the Anglo-Indian army.

TRIEBEL, a tn. Prussia, prov. Brandenburg, gov. and 50 m. N. Frankfurt-on-the-Oder, with three churches, many factories of woollen and linen cloth, and earthenware, and a trade in cattle. Pop. 1806.

TRIEBER, a vil. Germany, Rhenus-Schlesien with a church, two schools and saw oil and other mills. Pop. 1264.

TRIEBSWETTER, or RACH UZA, a vil. Hungary. Thither Theres, so. Thuroval, about 6 m. from Koslar, with a R. Catholic church. Pop. 1978.

TRIEGEN, a vil. and par. Switzerland, can. and 16 m. N.W. Lucerne, with a handsome church, manufactures of cotton goods, and a cotton-mill. Pop. 2634.

TRIENT, a tn. Austria. See TANN.

TRIEN, a gov. and tn. Rhendish Prussia. See TANN.

TRIESTE (Latin, Tergeste, German, Triest), a tn. and seaport, Austria, Illyria, dioc. Trieste, circle Adelsberg 314 m. S.W. Vienna, on a gulf of same name N.E. extremity of the Adriatic (castle) 45° 35' 30" N. lon. 13° 45' 30" E. (n.). It stands partly on sloping and partly on level ground in the form of a semicircle inclosed by hills; and consists of the old town, the new town or Thermenstadt, the Josephstadt, and the Franzens-Vorstadt. The old town on a slope to the S.E., surrounded by the castle, occupies the site of the Roman colony Tergeste, the old cathedral beside the castle standing, it is said, on the spot and its tower on a temple of Jupiter. It is surrounded by old black walls, the streets are narrow, crooked, and dirty in most cases so steep as to be quite inaccessible to carriages. The more modern parts of the town occupying a level space near the harbour partly gained from the sea and from salt marshes, or stretching away towards the hills to the N.E., are regularly built of handsome white houses, either lining broad commodious, well paved streets, or forming spacious elegant squares. A broad canal deep enough to float vessels of 1000 tons runs from the harbour through this part of the town, and enables the merchants to receive or deliver cargoes at their doors. The principal public buildings are the exchange the finest edifice in Trieste situated in a square in the centre of which are a fountain and a statue of the emperor Leopold I., and adorned with a Doric colonnade and a fine spacious port leading to a noble merchant's hall, while the story immediately above is employed as a casino the Dome, or cathedral already mentioned, in the Byzantine style, and of great antiquity; the church of St. Peter the Jewish church with a fine Corinthian colonnade the Protestant church, synagogue, custom-house, post-office, the old and new theatres. Among the fine buildings of Trieste deserves to be mentioned the Palais Republicain, most splendidly furnished, and containing some very fine objects of art. The harbour is of easy access, and well sheltered except to the N.W., from which, though accidents seldom occur, a heavy sea is sometimes thrown in. It is deep enough to admit vessels of 300 tons to its quays and vessels of any size to anchor safely at a short distance off in the roads. It is in the form of a crescent surrounded by spacious quays, divided by small piers into several separate basins, and shut in on the south by a large pier the Thermen Mole projecting N.W. into the sea, and terminating in a broad platform occupied partly by a fort, and partly by an intermediate pier 106 ft. above the sea. Close to the harbour are extensive building-docks, and at the N. end, opposite the Thermen mole, the new lazaretto, the largest and best arranged in Europe, capable of containing seventy ships in quarantine. The old lazaretto, outside the mole on the S. side, is smaller but still spacious and convenient. Great improvements are at present (1867) being made on the harbour, which will make it in a few years quite equal to that of Marseilles, more than £1,500,000 has been already expended. The trade, which began rapidly to increase about the middle of last century in consequence of the great improvements made on the harbour by the empress Marie Theresia, is very extensive, including

much of the raw and manufactured produce of the neighbouring countries. The formation of the railway over the Carinthian Alps from Trieste to Vienna, and of several branches

TRIESTE.—From Cassa, Voyage Photographique de l'Italie et de la Sicile.

to various parts of the interior, and the consequent increase in the inland trade of the town has already materially increased the trade of the port, especially in wheat from Hungary and its dependencies of which more than 10,000,000 quintals are some years exported to Italy, France, and England, and when all the railways intended to connect this port with the interior have been opened for traffic, Trieste will become as important a seat of the corn trade as Odessa, especially as, during the winter, it is far more accessible than the Rumanian port. Timber forms another important article in the exportations from Trieste. The following table shows the extent of this trade in 1855 and 1856.—

	1855.	1856.
Timber	1,066,891 cubic ft.	920,564 cubic ft.
Hewn	36,123,362 "	55,041,186 "
Planks	4,911,890 "	4,341,804 "

The principal other exports are rice, wine, oil, wax, flax, hemp, tobacco, silk, wool, hides, marble, iron, lead, quick silver, copper, alum, vitriol, silk stuffs, printed cottons, coarse and fine musins, soap, leather, glass, and liquors. The principal imports are colonial produce, raw and spun cotton, cotton goods, dried fruits, hides, salt fish, corn, hair, &c. Trieste is the head-quarters of the Austrian Lloyd's steam packet company, which possesses 165 steamers trading to Venice, Alexandria, Varna, Constantinople, &c. The following tables give a good idea of the extent of the trade of this rising port:—

NUMBER OF VESSELS AND AMOUNT OF TONNAGE RECEIVED AND CLEARED AT TRIESTE IN THE YEARS 1854, 1855, 1856, AND 1858.

Year.	ARRIVED.		CLEARED.	
	Vessels.	Tons.	Vessels.	Tons.

Though Trieste is more a commercial than a manufacturing town, the manufactures are numerous and in some branches extensive. The principal articles are white-lead, wax-candles, soap, rosoglio, spirals, earthenware, and more or less leather. A great number of vessels also are built, and an active shipping is carried on in the bay. Trieste is the seat of a bishop, the seat of civil, parsonage and marine courts, and of a number of important public offices, and possesses various endowments and establishments, benevolent, educational, literary and scientific. It existed under the Romans, but never rose to much importance till about the middle of the last century. It was but a small village of 6000 inhabitants in 1719 when the emperor Charles VI conferred on it the privileges of a free port. Some years later it attracted the attention and shared largely in the enlightened policy of the empress Maria Theresa, who laid the foundation of a prosperity which has ever since continued to advance and converted a comparatively insignificant town into the first port of the Austrian empire. The country immediately around Trieste is extremely beautiful—gardens, vineyards, and orchards, under an Italian sky, meet the eye in every direction. The town itself is more Italian than German, accounts are generally kept, and most of the business done in Italian. Italian papers and pamphlets fill the coffee-houses, the chief magistrates even is not *burgomaster* but *podestà*. 1 op. (1855) 70,691.

TRIGIANO is in Naples prov and 8 m S.E. Bari; with a church and a convent. Pop. 3260.
TRIGNO [see Tronca Fyrtown] a river Naples, rises near Vasto-Gerardo, prov. Benevento S.E., then suddenly turns N.E. and falls into the Adriatic by two mouths, about 6 m S.E. Vasto-Ammonio, total course, 60 m.
TRIGOLO a vil and com Italy prov Cremona 6 m. S. Somino, with a church and two chapels. Pop. 2037.
TRIGULON, a to Spain, Andalusia prov and 10 m N.E. Huelva, with irregular but clean and well-paved streets; three squares, a church, suppressed Carmelite convent, and townhouse, a parsonage, schools, two hospitals, numerous potteries, and flour and oil mills. P. (approximate) 3284.
TRIKAL A or TRICALI [see Tricali] a to European Turkey Thessaly, 390 m. W.S.W. Constantinople; lat 39° 21' N, lon 21° 48' E. It is large, and has bustling commerce but is greatly neglected, and partly in ruins. Pop. 12,000.
TRIKERKI—1, A to Turkey in Aegean Thessaly at the extremity of a peninsula forming the E. entrance of the Gulf of Volo, 80 m. E.N.E. Zentown. It has one of the best-frequented harbours in this part of the archipelago and building yards, at which a great number of vessels are fitted out. Pop. about 5000.—2, A small vil in the Gulf of Volo, immediately off the peninsula.—3, A channel leading off from the archipelago—it communicates with the Gulf of Volo on the N. and the channel of Talend on the S.W.
TRILLINGEN a vil Hohenzollern-Naglingen on a very bleak and elevated site, with a parish church. P. 1840.
TRILLO, a vil Spain prov Guadalajara 80 m E.N.E. Madrid, with excellent mineral baths, since frequented from June 15 to September 15. Pop. 670.
TRIM a to and par Ireland cap of co. Meath, 1 bank Boyne 26 m N.W. Dublin, with a county-prison, court-house, hospitals, schools, a church, and chapel. Pop. (in 1900). Area of par 18,436 ac. Pop. 6232.
TRIMMIS, a vil and par Switzerland, can. Grisons, 8 m from Conv. with two churches. Pop. 1105.

TRINOMALEE a maritime to Ceylon, E. coast; lat 6° 23' 7" N, lon 81° 14' 7" E. It stands on the N. side of the entrance to a noble harbour, at the foot of a height crowned by the fort, and defended by fortifications which extend for 1 m. along the shore. The native town was, a few years ago, a confined assemblage of 200 or 400 huts of palm-leaves, separated by leafy trees, near the harbour; but, however, a bazaar, consisting of two long and wide streets, lined with all kinds of shops, and here is also a 'red-house,' a large and good hotel. A small pagoda with a very curious partial, and a large tank, are the only other remarkable structures. Fort

Frederick, above the town, is garrisoned by several companies of European infantry, engineers, artillery, and riflemen. Fort Osterberg, at the opposite extremity of the harbour,

is a considerable export. The minerals consist chiefly of gold and tin, particularly the latter which is worked to some extent. Though considered tributary to Spain, Tring is one of the most genuine of the modern Malay states, and nowhere is the Malayan dialect spoken in greater purity. P. estimated at about 35,000.

is also a strong and well-fortified, and protects a dock yard at its foot. The harbour is a spacious inlet, nearly landlocked and has deep water in many places close to the shore. It forms the principal harbour of refuge for shipping in the Bay of Bengal and along the Coromandel coast, during

monsoons, the largest and most valuable. In the month of the Windward group, lies immediately off the S.E. coast of Venezuela, at the mouth of the Gulf of Paria, opposite the N. mouth of the Orinoco and is of an oblong form, with considerable projections at all its angles except the S.E.

THE NAVAL YARD TRINGMALAY.—From a sketch by John, Roberts, R.N.

the N.E. monsoon. The inhabitants of Tringmalay are mostly descendants of Malabar Christians or Mussulmans. The place has little trade, and affords but indifferent supplies of provisions. Amongst the population are many dealers in shells and precious stones or rock-gems. The town successively belonged to the Portuguese and the Dutch and was taken by the British from the latter in 1795. (Hassam, Voyages in China, &c.)

TRING is a market town and par. England, on Hertford, 51 m. N.W. by W. London, a station on the London and North-Western railway. It has many mostly modern and well built, and the general appearance of the town exceedingly neat. It has a handsome church in the ancient English style, with a large tower surmounted by a low spire, two Dissenting chapels; manufactures of canvas and straw-plait, and a silk-reel which employs upwards of 300 persons. Area of par. 7380 ac. P. 4745.

TRINGANO, or TRINGANO, a village, E. coast of the Malacca peninsula, lat. 4° 15' to 6° 30' N.; bounded N. by Calantan, from which it is separated by the river of that name, E. the Chion Sea, S. Pahang; and W. a mountain-range separating it from Pank. The surface consists of a succession of low hills rising from the shore towards the interior, and well adapted for the cultivation of cotton, of which there

is a considerable export. The minerals consist chiefly of gold and tin, particularly the latter which is worked to some extent. Though considered tributary to Spain, Tring is one of the most genuine of the modern Malay states, and nowhere is the Malayan dialect spoken in greater purity. P. estimated at about 35,000. TRINIDAD, an isl., S. Atlantic Ocean, lat. 20° 59' 30" N., lon. 25° 10' W. It is about 9 m. in circumference, high and uneven, rocky, difficult of access, and in general barren, but in some parts covered with small trees. On the W. side, almost detached from the island, there is a rock of cylindrical form about 650 ft. high, with trees on it. There is also a bluff rock, about 300 ft. high, through which there is a stupendous arched passage, 40 ft. in breadth, nearly 50 ft. in height, and 430 ft. in length; the sea breaks through this arch with great noise. At the S.E. end of the island there is a rock of a conical form, about 1100 ft. high, called the Sugar-loaf, with trees on its summit and whence a fine view is obtained of the water-fall of above 700 ft. is projected from it. TRINIDAD a river U. States, rises in the N. of Texas; flows first S.E., then S.W., and after a very winding course of above 250 m., falls into Galveston Bay in the N. of the Gulf of Mexico.

TRINIDAD (French, *La Trinité*) one of the British W. India isls., and, excepting Java, the largest and most valuable. In the N.E. of the Windward group, lies immediately off the S.E. coast of Venezuela, at the mouth of the Gulf of Paria, opposite the N. mouth of the Orinoco and is of an oblong form, with considerable projections at all its angles except the S.E. Length N. to S. 50 m. (average breadth, about 30 m. exclusive of its projections); area, about 1,556,000 ac. Point Galera, the N.E. extremity of the island, is in lat. 10° 50' N.; lon. 60° 54' W. (z). Approached from the N., Trinidad appears like an immense ridge of rocks; the E. and S. shores are also rocky and high; but on the S., or side next the Gulf of Paria, is presents one of the most beautiful and magnificent coast panoramas imaginable, hills, valleys, and plains being covered with a verdure that knows no decay. The mountain-chains run W. to E. In the N. near the sea, they attain an elevation of about 3000 ft., and are broken and rugged. In the centre of the island is a low elevated group of mountains, and in the S. a series of beautiful hills and knolls, among which no numerous delightful valleys occur. In the intervals between the ranges of mountains above described are several extensive plains, stretching across nearly the entire island E. to W. they contain some natural meadows or savannas, and are plentifully watered by numerous streams, but generally terminate towards the Gulf of Paria in great swamps. Some of them, also, still continue in their natural state, covered with trees. The principal rivers are the Caroni, the Oropendola, and the Orinoco; the first two navigable to a considerable distance inland by small craft. The nucleus of the savanna is a very dense argillaceous substrate, becoming hard and friable when exposed to the atmosphere, and changing to a micaceous schistus in the inferior layers and near the beds of rivers; in the interstices of which latter, particularly to the N., are found great quantities of subterranean pyrites in cubic crystals. There is no granite on the island; but blocks of milky quartz of different sizes are found in every valley. Gypsum and limestone are rare. Near Point Isaque, forming the S.W. extremity of the island, are several small volcanoes, the highest, about 160 ft. in diameter; has falling mud and steam billowing, but never overflows. Some of these volcanoes throw out salt-water, heavily loaded with argillaceous earth. During the hottest months of the dry season, and mud is thrown to the height of 30 ft. and the volume is inappreciable to within 50 paces. Subterranean volcanoes also occur on both sides of the island; one on the W. coast, near Cape Breton, occasionally boils up, and discharges a quantity

of petroleum; the other on the W coast, near Cape Mayaro, given, in March and June, several detonations resembling thunder, succeeded by flames and smoke afterwards electric pieces of blizzards as black and brilliant as jet. But the most remarkable phenomenon of this kind in the island

is on the E coast, but few, and those indistinct, on the E and N shores. Pop. (1851), 98,645 thus classified: Catholics, 43,605; Protestants, 15,246; Wesleyans, 3509; Presbyterians, 1017; Independents, 133; Baptists, 448; Mahomedans, Gentoo, leathers &c., 4668. Pop. (1861) 84,438.

is the Asphodel or Pitch Lake, situated on the leeward side of the island on a small peninsula jutting into the sea, a little to the N.E. of Chagres Bay. It is about 13 m. in circumference, and elevated 80 ft. above the level of the sea. The headland on which it is situated consists of bituminous coarse viridated sand, and earth cemented together. In some places beds of sanders are found, and a strong and numerous small paraffin ground to the surface of 6 m. or 10 m. from the lake. The pitch at the sides of the lake is perfectly hard and cold, but towards the middle the heat gradually increases, and the pitch becomes softer and softer until at last it is seen boiling up in a liquid state. Several attempts have been made to ascertain the depth of the lake, but no bottom has ever been found. The climate is extremely hot, and is not subject to drought. The beneficial and abundant dews, arising from the numerous rivers of the island, and surrounding ocean, cool and invigorate the atmosphere, and give an unusual luxuriance to its vegetation. The soil is in general extremely fertile, and the elevated parts of the surface are mostly covered with dense forests, which contain the finest wood for ship-building and for ornamental purposes among which the red cedar and a great variety of palms are conspicuous. The principal animals inhabiting the island are a species of small deer, the mangrove-stag, the peccary or leopards about the size of a hare, opossums, armadillos porcupines, hares, ant bears, sloths, tiger-cats, peccaries, water-dogs, manatees in great variety, land-tortoises, &c. Birds—partridges flamingoes white wood-peckers, wild ducks pelicans, vultures, bats, parrots, paroquets and humming birds. The chief crop of Trinidad is cacao: the other exportable products are sugar, molasses rum, and coffee, a small quantity of cotton and ginger. The exports in 1848 amounted to £381,593 and the imports to £481,562, in 1853 they were £710,973 and £798,438 respectively. The revenue produced £25,234 in 1848, and £184,378 in 1853 and the expenditure was £70,518 in 1848, and £188,982 in 1853.

Trinidad is a crown-colony, the public affairs being administered by a lieutenant-governor, assisted by an executive and a legislative committee. It was discovered by Columbus in July, 1498 and was taken from the Spaniards by the British in 1797. Port of Spain, on the N.W. side of the island, is the capital, and one of the finest towns in the W. Indies. Trinidad has numerous good harbours on its W and

of Waterford —1, (Wales), 15 sq. lps. 1880.—2 (Wales), 1668 sq. Pop. 12,177.

TRINITY-GASK, par Scot Perth 184 sq. m. P 597. TRINITY (Hort) par Eng Chester 1853 sq. m. 18490. TRINKESEFEN a vil. Belurus, circ. Kuznetsk 14 m. from Carlsbad with a church and school. Pop. 1311.

TRINVO, a tn and com Italy Piedmont div Novara, prov and 12 m. S.W. Verucelli, 1 bank Po. It is traversed by a large principal street lined with porticoes, and has a court of justice and a handsome church, a Dominican convent, a college, and an hospital. Pop. 8217.

TRINOMAJEE, a tn. S. Hindoostan, Carnatic, 52 m. W. N. W. Pondicherry, lat. 12° 11' N. lon. 79° 7' E. It is extensive and populous and the great street leading to the temple is lined with churches. Trinomajee sustained many sieges during the Carnatic wars of last century.

TRINS (Honey) a vil and par Switzerland, cant. Graubünden, 4 m. W. Haldenau, near l. bank Vorder-Rhein. It is well built and has a parish church, the ruins of two old castles, and a trade in fruit. The Trimmersee, in the vicinity contains good fish. Pop. 1073.

TRININIALE, par Eng Somerset 1828 sq. P 523. TRINIA a vil and com. Sardania, Sardinia, div Nizza, prov and 13 m. N. by W. the Reno on a mountain summit bathed on the E. by the Capriolo, and on the W. by the Verdegna, which unite their streams a little below. It was anciently surrounded by walls, and defended by two castles, of which portions still remain, and has an ancient collegiate church with some good paintings, an Augustinian monastery a public school, an hospital, and several other charitable endowments. Pop. 4846.

TRIPATTORE, several places in Hindoostan.—1, A large open village, 120 m. S.W. Madras, lat. 19° 50' N., lon. 78° 35' E.; well sheltered with fruit-trees, and having a comfortable appearance.—2, A tn. Carnatic, 62 m. S.W. Tanjore, lat. 10° 7' N., lon. 78° 40' E., with a ruined fort.—3, A small but well-built tn. Carnatic, 27 m. S. by W. Madras with a Hindu temple of considerable note.

TRIPOLI, a country in the N. of Africa, forming one of the Barbary States, and, in name at least, a dependency of the Turkish Empire. It is often understood in an enlarged sense to include both Barca and Fezzan, but as these are described under their own heads, the present article is confined to Tripoli proper, which lies between lat. 32° and 38° 30' N.; and

lon. 10° and 20° E. and is bounded, N by the Mediterranean, W Tunis, S Fezzan and the Libyan Desert, and E the Libyan Desert and Barca; length, W to E., about 700 m.; breadth, varying from 100 m. near the centre, to 200 m. near the extremities, even, roughly estimated at about 106,000 sq. m. The coast-line, the E. half of which forms the very remarkable indentation peculiarly known as the Gharbi Syrte, and now called the Gulf of Sirte, stretches in an irregular but almost unbroken course for about 600 m., and presents as few bays and projecting headlands as not to furnish more than one good harbor—that of the capital. One-half of the coast, from the Gulf of Gabes or Lesser Syrte E. to Mourata Point, is low and sandy, the other half is more diversified, and interrupts the monotony of its sandy beaches by numerous rocky points, which were the terror of ancient mariners, though modern survey has proved that their imaginations had greatly exaggerated the real danger. The interior is very imperfectly known. The E. part, being mostly a continuation of the desert, partakes of the inhospitable character, and contains large tracts of almost barren sands. In the S. however, it is partly traversed by the Black Mountains, an E. offset of Atlas, which descending in successive terraces, inclose many valleys and plains of considerable fertility. From there to the W. the surface becomes still more diversified, and presents scenery which is not deficient either in beauty or grandeur. Two mountain-ranges stretch from W to E in directions nearly parallel to the coast—the one in the S. called the Bura, and the other in the N called the Gharbi Mountains. The latter range which has a width of 12 m. to 15 m., and attains a height of about 4000 ft., is not more than 20 m. from the coast, and becomes visible at sea. It is composed for the most part of volcanic rocks, and many of its summits assume the form of isolated conical peaks. The space between these is often occupied by a kind of plateau. The soil upon them produced by the decomposition of lava and basalt, is very fertile, and being often under careful cultivation, produces heavy crops of grain more especially where the natural deficiency of moisture is supplied by irrigation from large tanks, in which, in the absence of running streams, the rain-water is collected for that purpose. On the sides of hills too steep to be arable, vines, olives, almonds, figs, and other fruits, are often seen growing in profusion. In these hilly tracts much of the surface is left in natural pasture, which more especially after heavy rains have intensified them with moisture, becomes extremely luxuriant, and rear cattle in such numbers as to become an important article of export. But by far the richest and most fertile tract of Tripoli is that of the Moudra, which stretches about 15 m. along the coast, with a width not exceeding 5 m. and has the capital nearly in its centre. The whole of this favored district is economically occupied with fertile fields, on which such crops of wheat, barley, millet, and Indian corn are grown, plantations of productive palm-trees, arranged in regular rows, olive-yards, vineyards, orchards, and gardens yielding in abundance, among other fruits, oranges, pomegranates, lemons, figs, apricots, plums, and water-melons. Though, from the porous nature of the soil, there are no proper rivers in the country, the supply of moisture under careful husbandry is sufficient both for domestic and for agricultural purposes. Abundant rains fall from November to March and are collected in numerous tanks and cisterns, to provide against the succeeding droughts which prevail throughout the remainder of the year, more especially from May to September when sometimes for months not a single shower falls. At this time the heat is intense, the sun often blazes, and the thermometer rises from 90° to 92°. During the rainy season the fluctuations of temperature are often very great, the thermometer frequently falling during the night to 40°, or to the freezing point, and rising during the day to above 70°. The prevailing winds of summer are E. those of winter W and N W. The rural population consists chiefly of Arabs, the town population chiefly of Moors, both with a considerable intermixture of Jews. Neither Turks, Manichæans, nor Christians are numerous. The government is an unmitigated and barbarous despotism. The people, generally chosen from among the tribes which abound, give a very pleasing report to Tripoli. But it has numerous drawbacks. Its situation is extremely unhealthy, and its harbor small and unsafe. Notwithstanding these drawbacks, Tripoli continues to be a place

from piracy, since the saturation of which, the deficiency has been in a great measure supplied, not by developing the resources of the country, but by establishing monopolies, tampering with the currency, and imposing grinding taxes. The more regular and legitimate sources of income are direct tribute from the Arabs and district-governors, a land tax, a tax on Jews and merchants, and export and import duties. Pop. about 1,500,000.

TRIPOLI [anc. Zēn] a seaport, N. coast, Africa, cap. of above state, 300 m. S. of the coast of Sicily, and 800 m. S E Algiers, lat. (pasha's castle) 32° 53' 54" N., lon. 18° 11' E. (p.) It stands on a rocky promontory washed by the sea on the N and E., and connected with the mainland on the S. and W. by a sandy plain partly under cultivation. It is enclosed on the land-side by a lofty wall flanked with bastions, and defended on the sea-front by a formidable line of intrenchment, terminating at the S. E. angle in a strong castle, in which the pasha resides. The town is entered by two gates, encloses an area about 1300 yards long, by 1000 yards broad, and consists of a great number of narrow and uneven lanes, lined for the most part with mean houses buddled together without any order, and from the absence of front-windows, looking more like dead walls than inhabited dwellings. The pasha's castle, almost square, consists of an ancient pile of vast extent, built at different times, and so irregularly, that all appearance of symmetry is lost. The other principal buildings are six principal, and many smaller mosques. The great mosque, situated in the main street, is a handsome and majestic structure, in which the roof, formed by a number of small cupolas, is supported by 16 Doric marble-columns, said to have once belonged to a Christian church. The other objects most deserving of notice are two or more Christian churches, a Franciscan convent, three synagogues, a number of public baths, each covered with a dome, extensive lemon and orange groves, and several ancient remains, among which the most remarkable is a magnificent triumphal arch, erected in 164, to the Roman emperors Aurelius Antoninus and Lucius Verus, consisting of huge blocks of marble, beautifully sculptured on the sides and ceiling and now used as a storehouse. The only manufactures of any consequence are carpets, which have long been celebrated, mantles and other woollen stuffs, ordinary and morocco leather and potash. The trade has the advantage of the only good harbor for several hundred miles along the coast. It is formed by the E. side of the promontory on which the town stands and two long lines of reefs on the E. and N. E. furnishing tolerably good shelter. Where deepest it has not more than five or six fathoms, but has capacity sufficient to admit whole fleets of merchant-vessels, ships-of-war anchor in the outer roads, which have good holding-ground in 16 to 18 fathoms, with sufficient shelter. A great part of the trade of the state, and even of the more distant interior as far as Timbuctoo and Bornou, has its emporium at Tripoli, to which the goods are conveyed across the desert in caravans. The exports consist chiefly of woollen goods, hides, tanned skins, oil, cattle, goat and sheep skin, wool, fruit, chiefly dates, madder, wax, &c. the imports, grain, European turneps of all kinds, chiefly cottons, hardware, cutlery, including sword-blades, firearms, wines, coffee, sugar, &c. Pop. about 30,000.

TRIPOLI, TARABOLUS, or TRIPOLIS, a seaport, N. Syria, cap. pash. of same name, on the Mediterranean, 45 m. N by E. Beyrout lat. 34° 26' 34" N. lon. 35° 49' E. (p.) It stands on a small triangular plain, washed by the sea on the N and S. with a hill covered by a Saracenic castle on the E. and some low mounds on the S W. and is divided into two portions by the Nahr-Kadisha, which runs by the castle, the part to the N styled El Mina or Marina, being the port. The houses are chiefly of stone. Most of the mosques have been evidently Christian churches, and are handsome edifices; the bazars and khans also are the ancient monasteries and nunneries; and several of the streets have on each side arched or rude Gothic architecture. The luxuriant groves of oranges, lemons, and mulberry, and other fruit-trees, cultivated with the utmost care, which meet the eye in every direction, and the noble poplars and plane-trees, bearing various odiferous shrubs which abound, give a very pleasing aspect to Tripoli. But it has numerous drawbacks. Its situation is extremely unhealthy, and its harbor small and unsafe. Notwithstanding these drawbacks, Tripoli continues to be a place

of considerable trade, especially in silk and sponge. Some wool cotton, tobacco, galls, ochrewood, and soap are also exported Pop. 14,000.

TRIPOLIZZA, or **TARABOLLOZA**, a tn. Greece, Morea, cap. Arcadia, on a black and elevated plain more than 8000 ft. above sea-level, 87 m. S.W. Corinth. Under the Turks it was the capital of the Morea, and rose to be a flourishing town of 20,000 inhabitants but suffered severely during the war of Independence and was finally abandoned by the Egyptians under Ibrahim Pasha, was left a heap of ruins, in alleged retaliation of atrocities which the Greeks had on a previous occasion been guilty of. It has been rebuilt and has a respectable appearance, presenting fewer ruins of modern buildings than are met with in most Greek towns. It is said to derive its name from the three towns of Tegea, Mantinea, and Pallantium, which were all situated on the plain on which it stands. Pop. 2500.

TRIPPSTADT, a vil. Bavaria, Prussia 18 m. E. of E. Zweibrücken; with a church, a castle, and extensive iron-works. Pop. 1876.

TRITIRI, a tn. Base-Weimar bail. Neustadt with two churches, an academy, and two mills. Pop. 1439.

TRISORIO, a vil. and com. Italy, Piedmont, div. Alessandria, prov. and 6 m. S.E. Aquis with several churches and the ruins of an old castle. Pop. 1824.

TRISTAN D'ACUNHA, a group of three isls., S. Atlantic Ocean, the largest and most N., named after the Portuguese discoverer, Tristan-d'Acunha is about 20 m. in circuit in 37° 5' S. 18° 12' W. [a] It is apparently a solid mass of rock, in the form of a truncated cone rising abruptly from the sea, and according to an angle of 45° to the height of 8000 ft. This cone is surmounted by a dome 6000 ft. high on the summit of which is the crater of an old extinct volcano, nearly 1 m. in circumference. The face of the mountain, as far as the base of the dome, is mostly covered with brushwood, intermixed with ferns and long grass, which give its native ruggedness. In many places, however, it is completely bare and presents to view the edges of a vast number of strata arranged horizontally or at slight degrees of elevation. The climate of the island is mild but moist. Wild celery is abundant and the ground is covered with a gigantic species of figs (*G. grandifolia*). Two species of seals are the only quadrupeds on the island, these can be considered as strictly indigenous, the wild goats and hogs having been introduced since its discovery by the Europeans. The only land-birds are a species of thrush, hunting and common moorhen. Of aquatic birds there is a great abundance, including the albatross. There are no reptiles, and very few insects.

TRISTE—1, A gulf, S. America, N. coast, Venezuela in the Caribbean Sea, formed by the point of Tucacas on the N.W. and the mouth of the Chavero on the S.E. It is about 24 m. across, and penetrates about 9 m. inland—2, A bay, uninhabited, in the lagoon of Termones, in the Gulf of Mexico, about 16 m. in circuit.

TRUGGIO a vil. and com. Italy Lombardy prov. Milan t. bank Lambro, 7 m. from Carate, with a parish church a charitable endowment, a mill, and a trade in corn wine, and silk. Pop. 1100.

TRUJIMING a tn. Brazil, prov. Rio de Janeiro do-Rio-Grande, 1 bank Taquari 80 m. W. Porto-Alegre. It is the head-station of several electoral colleges has a parish church and a primary school, and a harbour which admits only small craft. Pop. 1842.

TRIVAILOOR, a tn. Hindoostan S. Carnatic, dist. and 84 m. E. Tanjore pleasantly situated on the Nagore, here crowded by two narrow stone-bridges. It is a cheerful and populous place, with a handsome square of native houses, enclosing a magnificent tank, one side of which is occupied by a lofty pagoda, while a choultry occupies a projecting peninsula on the opposite bank.

TRIVANDRUM a tn. Hindoostan. See **TRIVANENTR**. **TRIVENTO**, a village in Naples, prov. Benevento, 15 m. N.W. Campobasso, t. bank Trigno. It is the see of a bishop and contains a handsome cathedral episcopal palace, five parish churches, a monastery, a nunnery, and sanctuary. Pop. 2500.

TRIVERO, a vil. and com. Italy, Piedmont, div. Turin prov. and 9 m. E. Biella, on an affluent of the Sesia. It has a parish church and a sanctuary. Pop. 4016.

TRIVIGNO a vil. Naples, prov. Basilicata, S. E. Matera, between lofty hills near r. bank Basento; with a church and four chapels. Pop. 2500.

TROBRIAND, a group of isls. Loutiade Archipelago, S. Pacific, lat. 8° 47' 45" to 8° 52' 50" S., lon. 147° 34' to 151° 10' E. The islands are generally low, and of considerable extent, apparently fertile, producing, in particular, abundant quantities of the finest yams and maintaining a dense population. The more important islands of the group are Lagrandiere, Jurien, and Juvency.

TROCHTELFINGEN a tn. Hohenzollern-Sigmaringen, on the Becksch. It contains an old massive tower forming the only remains of the strong castle of Trochtelefingen. P. 1188.

TROCHTELFINGEN a vil. Württemberg, circle Jaxt, bail. Reichenheim, with a church. Pop. 1020.

TROEDYRAUR, par. Wales, Cardigan; 4666 ac. Pop. 1020.

TROENSE, a vil. Denmark, in Thesinge, on the Thesinge and possessing excellent building yards. Pop. 700.

TROFA, a tn. and par. Portugal, prov. Douro, 9 m. E. N. E. Aveiro near bank Vouga. Pop. 860.

TROGGI N. a tn. and par. Switzerland, cant. and 6 m. N. E. Appenzel, cap. of Oetzthoden. It stands on a narrow ridge between the arms of the Goldbach and contains a well-built square, and a handsome parish church. It has also an important educational establishment, a museum and library, an orphan asylum, and a penitentiary. The manufacturing consists of linen and muslin. Pop. (1850) 2611.

TROIS-ILLES, or **St. Salvator**, a tn. W. Indies, on the S. E. of Guadeloupe, cap. dist. and at the mouth of a stream of same name, 7 m. E. S. E. Beve Terre. Pop. 2716.

TROTHKE, two tns. Russia—1, Gor. Orenburg cap. circle, 1 bank On. 280 m. E. S. E. Ufa. It is built in the form of a square, enclosed by a fence and wooden walls, flanked with towers and defended by outworks, so as to be a place of some strength. It has spacious and regular streets; three churches, one of them a handsome stone-building, two mosques, and an hospital large iron-works, manufactures of firearms, and an extensive trade. Near it are gold-mines.

1870—2 Gor. Pensa, circle Krasnoyarsk P. 1550.

TROITSK MONASTERY, or **TROITSK-BENEDIKT**, a tn. Russia, prov. and 45 m. N. E. of Moscow on the Moscow at the foot of a lofty hill which runs up to the centre, and is crowned by one of the largest and most remarkable convents in Russia. This monastery, said to have been founded in 1328 by St. Sergius, is enclosed by a lofty wall nearly 20 ft. in thickness more than 1000 yards in circuit and flanked by eight large towers. The principal church, in which the saint is buried has a gilded roof and numerous costly ornaments and vessels. Another church is surmounted by a modern tower 250 ft. in height, and contains 84 bells, one of which weighs about 60 tons, another 30 tons, and a third 55 tons. In addition to these two, there are still seven churches within the walls, an imperial palace, the residence of the archbishop, a seminary where nearly 300 students are maintained and educated, and a large establishment of monks. Pop. (n) nearly 6000.

TROJA, a tn. Naples, prov. Capitanata, 7 m. N. W. Bovino. It is the see of a bishop, and contains a Gothic cathedral, four parish churches five monasteries, two nunneries, and a handsome seminary. Pop. 4400.

TROJA (anc. *Troia*) a tn. Lycia, on the coast of Taurus about 13 m. E. of Kibis. It is only about 1½ m. in each way and has a conical summit crowned with a tower.

TROKI, a tn. Russia, gov. and 16 m. W. S. W. Wilna, cap. circle, on S. W. shore of Lake Berezina, in which is an island with a castle upon it. Troki is built of wood, contains three churches a castle and a monastery. It was once the residence of the grand duke of Lithuania. P. (1849) 4866.

TROLLHÄTTA, a vil. Sweden, in Thesinge, in a beautiful and romantic district, 1 bank Githa, about 7 m. below its outlet from Lake Wener, and 41 m. N. by E. Got. It has extensive saw-mills situated on the celebrated falls of its name, and attracts many visitors by its wonders both of nature and art, the former, the falls already mentioned, over which the whole flood of the Githa, after rushing down a series of foaming cascades, is precipitated a height of about 100 ft. forming one of the most magnificent cascades in the N. of Europe, and the latter, the houses

excavation in the solid rocks, and the other great engineering works, by which, notwithstanding the falls, a continuous navigation has been secured from the Kattegat through the Gøtha, into Lake Wener. Pop. [1911] about 1000.

TROMBETAS, *Trumbetas*, a river Brazilian Guiana, rises near the frontier of British Guiana, in the Serra Tumucumaque flows S., passes the town of Orléans, and falls into the Amazon by two unequal mouths at a short distance from each other. It is the largest of all the affluents which the Amazon receives on the left between the Negro and the sea.

TROMSØ, an isl off S. coast, Norway, prov Christiania, opposite to Arendal, and only separated from the mainland by a very narrow channel. It forms a narrow belt about 7 m long N. E. to S. W., and is partly covered with wood and partly under cultivation.

TROMSØ, a seaport in Norway, cap. prov Tromsø, pleasantly situated on an island off the W coast, about 1 m. long by $\frac{1}{2}$ m. broad, which lies between Isl Hvaløen and the mainland lat. (observatory) $69^{\circ} 39' 12''$ N., lon. $18^{\circ} 57' E.$ (z.) It consists of a long street, built entirely of wood and though of recent origin, has rapidly acquired prosperity chiefly in consequence of the important fisheries carried on in its vicinity and it has an important trade. It is the seat of a bishop, residence of the governor, and several subordinate authorities and has a church, a superior and an elementary school and an hospital chiefly for the cure of leprosy and elephantiasis, which here prevail to a great extent. Pop. 901. — The province is the most N. of the kingdom. It is bounded, S. by prov Trondhjem, E. Sweden and Russia, and N. and W. the Frozen and the Atlantic Oceans. It is divided into the two bailiwicks of Nordland (area, 11,003 geo. sq. m. pop. 65,512), and Finnmark (area, 20,550 geo. sq. m. pop. 42,589).

TROMSCHENNES, or *Dronnes*, a town and arm. Isl. prov E. Flanders, 2 m. W Ghent 1 bank Lyk with two churches, a chapel, townhouse prison, and several schools two distilleries, a brewery a miller and three corn mills. 1 op. 4634.

TROND (Tr.) [*Flemish, Nist-Trupke*], a town in Belgium prov Limburg, 10 m. S.W. Hasselt. It has a townhouse with a lofty quadrangular tower, three churches, a college a small seminary, an episcopal normal, and several primary schools, an hospital, orphan asylum and almshouse for old men. About one-third of the inhabitants are employed in making lace, and there are breweries, distilleries, anticorrosives, mills for oil and beating hemp, a soap-work, a tobacco and a beet-root sugar factory. It owes its origin to a Benedictine convent, founded in 605 and was surrounded with walls in 1056, which were demolished in the 15th century. Pop. 3111.

TROMDHJEM [anc. *Nidaros*, Latin, *Ambrosia*, German, *Dronthjem*] a seaport in Norway, cap. of S. Tromsø, beautifully situated on a circular bay at the mouth of the Nid, in the S. side of the Tromsø-fjord, lat. (astronomy) $69^{\circ} 25' 25''$ N., lon. $19^{\circ} 22' 40'' E.$ (z.) On the land side it is commanded by a series of heights which make it impregnable of defence in that direction, but towards the sea it possesses strong fortifications, both on the mainland and more especially on the small rocky island of Minkeholm. It has spacious, regularly formed, and remarkably clean streets, with water-cisterns at their intersections, and was once built almost entirely of wood, but now, in consequence of the ravages of repeated fire, consists chiefly of stone or brick houses, which, though more substantial, want the picturesque appearance for which those of wood were celebrated. The most remarkable edifices and establishments are the cathedral, the great object of interest, much dilapidated by the ravages of early barbarism, and adorned by the bad taste displayed in more modern renovations, but still venerable from the antiquity of some of its parts, which are as old as 1053, and entitled to rank, as a whole, as the most remarkable ecclesiastical structures in the kingdom, the palace of the old Norwegian kings, of whom Tromsø was the capital, now converted into a military and naval arsenal, a museum, including a picture gallery and a library with some rare MSS., a superior and several other schools, a courthouse, custom-house, handsome theatre, &c. The manufactory are not of much

importance, but include excellent ropes, hat-covers, &c., of goat-skin; trinkets, and rifles, said to have the double advantage of being cheap and the best in Norway. The breweries also are famous for a beer which is largely exported; and the building-yards fit out vessels which bear a high name for

TROMSØ CATHEDRAL. — From Voyages by St. Christopher Schöller, 1840, p. 20.

their sailing properties. The harbor is indifferent, not admitting vessels which draw more than 10 ft. or 12 ft. and the roadstead is exposed to a heavy swell from the N. and E. The trade consists chiefly in exports of timber dried and salted fish, tar and copper. The beauty of the scenery of Tromsø is much celebrated, and the elegance of its society gives it much more the appearance of a capital than Christiania, which supplanted it in this respect on the union of Norway to Denmark. 1 op. (1845), 13,918. — The province of Tromsø is bounded, N. by prov Tromsø, E. Sweden, S. prov Bergen, and W. the N. Sea, and is divided into two bailiwicks: — N. Tromsø (area, 5634 geo. sq. m. pop. 65,570), and S. Tromsø (area, 5408 geo. sq. m. pop. 69,829).

TRONTANO a vil and com Italy, Piedmont, div Novara, prov Pallanza 2 m. E.N.E. Domod. d'Ossola with three squares, each of which contains a parish church. P. 1193.

TRONTU a river Naples, rises in the Apennines, in the N. of prov Abruzzo-Ultri II flows directly N till it reaches Arqua in the Papal States, when it turns N.E., passes the town of Ascoli, forms part of the boundary between the Papal States and Naples, and falls into the Adriatic, after a course of 60 m. of which scarcely 3 m. are navigable.

TRONV a small seaport in Scotland W coast, co. and between 5 m and 6 m N. Ayr a station on the Scottish South-Western railway. It is pleasantly situated on a promontory projecting into the sea, and is mostly built, containing many substantial houses and handsome summer-houses. It has an elegant parish church, and Free and U. Presbyterian churches, a large school, and a public library. The principal trade of the port is the exportation of coal and pig-iron, and the importation of timber. The harbor is of easy access and affords safe anchorage for vessels requiring 16 ft. depth at low water. At the pier is a depth of 19 ft. at low-water. There are a building yard, a spacious wharf-dock, two dry-docks, and a lighthouse. 1 op. 2404.

TRUPAI A a town Naples, prov Calabria-Ultri II, dist. and 15 m. W.W. Monteleone. It occupies the crest of a conical rock overlooking the S. shore of the Gulf of St. Erycinia, and connected with the mainland by a narrow isthmus, is surrounded with walls flanked with towers, and entered by three gates, and has a handsome cathedral, five parish churches, a seminary, several free schools, a convent, hospital and almshouse. Some fine cotton goods are manufactured here, and the fishing is productive. Pop. 4300.

TRUPEZ (Tr.) a town France, dep. Var S. side of the Gulf of Grasse, 83 m. E.N.E. Toulon. It is an ancient place, occupying the site of the Roman Forum. A considerable number of which many vestiges have been traced and has some handsome modern houses, a court of commerce, a hydrographic

school, manufacture of cork and weavers' reeds, distilleries, a well-sheltered harbour, a very large building yard, tannery and other fisheries, and a considerable trade in raw and manufactured cork, wine, oil, wood for fuel, armdines, anchovies, and chestnuts. Pop. 3377.

TROPPAU a walled town in Austria, Moravia, formerly cap. of Austrian Silesia, cap. of Kreis Oppa, 87 m. N.E. Olmutz. It is well built, many of the houses being handsome, and the streets generally being wide and well paved; and has four churches, a town-house, castle, theatre, gymnasium, military and other schools, an infirmary, orphan asylum, four monasteries, and eight hospitals; and manufacture of wool-lens and linen fabrics, paper, soap and rugelie. Troppau is the seat of a court of first resort and of several other courts and public offices. It is a place of considerable antiquity and suffered severely both in the Thirty and the Seven Years war. Pop. (1849), 12,827.

TROQUEEN, par Scot. Kirkcubright 5 m by 6 m Pop. 4955.

TROXY, par Ind. Farmington 4387 ac. P. 1186.
TROSA, a town in Sweden, Ups Nykyling, near the mouth of a river of same name, in a small bay of the Baltic, 35 m. S.W. Stockholm. Though one of the smallest it is also one of the oldest towns of the kingdom. It is poorly built; but has a good harbour and a fishery. Pop. 590.

TROSBLEY or **TROTSCHBURY** par Eng. Kent 1100 ac. Pop. 285.

TROSBINGEN, a village in Württemberg, Kreis Schwarzwald, near Tübingen, with a law-court, and a parish church. P. 2367.

TROSTOV, par Eng. Suffolk 1754 ac. Pop. 437.

TROSTREY, par Eng. Monmouth 1255 ac. P. 176.

TROTTON, par Eng. Sussex; 3377 ac. Pop. 484.

TROUVILLE, or **TROUVILLE-SUR-MER**, a small seaport in France, dep. Calvados, on the Touques, where it falls into the English Channel 7 m. N.E. of Pont l'Évêque. It has a small harbour and is much frequented for sea-bathing. Pop. 3118.

TROWBRIDGE, a market town, par Eng. England, co. Wilt, 25 m. N.W. Salisbury, on a rocky eminence in the valley of the river Uss, across which there is a stone-bridge. It consists mostly of the principal street, winding and irregular, but tolerably well kept. The houses are generally well built, many of them excellent, and the greater part of stone, those of the wealthier classes are large and handsome, with extensive gardens attached. There are two churches one—the parish church—a fine ancient building in the perpendicular style; the other a modern structure in the early English style and eight Dissenting places of worship only two of which, however, have any pretensions to architectural elegance. There are two national and several less important schools, some charitable societies, and a manufactures institution. The principal manufactures are of woollen-cloths and kersey mers, of which from 30,000 to 50,000 yards are produced weekly. Pop. (1841), 10,157. Area of par 2442 ac. Pop. 11,146.—(Local Correspondent.)

TROWELL, par Eng. Notts 1579 ac. Pop. 309.

TROWELL, par Eng. Norfolk 1000 ac. Pop. 1363.

TROY, *Troas* or *Truva*, one of the most famous cities of antiquity the ruins of which form the subject of Homer's *Iliad*. No vestige of it remains and even its site has given rise to much discussion, though it is generally believed to have been on a slope or spur of Mount Ida, in Asia Minor, about 8 m. S. of the W. extremity of the Straits of the Dardanelles, and overlooking an alluvial plain still known as the Plain of Troy. This plain about 10 m. long, by 3 m. broad is washed on the N. by the Dardanelles, and bounded on its other sides by mountains, from which descend three streams—the Mendere, the Sararashli, and the Anahit. It is not easy to identify these with Homer's Simois, Xanthos, and Scamander.

TROY a town, U. States, New York, 1 bank Hudson, 8 m. N. Albany, on the Champlain and Hudson canal and on railway connecting it with Boston on the E., New York on the N., the ports of Lake Erie on the W., and Vermont and Canada on the N. It is one of the towns proper—occupying a somewhat elevated plain, terminated by a range of hills, in which the two most conspicuous eminences bear the classical names of Mount Ida and Mount Olympus—and of an extensive suburb, which from being situated on the opposite bank of the river, is called West Troy and communicates with it

both by a bridge and three regular ferries. The great mast of business is River Street, which, following the curve of the stream for about 5 m., is deficient in regularity of form, but is lined on both sides with splendid and spacious shops and warehouses. The other streets, either parallel or at right angles to River Street, are generally straight and shaded by trees, which give them a retired and rural appearance, and there are also several public squares adorned with fountains, which, as well as the town itself are amply supplied with water from a reservoir in the neighboring hills. The public buildings include about 12 churches, among which one of the four belonging to the Presbyterians, and the Episcopal church of St. Paul, are distinguished by the elegance and costliness of their structure the one in the Greek and the other in the Gothic style the courthouse, a splendid building, constructed, after a Grecian model of Sang-Sing marble a female seminary of great celebrity and on a very extensive scale, occupying a beautiful and central situation, with ornamental grounds, and partly supported by the state the Roman Catholic Institute, chiefly for the education of engineers a lyceum of natural history, with a valuable library and museum two excellent market houses, a jail a county-prison in which a farm of 200 acres is attached, and a U. S. States arsenal. The last situated in West Troy occupies an extensive range of building of stone and brick, and contains a large and well-lit armoury. A dam which has been thrown across the Hudson, immediately above the town has made its waters extensively available for manufacturing purposes and furnishes moving power to various furnaces and forges, and to paper, saw, and flour mills. Other manufactures are leather, wool, tin-cloth cordage, carriages, and more especially hardware and cutlery. The trade, favoured partly by the Hudson, which admits steam boats to the town, but much more by the various artificial means of communication is extensive and increasing. Pop. (1850) 28,785, West Troy 764.

TROYES (acc. *Augustiana, Tricomania*), a town in France, cap. dep. Aube, 90 m. N.W. Paris, with which it is connected by railway 1 bank Seine, which partly surrounds the town and being drawn off by numerous sluicings, both supplies it with water-power and contributes to its cleanliness. Many of the streets are narrow and irregular, and lined with antiquated houses composed of timber and plaster but these

RUE NOTRE-DAME, TROYES.—From *Voyage dans la France* by Troyes.

buildings are gradually giving way to others of modern construction, and some quarters have already assumed a less agreeable appearance. The old ramparts have been almost completely thrown down, and their site is now occupied by fine

of the Andes. On the E. of the chain, and nearly parallel to it, flows the Marañon, the principal branch of the Amazon; and to the W of it numerous torrents descend with impetuosity to the Pacific. The principal cultivated product is rice. Much of the surface is occupied by interminable forests, though other parts are bleak and almost desert. The mines, which were long celebrated for productiveness, are supposed not to be exhausted, though few are now worked.

TRUKILLO, a tn. Tucumán, cap. prov., 150 m. S.E. Maracibo. It consists principally of two parallel streets and a public square, is poorly built, houses seldom of more than one story, and of mean appearance and has four churches, two convents, a college, and other schools and some trade in cacao, indigo, coffee, &c., carried on chiefly by means of the Lake of Maracibo. Before it was pillaged by the buccanniers in 1678, Trucillo is said to have been one of the finest and wealthiest cities in this part of America. Pop. about 8000.

TRUKILLO, a support to Central America, Honduras, cap. dep. Yoro, on a height above the bay of same name, lat. (fort) 16° 55' 42" N. lon. 82° 49' 50" W. It has a harbour, defended by three forts; and some exports, among which live cattle is one of the most important items.

TRYBERG, a tn. Baden, circle Upper Rhine cap. bail. N.E. Freiburg with a church and manufacture of wooden clocks and straw-hats. Pop. 1114.

TRYBULL, prov. Eng. Stafford 8110 ac. Pop. 559.

TRYBOCHOWICE, in Bohemia. See Housumec.

TRYBOMANO, a tn. Prussia, prov. and 83 m. E.N.E. Posen between two lakes. It contains a Protestant and two Catholic churches, a synagogue, an Augustinian monastery with library a gymnasium, seminary, and hospital, and has a trade in cattle. Pop. 8182.

TRYCUM, a tn. China, prov. Chekiang S.W. Hangchow. It is a large and important place; and has opposite to it a curiously-shaped hill composed chiefly of granite of a beautiful green colour which, being much prized by the Chinese, is extensively quarried and largely exported. It is employed for various ornamental purposes, and more especially for building tombs.

TRYTORAYA, a tn. Hungary. See Czakartum.

TRYAMPAYAGU, a tn. Burmah at the confluence of a small stream with the Irrawaddy, 76 m. S. Ava. It has a custom-house, and is the limit N. beyond which even native Burmese cannot pass without special permission from government.—*Four Asiat. Soc. Bengal*, April, 1837.

TRAN, Thana, and Thau, numerous cities and tns. China, some of which are of particular importance.

TRANA, a lake Abyssinia. See Demasa.

TRANTA, a fortified tn. China, prov. Yunnan on an affluent of the Pinglo, near the frontier of Burmah, 80 m. E.N.E. Bhamo.

TRANY, a vil. Hungary. See Csany.

TRCHADRIK, or JADRIN, a tn. Russia, gov. and 113 m. W.S.W. Kazan, cap. circle, 1 bank Stera, with a trade in corn. Pop. 1000.

TRCHAGIRA, a river, Russia, rises on S. frontier of gov. Simbirsk, flows W.S.W. forming part of the boundary between that gov. and that of Saratov, and ends a course of above 80 m. in the Volga, 6 m. S.E. Kuybyshev.

TRCHAIHING, a market tn. Hungary. See Czerben.

TRCHARKISK, a tn. Russia, gov. Volhynia, 1 bank Str. 70 m. S.W. Pskov. It is the capital of a principality belonging to the family of Radzwill, and contains a castle. Pop. 1500.

TRCHEREN, a vil. Hungary. See Czerne.

TRCHERKORSKY, a tn. Russia. See Torkomskan.

TRCHELLJABINSKY, a tn. Russia. See Torkomskan.

TRCHELLJABINSKY, or Czakartum, a tn. Bohemia, circle Kautsk 1 bank Elbe, about 4 m. from Brandeis, with a church tower and brewery. Pop. (agricultural) 1253.

TRCHERKOWITZ, a vil. Bohemia, circle K. Chrudim, with a Protestant and a L. Catholic church, and school. A good deal of flax is hand-spun. Pop. (agricultural) 1456.

TRCHERMOCHANE, a river, Russia, rises in N.W. of gov. Orenburg, flows N.E. into Kazan, then S.W. across a corner of that gov. and part of Simbirsk, and after a course of about 140 m. joins 1. bank Volga, 3 m. S.E. Singuliev.

TRCHEROWITZ, tn. Russia. See Czakartum.

TRCHERIKOW, a tn. European Russia. See Czakartum.

TSCHERKASSY, a tn. Russia, gov. and 102 m. S.E. Kiev cap. circle, r. bank Dnieper. It was once the capital of the Cossacks, who founded it in the end of the 18th century. It contains several churches. Pop. (1847) 2684.

TSCHERMNA, a vil. Bohemia, circle Bidschow, near Arcus with a church, a castle, and a mill. Pop. 1016.

TSCHERNIGOFF, gov. and tn. Russia. See Czakartum.

TSCHERNOWITZ, Austrian Galicia. See Czakartum.

TSCHERNOBILSK, a tn. Russia, gov. and 76 m. S.E. R. Mohilev on a stream of same name, with a castle, four Greek churches, a synagogue, and three annual fairs. P. (1851) 1556.

TSCHIRKLOWA, tn. Hungary. See Czakartum.

TSCHIRKOFF, one of the Aleutian isls., W. of the peninsula of Alaska; lat. (N. h. point) 56° 56' N. lon. 155° W. It is about 30 m. in circuit, low and flat on its W. but on its E. side presents steep and lofty cliffs. Its general aspect is dreary and inhospitable, being to all appearance, destitute of trees and shrubs, its coasts are much frequented by small whales.

TSCHIRNAU (Jacos and Kuman), two nearly-contiguous vils. Prussia, prov. Silesia, gov. and N.W. Breslau. They contain two churches a chapel, and two schools; and have manufactures of woollen cloth a spinning and several other mills. Pop. 1819.

TSCHIRNE, a vil. Prussia, prov. Silesia, gov. Loggia, circle Bunzlau with a church. Pop. 1049.

TSCHISLA, a vil. Bohemia, circle Bidschow cap. dist. with a church, a courthouse, manufacture of linen, a bleach-field, and two mills. Pop. 1839.

TSCHISTAY, or SCHAT, a market tn. Bohemia, circle and near Rakonitz, with a church, and manufacture of potash. Pop. 1438.

TSCHOW, a populous walled tn. W. Africa, Yarrick, 40 m. N.W. Katsina lat. 9° 15' N. lon. 6° 50' E.

TSCHUKI, or SCHAT, a market tn. S. bank Tschukow, 38 m. E.N.E. Parna. It formerly had extensive salt-works, which are no longer in operation. Pop. 2350.—2. *Forbach*, A market in opposite to the former on the r. bank of the river. The inhabitants are chiefly employed in agriculture. P. 3240.

TSCHULL, a river in Hungary. See Czerne.

TSCHUM, a city China, cap. prov. Shantung, r. bank Tschin ho, 225 m. by L. Peikin. It has manufactures of coarse fabrics made of wild silk, and ornaments of a kind of vitreous composition made to resemble serpentine, and various other substances.

TSCHUMDO, a tn. Tibet, cap. prov. Kham 550 m. E.N.E. Lassa lat. 31° 10' N. lon. 80° 46' E. It lies in a valley surrounded by high mountains between two rivers, which unite to form the Tsang-kiang. Two great wooden bridges thrown over these rivers on the right and left of the town, lead to two parallel roads, called respectively the road of Soobuen and the road of Yunnan. The carriers who act as ports between Lassa and Pekin, and all the civil and military servants of the Chinese government, are obliged to pass by the former of these roads, the other one, with the exception of a few Chinese merchants, who may be occasionally seen passing along it into Tibet, is almost deserted. The town has an old and decayed appearance. Its old houses, irregularly constructed are scattered in a confusion over a great extent of ground, leaving on all sides large spaces either altogether empty or covered with ruins. Tsungdo contains a garrison of 800 Chinese soldiers, and a monastery, occupied by about 2000 lamas, in which is one of the finest and richest temples in Tibet, but the numerous population of the town have an appearance of great wretchedness.—(Hue, *Discoveries* &c.)

TSCHUMPA, or CHAMPA, a prov. Anam (which see).

TSCHUN, a plain to the north of numerous Lhasa towns.

TSCHUGO-GAWA, a river, Japan, the largest in the Isl. of Kjusiu. It rises in the mountains on the W. of Bungo flows through prov. Tschugo, and after reserving the waters of a great number of rivulets, forms two mouths as it falls into the Gulf of Simabara, between the towns of Saga and Iura gawa, in lat. 35° 10' N. having traversed the most extensive and most fertile valley in the island.

TSCHUKZEN, a prov. Japan, occupying the N.E. portion of Isl. Kjusiu, and comprising about 1500 towns and cities. It is bounded N. by the entrance of the Straits of Yan-Far-Gei, E. by Busen and Bungo S. Tschugo and Fuso, and W. and

N W the Corea Channel. On the S. frontier rise some lofty granite mountains, which extend to the shore, where they form the promontories of Kanakahi and Tuihaki.

TSIN-CHOU, two cities, China.—1, Froy Shantung, cap. dep. 80 m. E. Tai-shan.—2, Prov. Quensong, cap. dep. on an affluent of the Lou-tung, 65 m. W. On-toulo.

TSIN-CHOU, an isl. Chiao, Amoy harbor, rising precipitously from the sea to a height of 256 ft. On the summit are three forts, having embrasures for 12 6 and 8 guns on the N. It is a jetty, with stone-steps leading to the summit.

TSHIN-KAI, a tn. Chuenan, Kimpoo, Manchouira, l. bank Yamen near the frontier of Mongolia. lat. 47° 25' N, lon. 123° 30' E. It is located by a double wall.

TSHIN-VALLI, a walled tn. Transcaucasian Russia, on the Likhvi at the foot of a steep and wooded height, 65 m. N W Teflis, with four churches. Pop. about 2000.

TSHVA, or TASH, a river Russia, rises in the S. of gov. Tumbor flows N through that gov. past the towns of Tum bor and Mordhanak, and after a course of about 230 m., joins l. bank Mohana.

TSONG GAO-SHEK, a tn. China, prov. Fokien, on an affluent of the Min, enclosed by hills in the midst of the black tea country. lat. 27° 35' N, lon. 118° 15' E. It consists of the town proper surrounded by walls and temples, partly runways and overgrown with woods and of very extensive suburbs, which extend a long way on both sides of the river. Its staple trade is black tea. Throughout the town are large tea-houses, where the tea are sorted and packed for foreign markets and numerous tea-merchants from Canton and all parts of China come here to make their purchases. Tea is extensively cultivated both on the lowlands and on all the fertile slopes of the district. Pop. about 10,000.

TSONG MUN, or TSONG-MUN, an isl. China, off S. E. coast, prov. Kiangnan, from which it is separated by a channel about 4 m. wide, and on the S. side of the estuary of the Yang-tse-kiang. lat. (E. point) 31° 23' N, lon. 121° 51' E. greatest length, E. S. E. to W. N. W., 80 m. breadth about 10 m. It has a flat surface, intersected by small streams a salubrious climate a soil partly fertile on which there is scarcely any vegetation and partly fertile, producing rice, grain, cotton, and fruit. Large numbers of wild fowl rich mines of salt, extensively worked for exportation. A considerable trade with the neighboring districts and a dense population. On its S. end, is a town of same name.

TSUKASAKI, a small tn. Japan, isl. Kiusiu near Urasa, from which it is separated by three high mountains, called Tsa-maka. It is much frequented by invalids on account of its hot baths, of the temperature of 121° F. In the neighborhood are numerous pottery and large tea-plantations.

TSUMVIREN, a lake, Ladaek. See KHAMVIREN.

TSUN MOA, a tn. China, prov. Chihli, 87 m. E. N. E. Pekin cap. dist., famed for the tobacco cultivated in its vicinity.

TSUNG MUN, an isl. China. See TSONG-MUN.

TSUBASA, a group of isls. Strait of Corea, between the Japanese Isl. of Fuso and the Corea Peninsula. lat. 34° 55' 55" N, lon. 129° 42' 10" E. Tsuba, the largest of the islands, is 35 m. long and has an estimated but not well ascertained breadth of 10 m. or 12 m. The surface presents a chain of pretty high hills divided by deep valleys.

TUA, a river Spanish peninsula, rises on the S. slope of the Sierra Negrandes, on the confines of Galicia and Leon, flows first N. E. E., enters the Portuguese prov. Trás-os-Montes, flows S. W. past the town of Mizandoli, and after a course of about 60 m., joins r. bank Douro.

TUAM, a tn. Ireland, Connaght, on an affluent of the Glara, is a low and marshy district. It has of late been much improved, and is now chiefly of a capital market-place and five main streets diverging from it. One of these is continued by a bridge across the river and many of the houses are substantial, large, and handsome. The principal edifices are the Protestant cathedral in a mixture of the Saxon and Gothic styles, with a richly decorated Saxon portal, and windows of stained glass, the R. Catholic cathedral, a modern cruciform structure, in the later English style, with a lofty tower, a number of towers terminating in richly worked and misers, an altar of variegated marble, a beautiful stained window, and many internal decorations obtained partly from Rome, the Protestant and R. Catholic episcopal palaces, the latter adjacent

ing the cathedral, and the former in a finely wooded domain on the N. E. side of the town, the R. Catholic convalescent asylum or college of St. Jarlath, several schools, including three national and a free model-school of the Tuam Diocesan Education Society, a monastery, a monastery a neat court, a market-house, with a reading-room over it, a bridge, and a dispensary, which annually affords relief to about 5000 applicants. The manufactures are confined to tweeds, and a few coarse linens; but the trade in grain is considerable, and there are several tanneries and flour-mills, a large brewery a weekly market, and four annual fairs. Tuam is of very ancient date, and had a cathedral founded by St. Jarlath in the 6th century. It is one of the 15th century became archiepiscopal, and continued so till 1839, when it was reduced to a bishopric. It is, however, the largest in Ireland, the area of Killa and Achery having been annexed to it in 1835. Pop. 7819.

TUAT, an oasis, Sahara. See TOGAR.

TUBAL, a river, Chih which has its mouth in the Pacific, close to the Bay of Amoy. lat. 67° 14' 25" N, lon. 78° 27' 30" W. It once had depth of water sufficient to allow vessels of 200 tons to pass up nearly 1 m., but an earthquake in 1835 so raised the bar that it is now accessible only to boats. The coast on each side of the river is steep and lofty but the neighbouring country is beautiful and fertile.

TUBARAO, or LASTRA, a river Brazil rises in the E. slope of the cordillera which separates prov. São-Pedro-do-Grande from that of Santa-Catherina, and flows S. E. to the Atlantic navigable in its lower course.

TUBBERMURRY, or TOWANMURRY, a small in Ireland, co. and 19 m. S. W. Sligo, in a low situation, houses of limestone, some of them well built and slated, but most of them of a very inferior description. There are a parish church and R. Catholic chapel, a national school and a dispensary. Wrems and coarse linens are manufactured, but mostly for local consumption. There is some trade in agricultural produce. Pop. 765. (Local Correspondent.)

TUBBRID, two par. Ireland.—1, Kilkenny, 1004 ac. Pop. 216.—2, Tipperary, 12,575 ac. Pop. 2928.

TUBBRIDURITAIN, par. Ire. Kilkenny 4140 ac. Pop. 529.

TUBINGEN [French, Tubingue] a tn. Württemberg, circle Schwarzwald cap. l. bank Neckar, at the confluence of the Ammer. It is situated on a steep hill is surrounded with walls and ditches, and consists of an upper and a lower town. It is the seat of a royal court of law and of several important public offices contains an old castle with three towers, a R. Catholic and three Protestant churches, a townhouse, museum, an hospital, a lyceum, a Protestant and R. Catholic seminary, a botanical garden, and a university founded in 1477 possessed of a library of 200,000 vols., and attended by about 800 students; and has manufactures of woollen and linen cloth copper-ware, gunpowder, dye works, and saw and other mills. Pop. 7500.

TUBIZE, or TONZAC, a vil. and com. Belgium, prov. Brabant, on the Sambre, 14 m. S. Brussels, on the railway to Mons. It has breweries, distilleries, a flour-mill and a trade in agricultural produce. Pop. 2362.

TUBNEY, par. Eng. Berks; 1144 ac. Pop. 253.

TUCANO, a tn. Brazil prov. Bahia, 8 m. from the river of Hapema, with a church and a primary school. P. 1200.

TUCAPALI, a river, Chili. See LAGA.

TUCHALA, a tn. Prussia, prov. W. Prussia, gov. and W. B. W. Marienwerder, on the Dniep, with three churches and a chapel, manufactures of linen, and a trade in horses and cattle. Pop. 1803.

TUCKER'S ISLAND, a low coral island, covered with coco-nut trees, N. Pacific; lat. 7° 27' N, lon. 146° 48' E. Pop. 250.

TUCKERTON, a vil. and port of entry U. States, New Jersey, at the head of Tuckerton Mill Creek, which falls into the Bay of Little Egg Harbor, in the Atlantic. It is well laid out in streets crossing at right angles, and lined with trees, and has manufactures of salt, exports of wood and lumber and a considerable coasting trade. It is much resorted to for bathing.

TUCUPIA, or TUCUPIA, an isl., S. Pacific Ocean; lat. 12° 21' 10" S, lon. 169° 45' 30" E. of a somewhat triangular shape, about 7 m. in extent, and, when viewed from the N., presents the appearance of a middle. Near its N. E. and it

attains the height of 8000 ft., and becomes visible in clear weather at the distance of 40 m. It produces yams, coconuts, &c., and has from 400 to 500 inhabitants. It was on this island that the sword-bill and other remains of the expedition of La Perouse were found, and led to the discovery of the most size of the wreck.

TUCUMAN, a prov. La Plata, with cap. of same name. lat. 29° 45' S. lon. 68° 10' W.; bounded, E. by El Gran Chaco, N. by Salta, W. Catamarca, and S. Santiago. Towards the W. the surface is mountainous, but the hills and slopes of the ranges are covered with a great variety of fine trees and shrubs. The plains are uncommonly fertile, yielding, in the greatest abundance, wheat, rice, maize, and tobacco. The sugar-cane is also a natural product of the soil, and oranges and other fruit trees attain to great perfection. Mules and cattle are reared in considerable numbers. The region abounds in ores of gold, silver, copper and lead, but mining operations are conducted on a very limited scale. The climate, though hot, is dry and healthy. Pop. about 40 000. — The town is situated on an elevated plain, lat. 27° 10' S. It occurs on some trade in oxen and mules. Here in 1816 a congress of deputies from the several provinces of the Confederation proclaimed their independence, and separation from Spain. Pop. about 8000.

TUDENHAM, two par. Eng. Norfolk—1 (East), 9065 ac. Pop. 589.—2 (North), 2270 ac. Pop. 430.

TUDELA, a city, Spain, prov. Navarra 156 m. N. E. Madrid, in a plain, 1 bank Ebro, at the junction of the Queiles. It is dry, but dull; streets narrow, and houses solidly built and lofty. In one of the squares, which is crossed by the Queiles, are held the bull-fights, and another where the markets are held, is entered by two gates, and surrounded by arcades. There are four public fountains, a small theatre, a primary school, an institute for the higher branches of education, a college of medicine and surgery, an hospital, an orphan asylum and farming hospital, the last two in the Dominican convent, a cathedral, consecrated in 1138 but only raised to this dignity in 1788; four parish churches, four monasteries, several convents now turned to secular use, two promenades, and, in the neighbourhood, three hermitages. Husbandry is the principal occupation of the inhabitants, but there are hosties, six manufactories of soap, one of liquors, 20 oil-mills, four potteries, a dye-work for common black-dye, and two flour-mills. Agricultural produce and a considerable quantity of wool are exported. In 1808 Tudela was sacked by the French, who defeated the Spanish forces in the battle named after this city. Tudela was the birthplace of the learned Jew, Benjamin, who flourished in the 13th century. Pop. 7323.

TUDELY, par. Eng. Kent, 1605 m. Pop. 642.

TUDY (St.) par. Eng. Cornwall, 2287 ac. Pop. 652.

TULJAB, a in Spain prov. and 41 m. N. W. Valencia, on a slope above 1. bank Chelva with a church, townhouse, primary school, and several mills. Pop. (agricultural) 1346.

TULFARA, a in Naples, prov. Salerno, E. S. E. Campobasso, 1. bank Fortuna. Pop. 2890.

TULIENO, a vil. Naples, prov. Salerno, N. E. Nola, with a church and two churches. Pop. 1009.

TUPTON, par. Eng. Essex 1653 ac. Pop. 168.

TUGHY, par. Eng. Lancashire 1830 ac. Pop. 565.

TUGFORD, par. Eng. Salop; 1920 ac. Pop. 157.

TUGGUET Dugoon, or Toudouet (supposed also Tugghy) a in Algerian Sahara, cap. of a territory called the Eozars, lat. 33° 24' N. lon. 0° 50' 38' E. It consists of 8000 to 6000 mostly man-looking brick houses of one story, surrounded with loosely-built walls and a fosse, entered by two gates with drawbridges. The houses or enclosel, the residence of the sheik, and surrounding his harem and treasure, is a strong and well-guarded fortress. Tugghy has several mosques, a public area, used as a market, &c. and numerous public fountains raised over Artesian wells. The inhabitants are indolent, and traffic with all parts of the Sahara, 44 tribes being enumerated as frequenting its market, thus giving it the aspect of a daily fair. Most of the manufactured wares sold here are brought from Tunis, but a good many articles are made in the place by Jewish artisans. The people around Tugghy, like all those of the Eozars, are gardeners rather than agriculturists, having little arable land, they grow almost no grain. The cereals sown in date, &c. some-

grains, agave, and peach trees, a great quantity of madder as grown, and the vegetable-ground yield water-melon, pumpkin, cucumbers, onions, &c. A favourite plant here is the Adcock, which has intoxicating qualities akin to those of opium.—(Dumas Sahara Algérie.)

TUGHLICKABAD, a fortified in Hindoostan, with a strong citadel, presid. Bengal, 10 m. S. Delhi. A few valuable ruins contain all the present inhabitants of this town; but the ruins, massive, and stupendous ruins of its walls, palaces, and subterranean apartments, still attract the traveller.

TUGLIE a in haps prov. Orizaba, 7 m. E. N. E. Gallipoli, at the foot of a mountain. Pop. 1940.

TUINEJE a in Canarias Isl. Fuerteventura, on a mountain-slope with a well built parish church, and a primary school, manufactures of linen, and a trade in agricultural produce and in barilla and cochineal. Pop. 1877.

TUKUM a in Russia, gov. Orenburg, cap. circle, 37 m. W. Elga, on the Balket. It has a church, a male, and a school, and some general trade. Pop. (1850) 2710.

TULÁ, a river, Chinese Empire, Kailash country. Source S. W., then N. W. and enters the Orkhon, in lat. 46° 28' N. lon. 105° 30' E., total course 200 m.

TULÁ, a gov. Russia, bounded, N. by Moscow, W. Kaluga, S. W. and S. Orel and N. Ruzan lat. 52° 43' to 54° 45' N. lon. 36° to 38° 40' E.; greatest length, N. to S. 160 m. central breadth, 110 m. area, 8906 sq. m. The surface is so generally flat as to have somewhat of a monotonous appearance. The principal rivers are the Oka, which waters the government in the N. W. and also forms its N. boundary, the Upa, which traverses it centrally and the Don, which runs here, but within the government is an unimportant stream. It has however, been turned to good account, and the water-communication of the government has been almost indefinitely extended by means of the Ivanvaska canal, which, uniting the Don and the Upa, forms part of the grand system which connects the Balket, the Black Sea, and the Caspian. The soil is generally of remarkable fertility and good, but grain far beyond the house consumption. About two-thirds of the whole surface are under the plough. The principal crops are rye, barley and oats, wheat is grown only in particular districts. Hemp and flax are generally cultivated. The pastures are both extensive and rich, and vast numbers of horses, cattle, and sheep are reared. Nearly one-sixth of the surface is under wood. The mineral of most importance is iron, which is both smelted and manufactured to a large extent. There are also numerous tineries and distilleries. The trade consists chiefly in corn, flax, and hemp. For administrative purposes the government is divided into 12 circles. Tula is the capital. Pop. (1850), 1,251,500.

TULÁ a in Russia, cap. above gov., on the Upa, 107 m. S. Moscow. Most of the houses are wood, but great improvements have been made in recent years, the more an ugly streets have disappeared, and the whole town, with its numerous towers, domes, and spires, presents a very striking appearance, entitling it to be regarded as one of the handsomest provincial towns in Russia. It is the residence both of a civil and a military governor, the seat of a bishop, and the seat of several important courts and public offices. It contains 28 churches, one of which is a very handsome structure, adorned with marble columns, two monasteries, a diocesan seminary, gymnasium, military school, handsome courtyards, theatre, foundling and other hospitals and has manufactures of firearms and hardware, so extensive as to have procured for it the name of the Russian Birmingham. The firearms of the government are manufactured in an extensive establishment, which the skill of an Englishman has made one of the first in Europe. The other manufactures of importance here are contrary of indifferent quality. Agricultural work, inferior to that of France, plating maff-bone, surpassed by those of Moscow; silk, hats, soap, candles, cordage, and leather. Some of the iron used in making these articles is obtained from mines in the vicinity, but the greater part of it is imported to here, chiefly from Siberia. P. (1850) 84,626.

TULÁ, a in Mexico Confederation, 40 m. N. W. Mexico, cap. dist. and 1. bank river of the same name, about 8000 ft. above sea-level. It was the capital of the Toltec or Toltec, the earliest inhabitants of Mexico known to history, but has ceased to be a place of any importance. The district unites the most splendid mountain-scenery with great fertility.

The river sometimes called also Montezuma, is formed in the N of San Mateo; flows E.N.E., receiving the Quantitas, separating Chap. Mexico from Chap. Queretaro, and near the frontiers of the latter and of Vera-Paz, after a course of about 500 m., enters with the Pánuco in forming the Rio-de-Tampico, which falls into the Gulf of Mexico.

TULE is a township in Inyo Co. State of California, in the upper part of the valley of the San Joaquin, to which it sends its waters; 30 m. to 40 m. long, and about 22 m. broad.

TULMA a vil. Hungary. Thither Thales, an. Biber diet. and 4 m. from Bannout, with a Greek church and some trade in agricultural produce and timber. Pop. 1513.

TULLA, or **TULLON** a market tn. and par. Ireland on. Chas. 94 m. N.E. Keady; with a church, several public and three private schools, and some transit and country trade. Area of par. 54,394 ac. Pop. 6760.

TULLARBACKY, par. Irel. Limerick 2309 ac. P. 836.

TULLAGH, par. Irel. Cork 5649 ac. Pop. 2374.

TULLAMOKK, a market to Ireland King's co. 48 m. W. by R. Dublin on an academy, with two market squares, a large and handsome church at a short distance from the town, a R. Catholic chapel and a Methodist meeting-house a court-house, jail, poorhouse, county-infirmary barracks, nursery and market-house a classical a national and several other schools a Protestant orphan society a lending library two breweries, and one distillery a tobacco and snuff manufactory and a brick work. Pop. 4630.—(Local Correspondent)

TULLAROAN, par. Irel. Kilkenny 12,560 ac. P. 2373.

TULLE (see *Tulla*) a tn. France, cap. dep. Corrèze on an acclivity at the confluence of the Corrèze and Solane, 115 m. N.N.E. Bordeaux. It is an ancient place, and is generally composed of houses which are old and ugly but some of which possess considerable interest from their antiquities. It has a parish church in a kind of bastard Gothic style surmounted by a lofty spire, a courthouse, hospital, departmental prison, barracks theatre, public library a cemetery, on a circular hill which overlooks the town and manufactures of firearms, made in a government-factory to the number of about 50,000 muskets annually war-cannons, snail, playing cards, and leather, and a trade in brandy liquors, paper, wool, horses, and the above articles of manufactures. Horse-riding is very near Malpelo Point, there is a bar with violent and dangerous surf, across which even boats cannot pass without the utmost caution. Piastre landed here with his army destined for the conquest of Peru.—The town, situated about 7 m. up the river, scarcely deserves the name, as it is only composed of a few miserable huts, though it is said to have once been a place of importance, with a temple of the sun, an Inca's palace, and other edifices.

TULLALLAN, par. Scot. Perth 4 m. by 4 m. P. 9042.

TULLINS, a tn. France, cap. Loire, 12 m. N.W. Grezouille with manufactures of cherry brandy and a trade in hemp, thread, and cattle. Near it are numerous iron-works. Pop. 1865.

TULLIN or **TULLS** (Latin, *Comagene*) a tn. Lower Asia tn. r. bank Danube, at the junction of the Tula, 14 m. N.W. Vienna. It is surrounded with old walls, and very irregularly built with narrow, dirty streets, and houses generally of mean appearance. It contains four churches, an hospital a swimming and several other schools, and has a best-root sugar-factory, and some trade in provisions. Pop. 1788.

TULLIMOT, par. Irel. Queen's co., 6086 ac. P. 1015.

TULLOW a market tn. Ireland, co. and 7½ m. from Carlow r. bank Slaney with a market-square, a large handsome church and R. Catholic chapel, with a fine simple and airy; contributed to water-barracks, two schools, and the principal corn-market of the county. Pop. (agricultural), 1903.—(Local Correspondent.)

TULLOWGREEN par. Irel. Carlow; 5699 ac. P. 1116.

TULLOWMAGIMMA, par. Irel. Carlow; 4064 ac. Pop. 904.

TULLOWPHELIM par. Irel. Carlow; 7990 ac. P. 2497.

TULLY, two pars. Irel.—1, Dublin; 3286 ac. P. 1087.

—2 Kildare 5165 ac. Pop. 953.

TULLYALLEN, par. Irel. Louth and Meath; 5184 ac. Pop. 4169.

TULLYFERNN par. Irel. Donagel 16,612 ac. P. 6113.

TULLYLEASE, par. Irel. Cork 8392 ac. Pop. 1800.

TULLYISH, par. Irel. Down; 11,707 ac. P. 12,400.

TULLYNAKILL, par. Irel. Down, 2922 ac. P. 1221.

TULLYNEELE and **Possam**, par. Scot. Aberdeen; 7 m. by 4 m. Pop. 390.

TULLYNIRMAN par. Irel. Tyrone, 4461 ac. P. 8474.

TULLYRUEK, par. Irel. Antrim, 4780 ac. Pop. 1040.

TULMARO a tn. Venezuela, 4 m. and 50 m. W.W.W. Caracas. It is well built and has an active trade in tobacco, large quantities of which are raised in the vicinity. Pop. about 8000.

TULOLA a small isl., Russia, Finland, near N shore of Lake Ladoga, at the mouth of the Looska, which here forms a fine cascade. It is about 6 m. in circumference, and contains six granite-quoties, the stone of which is much used for building in the capital.

TULOKA, a lake, Russia, in N.W. of gov. Olonetz, about 34 m. long N.W. to S.E., by 6 m. broad. Its banks are very steep, and it contains several islands. It has no apparent outlet, though several small lakes send their waters into it.

TULOUR ISLANDS, N. Pacific. See *SALOMON*.

TULISHA, **TULISHA**, or **TULISHA** (see *Alpaca*), a fortified tn. European Turkey Bulgaria, in the Dobruzhie, r. bank Danube, immediately above the formation of the Sulina and Ek. George's arms, 108 m. N.E. Silistra. Its fortifications and immediate proximity to the Russian frontier, make it a place of great importance. Darius crossed the Danube near Tullish, on his expedition against the Scythians.

TULUMBA or **TOOLUMBA**, a large, populous, island in Panah, I. bank Bayre, lat. 80° 25' N. lon. 78° 9' E. Close by are the ruins of an ancient adit fortress, of great height and strength.

TUMACO a small seaport and isl. off the coast of Ecuador lat. 1° 49' E. lon. 78° 50' W. Tumaco was declared a free-port in 1844.

TUMAT or **MALEK**, a river, Africa, rises in the S.W. of Abyssinia, enters Nubia, and joins the Bah-el-Azrek, N.W. Fashk, total course, about 800 m.

TUMBELAN Isl. Indian Archipelago. See *TAMBELAN*.

TUMBEZ, or **SARAGUZA**, a river, E. America, rises in Ecuador on W. slope, Andes, about 86 m. N.E. Loja, flows W., past the towns of Saragura and Saruma, then N.W., forming the boundary between Ecuador and Peru, and passing the towns of Tumbes, divides into several branches, and falls into the S. shore of the Bay of Guayaquil, after a course of about 100 m. Its chief affluents are the Jubones. At its mouth, which is very near Malpelo Point, there is a bar with violent and dangerous surf, across which even boats cannot pass without the utmost caution. Piastre landed here with his army destined for the conquest of Peru.—The town, situated about 7 m. up the river, scarcely deserves the name, as it is only composed of a few miserable huts, though it is said to have once been a place of importance, with a temple of the sun, an Inca's palace, and other edifices.

TUMEL, or **TUMKEL**, a river, Scotland, issues from Loch Rannoch in S.W. of Fifehire flows W., expanding into a lake of the same name, and near the Fife of Kilmorie joins the Garry. The united stream flowing S.E. joins I. bank Tay at Logiertha.

TUMNA, par. Irel. Roscommon; 6395 ac. P. 2843.

TUNA, a vil. and par. Sweden, 18 m. and 13 m. S.E.W. Falun near r. bank Dal Elff, with a parish church, a castle, and cloister-works.

TUNAMA a river, Brazil. See *ITUNAMA*.

TUNBRIDGE, or **TOMBURINA**, a market tn. and par. England, on Kent, on an acclivity above the Medway, here crossed by several bridges, within 1 m. of the South-Eastern railway and 11 m. S.W. Maidstone. It contains chiefly of a long and tolerably well-built street; and has a handsome

church with a square embattled tower. Independent, Baptist, and Wesleyan churches, a well-endowed free grammar-school national and infant schools, a good townhall and market-house, a mechanics' institute, a library and scientific institution, several substantial mansions of gipsy powder and study wooden wares, a trade in coal and timber a market every fortnight, and an annual fair. In the time of William the Conqueror a strong castle was built here. It makes some figure in English history and its site is still marked by some ruins. Area of par., 16 385 ac. Pop. 10,548 of m., 4530.

TUNBRIDGE or **TORRENTON** **WILLS**, a market tn. and watering-place, England, to Kent, pleasantly situated amid picturesque scenery, on the Hastings branch of the South-Eastern railway, 15 m. S. W. Maidstone. It consists chiefly of clusters of houses, many of them handsomely built on detached enclosures; and of a spacious parade, finely planted on one side, and occupied by assembly-rooms, libraries and elegant shops on the other, and has two district churches one of them Norman and the other in the later English style with a finely painted window, a chapel of ease with a much adorned unornamented ceiling, Independent Huntingdon and Wesleyan Methodist, and E. Catholic chapels, church of England proprietary national, British and infant schools, a commodious townhall, a library and scientific institute, an infirmary, and dispensary; extensive manufactures of toys and other fancy articles, known by the name of Tunbridge ware, and a weekly corn and general market. The spring to which the place owes its origin and prosperity is chalybeate, nearly equal in strength to that of the German Spa, and is considered very efficacious in cases of weak digestion. The wells are situated in the centre of the town, and the accommodation provided for the numerous patients and fashionable visitors who annually resort to it, is both ample and elegant. Pop. 10,567.

TUNCHE, a tn. in China, prov. Nanchang, about 20 m. from Hany-chow foo to which it forms a kind of port; lat. 29° 48' N. lon. 118° 30' E. It is a large, busy, and thriving place, and carries on a very extensive trade especially in green-tea, the greater part of which is sent down the river, and thence onward to Shanghai, being shipped here. Pop. about 150,000.

TUNDERGARTH par. Stock Dumbries 12 m. by 2 m. Pop. 577.

TUNDOLSKIRCHEN, or **PRUD-ESTHASE**, a market tn. Hungary on Odenburg with a trade in wine. P. 1554.

TUNG-CHAU a city, China, prov. Shantung on the Ta-tai-ho, 61 m. S. W. Tai nan.

TUNGARAGUA, a name given to the Amazon in the upper part of its course.

TUNGUSKA, three rivers, Siberia.—1 (*Upper or Yenisei*), A river which is the upper part of its course takes the name of Angara (which see). It issues from the S. W. extremity of Lake Baikal, and proceeds circuitously N. W. for about 700 m., till it reaches lat. 57° 30' N., where it first becomes known as the Tunguska. From the point it flows W. for about 320 m., and joins r. bank Yenisei about 80 m. above Yekohak. It is the largest of all the affluents of the Yenisei. Its chief tributaries are, on the right, the Mura and Tobolskots and on the left, the Irkut, the Oka, and Taima.—2 (*Middle, or Podkamenka*). A river, which rises in the N. W. of gov. Irkutsk, flows first N. W. then N., and joins r. bank Yenisei, where it expands into a lake of its own name, after a course of about 600 m.—3 (*Lower or Tigra*). A river, which rises in the N. W. of gov. Irkutsk, not far from the source of the former, flows very circuitously first W. then N. W., and finally W., and joins r. bank Yenisei, after a course of about 104 m.

TUNIS, one of the Barbary States of N. Africa, and nominally dependent on Turkey is situated between lat. 31° and 37° N. and lon. 8° and 12° E. and is bounded, N. and N. E. by the Mediterranean, S. E. Tripoli, S. and S. W. the Great Desert or Sahara, and W. Algeria, greatest length N. to S. about 440 m., mean breadth measured on the parallel of 35°, 160 m. area, roughly estimated at 70,000 sq. m. The coast-line, which is very irregular and much broken, presents three remarkable indentations, forming the Bay of Tunis on the N., and those of Hammamet and Gabes or the Lesser Syrte on the S. On the N. W. as far as the Cape of Farina, it is bold and rocky, and presents in Cape Sineca the most E.

point of the African continent. The shores of the Bay of Tunis are low and generally swampy but rise towards its extremity, and terminate in Cape Bon. Beyond this cape and S. the shore is generally low, but is occasionally diversified by rocky headlands of moderate elevation. The interior of Tunis, owing partly to its lying out of the direct line of route between other countries, is very imperfectly known. The N. W. portion, lying between the frontiers of Algeria on the W., and the valley of Majedrah on the S. and E., is traversed by a range of mountains which, entering from the W., spread over the whole district. These mountains, estimated at 4000 ft. to 5000 ft. high, are well covered with fine timber, and on their lower slopes have many fertile tracts, partly under culture, and partly under divestment. Among the mountains rich veins of lead are said to exist. Between these mountains and the Gulf of Hammamet on the E., stretches the extensive plain or plateau of Kairuan, which is about 100 m. long, by 80 m. wide and though elevated, is almost an unbroken flat, nearly destitute of trees, and except in the vicinity of the town of Kairuan, unencultivated. Over this plain the Arabs roam pasturing their horses and camels. Little is known of the country to the S. of this plain. Its fertility was celebrated by the ancients, but it is understood to be at present little better than a desert. The only sign of any consequence is the Majedrah already mentioned, but at its mouth and considerably to the W. of it, near the Gulf of Bizerta, are numerous large lagoons abounding with several kinds of fish. The only other remarkable expanse of water is the great Lake of Al Sibbah situated far to the S., on the borders of the Sahara. It is about 70 m. long by 26 m. broad but with the exception of its S. part, becomes dry in summer when a layer of salt is found deposited on its bed. The climate is one of the best in the Barbary States, the atmosphere being generally pure and wholesome, and the excessive summer-heat moderated by sea-breezes. In the town of Tunis the thermometer on an average of three years, showed a mean of 58° 9' in winter 71° in spring 83° 6' in summer and 64° in autumn the mean of the whole year being 69° 2' Rain falls at intervals from November to April, but long-continued and almost uninterrupted droughts prevail during the rest of the year. Owing to the extensiveness of the government, and the uncertain tenure by which property is held, agriculture is very much neglected, and the large quantities of yielding products which remain in a state of nature. The principal crops are wheat, barley and maize, olives also are extensively grown and date-plantations are so numerous as to furnish the principal subsistence of the inhabitants. Tobacco is largely and cotton indigo saffron, and opium are partially grown. Almost all the fruits of S. Africa abound, and in various quarters, drugs and dyes form special objects of culture. The principal domestic animals are mules, oxen, and camels; on several parts of the coast the fisheries (including that of coral) are valuable. The manufactures consist chiefly of woollen fabrics, more especially the kerchief or red cap, known all over the Mediterranean coast, both soft and hard, made on an extensive scale at Buz; dyed skins, and ordinary and Morocco leather. The trade, both with the interior and with different parts of Europe, is of considerable extent. The inhabitants, consisting of a mixture of Moors, Arabs, Turks, and Jews the two first principally with a few Christians, rank as the most enslaved in Barbary, though, as compared with the least advanced of European nations, they are lamentably deficient in everything that constitutes true civilization, their government is a rule and revolting despotism, in which a path nominally sanctioned by the Sultan but virtually independent of him makes him will his only law and sources obedience to it by maintaining a large standing force. Pop. estimated at 2,500,000.

TUNIS, a seaport tn. in Africa, cap. of above state, at the mouth of the Majedrah, on the W. side of an oval lagoon connected by a narrow strait with the bay of same name, and on a large and beautiful plain bounded on the distance by lofty mountains, 400 m. E. by N. Algiers; lat. (Fondom) 36° 48' N., lon. 10° 34' 12" E. (m). It is surrounded by a double wall—an exterior about 5 m. in circuit, inclosing the suburbs and pierced by four gates, and an interior still more lofty enclosing the city proper and pierced by six gates. It is also defended by a strong castle completely commanding the Goletta or narrow strait already mentioned, and by several

detached forts in other directions. When approached, whether by land or sea, it becomes visible at a considerable distance, and rising in long ranges of buildings of dazzling whiteness, presents a very striking and picturesque appearance. The impression thus made is not confirmed by a nearer inspection

The streets are narrow, uneven, and filthy in the extreme, and the houses of stone or brick, generally of very mean appearance, consisting only of a single story without exterior windows. The interior however in the form of a court, with the apartments ranged round it, has a much more attractive appearance and is often fitted up with Oriental magnificence. Water is abundantly supplied, partly from cisterns placed on the flat roof of each to collect the rain, and partly by an aqueduct carried from a neighboring spring. The public buildings include a great number of mosques, several of them handsome, and one of them a magnificent structure, adorned with columns and marbles brought at an immense expense from ruins in the interior of the country. The bey's palace, a handsome modern building in the Bar-

bad, and from, rare and manufactured coffee, sugar, opium, &c. In carrying on the trade, notwithstanding the considerable situation of the town, considerable disadvantages are experienced. The depth of water within the lagoon is not more than 6 ft. or 7 ft. and hence even merchant vessels are obliged to lie outside the Goletta, and can only load or unload by means of lighters. The place of anchorage, however formed by an inner bay off that of Tunis, has in its centre a depth of from 10 to 20 fathoms, and is so capacious, that the largest fleet may ride in it with perfect shelter from all winds except the N. E.

Tunis is situated about 8 m. to the N.W. of the ruins of ancient Carthage, and thus derives much additional interest from its proximity to that celebrated seat of empire. At the same time, it is itself a place of great antiquity, and has been the scene of many important historical events. During the Tunis wars it was repeatedly taken and retaken. In 439 it fell into the hands of the Vandals, but having been wrested from them about a century thereafter by Belisarius, it continued to be subject to the Greek Empire till the end of the 7th century when Northern Africa was overrun by the victorious arms, and became a depend-

ency of the caliphs of Bagdad. The distance of this capital soon enabled the governors appointed by the caliphs to become virtually independent, and at last in 1036, Tunis became an absolute sovereignty under Abu Fares, who now added to it the greater part of Algeria and Tripoli. It now became notorious for its profligacy, and in 1370 Louis IX. of France, in a chivalrous attempt to suppress them lost both his army and his life. The last of the Tunisian kings, Muley-Hassan, having been deprived of his throne by the celebrated pirate chief called Barbarossa II. in 1531 had recourse to the Emperor Charles V. who restored him, but made him kingdom tributary to Spain. It so continued till 1574, when it was subjugated by the Turks who at first governed it by a pasha, with a body of Turkish soldiers sent from Constantinople, but were ultimately obliged to allow the Moors to elect their own bey only reserving to themselves the power of confirming the election and exacting a tribute. The pashas of the Tunisians subjected them to severe chastisement, first from the British under Admiral Blake, and afterwards from France and Holland in 1816, under threat of the same punishment which had just been inflicted by Lord Exmouth on the Algerines, they engaged for ever to renounce piracy and Christian slavery. Pop. vari- ously estimated at 180,000 to 200,000; of whom about 25,000 are Jews and 5000 Christians, the remainder being chiefly Moors, Arabs, and negroes

THE BAB EL BHAR PALACE OF THE BEY OF TUNIS.—From L. Illustration

cent style, badly situated in a narrow street, but adorned with courts and galleries of marble several large and well arranged barracks, one of them fitted to accommodate 4000 men a Moorish college for theology and jurisprudence, several other superior and elementary schools, several synagogues, a R. Catholic and a Greek church, a R. Catholic convent, a theatre, several elegant public baths, and extensive and well-furnished bazars. The principal manufactures are linen and woollen cloths, red woollen caps, in such extensive demand, that 50,000 persons are said to have been at one time employed on them; subsidiary industry and commerce in leather and various celebrated essences both of musk, rose, and jasmine. The trade is very extensive, and includes among its principal exports oil, lemons or Tunis caps, soap, grain and pulses, wool, hides, cattle, honey-bee, spongers, gums, wax, gold-dust, and elephants-teeth, &c., and among the principal imports, cotton, linen, and woollen goods, tin,

by mountains and partly by narrow seas the shores of the Galmazo or Saguenon, 65 m. N. E. Bagdad. On the invasion of the Spaniards it was one of the greatest cities in the country, and governed by its own king, but is now fallen into great decay, and has almost nothing to recommend it, having neither a good climate nor an adequate supply of water, and possessing very few inhabitants. Among its buildings are several churches and convents, a college, and an hospital. The manufactures consist of some coarse woollen and cotton stuffs; and the trade is chiefly in these, and in grain and tobacco. The inhabitants suffer much from plague. The battle of Boyzen, fought a little S. W. Tunis, in 1619, by Bellair against the Spaniards, decided the independence of S. America.

TUNSTALL, or TUNSTALL-COVER is a N. English, Staffordshire, on an acclivity $2\frac{1}{2}$ m. N. by E. Newcastle-under-Lyme. It has rapidly risen up from a hamlet to a considerable

town, and has a spacious market-place, with a townhall in its centre, a church in the early English style, with a tower and spire; Wesleyan, Primitive, and New Connexion Methodist chapels, national schools; and, both within the town and in its vicinity, extensive manufactures of china and earthen ware, brooks and tiles, &c. The surrounding district is rich in coal and ironstone, for which the Grand Trunk canal affords great facility of transport. Pop. of township, 8566.

TUNSTALL, several par. Eng.—1 Kent, 1196 sq. P 166—2 Norfolk, 1619 sq. P 139—3, Suffolk, 2653 sq. P 374—4, York, 1907 sq. P 150—5, Lancaster, 9234 sq. P 814.

TUNSTAD per Eng Norfolk, 2291 sq. Pop. 449
TUNWORTH, par Eng Hants, 1104 sq. Pop. 123.

TUNYAN a river La Plata. See MARCONA.

TUGOH, par Irel. Limerick 6619 sq. Pop. 2273

TUGHILUGGIN, par Irel. Limerick, 2094 sq. P 426.

TUGHIST, par Irel. Kerry 9043 sq. Pop. 4034.

TUPANRU a river New Granada issues from several small lakes, about lat. 5° N., and lon. 71° W.; flows E., and joins L. bank Orinoco at Maypura, a little above its entrance into course, about 220 m.

TUPOLME, par Eng Lucin 1796 sq. Pop. 78

TUPIZA, a tn. Bolivia, on a plateau 9000 ft. above sea-level near the N. frontiers of La Plata, 140 m. S. S. E. Potosi. The Chiriquito silver-mine is in its vicinity. Pop. about 6000

TUPPAU, a tn. Bohemia. See DUTRA.

TUPIE, a river India. See TAPEE.

TUPUNGATO a mountain, Chilian Andes, 100 m. E. S. E. Valparaiso, between the Pass of Cumbre on the N., and that of Portillo on the S. It appears to be the culminating point of the Andes, between lat. 33° and 35° S. having an elevation of 15,500 ft.

TUB-Kavi, a vil Hungary Thither Thams dist. Great Kunsau, on the Perety, 10 m. S. W. Karsburg. It contains a Protestant and a R. Catholic church. Pop. 9400

TUB (Mazo) a market tn. Hungary, Hither Thales, co. Heves, r. bank Beretty, 34 m. E. S. E. Bockock with a Protestant, a Greek, and a R. Catholic church manufactures of pottery, and a considerable trade in wine and cattle. P. 15,000

TURA, two places Hungary.—1 A vil Hither Danube, on Parish about 4 m. from Havran, with a R. Catholic church. Pop. 2469.—2, (O or Sere) A market tn. Hither Danube, co. and 88 m. N. N. W. Neutra with a Protestant and a R. Catholic church, and a synagoga extensive potteries, and a considerable trade in cattle and cheese. Pop. 6488.

TURA, a river Russia, rises on the E. slope of the Ural Mountains, gov. Perm; flows S. E. enters gov. Tobolsk, passes Turinsk and Tumen, and after a course of nearly 800 m. joins L. bank Tobol a little below Jeviers. Its chief affluent is the Nissa, which joins it on the right.

TURATE a vil and com. Italy, Lombardy, prov. Como, 6 m. S. Appiano, with a church a courthouse, and a trade in corn and silk. Pop. 3981.

TURBACO a tn. New Granada prov. and 5 m. S. E. E. Cartagena, on a height, in a healthy locality. Its delightful climate makes it a desirable resort for the citizens of Cartagena, and the strangers frequenting that port, but the want of the inhabitants are Indians, who live in houses of bamboo, thatched with palm-leaves.

TURBENTHAL, a vil, and par Switzerland, com. and 16 m. N. E. E. Friburg, in a valley of the same name, watered by the Töss. It has an old church, and a well preserved castle, finely situated on a height. The inhabitants are chiefly employed in weaving cotton and spinning silk. Pop. 2349

TURBIGO, a vil and com. Italy, Lombardy, prov. Milan, 5 m. from Cuggiono, 1 bank Ticino with two churches, a courthouse, custom-house school, and a trade in corn and silk. Pop. 1136.

TURCKHEIM, or TURCKHEIM, a tn. France, dep. Haut-Rhin, on the Frocht, at the entrance of the valley Munster, 4 m. W. Colmar. Turckheim here defeated the Imperialists in 1675. Pop. 2648

TURCKEKE (ALAO and FALAO), two nearly-contiguous vils. Hungary, co. and on the river Thuroos, about 30 m. from Ratona, with a R. Catholic church, and some means of gold and silver. Pop. 1137

TURCO, a vil Hungary. See TOM.

TURGANO, a tn. Spain, Old Castile, prov. and 18 m.

N. W. E. Segovia in a valley watered by the Valdeano and Melba. It has two churches, one of them situated in the centre of an old castle, finely situated on a height a townhouse, an observatory as to look almost like a fortress a primary school, and a palace which belonged to the Bishop of Segovia; manufactures of linen, and a considerable transit trade. Pop. 1140

TURENNE, a tn. and com. France, dep. Corrèze, near the source of the Tournante, on a steep and rugged height crowned by the ruins of an ancient castle, 20 m. S. W. Tulle. It has a trade in nut-oil, grain, linen, &c. Near it are mines of iron, copper and lead. The castle, which figures much in the early history of France, was the cradle of the family of Turenne, to which the celebrated marshal of the name belonged. Pop. 1876.

TURFAN, a tn. Chinese Turkistan. See TOUNFAN

TURI, a tn. Naples, prov. and 18 m. S. E. Bari, with a collegiate church and several chapels, a monastery, sundry and tollage. Pop. 3560

TURI or TUR-APC a tn. Brazil, prov. Maranhão, at the mouth of a river in the bay of same name, lat. 1° 30' S., lon. 45° 20' W., with a parish church in a very dilapidated state. Pop. (Alt.) 6000.—The river rises in the forests which stretch to the N. of the confluence of the Araguaia with the Tocantins flows N. N. E. and falls into the Atlantic at above town; total course, 80 m., partly navigable.

TURIA, a river, Spain. See GUADALAVIA.

TURJIA a river, Russia, rises in S. W. of gov. Volynia flows N. N. E. through extensive morasses, and joins r. bank Prypiet after a course of about 100 m.

TURIN (Ishur, Tarent) a large and magnificent city, late cap. of kingdom of Italy, beautifully situated in an extensive and fertile plain surrounded by the Alps, at the confluence of the Dora-Susina with the Po, each of which rivers is crossed by a magnificent stone-bridge the former of five elliptical arches, and the latter of a single arch with a span of 150 ft. The approach from the W. is by a noble avenue, which commencing at the town of Rivoli, is one of the longest in Europe and the general appearance of the city and its environs is scarcely surpassed in grandeur. Turin was at one time surrounded by walls and bastions, and ranked as a place of considerable strength. Its large and imposing citadel still remains, but all the other fortifications have been removed and the site occupied by them covered partly with finely-planted walks and partly with magnificent houses which extending around in all directions, have both united the suburbs with the former town and nearly doubled its extent. The old quarters are closely built, and the streets are somewhat narrow and irregular, but all the modern portions have been built on a uniform plan in wide streets, which intersect each other at right angles, and thus form a series of square blocks and piles of building, the effect of which would be unpleasant were not the monotony relieved by the loftiness of the houses, their endless variety of sculptured fronts and rich decorations, and the fine bursts of scenery which are ever opening on the view. Several of the principal streets are lined with arcades. The finest squares are the Piazza-del-Castello, which is of great extent, and surrounded by splendid and lofty palaces the Piazza-San-Lorenzo almost entirely surrounded by arcades, and adorned with a fine statue of Emmanuel Filiberto by Mazzetti, the Piazza-San-Giorgio, and the Piazza-del Terzo.

Few cities in Italy are so poor in ancient buildings and historical recollections as Turin, but its modern edifices are numerous and several of them magnificent. The ecclesiastical edifices most deserving of notice are the cathedral or duomo, completed in the beginning of the 16th century, of small dimensions, with an exterior remarkable only for some bas-relief arabesques in the pinnacles of the facade, and an interior which has recently been rudely and capriciously decorated with frescoes, and contains some good paintings, and a remarkable chapel of marble called Santa Barbara, regarded as the masterpiece of Guarini, the church of San Maurizio, surrounded by a fine dome San Donato, possessed of a fine Virgin and Child by Gaetano, San Felippo Neri, one of the finest alt. fests of the city, though with an unimproved facade. San Tommaso, a small church of little architectural merit, but possessed of some fine paintings; Santa Christina, with a striking facade, considered to be one of the best productions of Juvara. Opposite Christ's remarkable for the richness of its marble, gilding, and other decorations; La Consolata, named of a com-

hibition of three contiguous shelves, and remarkable for the number variety and richness of its furnishings; San Andrea, of an oval form, with numerous frescos, sculptures in bronze and marble, and some fine wood-carvings; San

SAN GIOVANNI, TURIN. From Chapuy, *Nouveaux Voyages*.

Rocco, in the form of an octagon, with a concave facade and a well-constructed dome and La Grana-Madre-di-Dio, a new unfinished church on which vast sums have been expended, erected in commemoration of the restoration of the royal family but merely a servile and meagre imitation of the Pantheon. In addition to these, a remarkably handsome church in the old Lombard style for the accommodation of the Waldenses, and forming one of the chief ornaments of Turin, was consecrated on December 15 1853. Of the edifices not ecclesiastical the most conspicuous is the royal palace, built, like most of the other structures of Turin of brick, and remarkable only for its magnitude. Under the roof of the palace are the king's private library, with some curious MSS. and letters and the royal armory a large and curious collection, considered one of the principal sights in Turin. The palace of Carignano, originally inhabited by the princes, and situated in the square of same name, is a large and rather unpoising structure in an extravagant style. It has recently been converted into government-offices. Other conspicuous buildings are the register-office or Palazzo degli Archivi-Roale, a vast edifice by Juvara, and adjoining it the custom-house or Palazzo delle Dogane, the townhouse or Palazzo di Città, with a lofty but unfinished tower the courthouses or Palazzo di Giustizia the university or Università-Roale, a large and magnificent building by Giovanni Battista, the large library now attached to the university and originally formed by the ancient dukes of Savoy containing 110,000 vols the picture-gallery with a large and valuable collection the Palazzo dell' Accademia-Roale, under the roof of which are several museums—in Egyptian, with many curious antiquities, a museum of natural history particularly rich in minerals, and a cabinet of 15,000 coins and medals and several theatres, one of them among the largest and most splendid in Italy.

Among the educational establishments, in addition to the university already mentioned, are the special secondary occupying no elegant structures the royal military secondary two colleges, and various superior and inferior schools. The charitable establishments include numerous rich endowments, of which the most interesting and important are the Riforme-Roale, a kind of religious community, in which 400 girls are maintained solely by their own labour, the general hospital or infirmary (Spedale Maggiore) the Ospedale di Carità, which receives about 1500 inmates; the Rospedale-Albergo di Vitta, a kind of industrial school; the Regio-Madonnina or lunatic asylum, the Spedale di San-Leop, a large and well-

managed establishment, supported chiefly by voluntary contributions, and giving relief not only to numerous inmates, but to an annual average of 130,000 out-patients; and the Compagnia di San-Paolo, embracing a great number of orphans—education marriage-portions, and relief to the poor—regiment or bachelier poor suffering in secret. The manufactures consist chiefly of woollen, cotton, linen, and silk goods; wax-cloth, stained paper, bookbinding, hatching, glass, carriages, printing-types, photographic and musical instruments, and there are numerous dye-works, and silk and other mills, distilleries, &c. The staple trade is in silk which has here its chief entrepot, employs a vast number of hands, and forms the principal source of wealth. Other articles of trade, in addition to silk and the above articles of manufacture, are corn, wine, fruit, and liquors.

Turin, until Florence was made the capital in 1865, constituted all the principal offices of the state. It is the seat of an archbishop, and has numerous academies—economic, literary, scientific and artistic. Of the original foundation of Turin very little is known. It is generally attributed to a colony of Transalpine origin, called Taurini or Taurini. Shortly after Hannibal crossed the Alps he made himself master of the territory in which it is situated; but after his expulsion from Italy the Komans resumed possession, and converted Turin into a Roman colony which took the name of Colonia Julia. This name was afterwards changed, in honour of Augustus, into that of Augusta Taurinorum. It was taken and sacked by the Goths under Alaric. It is said of slender duration it was shortly after surrounded by walls, but did not escape the ravages of the Lombards. Charlemagne, into whose hands it subsequently passed, bestowed it as a fief on one of his bishops, several of whom ruled it with tyrannical sway. It was afterwards governed by the marquises of Susa, with whom it remained till the heiress of that family conveyed it by marriage to the counts of Savoy. In 1418 it was declared by Amadeo V. the capital of the states of Savoy, and, following the fate of his family, ultimately rose to be the capital of the whole Kingdom of Sardinia. The curiosities of Turin are very beautiful, and present many objects of interest, among which the church of Superga, on the top of the lofty Monte Collina, immediately overlooking the city is conspicuous. The terrace in its front commands one of the best views of the plains of Lombardy guarded by the Alps on the N. and the Apennines on the S. The vicinity of the Alps, which adds so much to the magnificence of the scenery, has, however an injurious effect on the climate, making its winters cold, and often, when the year is far advanced, sending down devastating storms of hail. P (1857), 143, 157.

TURIS, a vil. Spain, prov. and 80 m. S.W. Valencia, on the Mague with a townhouse, prison two primary schools, a church and chapel, several brandy distilleries, and two flour-mills. Pop. (agricultural), 3697.

TURJE (formerly Tuzsuz) a market in Hungary, Thibier Danube, on Szabolc, 2 m. from Bismegh; with a church, a Franciscan abbey, and a trade in corn and wine. P 1268.

TURKA, a tn. Austrian Galicia, 28 m. S.W. Bamber, with a Greek and two R. Catholic churches, several mills, and a trade in tobacco, which is largely grown in the district.

TURKDEAN, per Eng. Gloucester 1850 m. P 378.

TURKISTAN, a wide region of Central Asia, partly included in the Chinese Empire, and partly subdivided among several independent states and hordes its two portions being separated chiefly by the table-land of Pamir, the Belor-tagh, and the Mus-tagh. In maps it is sometimes called Bucharia—Great Bucharia being a name applied to Independent or W., and Little Bucharia to Chinese or S. Turkistan.

CHINESE TURKISTAN [T'ien-shan-shan], or the country S. of the T'ien-shan P. is between lat. 35° and 45° N. and lon. 75° and 90° E., bounded N. by the T'ien-shan Mountains, which separate it from Soogoria, or T'ien-shan-shan W. the table-land of Pamir; S. the Koonzun Mountains, dividing it from W. Tibet; S.E. and S. the desert of Gobi, of which it includes a portion, length, W. to E., estimated at 1550 m.; breadth, from 500 m. to 550 m. area, 500,000 sq. m. It is closed on three sides by lofty mountain-ranges, and on the S. by a low abruptly elevated plateau, the centre of the country is the basin of the Lop-nor, a lake 70 m. in length, 500 m. wide W. by the Turin and its five great tributaries—the Kaskazi, Kashgar, Yarkand, Khosen, and Akou rivers. Pop.

Turkistan, based from the head of the Yarkand river to its furthest source, has a total length of 1600 m., and at its inlet into the Lop-nor, is supposed to be no more than 1280 ft. above the level of the sea. (Humboldt, *Aspects of Nature*, I. 84.) Its basin is almost wholly a sandy waste; it is in fact estimated that three-fourths of Chinese Turkistan are covered with deserts, and the very small proportion of the surface adapted for culture is merely situated around the oases and basins of the mountains in the N. W. and E. The lands there, are, however, in some districts, very fertile, and from the conformation of the country, its climate and products approximate to those of much lower latitudes. The heat in summer is great in winter frost and snow though common in the W., are rare at Hami, near the E. border. Abundant rains occur at this season in the mountains, but seldom in the lower country, where water for irrigation is carefully preserved in reservoirs. In the desert violent storms of wind are common, and very destructive to caravans, which, accordingly, in their transit from China, traverse only its narrowest part on the route from Kanoos across to Hami.

On the desolates and borders of the mountains rice wheat, millet, yulm, and grains common in E. Europe with sesamum and other oil-seeds, cotton, &c., are raised in considerable quantities, besides hemp flax, and dye-plants. Grapes, melons, pomegranates, and other fruits of S. climates, come to maturity for perfection. Mulberry-plantations are numerous, and much silk is produced. The raising livestock is, however, the chief branch of rural industry. Most of the surface, where it is rendered verdant by sufficient irrigation is employed in pasturing horses, yak, and other cattle, oxen, and sheep. The horses of this region are in high repute, and are sent in large numbers to China, Tibet, and several adjacent countries. Wild horses, camels, and asses abound in herds on the stony steppes of the Lop desert; the argal or wild sheep, some antelope, the tiger, wolf, jackal, lynx, and fox are amongst the other wild animals; the range of the Thian-shan are the native country of the two-humped or Bactrian camel. Two large species of eagles are conspicuous amongst native birds, the number of which is not great. Gold is found in the Thian-shan, and in the affluents of the Khoten river. Copper, iron, nitre, asbestos, and agate are also met with in abundance and sulphur in great quantities in the volcanic districts of Bagdo-ool and around Tourfan. The most remarkable mineral product is the gas or paper in which there is an imperial monopoly. It is raised from the bed of the Khoten river, also in the streams named Yurungkash and Karakash, in the Yarkand province, and about 70 m. S.E. Yarkand is a rock stated to be wholly composed of this stone. At all these localities Chinese soldiers are stationed to supervise the operations for procuring the paper, and prevent, so far as they can, any of it from passing into private hands. The whole of the produce being officially sent to Pekin where it is employed in the manufacture of vases and other articles of furniture for the imperial palace. (Ritter *Asien*, vii. 380-383.) Chinese Turkistan is an extensive trade, chiefly with Cashmere, Independent Turkistan, the Russian Empire, China, and Tibet. The caravans from Pekin to Yarkand employ from three to six months on their route, and bring tea, silver porcelain, and numerous other manufactured goods, taking back silk, horses, cattle, and furs. From Cashmere, by way of Yarkand, are brought shawls, kineboes, and white cloth, in return for Russian goods, tanned leather gold and silver embroidery, new China wares, and Tibet shawl-wool, from Yunnan, in Bodokash, shawls and gams, in return for silver and tea. From Andam, in Khoten, woollens and other manufactured goods are brought on horses, mules, and camels to Kashgar, where they are exchanged for Chinese produce; the routes from the two latter countries respectively traverse the two main passes across the lofty table-land of Pamir. Many merchants of Chinese Turkistan go to Tobolsk with cotton stuffs, tea, rhubarb, and sal-ammoniac, and return with broad-cloth, broadens, bullion, gold coin, copper iron, steel, and furs and the same kinds of merchandise come, by way of Uli, to Aktau, the exports from which town are chiefly cotton, silk, cotton fabric, leather, pottery, and fruit. Yarkand is the chief emporium of trade, and is a large mart for Chinese goods. Other principal cities and towns are Hami or Khami, Fikien Tourfan, Karakash, Katshe Akau, and Uosh, along the N. route, below the Thian-shan; Kashiur, the city

second in importance, toward the W. frontier, and Karakash, Khoten, Kila, and Peim, in the S.

The great bulk of the inhabitants are of the Turkish race, or Uzbeks, they are superior in civilization to the Uzbeks of Bokhara, and speak the purest of Turkish dialects. Tadzhiks or Persians, Eleuths, Cashmerians, Tanguts, &c., all Mahomedans, are amongst the population, the Tadzhiks carry on most of the foreign trade. In the N. W. are some Kirghiz settlers; at Hami many Kirghiz Calancho and on the banks of the Lop-nor are a few people who, although they speak Turki, are not Mahomedans; they are occupied in fishing, trading in furs and swans' down, and weaving flax and wild hemp. Chinese merchants in the towns, a few Hindoo Jews, and Christians, Mongols in the E., and Manchos in the Chinese army, make up nearly the rest of the inhabitants. The civil government is vested in the hakim beyrs of the districts, whose appointment rests with the court of Pekin, and the Mahomedan maintain, with much satisfaction, their freedom from interference by the Chinese in their internal affairs. The Chinese troops which guard the principal cities amount in all to between 20,000 and 30,000 men, under Manchou officers. At all the custom-house stations the officials are half Manchou and half Uzbeks. Europeans are interdicted from entering the country.

This region formed anciently a part of the territory of the Kiang-nan. It was subjected by the Chinese in the 1st century A.D. and from the 6th to the 17th centuries, it was successively under the domination of Tibet, Tangut, Genghis Khan, Timur, the Eleuths, and the Boogaries. It was conquered by the Chinese emperor Kien-long, in 1758-9. In 1856-7, a great insurrection took place under Jeleangre, one of his khodjas or princes, who with him from Kokan, defeated an army of 60,000 Chinese in three battles, but the latter finally prevailed and the chief articles of the province were transferred from Kashgar to Yarkand. (Ritter *Asien*, vii. 380-381.)

INDUSTRIES. TURKISTAN is between lat. 35° and 51° N. and lon. 51° and 72° E., bounded E. by the Pamir table-land, W. by the Caspian Sea, N. by the Russian governments of Tobolsk and Tashak, and S. by the Hissar Mountains and the Hindoo-Kush, separating it respectively from E. Persia and Afghanistan. In it are the fives of Aral several other considerable lakes, and the entire courses of the rivers Oxus and Jaxartes. It is composed of the khassates of Bokhara, Khiva, Koonodok, Badkhashan, and Koken, with the steppes of the Kirghis (see those articles). Both in its S. part and lately possessed by Bokhara, now belongs to the Afghans.

TURKEY or THE OTTOMAN EMPIRE (Turkish, *Islâm*, Latin *Turcescum Imperium*, French, *Turquie*, German, *Turkei*, Dutch, *Turkye*, Italian, *Turania*, Greek, *Turquia*). This empire, comprehending all the countries in which Turkish supremacy is directly or indirectly recognized, includes some of the farthest portions of the world, and several of its earliest and most celebrated seats of civilization but labours under the serious disadvantage of being not so much a continuous dominion, as a mere aggregate of governments, often widely separated, both by position and interest, and only accidentally united by having been the subjects of a common conquest. Its vast territories consisting partly of mainland, and partly of islands scattered over the bosom or along the shores of inland seas, are situated in three different quarters of the globe, in the S.E. of Europe, the W. of Asia and the N.E. of Africa extend over 87° of lat. (11 to 48° N. and 41° of lon. (37° to 33° E.), and though scarcely admitting of being geographically defined as a common whole, may be considered as bounded, N. by the Black Sea, Russia, and Austria, W. Austria, the Adriatic, the Mediterranean, Algeria, and the African desert; S. the desert, Soudan, Abyssinia, and the Gulf of Bahabundab, E. Independent Arabia, the Persian Gulf, and Persia, and N.E. Transcaucasian Russia. The total area of the empire is estimated at 1,077,328 sq. m., and the population at 25,560,000. The administrative division is into *gouvernements*, and *vilayets* or provinces, but their names and areas have been so often arbitrarily and even occasionally changed, that it is difficult to speak with certainty of those actually existing. The following table, extracted from Dietrich *Statistisches Bureau in Berlin* (1868, No. 18, pp. 214-219) is believed to be the most accurate and authoritative which has recently appeared.—

NAMES and ALIAS of the EVALUATE and SANITARY of the TURNING KNOWN

[illegible]

As the leading names in the above table form the subjects of separate articles, in which the more important details are given, the geographical sketch introduced here will be of the most general description.

To prevent confusion, it will be proper to keep the territories of each continent distinct, and present them under the separate heads of Turkey in Africa, Turkey in Asia, and Turkey in Europe.

1. **TUNIS IN AFRICA**, may be considered as an immense triangle, one side of which facing the N is formed by the N shore of the Mediterranean, and another, facing the E, by the W shore of the Red Sea and the Isthmus of Suez, while the base or third side is represented by an indistinct line drawn across the desert to a N-E direction, from the frontiers of Algeria to the shores of Abyssinia. It is originally divided into three parts, those of French Tunisia, Egypt, and formally discovered from it, and still includes the three separate governments of Tunis, Tripoli, and Egypt, the last comprising not only Egypt proper, but also Nubia or Dongola, and Sennar. The aggregate area, estimated at 719,329 sq. m., amounts to more than one half, but the population, only 5,800,000, falls short of one-sixth of that of the whole empire. This great disproportion indicates the nature of the territory, a large part of which is composed of sandy wastes, and the smallness of the population, which is almost entirely nomadic, not wanting other reasons which strikingly contrast with the general barrenness. Tunis, belonging principally to the plateau of the Atlas, is intersected by many fertile valleys, but, owing partly to its natural resources and its maritime advantages, became the seat of an empire which long continued for centuries with that of Rome and Egypt, enriched by the periodic floodings of the Nile, centuries, in spite of all that, but since the discovery of the Americas, and the rise of the principal powers of the world. The remoteness from the seat of government makes it difficult for the Turkish

authorities to maintain a firm hold of their possessions in Africa, and hence, at one point, it seemed as if they were not only about to establish their independence, but as if the Ottoman rule, both in Asia and Africa, were about to be transferred from Constantinople to Cairo. More recently however the Porte has unexpectedly regained her ascendancy in Turkey, and indeed, it rarely by a day, who holds his appointment for life, and has even been expressly relieved from the payment of tribute! But Tripoli, which had long possessed its own hereditary dust of the Caracemali family, has been compelled, by a violent stretch of power to accept of a yamuk arbitrarily nominated by the sultan, and maintained in his position by Turkish troops. The Egyptian yamuk, maintaining his position, has been against him, and has been made by a direct interference of the great European powers so completely to overweigh, that instead of being the most arrogant, it is now at least in profession, the humblest and most submissive of yamuks. The hereditary sovereignty is in the family of the late Mahomet Ali, but the Porte claims the right, at each vacancy occurs, of selecting the particular member of the family who he will fit, draws a fourth of the gross revenue in the name of tribute, and has the unsolicited nomination of all the higher offices of the government. The connection of the Turkish empire with Africa is, therefore, by no means so nominal as it is often represented to be. Its possessions on the continent not only exceed all the others in area, but in consequence of the almost universal prevalence of Islamism, its population, besides being more numerous than that of any other government, has more fertile territories, which, from the greater proximity, might seem to be more easily connected with it. See Egypt, NUBIA, SENEGAL, TOBIE, TRINGEE, MALINGO and BARRA.

2 TURKEY, IN ASIA, taken in its widest sense, includes within its geographical limits the long belt of Arabia, which lines the E. shore of the Red Sea, and consisting of the two

provinces of Hama and Yemam, now forms the eyalet of Jadda, which has an area of 145,800 geo. sq. m. This eyalet, however, being politically attached to Egypt, is seldom considered as forming part of Turkey in Asia, which is usually confined to that part of the Asiatic continent which lies between lat. 31° and 43° N. and lon. 30° and 48° E. and is bounded N by the Black Sea, the Bosphorus or Straits of Constantinople, the Sea of Marmora, and the Hellespont or the Straits of the Dardanelles W the Archipelago and the Mediterranean, S. Arabia, and E. the Persian Gulf, Parus, and Transcaucasian Ranges. The space defined by these boundaries has an area of 829,606 geo. sq. m., and a population of 15,150,000, and viewed in regard either to its physical features or to the wonderful events of which several of its regions have at different periods been the theatre, possesses an almost unparalleled interest. According to the most general idea which can be formed of it, it consists of two plateaus and of an extensive plain. The larger and more elevated of these plateaus occupies the whole of its N. portion, stretching across it from the shores of the Archipelago to the frontiers of Persia and Transcaucasia, and comprising within its limits the peninsula of Asia Minor and the high lands of Armenia and Kurdistan. This plateau, which has an average elevation of 4000 ft. to 5000 ft., forms the base of two parallel mountain-chains, the Taurus and the Anti-Taurus, which increase in elevation as they proceed towards the E., and present many remarkable cones and peaks, several of which rise beyond the line of perpetual snow. The other plateau, that of Syria and Palestine, is also traversed by two parallel ranges which breaking off nearly at right angles to the Taurus, proceed S. at no great distances from the shores of the Mediterranean and are continued almost without interruption across Arabia Petrea and the peninsula of Sinai to the Red Sea. This plateau is low remarkable for its height than for the depression of one of the valleys, which, as the line of the Jordan, is more than 1500 ft. beneath the level of the sea. The extensive plain, that of Irak and Mesopotamia, forming the lower basin of the Euphrates and Tigris, is bounded on the N by the Armenian and on the W by the Syrian plateau; and though now little better than a steppe, clearer covered with and than verdure, originally possessed attractions which marked it out for the cradle of the human race, and made it the earliest seat of empire. The drainage of this vast territory, divided into numerous basins by the mountains which intersect it, is carried to four different seas, of which the Persian Gulf receives the largest share, by means of the Euphrates and Tigris already mentioned. The Black Sea receives its portion chiefly by the Jekil and Kizil Irmak, and the Sakarra, while the streams which flow into the Archipelago and the Mediterranean are, for the most part, only mountain-torrents. The only lake deserving of notice for its magnitude is that of Van, on the E. of Kurdistan, though for other reasons, a far greater interest attaches to those of Thibet and the Dead Sea in Palestine. See ARABIA, ARMENIA, SYRIA, PALESTINE, BABYLON, DIARRHIA, &c.

3. TURKEY, in EUROPE, the remaining portion of the Turkish Empire, is of very limited extent, in comparison with its African and Asiatic possessions, but from containing the seat of government, and standing in close relation to great European interests, is the most important of the whole. It still occupies the far greater part, and before the kingdom of Greece was discovered from it, occupied nearly the whole of the S.E. extremity of the continent, consisting of an extensive peninsula in the form of an irregular triangle with Cape Matapan for its apex, the E. shore of the Ionian Sea and the Adriatic for one side, the W. shores of the Archipelago, the sea of Marmora, and the Black Sea for the other side, and the Bosphorus, the Dardanelles, and the E. Carpathian mountains for its base. The only part of European Turkey not situated within this triangle is Moldavia, which forms an almost isolated projection, stretching N. between the Austrian territories of Transylvania and Bukovina, from which it is separated by the Carpathian on the W. and the Russian government of Bessarabia, from which it is separated by the Pruth on the E. Thus defined, European Turkey lies between lat. 39° and 48° N. and lon. 16° and 29° 30' E.; is washed by the Adriatic and the Ionian Seas on the W., the Archipelago on the S.E., the Sea of Marmora and the Black Sea on the E., and borders N.W. and N. on Au-

tria, N.E. on Russia, and S. on Greece. Its greatest length, E. to W., measured nearly on the parallel of 45° is 670 m. greatest breadth, N. to S. from the Pruth, on the Moldavian frontier to the vicinity of Gallipoli 540 m. area, 153,721 geo. sq. m. pop. 15,500,000. In the table given above, the territories of which European Turkey consists, are classified as *separate and isolated*, the former term denoting those in which all the rights of sovereignty are ascribed directly by the sultan, and the latter those in which the sovereign rights are not only modified and restricted by others legally superior to the local governments, but are also shared to a large and not well-defined extent by Russia, under the name of a *Protectorate*. These mediate territories, comprising the three principalities of Moldavia, Wallachia, and Servia, have an aggregate area of 40,021 geo. sq. m., or very nearly a third of the whole. The immediate territories exhibited in the table, in conformity with the usual division, are arranged under the four cycles of Rumelia, Bosnia, Albania, and Dechesaur; but another division, though no longer recognized by the government, still retains its place in most of our maps and geographical works. In this division the mediate possessions are given as already mentioned but the immediate are represented as consisting of the provinces of Bosnia Croatia, and Herzegovina, in the N.W. Montenegro and Albania in the W. Thessaly in the E., Bulgaria and Rumelia or Thrace in the E. and Macedonia towards the centre. To facilitate comparison, it may be necessary to mention that in the Table the eyalet of Rumelia is nearly identical with Montenegro, Albania, Thessaly Macedonia, and the N.W. of Rumelia; that of Bosnia with Bosnia Proper Croatia and Herzegovina; that of Silistra with Bulgaria; and the N.E. and E. of Rumelia and that of Dechesaur with the S.W. of Rumelia, and the adjacent islands in the N. of the Archipelago.

In respect of physical configuration, European Turkey has been not inaptly compared to a truncated triangular pyramid, which, rising with more or less rapidly from a very extensive base forms at its termination the lofty plateau of Moesia. This central plateau forming a kind of common nucleus for the high lands of Bosnia Servia, Macedonia, and Albania, is of a quadrilateral shape and sends off several mountain ranges in different directions. One of these, proceeding N.W. between Bosnia and Herzegovina becomes linked with a branch of the Dinaric Alps, and thus connects the mountains of Turkey with the Alpine system. Another range, branching off nearly due S. extends, near its extremity in Thessaly, the outstanding height of 10,000 ft., traverses the frontiers of Macedonia and Albania and under the name of Pindus, is continued through Thessaly into Greece. A third range proceeding E. forks on reaching the common junction of Macedonia Bulgaria and Rumelia and forms two distinct branches, one of which under the name of Balkan, Haemus or Emineh-Dagh, proceeds E. & E. towards the Black Sea, while the other proceeds S.W. under the name of Rhodope, or Roupel-Dagh. Besides these principal chains, which form the great waterheads and furnish the sources of the most important rivers of the country there are numerous minor ramifications which often, maintaining a parallelism to the central axis form a series of descending terraces with intervening valleys while in other directions the mountainous districts are succeeded first by hills, and then by wide and open plains. Of these plains by far the largest is that of the lower basin of the Danube, embracing the greater part of Wallachia, and considerable portions of Moldavia and Bulgaria, and finally sinking down in the latter into the lagoons and peat lands swamps of the Dobruzhia, the tract comprised within the last great bend of the Danube, and stretching S. from that river to Trajan's Wall which strikes the shore of the Black Sea at Kustendji. Other plains, far less extensive than the former though equaling it in fertility, and surpassing it in beauty, occur in the S. of Macedonia, the S.E. of Thessaly, and the S.W. of Albania.

The number and irregularity of the greater and minor mountain-ranges render the system of drainage very complicated and divide it into four principal, together with a great number of subordinate basins. By far the most important is that of the Black Sea, into which the Danube, augmented on its right bank by the Save, with its tributaries, the Varna, and Drin, by the Morava Timok, Iker, Vid and Tessa; and on its left bank by the Soly, Aluta, Arghet,

Jalomatina, Gureh, and Pruth, pour the accumulated waters of more than half of the whole country. Next in importance to the basin of the Archipelago, which receives the Schumalia from Thessaly the Indje Karasu, Vardar and Sava from Macedonia, and the Maritsa from Rumania. The Adriatic and Ionian Seas, generally regarded as only sea basins, being a large extent of the Turkish coast, but owing to the proximity of the mountain-chains, receive from it no fringed descending of notion, among the comparatively insignificant Albanian Drin, Scutari, and Vojussa. The fourth basin, the Sea of Marmara, receives only a few mountain-torrents. Considering the mountainous character of the country, and its numerous perennial streams fed from snowy heights, it is remarkable that it does not possess a single lake worthy of the name, with the exception perhaps of those of Gubrida in the E., and of Buzat in the N. W. of Albania. Owing partly to the elevation of the surface, and partly to its exposure to the N. E. blasts from the interior of Russia, the climate is not so mild as its latitude might seem to indicate, and is, moreover, subject to sudden and violent fluctuations. The Danube regularly freezes, and snow several feet deep remains nearly half the year on the loftier mountains of the Danubian provinces. The olive will not grow in the latitudes which in Spain and Italy are found to be most congenial to it, and much harder plants are often nipped by hard frosts after the season has considerably advanced. On the other hand, the summer heat is excessive, especially in Albania, and other districts which possess a N. shelter, and even in the more exposed districts the vintage becomes general before the end of July. For the production of the ordinary cereals, no part of the world is more admirably adapted, and the grain produced at present very fully indicates the immense quantities which, under better circumstances, might easily be raised for the maintenance of a vast population either on the spot or in other countries. The only great exceptions to the general suitability of the soil are given by the influence of some low swampy tracts of no great extent, and by occasional visitations of the plague. The latter however are attributable not so much to the climate as to the complete neglect of sanitary arrangements.

The geology of the country has not been fully or accurately explored, but so far as yet known, it does not appear to be much distinguished either by the variety or the value of its mineral products. Primary fossiliferous strata occur only in isolated spots, and that part of the secondary formation where the coal measures ought to be found, is believed to be altogether wanting. On the contrary the upper part of the secondary formation, including the cretaceous system, is very largely developed. The lias, sandstone, and other rocks belonging to it occupy almost the entire stratification of extensive tracts, particularly in the W. Tertiary formations also prevail both in the E. and in the basin of the Danube, and along almost all the larger rivers, and at the mouths alluvial deposits of more or less thickness are usually found. Crystalline schists, composed of gneiss and mica, and chlorite slates are, if not the most largely the most conspicuously developed of all the rocks inasmuch as they form the great bulk of the loftiest mountain-chains. In connection with the schists, granite also is of frequent occurrence, and is sometimes seen piercing the gneiss at high elevations. No evidence of active volcanic agency anywhere appears, but the important part which it must have performed in giving the country its final configuration is indicated, both by the existence of thermal springs, and by the masses of trachyte and other volcanic products, which cap some of the summits both of the Pindus and the Taurus-Dag. Many of the veins which traverse the crystalline schists have been ascertained to be highly metalliferous and lead, yielding a considerable percentage of silver has at different periods been actually worked. Iron also, of the best quality is very abundant, but neither government nor people seem as yet inclined to turn their mineral treasures to good account.

Having thus cursorily surveyed the different territories, more or less subject to Turkish sway on the three great continents of the Old World, it seems practicable, and with some time to arrange our observations in such a manner as to make them applicable to the enquiry considered as a whole.

Products.—These are partly natural and partly artificial, some of them being yielded spontaneously without human

effort, while others are not to be obtained without a greater or less amount of skill and labour. Without attempting to specify the natural products of the Turkish Empire, we may mention, among others, the date groves of Tripoli and Tunis, from which the inhabitants derive a chief part of their subsistence, the vases, steppes, and plains on which the Arabs and other nomadic tribes, both in Africa and Asia, feed their flocks and herds the dye and drugs often cultivated in profusion on arid tracts where scarcely anything else would grow, and the noble forests, which, in spite of the havoc to which they have been subjected, still majestically crown many mountain-chains both in Asia and in European Turkey. In an empire where the number of the inhabitants bears so proportion to the extent of the countries nominally occupied by them, such natural products form, both in amount and value, an inconsiderable part of the returns yielded by the soil. The two great classes of artificial products are furnished by agriculture and manufactures. Both of these, owing to the immensity of every kind of property, the natural indolence of the Orientals, their pertinacious adherence to antiquated customs, the absence of means of communication and various other causes, are in a very neglected condition, and yield a mere fraction of the profitable returns which under more favorable circumstances, might easily be obtained from them. In many districts, however, the natural capabilities of the soil and the excellence of the climate, seem to amount to all obstacles, and cotton, tobacco, olives, sesame, rice, maize, wheat, and other crops are raised in immense quantities. The vine, cultivated extensively, especially by Christians, produces its most wine both the common and finer kinds of fruit are grown in almost every quarter the poppy is raised on a large scale for the manufacture of opium, immense numbers of silk-worms are reared on the leaves of the mulberry, and whole gardens are employed in producing flowers for the preparation of the celebrated rose of shiraz. In connection with agricultural products, they also be mentioned the various kinds of trees on the lower plains of the Danube, of goats, particularly in the country of Angora, and of camels, horses, and sheep, by the various nomadic tribes. Manufactures—the other great class of artificial products, now occupy a very secondary place in the Turkish Empire, and are not entitled to more than a passing notice. Cotton at one time the staple branch of industry, carried on to a greater or less extent in almost every town, village, and hamlet, has nearly ceased to exist, from its inability to compete with the products of the power-looms of Great Britain, and shows symptoms of revival only at Beyrout, where British capital has been employed with some success in introducing the factory system. Of the cutlery of Damascus, the refined sugar of Cyprus, the porcelain of Nicosia, and the red dye, all formerly important industrial branches, scarcely a vestige now remains, and the only articles in which some degree of superiority still may be claimed, are various preparations of leather, carpets, and tapestry, the latter chiefly at Ispahan, in Asia Minor and, above all, the silk of Damascus, Aleppo, Brusa, and Derbend, which, in point of beauty and durability, still vie with the best products of the looms of Lyons and Milan. To these may be added, though the places they occupy is very subordinate, the soap of Crete, and the firearms and weapons of Ispahan and Travnik.

Trade, Commerce, &c.—In regard to these, the most enlightened states have only recently begun to furnish full and correct statistics, and hence, in Turkey, as might be expected, it is impossible to make even a distant approximation to accuracy. A more glance at the maps, however, must convince us that countries governed of so many valuable products, and consequently both of their position and the extent of their coasts and inland seas, accessible at so many points both from the W. and E. seas, under any circumstances, command a very extensive traffic, both direct and transit. It is observable, moreover, that by means of the commercial policy which the Turks have adopted, this traffic has been allowed to develop itself with greater freedom than it could have enjoyed in most European states. In the heavy duty of 15 per cent. rightly exacted on all exports, with the important exception of wheat, which by a formal treaty in 1817 was declared free, we see a genuine result of Turkish barbarism; but in the opening up of the coasting trade to the competition of all nations, and the unlimited admission of all imports on the

payment of a duty never exceeding 5 per cent., Turkey may claim the merit of having taken a lead in reforming the commercial system of the world. The full working of this system is necessarily hampered by the impulsive restriction on exports, but in every quarter of the empire we behold ports and commercial enterprises, in which a vast amount both of home and foreign trade is concentrated. Among the most important of these are Constantinople, Adrianople, and Salonica, in Europe; Smyrna, Aleppo, Beyrout, Basora, Trebizond, Batoum, Bagdad, Bursa, and Damascus in Asia; and Alexandria, Suez, Cairo, and Tunis in Africa. The exports of 1887, consisting chiefly of olive oil, sugar, silk and silk goods, cotton, sheep's and goats' wool, grain, tobacco, drugs, opium, linseed, &c., were estimated at £10,467,750 and the imports, consisting chiefly of cotton, woolen, and silk goods, metals, iron, steel, and glassware, colonial produce, coal, nardage, Indian and Chinese goods, fancy goods, &c. at £11,828,800. The following tables exhibit the share which Great Britain and other countries have in the trade of Turkey

FOREIGN TRADE IN 1887.

Country.	Exports.	Imports.
Great Britain, Malta, & the Ionian Islands	£2,533,000	£1,508,000
France to Paris	3,175,000	3,175,000
France	1,067,671	3,339,716
Austria	1,197,653	1,865,120

Accounts are usually kept in piastres, each of which is equal to 2½ d. sterling, making very nearly 108 in the pound sterling. The piastre or guk is divided into 40 paras, and the para into 8 aspers, 500 piastres make a guva, and 100,000 (about £1000) make a guck. The unit of weight is the cike, equal to about 2½ lbs. avoirdupois, it is divided into 480 dram. For larger weights the canteer of 44 cikes, and the herman of 6 cikes are used. Liquids are sold by weight, but the principal dry measure is the sic, which is different in almost every district. At Constantinople, 100 kilos are equal to 12½ imperial quarters. The usual linear measure is the carchane, equal to 3 imperial feet. In travel, the distance is commonly estimated by the hour which affords a very uncertain criterion, but may on average contain about 6 m. This mode of estimating distance makes it almost unnecessary to observe, that in regard to means of internal transport, Turkey is still in the rudest state possible, and only a few of the principal roads are constructed so as to admit of wheel-carriage. The different races of the population are thus kept shut from each other, cramped up within their natural barriers, and the products of one district are often perishing from want of consumers, while the inhabitants of another district may be suffering severely from inability to obtain them. Nothing seems better calculated to develop the internal resources of Turkey, and even further the cause of good government, by favouring the unification of its hostile races, than the establishment of a system of good roads.

People.—These, consisting of various races accidentally brought into juxtaposition or political relationship by immigration and conquest, present none of the kindred features which combine to form a national character. First in order are the Osmanli Turks, who, as the dominant race, are diffused over the empire, though most numerously in Asia Minor, Armenia, and the R.R. of European Turkey. By right of conquest they are proprietors of the greater part of the soil and fill all the civil and military offices. They live generally in towns employed in various trades, and are never found as agriculturists except in districts where they have settled in great numbers. Accustomed to obtain their wives and supply their harvests from other races, they now constitute a very heterogeneous mixture, retaining few of the leading features of their ancient national character though the masses are still distinguished by Slavonic, Georgian, and Asiatic intonations, as well as by a certain degree of good nature, frankness, and hospitality. Their temper is essentially phlegmatic, and hence, except on very extraordinary occasions, they never give way to violent bursts of passion. Their high set enjoyment is to allow the time to pass indolently and luxuriously away, and their great places of resort are baths and coffee rooms. The former usually handsome and often mag-

nificent structures are used universally by both sexes, and all classes the latter placed often in the vicinity of natural or artificial fountains, shaded by trees and open to the sky may be seen crowded at all times by visitors in all forms of heathen attitudes, apparently enjoying the highest happiness of which their nature seems capable, from such simple indulgences as a cup of coffee or a tobacco or opium pipe. The only striking contrast to such phlegmatic manifestations is presented by the general fondness for children, and the strong attachment of children to their parents, particularly to their mothers. Both of these affections are exemplified in numerous ways, but nowhere more affectingly than in the deep grief produced by family bereavement, the care bestowed on their education, and the numerous mourners who are constantly resorting to their cyprus shades to bewail their loss. The number of the Turks proper is nearly 13,000,000 or about a third of the whole population. To the Turkish stock belong also the Turcomans, who lead a nomadic life in Armenia and the centre of Asia Minor.

Among Semitic races the first place is due to the Arabs, who not confined to their native Arabia, form a considerable element in the population of Syria, Palestine, and the lower

heads of the population, and constitute a great majority in Egypt. More or less allied to them are the Maronites and Druses in Lebanon, and the Jebel Hamra, the Moutamis in Cule-Syria, the Assiriah or Komairi in N. Syria, the Nestorians or Chaldeans in the highlands of Kurdistan and

TURKISH WOMEN IN A COUNTRY — ADAM E. A. DUN.

Mesopotamia, and the Jews who are scattered over all parts of the empire, but have their favourite seats in Syria and Palestine.

To the Caucasian stock belong the Armenians, who, besides forming at least a third of the population in their native Armenia, are diffused as traders throughout all the larger towns the Mahometan Kurds, apparently Persian, though their language bespeaks a very mixed origin, the Yezidis, chiefly inhabiting the Sinjar mountains in the N. of Mesopotamia, the Greeks forming the bulk of the population in Asia Minor, Thessaly, Macedonia, and the islands, and constituting to a very considerable extent, the mercantile and trading community of Turkey more especially in the seaports. The Armenians in the S. and towards the coasts of Albania, the Wallachians or Roumans computed at about 4,000,000, who not only occupy Wallachia and Moldavia, but are found under different names in most provinces of European Turkey, and lastly the races of Slavonic origin confined exclusively to the European part of the empire, but so numerous as to form almost the entire population of the territories between the Balkan and the Danube, amounting, under the name of Bulgarian Bulgars, to about 4,000,000 in Bulgaria and the S. of Macedonia and Thracia, and under the name of Serbs, to upwards of 2,000,000, principally in Servia, but partly also in Montenegro, Bosnia, Herzegovina and the adjacent parts of Albania. To complete this long list of races, it is necessary to add the gipsies widely diffused and especially numerous in Moldavia and Wallachia, where their condition is one of complete slavery, the Boebers bounding as Tripoli, Tunis, and part of Nubia, and the negro tribes of Kordofan, Senegal and Darfur. The three following tables exhibit a summary of the population of the Ottoman Empire, classified in the first according to religion, in the second according to race, and in the third according to provinces.

POPULATION according to RELIGIONS.

Creeds.	In Europe.	In Asia.	In Africa.	Total.
Mahometans ..	2,800,000	18,800,000	3,800,000	25,400,000

Government—This bears throughout the characteristic features of an Asiatic despotism, in which the arbitrary will of the sovereign has the absolute force of law and is subject to no restraint, except that which may arise from the prospect of the Koran, from ancient traditions and customs, and still more, perhaps, from actual national prejudices which must be consulted in order to avert rebellion. In such a government the existence of a constitution in the usual sense of the term is impossible, though something of the kind was attempted to be introduced in 1838 when in the presence of the great officers of the empire and the representatives of the European powers, the sultan issued the celebrated edict known by the name of the Hatt-i-sherif of Gulistan. This edict appears to have been issued in perfect good faith but owing partly to the opposition of the more fanatical Turks, and partly to the corruption of the officials who ought to have carried it into effect, has remained in a great measure a dead letter, though it is not to be denied that important improvements have taken place and that the general tendency of the government is towards more enlightened views and a higher civilization. The monarch, usually designated by the titles of sultan or grand-seigneur, khan and padishah, is regarded by the Turks as the Khalid or head of Islam, and is addressed by European courts as majesty or highness. His edicts bear the name of Hatt-i-sherif, and his government is often designated generally as the Sublime Porte. The sovereignty is hereditary in the family of Osman the presumptive heir being the eldest son who is born to the sultan after his accession to the throne. On a new accession, the sultan is not crowned, but is greeted with the sound of cannon in the mosque of Eyub at Constantinople, after swearing to defend Islam. His dignity is considered to be too transcendent to allow him to enter into the married relation, and he has, therefore, no proper wives. Among the females of his harem, however, there is a gradation of rank. From four to seven bearing the title of *haseki* take precedence of all the others, while a still higher place and influence are assigned both to the mother of the sultan and to the mother of his presumptive heir.

The public officers who conduct the administration under the sultan, are divided into three classes. The first class is that of *awlad*, which, being founded entirely on the Koran, makes no distinction between religious and civil, and, accordingly, includes all persons who discharge either ecclesiastical or judicial functions. At their head is the *Sheikh-ul-Islam*,

usually called *Mutl* and subordinates to him are *Molla*, *Cadde*, *Iskender*, and *Ukma*. The second class consists of the officials of the pen or the members of administration, properly so called. At their head is the grand vizier or *Paşa*, who is regarded as the centre of all administrative functions, domestic and foreign. Subordinate to him are his vicegerent or deputy (*Kaimakan*), the *Reis Effendi*, or minister of foreign affairs, the president of the council, the grand master of artillery, the minister of police, the minister of trade, agriculture, and public works the *Mutasarrif* of the grand vizier, who acts as minister of the home department; the superintendent of the civil list, the inspector of revenue, and the minister of pious endowments. The third class includes all the officials of the sword or those who preside over the army and navy, the head of the former being the *Seraskier* or minister of war and of the latter the *Capudan Paşa* or high admiral, and minister of marine. The *Shadi-el Islam* and the above ministers of the second class together with the *Seraskier* and *Capudan Paşa*, constitute the *divan* or highest deliberative council in the empire.

The whole revenue is estimated at nearly 27,500,000 sterling. The sources from which it is derived, and the modes in which it is expended, may be gathered from the following table containing the budget of 1893:—

Taxes ..	28,300,000	Civil list of the Sultan ..	270,000
Land-tax ..	4,000,000	Dr. Palace-expenses, &c ..	84,000
Poll-tax ..	4,000,000	Arm. army and ordnance ..	878,000
Customs ..	8,000,000	Ty of the <i>haciendarios</i> ..	1,000,000
Indirect taxes ..	1,600,000	Foreign department ..	100,000
Tribute of Egypt ..	300,000	Public works ..	100,000
“ of <i>Wahab</i> ..	80,000	Charitable institutions ..	120,000
“ of <i>Wahab</i> ..	10,000	Interest of Treasury loans ..	90,000
“ of <i>Wahab</i> ..	10,000	Life annuities ..	440,000
Total ..	27,310,000	Total ..	27,360,000

Army and Navy.—The regular army composed entirely of Mahomedan troops organised on European principles consists of six *divisions* or *divisions*, each equally divided into active or *sema*, and reserve or *redif*, and commanded by a field-marshal or *paşa*. The strength of the division is from 25,000 to 30,000 men, and accordingly previously to the commencement of the war with Russia in 1878, the regular active army amounted to 128,680, of whom 100,000 were infantry, 17,280 cavalry, and 11,000 field artillery. Adding the army of reserve, also 128,680, irregulars to the number of 61,500, composed

amounted up to 448,860. The qualities of the troops thus variously ascertained differ necessarily according to the physical and moral characteristics of the nations from whom they are raised; and the kind and degree of discipline which they have received; but, in regard to all those of Turkish origin, it may be affirmed generally that they are distinguished by great natural courage, and manifest a remarkable degree of coolness in the most trying circumstances. This coolness, amounting to a kind of stoical indifference, is chiefly the result of fatalistic views inculcated by the Koran and instilled into them from their earliest years, and has often enabled them, especially when placed under any kind of shaker however indignant, to defend themselves with the greatest calmness and heroism. It would also seem from recent (1894) experience, that even in the open field, those who have been regularly disciplined, are fully equal to the best troops which Russia can bring against them. The navy previous to 1858, consisted of 16 ships of the line, 14 frigates, six steamers, 12 corvettes four brigs, and about 30 smaller craft, carrying about 4000 men, and manned by 25,000 sailors chiefly Greeks on whom fidelity little confidence can be placed. The only naval arsenal is at Constantinople and the principal dockyards are at Sinope and Erzurum in the Black Sea, and at the islands of Mytilene and Rhodes.

Religion, Education, Justice.—The principal internal institutions of the empire, the religious, educational and judicial, must be very briefly noticed. Islamism, professed by about 20,000,000, is in every sense the dominant religion, inasmuch as it is not merely the only one established by the state, but extends to regard all others with contempt. The leading sect is the *Sunni* which is adhered to by the Turks proper, *Turcomans*, Arabs, *Africans* proper, *Albanians*, and a considerable number of *Selavians* in *Bulgaria*, *Bosnia*, and *Herzegovina*. The bluntest sect has its adherents chiefly among the tribes E. of the *Tigris* while different modifications of *Mahomedanism* are professed by the *Ismaelites*, *Wahabites*, *Motallis*, and *Anarists*. The *Druzes* and *Yakubis* have forms peculiar to themselves. Christianity under the Greek form, as professed by a large majority of the *Greeks*, *Wallachians*, *Italians*, and *Serbs*, and more particularly by *Bosnians* and *Albanians*. The *Roman Catholic* church claims a considerable number of the last two, and also the whole of the *Maronites*, part of the *Armenians*, and a few *Greeks*. The *Armenians* generally, the *Jacobites* and *Copts*, differ from other Christian sects, chiefly by their adherence to what is called the *Monophysite* system of doctrine. According to the usual estimate, the Christians exceed in European Turkey three-fourths, and in Asia a fifth, while in Africa they fall short of a fifth of the whole population. Notwithstanding the strong support and encouragement given by the government to *Mahomedanism*, it is decidedly on the decline, and is continually losing while Christianity is adding to its adherents. One of the most hopeful signs in this respect is exhibited in the fact, that within a comparatively recent period ten Protestant communities, counting nearly 2000 members have been formed, chiefly by the labours of *American missionaries* in *Armenia*. According to a system which had long been established, the Turkish educational institutions were only of two sorts, *Maktab* or elementary, and *Madrasah* or high schools, the latter intended to prepare for the higher educational and judicial functions. This system was greatly improved in 1847 by the introduction of a class of schools intermediate between the *maktab* and the *madrasah*, and intended chiefly for the commercial classes. The present educational system, accordingly now includes elementary schools, attendance at which is compulsory on all *Mahomedan* children who have attained their sixth year, middle schools, in which among other branches, geography, history, geometry, and composition are taught, and colleges arranged under the different heads of military, naval, medical, veterinary, agricultural, &c. Most of the *madrasahs* and colleges have libraries attached to them, containing a respectable list of works in various branches of literature. Those in Turkish are like the language itself, derived in a great measure from *Arabic* and *Persian* sources. Justice is administered according to a code derived chiefly from the *Koran*, but partly also from tradition and custom, by a series of courts which descend by regular gradation from the *Amir Okash* or chief court, divided into two presidencies, a European and an Asiatic, to

CONTINUED FROM THE TURKISH ARMY (1894).

1. *Paşa* (General).

2. *Subay* of the *Paşa*, *General*.

partly of *Turks* of the *Dobrujeh*, *Comanches* of *Asia Minor*, and others employed as urban and rural police, but chiefly of 50,000 *Mahomedan* volunteers, the entire Ottoman force is

the Mavrovlats or high courts, each with jurisdiction over one or more eyalats; and numerous subordinate inferior courts, graded over by a *mullah* or *kadi* as proper judge, or by a *naiib* or *deputy*. In these courts the forms of process are simple, and the decision is seldom long delayed; but the judges are notoriously venal, and perjury is everywhere practiced almost openly and with perfect impunity.

History.—The Turks entered in the remotest periods thinly scattered over extensive Asiatic tracts, from the desert of Gobi to the Mediterranean, and from the N. of Siberia to the Persian Gulf. Among the most powerful tribes were the Oghuzs, supposed to have been the parent race, the Seljuks who, by their extensive conquests, long ranked as the dominant race, and the Osmanlis who, though at one time threatened with extinction, suddenly rose to importance, and became the founders of the present Ottoman Empire. In 1224, when Seljuk-Shah was obliged to flee before the Mongols, they formed part of a body of 50,000 who quitted Khorezm, and emigrated westward. After Seljuk's death they became again scattered, but about 400 families attached themselves to Ertoqul, Seljuk's youngest son, who entered the service of Aladdin, the Seljuk viceroy of Konia. In reward for their services against the Mongols and the Byzantine Greeks, a considerable tract of Phrygia, which had been wrested from the Byzantines, was distributed among them as Seljuk vassals. Towards the end of the 13th century they found themselves strong enough to throw off the vassal age, and in 1289, headed by Othman, greatly extended their possessions by brilliant successes against the Greeks. Othman was succeeded by Orchan who, equal to his father as a warrior, surpassed him as a politician. In 1356 he took Bursa which he made his capital, in 1377, Nicomedia, and, in 1390, Brou, the strongest of the Byzantine frontier fortresses, and was soon master of Asia Minor as far as the Hellespont. Orchan's successes were owing not more to his military skill and the valor of his troops, than to the discipline which he introduced by the creation of Janissaries, Sipahis, and Zeleus, long the great supports of the Ottoman power. He assumed the title of Padiashah, a term of Persian origin, equivalent to *king* or *prince*, called the gate of his palace the "High or Sublime Porte," which has since become a common name of the empire which he founded and obtained in marriage a daughter of the Greek emperor Constantine. His son Soliman, who proclaimed him after giving great promise, was the first of his dynasty who obtained a footing in Europe by crossing over in 1357, suffering Gallipoli and Brestor and thereby obtaining the command of the Dardanelles. Orchan died in 1360, and was succeeded by his younger son Murad I, who, in 1382 made Adrianople his capital, and, conquering his conquests, was soon master of a large part of what now forms European Turkey. The great victory gained in 1389 over the united Albanians and Slavonian nations of the Danube, confirmed his dominions but cost him his life, and he was succeeded by his son Bayazet, who, in 1396, struck a blow at western Christianity, by the defeat of King Sigismund at Nicopolis, in Bulgaria, and reduced the Greek emperor to the degradation of paying him tribute. Shortly after Bayazet's career was suddenly stopped by Timur who completely defeated him at Angora, in 1402 and afterwards kept him prisoner for life. Timur divided the Ottoman territories among Bayazet's sons, but they again became united, in 1413, under Mohammed I, who, after making the empire more extensive than in the prosperous days of Bayazet left it to his son Murad II, whose numerous conquests and exploits were crowned by the subjugation of the Hungarian host in 1444. The most remarkable event in the reign of his successor Mohammed II, was the taking of Constantinople in 1453. His grandson Soliman I, by driving back the Persians to the Tigris, conquering Egypt, Syria, and Palestine, and making himself master of Mecca, gave still further extent and vigor to the empire, which, under his son and successor Soliman II, attained the magnificent, who succeeded in 1519, attained the summit of its prosperity. Even before his death, how ever, symptoms of decline became apparent, and under a series of successors, generally so deficient in his predecessors had been superior in talent, the downward progress has been very rapid. Unable to support its own weight, torn by internal dissensions, and completely preyed upon by formidable neighbor, especially Russia, it has lost provinces after provinces,

and is mainly indebted for its prolonged existence to the interference of foreign powers. The first sultan who, after a long period of dissension, endeavored to arrest the progress of decline, was Selim III, who introduced the European system into the army, and commenced many internal reforms, which, had he been able to complete them, would have consolidated his power. He failed, and was in consequence forced to give way to an insubordinate brother Mustafa, who, after becoming a traitor, was himself slain, and succeeded in 1808 by his nephew Mahmud II, the only surviving prince of the race of Osman. Occupying the throne without any rival to dispute it, and possessed of talents not unworthy of the earlier princes of his race, he endeavored to carry on the work of reform under rather favorable circumstances, but, as if the disease were too deeply seated to admit of cure, his reign ranks as one of the most unfortunate in Turkish annals. The only important service which he can be said to have rendered, was that of annihilating the Janissaries. His successor, Abdul Medjid, who ascended the throne in 1839 in his 16th year, has hitherto reigned with considerable success not so much, however, in consequence of his own talents, as from the support which he has received from foreign powers. By their direct interference the Pasha of Egypt, when on the eve of dismembering the empire, was driven from his Syrian conquests, and again reduced to vassalage; and now (1844) when a more formidable enemy has appeared in the Emperor of Russia, apparently imagining that the period for his long envied possession of Constantinople has arrived, an alliance happily cemented between Great Britain and France, at a time when it was deemed all but impossible, promises, by repelling and effectually crippling the aggressor not only to prolong the existence of the Turkish Empire, but to save the threatened liberties of Europe.

TURKHAL, a town, Asiatic Turkey, pass, and 60 m. N. W. from a bank Jedd Frank at the foot of an angular perpendicular rock, surrounded by an old castle. It consists of 800 or 900 houses, and its environs, as in the time of Strabo, are covered by fine vineyards, cultivated by Armenians and Greeks.

TURKHEIM a market in Bavaria, circle Swabia, cap. bull, 1 bank Wertach, 23 m. S. W. W. Augsburg, with a castle, two churches, an hospital, and Capuchin monastery, manufactures of linen, silk-works, and a trade in cattle. P. 1494.

TURKOS, Turkish name, or TURK a v. Austria, Transylvania 6 m. from Krassitz; with a Greek church. P. 1399.

TURLOUGH, par. Irel Mayo; 25,714 ac. P. 4516.

TURNA, TOURNA, or TURN, a town European Turkey Walachia, 1 bank Danube, a little below the confluence of the Alma, opposite Nikopolis, of which, till dismantled by the Russians in 1828, it was the site deposed. It is strong both by nature and art, and commanding the defile by which the Turks used to penetrate into the valley of the Alma, has been the scene of many battles. It was taken by the Russians in 1810 and 1829.

TURNAGAIN, an id. off Russian America, at the head of the more extensive part of Cook's bay, lat. 64° 5' N. lon. 150° 30' W. It is about 2½ m. long E. N. E. in W. N. W. and scarcely half that width. The beach by which the island lies diverges in a N. E. direction from the main inlet, and was called by Capt. Cook, Turnagan Bay, under the idea that it would prove to be a river. Its true character was ascertained by Vancouver, who called it Turnagan Arm.

TURNAVIN, par. Eng. Hereford, 580 ac. Pop. 70.

TURNAU, TURNAU, or TURNAU, a walled town, Bohemia, circle and 18 m. N. E. Buda, 1 bank Isar, which here divides into two arms, forms an island, and is crossed by a bridge. It has two churches, a ducal, Franciscan monastery school, and theatre, a bathing-establishment; manufactures of calico, numerous distilleries, and a trade in wool. Pop. 4493.

TURNEBES-PONDRE, par. Eng. Dorset, 1983 ac. P. 108.

TURNHAM-GAZON a hamlet, England, co. Middlesex, par. Chiswick, 5 m. E. S. W. London. It contains many handsome houses and has a modern district church in the form of a cross with a tower terminating in a lofty spire.

TURNHOUT, a town, and open, Belgium, prov. and 24 m. E. N. E. Antwerp, in an extensive plain. The houses are generally substantially built and form regular streets. There

are three parish churches, several chapels, a townhouse, hospital, prison, two orphan asylums, a mutual society, numerous religious communities, and an old castle now used as a court-house, manufacturers of linen, woolen, and cotton fabrics, coloured paper, playing-cards, candles, chocolate, earthenware, bristles, tobacco, vinegar, &c. Dyeing, bleaching, brewing, distilling, tanning, expelling oil, and refining salt, are also carried on. Pop. 18,483.

TUMNITZ, or **TUMNITZOW**, a market to Austria, Moravia, and 25 m. S.E. E. Brdian, near r. bank March, with a parish church and a school. Pop. 1355.

TURNWORTH, par. Eng. Dorset 1860 ac. P. 108. **TURO**, a vil. Hungary Hither Danube co. Treutshin, 6 m. from Silleau with a R. Catholic church, and a trade in timber. Pop. 1042.

TUROLUKA, a vil. Hungary, co. Neutra, in a plain watered by the Miava, and within 1 m. of the town of that name. Pop. 2499.

TURON, a vil. Spain, Andalusia, prov. and 58 m. S.E. Granada; with three squares, a granary which serves also as a townhouse; three fountains, two endowed schools, a parish church, and three brandy-distilleries. Pop. (aggr. estimate), 2603.

TURON, a maritime co. Assam, on a fine bay of same name; lat. 16° 7' 18" N. lon. 106° 13' E. (x) consisting of several villages, the largest of which has about 500 mean bamboo-houses, and a pop. of 2500. The bay is commodious and perfectly safe, and the town which was formerly a place of considerable trade, is defended by two forts.

TURRES, a m. Spain, Andalusia, prov. and 37 m. N.E. Almeria, N.W. skirts of the Sierra of Cabrer. It has broad and clean streets two squares, and in the centre of the town the ruins of a strong tower, a parish church, primary school, townhouse, and granary. Most of the inhabitants are engaged in husbandry; but there are also 40 looms for household linens, a manufactory of salt-petre, three oil mills, and seven flour-mills. Pop. 8300.

TURRIFF, a burgh of barony and par. Scotland co. and 80 m. N.W. Aberdeen, pleasantly situated, r. bank of a small stream of same name. The houses are substantial and well built, and most of them have a garden attached. There are numerous good shops, several branch-banks, a public library a most established and a Free church, an Episcopal and a dissenting chapel, and a number of schools, a handsome townhall and an ancient cross situated in the principal street. The spinning of linen yarn, and bleaching, weaving of linen and woollen cloth by handlooms, and the dyeing of woollens and silks, are carried on, but all to a very limited extent. Area of par. 21 800 ac. Pop. 3564.

TURSI, a m. Naples, prov. Basilicata 98 m. E.N.E. Lagugro. It is the see of a bishop, and contains a cathedral a collegiate, and a parish church, three monasteries, a university, a diocesan seminary and an hospital. Pop. 4630.

TURTLE—1. A bay coast of Africa, Lower Guinea, N. Little Fish Bay—2. A headland, N. Australia, W. side of Port Essington—3. An isl. Blight of Africa, lat. 3° 24' 18" S. lon. 5° 35' 45" E. (x)—4. A creek, U. States, Pennsylvania flowing into the Monacaheela—5. A river, U. States, an affluent of the Upper Mississippi—6. A lake, U. States, Huron territory, near the source of the Mississippi—7. An isl. Farjeo group, Pacific Ocean—8. An isl., 4 m. off E. coast ARIZ, lat. 14° 34' N. lon. 109° 9' E. (x) small and very little above water, but with a safe channel between it and the main—9. A group of three isl. Banda Sea; they are very low, covered with trees, and dangerous to approach in the night, being fringed by coral-reefs which project 2 m. or 3 m. from them; the inner R. lat. 5° 25' N., lon. 127° 28' E.

TURTON a vil. and township England, co. Leinster in a romantic district near the Blackwater, Darwen and Bolton railways, which has a splendid view, 4 m. N. Bolton. It has two churches, an endowed school, and extensive manuf. factories of cotton goods, and dye-works. Pop. 4168.

TURUKAI **TURUKAT**, or **TOROKAN** (anc. Thracian) a m. European Turkey, Bulgaria, on the last steep slopes of a hill above r. bank Danube, opposite Ohrida, and 37 m. W. by R. Silistria. It has strong batteries commanding the whole breadth of the river, and defending its approaches both from the E. and W., but consists for the most part of narrow dirty streets of shabby appearance. Its most conspicuous buildings are several large flour-mills and warehouses

connected with the Danube traffic. The military importance of Turukai is owing not merely to its natural strength, but to its position in the middle of the base of the triangle formed by the fortresses of Shumla, Silistria, and Rustchuk.

TURVY par. Eng. Bedford 3844 ac. Pop. 1098.

TURVILLE, par. Eng. Bucks; 2816 ac. Pop. 436.

TURWESTON, par. Eng. Bucks, 1940 ac. Pop. 332.

TURYASSU a river, Brazil. See **TURY** **TURY**, **TURK**, **TOROS**, or **TURK**, a vil. Hungary, Thaurer Theles, Upper, 12 m. S.E. Nagy-Sollos; with a Greek church. Near it are mines of gold and silver. Pop. 1709.

TUSA (anc. *Tusa*), a m. Sicily, par. Messina, 5 m. N.W. Mierista. It has a public square adorned with an ancient statue, and contains several other interesting antiquities. Pop. 8678.

TUSAPAN a vil. Mexican Confederation, dep. and about 160 m. N.W. Vera-Cruz. It is the site of an Indian city, supposed to have belonged to the Totonacs.

TUSALOUSA, a city U. States formerly cap. of Alabama, 1 bank river of same name, 171 m. N. by R. Mobile. It is regularly laid out in spacious streets crossing each other at right angles, and in the centre of a public square stands the state-house, a handsome structure. Other principal buildings are a courthouse, a U. States land office, four churches, a masquerade hall, an academy, a female seminary, a lyceum for boys, and the Alabama institute. The buildings of the university of Alabama are situated about 1 m. from the town. Pop. 1840.

TUSALOUSA, or **BLACK WATSON RIVER**, U. States, formed by the union of several streams in the N. of Alabama flows S.E.W. past the town of same name, and after a course of above 100 m. joins r. bank Tombigbee.

TUSCANY (anc. *Etruria* French, *Toscane*, Italian, *Toskana*) a prov. of the kingdom of Italy, formerly a grand duchy, and then bounded N. by the duchies of Parma and Modena and the Papal States E. and S. the Papal States W. the Tyrrhenian Sea and N.W. isolated parts of Modena, and Ravenna in the German States lat. 43° 15' to 44° 30' N. lon. 9° 12' to 12° 30' E. In the boundaries now described, the duchy of Lucca, situated in the N.W. and afterwards forming an integral part of the grand duchy is included but as they are usually described under separate heads, the remainder of the present article will be confined to Tuscany Proper the divisions of which, with their areas, population, &c., are exhibited in the following table—

DIVISIONS, AREA AND POPULATION OF TUSCANY

Province	Area sq. m.	Area sq. m.	Pop. 1861	Capital
Firenze	8	1708	923,018	Firenze
Livorno	21	897	293,743	Livorno
Pisa	28	890	227,719	Pisa
Siena	55	1163	158,088	Siena
Arezzo	43	869	218,363	Arezzo
Gravina	30	1496	177,391	Gravina
Leghorn with isl. Gorgona	3	99	66,354	Leghorn
Island of Elba and adjacent islands	6	73	31,971	Porto-Ferrajo
Total	—	646	6440	1,779,081

In addition to its territories on the mainland, Tuscany possessed several islands, of which by far the most important was Elba.

Physical Features.—In the E. Tuscany terminates nearly in a point, from which it gradually widens out both on the E. and W., till it attains its greatest breadth in the N. and then assumes a triangular form, greatest length, N. to S. 180 m. central breadth, 100 m. The coast has a length of about 150 m., and in the N. part consists of a long and nearly continuous sweep, terminating at one of its most conspicuous promontories called Piombino. The S. part, continued from Piombino by its termination in the still more conspicuous promontory formed by Monte Argentario, is broken into a number of small bays, of which the largest are those of Piombino, Grosseto, Orbetello and Porto-Ercole. The shore, though sometimes bold, is generally low, and lined by extensive swamps or *maremma*. The interior of the country is fairly diversified. The chain of the N. Apennines forms a considerable part of its N. boundary, and then turning S.E.E., traverses its N.E. portion. This chain sends out numerous ramifications, which extend in all directions over the country, and leave in

the intervals between them, valleys of greater or less extent, distinguished alike by their fertility and their beauty. The Arno, the largest and richest of these valleys, occupies nearly a sixth of the whole surface. None of the principal heights of the Apennines are situated in Tuscany which has its culminating point of about 4500 ft. in Monte Luogo, on the borders of Modena, E. of Monte Cimone. The other summits are generally no much lower than the average height has been estimated not to exceed 1900 ft. The whole surface belongs to the basin of the Tyrrhenian Sea, with exception of the small source on the N. E. side of the Apennine chain, which belongs to the Adriatic. In the latter the streams, which are very numerous, but so small as never to lose their character of mountain torrents within the Tuscan territory have all a N. N. E. direction; in the former a secondary water-shed formed by a ramification of the Apennines, which crosses the country from E. to W., sends the waters on each side of it in opposite directions. The N. side is almost wholly drained by the Arno, which commencing its course very circuitously, flows, though not without considerable deviations, nearly W. to the water on the other side are received by several independent streams, all of which, with exception of the Cecina, whose course is nearly parallel to that of the Arno, flow S. Of these latter streams, the most important are the Tiber which, however, only commences its course in Tuscany; the Fiora and Albegna, which drain the S. and the Ombrone, which commencing near the centre, and deriving its supplies from numerous tributaries, is second only to the Arno.

Geology.—The far greater portion of the strata belong to the upper part of the secondary formation, and are usually classed as carbonaceous, being composed of limestones with nummulites and bryozoa, and of interstratified sandstones containing numerous fossils. These carbonaceous strata are very largely developed both in the N. and S. but are separated or rather partially overlain by a broad belt, composed chiefly of marls, travertine, and sandstones, belonging to the tertiary formation. An earlier tertiary series appears to the S. and W. of Volterra, and is penetrated in numerous places by plutonic rocks, consisting for the most part of serpentine, and apparently forming the great mass or nucleus on which the other strata lie. The most remarkable development of volcanic rocks is in Mount Anagni, and a portion of the country immediately surrounding it. Here trachyte, basalt, and volcanic tuffs are common. The oldest formation which occurs is near the W. coast, between Grosseto and Castiglione, where a space nearly of an oval form is occupied by siliceous rocks and the most recent formation in the place extending along the shore from Leghorn to Pisa, and to some distance inland, and occupied by deep beds of diluvial gravel and alluvium.

Climate.—The climate is on the whole one of the best in Italy. So far as the principal chain of the Apennines extends, the cold in winter is necessarily often severe and in the low flats along the shore and near it a worse evil is felt, where in summer the air becomes charged with the pestilential vapours of the Maremma but with these exceptions, there are few if any countries which can boast of a milder temperature, and a more salubrious atmosphere. In January the thermometer marks 37° and in August 90° Fah. Cases of longevity are of frequent occurrence, and the annual mortality never so high as 1 in 25, which does not exceed 1 in 40 of the population.

Vegetation and Agriculture.—In such circumstances, vegetation has most of the advantages which climate is able to bestow. The lofty barriers of the Apennines exclude the keen blasts of the North, and when heat and drought become excessive, the numerous streams afford an easy means of compensating for any deficiency of natural moisture, by means of irrigation. To these advantages, Tuscany adds that of a generally fertile soil. Some of the loftier summits, indeed have a bare and arid appearance, but in general all the land which from its elevation or position, cannot be brought under cultivation, is covered with forests of natural pasture. These, nearly equal to each other in extent, share between them rather more than a half of the whole surface. Of the remainder nearly one-half of the available land is arable, one-third in vineyards, and one-sixth in olive-yards, orchards, gardens, and meadows. On the arable land, the favourite crops are maize and wheat. Of the latter a peculiar species is cultivated solely for the straw. In the low flats a good deal of rice is grown. The principal subsidiary crops are

barley, rye, and pulses. The grain produced falls considerably short of the consumption, and is supplemented partly by imports, which among the lower classes are much used for food, and partly by importation, chiefly from the Black Sea. This deficiency of produce, where climate and soil are so favourable is mainly the result of the small proportion of the land under grain-crops, and of the vicious system of agriculture carried on, keeping the produce greatly lower than it might otherwise be. Each occupant has only a minute portion, seldom exceeding a few acres, and he cultivates it on what is called the *metecoro* system, under which he gives little more than his labour, and shares the produce with his landlord. The inevitable tendency of such a system is to perpetuate old routine. Accordingly, in Tuscany as in other countries where the same system is pursued, the implements are of the most imperfect description, the rotations generally proceed on the principle of deriving the largest amount of present produce, without reference to future productiveness, and the farmer, in regard to all his views, feelings, and habits, is nearly a peasant. All that preserving industry can accomplish, in farming is to be seen in every part of Tuscany, but the skill necessary to guide industry and secure its most valuable results, is very seldom witnessed. The culture of the vine is next in importance to that of grain and displays the same combination of great industry and defective skill. In many parts where the hills are naturally too steep, they have been laid out in artificial terraces, on which the vines thrive admirably and yield abundant produce. The quality is not often bad, but at the same time, is seldom so superior as to rank high and create a large demand. Old vines are more abundant than excellent, though that of Pisa and one or two other towns is well known in commerce. The rearing of silk-worms occupies far less attention than it deserves, though the annual produce of silk is estimated at not less than 250,000 lbs. The grass-land is not carried to much perfection in Tuscany. Artificial meadows are not extensive, and the number of cattle kept is comparatively small. Oxen and buffaloes are almost the only animals used for draught, and horses are of a very inferior description. Asses, on the other hand, which are kept in great numbers, are considered the best in Italy. Sheep and goats are also numerous, the former very inferior, with a coarse wool, fit only for inferior purposes, the latter superior, and yielding a milk which is much used in making a highly prized cheese. Large herds of swine roam at will, and feed on the mast of the forests. In the neighbourhood of L. a large establishment and breeding-stead of camels is kept.

Minerals.—The minerals are more varied than valuable. They include copper, iron, silver, antimony, lead, generally in too small quantities to be worked to much advantage, iron of excellent quality found partly on the mainland, but to a much larger extent in the lake of Elba, where it has been advantageously worked for ages. Borax obtained in large quantities from a remarkable series of lagoons to the S. of Volterra salt, the produce chiefly of brine springs in the same locality sulphur, alum, nitre, and several varieties of beautiful marble, among others that of Siena, well known throughout Europe.

Manufactures and Trade.—The manufactures employ few large establishments in which machinery is employed, but are for the most part the produce of manual labour, carried on by individuals in their own homes. They consist chiefly of straw-plait and straw-hats, in the preparation of which Tuscany has long been pre-eminent, silk goods, woollen cloth, woollen coats, carpets, hangings and linen cloth iron and copper ware, glass and earthen ware, soap, leather, saddlery, paper, hair, and a great variety of articles in coral, stone, mosaic, marble, and alabaster. The trade is almost wholly centred in Leghorn, but is also shared to a small extent by Livorno and Porto-Ferrajo. The chief exports, in addition to several of the above articles of manufacture, are oil, timber, shagreen, raw and spun silk, potash, bladders, cheese, honey, wax, gold coins, tallow, &c. The imports, colonial produce, wools, and cotton goods, dyest-wood, hardware and earthenware, salt-fish, &c. Accounts are kept in *loti*, nearly equal to 5d. sterling and divided into 20 *centesimi*, which is again subdivided into 12 *denari*. The principal measures are, for length, the braccio, about 2 ft., for surface, the *secco*, nearly an acre, and subdivided into 650 *pertiche*, for area, the *stajo*, about 2 of a bushel, and the *mezzo* = 25 *staj*, and for liquids,

the bottle, which, for wine, is equal to 10 Imperial gallons, but for oil only 7½ gallons. The Tuscan is nearly equivalent to our Troy lb.

Government, Religion, Education, &c.—The government is an absolute monarchy. It is divided into the five departments of the Interior, Justice, foreign affairs, ecclesiastical affairs, public instruction, and war, each presided over by a minister of state, who owes his appointment and is accountable only to the grand duke. Justice is administered by 14 courts of first resort, which judge in all cases where the value exceeds 400 lire, and have a power of reviewing all the decisions of inferior judges, who are competent only in cases of smaller amount. The supreme court or Corte Reale sits in Florence, and has a general equitable jurisdiction over the whole grand duchy as well as a direct power of review in all cases exceeding the value of 800 lire. It consists of a president, four vice-presidents, and 16 councillors, and five of these, including a president or vice-president, are necessary to form a quorum. Trial by jury is unknown, and in penal sentences there is no appeal. Punishments however, are generally mild and crimes are neither numerous nor of an aggravated character. Almost all the inhabitants are R. Catholics, who are governed by three archbishops and 17 bishops, and form the Established church, but the principles of religious toleration are well understood, and till lately (1852-4) when the spirit of persecution appears to have regained its ascendancy Tuscany had greatly honoured herself, and added to her prosperity, by giving effect to them in the case of Jews, and others, long before they were recognized in other countries. A large sum is annually expended on education, and elementary schools are very generally established but a very large proportion of the population remains uneducated. Superior schools exist in all the larger towns, and both Rome and Pisa have universities. The latter, once celebrated over Europe, is still in high reputation, though the number of students is under 600. There are numerous learned societies and literary establishments, whose labours are well known, and have procured Tuscany an honourable place in the annals of literature. The Italian spoken by the educated classes has long been admitted to be the standard of purity though Rome claims a superiority in pronunciation. The people generally have fine physical forms, and bear a high name for industry, sobriety and honesty, but in some of the larger towns female vice is not to be highly honoured. The revenue, amounting to about £1,200,000 is derived chiefly from customs, and the monopolies of salt and tobacco. Nearly one-sixth is obtained by a land-tax and the lottery furnishes a considerable item. The expenditure exceeds the revenue, but the amount of debt is not necessarily known. The army amounts to 14,728 men. The commercial shipping amounts (1858) to 911 vessels of all sizes, the far greater part of them under 50 tons. The whole tonnage is estimated at 87,506.

History.—Tuscany embraced the far greater part of ancient Etruria, and was inhabited by a people who had early made great advances in civilization, and were divided into 12 tribes, each headed by a king or *hectemon*, and all confederated together for mutual defence. The most celebrated of these kings was Persenna, who entered into a league with the Tarquins, and in order to restore them had siege to Rucca Etruria at last shared the common fate of all the other Italian kingdoms, and was finally subdued by the Romans about 580 B.C. From the Romans it passed first to the Goths, next to the Lombards and then to Charlemagne, who gave it to his counts. These, under Louis-le-Debonnaire, took the name of Marquis, and continued to govern as vassals of the empire till 1150, when the last of them, Guelph VI., sold his marquisate to the emperor Frederick I. His successors partitioned it out into a number of small fiefs. Meanwhile the cities of Florence, Pisa, and Siena acquired importance, and became each the nucleus of a celebrated republic. After numerous dissensions, the whole of Tuscany became united, in 1567, under the Medici family the second of whom, Cosmo I., assumed the title of Grand Duke. Under the Medici, who greatly distinguished themselves by their patronage of literature and art, it rose to great celebrity, and possessed one of the most brilliant courts of Europe. In 1737 the family of Medici became extinct, and the grand duchy passed to the Duke of Lorraine, who, by his marriage with Maria Theresa, succeeded, in 1745, to the throne of Austria. His successors, among whom the

Grand Duke Leopold deserves special notice, for his ability and wisdom with which he governed, retained uninterrupted possession till 1801, when Bonaparte, to compensate the Princes of Parma for territories of which he had deprived it, ceded Tuscany to his favour into the kingdom of Etruria, but shortly after incorporated it with his kingdom of Italy. In 1814 it returned, with its old title of Grand Duchy, to the Archduke Ferdinand, a brother of the Emperor of Austria, and in 1859 was absorbed into the new kingdom of Italy.

TUSCARAWAS, a river U. States, rises in the N of Ohio, pursues a very circuitous course S E S for above 100 m., and enters with the Walhonding river in forming the Mississippi.

TUSCHKAU-ODER-MISS, or **TAMSKOW** a tn. Bohemia, circle and 6 m. W N W Pilsen on the Missa, with a church and townships. Pop. 1000.

TUSCUMBIA, a vill., U. States, Alabama, 111 m. N by W Tuscaloosa, on the Memphis and Charleston railway with three churches, four seminaries, and an iron-foundry. Pop. about 2300.

TUSKAR, or **KRA**, a river Russia, rises on the S frontiers of Gov. Orel, joins Gov. Kursk, and a little below the town of Kozm, joins r. bank Sum total course, 90 m.

TUSMORRE, par. Eng. Oxford. Pop. 52.

TUSPAN, a seaport N. Mexico, dep. and 140 m. N N W Vera-Cruz. 1 bank Tuspan, at its mouth in the Gulf of Mexico. A few of the houses are of stone, but the far greater number of adobe with earthen floors. The trade, which is considerable, is carried on partly by canoes with Tampico, through the Laguna de Tamiagua, but chiefly in small craft with Campeche. The bar across the river does not admit vessels drawing more than 5 ft. or 6 ft. Superior furs and small quantities of excellent mouchous are collected in the neighbourhood. Pop. about 1000.

TUSFERN aul off W coast, Norway, lat. 63° 10' N, lon. 8° E about 7 m. N E Christianstad; greatest length, N E to S W about 12 m.; mean breadth, 4 m. The coast is much indented, and the interior is mountainous.

TUTBURY, a large vil., formerly a market in England, 20 and 18 m. N E Stafford about ½ m. from r. bank Dove, here crossed on excellent stone-bridges. It has a large and handsome Established church and three Dissenting chapels, an endowed school, and a large infant-school a cotton-mill and some glass works in the vicinity, and some nail making is carried on. The ancient castle of Tutbury originally built in the time of William the Conqueror, has long been a mere ruin. Mary Queen of Scots was for some time imprisoned in it. Arms of par., 4001 s. P. 1798. —(Local Correspond.)

TULIGORIN a tn. Hindostan, near R.E. extremity of the Caracat, dist. Timnavally 70 m. N E Cape Comorin on the Gulf of Mincar with a mch. residential and good anchorage. It has a considerable trade in shipping outfit, and near it are pearl-banks.

TUTOYA, a tn. Brazil prov. and 160 m. from Maranhão, 1 bank Tutoya which forms the most W branch thrown off by the Paranaíba. It contains an old parish church, and a well situated for trade having a harbour in which small vessels are completely sheltered, lying on the deepest and most frequented of all the entrances to the Paranaíba.

TUTSCHAP or **TUGAR** a vill. Bohemia, circle Tabar with a church, a castle, manufacture of potash and a saw and flour mill. Pop. 1123.

TUTTLINGEN, a tn. Wurtemberg circle Schwarzwald, cap. hall r. bank Danube, 43 m. E. Freiburg with two churches a house of refuge for destitute children, and manufactures of woollen, linen and silk goods, honary glass, paper, cutlery, and nails, several breweries, and bleaching-works. P. 5160.

TUTUILA, or **TOOTOO-ILLAN**, one of the Navigator Islands S Pacific lat. (N. extremity) lat. 23 S., lon. 170° 45' W. It is high broken, and of volcanic appearance, 17 m. long, greatest breadth, 5 m., lowest peak, 2277 ft. high. The spurs and ridges that form the highland are precipitous, sharp-edged, and frequently rise from the water to a height of 800 ft. or 400 ft. It is thickly settled round the shores, and particularly at its S.W. end, where is a large and flourishing village, called Soona, reckoning 10,000 inhabitants. This end is lower and more easily cultivated than the N., which is high and rugged. The only communication is by the sea.

above, the hills being too precipitous and difficult of ascent to pass over. It has many desirable pastures or lays on its N. side, where there is much valuable wood, water, and supplies. The best and richest part, however, is the Pargana, on its S. side, which affords a rich harvest for cereals in autumn, and where supplies may be obtained in abundance. This harvest is usually reaped on all sides by innumerable rural populations, 800 N. to 1000 N. high. The climate is mild and agreeable.

TÜTE, or **TUCUZA**, a tn. Prowala, prov. W. Prowala, gov. Marwar, on three lakes, in a narrow valley, 28 m. S.E. of Durgam. It has two churches, and a trade in cattle. P. 1378.

TUXFORD, a market tn. and par. England, co. and 23 m. N.N.E. Nottingham, on a considerable activity. It has handsome parish church, and Wesleyan and Independent chapels, an endowed school, occupying an elegant Elizabethan building, an infant and three private schools. Area of par. 8000 ac. Pop. 1211. (Local Correspondent.)

TUXTLA, a tn. Mexican Confederation, state Chiapas near J. bank Tehuacan, 87 m. W. Ciudad Real with a trade in tobacco and cane. Pop. 5000.

TUY (anc. *Tud of Fines*), a city Spain, Galicia, prov. and 28 m. S. Pontevedra, a bank Minho 18 m. from its seaport. This was once an important frontier town, but it is now in a declining state. It is regularly built, and walled round, with a square, and a canal, paved streets, and has a town-hall, prison, hospital, palace, barracks, theatre, several primary schools, and establishments for the higher branches of education, cathedral of good architecture, the churches of the suppressed Dominican and Franciscan convents, serving as chapels of ease, and a Franciscan monastery. Agriculture, flour-mills, a large manufactory of linens and nappies for home consumption, and another for dressing leather are the chief branches of industry. Pop. 4048.

TUY, a river Venezuela, rises about 80 m. S.W. Caracas flows E. through the valleys of Araya, Trinita, Cumana, and Santa Teresa, and falls into the Caribbean Sea 20 m. S.E. of Cape Codera; total course, about 100 m.

TUZ-GHEUL — (for Temonten-see) A lake Chinese Empire, in the S.W. of Songring, lat. 42° 30' N. and between lon. 77° and 79° E. Length 90 m. breadth, 30 m. — 2, See TUSA.

TUZKURMATI a tn. Asiatic Turkey Kurdistan, pass and 100 m. N. by E. Baghdad is an extensive plain on an affluent of the Tigris, at the foot of a mountain-chain. It is succeeded by gorges, and consists of about 400 houses.

TUZLA, **TIG**, or **TUZ-GHEUL**, or **SALATO** (anc. *Palus Tettensis*) a multi-lake, Asiatic Turkey pass Kars, 70 m. N. by E. Kars, greatest length E.S.E. to W.W.W. 56 m., extreme breadth, 10 m. It lies 2500 ft. above sea-level; has no outlet except in the rainy season, when its surplus waters are discharged by a channel into the Kizil Irmak. It is of variable size, and in summer is almost completely dried up, leaving in its bottom a coating of salt, which supplies the wants of the surrounding country.

TUZLA, a river, Asiatic Turkey Asia, descends from the S.W. slope of Mount Ida; flows first W. & W., then W. & W. and falls into the archipelago at Nicosia, after a course of about 50 m. There is another river of same name in pass. Erzeroum, which rises in the Akdag, and after a course of about 80 m. joins the Mæand branch of the Euphrates.

TVER, a gov. Russia, bounded N.W. and N. by Novgorod, E. by Yaroslavl, S.E. by Vladimir, S. by Moscow and Smolensk, and W. by Pskov, greatest length N.E. to S.W. 230 m. greatest breadth 150 m.; lat. 56° to 58° 50' N.; lon. 31° to 38° 10' E. area, 19,632 sq. m. The surface is the S. though nowhere mountainous, rises a considerable elevation, but slopes gradually towards the N., and finally merges into an extensive plain. It is watered by numerous streams, of which the principal is the Volga. To the basin of this river receiving the drainage either directly or by its tributaries Tverin and Malaya, the whole of the government belongs, with exception of a small portion of the S.W. drained by the Meta, and a still smaller portion in the S.W. by the Divna, which commences its course within the government, and, as well as the Meta, belongs to the basin of the Baltic. The climate is tolerably temperate, and the air generally pure and healthy. The soil is only of indifferent fertility and the quantity of corn raised in ordinary years barely suffices for the home consumption. The principal crops are rye and barley; hemp

and flax are generally cultivated. Domestic animals are not numerous, and the breeds are generally inferior. A considerable part of the surface is occupied by wood, consisting principally of birch, beech, and pine, with only a little oak. Distillation is carried on on a large scale, and forms the principal branch of industry. The admirable position of the govern. about between the two capitals, and the great system of water-communication which diverges from it as from a common centre, give it a very important transit trade. It is divided into 12 circles, of which that of Tver is the capital. P. 1397 900.

TVER, a tn. Russia, cap. of above gov. beautifully situated in a wide plain on the Volga, which here receives the Tverin on the left and the Tzanka on the right, and is crossed by a long bridge of boats, 98 m. N.W. Moscow. It consists of the Kremlin or fortress, surrounded by an earthen wall, the town proper, divided into four quarters, and a suburb and occupies a large space, but has an insalubrious, and in some parts an almost desolate appearance. The far greater part of the houses are of wood, and are built with considerable regularity partly in large squares, and partly in spaces, and generally though not always, paved streets. The principal edifices include 20 churches, one of them a large Gothic cathedral, and many others adorned with lofty spires and gilded domes, an imperial palace, an episcopal palace, town-houses, court-houses, a distant museum, a gymnasium, and other schools, a handsome governor's house, two monasteries, an infirmary, a foundling and several other hospitals. The banks of the river are lined with spacious quays, which form the principal promenade. The manufactures consist of linen, silk, cloth, cordage, hats, bells, oil, vinegar, earthenware, tallow and wax candles, and there are numerous dye-works, breweries and distilleries. The admirable position of the town secures to it a valuable transit trade, particularly with St. Petersburg and Moscow in corn, hemp, iron salt-bath, caviar &c. Tver has been recently ravaged by fire and plague. V. (1849) 14,143.

TVERTZA, a river Russia, issues from a small lake in gov. Tver flows first easterly N.E., then S.E. to Tver within which it joins the bank Volga, after a course of about 120 m. It has been rendered of great navigable importance by the construction of the canal of Vladimir Volotsk, which connects it with the Meta, and thus gives an uninterrupted communication between the Volga and the Neva.

TWAEDAGORA, a tn. Prussia, See *Prussia*. **TWEED** a beautiful river, Scotland, rises in S. of co. Peebles, flows N. to the town of Peebles, then E. to Melrose afterwards E. by N. passing Kelso and Coldstream, from which it proceeds N.E. and falls into the German Ocean at Berwick. Area basin, about 1870 sq. m. Its principal tributaries are the Etrick, Gala, Leader, Teviot, Tyne, and Adder. The salmon-fisheries of the river are of very considerable value and importance. Entire length, including windings, upwards of 100 m. It is not navigable for any distance from the sea.

TWEEDDALE, the co. of Peebles (which see) **TWEEDMOUTH**, a vil. and par. England, in a detached part of the co. Durham, on a bank rising opposite Berwick, of which it forms a suburb and with which it is connected by a stone bridge. It has a neat church, two Presbyterian chapels, and a large iron-foundry. Area of par. 5140 ac. Pop. 6716.

TWEEDSMUIR, par. Scot. Peebles; 8 m. by 6 m. P. 220.

TWILLLO, a vil. Holland, prov. Gelderland, 20 m. N.E. Arnhem, a large good looking place, with a church and school. Pop. (agricultural), 1193.

TWELVE-PINN, a group of mountains, Ireland. See *IRELAND*.

TWENTY-FOUR PERGUNNAHS, a dist. British India, presid. and prov. Bengal, lat. 21° 05' to 24° 45' N.; lon. 88° 6' to 89° 45' E.; extending from the Dunderbunds on the N. to the Gut. Nadim on the N. separated on the W. by the Hooghly river from the dists. Hooghly and Midnapore, and on the E. by another arm of the Gangetic from the dist. Jessore. Area, 1188 sq. m. The whole surface is a level tract. Almost every description of Asiatic, with some European products flourish. Cocoa nuts and oil, ginger, turmeric, yams, hemp, honey, wax, hides, horse skins, and a few of the Indian staples are the main articles of the trade, which is chiefly conducted at Calcutta, that city, with its suburbs, being located on the E. by this district. Many of the inhabitants are native Christians, and there are numerous Protestant and some R.

Catholic schools. Alipore, the cap., is a suburb of Calcutta. The surroundings of Dum-dum and Barrackpore are in the 'Twenty-four Parganahs', or cantons, which, however now consist of only eighty-six having been transferred to other districts. Pop. exclusive of Calcutta, 388,000.

TWERTON, par Eng. Somerset, 571 ac. P 9958.

TWICKENHAM, a villa, par Eng. Kent, co. Middlesex, 1. bank Thames, opposite Richmond, with which it is connected by a handsome stone-bridge. Pope, the poet, resided here. The village itself has nothing attractive about it, but the vicinity is beautified by numerous fine villas and pleasure-grounds. Area of par, 2349 ac. Pop. 6264.

TWINEHAM, par Eng. Sussex, 1908 ac. Pop. 345.

TWINEILL (St.), par Wales, Pembrokeshire, 1858 ac. P 810.

TWINING, par Eng. Gloucestershire, 8155 ac. P 1011.

TWINSTEAD, par Eng. Essex, 1008 ac. Pop. 207.

TWISS, a maritime co. of W. Australia, 50 m. long E. to W., and about 80 m. broad, traversed N. to S. by two mountain-branches, that subsequently unite in the Darling range. A large portion of the W. part of the county consists of open forest-land of a sandy character.

TWITCHEN, par Eng. Devon, 2918 ac. Pop. 208.

TWO BUILT (T. of London or Thames). See NARVA.

TWOWOLD BAY, New S. Wales, 80 m. S.W. Sydney and 80 m. N. Cape Horn, lat. 37° 5' S., lon. 150° E. It is a good harbour, and possesses excellent anchorage. On its shores are Boyd Town and Eden. It is the general place of call for the steamers regularly plying along the coast, between Sydney and all the settlements to the S., both in Australia and Van Diemen's Land.

TWOMBLEBORRIS, par Irel. Tipperary, 11,940 ac. Pop. 2601.

TWYCKAL, a villa, France, prov. Silésie, gov. and S.S.E. Oppeln, with a church, chapel, and saw and flour mills. 1. 1071.

TWYCRESS, par Eng. Leicester, 1850 ac. Pop. 805.

TWYFORD, a villa and wapentake England, co. Berks, on the Great Western railway, which has here a station 8 m. S.W. Maidenhead. It is a large and well built place, with an independent chapel, an hospital and large silk mills and is memorable for the battle fought in 1088 between the adherents of James II. and the Prince of Orange.

TWYFORD, four par. Eng. — 1, Leicester, 2420 ac. Pop. 526 — 2, Norfolk, 500 ac. Pop. 3 — 3, Sussex, 4110 ac. Pop. 848 — 4, Hants, 4219 ac. Pop. 1279.

TWYNHOLM, par Scot. Kirkcubright, 9 m. by 2 P 782.

TWYNWELL, par Eng. Northampton, 1400 ac. P 298.

TYBEN or TYBAN (Italian, Domo) a seaport in Austria, Illyria, 3 m. from Trieste, with a small harbour. It was once walled, and otherwise fortified but is now of little importance.

TYCOKTOW, an mt. Chin. prov. Quingong, in Canton river, at the entrance of the Boce-Tigris. It is about 8 m. long by 8 m. broad.

TYDD, two par. Eng. — 1, (St. Giles), Cambridge 4691 ac. Pop. 932 — 2, (St. Mary) Lincoln, 4845 ac. P 1107.

TYDEWELL, par Wales, Carmarthen, 2341 ac. P 456.

TYFARNHAM, par Irel. Westmeath, 1619 ac. P 252.

TYKOCZYŃ, a town Russian Poland, 1. bank Karw, in the midst of marshes, 18 m. W. N.W. Hlyastok. It is tolerably well built, with well-paved streets, has three churches, a convent, school, and a trade in corn. Pop. (1841) 4881.

TYLLERLEY, or TYLMARSH-COM-SEACREASY, a villa and township, England, co. Lancaster, 10 m. W. N.W. Manchester, with a handsome church, two Methodist chapels, manufactures of cotton goods, both by hand-weaving and power-looms, and several large spinning-mills, which employ the greater part of the inhabitants. Pop. 4718.

TYNAGH, par Irel. Galway, 12,455 ac. Pop. 8086.

TYNAN, par Irel. Armagh, 17,048 ac. Pop. 7802.

TYNE, a river, Scotland, rises in the Botten Hills, in S.E. of co. Edinburgh, enters on Haddington flows E.N.E., passing through the town of that name, and after a course of about 80 m., falls into the German Ocean, 8 m. N.E. Dunbar.

TYNE (Tana) two rivers, England, called respectively the S. and N. Tyne. The S. Tyne rises in the most E. corner of Cumberland, and flows N. to within 8 m. or 4 m. of Haltwhistle, when it takes an E. direction, and having been joined near Hexham by the N. Tyne, the united stream passes Newnham, and falls into the sea between S. Shields and Tyne-

mouth. The whole course of the river taking the S. branch, is about 80 m. The N. Tyne rises on the S.W. border of Northumberland, near Carter-Fell, whence it flows S.E. and S.E.E., still it falls into the S. Tyne, a little above Hexham. These rivers flow through a country of mountain-heaths and barren unsucculent wastes.

TYNEHAM, par Eng. Dorset, 3915 ac. Pop. 376.

TYNEMOUTH, a villa and par England, co. Northumberland, at the mouth of the Tyne, and on the Newcastle and North Shields railway in the immediate vicinity of North Shields of which it may almost be considered a continuation. It consists chiefly of two parallel streets one of them spacious, and containing several handsome houses, and has an elegant cruciform church, with a tower terminating in a spire, a Wesleyan chapel, several schools, a harbour, in the form of a basin, inclosed by a rocky amphitheatre; a chalybeate-spring, manufactures of ropes, a weekly market, and four annual fairs, chiefly for cattle. Tynemouth, having both baths and a fine sandy beach, is much frequented for sea-bathing. It is supposed to have had a Roman station on the peninsula now occupied by its picturesque old castle, which, rising abruptly from the river, has a most striking and imposing appearance, and is also rich in historical recollections. Area, 7293 ac. Pop. (1851) 80,524.

TYNROB, par Scot. Dumfries, 12 m. by 8 m. P 483.

TYRINBAN, the most E. and largest mt. of the Madji oocamah group, between Formosa and the Loo-choo Archipelago, lat. (S point) 24 45' N., lon. 125° 28' E. (n.) Length, 30 m. greatest breadth 10 m. It is surrounded by a dangerous reef on the N. and N.W.

TYRANA, a city European Turkey, Albania, 15 m. N. by W. El Basan. It is a wretched place, but is celebrated for its beautiful mosques and spacious market-places — (Lear's Journal on Albania and Hyrie).

TYRL or TUR, a seaport in Asiatic Turkey, near the N.W. frontiers of Palestine, on a peninsula in the Levant, 100 m. N.N.W. Jerusalem. It is entered from the mainland across a sandy tract, and contains a considerable number of houses a few of which are of respectable appearance, while the great majority are mean and unsuited. The population is supposed to amount nearly to 5000, composed of about equal numbers of Christians and Muslims, with a small sprinkling of Turks and other orthodox Moslems. There is a fishing river with a harbour so shallow as to admit only fishing-boats, as all that now stands to represent the magnificence of ancient Tyre, the crowning city, whose merchants were princes, whose traffickers the home-owners of the earth' (Isa. xliii. 5. Euseb. xxiiv.) The only monuments of any extent are the ruins of the old cathedral, and two large pillars of red granite once incorporated with it, though probably belonging originally to a much more ancient building, but the chief interest of the place is in its desolation by which several scriptural prophecies have been most exactly and circumstantially fulfilled.

TYRELLA, par Irel. Down, 1899 ac. Pop. 762.

TYRIA, or TIRUS, a town in Asiatic Turkey Anatolia, 4 m. S.E. Smyrna, on a scabrous Mount Tmolus. Numerous mosques, with their minarets and minarets, interspersed with fine trees, unite to give Tyria an appearance of wealth and importance which it does not possess. It is supposed to occupy the site of ancient Tyrochus.

TYRKE, par Scot. Aberdeen, 10 m. by 4½ m. P 2880.

TYRINGHAM, par Eng. Bucks, 1784 ac. Pop. 188.

TYRNAU, a walled town, Hungary, co. and 27 m. N.E. Frensburg, in a fertile plain on the little river Trnava. It has a Protestant, a Greek non-united, and nine K. Catholic churches, a lyceum, gymnasium high school, house of invalids, an infirmary with a lunatic asylum attached; an Ursuline monastery, a military school, manufactures of woollen and linen cloth, and a trade in wine and wood. Pop. 6880.

TYROL, or TIROL, with Vorarlberg, a prov. Austrian dominions, on the S.W. frontiers of Germany lat. 48° 40' to 47° 41' N. lon. 9° 30' to 12° 30' E. the W. portion, to the sources of the Rhine, forming Vorarlberg, and the E. portion Tyrol proper. It is bounded, N. by Lake Constance and Bavaria, E. Salzburg and Illyria, S.E. and S. Austria Italy, and W. Switzerland and the principality of Liechtenstein greatest length, from Lake Constance to the extre-

city of the Festsattel, 165 m. greatest breadth, S.W. to N.W., 167 m. area, 8366 sq. m. It is mountainous throughout, and is regarded as magnificent of scenery in second only to Switzerland, of which it may be regarded as a continuation. The Alps, entering it from Switzerland, stretch across S.W. to E. in three nearly parallel chains. The loftiest of these is the Rhetian Alps, which, occupying the western, divide the country into a N. and S. portion. In this chain are situated Mount Cristler, the culminating point of the Austrian Empire, 12,930 ft., and the Gross-Glockner, 12,560 ft. The second parallel chain, situated in the N. not far from the frontier, forms the Tyrolina or Graun Alps, and the third chain, to which the name of the Trent Alps is sometimes given, extends round from the Lake of Garda, and continues E. till it becomes linked with the Carle Alps. All these chains descend very abruptly on the S. side, and form short lateral valleys, but on their N. sides generally descend gradually by parallel terraces, the spaces between which are occupied by long longitudinal valleys. Many of the summits are capped with perpetual snow; and glaciers, to the number of 60, covering in all a space of about 130 sq. m., descend into the valleys to the level of about 4000 ft. The most remarkable of these glaciers are the Oetzthal, Seilthal, and Dra. Notwithstanding the height of the chains, the Tyrol has several of the lowest passes in the Alps. The celebrated Brenner Pass is little more than 4000 ft. above sea-level. The other principal passes are the Malsertal, Timbajoch, Arlberg, Sillberg, Achen Pass, and the pass near San Pellegrino. The loftiest of all the passes is the Sillberg or Wormsberg. The prevailing rock in these mountains is granite, which usually forms the crest of the chain. On the opposite sides of it there is generally a considerable difference of geological structure. On the S. slopes primitive schists and limestones overlie the granite on the N. slopes the rocks are almost entirely calcareous. At lower elevations a greater variety of rocks appears, and in some localities of which the Festsattel is the most remarkable example, almost all the great formations of Europe may be seen in miniature. The principal chains mentioned above form three principal valleys—the Isenthal, Etschthal or Adige valley, and Festsattel. Into these a vast number of minor valleys open, and thus, though no proper plains occur, large portions of the surface become flat enough to be placed under regular culture.

The drainage is divided between the basins of the Rhine, the Danube, and the Po. The first, forming part of the N.W. boundary is confined to that locality and receives only the waters of the Voralberg in part directly, and in part by the Ill and the Brigant, the latter through the medium of the Lake of Constance. A much larger share of drainage is received by the Danube, whose important tributary the Inn, traversing the celebrated valley of that name, inclined on the S. by the Rhetian, and on the N. by the Tyrolina Alps, receives from both chains, but especially from the former numerous torrents and streams, fed by perpetual snow and glaciers. Another large supply sent to the Danube proceeds from the S. side of the Rhetian Alps, where the waters of the E. part of the Festsattel, and of a number of lateral valleys, go to augment the Drava. The Adriatic receives its share chiefly through the Etsch or Adige. None of these rivers, except the Inn, are of navigable importance, but their effect on the scenery may be estimated from the fact that they form above 160 large waterfalls. The largest lakes, the Idria, Garda, and Constance, being situated on the frontier, belong less to the Tyrol than to other countries. The others, though very numerous and picturesque, are of limited extent, the largest being the Achen and Plan. There are 128 mineral-springs, though comparatively few have acquired much celebrity. The best known are the Mitterbach, Rabbi, Pejo, Imbach, Alpeira, Schallerbach, Benita, Comana, and Caran.

The climate is generally healthy, but differs much on the opposite sides of the Alps. In the N. and more especially in the lateral valleys, it is severe, but still not so much so as in the W., where the greatest degree of cold is felt; in the S. it becomes much milder, and almost Italian. As Innsbruck, 1760 ft. above sea-level, the mean annual temperature is 49°; at Botzen 380 ft. above sea-level, it is 53° 80°. The annual fall of rain is nearly equal both in the N. and S., and averages about 26 inches.

About one-third of the whole surface is unavailable for any economical purpose, being occupied by perpetual snows, glaciers, and inaccessible barren rocks. Rather more than another third is occupied by forests, many of them composed of magnificent timber. The remaining third includes large tracts of common—mostly in a state of nature, though capable of cultivation—meadows, gardens, vineyards, and arable lands. The common and meadows are employed in rearing cattle, which in all the higher districts forms the principal occupation. The most numerous stock are sheep and goats. In the gardens and orchards vast quantities of the finest fruits are grown. The vine also succeeds well, particularly in the circles of Botzen, Trent, and Roveredo, where it occupies a large extent of surface, and produces several wines of excellent quality. Other objects of subsidiary culture are olives and mulberries; the former to a very limited extent, but the latter so generally in the circle of Roveredo as to form one of the most common and lucrative sources of employment. After deducting all the land appropriated as above described, there still remains nearly 500,000 ac. under ordinary culture. From the minute subdivision of property, farms are generally small, and the operations of husbandry are conducted with little skill, but the spirit of industry is untiring, and a large amount of produce is obtained, though it falls so much below the consumption. The principal crops are wheat, rye, wheat, barley, oats, and potatoes. Hemp, flax, tobacco, and sunflower are also largely grown. The minerals, which once formed the chief source of wealth, are less productive than formerly, but are still worked extensively. The most important are iron and salt; but both gold and silver are obtained in small quantities, and also copper and lead. The only other minerals deserving of notice are marble, gypsum, whiststones, ochre, and coal.

The manufactures of the Tyrol are more numerous than important. The first place belongs to the spinning and weaving of silk, which has its principal localities in Roveredo, Botzen, and Trent. The same in order is cotton weaving, which is made in a variety of forms; of which the most deserving of notice are the brass manufactures of Achenbach and Lienz, which are largely exported; articles in copper, iron, shovels, wire, nails, and so forth. Another manufacture in which the Tyrolese display considerable ingenuity is that of articles in wood, many of which are carried into other countries by the makers or their children, and form a lucrative branch of traffic. Lace and embroidery and glove-making employ a great many persons regularly and fill up the spare hours of many others. The transit trade, owing to the many easy passes through the Alps which the Tyrol presents, is of considerable importance. On the other hand, the general trade is very limited, and consists chiefly in wool, dried fruit, cheese, wine, iron, timber, fat cattle, and several of the above articles of manufacture.

There are few countries in which the devotional feeling is so strong and though it may be often disguised by superstition, it has doubtless mainly contributed to the formation of that simple, pure, manly, and independent character for which the Tyrolese are remarkably distinguished. For all administrative purposes the Tyrol is divided into seven circles—Voralberg, Inn, Oberinntal, Schwaz or Unterinntal, Brenneck or Festsattel, Botzen, Trent, and Roveredo. The capital is Innsbruck.

Tyrol formed part of ancient Etruria, and after a long and noble struggle to maintain its independence, was converted into a Roman province. It suffered much from the incursions of the northern barbarians, and at a later period was governed by counts, who continued in possession till 1254, when the line becoming extinct, the Count of Gorizia succeeded. He reigned till 1263, when the succession opened to a female, who called it the Archduchy of Austria. It has since remained in the possession of that family, with the exception of a short period in the beginning of the present century when, with that contempt for national feelings which Napoleon so often displayed, it was handed over to the Bavarians. The Tyrolese agitated the yoke, and struggled nobly for their independence, repeatedly defeating large armies with very inferior forces. The efforts made by the Tyrolese patriots during this contest, furnish one of the brightest pages in the history of freedom; while also the memory of Andrew Hofer, one of the heroes of the band, is one of the darkest spots in the annals of oppression. Pop. (1850), 353,704.

TYROL [Latin *Tyrolus*] a vil. Tyrol, circle Bozen, in bank Adige; with a parish church, a castle, a fine old chapel, an infirmary, and posthouse. Pop. 900

TYRONE, an island on Ireland, prov Ulster, bounded, N. by co. Londonderry E. Lough Neagh and co. Armagh, S. Monaghan and Fermanagh, W. Fermanagh and Donegal, greatest length, 45 m.; breadth, 60 m. area, 806,936 ac. of which 450,286 ac. are arable. The surface is hilly rising to some moorland in the N. and S., and declining to a level towards Lough Neagh, the plain adjacent to which is occupied by tertiary formations, consisting of beds of white, brown, and greenish-blue clay, alternating with white and gray sand. The old red sandstones and formations of the limestone group occupy large portions of the other parts of the county. Coal, fit for domestic purposes, is found near Lough Neagh, and indications of lead, coal, and iron are frequent in the hilly districts. But, although the surface is in many places, especially on the N. and W., rough and mountainous there is a large extent of fertile land in the county particularly in the plain of Omagh, where the soil is of a light friable nature. In 1851 there were 278,125 ac. under crop, including oats 149,768 ac. wheat, 7994 ac., potatoes, 99,987 ac., turnips 16,150 ac., and flax, 18,908 ac. Agriculture generally is in a backward state, but in the fertile parts is practised on improved principles. Young cattle are reared in the hilly and mountainous districts, but the breeds both of these and sheep are inferior. The manufactures are linen, coarse woollens, blankets, whiskey, beer, flour, meal and coarse earthenware. The county is divided into four baronies and contains 49 parishes. It returns three members to Parliament—two for the county, and one for the borough of Danganoo. Principal towns—Strabane, Danganoo, Cookstown and Omagh. Pop. (1861) 355,819

TYRONE, par Eng. Warwick 4710 ac. Pop. 1049

TYRMIENICA, a tn. Austria, Galicia, circle and 7 m. E.E.E. Stanislawow on the Bystrzyca. It contains a R. Catholic, a Greek united and an Armenian church, 148 man-

ufactures of muscoco-leather; and a trade in wax, hides, and horses. Many of the inhabitants are Armenians. Pop. 3900.

TYRNEBOE, an isl. off W. coast, Norway, between the Stranda-fjord and the Harbinger-fjord, and only separated by a narrow channel from the S. coast of S. Bergeland; greatest length, N. to S., 15 m. mean breadth about 6 m. It is very irregular in shape, and has very rugged coasts.

TYSSA a vil. Bohemia, circle Leitmeritz, about 9 m. from Tachow; with a church, a school, and three mills. Many of the inhabitants during winter employ themselves in making buttons, buckles, clasps, spoons, knife-handles, and other articles of metal-ware. Pop. 1456.

TYWARDRETH, a vil. and par. England, co. Cornwall

on the English Channel, with a parish church, a chapel of ease and a Wesleyan chapel. Area, 3263 ac. Pop. 3387

TYANA or **YANA**, a lake, Abyssinia. See **DARINA**.

TYARIZIN, or **SARATSKA**, a tn. Muscovy, gov. and 210 m. S.W. Saratov, cap. mure, at the confluence of the Zaritsa

with the Volga. It is surrounded by walls and ditches, and

otherwise fortified, and has two churches, a trade in cattle

and fruit, a factory and celebrated general-surgery. P. 3800

TYASKOP-SULO, a tn. Russia. See **BORNA** (S.)

TYERINA, a tn. and port, Cyprus. See **CYPRUS**

TYINTZOUTZA, a tn. Mexico, dep. Mechoacan, 30 m.

S.W. Valladolid, with some remains of ancient architecture,

and originally capital of the Indian kingdom of Mechoacan

Pop. 3000.

TYIPA, or **TYURA**, a river Siberia, rises in the Vitim

steppes, gov. Irkutsk, flows E.N.E., expanding into Lake

Bann, and after a course of about 350 m., joins a bank Tida.

U.

[For articles not found in U, look under Oo and Ou]

UBA, a vil. and par. Brazil, prov Minas-Geraes, near the Parakibuna; with a church. Munio coffee, and sugar are grown in the vicinity

UBACH, a vil. Rhemish Prussia, gov. and 12 m. N. Aix-la-Chapelle, with a church, and a trade in wine. Pop. 1316.

UBAHU, a river, Brazil. See **YAHU**.

UBAHY, a river, Bolivia. See **MADALENA**.

UBATUBA, a tn. and export, Brazil, prov São-Paulo

N. shore, bay of same name, 125 m. S.W. Rio-de-Janeiro. It

has two churches, and a small harbour, at which there is a

large export to Rio-de-Janeiro of coffee, tobacco, manioc,

flour, raw sugar cane, barwood, bacon, and timber. Pop.

(dist.) 6000

UBAYE, a river France, rises in the Alps, in the N.E.

extremity of dep. Hautes-Alpes; flows first S.E., then

W.N.W., and after a course of about 60 m., joins L. lake

Durance at Seillon, on the frontier of dep. Hautes-Alpes

UBBERTON, par Eng. Suffolk, 1215 ac. Pop. 208

UBEDA, a city, Spain, Andalusia, prov. and 55 m. N. N. Jaen, r. bank Guadalquivir. Of its ancient fortifications there

remain numerous towers with 10 gates, and some portions

of the wall all in a very dilapidated state. This place was built

by the Moors with the materials of the Roman Baelba, now

Ubeda-le-Vieja, and its whole aspect is still Moorish. It has

an unadorned townhouse, with a good facade, a prison, a small

church, a bull-ring, grocery, shambles, fish-market, and several

fountains and promenade numerous churches of which the

most remarkable are St. Michael's, once a mosque, transformed

into a Christian temple, and St. Salvador's, a handsome and

beautifully enriched Gothic church. There were nine

monasteries in Ubeda, which have been all turned to secular

purposes, and 250 nurseries, three of which still retain their

original destination. The educational establishments consist

of a college, in which Latin is the principal thing taught,

and various public and private schools. There are several

benevolent institutions, among them a foundling hospital

an asylum for old men, and an hospital for the sick. The

inhabitants are mostly engaged in agriculture, the manu-

factures being confined to agricultural implements, common

linen and woollen stuffs, hats, coarse earthenware with some

flour and falling mills. Ubeda was taken by Alonso VIII.,

eight days after the victory of Las Navas de Tolosa, and the

conqueror in writing to Innocent III., stated that it then contained

70,000 Moors, of whom many were put to death, and the rest

made slaves to build castles in Spain, and the city

passed to the ground. The Indians, however, returned and re-

built it, but it was taken again by St. Ferdinand in 1299

Pop. 13,038.

UBERAYA, a tn. Brazil, prov. Minas-Geraes, near

r. bank Uberava-Falsa. It has a church and a considerable

trade in manioc, millet, rice, cotton, cattle, and wine. Pop.

(dist.) 6000

UBERLINGEN, a tn. Baden. See **LAUBERHORN**

UBES (S.) a tn. Portugal. See **FERREAS**.

UBLEY, par Eng. Somerset, 1811 ac. Pop. 294

UBOLDU, a vil. and com. Italy, Lombardy, prov. Milan,

8 m. from Saronno. It is well built, has two churches, a char-

itable endowment, and a trade in corn and silk. Pop. 1778.

UBRIQUE, a tn. Spain, Andalusia, prov. and 52 m. E.N.E. Cadix.

It has generally steep and uneven streets; a parish

church, townhouse, two primary schools, two oratories, a

hermitage in the suppressed convent of Capuchins, a few

looms for ordinary cloths and coarse frieze, and four tan

series. Pop. 5349.

UCATLE, or **PARO**, a large river Peru, one of the chief affluents of the Amazon. All the rivers which rise in the S. section of the Peruvian Andes unite in this stream, the most S. of its branches being the Apurimac. The Ucatle, which assumes this name only from the junction of the Paro and Piqua, at lat. 8° 30' S., lon. 73° 47' W., flows N by N.E. and falls into the Amazon about 20 m. above San José de Omasca, or about lat. 4° 28' S., lon. 73° 38' W. The whole course of the Ucatle, measured from the sources of the Apurimac to the Amazon, exceeds 1,000 m. It is navigable for large vessels as high as Sarayacu, a distance of about 100 m. from its mouth.

UCLE, a vil. and com. Belgium, prov. S. Brabant, 1 m. S. Brussels, with a very handsome church, several cotton-mills, linen manufactures, bleachfields, distilleries, paper and flour mills, and a model establishment for the culture of the mulberry and the rearing of silk-worms. The beer of Ucle is celebrated, and forms a considerable article of trade. P. 5235.

UL-HAM, a vil. Hanover, Oberhoya, cap. bail., 18 m. S.W. Künigberg. It has several well-frequented fairs. P. 1900.

UCKERUNDE, or **UCKERUNDE**, a tn Prussia, prov. Pomerania, gov. and 82 m. N.W. Stettin, cap. circle, at the mouth of the Ucker in the Havel-River. It has a court of justice and several public offices, a parish church, a castle in ruins, a courthouse, and poorhouse, building-yards, a fishery, and two mills. Pop. 3675.

UCKFIELD, a market tn and par England on Sussex, on a height, 8 m. N.N.E. Lewes. It contains a number of good houses and has a parish church, Wesleyan and Baptist chapels, a free grammar-school and a workhouse. Area, 1747 ac. Pop. 1690.

UCLES, a vil. Spain, New Castile prov. Cuenca 50 m. S.E. Madrid, at the skirt of a steep hill crowded by the once magnificent convent belonging to the order of Santiago, the church of which is one of the finest in Spain. It has a townhouse, prison, small hospital, grammar two primary schools, a church, two other suppressed convents and four hermitages. The French under L'etour routed Vangas January 13 1809 with 10,000 Spanish troops. Pop. 1695.

UDDEVALI, a seaport in Sweden, lin and 45 m. N. Gothenburg, on a small stream at the head of the Hålfors-fjord. It is an ancient but clean and well-built place, though the houses are chiefly of wood and has a handsome stone church an infirmary and hospital manufactures of linen and cotton stuffs, and refined sugar dye-works, and a trade in wood and iron. About 2 m. S. is Gussafors which attracts many visitors in summer, both by the beauty of its site and its mineral springs. Pop. 8912.

UDDINGSBY, a vil. Scotland, on Lanark 7 m. E.S.E. Glasgow, on a branch of the Caledonian railway, inhabitants chiefly employed in weaving in agriculture, and in the manufacture of agricultural implements of all kinds.

UDEN, a vil. Holland, prov. N. Brabant, 14 m. E.S.E. Hertogenbosch, well built, with a large market place, a church, several schools, and six cattle and horse fairs. Pop. 1710.

UDENHOUT, a vil. Holland prov. N. Brabant 10 m. S.W. Hertogenbosch with two churches, a school, and some trade in cutting and sawing timber. Pop. agricultural 8064.

UDENHOUT, a tn. Hindostan, territory and 100 m. S. Gwalior, at the foot of a remarkable conical hill. It formerly had a fort. Extensive ruins indicate its former importance.

UDIMORE, par Eng. Sussex; 2231 ac. Pop. 435.

UDINE, or **UDENZ** [Latin, *Udinum*] a tn Italy Venetia cap. of del. Friuli, gov. and 60 m. N.E. Venice in an extensive plain on the canal of La Noja, between the Torre and Cornara. It forms a kind of double town—an outer, surrounded by walls, and an inner also surrounded by walls and wet ditches, and was once defended by a castle occupying a commanding height near its centre, but now converted into a house of correction. It is entered by six gates, and consists for the most part of narrow and crooked streets lined with arcades. The principal square, however is spacious, and is adorned with a fine pillar by Casselli, intended to commemorate the peace of Campo-Formio immediately below the castle is a fine promenade, laid out in planted alleys, and containing a large pond with an island; and in the vicinity, approached by an avenue of stately plane-trees, is the Compagnie, which, from the taste displayed in its arrangements,

and the number and elegance of its monuments, ranks as one of the finest residences in Europe. The ecclesiastical edifices include 13 parish churches, and numerous chapels, but the only one particularly deserving of notice is the cathedral, distinguished by its marble pillars, carvings, and pictures. The other public buildings and establishments are the episcopal palace, theatre, courthouses, the guardhouse, surrounded by a tower, the gymnasium, and several elementary schools. The manufactures consist of linen, silk, and woollen goods, copper and earthen ware, hair and paper, and there are several liqueur-distilleries, and numerous flour-mills. Udine is the see of an archbishop, and the seat of a court of justice and several important public offices. Pop. 26,790.

UDINSK two places, Siberia, gov. Irkutsk.—1, (Ferdinand), A tn. cap. circle, at the confluence of the Uda and Selenga, 180 m. E.S.E. Irkutsk. It has a number of well built houses, a small fort, three churches, a Buddhist temple; and a considerable trade with China, particularly in seal-skins obtained from Lake Baikal. Pop. (1853), 2037.—2, (Zhitomir), A tn. cap. circle on a flat traversed by the Great Uda, 200 m. N.W. Irkutsk. It has a church and a considerable transit trade; and rears a great many cattle. Pop. (1853), 3238.

UDJPU, a small tn. Hindostan, prov. Oudh 5 m. from the sea, and 59 m. N.W. Mangalore; lat. 18° 35' N.; lon. 74° 48' E.

UDNY par Scot. Aberdeen, 16 sq m. Pop. 1618.

UDVÁRA, a tn. Hungary, Thaur Danube, cap. and 16 m. N. by E. Komorn, with a R. Catholic church. Pop. 3189.

UDVARELY-SZARLÓZ, see **OSZMARENZ**.

UDVÁRY several places, Hungary.—1, A vil. Thaur Thaur, on Bahr about 20 m. from Potany; with a Protestant church, and a trade in wine and agricultural produce. Pop. 2575.—2, A vil. Thaur Thaur on Danubius, 9 m. from Esztharm-Nemethi with two churches. Pop. 1169.—3, A vil. Thaur Danube, and about 25 m. from Tolna; with two churches, and a trade in wine and tobacco. Pop. 935.

UDA, an isl. E. Pacific. See **BERMUDA**.

UEBELLING, or **UEBELLING**, a tn. Baden, Lake circle, cap. bail. N.E. shore of one of the lakes and 8 m. N.W. the town of Constance surrounded by dilapidated walls. It contains many handsome antique houses, five churches, a townhouse, library of 16,000 volumes, a superior burger-school a large hospital, and a mineral-spring, with a bathing-establishment; and has manufactures of tobacco and wax, a bleachfield several mills, and a small harbor, with some shipping and a considerable trade. Pop. 2400.

UEBERDORF, or **UEBERDORF**, a vil. and par Switzerland, cap. and 8 m. N. E. Fribourg with a handsome church. Pop. 1028.

UEBERWASSEL, a vil. and par Prussia, prov. Westphalia, gov. and near Münster with a R. Catholic church, a poorhouse, and house of refuge for children. Pop. 1613.

UEDEM, a walled tn. Rhemish Prussia, gov. and N.W. Düsseldorf, with a Protestant and a R. Catholic church, manufactures of linen, and distilleries. Pop. 1376.

UEHLFELD, or **UEHLFELD**, a market in Bavaria, Middle Franconia, 21 m. N.W. Nürnberg, with a castle, a church, and a synagogue, a mill and a trade in hops. Pop. 1031.

UEHLINGEN, a walled tn. Hesse, gov. and 30 m. S.E. Lüneburg on the Hase. It has a court of justice, a church, and several hospitals, manufactures of tobacco, shipery, and starch, tile-works, a brewery, distillery, and fishery, and a trade in cattle. Pop. 3081.

UEHDINGEN, or **UEHDINGEN**, a tn. Rhemish Prussia, gov. and 10 m. N.W. Düsseldorf 1 bank Rhine. It has a church, and superior burger-school, manufactures of linen, lace, sugar leather, and earthenware a cotton mill, some shipping, and a trade in coal. Pop. 2335.

UEHLSINGEN, a vil. and par Switzerland, can. Thurgau, 4 m. N.W. Frauenfeld, a bank Thur, here crossed by a handsome bridge. It has a church and school. Pop. 1198.

UEHLSSEN, or **UEHLSSEN**, a vil. Denmark, Steyerh. stein, on the Pinnau, between the Geest and March, 15 m. N.W. Altona. It has several industrial establishments, including boat-building yards, and a considerable trade in corn and peas. Pop. 2400.

UETIKOR, a vil. and par Switzerland, can. Glarus, near E. shore, Lake of Zürich; with a church some silk and cotton manufactures, and two viticultural works. Pop. 1060.

UPA, or OUPA, a *tu. Russia*, cap. gov. Orenburg, on the Belaita, at the confluence of the Ufa, 783 m. E. by N Moscow. It is defended by a citadel; is the see of a bishop, and has several important courts and offices, some very indifferent, and a number of handsome and regular streets; seven churches, two monasteries, a theological seminary and stone and two wooden mosques, a topographical school fitted to accommodate 1000 pupils, considerable manufactures, a trade in corn and cattle, and several mineral fairs. Pop. (1840), 22,900.

UPA, or OUPA, a river, Russia, gov. Orenburg, rises on the W slope of the Ural Mountains, flows circumspectly W h W to Krasno-Ostankin, in gov. Perm, then S.E.W., again entering Orenburg and joins r. bank Belaita at the town of Ufa; total course 580 m. Its principal affluents are, on the right the Belaita and on the left the Al and Joutren.

UPFULME, a *vil. and par. England*, co. Devon about 5 m. N.E. Colmington, with a parish church, Baptist and Independent chapels, a free grammar-school, and manufactures of huzelle. Area of par., 6123 ac. Pop. 2098.

UPFENHEIM, a *village*, in Bavaria, Middle Franconia, cap. dist., on the Goetzach, here crossed by a bridge, 21 m. N.W. Ansbach. It has a court of justice, two Protestant churches, a castle, Latin school, and hospital; tanneries, several mills and a trade in cattle and wool. Pop. 1648.

UFFINGTON, a *vil. and par. England*, co. Berks, on the Wiltshire and Berks canal, and the Great Western railway, 4 m. S.E. E. Farnborough, with a handsome parish church, an endowed free school, and Uffington castle, a large encampment on a hill above the village, supposed to have been originally formed by the Britons, and afterwards occupied by the Romans. Area of par. 5620 ac. Pop. 1170.

UFFINGTON, two *par. Eng.* — 1. Rutland, 3996 ac. Pop. 573 — 2. Berks, 9110 ac. Pop. 909.

UFFORD two *par. Eng.* — 1. Northampton 2530 ac. Pop. 367 — 2. Suffolk, 1155 ac. Pop. 734.

UFFINGTON, two *par. Eng.* — 1. Warwick, 1920 ac. P. 180 — 2. (New) Berks 2980 ac. Pop. 421.

UGBOURGH *par. Eng. Devon* 8552 ac. Pop. 1968.

UGENTO (*anc. Ugentum*), a *tu. Naples*, gov. Otranto 15 m. S.E. Gallipoli, the see of a bishop, with a cathedral, a seminary, a university, and an ecclesiastical seminary P. 1550.

UGGENHALL *par. Eng. Suffolk*; 1473 ac. Pop. 593.

UGLIANO two *places, Naples* — 1. (*Stilo-Chiesa*) A *tu. prov. Otranto*, 23 m. S.E. Lecce. Pop. 1517 — 2. (*Aliphe-Scoglio*) A *tu. prov. Otranto*, 23 S.E. Taranto. Pop. 600.

UGIJAR, a *tu. Spain*, Andalucia, prov. and 60 m. S.E. Granada, on the Ugujar. Most of the houses are two stories, and solidly built, with elegant façades; and the streets are even and well paved. It has a townhouse, prison, college for primary and advanced education, with chairs of Latin and philosophy besides a primary school for poor children, and an academy for girls, an hospital and Gothic parish church. Soft soap, glass, earthenware, roof and paving tiles, hempen shoes, common flours, and brandy are made, and there are eight flour and several oil mills, but the main occupation is agriculture. Pop. 8009.

UGINK, a *tu. France*, dep. Haute Savoie, r. bank Arly 10 m. S.E. Annecy. It is poorly built, but has several interesting antiquities, the remains of an ancient castle and a considerable transit trade, and important fairs for cattle and mules. Pop. 2944.

UGLEY, *par. Eng. Essex*, 2088 ac. Pop. 450.

UGLIAN, a *tu. Italy*, dep. Calabria, on the coast, opposite to Ezer, and immediately N.W. of the island of Ischia, from which it is separated by a narrow channel. It forms a comparatively long and narrow belt, stretching N.W. for about 10 m., with an average breadth of not more than 2 m. It is not fertile.

UGLIPO, a *tu. Russia*. See OULIPO.

UGOCH, a *tu. Hungary*, bounded, N. and N.W. by co. Bereg, S.W. and S. by co. Bacska, and E. by co. E. Marmaros area, 865 sq. m. Though the smallest of the Hungarian counties it is one of the most interesting, both from the beauty of its scenery, and the fertility of the soil. In the N. and E. it is covered by branches of the Carpathians, but in the S. and W. is flat or undulating. The principal river is the Theiss, which, in traversing it, forms a number of islands. The mountainous districts are heavily wooded, both with hardwood and pine and the arable lands produce abun-

dant crops of wheat, barley, oats, beans and peas, flax, hemp, and tobacco. The wine produced is only of tolerable quality. The minerals include coal. Nagy Sallina in the cap. P. 47,700.

UGOD, a *vil. Hungary*, Thibaur Daula, co. Vasarhely, 4 m. from Paps. with a church, mineral-springs, medicinal, and a trade in cattle and agricultural produce. Pop. 1638.

UGRA, or OUGRA, a river, Russia, rises in gov. Kaluga; flows W. enters gov. Smolensk, turns suddenly N.E., then S.E. crosses gov. Kaluga, and joins i. bank Oka about 3 m. above the town of Kaluga. total course, above 300 m.

UGRA a *vil. Hungary*, Thibaur Thales, co. Bihar 20 m. from Grăswarden with a Protestant church. Pop. 1388.

UGRINOVEZE, a *vil. Austria*, Slavonia, generalship and 32 m. S.E. Peterwardein with two Greek churches. P. 1047.

UGRINSKI ZEMOV a *vil. Hungary* See IMR-MAGYAR.

UGRAFAN, a market to Austria, Tyrol, on the Drave, opposite to Linz, with which it communicates by a long wooden bridge. It has a parish church, and an hospital. Pop. 2589.

UI or OUT, two *civets*, Asiatic Russia. — 1. Kase in gov. Orenburg. flows E. past Trolit, and after a course of about 200 m., joins i. bank Tobol near Fort Ust-Ustka — 2. Kase in gov. Tobolsk. flows W. and after a course of about 120 m., joins r. bank Irtysh, 16 m. below Tara.

UIG, *par. Scot. Ross*, 24 m. by 10 m. Pop. 3209.

UIST (NORTH and SOUTH), two *isls.* and *par. Scotland*, Outer Hebrides, co. Inverness — 1. N. Dist. 16 m. long, 17 4 m. to 18 m. broad, bounded N. by the Sound of Harris and E. by the Little Minch, separating it from Skye, has a range of hills along the E. coast, mostly composed of granite, rising gradually from the N. to the S. and varying in height from 300 ft. to above 700 ft. These are intersected by valleys of the sea, forming safe and commodious harbours. Within this range of hills, towards the W. is a large extent of soft, deep, barren moor, intersected in every direction by fresh water lakes of several miles in length. In the W. part lie most of the cultivated grounds, rendered fertile by the drift of shell-sand from the shores of the Atlantic. Here, in favourable seasons rich pastures of white and red clover appear, and luxuriant crops of barley or bere are obtained and, under proper management, grain crops of every description, sheep, black cattle and horses are reared. Pop. 2018 — 2. S. *Isle*, separated from N. Uist by the island of Benbecula, is 20 m. long, with an average breadth of about 7 m. The W. side is low flat, and nearly all the E. mountainous, hilly and mossy. The highest peak is about 200 ft. above sea-level. The rocks consist of gneiss, coarse granite, and hornblende. Some mica-slate is seen in a few places. Some of these hills contain good pasture for black cattle, horses, and sheep, and the moor, extending from their bases to the arable part of the parish, is generally deep, and furnishes excellent peat for fuel. There are numerous lakes, the largest of which is about 8 m. long and 1 m. broad. All of them abound with fish. In general the soil is light and sandy, but in some places a black loam, and in others moss. The crops are barley, bere, oats, rye, potatoes and turneps. Black cattle and sheep are reared. Pop. (South Uist), 6173.

UITENHAGH, a *tu. Cape Colony* cap. city of same name, 1 bank Zwartkops 400 m. E. Cape Town. It stands among extensive gardens, well planted with fruit-trees and has spacious streets intersecting each other at right angles, a handsome Dutch church with a tower, independent, Wesleyan and 2. (Lutheran) churches, and a Mahomedan mosque. It is on about 2700'. — The DIVINATOR, bounded, W. by divs. George and Beaufort, N. Great Relief, E. Somerset and Albany and S. the Indian Ocean, is about 180 m. long from E. to W., by 90 m. broad contains several mountain-ranges with lofty peaks, one of which attains the height of 5400 ft. It is watered by the Kromme, Gantoua, Zwartkops, Sunday, and Beasman possesses the harbour of Port Elizabeth, near the E. W. extremity of Algoa Bay is supposed to be rich in minerals, particularly copper and lead, and though more rational than arable, has tracts of sea corn-land, especially along the coast. Pop. roughly estimated at 10,000.

UTTGEEST a *vil. Holland*, prov. N. Holland, about 12 m. W. Amsterdam, in the midst of gardens, flower-fields, and meadows. It has a townhouse, two churches, a school, and an orphan hospital. Inhabitants chiefly engaged in the culture of flowers, tulips, hyacinths, &c. Pop. 1076.

UTHUIZEN, a vil. Holland, prov. and 15 m. N. F. freehold, well built, with three churches, an elegant school, and two hospitals. Pop. (agricultural), 2533.

UTHUIZERNEERDEN, or UTHUIZERNEERDEN, a vil. Holland prov. and 16 m. N. W. Groningen, with a church and three schools. Pop. (agricultural), 2302.

UJ BUDA, or TUNGSTON BUDA, a market tr. Hungary co. Pest, 1 bank Thales; with an extensive trade in fruit. Pop. 5225.

UJEST, a tr. Prussia, prov. Sillesia, gov. and S.E. Opole, r. bank Kiebasz; with a court of justice, two churches, a chapel, a synagogue, an hospital, a castle, manufactures of linen and hair, and flour mills. Pop. 2312.

UJFALU, several places, Hungary, particularly:—1 (Bud.) A vil. Hither Danube, co. Bacs, 12 m. from Elok with two churches. Pop. 2372.—3, (Buzsag) A market in Thither Thales, co. Bihar, on the Buzsag, about 20 m. from Giresvarden; with a handsome Protestant church. Pop. 4726.—3, (Fek.) A vil. Hither Thales, co. Szeged, on the Tisza, about 9 m. from Eger; with a R. Catholic church, a synagogue, several churches, saw and flour mills. Pop. 1654.—4, (Kecse) A vil. Hither Danube, on Neograd with a R. Catholic church. Pop. 1108.

UJLAK a market in Austria. See 11103.

UJLAK several places Hungary.—1 A market in Hither Danube, co. and 9 m. from Neutra with a R. Catholic church, manufactures of rope, a brewery and several mills. Pop. 1430.—2, A vil. Thither Thales, Banat and 6 m. from Temesvar with a Greek church. Pop. 1168.—3, (Buda) A vil. Thither Thales, co. Komar, 5 m. from Vajta with a Greek and a Protestant church, and a trade in agricultural produce. Pop. 1172.—4, (Szekes) A vil. Thither Thales, co. Szatmar 9 m. from Aranyos-Megyes, with two churches. Pop. 1264.—5, (Tura) A vil. Thither Thales, co. Ugocsa, on the Tisza 10 m. from Nagy-Szilves, with three churches, and a considerable trade. Pop. 1454.

ULCEBY two par. Eng. Lancashire.—1, 2720 ac. Pop. 181.—2, 1790 ac. Pop. 269.

ULCOMBE, par. Eng. Kent 3629 ac. Pop. 638.

ULDALE, par. Eng. Cumberland 8500 ac. Pop. 538.

ULEA, a tr. Spain prov. and 15 m. N. W. Murcia near the Segura. It is tolerably well built, has a parish church, courthouse, and primary school, and a trade in oranges, lemons, and other fruit. Pop. 1181.

ULEA, or ULCO, a river, Russia, Finland, issues from the N. W. extremity of a lake of same name, or as it is usually called, Uleä track flows N. W., and after a course of about 80 m., falls into the Gulf of Bothnia near Uleaborg. Before reaching its mouth it divides into four branches, and forms several cataracts.—The LAKE, remarkable for the irregularity of its shape, is about 40 m. long, by 25 m. broad, though it scarcely admits of being considered as a whole, being not so much one lake, as a series of lakes connected by narrow channels.

ULFABORG a seaport in Russia, Finland, cap. circle, on a peninsula, at the mouth of the Uleä in the Gulf of Bothnia, 331 m. N. W. St. Petersburg. It is built almost entirely of wood, but with considerable regularity and has a church, townhouse, hospital buildings, yards, and a considerable trade in wood, tar, pitch, butter, and dried fish. The harbour is almost silted up. The salmon-fishery in the Uleä is very productive. There is a mineral spring in the vicinity and on an island at short distance stands the old castle of Ulfaborg, built in 1590. Pop. 6000.

ULEY, par. Eng. Gloucestershire 1492 ac. Pop. 1327.

ULIATA, an isl. Pacific Ocean. See 11112.

ULLARUOL, a vil. N. W. coast, Sweden, on Ormsarty (part of) on the N. E. shore Lach Bay. It stands on a fine terraced promontory between the loch and the Atholl; and from the sea-beach to the summit it exhibits several parallel lines of houses, most of them white-washed and slated or tiled. The harbour is spacious, and easily accessible to vessels of large burden, which can approach the quay

ULLARD par. Irel. Carlow and Kilkenny; 5947 ac. Pop. 1681.

ULLDECONA a tr. Spain, Catalonia, prov. Tarragona, 14 m. S. Tortosa, with a townhouse, two primary endowed schools, two churches, a chapel, and numerous flour and oil mills. Pop. (agricultural), 4617.

ULLERDORF, several places Austria.—1, (Grove) A vil. Moravia, circle Olmutz; with a church, a castle, a school, and a bathing-establishment. Pop. 3114.—3, (Jenau, or Jenau-Haus) A vil. Moravia, circle Olmutz, near Goldstein with a church, glass-works, two blacksmiths, and two mills. Pop. 819.—3, (Hof) A vil. Bohemia, circle Königgrätz with a church, an oil, a saw, and two other mills. Pop. 1067.

ULLESTHORPE a hamlet, England, co. Leicester, a station on the Midland railway, 8 m. N. W. Lutterworth; with Baptist and Independent chapels, and a charitable endowment. Pop. 622.

ULLID par. Irel. Kilkenny 2249 ac. Pop. 877.

ULLINGWICK, par. Eng. Hants; 1945 ac. P. 856.

ULLUA, or ULUA, a river Central America, Honduras flows first N. W. then N., and after a course of about 180 m., falls into the Gulf of Honduras. It is partly navigable by vessels of 200 tons.

ULLSWATER, or ULLENWATER, a picturesque lake, England, between cos. Cumberland and Westmorland, about 9 m. long and varying in breadth from $\frac{1}{2}$ m. to 2 m. depth, 210 ft. It occupies the upper part of the valley of the Eamont, which is contracted between high lands, and receives the drainage of the loftiest part of the mountain range.

ULM, a tr. Württemberg cap. circle Danube, 45 m. S. E. Stuttgart, 1 bank Danube, here crossed by one, and on both sides of the Rhine, here crossed by five bridges. It is one of the fortresses of the Germanic Confederation and is a place of considerable strength being provided with important defences on both sides of the Danube. It is an old place, and though irregularly built, with narrow winding streets, has a number of houses interesting from their antiquity. It has a court of law and several important public offices, a cathedral, a large and lofty structure in the old Gothic style two

THE TOWN OF ULM — View from the station in Prussia and Germany

other churches, both handsome a palace, in which one of the princes of Württemberg resides; a denary, townhouse, gymnasium, theatre, barracks, industrial and other schools, a hospital, law-library, and several benevolent endowments; manufactures of woollen and linen cloth, leather, paper, brass-ware, matches, tobacco and tobacco-pipes, blacksmiths, dyeworks, vinegar-works, dye-works, tin-smiths, and an important trade, including in addition to the above articles of manufacture, corn, wood, seeds, wine, and iron-ware. Ulm is advantageously situated, and was long an important free-town, during which it became so wealthy that its gold was proverbially said to rain the world. Unfortunately it forms an important military position, and hence, the possession of it has been

heavily contested in every great European war, its prosperity has been seriously injured. As a German fortress, it is garrisoned during peace by Württemberg and Bavarian troops, and a body of Austrian artillery. In time of war one-third of the town is Austrian. Pop. 18,469.

ULM, vii Baden, det. Rhine, N N E Offenburg, with a church, and in the vicinity the ruins of the old castle of Ulmberg. Pop. 1475.

ULMBAUGH, vii Hesse-Cassel, prov Hesse, near Schmieder on a stream of same name, with a parish church. Pop. 1293.

ULRICHAMN, a vii Sweden, N. and 57 m. S. E. Warrburg at the N. extremity of Lake Abunda, in a mountainous district amidst romantic scenery. It has a considerable trade with the surrounding districts. Pop. 1442.

ULSTER, a prov Ireland occupying the N. part of the island; lat. 53° 45' to 56° 25' N. lon. 5° 24' to 8° 45' W. It comprehends the nine counties of Donegal, Londonderry, Antrim, Down, Armagh, Monaghan, Cavan, Fermanagh, and Tyrone. Total area, 5,475,453 ac., of which 3,407,539 ac. are estimated to be arable. It is extremely mountainous both in its N. and E. parts, with a comparatively level district intervening, the latter occupying considerable portions of the coe. Down, Armagh, and Tyrone. The highest summit is in the co. Donegal, where some are above 3000 ft. high. The coasts are deeply indented with spacious lagoons and bays, the principal of which are Donagh Bay, Lough Swilly, Lough Foyle, Belah Bay, Lough Strangford, Donagh Bay and, in part, Carlingford Bay between the coe. Down and Louth, the one in Ulster the other in Leinster. Numerous smaller inlets indent the coast of Donegal which is extremely rugged. On the N. coast of Antrim are the basaltic rocks known as the Giant's Causeway. The principal rivers are the Bann, Foyle, Erne, and some tributaries of the Shannon. It contains the large lakes Neagh and Erne. It is the chief seat of the linen and other manufactures of Ireland. Pop. 3,004,269.

ULTING prov Eng Essex; 1147 ac. Pop. 166.

ULU Ismaia, a river, Turkistan. See Ismaia.

ULULA det-Camro. a vii Spain, Andalusia, prov and about 80 m. from Alcazar, on a steep height; with a church, courthouse, and primary school; manufactures of woollen cloth and a trade in wheat. Pop. 1819.

ULVA, a vii prov coast, Scotland, on Argyle, separated from W. coast of Is. Mull by a narrow channel, called the Sound of Ulva. It is about 4½ m. long, and nearly 3 m. broad. It has a bold and rocky coast, in some places rising by successive ledges to an elevation of nearly 1300 ft. from sea-level and in many places exhibiting beautiful ranges of basaltic columns, often as regular as those of Staffa. On the S. side of the island is a cave, the entrance to which is a natural arch of 87 ft. span. The soil is generally fertile.

ULVERSTON a market tn. and par England on and 22 m. N. W. Lancaster, on some gentle declivities, about 1½ m. from that branch of Morecambe Bay called the Leven Sands or Ulverstone Sands. It has two Episcopal churches, two Dissenting chapels and a R. Catholic chapel a theatre, and union-workhouse, numerous schools; an infirmary, and ladies institute, having a Dorcas society connected with it, two cotton-mills, a coarse-paper mill and two manufacturing of shawl-linen. The principal articles of export are iron and copper ore, gunpowder, hoops, and hankens. Of the iron-ore upwards of 10,000 tons are shipped annually, copper-ore, 3000 tons gunpowder, several hundred barrels. Chief imports, coal, cotton, and general merchandise. Area of par. 24,586 ac. Pop. 1823.

UMAH, or UMAH, a vii Brazil, gov and 122 m. S. Kley, cap. circle, on the Umanika. It is surrounded by rain parts, which form an excellent promenade, has a fine castle belonging to the Polakoff family, a R. Catholic and three Greek churches, a synagogue, monastery, and riding-school and a trade in cattle and agricultural produce. Pop. (1845) 7377.

UMBAOG LAKE, a beautiful sheet of water U States, on the boundary between New Hampshire and Maine, about 16 m. long, and 10 m. broad. Its outlet on the W. forms a considerable branch of the Androscoggin.

UMBALLA, a tn. Hindostan, prov and 120 m. N. N. W. Delhi, 1040 ft. above sea level, cap. district of its name. It is a large walled place, with very narrow streets. Under its walls is the unassuming ground of the British troops.

Pop. 11.

UMBRETE, a vii Spain, Andalusia, prov and 9 m. S. W. Sevilla, with a beautiful palace and garden, belonging to the Arch bishop of Sevilla a granary, townhouse and prison, three primary schools a parish church a hermange, which serves as a chapel of ease, and several flour and oil mills. Pop. 10,000, 1833.

UMBERIATTO, a tn. Naples, prov Calabria-Ultra II 20 m. N. N. W. Cotrone, on a steep hill surrounded on all sides by inaccessible precipices. It is a small, ill-built place but is the see of a bishop, and contains a cathedral. P. 3500.

UMYA, a resort tn. Sweden, cap. 120, in a plain on a river of same name, near its mouth in the Gulf of Bothnia, 823 m. N. N. E. Stockholm. It is regularly built, though of wood; and has a good and well-sheltered harbour which admits vessels drawing 8 ft. as far up as the town, and at which a considerable trade is carried on in timber, tallow, dairy produce, fowl, hides, fish, &c. There is a mineral spring in the vicinity. Steamers call here in passing between Stockholm and Turku. Pop. 1408. — The river rises in the S. slope of the mountains which separate Norway from Sweden, to lat. 66° N. flows S. E. forming several lakes by its expansion and falls into the Gulf of Bothnia by a wide embouchure, a little below the town of Umea, after a course of above 250 m. The water, which at its mouth is 14 ft. to 15 ft. deep, is only 8 ft. at Umea. Its chief affluent is the Wiedel.

UMBEIGHUR, or AUMBEIGHUR, a tn. Hindostan, prov Agra, 128 m. S. E. Jodhpore. It is of considerable size, and in the centre are three temples. There is also a manufactory of chmcs. Above it on a high rock, stands a castle.

UMMENDORF, a vii Prussia, prov Saxony, gov and W. Magdeburg with a church and several mills. P. 1016.

UMMERAPPOORA, a tn. Burma, See Acaarappa.

UMMERBACHT, a tn. Saxa-Montagne 12 m. S. E. E. Hildburghausen, on the Rodach with two churches, a townhouse, school a saw and bark mill. Pop. 728.

UMPUKA, a river, U States, Oregon which has its mouth to the N. of Cape Gregory lat. 43° 44' N. lon 124° 7' 30' W. For a distance of 10 m. it admits vessels drawing not more than 12 ft. On an extensive plain about 200 yards from the river, is Fort Umpqua, an inclosure of about 200 ft. square, with bastions at the angles. The Umpqua country yields a considerable supply of furs, chiefly small beaver.

UMTISKE, a city Punjab, See Amritsar.

UMSTADT, or Gnom-Umstadt, a tn. Hesse-Darmstadt, prov Starkenburg 21 m. E. Darmstadt, with two parish churches, two castles, and no hospital and manufactures of linen and leather tale-works, and bark and other mills. P. 2699.

UNA several rivers Brazil particularly — 1. A river prov São-Paulo, which flows E. for 60 m., and falls into the sea by a large mouth, 40 m. N. the mouth of the Iguaçu.

— 2. A river forming the boundary between provs Alagoas and Pernambuco. It rises in the Serra Germaines flows first E. and then S. E. for 150 m. receives the Jamboia on its right, and falls into the ocean about 12 m. N. of the Serra-Grande. Its mouth is wide and admits barges, which ascend to the forests on its banks, and those of the Jamboia and take in cargoes of excellent timber. — 3. A river, prov Bahia. It rises in the Serra d'Itabora, forming the N. termination of the Cordillera dos Amaraes, follows a mountainous course E. till it reaches lat. 16° S., passes the town of Olivença, and about 4 m. below falls into the ocean. It is navigable by sloops as far as Olivença. — 4. A small river, prov Rio-de-Janeiro. For about 13 m. it is navigable by canoes, and falls into the sea between Cape Brazil and the mouth of the São-João.

UNADILLA, a vii. and township, U States, New York, 65 m. W. by S. Albany r. bank, Susquehanna with an Episcopal church, grist and saw mills, and manufactures of woollen stuffs and tobacco. Pop. 1463.

UNCASTILLO, a tn. Spain, Aragon prov and 46 m. N. N. W. Saragossa, at the entrance of the Miguad and Cardenas. It has two parish churches, three primary schools, a courthouse, and prison flour-mills, and a trade in agricultural produce and cattle. Pop. 1903.

UNDERCLIFF, a beautiful and romantic dist. England, on Southampton, forming a comparatively narrow belt of 6 m. in length, on the E. E. side of the Isle of Wight. Immediately facing the sea are cliffs varying in height from 80 ft. to 100 ft., and serving as an abutment to a long irregular platform.

145

bounded on the N by a bold overhanging precipice, from 200 ft. to 300 ft. high. The platform to which the name of Underhill is properly confined, is broken into a number of minor terraces, and appears to have been formed by a succession of landslips, several of which, of considerable magnitude, have taken place in recent times. The soil is generally fertile, and both the beauty of the situation and the mildness of the climate, have caused it to be studied over with beautiful villas. It is much resorted to by invalids.

UNDEBOOT or **UNDERBOOT** the chief of the Lacadive Islands, in the shape of an ellipse, 3 m. long, by 1 m. broad, lat. 10° 45' N., lon 74° E. (See LACADIVE).

UNDY, par. Reg. Missouri, 3717 sq. Pop. 573.

UNGH, or **UNGWAT**, a river Hungary rises in the W Carpathians, flows curiously S W past the town of Ungvár and joins the bank Laborez. Total course, 90 m.

UNGHVAR, a town in Hungary cap. and r. bank river of same name, in a beautiful district, 40 m. E. by S. Kaschau. It consists of the lower proper and two suburbs, in the residence of a bishop, and the seat of several important public buildings and has a handsome cathedral, a R. Catholic, and a Greek-union church, a fine modern edifice, in which the county meetings are held, a theological seminary for united Greeks of the dioceses of Episcopi and Melitaea, a R. Catholic gymnasium and high school, and a trade in salt, cattle, and wine, particularly the last, which is extensively grown in the vicinity. Pop. 6234.—The country bounded, A. by Gallia, E. by Doragh S.E. Subuloch, and S.W. and W. Kemptin greatest length, N W to S.E., 60 m., mean breadth, about 45 m. area, 1261 sq. m. is generally mountainous, being traversed by the Carpathians, but the climate, except in their immediate vicinity, is mild, and favors the growth of the vine, and the rearing of silk worms. Corn, hemp and timber are abundant, and the minerals include iron and marble. The county is divided into the four markets or districts of Ungvár (the capital), Bodoratz, Kapos, and Szaradhy. Pop. 110,003.

UNGSTEIN, a vil. Bavaria, Palatinate, dist. Dürkheim; with a Protestant church. An excellent wine is grown in the neighbourhood. Pop. 1141.

UNOSCHT, a m. Bohemia, circle Bohnitz, W. Prague; with a parish church, a chapel, and several mills. Pop. 1773.

UNIE, an is. Asia, Ulysses, at the S.E. entrance of the Gulf of Quarnaro, W. of the island of Cos. It is about 5 m. long by 3 m. broad; and has three good harbours, and a village of same name, with a church and chapel. Pop. 230.

UNIEH, a seaport in Asiatic Turkey, pub. river, on the Black Sea, 50 m. E. Samos. The houses are built of wood, those next the sea being erected on stone piles or pillars, and the streets are filthy and staid. A considerable number of vessels belong to the port, though none of them exceeds 200 tons burden. The exports are cotton stuffs, fruits, and wine, the imports, corn and oil from the Crimea, coffee, sugar, and European manufactures from Constantinople.

UNIONTOWN, a bor. U. States, Pennsylvania, 155 m. W. by S. Harrisburg, on Redbank Creek with seven churches, Madison college, founded in 1825 and several schools grist and saw mills, manufactures of leather earthenware, and sports, and three printing-offices. Pop. 2700.

UNITED STATES or **N. America**, an immense federal republic, occupying the whole of the western portion of the continent, between lat. 14° and 49° N. and lon 67° and 125° W.; stretching from E. to W., between the Atlantic and the N. Pacific Oceans, and from N. to S. between British America and the Gulf and Confederation of Mexico; greatest length, E. to W., 2900 m., greatest breadth, 1700 m., area, estimated at 3,250,000 sq. m. or only about 500,000 sq. m. less than the whole continent of Europe. The number of the states and territories forming the republic is (1854) 37. Their area population (free and slave), churches, schools, exports and imports &c. are given in the following table; with the date of their being received into the Union, those marked * being the original states.—

NAME, AREA, POPULATION, CHURCHES, &c., OF THE DIFFERENT STATES.

comparatively few, and of no great magnitude, but are more numerous on the E. than on the W. side. The most important on the Atlantic are Pamlico, between the British provinces of New Brunswick and the state of Maine, Massachusetts Bay, between Cape Ann and Cod; Long Island Sound, between Long Island and Connecticut, and in connection with it the noble bay of New York. Delaware Bay, commencing between Cape May and Hopen, and penetrating far into the interior, between the states of New Jersey and Delaware, Chesapeake Bay commencing between Capes Charles and Henry, and then stretching N through Virginia and Maryland for about 300 m.; Albemarle and Pamlico Sounds on the coast of N. Carolina. The Gulf of Mexico is only an immense indentation of the Atlantic but contains no sub-indentation of any consequence. The Pacific is also deficient in bays, but possesses in that of San Francisco, on the coast of California, one of the largest and finest natural harbours in the world. The coast of the Atlantic is remarkable for the almost total absence of islands, the only ones of the least consequence over a range of more than 15° from lat. 30° to 45°, being Long Island, already mentioned, and on the coast of the Pacific, though the islands are more numerous, they are all insignificant in respect of magnitude. The mainland consists of two mountain-chains, which stretch as a comparatively short distance from the opposite coasts, and in directions nearly parallel to them, and inclose between them a vast tract, sometimes so elevated as to deserve the name of a plateau, and so sterile as to prevent all the character of a desert, and other times so depressed as to form a deep and fertile valley traversed by mighty rivers, belonging chiefly to the basin of the Mississippi, and spreading out into luxuriant prairie, rich alluvial plains, and boundless swamps, regularly laid under water. By far the loftiest and most magnificent of the two chains is that of the Rocky Mountains, which, entering from Mexico, of whose cordillera they may be considered a continuation, stretch N along the Pacific, at distances from it varying from 500 m. to 600 m. and are continued into British America. Within the U. States, they attain in Long's Peak or Elberton, about lat. 37° in 106° W, the height of 15,755 ft. They have a breadth of about 300 m. and, besides the series of several transverse ramifications denoted, by a series of parallel ranges, of which that of the Sierra Nevada is the most elevated, towards the coast, and often give it very bold features. The E. chain, that of the Alleghanies, stretches in a similar direction along the shores of the Atlantic nearly from the Gulf of Mexico to the St. Lawrence at a considerable distance from the shore in the S., but gradually approaching it towards the N. Though by no means destitute of magnificent scenery the Alleghanies are much lower than the Rocky Mountains, consisting rather of a long plateau crested with mountains and hills, than of a well-defined continuous chain occasionally rising in Vermont and New Hampshire to the height of 6000 ft. or 6500 ft. but on an average not exceeding 3000 ft. and only in Pennsylvania and Virginia attaining a breadth of 100 m.

Rivers and Lakes.—The great plateau and valley inclosed by these two chains belongs almost entirely to the basin of the Mississippi, which, by far the largest river in the N. American continent, and, in respect both of length and magnitude, ranks high among the greatest rivers of the world. For a course of nearly 3200 m., commencing in dreary lakes and swamps in the W. of Lake Superior it flows S.E. into the Gulf of Mexico. Among other large tributaries it receives on its right bank the Missouri, which joins it after a course of more than 2500 m., and more than doubles its volume, being, though only an affluent, the recipient of streams more than 600 m. long—the Arkansas, which conveys to it waters collected during a course of 1800 m.—and the Red River, which, after flowing E. through the S. part of what has been called the great American desert, joins S.E., and joins it after a course of over 1000 m. The chief tributaries of its l. bank are the Wisconsin, Illinois, and Ohio, all of them diminutive compared with those of the r. bank, except the last, which, formed by two considerable streams, the Allegheny and Monongahela, flows E.W. for 945 m., receiving, among others, the Mahan, Cumberland, and Tennessee. The country W. of the Rocky Mountains, belonging to the basin of the Pacific, is of comparatively little width, though of very great length, and hence cannot boast of many large rivers.

The most important are the Columbia, navigable for 125 m. by vessels of 300 tons, the Sacramento, which discharges itself into the Bay of San Francisco, is deserving of notice, more for its locality than for its magnitude, and the Colorado, which falls into the Gulf of California. Between the Alleghanies and the Atlantic, the principal rivers are the Connecticut, which falls into Long Island Sound, the Hudson a magnificent stream, which, allies remarkable for its scenery and its navigable importance, flows S. for 300 m. and contributes to form the harbour of New York; the Delaware, which, after a course of 300 m., falls into the bay of that name, and is navigable by ships of the line to Philadelphia, a distance of 40 m., the Potomac, which falls into Chesapeake Bay and is navigable by the largest vessels to Washington, a distance, including the bay, of 200 m. and the Savannah, which, after separating between S. Carolina and Georgia, enters Savannah Bay and being navigable for large vessels for 17 m. to the town of Savannah, there forms an important harbour. Besides the rivers, one of the most remarkable features of the United States, but common to them and Canada, is the chain of enormous fresh-water lakes—Superior, Michigan, Huron, Erie, and Ontario, which drain an area of about 90 000 sq. m. and send its waters into the St. Lawrence, after pre-empting the greater part of them in an accumulated mass over the renowned falls of Niagara, between the two last-mentioned lakes. In the interior of the country the most extensive lakes are those of Lake Champlain in the N. between the states of Vermont and New York, and the Great Salt Lake, near the N. frontiers of the Mormon territory of Utah.

Geology and Mineralia.—Though imperfectly explored in some of the back settlements, the geology of the United States is better known than that of many countries in Europe, owing chiefly to the liberal and enlightened measures adopted by the different states in order to obtain geological surveys, but partly also to the explorations of eminent European geologists among whom I will hold the foremost place. Immense alluvial tracts occur along the Gulf of Mexico, commencing in the United States at the Rio-Grande, their S. boundary, and covering a wide belt of the state of Texas, the whole of Louisiana, considerable portions of Mississippi and Alabama, and the whole of Florida. Similar tracts, but narrower, stretch N along the Atlantic, as far as the N. E. extremity of Long Island but are partially interrupted by tertiary groups, which belong to theocene or earliest period, in parts of Georgia and S. Carolina, and to the miocene, or less ancient period, in N. Carolina, Virginia, and Delaware. In the same states, and more especially in the N. and W. of New Jersey, the cretaceous system is seen in isolated spots or narrow strips. The chief development of this system, however occurs to the N. of the alluvial lands of the Gulf of Mexico where it forms the prevailing formation of large areas in the states of Arkansas, Tennessee, Mississippi, and Alabama. The alluvial and tertiary tracts along the Atlantic already referred to are not followed in like manner by the cretaceous system but by a large development of what has been called hypogean rocks consisting of granite gneiss, &c., which stretch N from Alabama and the W. parts of Georgia, along the main chain and the E. slopes of the Alleghanies, become greatly narrowed in Virginia, Maryland, and Pennsylvania, but afterwards widen out in Massachusetts, and then cover a large part of the N. of New York, and the whole, or almost the whole of Vermont, New Hampshire, and Maine. From Virginia N to Massachusetts, the granite and gneiss inclose narrow belts of new red sandstone, pierced by names of trap. These seem to be the only spots of the United States where either new red sandstone or trap occurs. In the Alleghanies, W. of the granite and gneiss, the alluvial system, forming the lower series of sedimentary rocks begins to be developed. It commences on the banks of the Tennessee where it turns W. and stretches in a narrow belt, but without interruption till it reaches the frontiers of Vermont. It belongs to the lower part of the system, and consists chiefly of what is known by the name of Trenton limestone. It is succeeded W. by narrow strips of old red sandstone and occasional belts of carboniferous limestone, giving indication of the approach of the true coal-measures. These, accordingly immediately occur on a scale of almost unexampled magnitude, and form an immense coal-field which stretches continuously from S.E.W. to N.N.W., between the

parallel of 35° and 41°, for a distance of more than 600 m. Both in the S. and N. it tapers nearly to a point, but gradually widens out from both extremities, all on the parallel of 40° it has a width of 170 m. The area of the whole field is moderately estimated at 65,000 sq. m. The coal occurs in numerous thick beds, partly bituminous and partly anthracite, is well adapted both for domestic and manufacturing purposes, and is accompanied by valuable seams of iron-ore, and the limestone necessary for smelting. The old red sandstone, already mentioned as bounding this coal-field on the E. widens out so as to occupy an extensive area on the N., and is then continued S. in a narrow belt so as to form the greater part of its W. outer edge. Still farther W. chiefly in the states of Ohio and Indiana, this old red sandstone is succeeded by rocks of the algonian system, belonging, with few exceptions, to the upper series, but again appears in a very remarkable shape, forming, along with an older belt of carboniferous limestone, an oval almost mathematically exact, and including, as with a kind of outer rim, the great coal-field of Illinois. This coal-field, which consists of horizontal strata, with numerous rich seams of bituminous coal, comprehends parts of the states of Illinois, Indiana, and Kentucky and has an area not much less than that of all England. Beyond this coal field, to the W., the rocks of the algonian system are continued into Missouri, and both there and in the N. of Arkansas are seen inclining a large elliptical area of granite and gneiss. The extreme W. has not been explored, and the space left blank by Lyell in his geological map of the United States remains to be filled up by the investigations of future geologists. In the N., however, the geological structure is well known. The remarkable peninsula of Michigan washed by the lake of that name on the W., and by Lake Huron and Erie on the E., consists of three distinct formations, following each other in regular series—first, the upper algonian system bounding it on the S. and S.E., and terminating it on the N., next, the old red sandstone, immediately overlying the algonian rocks bounding Lake Michigan on the E. and Lake Huron on the W., and stretching round on all sides so as to inclose a large heart-shaped nucleus; and, lastly, this nucleus itself consisting of a thin run of carboniferous limestone, which forms the basis of a third coal-field of small dimensions compared with the other two, but large compared with most of our European coal-fields, having a length, from N. to S. of 150 m., with a median breadth of less than 50 m., and thus enclosing an area of not less than 1500 m. To the N.W. of Lake Michigan and to the E. and W. of Lake Superior tracts of granite and gneiss occur and appear to be rich in veins of copper. The large blank left in the geological map of the United States in regard to the territories which have been newly organized or recently acquired has begun to be filled up in the S.W. towards the shores of the Pacific, in consequence of the discovery of a vast auriferous region, which, though its limits are not yet defined, evidently covers a great area in California. As far as has yet been ascertained this gold region appears to occupy an area from 400 m. to 500 m. long, and from 60 m. to 60 m. wide but the area will probably widen out as the different districts of the territory are more accurately explored. The matrix of the auriferous quartz, existing in the form of veins or rocky masses, embedded in granite and primitive schists. These accordingly appear to be the prevailing geological formations. As yet, however the gold has not been found to any great extent at site, and has been chiefly obtained by collecting it by various mechanical processes from the superficial debris which floods and torrents have brought down from the mountains. Besides gold, copper seems to be an abundant product of this remarkable district, and from its use as an amalgam for the extraction of gold, it is of course greatly sought after. Other metals, as copper lead, and iron, undoubtedly exist in the same region in quantities sufficient to yield productive returns. At the opposite extremity of the Union in the N.W., on the shores of Lake Superior, copper occurs both in rich veins, and in enormous boulders, weighing several tons, and has been actually obtained to such an extent as nearly to meet the demand of the western markets. The mines of lead in Missouri and Illinois are said to be almost inexhaustible, though apparently little has yet been done to turn them to account. The great coal-fields of the country have already been referred to, and, though of comparatively little value for domestic

purposes so long as a cheaper fuel is so easily obtained from the unexplored forests, is already worked to a considerable extent for the supply of marine steam-engines, and the melting and working of iron. For the latter purpose, it is so extensively employed, that in Pennsylvania the iron manufactures give substance to one-tenth of the inhabitants, and in several other states forms an important interest. Salt is abundant in New York, Pennsylvania, and Virginia, and in all the N.W. states, and in the territory of Utah the Great Salt Lake, and its valley, it is truly inexhaustible. In marble and limestone, granite, and other varieties of building-stones, roofing-slates, and potter's-clay, few countries in the world are better supplied.

Climate.—A vast country, stretching over 25° of latitude, and exhibiting all possible varieties of surface—low swampy shores, boundless alluvial plains swelling hilly regions, elevated acid deserts, and lofty mountain-chains—must obviously possess, not one climate, but a number of climates, not only differing greatly from each other, but often exhibiting the most remarkable contrasts. The only one feature which can be said to be common to all the climates of the United States, is seasonality. The transitions from cold to heat, and humidity to drought, take place so suddenly and to such an extent, that even in the central states, a change of 15° in the thermometer in the course of a few hours, is by no means uncommon. On the N. frontier, these changes become still more marked and, on the other hand, at the opposite extremity, are so much diminished, that the thermometer in Florida is almost stationary throughout the year, and at no time varies so as to give an annual range of more than 12°. Compared with Europe, the climate of the United States exhibits very remarkable differences. The isothermal line which passes through Belgium in lat. 51° after crossing the Atlantic, is found at Boston in lat. 43° 30', and then winds round between Rome and Florence in lat. 43°, is found in the United States at Raleigh in lat. 36°. In the N. of the State, between lat. 43° and 45°, nearly on the parallel of Rome, Toulon, Padua, and Bordeaux, the winter is so severe for three or four months that the snow is abundant enough for the use of sledges, and the ice of the rivers strong enough to be crossed by horses and waggons. In Philadelphia, lat. 39° 54', the mean annual temperature is 54° F. whereas in Naples, lat. 40° 55', it is 59° F.; in other words, the American town, which, from having a lower latitude, ought to have a higher annual temperature than the European town is about 5° colder. The ranges of temperature are still more remarkable than the annual averages, and hence it has been and with truth, that while New York has the summer of Rome, it has the winter of Copenhagen. The prevailing winds of the United States are the N.W. S.W., and N.E. The first, blowing from frozen regions, over high mountains and plateaux, prevails in winter, and though piercingly cold, is usually dry until it reaches the shores of the Atlantic, where meeting with dense vapours, it condenses them into snow hail or rain. The second prevails in summer particularly on the W. side of the Appalachians, and in the basin of the Mississippi, where, indeed, it blows more or less at all seasons, except at the winter solstice. The third arises on the American coast, charged with the vapours collected in its course from the Arctic, and across the Atlantic Ocean, and immediately deposits them in cold dense mists or heavy showers. The average fall of rain is estimated at 37½ inches, whereas in the N.W. of Europe, it is only 31½ inches, and yet in the United States, as the showers, when they do fall, are more copious and purer also, more continuous, the number of rainy days is fewer. In the more elevated middle districts the climate is decidedly healthy, and instances of great longevity are of frequent occurrence, but on the low flats of the S. and the immense plains on which the great rivers are continually overflowing their banks, cutting out new channels, and forming vast marshes, all the diseases engendered by miasmata prevail, and indicate their presence in the quivering fumes and yellow flocks of the inhabitants.

Vegetation, Agriculture, &c.—A large portion of the United States still remains in a state of nature, either because from its arid nature it never can be brought under profitable cultivation, or because the population is still too thinly scattered to be able to overcome it. On the former description of land vegetation is either altogether absent, or produces very stunted

forms; on the latter it is usually of the most magnificent description, being either covered by dense forests or spread out in boundless prairies of the richest verdure. Of forest-trees 140 different kinds have been counted, and of these not less than 80 attain an average height of 60 ft. Several of the trees are valuable not merely for their timber, but for other products, among which special notice is due to the sugar-maple. Among cultivated crops, the most important are wheat, the great staple of the western and middle states, but cultivated more or less extensively in every district; maize, equally adapted for universal culture, but most productive in the middle states of Ohio, Kentucky, Illinois, Indiana, Tennessee, and Missouri; tobacco, which began to be cultivated on the parallel of 40°, but is only considered a staple in Virginia, Kentucky, Maryland and Tennessee, cotton which forms a staple in all the states from 39° S and more especially in Alabama, Mississippi, Georgia, the Carolinas, and Tennessee; rice, chiefly in S. Carolina; cane-sugar in Louisiana, Florida, Texas, and Georgia; and maple-sugar in New York, Vermont, Ohio, and Indiana; hemp and flax in all the western and middle states, but more especially in Kentucky, Ohio, Missouri, and Virginia; and hay, chiefly in New York, Pennsylvania, and Ohio. The culture of the vine also has made good progress, and above 140,000 gallons of wine are produced, chiefly in Ohio, Pennsylvania, and Indiana. In many parts of the Union the mulberry-tree grows spontaneously, and though it has hitherto attracted little attention, might obviously be turned to good account in the production of silk. Fruits also, both of the temperate and tropical climates, grow in great variety and abundance, the N. yielding apples, pears, cherries, plums, &c., and the S. figs, olives, oranges, pineapples, almonds, melons, &c. The domestic animals, the same as those of Europe, have so greatly increased, that their value in 1860 was estimated at above £100,000,000 sterling. Sheep are now so numerous in New York, Ohio, Pennsylvania, Vermont, &c., that the wool alone furnishes an important source of national wealth, and amounted in 1850, to above £2,000,000 lbs. The cattle kept for feeding cannot easily be estimated, but the produce of the dairy was ascertained in 1850 to amount to £19,000,000 lbs. butter and 108,000,000 lbs. cheese, both made chiefly in New York, Pennsylvania, Ohio, and Massachusetts. Immense numbers of hogs also are reared almost without expense, on the waste of the forests. Among wild animals, the first place is due to the bison, which in countless herds roams over the vast prairies to the W. of the Mississippi; the other more remarkable animals are the moose or American elk, the prong-horned antelope, the cougar or puma, the black and grisly bear, the racoon, opossum, beaver; birds in almost endless variety including swans, wild turkeys, wild geese, wild ducks, eagles, vultures, mocking and humming birds, parrots, including the steady rattle-snake and alligators which, though unknown to the U. and middle states, inhabit the lagoons and estuaries S. of the Carolinas.

Manufactures.—The number of inhabitants employed in these is as yet small compared with those employed in agriculture, but, partly from the native energy of the people and still more perhaps from the adventurous encouragement which, whether judiciously or not, has been liberally given them in the form of protecting duties, various important branches of industry have made considerable progress. That of iron has already been incidentally adverted to. In 1850, 31 states had furnaces for smelting iron, absorbed a capital estimated at £2,500,000, employed 30,448 persons, and produced 554,755 tons of pig valued at £2,540,000. In the same year 472 establishments, 231 of them in Pennsylvania, were manufacturing malleable-iron, with a capital of £2,800,000, employing 13,976 hands, and producing 173,044 tons, valued at £2,280,000. Castings made to a greater or less extent in all the states, except Florida and Arkansas, absorbed a capital of £2,500,000, employed 12,599 hands, and produced £35,745 tons of goods, valued at £2,000,000 sterling. The cotton manufactory, the next great branch of national industry is carried on in seven states, but to a great extent only in five—Massachusetts, Pennsylvania, Rhode Island, Connecticut, and New York. The capital invested (1850) was nearly £15,000,000 the hands employed, 81,151 males, and 59,188 females, and the value of the products, consisting of above 763,000,000 yards sheeting and nearly 28,000,000 lbs. yarn and thread, estimated at rather

more than £12,000,000 sterling. In 1840 the value was only £2,000,000. The goods are seldom of a fine description, and consist chiefly of shirtings, sheetings, calicoes, and heavy denims for negro wear. The woolen manufactory is carried on in 25 states, but to a considerable extent only in eleven—Massachusetts (to the extent of nearly a third of the whole), New York, Connecticut, Pennsylvania, New Hampshire, Rhode Island, Vermont, and Ohio. The capital invested is between £5,000,000 and £6,000,000 sterling, the number of hands 89,252 and the value of the products above £2,600,000. Domestic looms, for the manufacture of woollens, have existed in the states from an early period, but the first large establishments were introduced only about 30 years ago. They have nearly doubled their capital, and more than doubled their products since 1840. The manufactures of iron, cotton, and wool above detailed, may be considered the staples of the United States, but there are various other important branches of industry, among which may be specified articles in wood, silk, flax, and mixed textures; machinery hardware and the products of numerous tanneries, soap and candle works, distilleries and breweries, paint and dye works, glass houses, potteries, brick-works, rope-walks, sugar-houses, and corn, saw of paper and powder mills, &c. Exclusive of the three great staples first mentioned, the value of all other manufactured goods is roughly estimated at about £175,000,000 sterling.

Trade.—This is of such enormous extent that it has already outstripped that of all the countries of the Old World, with the single exception of Great Britain. It may be viewed under the two great heads of domestic and foreign. The former includes the large traffic carried on coast-wise, up the large rivers and rivers, and on the great lakes, the scarcely less important traffic of the basin of the Mississippi, chiefly by steam boats, but partly also by rude flat bottomed barges and even rafts, and the overland traffic between the western and the Atlantic states, consisting principally of hogs, horses, cattle, and mules. The foreign trade is shared to a greater or less extent by all the maritime states of the Union but more especially by the four New England states—Maine, Massachusetts, Connecticut, Rhode Island, and Maine, and next to these, by New York, Pennsylvania, and New Jersey. Among these, Massachusetts takes the foremost place and has secured since a pre-eminence, that though it has less than one-twenty-fifth of the population of the Union, it owns more than one-fourth of the shipping tonnage. The exports consist principally of agricultural products both vegetable and animal including lumber and other articles obtained from the forest. Among the more important items are vegetable food in the forms of wheat, flour, rice, Indian corn, and Indian meal, and animal food, chiefly in the form of pickled pork, bacon, beef and dried fish. But more important than all these is cotton, which alone exceeds the aggregate value of all other exports. After it may be ranked tobacco, raw, but more especially refined sugar, naval stores including tar, pitch, rosin, and turpentine, ashes, tallow and hides, horned cattle, horses and mules, and furs, butter and cheese. Manufactured articles also begin to hold a high place in the list of exports. The more important are cotton goods, plain and coloured, cotton-twist, iron and articles in iron, household furniture, and other articles in wood, soap and tallow-candles, leather raw and manufactured, hats, wearing apparel, spirits, medicinal drugs, &c. The fisheries, in addition to the dried fish already mentioned furnish large exports of whale and other fish oil, sperm-oil, whalebone, &c. and have, in fact, become one of the most important interests of the Union. In 1850 the whale-fishery pursued in all the great seas but more especially S. of the equator in the Atlantic for the black whale, and in the Indian and Pacific Oceans for the sperm-whale, employed 141,012 tons of shipping, manned by 12,000 men and secured 141,946 barrels whale and 98,684 barrels sperm oil, while the cod-fishery, pursued partly off the coast of New England, but to a much larger extent in the seas of British America, as far N. as Labrador and E. to the great bank of Newfoundland, employed 85,946 tons of shipping. An additional 68,111 tons were, during the same year, employed in the mackerel-fishery. To the other leading exports above mentioned, that of gold in the forms both of coin and bullion must now be added. The imports, of which more than one-half enter the port of New York, consist of European manu-

Imported goods of all sorts, but more especially of the finer descriptions—tea, silk, coffee, sugar, spices, wines, spirits, &c. The following table gives the imports and exports from July 1, 1851, to June 30, 1852:—

UNITED STATES DEPARTMENT OF THE ARMY
HISTORIC BRANCH REPORTS FROM JULY 1, 1861, to JUNE 30, 1862

Articles.	Value by kind of shewing.
Gold, bullion, and specie	751,519
Silver do do do	269,287
Dust	1,537,162
Gold, mass, and ornaments	2,397,477
Sugar and molasses	2,664,987
Shredding wool and felt	108,626
Woolen goods, all kinds, &c.	144,770
Articles for schools	9,710
Personal effects of immigrants	18,520
Products of U. States brought back	48,286
	22,611
Wool and woollen manufactures	3,504,391
Woolen goods, all kinds, &c.	4,438,296
Leaves and hemp do	1,721,864
Wool and mixed with do	4,731,820
Clothing	748,782
Laurel, dressed, &c.	35,077
Hair oil, and hair cloth	74,615
Grass do and bags	368,065
Woolen cloths, &c.	41,160
Hats, English, Russian, &c.	3,377,890
Iron, pig and bar, sheet, &c.	5,806,864
Iron and steel, rolled and cast	1,617,778
Steel, cast, sheaf, &c.	546,730
Copper raw and manufactured	101,581
Tin, do do	61,100
Lead, do do	258,864
Brown and pewter do	21,686
Articles of iron and silver jewelry &c.	100,200
Clocks, watches, &c.	690,800
Metal and other utensils	107,110
Glass and glassware	186,511
Wares, pottery, painted, Japanese, &c.	770,646
Paper and paper articles	116,459
Printed books	13,646
Leather and leather articles	31,800
Saddlery	68,268
Tax	520,511
Wool as bulk and manufactured	328,945
Oak	81,619
Marble, and marble articles	20,120
Shoes	21,900
Buttons, buttons, and buttons	91,860
Umbrellas, parasols, &c.	15,444
Wool, hides and skins	846,601
Wool, spinnit, &c. &c.	846,927
Oil and tallow of foreign fisheries	770
Oil, tinned oil, foreign	180,651
Quintessence	36,000
Dye-woods	74,606
Frank	698,006
Castles, soap, butter	236,866
Sulphur, milk, tallow, &c.	82,190
Children of Iran	82,061
Indigo	82,165
Tobacco, raw and manufactured	171,673
	108,673
Patata, tobacco, sugar, of lead	18,711
Cargoes, with raw materials	248,880
Rope	116,400
Salt	233,627
Coal	81,265
Bread-cakes	6,948,000
Better clothes, provisions, &c.	81,264
Produce	22,678
Fish	185,777
Articles not specified	5,697,000
Miscellaneous specified	108,000
All imports to San Francisco	92,717
Total	240,184,000

UNITED STATES' EXPORTS from JULY 1, 1951, to JUNE 30, 1952

Articles	Value, 1911.	Value, 1925.
Print and printed matt.	\$ 90,282	\$ 97,638
Wool and other fib oil	269,436	309,919
Wool and other fib	37,000	37,000
Skies and furs	139,438	128,702
Clothing	30,120	30,615
Timber and other lumber	686,791	678,719
Barbed wire	54,000	54,000
Wool slaves, not plain, etc.	512,708	561,585
Adhes, put and paint	129,918	101,625
Cattle, hogs, poultry, etc.	807,970	851,686
Durable furniture	\$2,111,270	\$2,266,148

UNITED STATES' EXPORTS--(Continued)

Articles.	Value, 1931.	Value, 1932.
Brought forward	1,111,970	1,866,185
Butter and cream	15,815	15,877
Eggs, fresh, in shell	872,485	772,075
Honey, natural, and honey	45,404	87,708
Waxes		
Beeswax	3,010,118	2,804,287
Indian wax and resin	977,058	424,921
Rye, tallow, and other greases	54,515	54,515
Suet	50,100	12,875
Soyabean oil	70,867	67,780
Tallow	654,101	450,410
Soyabean meal	20,000	23,000
Apples	14,578	9,737
Tallow, raw	1,043,900	1,008,067
Suet and lard	325,700	325,700
Cotton seed	75,023,563	77,032,148
Hemp	9,325	9,730
Soyabean	12,875	12,875
Sugar and molasses	63,138	27,498
Flaxseed	3,708	11,837
Soyabean cake and meal	72,546	50,000
Soyabean-oil cake	30,108	30,000
Lumber, boards, and shingles	2,708	36,778
Skinner and other leather	5,600	4,738
Household furniture	11,837	11,837
Coaches and other carriages	59,334	26,425
Other manufactures of wood	415,971	386,617
Saddlery and harness	4,641	14,000
Wax	34,607	78,010
Skins from grain and straw	74,637	74,637
Air, putter and stir	11,808	9,610
Lined cloth and tarpaulins	39,085	30,537
Upholstery	10,411	18,000
Iron, steel, tin and nails	43,191	33,798
Owings and all iron manufactures	408,000	427,000
Gas-pipe	20,217	20,217
Paper, leather, and manufactures of paper	70,761	54,010
Cotton goods and yarn, etc.	1,648,241	1,384,000
Woolen goods	1,000	3,738
Woolen apparel	382,379	50,048
Clothes, hosiery, and hosiery	7,718	8,644
Sewing machines and types	9,146	9,146
Books and maps	70,761	43,108
Paper and stationery	31,138	23,807
Musical instruments	1,146	15,655
Paints and varnishes	11,967	17,074
Veneers	9,368	2,440
Pottery and glass ware	41,708	60,609
Copper and gold-leaf	18,728	4,000
Tin, pewter and lead articles	9,800	9,360
Articles in marble and stone	2,490	17,441
Articles in glass and other	11,967	7,877
Artificial flowers and jewelry	54,903	59,900
Ivory and bone	4,649	5,710
Pearls	11,968	17,000
Coal	23,796	37,761
Lard	2,855	4,506
Ice	3,000	23,817
Soyabean articles specified	32,001	6,077
Raw produce not specified	222,300	239,156
Manufactured articles, do.	776,000	674,108
Total	238,538,900	238,472,000

A SELECTION of the PRINCIPAL COUNTRIES to which EXPORTS were SENT and from which IMPORTS were RECEIVED, together with their VALUES, in FOUNDED STRAITS, in 1862.

Countries	Imports	Exports
Burma	810,226	\$41,000
Hong Kong	1,866,332	1,274,391
Netherlands, with Colonies	1,644,375	1,644,375
Philippines	410,000	\$40,744
Great Britain and Ireland	18,003,841	15,113,196
British East Indies	146,443	150,296
British West Indies	263,137	274,413
Canada	917,786	1,243,413
Other British American Colonies	565,166	565,500
Other British Colonies	41,000	17,659
Other British Colonies and Possessions	22,000	17,659
France and Colonies	4,195,500	4,920,408
Germany	1,010,557	1,010,557

Yugoslavia	606,773	148,000
Brazil	2,464,088	\$40,328
Argentine Republic	415,211	140,000
Chile	112,000	112,000
Others	3,130,793	

court as Congress may from time to time establish. These inferior courts consist of present circuit courts and district courts, the former held by a justice of the supreme court and a district judge conjointly, and the latter by a district judge alone. All these judges hold their office during good behaviour and are removable only on impeachment, but in order to form a secret side of the judicial system of the United States, it is necessary to remember that the courts now mentioned judge only in matters which fall under the category of national, and that each separate state administers justice by its own judges, many of whom owe their appointments to the influence of the people, and held them only for limited periods.

Finance.—The general government derives its revenues, without direct taxation from customs, sales of public lands, and miscellaneous sources, and has its treasury in a condition which most of the states of the Old World may well envy. In 1850, its public debt did not amount to \$14,000,000 sterling. Its receipts in the same year amounted to nearly \$10,000,000 and after defraying all expenditures and employing nearly \$1,500,000 in the extinction of debt, left a balance in the treasury of \$1,330,000.

Army and Navy.—The policy of the United States has hitherto been opposed to the maintenance of a standing army as dangerous to freedom, and hence its regular force is only 10,317 men, including officers. For aggressive warfare, such a force is obviously insufficient, and except on such very extraordinary occasions as the late Mexican war its power has not been often tested. For defensive warfare few countries are more amply provided. Not only is it strongly protected by the nature of the surface, covered with forests and swamps through which an invading force, however great, could scarcely force its way, while flanked by very inferior numbers, but the militia, composed of some legal exceptions, of all male citizens between 18 and 45 is in respect of courage and training, inferior to no militia in the world and has now reached the number of 1,353,334. The navy, though always a favorite force with the citizens of the Union, has scarcely yet had an opportunity of proving its prowess in what can be called a general naval engagement. When individual ships have met those of the enemy the American seamen has seldom been found deficient, and during the last war with Great Britain, many successes occurred in which British were forced to strike to American frigates. It is but fair, however, to remind the American citizen when planning himself on such successes, that while the British vessels engaged in these encounters were truly frigates, the American vessels were frigates only in name, and for the most part in respect both of dimensions and equipment, were truly ships of the line. The navy consists (1853) nominally of 11 ships of the line, 12 first-class frigates, 1 second-class frigate, 30 sloops of war, 4 brigs, 4 schooners, 15 steamers, and some small craft. The actual expenditure on the navy in 1850 was \$1,084,623.

People.—In 1790 the population of the United States was 3,929,827. In 1820, a period of thirty years, it had increased to 9,688,191, and in 1850 another period of thirty years, has been found, partly, however, in consequence of the accession of new territory, to amount to 23,338,063. In regard to this population a very marked distinction exists between the N. and the S. states. In the former, with a few exceptions, only one kind of human being is recognized, the constitution throws its shield over all, and freedom, to a degree long considered to be incompatible with the existence of any kind of government, is enjoyed by all as an inalienable birthright. In the latter a very different scene presents itself and we see not one kind of human being but two, easily distinguished by their features, the one being white and the other black; and, subjugated, still more remarkably distinguished by their relative positions, the one being masters and the other slaves. In judging of the social condition of the people, it is necessary to keep this distinction always in view, because the great advances in civilization, which have undoubtedly been made in the N. states, certainly cannot be recognized to the same extent in the S. states, where more than one-third of the whole population is regarded, in the eyes of the law and systematically treated as mere chattels, in the same category with horses, cattle, and hives of bees. But subject to this caveat, it must be admitted that the great body of the people in the United States are in circumstances

of greater comfort than is common in European countries, and during the comparatively short period of their existence as a nation, have given decided proof of great physical, intellectual, and moral energy. In regard to religion, the tendencies of an establishment have seemed to them as inconsistent with pure democracy that they have not only rejected it, but have been careful in amending the constitution to insert a clause providing that Congress shall make no law respecting the establishment of religion. The different religious denominations thus left to depend on their own resources have betrayed no want of activity, but have been able to diffuse themselves widely over all the states of the Union, and give, not only to the larger towns, but remote and scattered villages, every appearance of being amply provided both with churches and ministers. The following table gives the names, churches, and aggregate accommodation of the different religious denominations. (See also table, p. 1189.)

RELIGIOUS DENOMINATIONS IN UNITED STATES.

Worshippers.	No. of Churches.	Aggregate Accommodations.
Baptist	4,779	3,130,878
Christian	818	594,080
Congregational	1,676	726,177
Dutch Reformed	826	103,326
Episcopal	1,428	696,313
Free	361	108,646
Friends	714	237,323
*German Reformed	327	146,535
Jewish	81	18,378
*Lutheran	1,043	151,000
Methodist	110	99,900
Methodist	19,467	4,379,332
Mormon	281	113,182
Presbyterian	4,994	1,040,915
Roman Catholic	1,113	610,910
Swedenborgian	18	5,070
Unitarian	619	113,348
Unitarian	938	1,077,997
Universalist	484	116,547
Minor Sects	243	113,347
Total	34,911	12,899,369

* The German Reformed and Lutheran denominations use the same building in many places.

The importance of education under a government where the whole power is directly as well as virtually in the hands of the people, has long been perceived, and strenuous efforts have accordingly been made, at least in all the older states, in furtherance both of a superior and of a common primary education. The necessary expenditure is provided partly by means of school funds accumulated from various sources, and partly by taxation. In 1850 the total number of colleges and schools was about 100,000 of teachers, 115,000; and of scholars, 4,000,000, or at the rate of one for every five free persons. In speaking of free persons, we are again reminded of the millions of unhappy blacks, who are not only not educated, but denied the common rights of humanity and subjected to any treatment, however abominable, by which the greatest amount of profit can be obtained from their bare skin and sinews.

Thus the slave system is the plague spot of the Union, and so long as the S. states continue to carry it on, and the N. states continue to sanction and abet it, by not only recognizing the rights of the slave-owner but lending him the full authority of their laws to recapture the poor negro who may have escaped from his chains, and send him back to his cruel bondage, humanity will shudder at the very mention of American freedom, and smile scornfully at all that may be said of the high standard of American civilization.

History.—The first English colony within the limits of the Union was settled in Virginia, in 1607. It was sent out by two merchants companies, called the London company and the Plymouth company, and consisted of only 100 individuals, who were reduced, at the end of a year, to a third of their number from disease and poverty of food. A new colony, sent out in 1609, proved equally unfortunate, but new settlers continuing to arrive, a better footing was ultimately obtained, and a colonial assembly was for the first time convened in 1619. In 1636 a company, incorporated by royal charter, settled in Massachusetts, and laid the foundation for the colonies of New England. They consisted chiefly of Puritans, whom the persecutions of a cruel and bigoted government drove

from their homes to seek shelter in the wilds of America. Their strict religious habits and zealous assertion of their political rights, are still characteristic of their descendants. Unfortunately the conduct of these new settlers was very inconsistent. While claiming unlimited religious freedom for themselves, they denied it to others, and numerous instances of their persecuting tendencies are on record. The states of Maryland and Virginia, colonized chiefly by English, Roman Catholic and royalist refugees, were remarkable for the development of an aristocratic and military spirit. The central states were of a more mixed character, having to a great extent been colonized by Dutch and Swedes, who remained in the country after it was ceded to Great Britain. Pennsylvania, colonized by the Society of Friends, long preserved much of the character of its founders, and generally observed a calm neutrality amid the convulsions of its more excitable neighbors. But it is impossible to enter into a detail of the origin and progress of the different states now composing the Union. Their early history is merely that of a young colony occasionally depressed but more generally prosperous, and seldom engaged in transactions which possess much general interest. The most remarkable events were those of the wars which Great Britain and her colonies were obliged to wage with France, and which terminated as is well known, by the cession of Canada to Great Britain in 1763. No sooner was this peace concluded than the tranquillity and prosperity which it promised were rudely disturbed by a very harsh, impolitic, and almost inhuman procedure on the part of the mother country. On March 10, 1764, the British Parliament resolved that it was proper to charge certain stamp duties on the colonies. This resolution was followed, in 1765, by an act for raising a revenue by a general stamp-duty through all the American colonies. The excitement, opposition, and violent commotions produced by this act led to its repeal in the following year, but the conclusion then attempted to be profound was defeated by a preamble, which asserted a sovereign right in the British Parliament to tax their colonies as they thought best expedient. This preamble was not long allowed to remain a dead letter, for, in 1767, an act was passed imposing a duty on tea, paper, glass, and painters colours, introduced into the colonies. The same violent opposition, and the same course of timid and irresolute, yet most obnoxious policy, were again exemplified. In 1770 all the duties were repealed except that on tea. The controversy between the mother country and her colonies involved an important principle the former asserting her right to tax generally and the latter denying her right to tax for any but colonial purposes. By retaining the duty on tea the whole ground of controversy remained as before and consequently, as might have been foreseen and was distinctly announced in the almost prophetic eloquence of Burke, the controversy itself raged more fiercely than ever, as if a new element of bitterness had been infused into it. The colonies closed their ports against the articles on which duty was imposed, and in 1773 when British ships loaded with tea attempted to effect a landing in the port of Boston the inhabitants seized them and threw the cargoes into the sea. In 1776 hostilities actually commenced. A battle was fought at Lexington in Massachusetts, and was followed shortly after by another more decisive at Bunker's Hill near Boston, in both of which the British were defeated. The colonists had the wisdom or good fortune to give the chief command of their forces to the immortal Washington, and in order to furnish him with the means of war, bills of credit were issued to the amount of \$4,000,000. One great cause of the success of the colonists undoubtedly was the sluggish and irresolute manner in which the British carried on the war by sending out isolated detachments of troops, to be overpowered and destroyed piecemeal as fast as they appeared. The only excuse for Britain, though a very poor one, is that she did not anticipate a very determined opposition, and almost hoped to put down her refractory colonies with as much ease as an ordinary popular outbreak at home. Hence now there her weight into the scale, and helped to turn it completely in favour of the revolted colonies. The British were foiled in almost every encounter, and in 1781 the surrender of Cornwallis at Yorktown, to the combined French and colonial forces under Washington and Rochambeau, virtually terminated the war. In 1783 Great Britain, after a contest which sullied her laurels,

Vol. II

and had cost a lavish expenditure of blood and treasure finally recognized the independence of the United States, which, on the establishment of tranquillity, wisely turned their attention to the improvement of their political constitution and social condition, and the development of their vast internal resources. An unhappy war arose with Great Britain in 1812, but after two years' continuance and doubtful success, was terminated in 1814 by the treaty of Ghent. Since then large additions have been made to the extent of the Union, partly by the settlement of immense territories previously purchased from France under the name of Louisiana, partly by the purchase of Florida, and the settlement of the Oregon boundary and partly by the large conquests achieved by the rather equivocal instrumentality of a Mexican war. Her states originally only 13 in number, are now 31. All danger of external aggression is at an end, and henceforth, if she will only be true to herself, and do one great act of lady justice by letting the oppressed go free, there is nothing to prevent her from occupying a foremost place among the nations of the world.—[Fisher's *Geography of the United States* Baldwin and Thomas *Geography of the United States*, Lyell's *Traité*, first and second journeys W. UNIA, a river, Russia, rises in gov. Volynia, flows S into gov. Kozlovka, then S E and S S W and joins a bank Volga total course, about 240 m., principal affluents the Viga and Vafa, both on its bank.

UNKEE, a tn. Rhodus Prussia, gov. and 31 m. N. W. Coblenz 7 bank Rhine, with a R. Catholic church, a synagogue, and a trade in cattle and wine. On the opposite side of the river and stretching so far into it as partly to obstruct the navigation, and form a very rapid current is the Uchel stein, a lofty precipice of basalt two miles long, extensively quarried for road and pavement. Pop. 827.

UNKIAR SHANLI [I indignant place of the Emperor] a vil. Asiatic Turkey on the Bosphorus, 8 m. N. V. B. Constantinople, where there is an extensive paper-factory. A treaty was signed here between Russia and Turkey on the 26th June, 1823.

UNLIAGEN a tn. Württemberg, circle Danaba, bail Riedlingen on the Kanau, with a church and old nursery and several breweries and mills. Pop. 1008.

UNNA a walled m. Prussia, prov. Westphalia, gov. and 19 m. N. W. Arnberg, on the Kottelback with a court of law and other public offices a Protestant and a R. Catholic church, an hospital, manufactures of pottery, tile-works, a brewery and distillery. The extensive salt-works and salt baths of Künigshorn supplied by brine-springs are in the vicinity. The mysterious court or society known by the name of the Vehmgericht, led its head-quarters here. Pop. 5573.

UNRUBIADT Kason, or Kasonova, a tn. Prussia, prov. and 54 m. S. W. Posen on the Obra. It is well built and has a Protestant church, manufactures of cloth, and a trade in corn and cattle. Pop. 1879.

UNST, the most N. of the Shetland isles, Scotland lat. (N. extremity) 60° 55' N., lon. 1° 0' W. length, 10 m. average breadth, between 3 m. and 4 m., area, about 86 sq. m. The shores are much indented with bays and creeks, and around the coast are numerous natural caves. The soil is on the whole tolerably fertile, and the pasture-grounds are mostly covered with a short tender heath offering excellent feeding for sheep. The two principal harbours are Uya Sound on the S., and Balla Sound on the E. Woollen stockings, and other woollen articles, are made here in considerable quantities, but the inhabitants are chiefly employed in fishing and in agriculture. Pop. including ad. Uya at the E. end, 2277.

UNSTRUT, a river Prussia, rises in gov. Erfurt, S. E. of Hildesheim; flows directionally E., and joins L. bank Saale near Naumburg. total course, about 180 m. its principal affluents are the Gera, Wipper and Helme. In most places it is deep, and flows sluggishly.

UNSWORTH a hamlet, England co. Lancaster 5 m. S. E. S. E. Bury, with a neat and commodious chapel of ease, several other places of worship, and an endowed school, inhabitants employed as agriculturists and in cotton-mills, pot-works, and blacksmiths. Pop. 826.

144

UNTER-BOUREN, a vil Baden, circle Middle Rhine, bail, and near Baden; with a parish church. Pop. 1146.

UNTER-GOERZ, a vil. Baden, circle Middle Rhine, bail, Breisach; with a parish church. Pop. 1060.

UNTERJEESINGEN, a vil. Württemberg, circle Schwarzwald, near L. bank Ammer. Pop. 1323.

UNTERKÖCHEN, a vil. Württemberg, circle Jaxt, on the Kocher; with a parish church, a gunpowder, paper, and other mills, and extensive iron-works. Pop. 315.

UNTERMEIMINGEN, a vil. Austria, Tyrol circle Innt, not far from Bhl; with a church and a school. P. 1607.

UNTERMÜNSTERTHAL, a vil and par. Baden, circle Lower Rhine, in a valley of same name, with a church, and tile-works. Pop. 1920.

UNTERMEIXINGEN, a vil. Württemberg, circle Neckar, bail. Vaihingen; with a church, a chapel and two castles, one of them an old feudal ruin. Pop. 1029.

UNTERSCHENBERG, a vil. Saxony circle Zwickau, bail. Vohlsburg; with manufacture of articles in brass and wood musical instruments, lace and embroidery and a trade in wood. Pop. 1078.

UNTERSEEN, a tn. Switzerland, can and 36 m S.E. Bern, on the Aar, between Lakes Thun and Brienz. With exception of the townships and castle, which are of stone, it is built entirely of wood. There are a number of saw-mills, and the principal manufacture is wooden boxes. Pop. 1110.

UNTERSTORFHEIM, a vil. Württemberg circle Neckar S.E. Gmünd, r. bank Neckar, here crossed by a bridge, with a church, a granite-quarry and a trade in wine. P. 2040.

UNTERVATE, a vil and par. Switzerland, can. Grisons on a mountain of the same name with two churches. Near it are the ruins of three medieval feudal castles. Pop. 1150.

UNTERWALDEN (Latin, *Unterwalden* French *Unterwald*) a central canton Switzerland, bounded N by the Wald-stättersee or Lake of Luzern, W. can. Luzern, S. Bern, and E. Uri. greatest length N.E. to S.W. 25 m. breadth, 21 m., area, 243 sq. m. Part of greater part of the surface is occupied by mountains, which, in various groups and isolated masses of larger or less dimensions, intersect it in all directions and form scenery of remarkable beauty and sublimity. The general slope is towards the N. the mountains attaining their greatest height in the S. and thence descending gradually towards the lake. Few of these mountains rise above the snow line. The most remarkable summits are those of Mount Pilatus, which forms a kind of nucleus for all the chains of the canton, and of Mount Titlis, with its glaucous crown of ice and snow. The most important rivers are the Mülch and the Aa, which both flow N. and accumulating almost all the waters of the canton, discharge them into the Lake of Luzern. This lake, about one-fourth of the area of which may belong to the canton, is by far the largest, but there are many others of considerable extent, the most deserving of notice are Lakes Bernese and Lagone. The whole of the canton belongs to the chalk formation, in which a great number of remarkable caverns occur. Corresponding to the two largest streams are two principal valleys of the Engberg and Bernese, which above the greater part of the surface between them, and are opened into laterally by a number of minor valleys. There is little flat land in which the operations of agriculture can be successfully carried on, but the soil is generally fertile, producing far up on its mountain-sides extensive forests of excellent timber and lower down plantations of chestnuts, and great quantities of apples and pears. In some favoured spots the culture of the vine is attempted but not with much success. The great wealth of the country is in its pastures, and the produce of the cattle which are fed upon them. The best-known division of Unterwalden is into the high-wood and the Ob- and Nid-wald (Upper and Lower), the limits of which appear to have been determined by a vast forest which has between them. The chief peaks of the former is Stans- of the latter, Bernese. The great majority of the inhabitants are Roman Catholics, and speak German. The government is an extreme democracy—the legislative power being lodged in the whole of the male inhabitants of 20 years of age, who meet annually in a general assembly to make laws and appoint the principal functionaries. Unterwalden, above with Schwyz and Uri the honour of having formed the nucleus of the Swiss Confederation. The contingent of men which it now furnishes to it is 882 Pop. (1850), 25,125.

UNTERWIESENTHAL, a tn. Saxony, circle Eriksbach, bail, and near Wismuthal 1 bank Pohlsdorf; with blast-furnaces and other iron-works, a paper, saw, and other mills. Pop. 1778.

UNX (San-Martin-de-), a tn. Spain, prov. Navarre, about 25 m from Pamplona with a church, court-house, prison, primary school, the remains of an old castle a stone-mill, and a trade in cere, oil, and wine. Pop. 1099.

UP CANTON, par. Eng. Devon; 1108 sq. Pop. 94.

UPA or Oupa, a tn. Bengal, rises near the centre of gov. Tulu; flows N.W. to the town of Tulu, then W.S.W., and joins r. bank Oka on the frontier of gov. Kalaga; total course, about 150 m.; principal affluents, the Uper, Chavama, Chut, Tullia, and the Plova. It becomes navigable at Tulu, and communicates with the Don by the canal of Ivanovka.

UPAHAIL, a vil. Hindoostan, N.W. shore, Bay of Bengal N. Cinnara, 16 m. N.E. Yangapala. It stands in a deep bay, bounded inland by bold mountains—scenery, and as one of the most considerable fishing-stations on the coast, above 100 catamarans and several man-of-war-boats being sometimes seen engaged.

UPCHURCH, par. Eng. Kent, 6128 ac. Pop. 407.

UPHALL, par. Scot. Linlithgow, 4 m by 8 m. F. 1831.

UPLEADON, par. Eng. Gloucester; 1207 ac. P. 275.

UPLEATHAM, par. Eng. York (N. Riding) Pop. 447.

UPLANDMAN, par. Eng. Devon 2913 ac. Pop. 336.

UPLYME, par. Eng. Devon, 8199 ac. Pop. 1039.

UPMINTER, par. Eng. Essex, 3378 ac. Pop. 1228.

UPOLU or OAROTOOA, the second largest of the Navigators or Samoan Isles (in. (Alpha)harbour N coast) 13 48' 56" S; lon 171° 41' 12" W (α). It is of irregular form, being broken into sharp peaks and hummocks, but is of great elevation. E.S.E. to W.N.W. 40 m., breadth, about 10 m. Here and there broad and fertile valleys occur yielding coconut, plantain, breadfruit, &c., in great abundance. The island is covered with timber to the top. The shore is lined with a coral reef which is low and then interrupted by shoals, and forms many and convenient harbours, in two of which Apia and Uafale, both on the N. coast, there are anchorages for large vessels. In the interior of the island is an extinct crater, in which there is a lake, the edge of the crater is 2570 ft. above sea-level and the descent to the water inside 180 ft. The rocks of Upolu are volcanic, and consist principally of basaltic lava, in which are found angles, felspar, albite, and chrysolite. Many deep gorges occur in the island, in which there are water-falls 750 ft. in height.

UPOTTERY, par. Eng. Devon 5830 ac. Pop. 1042.

UPPERGRUECH, par. Ireland, Tipperary; 13,902 ac. Pop. 2850.

UPPERMARK, a vil. Rhenish Prussia, gov. Düsseldorf, on the Rhine. Pop. 1100.

UPPEROHAM, a market tn., par. Eng. England, on. Rut land, 85 sq. m. N.W. London. It has a splendid church, in the ancient English style, with a tower surmounted by a lofty spire three Dissenting chapels, and a free grammar-school. Area of par., 1210 ac. Pop. 2063.

UPPINGTON, par. Eng. Salop, 755 ac. Pop. 98.

UPBALA, a tn. Sweden, 18 m of same name, on the Fyris, here crossed by two stone-bridges, near its confluence with the Skel one of the N. creeks of Lake Mälare, 39 m. N.W. Stockholm. It is built with considerable regularity, is the seat of an archbishop, the residence of a governor, and the seat of several courts and public offices; and contains two churches, one of them the cathedral, an ancient Gothic structure in brick, flanked by two Gothic towers and containing many interesting monuments, among others those of Gustavus Vasa and Linnaeus an old castle of great historical interest; the university, founded in 1477, provided with 47 professors, and attended by 850 students; the library of 100,000 vols., occupying a handsome building, and rich in rare books and MSS., particularly the *Codex Arsenianus*, a copy of the Gospel in Gothic, as translated by Bishop Ulfilas at the end of the 4th century; the palace of Gustavus Vasa, half ruinous, but partly occupied by the governor; the house in which Linnaeus lived.

the old and new botanical gardens, the museum, townhouse, senate-house, archbishop's palace, cathedral-school, academy, observatory, infirmary, &c. Besides Linnæus, the university counts among its professors who have earned an European reputation, the names of Celsius and Bergman. Pop. 6308.—The Ural is bounded, N. by the Gulf of Bothnia; E. by the Stockholm; S. Lake Mälar which separates it from Närke; W. by the Baltic, and N.W. Götter, greatest length, N to S, 56 m., mean breadth, about 32 m.; area, 1566 sq. m. The coast-line, which is of limited extent, presents one fine bay, that of Lofas. The interior consists generally of undulating plains, in which numerous lakes occur, but the only stream of any importance is the Dal. In the S. the soil is fertile, and the scenery beautiful and picturesque, but the N. constitutes a bare, bleak, and in many parts barren region. The grain raised equals the home consumption. Iron minerals constitute one of the principal sources of wealth. Iron in particular has long been worked, and its quality cannot be surpassed. In addition to it, the only export deserving of notice is cattle. Pop. 57,700.

URSALA (GAMLA), or OLD URSALA, a to Sweden about 3 m N of the present Upsala. It is next to Högarna, the most ancient residence of the Swedish kings but is now reduced to a small village. The church has been built out of the ruins of old heathen temples, and its tower is understood to have formed part of the temple of Odinn. Among the mounds in the vicinity are the graves of Odin Freya, and Thor.

UPWELL, a vil and par England, partly in co. Cambridgeshire, and partly in co. Norfolk, on both sides of the River. It has a handsome parish church, with an octagonal tower and a lofty spire, a chapel of ease, Baptist, and Primitive and Wesleyan Methodist chapels, and a charitable endowment. The inhabitants are chiefly employed in agriculture. Area of par, 2174 ac. Pop. 5377.

UPWOOD, par Eng. Hunts, 1809 ac. Pop. 416. UPACHI, a walled to. Württemberg, circle Schwabenswald cap. hall at the conference of the Iron and Rhine with a castle, a church, seminary, and hospital, manufactures of linen and paper, dyestuffs, breweries, and distilleries, parks, vineyards, and oil mills, and a trade in these articles, and in fruit. Pop. 3058.

URAGU-D-ORU, a vil and com Austrian Italy gov Milan prov and 20 m W Brescia, r bank Oglio. It has a church, a castle of a quadrangular form surrounded by a fosse, and a trade in corn, wine, and silk. Pop. 1660.

URAL, URAL, or JAR, a river Russia which rises in the Ural Mountains, in the N.W. of Gov Orenburg, near lat. 63° N. flows S. past Verkh-Ural—Orenk, then W through an opening in the Ural chain to Orenburg, where it turns S.W. and then S., retaining the latter direction till it reaches the N. shore of the Caspian, and enters it by several mouths, the largest of which passes close to Orsk. Its whole length is not known, but its direct length is estimated at 550 m and its basin at 22,300 sq m. Its principal affluents are, on the right, the Klaf, Tanak, and Schumra and on the left, the

Sunduk, Or, Ilik, Otrva, and Gratschi. Its upper course is along a channel bristling with steep and lofty rocks the lower course is through extensive steppes and saline marshes. It abounds with fish, particularly towards its mouth, where the Ural Cosmika have extensive fisheries. The Ural is supposed by some to be the ancient Rhymanus. Its delta, already mentioned, is rapidly increasing, and several of its branches, which were navigable a few years ago, are now dry and overgrown with reeds.

URAL, or OTRAL MOUNTAINS, a long and comparatively narrow chain, stretching nearly between N and S. from the shores of the Sea of Kara in the Arctic Ocean in lat. 68°, to the S. frontier of Gov Orenburg, about lat. 50°. During the whole of this extent of 18 it forms the proper boundary between Europe and Asia. According to some geographers, the chain, instead of terminating here may be traced much further S., along the high grounds between the Caspian Sea and Lake of Aral. The N. Ural is constituted more or less of a simple central ridge, fringed to some extent by low parallel embankments. It has not been properly examined, at least on the E. side beyond lat. 55° N. where it appears to be covered with impenetrable forests and deep morasses still left to the wild inhabitants, Ostiaks, Voguls, or Samoyedes. Its average height is from 2000 ft. to 2500 ft. but it has many lofty rugged summits, chiefly on the E. side of the crest. Among these are the Donsatkin Kamen in lat. 60° 15' which is estimated at 2887 ft. and the Kondakofskoi-Kamen in lat. 59° 20', estimated at 5720 ft. apparently the culminating point of the whole chain. Unlike the N. the S. Ural forms many separate longitudinal ridges, which trend S.E. and S.W. diverging in a fan shape from a common nucleus. Its most remarkable summits are the Tagan near Zlatoust, lat. 55° 15' 3600 ft., and the Iremel, lat. 54° 40' 5671 ft. With the exception of the plateau of Sakmara, nearly all the S. Ural is picturesque and highly diversified and is to a great extent a pastoral Bashkir country. The W. flank of the Ural chain is approached across a low undulating region occupied by that immense development of the youngest rocks of the paleozoic era to which Murchison has given the name of the Permian system. Rising from beneath the Permian system, and hence geologically beneath those here locally above it, occur in descending series carboniferous old rocks or Devonian, and Silurian rocks, all occasionally full of fossils. The crest of the chain consists chiefly of chlorite, quartzite, and metamorphic paleozoic rocks, which are immediately succeeded towards the E. by rocks of igneous origin. In these igneous rocks, and the metamorphic strata in contact with them occur all the richest mines of gold, platinum, copper and magnetite iron for which the chain is renowned. On the E. flank the Permian deposits are altogether wanting. Their place is occupied by low hills of older granite and other eruptive rocks, paleozoic and metamorphic deposits, covered towards their E. edge by tertiary accumulation, and detritus in which much much and rhinoceros bones are mixed up with the sand and shingle of the gold washings. The vegetable production which may be regarded as the type of the whole chain is the *Picea obovata*, accompanied in the N. Ural by firs and birch only but in the S. by numerous broad leaves and plants of warmer latitudes. In the S. also are many broad valleys of remarkable fertility with occasional hills of deep black loam, covered with splendid natural crops, and rank vegetation. The principal rivers fed by the Ural chain are the Pachelma and numerous affluents of the Ob, belonging to the Arctic Ocean and the Kama and Ural belonging to the Caspian.

URALSK, two places, Russia, gov Orenburg—1 A tm, cap. dist., r bank Ural, 155 m W S.W. Orenburg. It is a large place, surrounded by palisades, and an irregular rampart, is the seat of several important offices; is entirely built of wood and has five churches, and a considerable trade particularly in fish taken in the Ural. A considerable proportion of the inhabitants are Cosaks. P (1849), 10,822—2 (Verkh-Ural), A fortified town, cap. dist., r bank Ural, here crossed by a wooden bridge, 140 m S.E. Ural. Pop., exclusive of the garrison, 870.

URAR, a vil and com. in Sardina div Cagliari prov Barchi, cap. dist., 7 m S.W. Alai. It has a trade in corn and cattle. Pop. 2600.

URATUPPA, ORATUPPA, or URATUPPA, a to. Khansat of Bokhara, 80 m N.E. Samarcand, and 100 m W.S.W.

Kokan. It is surrounded by lofty walls, with a deep fosse outside, consists of straight streets lined with houses of earth; and has extensive manufactures of fine shawls, and an important trade, favoured by its position on the great thoroughfare between Bokhara and Kokan.

URBANA, a *vill* and township, U States, Ohio, on the Columbus, Figue, and Indiana, and the Mad River and Lake Erie railways, 39 m. W. Columbus. It has several churches, an academy, and manufactures, and a considerable trade. Pop. (township), 3414. (village), 3020.

URBANIA [formerly *CASSEL-DEURANTE*] a *tin* Italy the Marche, deleg Urbino-Pesaro, on the Metauro, 6 m. S.W. Urbino. It has a richly decorated palace, and a convent with some fine frescoes by Giulio Romano. Pop. 3700.

URHAI or *URHAWO*, a *vill* Austria, Moravia, circle Znaim, with a church. Pop. 1048.

URBERACH a *vill* Hesse-Darmstadt, prov Starkenbach, near Offenbach with a church. Pop. 1213.

URBINO a *tin* Italy, one of the capitals of deleg Urbino-Pesaro, on an isolated hill in the midst of black and smoke mountains, 45 m. W. N. W. Ancona, fortified and defended by an old castle, the seat of an archbishop, and the seat of several provincial courts and offices. Among the buildings deserving of notice are the ducal palace, at the time of its erection the finest edifice of the kind in Italy and still in some respects without a rival, equally remarkable for the lightness of its proportions and the richness of its decorations, particularly arabesque carvings the cathedral, several other churches, and the theatre, remarkable as the place where the first Italian comedy was represented. The chief manufactures are pins, needles, articles in brass, and some furs. Urbino is the birthplace of the painter Raphael hence called Raphael's Urbino. Pop. 7000.

URBINO-PESARO a deleg Italy bounded, N by deleg Forlì and the republic of San Marino W by the duchy of Tuscany S.W. and S. by deleg Perugia, S.E. deleg Ancona, and N.E. the Adriatic. Area, 1094 sq. m. The surface is mountainous, particularly in the W, from which it gradually descends N.E. all its streams, of which the principal are the Foglia, Metauro, and Cesano, taking that direction and pursuing courses nearly parallel to each other. The highest mountains are generally bare and sterile but those of less elevation have excellent pastures, on which vast numbers of cattle, sheep, and swine are fed. The lower slopes are covered with the vine, olive, mulberry and ordinary fruit-trees. The plains raise rich crops of corn, hemp and flax. Much attention is paid to the raising of bees and silk-worms. Some of the silk produced is the finest in Europe. Pop. 237,866.

URCHFONT, par Eng Wills 6873 ac. Pop. 1604.

URDA a *vill* Spain, New Castle prov and 34 m. S.E. Toledo. It has a townhouse, granary primary school parish church, and two hermitages. Pop. (chiefly agricultural) 2084.

URDENBACH a *vill* Rhensish Prussia, gov Düsseldorf on the Rhine with a church, and manufactures of woollen cloth and yarn. Pop. 1077.

UREGAKI, par Irel. Lincolish 4944 ac. Pop. 1903.

URESHO, a *tin* Japan Isl. Kuma, celebrated for its thermal medicinal waters, which are used both internally and as baths in cutaneous disorders, gonorrhea, paralysis, rheumatism, &c. The waters are pellucid, have a slight taste of sulphur, contain sulphate and martial salts, and have a temperature of 200° Fah. The environs of Uresho bear striking marks of violent volcanic action.

UREXWEILLER, a *vill* Rhensish Prussia gov Treves, circle and near St. Wendel. Pop. 1016.

URFAH, supposed Urd of the Chaldees. See *URAN*.

URGENJ *Urgenjin*, or *Omurgun*, two *vills*, Khazetia Khiva -- 1 (5700) On a small near the Oxus, 310 m. N.E. Khiva. It contains 500 houses, and had at one time a considerable trade. -- 2 (604) 67 m. N.W. Khiva.

URGLIN par Irel. Carlow, 3169 ac. Pop. 578.

URIGNANO a *vill* and com Italy Lombardy gov Milan, prov and 9 m. S.W. Bergamo, with a handsome church,

an ancient castle, now occupied as a country-seat, an hospital, and a trade in corn, silk, and wool. Pop. 3568.

URGUB, a *tin* Asiatic Turkey, prov Karamania, in a deep ravine on an affluence of the Kili-Tirnak, 90 m. W. S.W. Karamanah or Gassara. It consists of houses raised upon terraces, built of a soft porous tuff, finished with arched eaves and windows, and often exhibiting over the doorways and windows great panels of red and blue paint. They are generally placed on the sides of remarkable conical and pointed hills, varying from 100 ft to 800 ft in height, and pierced by numerous caves, supposed to have been originally occupied by nomad tribes, and still sometimes used as dwellings. From

URGUB.—From Tourist Description de l'Asie Mineure.

the nature of the site the houses seem often to rise in terraces, the roof of one serving as a sort of terrace to that above, and are approached by pathways cut zigzag in the rock. In the valley the spruce, apparently indigenous, grows in great quantities and yields several varieties of fruit, which though small, is very highly flavoured. The number of houses, including the castle, conspicuously situated on one of the hills, is about 3000.

URGUNDAB, a river W Afghanistan which rises in the Kurash country about 85 m. W by S Ghaznee, lat. 33 N., lon. 67 E.; whence it flows S.W. passing Kandahar 25 m. below which it is joined by the Tarnak, when it takes a W direction for about 70 m. and falls into the Helmand, after a course of 250 m., in lat. 31° 30' N.; lon. 64° 10' E. Its banks below Kandahar are thickly studded with gardens and villages for about 26 m.

URI, a *vill* and com, Isl. Sardinia, div and T. ca. S.W. Sassari. Pop. 1039.

URI [Latin, *Ursaria*] a central can. Switzerland bounded N by can. Schwyz, W. Unterwalden and Bern, S.W. Valais, S. Ticino, E. Glarone, and N.E. Glarus, greatest length, N. to S. 82 m., central breadth, 19 m., area, 423 sq. m. It is one of the most mountainous of the Swiss cantons, presenting a complete chain of deep ravines, narrow valleys, and mountain-masses none of which have a less elevation than 5000 ft., while the greater part are from 6000 ft. to 9000 ft., and several above 10,000 ft. The principal summits are the Glarone, St. Gotthard, Schindler, Spiez, Wundgall, Brünstli, Uriroth, Muthorn, and the most famous, though not the highest of all St. Gotthard. So completely is the canton hemmed in by these mountain-chains, that the only practicable outlets from it are the pass of St. Gotthard in the S., and the Lake of Luzern in the N. Between these points lies the principal valley of the canton, lofty narrow, and precipitous, in the former direction but widening out and spreading almost into a plain in the latter. This plain is traversed by the Reuss, which, receiving all the drainage directly or by mountain-courses and down from numerous minor lateral valleys, conveys it into the lake. Only in the lowest grounds can the climate be regarded as temperate and even there a wind, known by the name of the *föhn*, often comes down in fearful gusts from the S., and sometimes even rages like a hurricane for eight days in succession. This wind, though sometimes, has a low temperature, and is said to melt more snow in 24 hours than

the one alone made in a week. The section is rich in natural plants; but there is little agriculture, properly so called. In the lower grounds are gardens sown with corn, rape, and hemp, or planted with potatoes and vegetables, the lower meadows also, which are remarkable for the richness of their verdure, are generally bordered with fruit-trees, while the highlands are often lined with rows of walnuts and the empty slopes covered with magnificent chestnuts. Uri is divided into the two principal districts of Uri and Uruera, and has Altort for its capital. The inhabitants are almost all R. Catholics, and speak German. The government is an unmixed democracy the whole power being both virtually, and in a great measure actually exercised by the general assembly, composed of all citizens above 20 years of age. This section has the honour of being one of the three which first raised the standard of Swiss independence. Pop. (1850), 14,500.

URI (LAKE OF), the name sometimes given to the S.E. branch of the Waldstättersee or Lake of Lucerne, that branch lying wholly within cant. Uri.

URIUPINKAIA, a tn. Russia gov. Don Cosacka, 1 bank Choper, 185 m. S. by E. Tsimbov and celebrated for its annual fair, which lasts three weeks, and attracts great numbers of dealers, particularly Tartars, Armenians, and Calmucks. Pop. (1850) 3198.

URK, a small tn. Holland, in the Zuider-see, 18 m. N.E. of Enkhuizen; with a church, a school, and a good harbour. Inhabitants engaged in fishing. Pop. 1130.

URLINGFORD, a small tn. and par. Ireland, co. and 16 m. N.E. Kilkenny. It is the centre of a manufacture of coarse stuffs, flannels, and worsteds, and carries on an extensive retail trade with the surrounding districts. Pop. (tn.), 4010. Area of par. 5498 ac. 1 pop. 3498.

URLOFFEN, a vil. Baden, circle Middle Rhine, 7 m. N. Offenbourg, on the railway from Karlsruhe to Freiburg, with a church. Pop. 1599.

URLUJAH, ruined city, Asiatic Turkey. Anatolia, near the S.W. coast, 85 m. N.E. Makin, with remains of temples and sarcophagi.

URNASCH, a vil. and par. Switzerland, cant. and 5 m. W.S.W. Appenzell, in a valley watered by a stream of same name. It has a church, free school and orphan hospital and several saw and corn mills. Pop. 2449.

UREN (URZEN and ORZ) two vills. forming a parish, Switzerland, cant. and 6 m. N.W. Glarus. The former possesses baths, which are much frequented, and has manufactures of silk goods, and several large tanneries. Pop. 1842.

URNEY two par. Ire. 1st, —, Cavan 7492 ac. Pop. 5228. — 2nd, Donagall and Tyrone 22 048 ac. Pop. 9451.

URNEIA, a tn. Spain, Disney, prov. Gerona, 6 m. S. San Sebastian, with a church, primary school, manufactures of linen and ironware, and several mills. Pop. 1107.

URQUHART, par. Scot. Elgin, 5 m. Pop. 1381.

URQUHART and GLENROTHAS, par. Scot. Inverness, 30 m. by 12 m. Pop. 5380.

URQUHART and LONIS WENNER, par. Scot. Ross, 10 m. by 24 m. Pop. 3189.

URR, par. Scot. Kirkcubright 19 m. by 6 m. P. 3563.

URRAY, par. Scot. Ross; 7 m. by 8 m. Pop. 2621.

URREA or **GLAR**, a vil. Spain, Aragon, prov. Teruel, 1 bank Martin 60 m. from Saragossa. It is well built, has regular and clean streets, a church, two primary schools, and a trade in corn, oil, wine, and silk. Pop. 1073.

URBANÉ (DE), or **St. Urban**, a tn. and par. Switzerland, cant. and 87 m. W. Bern, in a wild and rugged district on the Doubs, here crossed by a stone-bridge. It contains two churches, and has extensive tanneries from also is worked in the neighbourhood. Pop. 1781.

URSEL, a vil. and com. Belgium, prov. E. Flanders, 11½ m. N.W. Ghent nearly built with a church, chapel, town house, and school; a large flour-mill and manufactures of linen fabrics, bricks, tiles, oil, &c. The better made here is of esteemed quality. Pop. 2510.

URSEL, two places, Germany — 1, (Ober) A tn. Nassau, 10 m. N.W. Frankfurt-on-the-Main. It has a church, and a paper, snuff, iron, copper and other mills. Pop. 1883 — 2, (Nieder) A vil. not far from the former, belonging to the free-town of Frankfurt. Pop. 869.

URSEREN, or **Umsen**, a valley, Switzerland, cant. Uri, about 4550 ft. above sea-level, enclosed by lofty mountains,

and watered by the Rhoda. It is partly cultivated, but has its chief wealth in its pastures, which are excellent.

URSEREN, a vil. Switzerland. See **ANDERMANN**.

URSEUM, a tn. Russia, gov. and 81 m. S. Viatka, cap. circle, on the Uralskaya; with a trade in corn and fax. P. 1188.

URSERINGEN, or **URSERINGEN**, a vil. Bavaria, Lower Friesland, dist. Bielefeld, with a church, a castle, and oil and flour mills. Pop. 1659.

URSTULA (SARULA), a vil. Galicia N. coast, lat. Ternopol. It has a parish church two primary schools, manufactures of linen, and a considerable trade in wine. Pop. 1480.

URSWICK, par. Eng. Lancastr. 4100 ac. Pop. 891.

URUBU — 1 (or **de-Cuma**), A tn. Brazil, prov. Bahia, v. bank Rio-Francisco, 120 m. N.W. Rio-de-Contas. It contains two churches and a primary school. Pop. (dist.) 1000 — 2, A river Brazil, prov. Para, rises in Brazilian Guiana flows S., and joins 1. bank Amazon nearly opposite to the confluence of the Madeira.

URUBUCUARA, a river Brazil, prov. Para, rises in the Serra-Yella, in Brazilian Guiana flows S., expands into a lake of same name on the E. shore of which the little town of Ostendo stands, issues from it, and about 20 m. below, joins 1. bank Amazon.

URUGAIA, a river Brazil, rises in the Serra-de-Tabatinga, on the frontier of prov. Goyas where prov. Minas-Geraes, and flowing almost due E., and rejoining the Clara on the left, and the Santa-Rita on the right, becomes navigable by canoes, and joins 1. bank Rio-Francisco, 16 m. N. the town of Rio-Bomão, after a total course of about 200 m.

URUGANGA, a river, Brazil rises in the W. of prov. Santa-Catharina, and flows E. After passing a lake, with which it communicates by its 1. bank, it has a depth of from 8 to 4 fathoms but unfortunately its mouth is almost blocked up with a mudbank on which the waves break with so much violence as to prevent the entrance of vessels.

URUCUHI, a river Brazil, prov. Piahy, rises in the Serra-Gurgueta, flows N. and joins the Paranaíba on its right, nearly opposite to the confluence of the Belmont. It is navigable by canoes for about 80 m.

URUGUAY, a river S. America, which rises in Brazil in the W. slope of a cordillera, in the N. of prov. Rio-Pedro-de-Rio-Grande, lat. 28° S.; and flows N.W. for about 100 m. entering the plains of Yauria, where it is joined on the right by the Pelotas, and on the left by the Santa-Guay, now turning W. it receives on the left the Uruguay-Pelta and the Albuera and shortly after on the right, the Repul, which forms the N. boundary of the state of Entre-Rios. It now proceeds S.S.W. and is augmented by numerous streams, particularly by the Itiboi and the Arambú, which separates Brazil from the Banda-Oriental.

In its remaining course, almost due S. for about 400 m. it forms the boundary between the Banda Oriental and Entre-Rios, receiving on the right, from the latter state, the Aguapey, Miram, Guadalupe together with numerous small streams, and on the left, from the former state, the Dulcinea, and last of all, the most important of its tributaries the Negro. About 50 m. below in lat. 34° S.; and lon. 61° 40' W. it unites with the Parana in forming the Rio-de-la-Plata. The whole course of the Uruguay is about 800 m. It is navigated by sailing barks up to a great fall 40 m. below the Itiboi after the fall is passed, large canoes ascend as far as the confluence of the Pelotas, and small canoes almost to the sources both of this affluent and of the main stream. The banks of the Uruguay are fertile but ill cultivated. The principal products are cotton and wheat, and considerable numbers of cattle are reared. The articles exported by it are chiefly hides, tallow and honey.

URUGUAY (BANDA-ORIENTAL-DE), a republic, S. America, bounded, N. and N.E. by Brazil E. the Atlantic, S. the Rio-de-la-Plata, and W. the Uruguay separating it from the so-called provinces of La Plata. It is of a compact shape, somewhat in the form of a cone, with a convex and almost circular base in the S. and S.E. and its apex in the N.W.; greatest length, measured from the centre of the base near Maldonado, to the apex at the mouth of the Guayrá, 550 m.; greatest breadth, S.W. to N.E., 320 m.; area, estimated at 120,000 sq. m. Viewed as a whole, it may be regarded as a vast undulating plain, generally flat towards the Uruguay, the Rio-de-la-Plata, and the sea-coast, but broken in the interior by several ridges of moderate elevation, which are composed

for the most part of clay-silt, gravel, and granite, and form the waterbeds of the more important rivers; these are the Negro, by far the largest, which, rising on the N.E. frontier, in the Sierra-Tula, flows S.W. to its junction with the Uruguay and divides the state into two nearly equal portions; the Quary on the N. frontier the Arroyo, Dulman, and Quary all also tributaries of the Uruguay. The San Luis and San José, which unite their streams and fall into the Rio-de-la-Plata, the Schinelli, with its numerous affluents, and the Yagueron, the two most important feeders of the large lake Yagueron, which is situated in the S.E. party in Brazil, and, after the rivers, forms the most important hydrographical feature of the country. The climate is mild, frost being unknown and the excessive summer-heat being greatly tempered by sea-breezes. The extensive plains, covered with rich turf and almost destitute of trees, seem admirably adapted for agriculture, but owing partly to the thickness of the population, which does not exceed 67,000, they remain for the most part in a state of nature, and are roamed over by immense bands of horses and cattle. These are chief sources of wealth, supplying large exports of hides, skins, jerked beef and horse. The only mineral which has been partially worked is copper. Administratively Uruguay is divided into nine departments. Monte-Video is the capital.

URUMIYAH *Urumsia, or Ouremian* a town and lake, Persia, to the W. of prov. Azerbaijan. The town, on an extensive plain about 10 m. W. of the lake, and 65 m. S.W. Tabriz, is surrounded by a high mud-wall and a deep moat, which, filled with stagnant water, makes the site unhealthy, and contains a number of extensive gardens and handsome houses, including those of the Ameer-ul-Milman, which occupy ¹/₂ of an extensive enclosure, remarkably secluded notwithstanding its situation near the centre of the city and beautifully adorned with large trees. Urumsia claims to be the birthplace of Zoroaster and in the vicinity are several mounds, supposed to be the hills of the ancient fire worshippers. The surrounding district is of surpassing fertility and forms one of the richest of grapes, orchards, vineyards, gardens, rice-ground, and villages. Pop. of town about 12,000.

—The LAKE, called also *Shakay* situated 4300 ft. above sea-level, is about 80 m. long from N. to S. by 20 m. broad and, but for a peninsula which projects from the N. more than half way across is of a compact and nearly rectangular shape. It is extremely shallow throughout, and particularly for 2 m. along the shore. The average depth does not exceed 3 fathoms, and the greatest depth yet found is only 4 fathoms, but its fitness for navigation is greater than this depth naturally indicates, as, in consequence of the great specific gravity of the water from the quantity of salt which it contains, it is little affected by storms, and a vessel of 100 tons, built to ply upon it, would not, it was calculated when loaded, draw more than 5 ft. or 4 ft. The numerous islands scattered over the bosom of the lake long remained barren and uninhabited, but the largest, called Maral, has been and others are in course of being colonized.

URUP, Ourep, or Company's Lake, one of the Kurils Islands, N. Pacific Ocean N. from Irup, from which it is separated by a narrow channel called the Strait of Urup. It is about 50 m. long, and 10 m. to 12 m. broad, N.E. to S.W. lat. 46° 59' N. lon. 149° 34' E. It is composed of lofty mountains and deep glens, covered with long rank grass and large trees. Its mineral products are copper, sulphur, and quartz.

URLPINAKH a town, Russia. See *Ustye-Kamensk*.

URURAH or *Santa-Urra*, a vil. and par. Brazil, prov. Rio-de-Janeiro, on the river or channel of same name, forming the outlet of Lake Urra, 16 m. from Campos. It contains a parish church has several sugar-works and distilleries, and sends manioc-flour to Campos. Pop. 2000.

URVOLGY a vil. Hungary. See *HERKENHED*.

USA or *Ousa*, a river, Russia, runs in N.E. of gov. Archangel in the W. slope of the Ural Mountains; flows easterly S.E.E., receives the Lemva, &c., and joins 1 bank Petelers at the town of Usa; its course, 200 m.

USAGRE, a town, Spain, Extremadura, prov. and 50 m. S.E. Badajoz with a handsome church, a courthouse, primary school, names of quinquaver of which there are several worked, a distillery and numerous saw-mills. Pop. 1440.

USCIO a vil. and par. Basilicata Italy, dir. Genoa, near Raposo with a parish church. Pop. 1902.

USCE, or *Usoria*, a town, prov. Posen, gov. and W. Posenberg, on the Neisse. It contains a B. Catholic church, and a synagogue; and has manufactures of woollen cloth, a distillery, fishery, and extensive glass-works. Pop. 1047.

USEDOM, an isl. Prussia, prov. Pomerania, gov. Stettin, between the Balte on the N. the Pomeranische-luff on the S., the Poene on the W., and the Swinem on the E. It forms a sandy tract of very irregular shape, and generally flat, though occasionally broken by low marshy ground, longest, N.W. to S.E. 28 m. in greatest breadth, 15 m. It contains several lakes well supplied with fish, is well wooded, and has some tolerable pastures, but is not well adapted for agriculture. The inhabitants are generally fishermen or sailors. Along with the adjacent island of Wolle it forms the circle of Usedom. Its two principal towns are Usedom and Swinemünde. Pop. (1848) 21,682.

USEDOM a town, Prussia, prov. Pomerania, gov. and 40 m. N.W. Stettin, W. side the lake, and S. side the island of same name. It consists of the town proper, surrounded by walls, with three gates, and of two suburbs. Has a court of law, a market-place, parish church, a chapel and a fishery. P. 1504.

USERRAS, a vil. Spain, Valencia, prov. and 17 m. N.W. Castellon-de-la-Piana; with a townhouse, two primary schools, a church, and brandy-distilleries. Pop. (agricultural), 1900.

USH, *Ur*, or *Om*, a river, Russia, rises in N. of gov. Volhynia; flows S.E. passing Ovrutsk, enters gov. Kiev and joins r. Dnieper, a little above its junction with the Dnieper, after a course of about 155 m.

USHAK, or *Husman*, a town, Asiatic Turkey, pach. Anadolu, 188 m. E. by N. Smyrna. It is built of sun-dried bricks, and is noted as the place where the largest and finest carpets are made, the weaving, dyeing, &c., of which occupy most of the inhabitants.

USHANT [French, *Ouessant*, see *Ussant*] an island, France, 15 m. off W. coast, dep. Finistere, greatest length E. to W. 5 m. greatest breadth, 3 m. It is almost entirely composed of granite, and presents a very bold and rocky coast, which is accessible only at some points. A considerable part of the surface is covered with meadows and pastures, on which horses and sheep are reared. An active fishery is carried on. Besides St. Michael, which is the chief place, there are several hamlets. The inhabitants are said to have remained idolaters till the 17th century. There is a lighthouse on the island in lat. 48° 28' N., and lon. 5° 3' W. An indecisive naval engagement was fought here, between the French and English in 1778. Pop. (1841), 2194.

USHE a town, Chinese Turkestan. See *Oushe*.

USHLAWOOD a township, England, co. Monmouth, near Badbury including the market-town of Tring. Pop. 15,424.

USHINEI, a small town, Persia, prov. Azerbaijan, gov. Urumsia, dist. of its name on the rise of the mountains near the N.W. extremity of a fertile plain. It once contained 1000 houses, but now has dwindled down to 200.

USHUFF, a town, Persia. See *ASHURUF*.

USINGEN a walled town, Nassau, esp. bail., on the Ucker, 15 m. N.W. Frankfurt-on-the-Main; it has an appeal court, two churches, a castle, superior school and hospital, and features of woollen and linen cloth, flannel, hosiery, and leather a bark and a flour mill. Usingen gives name to one of the branches of the house of Nassau. Pop. 1933.

USK, a market town and par. England, on and 12 m. S.W. Monmouth, on the Usk; irregularly built, houses chiefly of stone. It has an Established church, in the Anglo-Norman style with square embattled tower, a R. Catholic and several dissenting chapels, a county house of correction, a townhall, a grammar and several other schools, a mechanics institute and some minor charities. The salmon-fishing is actively prosecuted in the Usk. Area of par., 4956 ac. Pop. 3068. —The river rises in Wales, on the W. frontier of co. Brecknock flows E. to the town of Brecknock, then S.E. by Abercromby to Usk, then S.E.W. easterly past Cerrion and Newport, into the estuary of the Severn, after a course of about 60 m. It is navigable to Newport.

USK, par. Irad. Kildara; 1763 ac. Pop. 772.

USKANAE, par. Irad. Tipperary; 7656 ac. Pop. 1078.

USKUP [see *Uscup*] a town, Thessaly in Europe, esp. south on the Uscup, at its confluence with the Vardar, 112 m. N.W. Salonia. It occupies a very ancient site, and consists of nar-

row, extremely dirty streets. On a hill on its W side is an old abandoned mint, regularly garrisoned. Pop. about 10 000
USLAR, a village in Hanover, prov. Rhineland, princely and 16 m. N W Göttingen, cap. town, in a valley watered by the Ahle. It has manufacture of tobacco-pipes, iron-works, a paper and several other mills. Pop. 3116.

USMAN, a co. Russia, gov. and 66 m. S W Tambov, cap. circle, on the Voronez. It contains a wooden and three stone churches and has a considerable general trade, and an annual fair. Pop. (1865), 4311.

USMA, a vil. and com. Italy Lombardy prov. and 18 m. from Milan, v. bank Molgora or Orio. It has a parish church an elegant palace, and a trade in corn and silk. Pop. 1045.

USMANA, a vil. and com. Ital. Sicilia prov. and 12 m. N Capigari. It has a trade in corn. Pop. 1190.

USSEAUTX, a vil. and com. Italy Piedmont div. Turin, prov. Pinerolo, near Foenestella. It is poorly built, and has two small churches. Pop. 1468.

USSEGLIO, a vil. and com. Italy Piedmont div. Turin with a handsome parish church. Pop. 2660.

USSEL, a co. France, dep. Corrèze, in a mountainous district, 35 m. N Tulle. It was once surrounded by walls and stood several sieges. It has a court of first resort, an agricultural society and communal colleges; manufacture of woolen stuffs, silks, cloth, and leather and a trade in hemp, some linen, wax, tallow and timber. Pop. 3879.

USSELEY par Eng. Lincoln 1110 ac. Pop. 69.

USSELO, a river Turkey in Europe, which rises in the N W of Bosnia, flows S E, and joins L. bank Bosna a little above Dobol after a course of about 45 m.

UST-SOLAK, a co. Russia, gov. and 896 m. S E Volynia, cap. circle, on the Synola. It has a considerable trade in the furs and skins obtained in the neighbouring forests, and a much frequented annual fair. There are salt works in the neighbourhood. Pop. 6000.

USTARITZ, a co. France, dep. Basses-Pyrénées, 12 m. S Bayonne, L. bank Nive. It is a long straggling place and has manufacture of woolen stuffs, nails, glass, and earthen ware. Pop. 1805.

USTEL, a vil. and par. Switzerland, can. and 9 m. E S E Zürich on the Aare. It is well built, and contains a large and handsome church, an ancient castle, and infirmary and has two cotton-mills. Pop. 4496.

UTICA an isl. in the Mediterranean, 33 m. off N coast Sicily, of which it is a dependency lat. 38° 42' N lon. 18° 10' E. It is of an oval shape, about 8 m. long by 2 m. broad, and has a mountainous surface, occupied by three hills of considerable elevation, on one of which in the S, the fort of Falconara is built. Along the shores are coral banks visited by fishers from Tripoli. Utica used to be a great resort of Turkish corsairs. Pop. 3042.

UTIUJNA, or **UTIUJENNA** or **UTIUJENNA-POLSKA**, a co. Russia, gov. and 198 m. E. Novgorod, cap. circle, on the Mologa. It contains a church and has a considerable trade in wood and tannin, the latter obtained from extensive and rich mines in the neighbourhood. Pop. 4590.

UTJUG-VOLK, a co. Russia, gov. and 230 m. N E Volynia, cap. circle, on the Sloboda, which here unites with the Jug to form the Dniep. It is the see of an archbishop contains 23 churches 35 monasteries, and several other public buildings; and has manufacture of woolen and linen cloth, soap, candles, homery hosiery and articles in gold and silver, an extensive trade, being a kind of central depot for various articles brought from Europe by way of Archangel, and from Siberia, and a much-frequented annual fair. Pop. 14,000.

UTTLABERG, a border to and fort, Russia, gov. Can. caen, r. bank Kuban, 100 m. W by N Stavropol. Inhabited by the Cossacks of the Line. It is composed of thatched houses arranged in straight lines and to the midst is a church.

USTON, a co. France, dep. Ardege, on the Aisne, 13 m. S E St. Ghons. It has iron-works, and in the neighbourhood are several remarkable caverns, one of which contains a chapel, to which numerous pilgrimages are made. Pop. 1185.

USUMASINTA, a considerable river, N America. It is formed in Guatemala, by the junction of the Lacantan with the Rio de Pasion lat. 16° 30' N lon. 91° 55' W. It flows, with many obstructions windings, generally N forms the boundary between Guatemala and the Mexican department

of Chiapas, traverses part of Tabasco, and falls into the Gulf of Mexico on the W side of the Laguna-de-Tulumuc.

USURBIL a co. Spain Biscay, prov. Guipuzcoa, 6 m. S W San Sebastian. It has a parish and three auxiliary churches, a courthouse, prison, primary school, hospital, and a magnificent castle called the Casa-de-Serco, which suffered much during the last war, and has iron-works at which numerous anchors are made, and several flour-mills. P. 1803.

UTA, a vil. and com. Ital. Sicilia, div. and 13 m. N W Capigari.

It has a trade in corn. Pop. 1214.

UTAH (the Desert of the Mormons) a W territory of the U. States lat. 37 to 42° N lon. 108° to 120° W bounded N by Oregon, E. the Indian territory S E by N. Mexico, and S W by California, length, E. to W., 620 m., breadth, 345 m., area, 187 923 sq. m. It forms part of the immense plateau which stretches between the Rocky Mountains on the E. and the Sierra Nevada of California on the W. varying in height from 4000 ft. to 8000 ft. above sea-level enclosed on all sides by mountain-ranges, and presenting all the characters of a desert, with its arid sterile plains, and occasional fertile tracts or oases. Very little is known of the geology, but basalt, and other rocks of volcanic origin, occur on the mountain-slopes, and in many other places. Utah is drained partly by rivers of which the Colorado, with its tributaries, Grand traversing the E. portion of the territory in a S W direction, and Green which rises in the S.E. of Oregon is by far the most important; and partly by great lakes the most remarkable of which is the Great Salt Lake (which see situated in the N. at the height of 4100 ft. above sea-level. About 95 m. S.E.E. of it, and 100 ft. above its level in Utah Lake, which has a length of 36 m. and is fed by numerous mountain-streams, the surplus waters of which it discharges into the Great Salt Lake. The water in perfectly fresh, and abounds with trout and other fish on which the Indians partly subsist. These two lakes are supposed to drain an area of 12,000 sq. m. and have around them considerable tracts of alluvial soil. Another remarkable lake is that of Humboldt in the W. From the magnitude of the river of same name which flows into it, it would be the largest of all the lakes, but is comparatively small, a large proportion of the volume of water which it receives being absorbed by the surrounding deserts. The far greater part of this vast territory is unexplored, but its most fertile valleys have been occupied by the Mormons. The Mormons, after being expelled by the inhabitants of Illinois from their settlement of Nauvoo, emigrated into this territory and having fixed themselves on the borders of the Great Salt Lake, assumed a form of government, and gave to their territory the name of the State of Deseret. Congress interfered and in 1850 passed an act, by which its name has been changed into that of the territory of Utah. By this act the legislature consists of a council of 18 members elected for two years, and a house of representatives of 36 members elected for one year by all the male whites of 21 years of age. The same clause have the privilege of sending a delegate to Congress. How such a system of delusion and dissimulation as Mormonism is to be made compatible with the existence of civilized government remains to be seen, but a kind of security against gross abuse has been provided by a clause of the act, which declares that all laws passed by the Utah legislature are to be submitted to Congress, and if not approved will be of no effect. In the summer of the Mormon General Conference of October 4, 1854, the population of Utah, estimated at 18,208 is classified as follows—Septem, 1573; high priests 560, elders 689, priests 6693, children, 8507.

UTELDORF a vil. Lower Austria, see **STERNBERG**.

UTELLE, a co. France, dep. Alpes Maritimes, 18 m. N Nice.

It has a beautiful church which belonged to the Tem. plars, several auxiliary churches, a large and well-managed hospital and communal schools. The vine, olive, and chestnut are largely grown in the vicinity and there is also a considerable trade in cheese. Pop. 7130.

UTICA, a city U. States, New York, situated on a beautiful slope, r. bank Mohawk, 16 m. W by N Albany. It has wide and spacious streets, 30 churches, an exchange, several warehouses, a museum, a public library and the mechanics' association, two cotton and several woolen factories, a rolling-mill flour grist, and saw mill tanneries, foundries, &c. and an extensive trade, greatly facilitated by the Erie and the

Chamorro canal, and by several railways. P (1850) 17,565; (1855) about 20,000.

UTIEL, a town in Spain, New Castile, prov and 57 m. S.E. Comen. It has various educational establishments for advanced as well as primary instruction, a substantial Gothic church, and in the neighborhood several hermitages. Many of the inhabitants are engaged in agriculture, but there are besides five heavily furnished, three soap manufactories, eleven flour-mills, while many are employed as muleteers, and some as grooms and cattle dealers. Pop. 6550.

UTILLA, an isl. Caribbean Sea, Honduras Bay lat. 16° 4' N. lon. 86° 50' W about 7 m. long, and 2½ m. broad in the widest part; it is all but entirely occupied by mangrove-swamps. It has some good harbours, and wood and water may be procured in abundance.

UTRECHT, an isl. Sweden, off S.E. coast of the Stockholm lat 58° 25' N. lon. 18° 13' E. It is of very irregular shape and no great extent, but has valuable mines of iron.

UTRECHT the smallest prov. in Holland, bounded N. by prov. N. Holland and the Zuider-zee, E. and S. Gelderland, and W. by N. Holland about 30 m. N. to S., by 38 m. E. to W.; area, 400 sq. m. It is generally flat, but becomes more elevated eastward its soil bears a considerable resemblance to that of the provinces of N. and S. Holland and being more suitable for dairy farming than corn growing, the inhabitants devote themselves greatly to rearing cattle, sheep, and pigs, and making cheese and butter. The province is well watered by the Rhine the Vecht, the Amstel the Lek, &c. and yields in some places good corn crops and some tobacco is raised. Manufactures are chiefly carried on in and around its principal towns—Utrecht (the capital) Amersfoort, Rhine Wijk, Montfoort, and IJsselstein. In 1851 it contained 163 schools, attended by 16,771 pupils. Pop. (1851) 149,495.

UTRECHT [Latin, *Utropectum* or *Utrechtum* and *Utrechtum*] an important town in Holland esp. above prov., 28 m. S. E. Amsterdam on the railway thence to Arnhem. It lies on a pleasant district, on a somewhat elevated site on the Old Rhine, where the Vecht branches off from it is somewhat sharp-shaped and traversed by two canals, across which are twenty-eight stone-bridges. The old walls have been levelled and planted and now form pleasant walks besides which outside the walls, in the Maliebaan, a promenade planted with eight rows of lime-trees, bordered with fine gardens, and having

THE TOWN HALL, UTRECHT

(from Peck's Sketches in Pencil and Colours)

four foot and three carriage ways. Utrecht is the seat of the provincial government, and of superior courts, civil and military and possesses a government-house, courthouses, prisons, and house of correction a mint, a townhall, the finest build-

ing in this town, with a considerable collection of archives, a small library a gallery of paintings chiefly by native artists, and a rich collection of drawings of old Utrecht houses, the buildings of the society of art and science, several barracks, an arsenal, and numerous remains of antiquity. It likewise has eleven Protestant churches, including the cathedral and eight E. Catholic churches, of which three belong to the Jesuits, thus being the head-quarters of that body; a synagogue, leprosy hospital, several orphan hospitals, and numerous other benevolent institutions, besides many benevolent, religious and literary and scientific societies, a university, with a botanical garden, anatomical hall, laboratory observatory, library of 50,000 volumes, and a museum of natural history attached a veterinary school, schools for drawing and architecture, and numerous other educational establishments.

Utrecht is well situated for trade, has four large market squares, besides several squares on what were formerly baying-grounds, and well supplied and frequented markets. Its trade is chiefly in grain and cattle, and the manufactures of the place, which include cotton and woollen spinning cloth, dyeing silk twisting and weaving, and the kind of plush called Utrecht velvet, carpets and floor-cloth, metal and bone buttons, metal castings, snuff and cigars, soap leather, ropes, salt, brandy, spirit coffee, book-binding &c. Its active trade gives rise to a considerable amount of shipping business. It is the birthplace of Adrian Floriszoon, tutor to Charles V. Bishop of Utrecht, and afterwards Pope Adrian VI. In the audience-hall of the university in 1579 was signed the act of confederation, declaring the seven United Provinces independent of Spain and in the British minister's house now replaced by a barracks, the treaty of Utrecht was signed in 1713, which ended the war of the Spanish succession. Pop. (1849) 49,175; (1856) 53,000.

UTREBBA, a town in Spain, Andalucia, prov and 14 m. S. Seville. It has broad well-paved streets, and some good houses, although the great majority are of an inferior description. One of the squares is surrounded with two rows of iron balustrades and is used for bull-fights, and other public shows, in it stands the townhouse. A ruinous Carmelite convent has been converted into an excellent prison. The other public buildings and matronates consist of a college for primary gratuitous instruction attended by about 850 pupils, a philharmonic society, a flourishing hospital entirely for 140 children, an hospital for women, a house of refuge, an hospital for men, a granary two parish churches three nurseries, four suppressed convents, two public fountains, one of them an elegant and solid fabric and two fine promenades. There still exist some remains of the ancient fortifications. There are numerous oil and flour mills and manufactures of hats, soap, lace, and gypsum, bricks, tiles, and salt. Pop. 11,835.

UTTENWEILER, a vil. Württemberg circle Dembo, Riedlingen on the Remtloch with a church and a castle. Pop. 1115.

UTTERBY, par. Eng. Lincoln 1544 ac. Pop. 346.

UTTOKETER, an ancient market town and par. England, co. and 14 m. N.E. by E. Stafford, on a gentle eminence above the vale of the Dove, on the N. Staffordshire railway. It has eight principal streets, and a commodious market-place; the former are generally straight and kept clean; houses mostly of brick, and well built. It has a handsome stone parish church, with a fine spire, a R. Catholic and several dissenting chapels a free grammar and a national school, a literary and scientific institution, a set of almshouses, and numerous other charities. Mailing, tanning, nail-making, rope and twine spinning, and wool-stapling are carried on to some extent; but the principal trade is in cheese, wool, bricks and malt. Area of par., 6973 ac. Pop. 4990.

UTTRIGHSHAUSEN, a vil. Hesse Cassel, prov. Hanau with a church and two mills. Pop. 1045.

UTWEIL, a vil. Switzerland, cant. Thurgau, on the Lake of Constance, 30 m. E.N.E. of Fribourg. It is well built, has a handsome church, and a large landing-place on the lake, where corn, fruit, and cattle are largely shipped. Pop. 549.

UYELKA, a river Russia, gov. Orenburg, which issues from a small lake near Kandravinskaya; flows westerly S.E., past Fort Uvelskaya, and joins U. bank. Ut at Troitsk, total course, 90 m.

UXBRIDGE, a market town in England, co. Middlesex, 15 m. W. by N. London, 1 mil. Coln, here crossed by two good

UAE. It is large, well built, paved, lighted with gas, and supplied with water; contains an ancient church, built of flint and brick, a Dominican chapel and St. Louis' workshop, a library and scientific institution, a Lancasterian and several other schools, including a school of industry. Brick-making is carried on here on a large scale, and there is an extensive traffic in corn and flour, there being a great number of mills in the immediate vicinity. Pop. 3336.

UXUE, a tn. Spain, prov. Navarre, on the Pyrenees 27 m. S.E. Pamplona, with a church, townhouse, prison, and primary school; a flour mill, and a trade in cattle and agricultural produce. Pop. 1308.

UYTBERGEN a vil. and com. Belgium, prov. E. Flanders on the Scheldt, 10 m. E. Ghent with manufactures of linen, a brewery an oil and a flour mill, and a trade in agricultural produce. Pop. 1078.

UZBEKISTAN, a kingd. Central Asia. See BOKHARA.

UZELI, a tn. and com. France, dep. Côte-du-Nord near the Ouse, 16 m. S. by W St. Brionne. It is tolerably well built, and has an important trade in linen and thread, being the centre of the linen trade of Brittany. Pop. 2090.

UZUN two rivers. Russia—1, (Zhelezn.) rises in E. of gov. Saratov, flows S.W. past the town of Uzun, then S.E. and is lost in Lake Kamysh; total course, nearly 800 m.—2, (Melen-), rises considerably W of the former, and then

pursues a course almost parallel to it, losing itself in like manner in the same lake after a course of about 270 m.

UZERCHER (anc. Uzerca), a tn. France, dep. Cher, on the central hill nearly enclosed by the Yèvre, 21 m. N.W. Tulle. It is built in the form of an amphitheatre consists of houses many of which are adorned with little towers and contains a church which has a crypt beneath it, and is surrounded at the E. end by five apical chapels. It has several fairs, one of which, a celebrated horse-fair, lasts two days. Pop. 2386.

UZES (anc. Uzes) a tn. France, dep. Gard, r. bank Aude, 9 m. N.N.E. Narbonne. It contains an ancient cathedral, surrounded by a lofty stupor, and adorned with fine wood-carvings an episcopal palace, now occupied by the court-house and prefecture, and an old castle, surrounded by high walls flanked with towers. The manufactures consist of silk bonnets, coarse woollens, leather and paper and the trade is in corn wine, brandy and olive-oil. Pop. 5898.

UZMASTON, par. Wales, Pembrokeshire 2070 aa. Pop. 888.

UZMACH, a vil. and par. Switzerland, cant. and 28 m. S.W. St. Gall, near the E. extremity of Lake Zurich. It is tolerably well built, has a handsome church, the remains of an old castle several good schools, and an inn. Near it is a large cotton mill, driven by water. P. 1472.

UEZANO a tn. and com. Tuscany, comp. Florence 1 m. from Peseta, with a church a castle, and a school. P. 4064.

V

[For names not found under V, look F and IF]

VAAGEN (Oer and Veer) two lks. Norway, Lofoten group and near their S.W. extremity. Ost Vaagen is about 36 m. long N.N.E. to S.S.W. and contains a parish and part of the same name situated on a bay on its S.E. side. Vest Vaagen is about 86 m. long, by 15 m. broad, its principal place, Dorre is situated on the N.W. coast.

VAGGÖE, one of the Faroe Islands (which see).

VAGLS, a vil. Holland prov. Limburg, 15 m. S.E. L. Maastricht, with two churches, a townhouse, a school; and manufactures of cloth and wax-candles. Pop. 1342.

VAAST (St.), or St. Vaast la-Housser, a seaport in France, dep. Manche, on a bay of the English Channel 15 m. S.E. Cherbourg. It has an excellent harbour, defended by the forts of Tilly and La Hougue and has a fine hospital building yards, cod, herring, and mackerel fisheries, and a trade in dials, waxes, dried fruits, copper &c. Pop. 1258.

VAAST (St.) a tn. and com. Belgium, prov. Hainaut, 10 m. E. Mons. Coal is extensively worked and exported and there is limekilns, breweries, and corn, tan, oilworks and oil mills. Pop. 8688.

VABRE (anc. Valeriana) a tn. France, dep. Tarn, 16 m. N.E. Castres, on the Agout with manufactures of cotton and woollen stuffs. Pop. 1381.

VAGLA, an island in Saxo-Wenar archipelago and 16 m. S.W. Elsenburg, L. bank Werra, here crossed by a bridge. It has a church, village-school, hospital, manufactures of tobacco, a paper and other mills, and tanneries. Pop. 2239.

VACHE, an isl. Caribbean Sea, off S. coast, Hayti, lat. 16° 0' N. lon. 78° 48' W. (n.) It is hilly, and at the distance of 15 m. or 16 m., appears like an assemblage of small islands. The W. end of the island forms the E. side of the entrance of the great bay called the Bay of Ceyx.

VADASZ, several places. Hungary—1, A vil. co. Arad 8 m. from Nagy Ezered, with two churches, and a trade in timber. Pop. 1885.—2, (Alov.) A vil. co. Abony 15 m. from Ezered, with a church, and a trade in corn and wine. Pop. 1802.—3, (Málov.) A vil., near the former. Pop. 857.

VADAVATE, a river S. Hindoostan, rises in the W. Ghats, and flows W. frontiers of the Mysore flows N.N.E. and after a course of about 200 m. joins r. bank Tombudra about 20 m. S.W. Adoni. In the lower part of its course, it sometimes takes the name of Hindory or Hungry.

VADISCO, a small seaport, Naples, prov. Otranto. It has often been used for shelter by the Barbary corsairs. Vol. II.

VADY HONYAD a market to Austria, Transylvania, co. Hunyad, at the confluence of the Osma and Zilad with a fine old turret castle, which belonged to Corvinus many factories of scythes and iron-barres. Pop. 1600.

VADKERT, a market in Hungary co. Hegecs 26 m. S.E. Karpfen. It has mineral springs, and a trade in excellent tobacco grown in the vicinity. Pop. 2494.

VADKERT a vil. Hungary co. Pesth, about 16 m. from Kalocsa with a R. Catholic and two Protestant churches, and a considerable trade in corn, wine, and cattle. Pop. 2315.

VADO a seaport in Italy Piedmont prov. and 4 m. S.W. Savona. W. shore Gulf of Genoa on a beautiful and commodious bay where any number of ships may find safe anchorage. It is defended by two forts, and has a number of well-built houses a parish church, school, a valuable fishery, and extensive brick and tile works. Pop. 1469.

VADSTEN, a tn. Sweden lin. and 27 m. W.N.W. Linköping on a bay of Lake Wetter. It contains two churches, an infirmary a new hospital, large and well managed a female endowment, and extensive manufactures of linen and lace, the latter employing the aged and the young. Near it is the old castle of Wetterburg now partly used as a corn-magazine. Pop. 2158.

VADUZ, a tn., cap. group Lichtenstein, on the valley of the Rhine, on the frontiers of the Swiss em. Grisons, 21 m. S.E. St. Gall. It contains an old castle, seated on a height which overlooks the town. Pop. 376.

VAERDAL a vil. and par. Norway prov. and 35 m. N.N.E. Trondheim, at the mouth of the Siaker, in the N.E. part of the Trondhjem-fjord. Pop. 8900.

VAGA, a river, Russia, rises in S.W. of gov. Vologda flows N.E. past Volek enters gov. Archangel and joins L. bank N. Dvina a little below Ust-Vega, after a course of about 240 m. In spring it is navigable by barges.

VAGH BASSANO, a market in Hungary co. and 22 m. N.E. Trieste, L. bank Werra here crossed by a bridge. It has a handsome church, a synagogue, two castles extensive manufactures of earthenware, and a trade in corn, and various articles in wood. On the opposite side of the river stands the castle of Podhrady. Pop. 3146.

VAGHA or Vagocze, a vil. Hungary, Hither Danubio, co. Presburg on the Vagh. Pop. 1879.

VAGLIO a tn. Naples, prov. Basilicata, 7 m. E. Potenza. It has a church, several chapels, and a convent. Vol. II. 145.

VAGOS, a to and par Portugal, prov Douro, 6 m. S.
Aveiro. Pop. 3190.

WAGYOCY, a vil. Hungary Hither Danube, co. Heitra, in a mountainous district, about 24 m. from Galgocsi with a parish church. Pop. 1050.

VAIGATZ, an Isl. Boreas, Arctic Ocean, between N. E. coast of Gov. Archangel, from which it is separated by the Straits of Vagatz, and the island of Nova Zembla, from which it is separated by the Straits of Karakay. greatest length, from N. W. to S. E., 60 m., greatest breadth, 20 v. The interior is said to be mountainous, and the N. and S. shores present deep rocky cliffs not exceeding 500 ft. in height. The cliffs are partly composed of grey-slate, which contains cubical crystals of iron pyrites, and is covered with a thin layer of moss, and the air, and the water, crumbles down, and is soon worn by the sea into balls of a rough diameter, which are known by the name of *evanisks*, or water-stones. All the streams of the island have bars across their mouths, formed by banks of these stones, which, in the case of a strong wind towards the shore sometimes accumulate so rapidly, as to choke up the streams, and convert them for a time into lakes. The inhabitants are chiefly Koryzovs, by whom the island is called *Koryzovskoye*, and of the 1000 who can be counted, remain throughout the year, but others, who are Russians, only go over in summer; to fish and hunt.

VAIHINGEN, two places, Württemberg -- 1 A town on Neckar, 1 bank Eng. 1.5 m. NW Stuttgart, with a church, a castle in ruins, a townhouse, and Latin school, manufactures of chaocry a paper mill and a trade in wood. Pop. 3073 -- 2 (*auf den Fildern*) A vil circle Neckar bail. Stuttgart with a church, and manufactures of linen and cotton goods. Pop. 14812.

VALLATE, a vil and com Italy Lombardy prov and 9 in from Lodi: It has the remains of an ancient castle, and a trade in fruit, particularly axonian peaches. Pop 2207

YAIMUGA, a river Russia, which rises in gov Archangel flows E. and after a course of about 70 m joins bank N Dvina near the town of Emetzoe. Its banks are covered with fine timber large quantities of which are cut and transported to Archangel.

VAINOR, par Wales, Brecon 6597 ac. Pop. 2867

VAIRANO a. m. Naples, prov. L'Aquila, 7 m. N. E. Torino
Pop. 1700.

VAIRO a vil and com. duchy and 33 m. S Parma, on bank Ema. It has a trade in cattle but many of the inhabitants emigrate for employment. Pop. 8474

VALDE, s. v. France, dep Rhous, properly only a sub-
urb of Lyons. Pop. 1477

VAIKON (anc. *Æria Vocontrum*) a (n. France, dep. Vaucluse, on a steep rock near the Ouvèze, 15 m NE Orange. It has narrow winding, and very steep streets, an ancient cathedral, and several Roman remains. Pop 1863

VAITUKANI a river Hindoostan See BITUMNEY

YAKH, a river Siberia, rises in lat. 62° N., in the W of gov Yenisei, flows W., enters gov Tobolsk, and joins back Ob about 100 m above Surgut total course, about 500 m its chief affluent is the Kulujan which joins it on the right.

VAL-ARZA, a vil and com. Italy, Lombardy gov. Misa
prov. and 10 m. N. F. Bergamo. It has a handsome church
a charitable endowment, several schools, and a trade in corn,
cattle, and dairy produce. Pop. 1100

VALL-BRUGAOLIA, a valley partly in the S.E. of the Swiss can. Grisons and the N of Lombardy. It follows the course of the Maira, is inclosed by high mountains, and is both fertile and picturesque.

VAIL-B. ADEL (Ls.), or LARSEN, a wll Frasen, dep. Vouges, 10 m. from Remiremont, on the Combaat. It has manufactures of cotton stuffs, straw-hats, and cherry-brandy. P 1031

V. L. DEWOS, an ancient division, Sicily, which comprehended the whole of prov Messina, a large part of Catania, and a small portion of Palermo. Its cap. was Messina.

V AL-DE-SANTO-DOMINGO, a vil. Spain, New Castile, prov and 17 m W N W Toledo. It has clean streets, a square with good plazas, a townhouse prison, primary endowed school, a church and several oil and flour mills. Pop. 1,000.

VALAAM an isl Russia, in N of Lake Ladoga. It is about 18 m in circuit; is covered with fine forests, and said to be rich in iron. There is a monastery on the island, and

the monks who live in it, and employ themselves in agriculture &c. are almost the only inhabitants.

VALAIS [Gsw *Vallée*] a cen. Swissland, bounded, N by France, Bern and Vaud, W Savoy, S and E Piedmont, and N.E a corner of cen. Tessin and Uri, greatest length, N. to S.W. 97 m. breadth, 87 m. area, 1665 sq. m. It is surrounded on all sides by some of the loftiest and most magnificent mountain chains in Europe, on the N by the Bernese, on the S and W by the Pennine, and on the E, by the Helvetic or Lepontine Alps. In all these chains are heights varying from 15,000 ft. to 15,000 ft. The Bernese Alps extend precipitously from N. to S., the Helvetic Alps from N.W. to S.E. The mountain ranges are separated by moderate space in which these slopes merge into each other, and find a common level, this level is the bed of the Rhone, and in order to trace it we have only to follow the course of this celebrated river, as it flows across the cone, first N.W. and then N.N.W. accumulating all its waters, and finally discharging them into the Lake of Geneva. The long valley through which the Rhone thus flows is the largest in Switzerland. It is steep and narrow, particularly on the N. side, where it approaches very near to the Bernese Alps, and is so completely obliquely directed, that the terrain almost straight itself parallel to each other, and perpendicular to the axis of the chain. On the S. or left side, the distances from the Pennine Alps is much greater and hence those on the chain itself is higher the streams which proceed from it have both a longer and a less direct course, and mark out transverse valleys of considerable extent. Many of these valleys are occupied by magnificent glaciers of these though forming only a small proportion of the whole, 17 are contained in the Val-de-Bagnes, and eight in the district of the Rhodane. There are here some of the most extensive and most beautiful glaciers ever met with, and some of the most magnificent forests of pine and spruce, and some of the most extensive and most fertile plains in the valley.

of the richest vineyards abundant, and, from the produce of the castle which grows upon them, the principal source of subsistence and wealth. In general too, where the elevation above the sea-level does not exceed 2000 ft., the vineyard thrives, and a good deal of wine of tolerably good quality is made. Much arable land also, is found in the lower part of the valley of the Rhone, and yields good crops of grain. The same locality many of the finer fruits attain perfection, and the rearing of silk worms is successfully pursued. The soil is fertile, and the climate is temperate. In consequence of its situation on the great line of traffic over the Alps, Geneva is an important trading town. Almost all the manufactures

profess the R Catholic religion and public instruction is wholly in the hands of the Jesuits. A common division of Valais is into Upper and Lower, in the former of

which German, in the latter French, is spoken; but for administrative purposes the division is into 13 districts or *districts*, one of which that of Sion or Bâle is the capital. The other

more important places are Martigny, Leuk, and Vispach. Each *chaux* has a council elected by all the citizens belonging to it of 18 years of age, and each council sends four delegates

VALDAGNO, a tn. Italy, Veneto, prov and 15 m. N W Vienna, on the Adige. It has iron-works and manufactures of woollen cloth, nails, and agricultural implements. Pop. 2890.

VALDAI a tn. Russia, gov and 80 m. S.E. Novgorod, esp. cloze, and on the shores of a lake of same name. It is surrounded on three sides by an earthen rampart; it is built mostly of wood, but contains some good stone-houses; has a court of justice, three churches, a palace, and some trade. Pop. 4519.

VALDAI (German, *Waldai*), a range of hills, Russia, which stretches N N E from gov Pskov and between gov. Tver and Novgorod, for above 100 m. The Valdai Hills seldom exceed 850 ft. in height, and are generally rounded, so as to give the districts which they cover the appearance of an undulating plateau often cultivated to its greatest height, and where not cultivated, generally covered with wood. These hills, though low, form part of the great European watershed sending the waters on one of their sides to the Baltic, and on the other to the Caspian. They are composed chiefly of clay slate, and more partially of sandstone and limestone.

VALDARACETTE, a tn. Spain, New Castle, prov Madrid, 21 m. from Oaxaca. It is poorly built, has a church, a primary school; manufactures of articles in asparto, several oil-mills, and a trade in oil and asparto. Pop. 1698.

VALDALGOLFA a tn. Spain, Aragon, prov Teruel 9 m. from Alcañiz, near the Guadalupe. It has a church, surrounded by a lofty tower; a nursery, finely placed on a height, a primary school, manufactures of linen, and several oil-mills. Pop. 1400.

VALDEHIMBRE a tn. Spain, prov and 10 m. from Leon with a church, courthouse, primary school, and a trade in wine. Pop. 1814.

VALDEFUENTES, a scattered vil. Spain, Extremadura, prov and 17 m. S.E. Cáceres. It has a townhouse, prison, palace of the Marquis of Valdefuentes in a neglected state, two primary schools, an Augustinian convent, whose church is appropriated for public worship; and a parish church. Many of the inhabitants are employed as carriers, some domestic linen and woollen fabrics are made, and there are nine flour-mills, one oil-mill, and some traffic in cattle. Pop. 1917.

VALDEGANGA, a tn. Spain, Murcia, prov and 18 m. from Albacete, on a lofty height above a bank Júcar. It contains a parish church, courthouse, prison, and primary school, and has manufactures of woollen and linen cloth and a trade in corn, wine, cotton, silk, fruit, and cattle. P. 1154.

VALDEIGLESIAS (San Marcos vil.) a tn. Spain, New Castle, prov and 86 m. W W. Madrid tolerably well built; with two squares, a townhouse, prison, hospital, ancient castle, church, three hermitages, and two primary schools; and manufactures of soap, chocolate, brandy, and leather and some oil-mills. Pop. 8035.

VALDELABOCA, a vil. Spain, Extremadura, prov and 70 m. from Cáceres, near the Tago. It is indifferently built and consists of narrow, unpaved streets; contains a church and a primary school, and has a fishery in the river, and a flour-mill. Pop. 1061.

VALDEMORILLO a tn. Spain, New Castle, prov and 18 m. W W. Madrid, in a narrow valley watered by several streams. It has a church, courthouse, prison, and primary school, manufactures of superior stoneware, two flour-mills, and a trade in charcoal. Pop. 1223.

VALDEMORO, a vil. Spain, New Castle, prov and 15 m. S. Madrid, with a townhouse, a small hospital, an asylum for poor widows, three primary schools, a Latin grammar-school, a Franciscan monastery, and a parish church, a soap-manufacture, and several oil-mills. Near it are a hermitage, several foundations, and a cemetery. Pop. (agricultural) 2553.

VALDONGO, a vil. and com. Italy, Piedmont, div Turin, prov Biella. It has an old castle, in good preservation, and a church. Pop. 1303.

VALDEOBREDO, a vil. Spain, Extremadura, prov and 45 m. from Cáceres, on a height in a rugged district near the Alagón; it is poorly built; has a church, courthouse, prison, and primary school, manufactures of linen, a fishery, several flour-mills, and a trade in cattle, honey and wax. Pop. 1305.

VALDEOLIVAR, a tn. Spain, New Castle, prov and 80 m. N.W. Cuenca. It is poorly built, consisting of mean houses in narrow and ill-paved streets, and has a church, a primary school, and a trade in oil. Pop. 1812.

VALDEPENAS, a tn. Spain, New Castle, prov Ciudad Real, 110 m. S. Madrid. With few exceptions, the houses are low and small, with foundations of stone and clay and walls of earth, but the streets are wide and paved. It has a townhouse, prison, hospital, several primary schools, a suppressed monastery, an old and handsome parish church and nuns hermitage, manufactures of home-made cloth, soap, some oil presses, flour-mills, and pottery, where jars are made for the famous wine produced here, and the exportation of which forms the chief branch of commerce. A fine delicious wine is derived from the Burgundy vine, transplanted into Spain. It is kept in large jars (*fuogas*) in very deep cellars, and when removed, it is put into pigskins pitched inside. It is rich, fruitily full-bodied, high-coloured, and will keep well and improve for 10 years, but it is a heating wine. Valdepenas was sacked by the French in 1808. Pop. 11 085.

VALDPI ENAS-de-JAZZ a tn. Spain, Andalusia, prov and 18 m. S.W. Jaen, on the skirt of a hill. It has a substantial townhouse, a flesh-market, two primary endowed schools, a parish church and two hermitages, three flour-mills, five oil presses, three soap-manufactories, three tile and brick kilns, and a manufactory of phobos. Pop. (agricultural) 4309.

VALDPI ELLAGO a tn. Spain, prov and about 22 m. N W Leon with a church, courthouse, primary school and manufactures of linen and serge. Pop. 1018.

VALDFRADUEY a river Spain, prov Leon, rises in the hills between Almansa and San Roque-del-Tormo, and after receiving the waters of the Salado, enters the Duero, 20 m. E. Zamora. Extensive of windings (in length is about 80 m. and its general direction S W).

VALDENAS a tn. Spain, prov and 80 m. S.E. Leon between the Coa and Valderaduey. It has four squares, two primary endowed schools, five parish churches, two hermitages, one of them outside the town a bull-ring theatre, a substantially-built hospital, and a Carmelite convent. Near the town is the *seminario-convento* or theological school, in which the sciences, philosophy, mathematics, and Latin grammar are taught. Besides agriculture and cattle-rearing, the industry of the place is limited to two branches, two flour-mills, and several brandy-distilleries. Pop. 8435.

VALDEIRONBRES a vil. Spain, Aragon, prov and 63 m. N. V. Tur. r bank Matarrania, here spanned by a bridge of four arches. It is well built, the streets rise over one another like the seats of an amphitheatre, and it has a town house, parish church, two primary endowed schools; an oil and a paper mill, a copper mill, and various other manufactures. Pop. 3278.

VALDES an isl. N.W. coast of America in the Gulf of Georgia; lat 59° N. lon. 125° W. It is the largest of all the islands in the vicinity and along with Vancouver's, forms the continuation of the gulf, which is also called Discovery Passage. There is a village upon it, seated on the summit of a steep sandy cliff about 100 ft. high.

VALDEVERDEJA, a vil. Spain, New Castle, prov and 66 m. W Toledo, near the Tago. It has a townhouse, prison, two primary schools, church, a falling mill, several flour-mills, and some baking-establishments. Pop. 3048.

VALDISORA a vil. and com. Mexico, dep. Aljee Martineles near St. Martin-de-Lautones, with a church, and an old castle. Pop. 1179.

VALDIKRI or *Valdiker* a vil. and com. Italy, Piedmont, div and 11 m. S.W. Cuni l. bank Geaso with a court of justice, a handsome church, mineral-springs, with a bathing-establishment, and sources of fine marble. P. 1867.

VALDIVIA, one of the 8 provinces of Chili, bounded N. V. by the River Imperial S. the Maypo or Rio-Negro, E. the Andes, and W. the Pacific Ocean. It is about 180 m. long, by 75 m. wide. The Araucanian Indians, supposed to amount to some 16,000 still dwell in this territory, and are about twice as numerous as the Creoles or descendants of the original Spanish settlers, but generally speaking are quiet and inoffensive. Here the Andes appear somewhat to descend from their towering height in the V. parts of Chili; but as the climate is colder they are covered throughout the year with snow. From their jagged summits break out a number of volcanoes of great magnitude, among which may be specially noticed that of Villarrica, whose eruptions can be distinctly seen at a distance of above 200 m.; it stands detached from the parent-chain, and is ever vomiting forth volumes of fire and

smoke. The volcano of Osorno is next in importance, and like the former is seldom in a state of quiescence. In the district of Houliher is that of Huaschal. The country between the sea and the Andes presents a more level surface than is generally the case in this very mountainous region, in consequence of which, and of the natural humidity of the climate it possesses a great number of rivers and lakes, the former being in many cases navigable for vessels of large tonnage. Amongst them may be mentioned the Cautin or Imperial, which has a width at its embouchure of 840 yards, the Budi, which takes its rise in the salt-lake of the same name, the Tolton, which issues out of the great lake of Villarica; the Valdivia, which springs from the lakes of Huaschal, and after receiving the tributary waters of many large streams, falls into the Pacific, forming a number of islands at its mouth. In the Indian territory comprehended in this province, are also to be found the Chivir, the Trumog or Bano, the Bufonco, and a great many others of more or less note. Most of these rivers are deep and wide, and admirably adapted for forming a system of inland water communication yet strange to say, this natural advantage has never yet been turned to any account. The soil everywhere is extremely fertile, and the climate, though rarely as very salubrious, nor can any other part of Chile boast of so many and so secure harbours, still its progress hitherto has not kept pace with that of the rest of the Republic, or corresponded in any degree to the manifold advantages with which nature has endowed it. Some efforts, however, have been made of late years by the Chilean government to re-open it from this state of torpor and backwardness by establishing steam-navigation between it and the principal seaports of the Republic. A considerable part of the land is covered with wood of the best quality, and suitable both for houses and ship building. This is the chief article of export from the district—a little grain and a small number of cattle forming the residue. The very scanty population is employed in agricultural pursuits. This province once yielded gold, and the Spanish conquerors for sometime drew immense sums from its rich veins, but the system of compulsory labour which they attempted to impose on the natives, caused at last a general rising of these same tribes, which led to the utter ruin of all the Spanish settlements, and to a struggle so severe and protracted that not only were the mines abandoned, but every attempt to re-open them led to fresh and sanguinary irruptions of the Araucanians, until their very names were forgotten, nor can any one tell now where those rich deposits lie. Principal towns—Valdivia and Osorno. 1 sp. 23,900.—*Repertoire Chileno Domesque Araucanico* Molina, *Historia de Chile*.

VALDIVIA, a *Chili*, esp. of above prov. lat 39° 49' S. lon. 75° 15' W. 900 m. S.E. W. Santarén. It stands on a sloping bank on the S. side of the river Valdivia, at some distance from the sea, and in the centre of a district conspicuous for its magnificent woodland and the fruitfulness of its soil. The houses are chiefly built of wood and for the most part have a mean unattractive appearance. The inhabitants are poor and sunk in ignorance and sloth. The port of Valdivia is considered the best in *Chili*, whether for its size or for the safety of its anchorage. It was one of those built by Pedro Valdivia, a follower of Pizarro, and one of the most renowned of the Spanish conquerors. It grew and prospered for a time, and became in reality the most thriving and populous of the Spanish towns in the S. of *Chili*. But Valdivia fell at last, the Spaniards were exterminated almost to a man all their towns were destroyed, and thus favourite settlement shared the same fate, and thus ended its short-lived prosperity nor could it ever afterwards regain its ascendancy, notwithstanding all the efforts and the fostering care of the Spanish government. It was here that the Spaniards established the first mint in *Chili*. They made it a place of great strength, and for many years it was the penal settlement of both *Chili* and Peru. Valdivia was taken by the Dutch on several occasions in the 17th century. In 1820 Valdivia was wrested from the Spaniards by a patriot force headed by Lord Cochrane (Earl of Dundonald) under circumstances which render this deed of arms one of the most remarkable in modern times. Pop. 7059.

VALDOBBIADENE, a *town* in Northern Italy, prov. and 21 m. N.W. Treviso. It has several silk-mills, and raises a great deal of silk in its vicinity. Pop. 3400.

VALDUGGIA, a *vill* and *com* Italy, Piedmont, div. Novara, 8 m. E. Borgosesia, on the Stresa, have crossed by a bridge. It has a parish church. Pop. 3887.

VALFENÇA, three places, Brazil.—1. A *tn*, prov. and 90 m. W.N.W. Rio-de-Janeiro, between the Prato and the Paraíba. It is the seat of an electoral college, and the headquarters of a body of the national guards contains a parish church, and an hospital, and groves within its district much coffee, millet, manioc, and bananas. Pop. (1850) 5000.—2. A *tn*, prov. Bahia, 1 bank Una, near a canal, which is navigable at high water and gives that river a communication with the Jiquá. It has a court of law, with extensive jurisdiction over the neighbouring municipal districts contains a church, and two primary schools, and has a trade in coffee and timber. Pop. 1200.—3. (or Cataguanha) A *tn*, prov. Paraíba, on the Cataguanha, 85 m. N. Orleans with a church. In the district are numerous mines of sulphate, iron, tobacco, musket, and millet are grown and cattle raised. Pop. (1850), 3000.

VALENÇA, two places, Portugal.—1. A *tn*, prov. Minho, on a lofty height, 1 bank Minho, opposite to Tuy 19 m. N. N. Ponte-de-Lima. It is a place of great antiquity and is strongly fortified. Pop. 1700.—2. (de-Douro) A *tn* and par. Barra Alta, 8 m. S.E. Lamego, in a fertile district. Pop. 635.

VALENÇAY, a *town* France, dep. Indre 34 m. N.W. Chateauroux, on the Nalon. It contains a magnificent chateau built by the family of Rameau during the reign of Francis I, and in which Ferdinand VII. and the Infante of Spain were detained from 1808 to 1814 after they had been kidnapped by Bonaparte and his manufactures of woollen, woolen cloth, and cutlery, and a wool-spinning mill. 1 sp. 1676.

VALENCE (anc. Valentia), a *town* France esp. dep. Drôme 1 bank Rhone, have crossed by a fine suspension-bridge, 65 m. S. Lyons. It is surrounded by old battlemented walls, flanked by towers, and entered by several arched gates; and consists of poorly built houses, and narrow narrow streets. It contains a cathedral a small seminary, and a *lycée*, a *lycée*, a *lycée*, and containing a fine bust by Canova, of Pope Pius VI., who died here a public library of 15,000 volumes, a handsome oratory, and theatre. It is the see of a bishop, has a court of first resort, a consulting chamber of manufactures, a society of agriculture, commerce, and art, a diocesan seminary communal college, school of artillery, and building-arsenal. The manufactures consist of cotton prints, hosiery and gloves. There are also silk and cotton mills, breweries, soaperies, tanneries dye-works, marble-works, and bookbinders. The trade is in wine, of which that of St. Peray like sparkling champagne, bears the highest name, brandy fruit, silks, olives and nut oil, paper, &c. Pop. (1850), 11 127.

VALENCE-D'AGEN (anc. Valentia) a *town* France, dep. Tarn-et-Garonne, 15 m. W. Mouton, with manufactures of leather and quilts and a trade in fashions, corn, beaks, and tiles. Pop. 2400.

VALENCIA, a *prov* and ancient kingdom in the E. of Spain. The *province*, bounded, N. by Castellón-de-la-Pena and Tortosa, N. the Mediterranean, S. Alicante and Albacete, and W. Albufera and Castellón, has an area of 8744 geo. sq. m. and 500,000 inhabitants. It has first directed to the south, consisting of beautiful plains and valleys, enclosed by mountains and hills, is well watered by the Guadalquivir, Júcar, and other streams, which all flow E. to the Mediterranean, and though sparingly productive of the ordinary cereals, which are scarcely equal to the consumption, is renowned for its wine oil, silk, and numerous varieties of exquisite fruits, raises heavy crops of rice on its lower grounds, depastures large numbers of live stock, particularly sheep and goats, and is clothed with forests of excellent timber in its more mountainous districts; possesses valuable quantities of marble in various quarters, and has many productive fisheries on its coasts.—The *kingdom*, bounded, N. by Aragon and Catalonia, E. and S. the Mediterranean, S. and S.W. Murcia, and N.W. New Castile, comprehends the three modern *provs.* Castellón, Valencia, and Alicante; and has an area of 7198 geo. sq. m., and 1,110,990 inhabitants. It was first colonized by the Phœnicians or Carthaginians, who had established many flourishing settlements in it, when it was wrested from them by the Romans. Under them it made great progress in civilization, and was one of the most tranquil provinces of the empire, when it fell a prey to the Goths. About the beginning of the 8th century the Saracens became

its coaters. In the 11th century it was erected into a separate Moorish kingdom, under the dynasty of the Almoravides and retained its independence till 1238, when Don James I., availing himself of his civil dissensions, completely subdued it, and incorporated it with his kingdom of Aragon. It afterwards passed to the crown of Castile, and has since followed its fortunes.

VALENCIA [see Valencia-Estados], French, Valencia, Italian, Valenza), a city, Spain, cap. of the ancient kingdom and modern prov. of same name 180 m. E.S.E. Madrid, on the Turia, about 3 m. from the sea. lat. 39° 28' 45" N. lon. 0° 24' 35" W. (G.) It is the see of an archbishop the residence of a captain-general, and has a supreme court of justice. The city in shape is almost circular, and along the N. base of the battlemented walls flows the river whose sandy stream is exhausted by irrigation, is here crossed by five wide bridges. The walls built in 1550 by Pedro IV. are very perfect. There are eight gates, some of which, with their towers and machicolations, are very picturesque. The houses are lofty and gloomy looking and, with few exceptions, the streets are tortuous, and so narrow, that when one looks down from the cathedral tower, the openings scarcely appear amid the irre-

gular and beauty of the place. The want of a proper harbour is a great drawback to Valencia. This city is a cheap, well supplied place, for here fish, flesh, fruit, and green-herbs abound; the society is easy and agreeable and the climate is delicious. It is celebrated for its manufactures, the most important of which is spinning and weaving silk, in which great numbers are employed, the rest comprise silk-throwing—the exportation of rice alone requiring about 50,000 sacks annually—cordero, hats of wool, hair, silk, and straw, gloves, fans, glass, painted tiles, which are very celebrated, ordinery and fine wall-papers, soap, combs, and leather. There are also two foundries, a nail work, and a tobacco-manufactory which gives employment to more than 8000 women. The principal articles of import are flannels, ironmongery drugs, bar-tram plank, and colonial produce and the chief articles exported comprise corn, rice, silk, saffron almonds and oranges.

Valencia was founded by Junius Brutus, for the veterans who had fought under Viriatus. It was destroyed by Pompey, and when rebuilt became a colonia, and the capital of the Edetan. It was taken from the Goths by the Moors in 713, and annexed to the kingdom of Cordova and from them again it was, after a siege of 30 months, wrested in 1093, by the Cid, who ruled despotically till his death in 1098. His widow Ximena was displaced by the Moors in 1101, but the city was retaken in 1228 (according to others in 1239) by James I. of Aragon, and was brought into the Castilian crown by Ferdinand's marriage with Isabella. In consequence of its opposition to the French in the war of succession it was robbed of its liberties and wealth by Philip V. In 1808 the French, under Marmont advanced on Valencia, but though the generals and nobles fled, the people led on by Riego, a monk, bravely repulsed the enemy who retired with great loss on Almanza. It was afterwards, however, ignominiously surrendered by the Spanish general Blake to Soult, who violated the capitulation, and put to death all who had distinguished themselves in the national cause (Pop. 66,865 (1850)) but according to Ford the population of the suburbs reaches 120,000 (1855) 146,512.

VALENCIA a city Venezuela dep Caracas, prov Carabobo, 80 m W.S.W. Caracas. It has a parish church situated in a handsome square, and communicating as it does by an excellent road with Puerto Cabello, 20 m. distant, a well-frequented port in the Gulf of Truxes all goods landed there for the consumption of the provinces of the interior pass through the city. The adjacent country produces every sort of provision and fruits in great abundance, and the plains feed immense herds of cattle, with sheep, horses, and mules, so that its markets are well supplied. Pop. estimated at 16,000.

VALENCIA—1, A lake, Venezuela. See TACARIGUA—2, A seaport and island Ireland. See VALMONT.

VALENCIA DE ALICANTINA, a tn. Spain, Extremadura prov and 43 m W. Cecebre, near the Portuguese frontier, I bank Avid. It is walled, has a castle, government-house prison, fish-market, handsome townhouse, various educational establishments, an hospital for the sick two parish churches, with sacristies, portals, and is the seat of a fine almshouse, with several foundries, one of them supplied by a Roman aqueduct 80 ft high in some places. It has manufactures of some coarse linens, cloth, and hats, two fulling mills, and many flour and three oil mills. About 4 m. distant are the ruins of the ancient Julia Constantia. Pop. (agricultural) 6026.

VALENCIA DE-DON-JUAN, a tn. Spain, prov and 18 m S. Leon, on the Esla. It is surrounded by an earthen wall and in the highest part of the town is a strong Gothic fortress, but both are falling into ruins. It has a townhouse, three primary schools, and some domestic woolen and cotton weaving. Pop. (agricultural) 1857.

VALENCIA DE LAS TORRES, a tn. Spain, Extremadura prov and about 40 m from Badajoz. It is poorly built and has a parish church, an old castle, a courthouse, school; and an oil and several flour mills. Pop. 1230.

THE MARKET-PLACE, VALENCIA.—From George L. Sneyers.

galer, close-packed roofs. Of the public buildings and institutions the following may be mentioned—a good new theatre, various hospitals, among them the general hospital which has baths, the porchouse, a fine edifice the founding hospital &c a university founded in 1500 with chairs of jurisprudence, medicine, and philosophy with a fine library of 40,000 vols a museum of natural history, chemistry and physics a botanic garden in the environs of the city, a theatre, and chapel, the seminary-convict where theology Greek and Latin are taught the college of Corpus Christi, founded in 1686, which contains many fine paintings by Ribais a national museum in one of the suppressed convents containing six or seven hundred pictures, and in which the great Valencian school may be studied to advantage, especially Vicente Juanes, the Spanish Raphael Ribalta, and Ribera (Spanishists) The cathedral built on the site of a temple of Diana, and a Moorish mosque, was raised to metropolitan rank in 1492 it is one of the most interesting in Spain in point of architecture, but it is rich in paintings by the great masters of the Valencian school. There are besides 16 parish churches numerous suppressed convents, the most remarkable of which was St. Domingo's 21 nuns, a Magdalenary, 27 hermits, a handsome custom-house, a college for orphans of both sexes, a normal school, an academy of fine arts a school of commerce, a chair of agriculture, a college of advocates, a medical institute, with various other educational establishments; an episcopal palace, containing a library of 15,000 vols, the silk-hall or chamber of commerce, a beautiful Gothic building a noble Ducal residence, a balling a casino, a hippodrome, fine parks and gardens, good baths, prisons, and penitentiaries but there is only one fountain in the town, that in the great square. The citadel was built by Charles V. to defend Valencia against Barbary. The Ghorile, with its fountains and statues, is a delicious promenade and frequented by the

VALENCIA DEL-VENTOSO, or **DEL-BARRIAL**, a tn. Spain, *Katzenberg*, prov. and 48 m. S.W. of Madrid, with a courthouse, prison, a castle, rebuilt in Philip II.'s time, an endowed school for each sex, a church, suppressed monastery, and a barn. There are some domestic weaving of linen and fringes, and some traffic in pigs. Pop. (agricultural) 8109.

VALENCIA a small tn. Mexico, dep. and 10 m. N. Guaymas, near which is a noted silver mine not now worked.

VALENCIENNES [anc. *Valentianum*] a fortified tn. France, dep. Nord, at the confluence of the Rhonelle with the Scheldt, which traverses the town S. to N., and divides it into two unequal parts, 30 m. E.E. Lille, on the railway from Paris to Brussels. The houses in general are tolerably well built, but the streets are narrow and winding and the whole place is of a dark and gloomy appearance. Its principal edifices are the *Maison-de-ville*, partly Gothic partly Italian, the church of St. Gery, the theatre, general hospital, the academy of painting sculpture, and architecture and the public library of 18,000 vols. It has courts of first resort and commerce, a counting chamber of manufactures, and a communal college. The manufactures consist of linen, for which the town has long been famous; fine linen, heavy covers, wine-cloth, sails, starch, malmesbury, cotton, and French blue pencils, toys, dolls and fine pottery ware. There are also numerous beet sugar-factories salt-refineries, soap-works, tanneries, distilleries, flax mills, dye-works, and bleachfields. The trade is in wine, brandy, oil, soap, wool, and the above articles of manufacture. The philosopher Fontenay was born here. Pop. 18,558.

VALENA a vii and par Switzerland can. and 32 m. S.E. St. Gall. A cheerful well built place near to the lake of Neuchâtel (which see).

VALENTANO [anc. *Valentianum*] a vii Papal States, dep. and 19 m. N.W. Viterbo. Pop. 1090.

VALENTIA or **VALENCIA** an isl., tn., par and harbour, Ireland, on the W. of co. Kerry and west the S. entrance of Dingle Bay. The island is of a triangular shape, about 6 m. long E.N.E. to W.S.W., by 2 m. broad, has an area of 6371 ac. mostly fertile and under tillage, and possesses extensive and valuable slate and flag quarries, and productive fisheries. The towns of **VILLAGE**, at the S.E. extremity of the island, a beautifully wooded ascent brown mountain-slopes, and has a small church, chapel, and school, and some trade in slate, sheep, fish, and agricultural produce. Pop. of tn. and par 2487. — The **HARBOUR**, formed by the island and the channels separating it from the mainland has the advantage of two entrances, one from the N. and the other from the W., but both somewhat narrow is deep, spacious, and completely landlocked, and being the most W. port in Europe, has lately attracted considerable attention in consequence of a proposal to make it the W. terminus of railway communication, and a principal station for Atlantic steamers.

VALENTIA isl. End Sea, also named *Dixton* (which see).

VALENTINO (San), two places, Naples. — 1. A tn. prov. Abruzzo-Citra. 13 m. S.W. Castel with two churches and a convent. Pop. 2480. — 2. A tn. prov. Principato-Citra, N.W. Salerno, with a palace, a church, and five chapels. P. 2065.

VALENZA a tn. Italy Piedmont, div. and 7 m. N. Alessandria. A bank on whose fortifications were dismantled in 1603. It has spacious and regular but ill kept streets, and three squares, a court of justice, a large parish church of three naves, eight other churches a college, a monastery and two hospitals. Pop. 7477.

VALENZANO, a tn. Naples, prov. and S. Bari with a church, monastery, and monastery. Pop. 2486.

VALENZUELA two vias. Spain. — 1. Antaleña, prov. and 36 m. E. Cordova, with broad paved streets, a town-house, public granary hospital a primary school, church, and two hermitages. Pop. (agricultural), 2224. — 2. New Castle, prov. and 10 m. from Ciudad-Real, with a church, court-house, and school, manufactures of hides, and two oil-mills. Pop. 1240.

VALEA, two places, Spain. — 1. (de Alago), A tn. New Castle, prov. and 20 m. from Camoesa poorly built, with a parish church, an old monastery and monastery, a courthouse, and primary school; and a trade in corn, wine, and cotton. Pop. 1090. — 2. (de Arriaga), A tn. New Castle, prov. and 2. Camoesa with a church, a primary school, and a trade in agricultural produce. Pop. 1187.

VALELY or **CAUX** (St.), a seaport in France, dep. Seine-Inférieure, 85 m. N.W. Rouen, on the English Channel. It has a small harbour, much used for shelter in strong W. gales and at which a considerable commerce is carried on. The trade is chiefly in corn, elongated seeds, iron, steel, and coal. Pop. 6343.

VALELY or **SAINT-LOUIS** (St.) a seaport in France, dep. Seine, 13 m. N.W. Abbeville, a bank Seine, where it falls into the English Channel. It has a church, a harbour with a fine quay, admitting vessels of 800 tons some ship-building, manufactures of cables and carriage, a trade in malleable and pick-shedding wire, oil, brandy and cheese; and an active fishery. It is much frequented for sea-bathing. Within the Cosquer in invading England, sailed from Valery. P. 2842.

VALEPIR, an ancient dist. France, which belonged to the former prov. Roussillon and is now included in dep. Pyrénées-Orientales.

VALETTA, or **VALETTA** a seaport in, cap and on N.E. coast of Malta lat. (palace) 35°58'48" N., lon. 14°31'15" E. (n). It is picturesque and advantageously situated on a long neck of land called Mount Xiberras, which, with the mainland on either side of it, forms two large and commodious harbours, one on the E. called the Great Harbour, and the other on the W. called Marsa Muscat, or the quarantine harbour. The view of the town, on approaching it from the sea, is singularly magnificent. In entering it, attention is first attracted by the magnificence and strength of its fortifications. These consist principally of forts St. Elmo and Riccio guarding the great harbour the former an enormous work of granite, with barracks sunk in its lower bastions for 3000 men, fort St. Angelo, fort Tigne and Marsa guarding the quarantine harbour, and the lines of Floriana, extending from harbour to harbour, across the isthmus. The movement of the site makes it necessary to keep up the communication between the different streets by flights of steps, forming one of the peculiar features of the place. The principal street, called Strada Reale, ascends across the crest of the hill and the other leading streets run parallel to it at lower elevations. All these streets

STRADA ST-GIOVANNI VALETTA. — From Wigham's Mediterranean Voyages

are wide, and well paved with lava. There are also spacious and handsome squares in different parts of the town, and in the lower part, or Marina, the splendid quays, with the elegant edifices which line them, are especially deserving of notice. Besides the town proper, Valletta consists of a number of suburbs, of which the most important are Floriana, immediately beyond the lines already mentioned; and Senglea, Bormio, and Vittoriosa, on the E. side of the great harbour. The ecclesiastical edifices include 30 churches, of which the

rown floss-silk, fabrics of hemp and flax, and different handicrafts. Pop. 210,000.

VALLADOLID (anc. *Paenno*), a city, Spain, Old Castile, esp. above prov., and count. cap. of Spain, 98 m. N.W. Madrid, lat. 41° 39' 14" N.; lon. 4° 45' 28" W. (L.) in a beautiful and extensive plain, 1. bank Pisuerga, at the terminus of the canal of Castile. It is surrounded by an earthen wall and is entered by four principal gates has numerous squares, of which the principal one is surrounded with solid and handsome edifices, mostly provided with plasma supported by elegant granite columns, each of one piece, and a central point from which many streets branch off. Besides the cathedral, with

PLAZA DE ESPAÑA, VALLADOLID.—From Chapoy's L. Espagna.

Doric facade, and noble arch, 50 ft. by 24 ft., over the principal entrance, which was planned by Herrera, but never completed, the chief public buildings are the royal palace of Philip III. with a commodious exterior and inside the remains of the most magnificent specimens of religious Gothic art in the world: the Dominican convent, and the college of St. Gregory, the university with facade overloaded with statues and ornaments founded in 1346 by Alonso XI. and at present one of the most frequented in Spain especially by students in jurisprudence, the numbers altogether averaging about 2000 with colleges for French, English, and Irish. El Colegio Mayor-de-Santa-Cruz, a fine Gothic structure, with elaborate frontal, now converted into a museum, in which are gathered together the pictures, carvings, and images of the suppressed convents of San Benito and the small but once magnificent abbey of Portocarril, founded by Rodrigo Calderon, a prominent character in *El Moro*: altogether there are 16 parson churches five chapels, 34 convents, and 18 monasteries. The other public buildings and institutions consist of the high court of slavery the townhouse, various barracks, a theatre, a lyceum a bull-ring five-courts, with various other places of amusement a normal school, a college for orphan girls, an academy of architecture and design, a college of advocates, with numerous other establishments for elementary and advanced education a public library with 14,000 vols., general hospital, capable of accommodating 300 patients, military hospital, lunatic asylum, poorhouse, and foundling hospital, in the ancient and sumptuous palace of the counts of Benavente with several other charitable foundations, prisons, and penal establishments, a spacious alcazar, baths promenade, and fountains. The manufactures consist of paper linens, flax, brick and tiles, metal castings, leather, buttons, chocolate, fine delin, plain earthenware, ribbons, lace, silver-work hats, serges, blankets, dye-works, a chemical work &c. This city is the centre of traffic for the grain, fruits, and industrial products of the whole province, which are shipped at the great canal. Belad-Wind, as it was called by the Moors, was wrested from them by Ordoñez II. in 920. At the beginning of the 15th century when it became the residence of Juan II. it was already considered the finest town in Castile under Charles V. it was adorned with splendid edifices and his son Philip II. favoured his native place; he gave it the title of City in 1596, having conferred Clement VIII. to elevate it to a bishopric in the preceding year. Madrid rose on the

decay of Valladolid, as when the court removed the splendour of its prosperity were out. Philip III., feeling how much better the situation of the ancient capital was, determined to re-establish it, but after a five years' absence, the attempt was found to be impossible. At that time its population exceeded 50,000. Valladolid passed slowly away, keeping pace with the decay of Spain, until the invasion of the French, when ruin came on with frightful celerity. Columbus died here in 1506, and Hernandez the great artist in 1866. Philip II. was born here in 1527. Pop. 90,000.

VALLADOLID, a city Yucatan cap. dep., 80 m. E.S.E. Merida. Its appearance from a distance is pretty, each house having a little garden in front, filled with trees and flowers. The streets are well laid out and clean, but grass grows in the centre of the most frequented. The houses are principally of one story, with flat roofs, large doors, and barred windows, with centurys and stone and mortar floors. It has some good public buildings a fine square, a handsome stone-church, a townhouse, elegant aqueduct, which supplies the town with water and a pretty large cotton-factory, built of stone. The sellers in the marketplace are principally Indians, squatting about upon the ground, with small pieces of meat laid out in piles, and vegetables displayed in the same manner upon benches beside them in the public square. Valladolid is noted throughout the peninsula for the salubrity of its climate, and is much resorted to on this account by invalids from other parts of the province. Pop. about 16,000.

VALLADOLID-DE-NUOVA, dist. and to Honduras. See COMATAGUA.

VALLAMARTIN a tn Spain, Andalucia, prov. and 44 m. N.E. Cadix, at the confluence of the Barranco with the Guadalete. It has a townhouse, primary school church, nursery and manufactures of soft soap, and a pottery. Pop. 8176.

VAIL LATA a tn Naples, prov. Principato Ultra, 18 m. S.E. Arzano, with a church and an hospital. Pop. 3600.

VAI LAURIS (anc. *Vallis Aurca*) a vil France, dep. Var 10 m. S.E. Grasse will built with manufactures of earthenware. Near it is a mine of manganese. Pop. 2282.

VALL DORF a vil Prussia, prov. Westphalia, gov. Minden with a church, and a trade in cattle. Pop. 1113.

VALLÉ-DE-ANDALUZIS, a vil Spain Andalucia, prov. and 20 m. N. Málaga with a prison, granary, and hospital, five schools, a church and hermitage. Pop. (agricultural) 3895.

VALLÉ-DE-GUERRA, a vil Canaries, Isl. Tenerife very poorly built with a primary school, and some trade in agricultural produce. Pop. 1258.

VALLÉ-DE-SANTA ANNA a vil Spain, Extremadura, prov. and about 40 m. from Badajoz, with a church, an endowed school, manufactures of woollen and linen cloth, numerous flour mills, and a trade in lime and charcoal. Pop. 1406.

VALLÉ-HUICHINO, a tn. Canaries, N. end of Isl. Gomera divided into two parts by a ravine. It consists of 500 houses, including several hamlets and has a dilapidated prison, a primary school, and parish church, several flour-mills, and manufactures of household linen. Pop. (agricultural) 3257.

VALLÉ-RODONDA, a tn. Naples, prov. Salerno, dist. Sorra, in a deep valley with three churches. Pop. 3200.

VALLÉCAR, a tn. Spain New Castile, prov. and 5 m. S.E. Madrid, in a deep valley near the Jarama. It is indifferently built has a church several hermitages, a court-house, endowed school, and hospital and a trade in corn and pavement. Pop. 1431.

VALLÉCOERSA, a tn. Italy, Isola, and 14 m. S.E. Fromenza, on the Valle Fratta. Pop. 8000.

VALLÉ DUEIMO, or *Vallée Dueimo*, a tn. Italy, prov. and 40 m. S.E. Palermo, at the bottom of a well-cultivated valley in a mountainous district. Pop. 8800.

VALLÉGIO, a vil. kingdom of Italy gov. Venice, prov. and 15 m. S.W. Verona, near I. bank Minio. It has an old castle, with a lofty dungeon, and a remarkable bridge or causeway about 600 yards long, built on other side and defended by several lofty towers. Pop., including four adjacent villages, 4000.

VALLELONGA a *tu. Naples*, prov. Calabria-Ultra II, E. Monteleone, in a fertile plain near the *Medina*. It contains a church, and is supposed to occupy the site of the ancient *Nephepea*.

VALLELONGA a *tu. Sicily* prov. and 32 m. N W Catania on an affluent of the *Platina*. Pop. 3500.

VALLENDAR, a *vii* *Banah* *Prasta*, gov. and N N E Colima, r. bank *Rhine* with a R. Catholic church, a castle, and manufactures of woolen and linen cloth, tanneries, dye-works, &c. Pop. 1701.

VALLENGIN or **VALARON**, a *vii* *Switzerland* gov. and 2 m. N W Neuchâtel in the fertile valley of the *Ras* with a church, an old castle, partly of the 12th century, and now used as a prison. Pop. 430.

VALLENOLLE [see *Valence Soleriana*] a *tu. France*, dep. Basses-Alpes, 80 m. S W Digne, with a considerable trade in almonds, which are extensively grown in the district. Pop. 1850.

VALLESAUGUE [see *Val de Saug*] a *tu. France*, dep. Gard, 13 m. N Le Vigan, on the *Herault*; with a Protestant church, and numerous silk-mills, the inhabitants being almost all employed in the rearing of silk-worms. There is also some trade in wood and ironware. Pop. 1867.

VALLES, a *tu. Mexico*, dep. and 185 m. E. by S San-Luis-Potosi, 1 bank *Matamoros*. It stands in a district rich in sugar-plantations and other tropical productions, in which it carries on a considerable trade. Pop. 3500.

VALLETTA, a *tu. Malta*. See *VALETTA*.

VALLEIR, (sic) a *tu. France*, dep. Rhône, at the confluence of the *Galaure* with the *Rhône*, 19 m. N. by W Valence. It has an old Gothic castle, with a molinary *seigneurie*, manufactures of grapes, silk-thread, pottery, and chemicals, laweries, tanneries, and dye-works. Pop. 3466.

VALLEVO, a *tu. European Turkey* *Servia*, 65 m. S W Belgrade; with numerous mosques and well frequented markets. 1 op. about 6000.

VALLO (sic) a *tu. Naples*, prov. Principato-Citra, 15 m. S E Salerno. It is well built, has a parish church, a Dominican convent and numerous tanneries. Pop. 2400.

VALLOIRE, a *vii* and com. *France* dep. Savoie, prov. Montienne, 9 m. S E St. Jean le-Maurienne. It has a trade in cattle dairy produce, and rock-crystals. Many of the inhabitants travel the country as *colporteurs*. P. 1825.

VALLOIN, a *tu. France*, dep. Ardèche, 14 m. S E Largentière, not far from the *Ardèche*, where it is crossed by a suspension bridge. It contains a Protestant church, and raises much silk. Pop. 2878.

VALLONGO, two places Portugal prov. Douro —1. A *vii* and par. 7 m. from Oporto, near hills of same name, in which the Romans had silver-mines. It has a large trade in bread, honey, &c. Pop. 2166 —2. (*de-Popo*) A *vii* and par. 1 bank *Yough*, about 10 m. from *Aveiro*. Pop. 2160.

VALLOBBE, a *vii* and par. *Switzerland*, *cant. Vaud*, 37 m. N N E Geneva; with manufactures of clocks and watches, weights, weapons, &c. Now it is iron-works. Pop. 1435.

VALLE, a *tu. Spain*, *Cataluña*, prov. and 12 m. N N W Tarragona, nearly encircled by two streams. It is surrounded with ancient walls and towers and is entered by five gates. Its houses are for the most part old-fashioned but solid, and the streets are unpaved. Almost all the squares are used as markets for different commodities. This considerable and thriving town is poor in public buildings. It has a townhouse, hospital for the sick, prison, a church three ex-monasteries, two nunneries, four fountains, and various public and private schools, manufactures of cotton and woolen fabrics, five spinning-mills, a factory for twisting raw silk and making it into shawls, 30 bread-dish-houses, 16 tanneries, five soap-manufactures, brick and tile kilns, a pottery, a brown-paper mill, numerous oil and flour mills, and six dye-works. Here the Spaniards were completely defeated, Feb. 24, 1808 by St. Cyr, when the town was most mercilessly sacked. On the same plain, Jan. 16, 1811, Berthelie routed General Engelen and an Italian detachment of MacDonald's. Pop. 16,064.

VALLEY [see *Al Valley*] a *vii* and com. *France*, dep. Haute-Savoie, prov. Chablais near Thonon. It has fine marble-quarries; and a trade in corn, butter, and cheese. Pop. 1165.

VALMACCA, a *vii* and com. *Italy*, *Piedmont*, dir. Alessandria, prov. Casale, near *Frasineto* with a church. Pop. 1809.

Vol. II

VALMADRIPA a *vii* and com. *Italy* Lombardy prov. and about 15 m. from *Como*. It is well built and has a handsome church, a beautiful monastery, several silk-mills, and a trade in corn wine and silk. Pop. 2849.

VALMASEDA a *tu. Spain*, *Biscaya* on a narrow piece of ground between 1 bank *Cadagua* and a precipitous hill, 16 m. S W Bilbao. It is surrounded by walls, and entered by four gates. It has two churches a townhouse remarkable chiefly for its magnificence, a Latin and two elementary schools, an hospital and a ruined palace; manufactures of various articles in iron and copper and several flour-mills. Pop. 1858.

VALMONTONE, a *tu. Italy*, *clug* and 24 m. N W Frosinone, at the opening of the plain of the *Seced*. Pop. 1040.

VALMOZZOLA, or **PIETRE** in *VALMOZZOLA*, a *vii* and com. *Italy*, *Parma* 1 bank *Monzale* with an old castle, a trade in cattle, and quantities of very hard sandstone. Pop. 1889.

VAL OGRE [see *Valonne*] a *tu. France*, dep. Manche, on the *Merderet*, 65 m. N W R. La. It has a court of first resort, a communal college, public library and an agricultural society, manufactures of earthenware, blades, iron, wire, and dye-works and a trade in butter, flax, thread, linen cloth, gulls, wax, honey, and fresh fish. Pop. 5577.

VALOIS, an ancient dist. *France*, which belonged to the *lieu de France*, and is divided between the E. of *dep. Oise* and the S. of *dep. Aisne*. Its capital was *Croisy*.

VALONA a *tu. European Turkey* *Su Avlona*.

VALOR, a *tu. Spain* *Andalucía*, prov. and about 65 m. from *Granada*, S. side of the *Sierra Nevada*. It has deep winding streets, a parish church, and a primary school; mineral springs, oil and flour mills, and a trade in wheat, pineapples, fruit, particularly figs and silk. Pop. 1644.

VALPARAISO, a maritime prov. *Chili*, formerly included in that of *Santiago* but erected into a separate territorial division by the law of October 27, 1842. Its limits are to the N the *Cuesta del Blanquillo* and *Lake of Otapipe*, S *dep. Melipilla*, E the *Cuesta-de-Calavera*, and W the *Pacific Ocean*. This province, from its surrounding the port of *Valparaiso*, is one of the most important in *Chili*. A great part of the land is mountainous and dry, and is greatly inferior in productiveness to some of the neighbouring ones. Wherever there is moisture, however, fertile soil is sure to be found. Many small valleys occur of uncommon beauty, and clothed in the richest vegetation. Those of *Ossa-Blanca* and *Quillota* are the largest, but the latter which is 80 m. distant from *Valparaiso*, is by far the most extensive and important. It is watered by a large mountain-forest of the same name formed by the melting of the snow in the *Andes*. From it are drawn numberless water-courses, by which the whole of the land capable of cultivation is irrigated. The soil is a deep loam of extraordinary fertility producing the finest clover, wheat, barley, beans, vegetables every variety of European fruit, and even some of the tropical ones. A considerable quantity of wine and brandy is made. The almond and orange grow here luxuriantly the mildness of the climate being peculiarly favorable to them. The former is among its most valuable productions, and is sent as far as *California*. The hemp grown in this valley is excellent. A good deal of it is made into cordage for the *Valparaiso* market. There are no narrow mines of copper, and some of silver, in the neighbourhood. The ores of the former are mostly smelted on the spot, and made into bar-copper, for the English and American markets. Mining, however, is less attended to than either agriculture or commerce. The only river of note in this province is the *Quillota*, which falls into the sea a few miles to the N of *Valparaiso* and there takes the name of *Concom*. Principal towns—*Valparaiso*, *Quillota*, and *Ossa-Blanca*. Pop. (1847), 78,998.

VALPARAISO the principal port of *Chili* esp. above prov. first in commercial importance, and second in population, in the Republic. It is situated on a large bay in the *Pacific* lat. 35° 1' 56" S. lon. 71° 41' 45" W, 90 m. N W N *Santiago*. The Bay of *Valparaiso* is of a semicircular form, and capable of accommodating a very large fleet. It is well sheltered on the E, S, and W but is entirely open towards the N, and during the prevalence of winds from this quarter in the winter season, accompanied as they always are by a heavy rolling sea, the shipping is much exposed, and some vessels

often take place. The town rises like an amphitheatre, showing everywhere signs of life, and presenting an exceedingly English-like aspect; it has in fact more the appearance of an English colonial town than one of Spanish origin. A good deal of building-ground has been gained of late years by the gradual filling up of the bay through the deposition of sand and other debris brought down from the hills by winter-torrents. The part of the town properly called the Port is built on the lower slopes of a range of lofty heights which enclose the bay and on a narrow beach widened here and there by deep cuttings into these steep acclivities. The Almendral formerly a rural suburb, is gradually becoming the principal part of the town. Here the base of the hills is farther removed from the sea than it is in the W part of Port, and the intervening space being quite level and forming excellent building-ground, the town in 1854 had extended in this direction.

Valparaiso is all paved; the houses have nothing remarkable few can be called handsome. Of the public buildings, the custom-house, situated near the landing-place, is the only

VALPARAISO.—From English. View across the Bay.

one worthy of notice. It has an extended and rather handsome facade, surmounted by a tower of elegant design, the stores attached to it are extensive. The merchants have an exchange and reading room, where they meet to transact business, and read foreign journals, with which it is plentifully supplied. The theatre is one of the best in S. America, and is generally well attended. Valparaiso has two parish churches, La-Matrix in the Port and Los Santos-Apostoles in the Almendral, besides chapels of ease in different parts of the town also several convents for nuns, and one of French nuns, chiefly intended for the education of poor children. The Protestants have two places of worship, one British Presbyterian and one Independent; they have further a cemetery of their own. There are in Valparaiso a British naval hospital two hospitals for other foreigners, and one for natives. Valparaiso possesses no public library or scientific institution, the inhabitants generally are not much given to reading or study. There are however, numerous schools for both sexes, in most of which the English language is freely taught, this being considered by the Valparaisians to be an essential branch of education. Valparaiso cannot boast of a fine climate, the hilly nature of the country, but especially the want of water restricts agricultural operations to very narrow limits, consequently it is chiefly indebted to other parts of the country for its supplies of provisions, thus Santiago furnishes cattle, Aconcagua and Quillota, fruit, vegetables, and bread; flour is obtained from different points, principally from the S. A fine carriage-road, the best in the country connects this place with the capital. But the railway to Santiago, passing through the rich valleys of Quillota and Aconcagua, a work of great magnitude, cannot fail to be of the highest benefit. In a country so mountainous and so deficient in good roads Valparaiso has three printing-presses and two daily papers. There are also two clubs, chiefly frequented by seagulls. Hotels and cafés are nume-

rous, and are chiefly kept by Frenchmen. The *Argentin* in Valparaiso constitutes no slight proportion of the population. The English are the next numerous, then the Germans, French, and Americans; they live in perfect harmony with the natives, who here more than anywhere else in Chili have experienced the benefit, and appreciated the value of such an element of civilization. Many of the artisans are European, so are the principal houses of business, together with their numerous retinues of clerks; and this gives to the foreign body a standing and influence it possesses in no other part of the country or the coast.

Some doubt exists as to the precise date of the foundation of Valparaiso by the Spaniards. It is probable, however, that it was simultaneous with or immediately subsequent to that of Santiago; inasmuch as Valparaiso is known to have been, from the earliest times the channel through which the former received its supplies of foreign commodities, and by which it exported the products of its own soil. During the Spanish domination Valparaiso was a place of very little note, and was scarcely known to the world. In 1819 the population barely amounted to 5000 souls. The town itself was little better than a straggling village. But from the moment that Chili attained the rank of an independent state, and was left free to hold out the hand of fellow ship to the nations of the earth, Valparaiso began rapidly to advance, and has since continued to do so in a most remarkable manner. Indeed, with the single exception of San Francisco in California, no place is to be found on the W side of the continent that can be compared with it in the rapidity of its growth, or in the increase of its importance and prosperity.

In 1845 the value of the imports of the whole country (nearly all at least being through Valparaiso) was £1,321,000, that of the exports, £1,621,000. In 1851 after the gold discoveries in California, the former rose to £3,176,800 and the latter to £1,800,000 in 1854 they had increased to £4,874,870 and £6,363,043 respectively. The above figures do not include the value of goods introduced in *fructos* and which are considerable quantities. In 1854 the number of vessels that entered the harbour was 869; in 1851 it increased to 1561. In 1854 the number entered had risen to 1075, of 590,169 tons and crewed, 1077, of 509,388 tons. Valparaiso as a seat of commerce possesses advantages of no ordinary kind. It is the first port of any note in the S. Pacific. It lies opposite the Australian colonies, and stands on the direct route of vessels proceeding to California and the other countries bordering on the Pacific. It is, moreover, the port of the capital, and the natural outlet of large tracts of fertile land. Thus, independently of being the centre of a very extensive local trade, it is the general rendezvous of ships entering the Pacific besides being theemporium from which Bolivia, the South Sea Islands, and a variety of other states draw their supplies of foreign commodities, and the port which chiefly provides the maritime provinces of Peru with wheat, and other articles of subsistence. The discovery of the gold fields in California has added much to the importance of Valparaiso, by giving rise to a large trade in cereals, carried on almost exclusively through this place; so any sailing of the many vessels that call here for supplies on their way to and from that country. A similar intercourse has sprung up lately with Australia in consequence of like discoveries there. That portion of the Argentine Provinces situated along the E. base of the Andes, is chiefly dependent on Valparaiso for European fabrics and all articles not produced by its own soil, this branch of trade has become more important since the expulsion of Rosas from Buenos-Ayres. This also is the headquarters of the foreign ships-of-war stationed in the Pacific.

Valparaiso is common with the rest of Chili, is very liable to earthquakes, they occur frequently though seldom causing serious damage. The last severe one happened April 2, 1851, when a number of houses fell, and a great many others were completely shattered. But the most fearful earthquake of the kind experienced for many years in Chili occurred in November, 1822; on this occasion the greater part of the town

was destroyed, and a great many others were completely shattered. But the most fearful earthquake of the kind experienced for many years in Chili occurred in November, 1822; on this occasion the greater part of the town

was felled to the ground, and several hundred persons were buried under the ruins. The climate is free from extremes of temperature; the thermometer in the town never descends to the freezing-point, and seldom rises above 80° even at the height of summer. The evenings and mornings are invariably cool and pleasant. Pop. (1847) 40 000; 1854 (estimated at) 50 000.—(*Private information*, &c.)

VALICU, a town, Austria, Sclaviemia, on the Karawanz, 15 m N W Enns. It has a castle and a bathing-establishment. The Roman emperors Decius and Valentinian II were born here. Pop. 3400.

VALHEAS [vau, Valheasus] a town in France, dep Vaucluse, 20 m N N E Orange, on the Cèronne. It has manufactures of silk and leather, and a trade in wine, oil, chestnuts, silk, and particularly madder, which is extensively grown in the neighbourhood. Pop. 2223.

VALS, a watering-place, France, dep Aribche in the picturesque valley of the Volane, an affluent of the Aribche, 18 m W S W Privas. The springs, which are cold, acidulated, and ferruginous are much frequented, and are said to be very efficacious in stomach-complaints in intermittent fever, jaundice, &c. Pop. (1800) 2789.

VALSEQUEILLO a vil. Canaries, Isl Gran-Canaria, with a church, and two schools, manufactures of woollen and linen cloth a trade in fruit and agricultural produce. Pop. 2798.

VALSUGANA, a market town, Austria, Tyrol on the Brenns, and the road from Trent to the Venetian frontiers. It is well built and has a castle, a Franciscan convent, and a number of silk-mills. Pop. 2600.

VALSZIO a market town, Hungary, co Borsnya, about 4 m S Skics, with a courthouse, and a trade in corn. P. 1693.

VALTANAS a town, Spain, see BALZANAS.

VALTIERRA, an ancient in Spain prov Navarre. I bank Ebro, 42 m S. Pamplona with a church, courthouse, prison, school, and a flour and several oil mills. Pop. 1181.

VALVUOLANCIEN, a vil. and com. Italy Piedmont, div 18 m N E Aosta on the slopes of Mont Cervin. It consists chiefly of peasant huts, and has a church, several chapels and elementary schools. Pop. 1487.

VALVA (Ia), a town Naples, prov Principato-Città 9 m N E Campagna, with three churches, and three chapels. Pop. 1800.

VALVERDE, a town Canaries, sup Isl Hierro or Ferro consisting of its numerous suburbs, of houses generally low, built of dry stone, and covered with straw. It has a townhouse, prison, granary three primary schools, two parish churches, and a number of hermitages and manufactures of coarse woollen stuffs, saddlery, hanks, ribbons, and household linen. Pop. 4580.

VALVEDUE, several places, Spain — 1, (de-Juon), A vil New Castile, prov and 20 m S. Comca with a primary school, church and two oil mills. P. (agricultural) 1774 — 2, (de-le-Fere) A town Extremadura, prov Caocera, 12 m from Jarandilla, with a church, strong castle, courthouse, primary school, and hospital several oil and flour mills and a trade in oil wine, silk, and fruit. Pop. 1314 — 3, (de-Legones), A vil Extremadura, prov and 15 m S. Badajoz, with a townhouse, public granary two schools, a church, and two hermitages numerous flour-mills, and some traffic in grain. Pop. 1510 — 4, (de-Llerena), A town Extremadura, prov Badajoz, 10 m from Llerena, with a church, courthouse and school several flour-mills, and a trade in corn. Pop. 1120 — 5, (del-Centro), A town Andalusia, prov Huelva, 40 m W N W Huelva. It has a large square, and clean paved streets; a granary, primary schools, Latin grammar-school, townhouse and prison of good architecture parish church and three hermitages. The chief employment of the inhabitants is husbandry the manufactures being confined to hats and mulberrills. Pop. 5390 — 6, (del-Francia), A vil Extremadura, prov and 55 m from Caocera, in a valley with a church, prison, and endowed school manufactures of linen, several oil and

flour mills, and a trade in oil and pimento. Pop. 1008. — 7, (del-Mayana), A town New Castile, prov and about 6 m. from Bagoya with a church, courthouse, prison, school, and a trade in corn and cattle. Pop. 829.

VAMOS, several places, Hungary — 1, (Perte), A market in Thibet, Thibet on Szabolcs, in a well wooded district, 2 m from Debrecen with two churches, and a trade in corn and cattle. Pop. 2524 — 2, (Sajo), A vil Huber-Tudai, on-Borod on the Sajo, 12 m from Munkacs with a church, a castle, and a trade in corn, wine and wool. Pop. 1890.

VAN, or **WAN** a town and lake, Asiatic Turkey on the borders of Armenia and Kurdistan. The town, 145 m S.E. Erzeroum close to the E. shore of the lake, on an extensive plain covered with beautiful gardens overlooking it is situated in a narrow conical, crowning a lofty conical mountain height. It has narrow dirty, ill paved streets, and small, scantily-supplied bazars; but the houses are not ill

THE GREAT VAN, VAN—From Toulon description of the Van, &c.

built. There are no public buildings of any consequence, except two Armenian churches, and some mosques with conspicuous minarets. Cotton cloth is the only staple article both of manufacture and export. Pop. about 15,000. — The **EXTREME** area, 9618 sq. sq. m. is bounded N by Erzeroum and Haydiz, S. by the Persian Gulf, and W by Diarbekir, and forming part of the Armenian plateau, is traversed by several mountain ranges, in which among others occur the lofty summits of Ala-dagh and Sapan, each exceeding 10,000 ft. is watered by numerous streams, generally feeders of the lake and though better adapted for pasture than agriculture has several large and fertile plains, of which that of the capital is the most celebrated, on which large quantities of corn, fruit, and tobacco are grown. The inhabitants chiefly Kurds, Turcomans and Armenians are roughly estimated at about 150 000. — The **LAKE**, situated in the N W of the strait, 5457 ft. above sea-level, is of very irregular shape, having an extreme length, N E to S.W. of about 70 m. and an extreme breadth, N to E, of 28 m. and an area of about 1240 sq. sq. m. Its depth at some distance from the shore is understood to be very great, but shallows much towards the N.E. extremity its water is salt, but becomes only brackish near the mouths of the streams, and is freely drunk by cattle. Its principal feeders are about eight in number, but it has no visible outlet. It contains many islands, particularly on its E. side. The only fishery in it is that of a kind of sardines, which are salted and exported to all parts of Asia Minor. The banks both on the N and E. exhibit much lofty and well-wooded scenery and great quantities of pines, and other valuable products, are scattered on the shores.

VAN DIEMEN'S GULF N.W. Australia, between Coburg peninsula and Cape Holtman, and Melville Island. It is about 100 m. E to W and 50 m. in breadth.

VAN DIEMEN'S LAND or **TASMANIA**, an island about 100 m. off the S.E. extremity of Australia, from which it is separated by Bass Strait between lat. 40° 40' and 48° 52' E., and lon 144° 20' and 148° 20' E. It is of the shape of a heart, or an irregular triangle with its base stretching in a concave curve between Cape Grim in the N.W. and Cape Portland in the N.E., and the sides tapering gradually from these points the one in a S.E. and the other in a S.W. direction, till they meet in the apex at South Cape; greatest

length, from N to S, measured on the meridian of 147° 155 m.; median breadth, measured on the parallel of 43°, 165 m.; estimated area, about 34,900 sq. m. The shores are generally bold and rocky, particularly the W., which present long ranges of barren cliffs of enormous basalt, with scarcely an opening in which a vessel could shelter, except those of Macquarie Harbour and Port Davey. The N.E. shores are almost equally bold and ungravidated, but in the N., where several low sandy beaches occur, we have, among other harbours, the fine estuary of the Tamar and in the S.E. and S. an almost uninterrupted series of anchorages, which, for shelter, bottom, and depth are scarcely surpassed in any other part of the world. In particular D'Entrecasteaux Channel, which stretches for about 30 m. between the S. coast and the island of Bruny, with a breadth varying from 2 m. to 8 m., and forms the S.W. entrance to the Derwent at the mouth of which the capital Hobart-Town is situated, is a continuous line of land-locked harbours in the midst of magnificent scenery. The interior is remarkably rugged and mountainous. The main-chain commencing in the N.E. at Cape Portland where its continuity with the great E. chain of Australia is made apparent by peaked islands extending across the strait, pursues a very irregular course, first nearly due S., at no great distance from the E. coast till it reaches Oyster Bay where it turns W.N.W., and continues in that direction more than half-way through the centre of the island. It then suddenly resumes its original direction, curving gradually round to the S.E. and finally terminating at South Cape. This tortuous range, on one or other of whose flanks all the larger streams of the island take their rise, has a mean height of about 3750 ft., and attains its culminating point of 5520 ft. in the S.W. in Mount Humboldt lat. 43° 25'; lon. 148° 7'. The other most remarkable summits occur, not in the main-chain, but in two lofty branches which it throws off. The one of these, stretching between St. Patrick's Head on the E. and Port Dalrymple on the west coast, presents in succession the remarkable summits of Ben Lomond 5003 ft., Ben Narva 3910 ft., and Mount Arthur 3908 ft. the other, breaking off at Mount Humboldt, proceeds E. and terminates magnificently a little W. of Hobart-Town, in Mount Wellington, 4195 ft. A line drawn from the Huon in the S., to Clarence Lake in the interior and continued N.W. to Cape Grim, would divide the island into two nearly equal parts. The section to the E. and N. has been minutely surveyed, and comprises the uninhabited portions of the island that to the W. and S. is not only more habitated, but, from the temperate nature of the vegetation and the alpine character of the region, which have baffled the most intrepid explorers, but very little of it is known. From the snow-capped peaks skirting the horizon to the westward as summer as seen from the highlands in the interior it is conjectured that there are mountain-ranges there above the level of the perpetual snow-line, which, in those latitudes, would be between 7000 ft. and 8000 ft. In all the mountain-ranges, and generally throughout the island, the prevailing rocks are crystalline consisting of lamell, granite, gneiss, quartz, &c., either produced directly by volcanic action, or changed or modified by it, and hence, as might be expected in such circumstances, the scenery is often of the wildest description. Numerous peaks, of the most fantastic shape, tower like the clouds, or overhang profound and tortuous abysses, evidently formed by rending whole mountains asunder. In these most frightful precipices occur, among others on Ben Lomond, with a perpendicular depth of 3000 ft. Beyond the range of these convulsions, however rugged and solitary strata, chiefly of sandstone and limestone, are largely developed, and form gentle hills or undulating valleys, equally remarkable for beauty and fertility, and usually watered by copious streams. The river system radiates from the central portions of the island towards the coast, and serves from lakes and springs, at an average altitude of 2000 ft. above the sea. Of these streams by far the largest is the Derwent, which, issuing from the beautiful mountain-lake of St. Clair in lat. 49°, flows S.E., augmented by the Dee, Ouse, Clyde, Jordan, &c., and after forming a broad estuary, pours its waters into two main channels, that of D'Entrecasteaux on the W., and that of Storm Bay on the E. side of Bruny Island. Another river of much shorter length, but, from the width and depth of its channel, of scarcely less navigable importance, is the Tamar, which,

formed by the junction of the N. and S. Kok rivers at the town of Launceston, flows N.W. into Port Dalrymple. The other principal streams are the Huon in the S. the Gordon, which has its mouth in Macquarie Harbour, in the W., and the Arthur in the N.W. The two last, flowing through districts of the most inhospitable character, are very little known. Great or Clarence Lake, the largest in the island, situated near its centre, about 90 m. N.W. Hobart-Town, is 15 m. long, by 5 m. broad, but owing to the numerous creeks and windings of its shores, measures nearly 100 m. in circuit. Its scenery is much valued. The climate is colder and more humid than that of Australia, and in respect both of vegetative power and salubrity is, on the whole, superior to it. The spring-months, those of September, October, and November, are usually bright and clear with occasional rain and high winds; the summer heat, which averages about 70°, sometimes rises suddenly to 100° or 110°, partly in consequence of a stifling and blighting N. or N.W. wind but is almost always tempered by evening land and sea breezes; autumn, by far the pleasantest season, commencing March, April, and May, is generally clear and bright, and free from clouds and mists; winter is never severe, except in high or exposed situations, where frost is frequent, and snow often falls, while in the lower grounds its moderate and gentle showers fall; amidst them obstruct the husbandman's labours.

The indigenous herbivorous animals are mostly of the peccated kind, common to Australia, but exist in greater numbers than on the mainland, so much so, that the kangaroo-lusther for boots and shoes, and opossum fur, constitute articles of export. Here also is found a unique animal of its kind called the 'native tiger' by the colonists, being the largest carnivorous animal in Australia, though not larger than a wolf. The principal natural productions are extensive native forests chiefly of the gullipines pine and ash, several of which furnish timber for ship-building and cabinet work. Large tracts of rich and verdant pasture, well adapted for cattle, but more especially for sheep, which form by far the most important source of wealth, and minerals among which freestone, limestone, roofing-slate, and coal have all recently been turned to good account. The coal occurs in two fields, one in the S.E., at Port Arthur, of an inferior quality requiring to be burned along with wood to assist its combustion and the other in the N.E. near the Douglas, of better quality and, though much disturbed by intrusions of trap contains seams of great aggregate thickness, and has been successfully worked by pit, one of which is 50 fathoms deep. Among metals which may yet be made available, are mentioned both gold and silver of which traces have been discovered, lead, of which a vein has been found in a mountain-limestone ridge copper, believed to exist in the same quarter and iron, both excellent and abundant. Another product, not of much economical value, but found here in great abundance, is alcholic wood, much of it of spines tea sure, and susceptible of a beautiful polish. The arable lands lie mostly in the valleys, in quality resembling the alluvial lands of Scotland, and in about the same proportions to unarable land as 45 bushels to the acre is considered an average crop of wheat. In agriculture considerable progress has been made, and all the ordinary cereals are successfully cultivated. The wheat, in particular, is no superior in quality, that when brought to the London market it brought a higher price than any other grain. In 1838 the whole area under crop were only 34,038, but 20 years later, in 1858, amounted to 171,540. In 1863 the extent of cultivated land had increased to 237,178 acres. In live stock, particularly horses and sheep, the progress has been equally rapid, the former having increased between 1828-48 from 3084 to 17,196, and the latter from 553,698 to 1,762,965; in 1863 the number of sheep was 1,800,811. In 1848 the exports, consisting chiefly of wool, wheat and flour and timber amounted to £490,381, the imports to £394,154. In 1863 the exports were £398,511, and the imports £203,540. The population in 1848 amounted to 74,741 of whom 38,459, considerably more than a third of the whole, were convicts. This was unquestionably the worst feature in the social system of the island, and naturally hindered the development of the colony. Neither the religious nor educational institutions were able to provide in any adequate degree for the evils which it entailed, but a

more effectual remedy has been found in the recent enactments of the British Parliament abolishing transportation. To convict labour, however, must be attributed the construction of the many excellent public works throughout the island, especially the tamper road from Hobart-Town to Launceston, a distance of 180 m., which cost £5000 per mile, without taxing the colonists for the outlay. The aboriginal population, once sufficiently numerous and powerful to contest the superiority of the colonists, is now all but extinct. The government, regulated by the Act 15 14 and May. The summer-house of June and July are excessive, and by the end of August, or beginning of September, the long grass has become so thoroughly parched as to be easily ignited. The agricultural capabilities of the island are unquestionably great, and the farming operations carried on chiefly at Victoria, near the harbour of that name, are said to have succeeded beyond the most sanguine expectations. The principal products, in addition to those of the soil are furs, obtained chiefly from the beaver, marten, least-otter, and sea-otter and fish of the most valuable species found on all parts of the coast. The natives belonging to 18 tribes, of which the Kawiak, Quakwaka, and Nootka, are the most numerous, are estimated at 11 468. They form a fine race, and appear to be industrious and friendly though much addicted to quarrelling. The property of the whole island was granted in 1849 to the Hudson Bay Company under the express condition of colonizing it. Attempts with this view have accordingly been made but have not met with much success, partly in consequence of the greater attractions offered by the gold-fields of California and Australia. Van couver's Island was supposed to form part of the mainland till 1792 when the captain of an American vessel sailed through the E. channel which separates it. In 1793 it was visited by Vancouver who gave it the name of Quadra and Vancouver, the former name given in compliment to the Spanish commandant of Nootka Sound, is now generally dropped. The agents of the Hudson Bay Company had long been accustomed to visit it regularly for the furs and other commodities provided by the natives, but it attracted little attention till recently, when the discovery of the Oregon question brought it prominently into view. By the boundary treaty with the U. States, the entire possession of it has been formally given to Great Britain, and there seems no reason to doubt that its position, its agricultural capabilities, its excellent harbours, and its coal, destined it are long to occupy a prominent place among our colonial possessions.

YANDALIA, a vil U. States Illinois, of which it was for some time the capital, on the Kankakee, and at the junction of several important lines of railway 66 m. S.E. by S. Springfield. It has an important transit trade. Pop. about 1100.

YANDELLE, a town Spain, Catalonia, prov. and about 34 m. from Tarragona; with a church, school, distillery flour-mill and a trade in corn, wine, and cattle. Pop. 1175.

VANDOLA (La) the west E. of the Admiralty Islands lat. (centre) 2° 14' S., lon. 149° 10' 16" E.; under 3 m. in circumference, covered with coconut trees, and densely inhabited.

VANGE, par Eng. Essex 3230 sq. Pop. 164.

VANIAMBADY a tn Hindostan presid. and 105 m. W. S.W. Madras, on an island in the Pulicat. It contains several Hindu temples.

VANKIKORO Vankoro, MARIKORO or PIRRI Island, an isl. in the Pacific Ocean remarkable as the scene of the disastrous shipwreck of *La Perouse*, in 1788 lat. (Mount Kapego) 11° 35' 30" S.; lon. 168° 08' 34" E. It is 80 m. in circuit, lofty, and covered with trees to the water's edge. The commanding point, Mount Kapego, is 3000 ft. above the sea, and distinctly visible at a distance of 60 m. The interior is a wild and dense forest, nearly impenetrable. The inhabitants, including those of a few adjoining islands, are supposed not to exceed 1500 or 1600. They are in general small and thin, ugly and indolent, and often attacked with ulcers or covered with leprous spots.

VANKLEKKHUI, a tn. Canada West, 60 m. from Montreal; with a Protestant and a R. Catholic church, three schools; manufactures of pot and pearl ash, iron, and cloth, and steam flour and saw mills. Pop. 750.

VANNES [sens. *Durworgum Vannorum*] a seaport in France, cap. dep. Morbihan, on the Yanne, a stream 85 m. in length, where it falls into a narrow inlet of the Gulf of

Sen. that by the aid of the natives, 60 men were obtained at an average cost of 4s. per ton the natives, however, are only 10 inches to 18 inches thick. Fog, remarkable both for density and duration are of frequent occurrence. The winter is very stormy, and heavy rains fall, particularly in November and December. Frost occurs on the lowlands in January, but seldom continues long and can scarcely be said to interrupt agricultural operations. Vegetation begins to advance in February makes rapid progress in March, and continues to be fostered by alternating warm showers and sunshine in April and May. The summer-house of June and July are excessive, and by the end of August, or beginning of September, the long grass has become so thoroughly parched as to be easily ignited. The agricultural capabilities of the island are unquestionably great, and the farming operations carried on chiefly at Victoria, near the harbour of that name, are said to have succeeded beyond the most sanguine expectations. The principal products, in addition to those of the soil are furs, obtained chiefly from the beaver, marten, least-otter, and sea-otter and fish of the most valuable species found on all parts of the coast. VANNES [sens. *Durworgum Vannorum*] a seaport in France, cap. dep. Morbihan, on the Yanne, a stream 85 m. in length, where it falls into a narrow inlet of the Gulf of

Morbihan, 63 m. N.W. Nantes. It is walled, and has narrow gloomy streets, overhung by antiquated-looking houses, a cathedral, with a lofty but by no means elegant spire; a large

THE PRISON-GATE, VARESE.—From Savoy, Le Bourgeois.

lower called Tour-du-Comte prefecture, episcopal palace, barracks, college, and three hospitals, a court of first resort and commerce, an agricultural society, a school of hydrography, a diocesan seminary, communal college, and public library of 8000 volumes. The Tour-de-la-Gare, an elevated space with well-planted alleys in the form of an amphitheatre affords an excellent promenade. The manufactures consist of coarse woollens, linen and cotton goods, lace and silk, extracted from salt-marshes in the neighbourhood. There are also foundries, tanneries, breweries, and building-yards. The harbour is lined with good quays but only admits vessels of small tonnage. The trade is in corn, hemp, honey, wax, butter, salt, tallow, cider and wine. Pop. (1852) 10,825.

VANS (Lan), a tn. France, dep. Ardèche 15 m. E.W. Languedoc. It has manufactures of silk stuffs, silk-mills and a trade in wine, corn, cattle, and silk. Pop. 2610.

VANTHAYVA a vil. Hungary. Thither Themas, co. Marmaros, 8 m. from Seghed with a Greek united church. Pop. 1068.

VANTSD a vil. Hungary. Thither Themas, co. Bihar; with a Protestant parish church, a synagogue, several mills, and a trade in corn, maize and cattle. Pop. 1099.

VANUA VALAVA, or SAN CHARLES MIDDLETON'S ISLAND an isl., R. Pacific belonging to the Feroe group. lat. (N.W. point) 17° 10' S. lon. 179° 2' 50' W. It forms an irregular belt of a serpentine shape, 14 m. long, but nowhere more than 3 m. wide, and has on its W. side a spacious harbour, with a village at its head, and a large stream of water. One of its peaks, called Mount Tootia, is estimated at 664 ft. high. Pop. about 1000.

VANVES, or VANTRE, a vil. France, dep. Seine 4 m. from Paris on the railway to Versailles with an old chateau built by Mansard for the Duc de Bourbon. Pop. 1364.

VANZAGHETTO a vil. and com. Italy. Lombardy, prov. about 22 m. N.W. Milan; with a parish and an auxiliary church and a trade in corn and silk. Pop. 1064.

VANZAGHETTO or VIANZAGHETTO a vil. and com. Italy, Lombardy, prov. about 16 m. N.W. Milan, 1 bank Olona with a parish church, and a trade in wine and silk. Pop. 1259.

VADIG (a vil. and com. Italy. Lombardy, prov. about 19 m. N. Milan, 6 bank Adige, here crossed by a wooden bridge. It has a magnificent modern church, the remains of an old castle, a charitable endowment, manufactures of silk and a

paper-mill. In 1824 the Guel's were defeated here in a bloody battle by the Ghibellines and the town was burned down. Pop. 2575.

VAN [Italian *Vare* Latin *Vares*] a river Europe, rises in the Alps, in the S.E. of France, dep. Alpes Maritimes, 40 m. N.W. Nice flows circuitously S.E. E., and forms the E. boundary of the dep. to which it gives its name, and after a course of about 75 m., falls into the Mediterranean about 8 m. S.W. Nice. It receives on the right the Colon and Esturon and on the left the Inn and Vesoulle.

VAR a maritime dep. France forming to S.E. extremity and bounded, N. by dep. Hautes-Alpes, N.E. Alpes Maritimes, E. and S. the Mediterranean, and W. dep. Bouches-du-Rhône. It is nearly in the shape of a right-angled triangle, of which the sea coast forms the hypotenuse; greatest length, N.E. to S.W. 82 m., breadth, 40 m.; area, 2778 sq. m. The coast is generally bold and is penetrated by numerous deep indentations, the principal of which are the bays of Juan, Napoule, Frejus, Grimaud, Hères and Toulon. On the S. it is encircled by the islands forming the group of Hères and on the E. are the small islands of Lérins and Hyères. The interior is generally mountainous, being traversed, particularly in the N. and N.E. by ramifications of the Alps. Var is remarkably well watered and belongs to the basin of the Mediterranean towards which it has a gradual slope. The Var forms part of its boundary on the E. and the Varon on the N. The chief river of the interior is the Argens, with its numerous tributaries. Along the coast are several extensive lagoons, the largest of which are those of Napoule, Villapuy and Paqueret. The temperature is variable, the winter is very mild except during the N.W. wind which is extremely keen while the S.E. wind which is frequent in summer, has an enervating effect both on man and beast. On the coast, where lagoons and marshes prevail the air is unhealthy. The soil possesses little natural fertility and though much indebted to irrigation and careful culture, does not produce more than two-thirds of the grain required for the home consumption. About one-fourth of the whole surface is absolutely waste, and not cultivable. About one-third is in wood, and rather more than one-eighth is devoted to the culture of the vine the produce of which is both abundant and of good quality. The olive also is extensively cultivated and the mulberry, for rearing silk worms, is seen in all the lower districts, either in separate plantations or hedgerows. Many of the finer fruits grow almost spontaneously and the air is perfumed with odoriferous plants and flowers. The principal domestic animals are sheep, goats, and swine. There are few horses, but mules are numerous. Game abounds. Mammals exist in great variety, but seldom in an extent and of a quality fit for being worked to profit. The working both of lead and iron, once carried on, has been abandoned. The manufactures consist of coarse woollens, perfumes, essences, liquors, olive-oil, soap, cork and leather. There are also paper and silk mills, and numerous distilleries, and the fishing both of turbot and anchovies is actively carried on. The trade is in olive-oil, liquors, wine, fruit, fish, corn, and wool. For administrative purposes Var is divided into four arrondissements—Draguignan (the capital) Brignoles, Grasse, Toulon subdivided into 25 cantons, and 302 communes. Pop. (1852) 337,987.

VARALLO a tn. Italy. Piedmont, div. and 30 m. N.W. Novara, at the confluence of the Mastellone with the Sesia, both here crossed by bridges. It has narrow winding streets, a superior court of justice, and several public offices, five churches, a college, a seminary two convents, public prisons, a theatre, an hospital, and several charitable endowments; and manufactures of articles in iron and copper. Pop. 2807.

VARALLA a vil. Hungary. Thither Debrecen, co. and 16 m. from Tolsa; with a church, a ruined castle several flour-mills, and a trade in corn, wine, and timber. P. 1131.

VARALIYA (Boco-Kao) a market tn. Hungary, co. Abony, near 1 bank Hernad 22 m. S. Kaszab with two castles one of them an ancient ruin, and the other a handsome modern structure, and a trade in wine. Pop. 1387.

VARGEN-PRONO, an inlet of the sea, Norway, in the N. of Flakke, penetrating inland about 60 m. with a mean breadth of about 15 m. It receives several streams, particularly from the S., and among others the Elghel, by which Lake Sægd discharges itself. On its N. shores are the small towns of Renseth and Vadsø.

VARANNO, or **VARANNOV**, a market tn. Hungary, Hither Thess., co. Zemplin, about 13 m. from Nagy Mihály with a parish church, a synagogue, the ruins of an ancient castle, and a trade in corn. Pop. 1494.

VARANO [see GARD], a lake Naples at the N foot of Mount Garzano, prov. Capriata, separated on the N from the Adriatic, into which it discharges its waters by a long and narrow belt of land. It is of a rectangular shape, 50 m. in circuit, and abounds with fish.

VARANO-SAN-MARINO, a vil and com. duchy and 16 m. S.W. Parma, 1 bank Como; with a church, an old castle, and a trade in cattle and swine. Pop. 1976.

VARAZZIN, a seaport in Italy Piedmont prov. and 6 m. N.N.E. Genova, on the Gulf of Genova, near the mouth of the Taro, between two small promontories, each of which is crowned by a tower. Its central part, divided into Borgo and Borghetto was at one time surrounded by walls, of which the gates still remain and two suburbs extend considerably on either side along the highway. It is irregularly built, consists generally of narrow and ill-paved streets, and has three churches, a courthouse with a colonial statue in marble of St. Giacomo, an elementary school, and an hospital. The harbour is small but at the buildings yards from 40 to 50 merchant vessels are usually built. Pop. 7779.

VARBERG, a seaport in Sweden, 110 m. and 86 m. N.W. Halmstad on the Kattegat. It was one of considerable strength, being defended by a fortress which figures in the early Swedish wars, but is now used as a prison and house of correction. It is regularly built, has a beautiful church and is much resorted to for sea-bathing. Pop. 1691.

VARDAK, a river, Turkey in Europe, rises in the E. slope of Teher-dagh on the frontiers of Albania and Macedonia flows first E.S.E. to Ushkup, then E.S.E. past Kopyli and after a course of about 160 m. falls into the S. shore of the Gulf of Salonica. Its chief affluents are the Tzerna and Batrzna, on the right, and the Porpents Ushkup and Egnedra, on the left.

VAREDO, or **VARE**, a vil and com. Italy Lombardy prov. and about 8 m. N. Milan 1 bank Sesia, with a church, and a trade in corn wine and silk. Pop. 1648.

VAREL, a vil Oldenburg circle Neuenburg, near the mouth of the Jeldes, with a church and castle, and a trade in horses and cattle. Pop. 8164.

VARELA (Pinto)—1, An inlet 18 m. off S.W. coast, Sumatra, lat. 8° 47' N. lon. 98° 38' E.—2, An inlet E. coast, Sumatra, lat. 0° 50' N. lon. 104° 28' E.; having a hill on its W. part, which may be seen from 21 m. to 24 m.—3, An inlet in the Strait of Malacca, about lat. 3° 45' N. lon. 99° 50' E.—4, An inlet 11 m. off E. coast, Malay Peninsula, lat. 3° 19' N. lon. 103° 40' E. It is a barren rock, crowned with a few bushes.—5, (or *Averelle*), A cape, S. E. coast, Annam; lat. 12° 50' N. lon. 106° 24' 30' E.; formed of steep cliffs extending nearly N. and S. 2 m. or 2½ m. having in the middle of them a small sandy bay where a stream of excellent water descends from the mountain into the sea.—6, (Pulo), A cape, S. E. coast, Annam, about 85 m. due S. from the true cape, lat. 11° 44' N. lon. 109° 22' E. formed of a very high oblong mountain of great magnitude.

VARENNE, a seat in Lower Canada on the St. Lawrence, 10 m. below Montreal; with an excellent medical springs, a large B. Catholic church, three schools, three grist-mills, and two saw-mills. Pop. about 1500.

VARENNE-SAN-ALLIER, a tn. France, dep. Allier, on the Vallançon, 30 m. S.S.E. Moulins. Near it is an old abbey, now converted into an hospital. Pop. 1468.

VARESE, a tn. Italy Lombardy prov. and 13 m. W. Como and a little S. of the lake of same name in a valley the sides of which are studded with fine villas. It has an extensive silk-mill, employed in spinning the silk which is produced in the vicinity. Near it, on a lofty mountain, is a church, to which numerous pilgrimages are made. Pop. 8000.—The lake, about 4 m. E. of Lake Maggiore, into which it discharges itself is about 8 m. long by 8 m. broad, and rather more than 80 ft. deep.

VARGUT A (Gross and Klein) two nearly contiguous vil. Prussia Saxony circle Langensalza; with a Protestant church and a castle. Pop. 1120.

VAREHLY, a vil Hungary, co. Hungary 8 m. W.S.W. Hiteg, in a narrow gorge, and supposed to occupy the site

of the Roman Ulpia Trajana. Many remains of buildings cover the adjacent hills, and in the village itself are the ruins of an arena, an aqueduct, a temple, and baths.

VARI, or **VARSOVA**, a market tn. Hungary, Hither Thess., co. Bergh, near the confluence of the Berova with the Rhasa, 8 m. from Teme-Ulak, with a Protestant church, and a trade in tobacco. Pop. 3748.

VARIANANA, a tn. Papal States, lat. and 12 m. S.E. Bologna. Pop. 3090.

VARINA, or **VARMA**, a market tn. Hungary, co. Transilvania, 1 bank Vagh with a church. Many of the inhabitants are employed in making lace. Pop. 1600.

VARINAS, a tn. Venezuela, cap. prov. of its name, 1 bank St. Domingo, 80 m. S.E. Merida. It is a vast place, at the opening of a valley and has a church and an hospital. The river becomes navigable at Turaco about 14 m. below the town, so that Turaco may be considered the port of Varinas. Pop. estimated at 12 000.—The province, bounded N. by prov. Carabobo, E. Caracas, W. Truxillo and Merida, and S. Abaguana, is intersected by numerous large and navigable rivers, which occasionally inundate and fertilize its plains; of these the Apure, Guainapur, and Guinarito are the most important. But its most remarkable features are its extensive plains covered with a luxuriant herbage, feeding innumerable herds of cattle, flocks of sheep, and droves of mules and asses. The chief products of the country are tobacco, sugar, coffee, cotton, indigo, and tropical fruits.

VARKENY, a vil. Hungary Hither Thess. co. Borsod 40 m. from Erian, with a B. Catholic church, a trade in wine and wood and several flour-mills. Pop. 1099.

VARKONY (Torma), a vil. Hungary co. Heves, on the Theiss, 8 m. from Szolnok; with two churches, the ruins of an old castle, and a trade in corn. Pop. 1806.

VARI, a vil. Prussia, prov. Westphalia gov. Minden, near Lübbecke with manufactures of woollen shawls. Pop. 1848.

VARNIA, a fortified tn. and seaport, Turkey in Europe, Bulgaria, majsh Sulista, 160 m. N.W. Constantinople, S.W. shore of the Black Sea. It occupies a gentle height on the N.W. side of a semicircular bay formed by two rocky promontories, is surrounded by a stone-wall, 10 ft. high, painted white, and loop-holed, and defended by several batteries and other outworks and in very irregularly built of wooden houses of different colours, with red tiled roofs. The whole place has an appearance of decay, and the only public buildings of any note are a few mosques with tall minarets. There is no proper harbour but the bay though open to the E. and S.E. is sheltered on the N. and N.E. from which the most dangerous winds of the Black Sea blow, and affords good anchorage. Immediately W. of the town is the Lake Darna formed by the Pravadi and other streams from the neighbouring hills. It has been proposed to make a navigable cut connecting this lake with the bay. Were this effected, Varna would have one of the best harbours in the Black Sea and might soon rival Odessa as a seaport. Even at present it has a considerable trade. In 1847 its exports, chiefly of grain, poultry and sugar, amounted to 2600 000. The most interesting events in its history, are the great victory gained in its vicinity by the Turks over the Hungarians, in 1444, its capture by the Russians, in 1828; a great and supposed secondary fire, August 10, 1856, which destroyed about a fourth of the houses, and vast quantities of military stores prepared for the expedition against the Crimea and the sailing of that expedition from its bay, September 7th thereafter. Pop. about 14 000.

VARSAND, several places, Hungary—1, (Pankov) A vil. Hither Thess., co. Arad, 8 m. from Bimast; with two churches, and a trade in corn and hemp. Pop. 4068.—2, (Opole), A vil. Hither Thess., co. Arad, on the White Kistice, 16 m. from Szatmar, with two churches. Pop. 1563.

VARSI (Lain, Varus), a vil. and com. duchy and 29 m. S.W. Parma, 1 bank Canio. It has a church, an old castle and a trade in corn, wine, cattle, and chestnuts. Pop. 8402.

VARZI, a tn. Italy Piedmont, prov. and 11 m. N.W. Robbio, 1 bank Stortof, with a square four principal streets, a church three arcades and an old castle. Pop. 2043.

VARHAT, a vil and com. Italy Piedmont, dep. Varana prov. Pelliccia, in the wild and romantic valleys of the Val d'Oro or Divorato. It has a church numerous oratories, and four elementary schools. Pop. 2848.

VAREY, a tn. France, dep. Nièvre, 80 m. N N E. Nevers; with a church, a college, hospital, and tobacconies; manufactures of linen leather and silkworms. Near it are blast-furnaces and other iron-works. Pop. 2056.

VAN-KOS or **KOM VAA**, a vil. Hungary, on Riber, on the Black Körös, not far from Gröszwarden; with important iron works, supplied from mines in the vicinity.

VASA, or **Vass**, a medieval town, Russia, Finland, on a small bay in the Gulf of Bothnia, 335 m. N W. St. Petersburg. It has a semi-church, infirmary, and high school manufactures of leather and pitch, and a trade in these articles, fish, and timber. The harbour is much silted up. Pop. 2700.

VASA BARRO, or **VAZBARRO**, a river, Brazil, rises in the Serra Itatiaia, prov. Bahia flows E., enters prov. Sergipe, where it unites with the river of that name. The united stream, which often receives the name of Sergipe, continues its course 8 m. further and falls into the Atlantic.

VASARELY numerous places, Hungary among which are:—**(Hátszent)**, a market tn., on Congrad, on Lake Hód, 12 m. from Sopron; with four churches, and a trade in corn, wine, and tobacco. Pop. (1846) 23,900.—**(Szent-lye)** a market tn., on Vasprém with a church a trade in corn, tobacco, and excellent wine. Pop. 1395.

VANABUTH a market tn. Hungary co. Presburg in the Schütt on an arm of the Danube, 15 m. from Somersin with a church and a trade in corn and cattle. Pop. 1047.

VASHKA a river, Russia, which rises in gov. Volodga, lat. 62° 20' N flows N N W into gov. Archangel, and after a course of above 500 m. joins L. bank Mezon.

VAMUAN a river, Austria, Russia, rises in the E. of gov. Tobolsk flows E. N. E., and joins L. bank Ob about 80 m. below Yerm. after a course of about 170 m.

VASKUT a vil. Hungary Hither Danube, co. Bacs, 4 m. from Bacs, with a church, and a trade in corn, wine, sheep, and cattle. Pop. 2386.

VASONY two places, Hungary.—**(Nagy-)**, a market to Hither Danube, co. and near Vasprém with two churches, a handsome modern and a very ancient castle, tile-works a trade in corn, cattle and oak-timber, a brewery saw and flour-mills. Pop. (1847) 22 (1848) 4 vil. co. and 8 m. from Vasprém with two churches and a marble-quarry. F. 1497.

VASOULAB, or **Vasoul**, prov. Hic-de-Jaunie, with a parish church, a primary school, an ornamental fountain, and a considerable trade in coffee, externally grown in the district swine, hams and sausages. Pop. (dist.) 4000.

VASSY [anc. *Vasson*] a tn. France, dep. Haute-Marne, r. bank Blaise. It is generally well built, and has clean streets adorned with fountains, and a fine promenade and has a court of first resort, a communal college manufactures of druggist, calico, leather, refined wax, earthen and iron ware, and a trade in iron, wood, charcoal &c. It acquired a melancholy celebrity by the atrocious massacre of the Protestants by the Duke of Guise in 1563. Pop. 2456.

VASTO, or **VASTO D'AMONIA** [it. *anc. Histomium*] a tn. Naples, dep. Abruzzo-Citra, on a hill near the Adriatic, 25 m. S.E. Chieti. It is walled, and entered by four gates consists of tolerably well built streets, and a spacious square adorned with a beautiful fountain, and has two collegiate churches a handsome palace seven monasteries, a nursery two hospitals, two almshouses, and manufactures of earthen vases, and of a liquid said to be very efficacious in healing wounds. The factory on the coast, including that of sturgeon, is valuable, and the surrounding district is covered with productive vineyards and olive yards. Pop. 10,000.

VASTO-GERANDA, a tn. Naples, prov. Salerno, 15 m. N W E. Marina. Pop. 1184.

VASZAR, a vil. Hungary co. Vasprém, 4 m. from Paps, with a R. Catholic church, and a trade in corn, wine, tobacco, and cattle. Pop. 1612.

VATALA a tn. Prus. See **BATTALAN**.

VATAN [anc. *Vastum*], a tn. France, dep. Indre, 19 m. N N E. Chateauroux. Owing to its low situation the houses are extremely damp. It has a church, and an old building called Ferme, attributed to the Knights Templar; and a considerable trade in wool. Pop. 3046.

VATERKI one of the Ferganah. See **AKHATKI**.

VATERSA or **WATERWAY** a m. Scotland, near the S. extremity of the Hebrides, immediately S. of Barra, from which it is separated by the Sound of Water, about 1 m.

wide; length, 6 m.; breadth, 1 m. On its E. side is good anchorage for large vessels.

VATHI, or **BATHI**, a tn. Ionian Islands, Isl. Ithaca, S. side of the beautiful Gulf of Molo. With a leading wharf the port or harbour is of easy access. Inside, it forms a kind of basin, capable of containing a great number of ships, and is perfectly landlocked. The town consists of a single street, well paved and clean, extending 1 m. along the shore, and though not so well built, has a picturesque appearance. The houses are principally of stone, but rarely put together, and penetrable to every blast. Pop. 8000.

VATU LELU, one of the Fepesias Is., S. of Vit-Levu; lat. (N point) 16° 21' S; lon. 177° 25' W. Though presenting the appearance of a coral-land, it is of volcanic formation has an elevation of about 70 ft. in the N., and gradually descends to a low point in the S., is well covered with wood, and inhabited. It is surrounded by dangerous reefs.

VAUGLUSE, a dep. France, bounded N. by dep. Drôme E. dep. Hautes-Alpes S. the Durance, separating it from dep. Bouches-du-Rhône and W. the Rhone, separating it from dep. Gard greatest length, N N W to S. E. 60 m.; breadth, 37 m. area, 1228 sq. m. The surface has a general inclination to the S. and W. In the latter direction there are considerable plains, but the N. E. and S. E. are rugged and mountainous, being traversed by ramifications of the Alps. The culminating point, Mont Vastoux in the N. E., is 6570 ft. above the sea. The department belongs wholly to the basin of the Rhone which drains great part of it directly and the remainder by the Durance and its tributaries. More than one half of the whole surface is arable, and nearly one-fifth is in wood, about one-fifth is waste, and vineyards occupy one-twelfth. The cereals produced fall short of the home consumption. Some of the wines bear a good name, and are extensively exported to Switzerland and Germany. All the ordinary fruits, including pears, apricots, peaches, plums, almonds, and figs are in great abundance, and a good deal of ground is occupied by the mulberry and olive. Madder also is cultivated on a large scale, and considerable attention is paid to the rearing of aromatic and medicinal plants. Of domestic animals the sheep are by far the best and most numerous. The minerals are of comparatively little importance. The manufactures consist chiefly of silk stuffs, velvet, woollen cloths, soap, oil, lavender and other essences, wax-candles, mineral acids, and mineral products. Silk mills also, driven partly by the hand, in the cottages of the peasantry and partly in large factories by water or steam power, are very numerous. Many mills are likewise employed in grinding madder. The principal articles of trade are grain, flour, clover and lucerne seed, madder, silk, wine, brandy, acetone, fruit essences, wax, honey, and wool. For administrative purposes Vaucluse is divided into four arrondissements—**A vignon** (the capital), Apt, Carpentras, Orange, subdivided into 25 cantons, and 149 communes. Pop. (1855), 264,618.

VAUGLUSE [anc. *Vallis Clusina*; Italian, *Valschena*] a vil. France, dep. Vaucluse, 15 m. E. Avignon, at the foot of a mountain of its name, r. bank Rhone. A little to the S. E. is the fountain of Vaucluse, rich in natural beauties, and rendered celebrated by the residence and verses of Petrarch. A ravine which penetrates deep into the side of the mountain, and is hemmed in by walls of rock, with bristling peaks from 500 ft. to 600 ft. high, while down its centre the Sorgue pursues its rapid course, contrasts to a yawning cavern which contains the fountain. According to the abundant or limited supply of water within it, it is either a gushing cascade, tumbling over moss-clad stones, or a dark blue pool sunk within its bed.

VAUCOULEURS [anc. *Vallis Clusina*], a tn. France, dep. Meuse, l. bank Meuse, 26 m. S. S. E. Bar-le-Duc, in the form of an amphitheatre with manufactures of cotton goods, hosiery, and leather. Pop. 2375.

VAUD (German, *Waadt*, or *Wandmal*), a cant. Switzerland, bounded N. by cant. and Lake Neuchâtel, W. France, S. cant. and Lake of Geneva, and E. Fribourg, greatest length, N to S, 29 m.; breadth, 25 m. area, 1185 sq. m. The mountains of this canton belong to three distinct chains—the Alps, in which are the culminating points of the canton, in the S. E.—the Jura, in the W. and the Jura, stretching to the N. of the Lake of Geneva, and forming a connecting link between the other two. The valleys are so

summarized that the name of the capital, *Woodi*, a corruption of the old name *de valley*, is supposed to be derived from them. Several of these valleys lie longitudinally between the streams of the Jura, but the longest of all is that of the Gruye. Yverdun belongs partly to the basin of the Rhodan, and partly to that of the Rhone, the Jura forming the watershed which separates them. The N portion belongs to the former, and is drained chiefly by the tributaries of the Lake of Neuchâtel, the S portion belongs to the latter and is drained directly or indirectly by the Lake of Geneva. In addition to these two great lakes, which Yverdun only shares in common with other cantons, it possesses as its own the Joux, Brenet, and Ter in the Jura the first in the Joux and the Jaman, Roud, Nervaz, Brethay, &c. in the Alps. The climate varies much in different localities, but is on the whole both temperate and salubrious. The warmest and best-cultivated districts are on the E. shore of the Lake of Geneva. In some districts where crops prevail, houses are frequent. Iron is the only mineral worked and that only to a limited extent. The soil is general is not of remarkable fertility. The corn grown falls far short of the consumption, and hemp and flax are barely equal to it. One of the most important branches of rural economy is the culture of the vine. Along the banks of the Lake of Geneva it is extensively carried on and much wine of a fine quality is made. Among the most important products of the canton are the various species of nuts—filberts, walnuts, and chestnuts. The best often form extensive plantations. Among the mountains the prevailing trees are pines. The principal hard-woods are ash, elm and alder oak is seldom seen. Neither trade nor manufactures are of much consequence. The inhabitants are almost all Protestants, and education is very generally diffused. For administrative purposes Yverdun is divided into 19 districts, subdivided into 60 circles. The government is of a mixed form in which it is difficult to see whether the aristocratic or the democratic principle predominates. A grand council of 184 members, elected for five years meets annually in Lausanne, hence regarded as the capital, and forms the legislature. The electors require a pecuniary qualification. The grand council appoints the executive, which consists of nine members. The contingent of men furnished to the Swiss Confederation is 2964. Pop. (1850) 199,458.

VAUGIRARD, a vil France, dep Seine, and so near Paris as to be only one of its suburbs. It contains a botanical garden in a great holiday resort of the Parisians, and has manufactures of carriages and stained paper wax-cloth earthenware, and chemical products. Pop. 13,978.

VAUNKE, a river Central America. See CAPE RIVER.

VAUVERT, a in France, dep Gard, 12 m. S.S.W. Nîmes, with a Protestant church and manufactures of silk hosiery oil and brandy. Pop. 3681.

VAUX some-ORFÈVREMOY, a vil and com Belgium, prov and 4 m. S.E. Liège on the Vesdre. A great many of the inhabitants are soldiers. Pop. 2865.

VAN AU or **VAVAN**, a group of the Fæøe islands. S. Pacific Ocean, lat. 18° 59' N. lon. 174° 8' W. [n]. They are all formed of a hard white rock, and are, it is supposed, of coral origin they are thickly covered with trees. Vavau, the principal island, is highest towards the N., sloping gradually to the S.

VAVITOU one of the Society Islands, Pacific Ocean lat. 25° 48' S. lon. 147° 50' W., discovered, 1791.

VAXHOLM, a in Sweden. See WÄXHOLM.

VÄSTERBÄCK or **VÄSTERBÄCK**, a m. Finland, 60 m. N. by V. Lohja, about 5 m. from 1 bank Olund. lat. 59° 30' N. lon. 24° 0' E. It is one of the handsomest towns in India, having been rebuilt in the European style, with wide streets, and a handsome and commodious harbor.

VECHELDE, a vil Brunswick, on the Aue and the railway to Hanover, 7 m. Brunswick, with a church, and a castle, now used as a courthouse.

VECHINGAN, or **VECHINGAN**, a vil and par Bertheland, can. Bern, 7 bank Worles; with a church, several schools, and manufactures of linen. Pop. 2597.

VECHT—1, A river, which rises in the Friesland prov of Wapshaga, gov. Mission down N.W. into Hanover and across the N.W. corner of that kingdom into Holland, then circumscribes W. & S. past Hardenburg and Exelle, and turning

N. N.E., falls into the E. of the Zuiderzee, after a course of nearly 100 m.—2, A river Holland, a bifurcation of the Old Rhine, which leaves it near Utrecht; flows N.W., and falls into the Zuiderzee at Muiden.

VECHTA, a in Oldenburg on the Vocho 37 m. S. Oldenburg. It is walled has a Protestant and a Catholic church (gymnasium, and workshops), and manufactures of linen, and a brewery. Pop. 1978.

VECKENSTADT a vil Prussia, prov Saxony, gov Magdeburg 5.8.5. Osterode, on the Elbe. It has oil, bark, paper and other mills. Pop. 1052.

VECKENHAGEN a market in Nassau-Cassel, Niederhessen, 1 bank Weser 15 m. N. N.E. Cassel; with a church and an old castle, now used as chemical works. Pop. 1868.

VEDANO, two places, Italy Lombardy—1, A vil and com. prov and 12 m. N. Milan with a church several churches, and a trade in corn wine and silk. Pop. 1102—2, (on Veduggio-d'Olona) A vil. and com. on a hill above the Olona with a church, and a trade in wine and silk. P. 1547.

VEDEIN a vil and com Belgium prov and N. Namur on a stream of same name. It has extensive mines of iron and lead particularly the latter which are very rich. Pop. 1855.

VEEN a vil Holland, prov N. Brabant, 10 m. N.W. Hartogenbosch, prettily situated on the Maas; with a church, and a trade in grain. Pop. (agricultural) 871.

VEENENDAAL a vil Holland, prov and 15 m. S.E. Groningen; with three churches and a synagogue, several schools, an orphan hospital and a workhouse; numerous boat-building yards, and rope, block, and sail making, and many smithies, two tanneries, and saw, malt, and other mills. Pop. 5376.

VEENENDAAL, a market in Holland, prov and 19 m. S.E. E. Utrecht, with two churches and a school a considerable lace market, much tart-wool, wool combing, and manufactures of calicoes. Pop. 9830.

VEEP (Sw.), par Eng Cornwall 8146 sq. ft. Pop. 647.

VEERE, a vil, and com, Zealand in Walcheren 8 m. N.W. Flushing on the Veerehogt a sea-arm which separates Walcheren from the V. Island. It is fortified, entered by four gates, has a harbour an elegant townhouse, two churches some schools a roomy market place, and some calico and other weaving it once had some shipping trade, building-yards, rope-works, &c. but these have all left, and the town has fallen off to a third of what it at one time was. Pop. 849.

VEEREN a river issues from a lake among the mountains on the N.W. frontier of Sweden, enters Norway flows N.W. through Nordland and after a course of nearly 90 m., falls into the firth of same name in the Atlantic.

VEGA numerous places, Spain particularly—1, A vil prov Leon 3 m. from Ponferrada with a church, primary school and a trade in corn, wine, and fruit. Pop. 1090—2, (de Venedo) A vil. Asturias, prov and 80 m. W. Oviedo, at the confluence of the Saboron and Eo. It has a custom house, warehouse, and two primary schools. The Eo is navigable for small vessels, which have good and safe anchorages in the harbor. Pop. 1947—3, (de Santa-Brigida) A vil Canaries, Isl Gran Canaria in the centre of the island it has a prison, a primary school, and parish church, many factories of ordinary linen, and several flour-mills. Pop. (agricultural including several hamlets), 3832—4, (del Val-arra) A vil prov and about 70 m. from Leon, with a church, a primary school, a flour-mill and a trade in cattle. Pop. 1080.

VEGA (La), a to Hayti. See CORONADO DE LA YMA-RAL.

VEGACERRERA, a vil Spain, prov Leon, 8 bank Toros with a church, a primary school, and manufactures of linen and serge. Pop. 1468.

VEGAS-DE-CORDADO, a m Spain, prov and 12 m. from Leon, on the Orza with a church, courthouse, school, manufactures of linen several flour-mills, and a trade in flax. P. 1071.

VEGEN, an isl. Norway prov Tromsø, bail. Nordland, 15 m. off the coast, lat. 65° 44' N. lon. 25° E., about 80 m. in circumference.

VEGESACK, a market belonging to the free-town of Bremen, on the Weser 22 m. N.W. Bremen, with a church, a harbor, some shipping, and an active trade. Pop. 3060.

VEGLIA, an island, Austria, Italy, in the Gulf of Quarnero, separated from the island of Cherso on the W. by the channel of Plaunch, and from the mainland on the E. by that of

Velje, greatest length, N N W to S. S. E., 34 m.; greatest breadth, 15 m.; area, 75 sq. m. The coast is bold, and the interior generally mountainous. In the N the soil is thin and almost barren, but elsewhere produces much wine, silk, and excellent fruit; is well wooded, and has good pastures, on which great numbers of horses, sheep, and goats are reared. The fisheries on the coast are very productive. The most valuable mineral is an excellent marble. There are numerous villages on the island, but the only town bears the same name and is on the S. W. coast, at the foot of two mountains, and has a cathedral, an episcopal palace, a castle, two monasteries, a high school, and a harbour at which some trade is carried on. Pop. (n.), 1000 (all), 12,200.

VELJE, a town, Naples, prov. Salerno, 11 m. S. S. E. of Brindisi, with a church, convent, and two schools. P. 1550.

VELJE, a town, France, a vil. and com. France, dep. Haute-Loire, prov. Clermont, near the Herminette. It consists of two distinct portions, and has a trade in cattle. Pop. 1125.

VELJE, a town, Denmark. See VELJE.

VELJE (St.), a vil. (and-Trade) A vil. ecclesiastical of Austria, on the stream and in the valley of the Trüding, S. W. Baden, with manufactures of metal wares and machinery, a copper-works, and a trade in fruit, timber, lime, and pitch. Pop. 312. (St.), a vil. (and-Trade) A vil. W. of Vienna, of which it may be considered a suburb. It has a beautiful church, with a remarkable crypt; a palace of the Archbishop of Vienna, and manufactures of chocolate. Inhabitants much employed in supplying the capital with milk and vegetables. P. 1220.

VELJE (St.), a town, Austria, Myria, circle Klagenfurt, on the Glan, 48 m. S. W. Laybach; with a church, and manufactures of white-lead and paper. Pop. 1253.

VELJEHÖCH, a vil. Bavaria, Lower Franconia, 7 m. S. W. of Würzburg, with a church, a castle, and a trade in wine and fruit. Pop. 1845.

VELJEHÖCH, a vil. and com. Spain, Andalusia, prov. and 37 m. S. E. Cadix, and 4 m. from the Atlantic. The houses are mostly old-fashioned and the streets narrow. There are three squares, a new townhouse and prisons, various schools, public and private, a parish church, and in the suburbs, several hermitages. A handsome bridge here spans the Barbate. Agriculture is the general occupation, while some are employed as masons, in flour and oil mills, and in weaving coarse woollen fabrics. Pop. 9144.

VELJE (St.), a port in V. G. in the Gulf of Carab. lat. 11° 25' N. lon. 69° 40' W. with an active foreign trade.

VELJE, a vil. and com. Belgium, prov. and 1 m. S. E. of the Sambre; with manufactures of linen and a trade in fax. Pop. 1527.

VELJE, a vil. and com. Belgium, prov. Hainaut, 6 m. S. E. of Tournai, with two breweries, a distillery, and a trade in cattle, grain, and hides. Pop. 2528.

VELJE, a vil. and com. Italy, Lombardy prov. and 16 m. N. E. Milan with a church, and a trade in wine and silk. Pop. 1086.

VELJE, two rivers, Hindoostan, Madras presid. — 1, Rises in lat. 10° 25' N. lon. 78° 21' E. flows E. through Madras and Tanjore, and falls into the Bay of Bengal at lat. 10° 6' N. lon. 79° 17' E. — 2, Rises in the E. Ghats, in lat. 10° 25' N. lon. 79° 17' E. flows E. and falls into the Bay of Bengal near Porto Novo, lat. 11° 25' N. lon. 79° 50' E. It only admits small craft. Its waters are used for irrigation.

VELJE (St.), an ancient dist. France, which depended on prov. Vivarais, and now forms part of dep. Haute-Loire. It was the capital.

VELJE, a vil. and com. Belgium, prov. Limburg, 12 m. S. E. of Maastricht. Pop. (agricultural) 1076.

VELJE, a river, France, rises in dep. Marne, flows W. N. W. just below the dep. Aube, and joins the bank of the Aube a little below the source of the Marne. 70 m.

VELJE, a vil. and com. Spain, Andalusia, prov. and 1 m. S. E. of Cadix, and 4 m. from the Atlantic. The houses are mostly old-fashioned and the streets narrow. There are three squares, a new townhouse and prisons, various schools, public and private, a parish church, and in the suburbs, several hermitages. A handsome bridge here spans the Barbate. Agriculture is the general occupation, while some are employed as masons, in flour and oil mills, and in weaving coarse woollen fabrics. Pop. 9144.

VELJE, a vil. Hungary, Thirder District, co. Stuhlweisburg, near Lake of Anna; with two churches, a factory and a trade in cane, corn, and wine. Pop. 1248.

VELETHE, or **VELAZATE**, a vil. Hungary, Thirder District, co. Ugocsa, on a stream of same name, 8 m. from Nagy-Szeben, with a Greek church. Pop. 1356.

VELEZ, a vil. New Granada, prov. and 60 m. N. Toluca; lat. 10° 10' N. lon. 75° 50' W. 1 m. S. E. of Toluca. It is a strongly situated on ground so soft and sandy, that the streets are at times impassable, none of them being paved. It contains a handsome church and two convents. The waters are bad and unwholesome. Pop. 7545.

VELEZ, a town, Spain, Andalusia, prov. and 57 m. N. E. Almeria, on an isolated eminence. The more ancient part of this town, which was defended by a small but strong castle is nearly ruined. It has a townhouse and prison, two primary schools, a parish church, and two convents. Near it are quarries of gypsum, red and white marble, mines of sulphate of copper lead and iron, and springs holding in solution chlorate and sulphate of soda; but none of them are turned to account. Pop. (agricultural), 7000.

VELEZ, a town, Spain, Andalusia, prov. and 30 m. S. E. Granada, 1 m. S. E. of Guadalupe, at the foot of a hill crowned with an ancient ruinous castle. It has a townhouse, prison, two primary schools, and a church of good architecture. The inhabitants are chiefly occupied as muleteers and bankers, for Velaz supplies with bread Mexico and the Indies, but a considerable number also are employed in the different lead-mines in the neighboring Sierra de Lejar, as well as in manufactures of that metal. Pop. 3043.

VELEZ, a city, Spain, Andalusia, prov. and 15 m. E. Malaga, on the Velez, 14 m. from the Mediterranean, lat. 36° 45' N. lon. 5° 3' W. The houses are in general three stories, and the streets broad, but for the most part steep and irregular, and although indifferently paved, they are kept neat and clean. It has five squares, in one of which stands the cathedral, a spacious and elegant structure. It has also a small and ancient prison, custom house, hospital for the sick, foundling hospital, houses of refuge, two primary endowed schools, with various other private ones, two parish churches, three suppressed convents, the churches of which are open for public worship, two universities, and several hermitages. Manufactures of sugar, wax, soap, cordage, brandy and liquors, leather shoes and 20 oil mills. The chief source of the wealth of Velaz has always been its fruits lemon, oranges, figs almonds, but especially its famous muscat vines. It is also celebrated for its oil, which is considered the best in the kingdom. In 1844-5, the number of vessels that entered its port was 240 tonnage, 5461 the chief articles imported being rice, dried cod, barley, coal and timber. Pop. 12,715.

VELEZ, a town, Spain, Andalusia, prov. and 54 m. N. N. E. Almeria. It is surrounded by earthen walls, has five squares, a handsome modern parish church crowning a central height, a suppressed convent, and ruined summary a large and well-built courthouse, with a massive but unadorned prison, a college, several schools, and a magnificent hospital originally intended for general purposes, but now devoted solely to leprosy. The manufactures consist chiefly of woolen, linen, and hampden cloth, oil, and flour, and the trade is chiefly in the above manufactures and agricultural produce. There is an annual fair which lasts eight days. Pop. 11,800.

VELHA, a lofty and extensive acra in Brazilian Guiana, between the Para and the Amazon.

VELHAS, a river, Brazil, rises in the W. slope of the hills between Para, Minas-Geraes and Goyas, runs W. N. W. in the latter prov., and joins the bank of Paranaíba, 60 m. above its confluence with the Grande, after a course of 140 m., during which it receives in succession the Parana, Itabora, Verde, and Inferno on the left, and the Quilva, Anacost on the right. In the rainy season barges ascend as far as the Parana.

VELHAS (Rio-Do), or **GUAIQUARA**, a river, Brazil, prov. Minas-Geraes, rises in the N. slope of the Serra Paranaíba, flows E. then turns suddenly N., receives the São, Parana, Parana, Curumati, and the Bienda, and joins the bank São Francisco above the village of Barra-da-Velha.

VELICANA, or **NAVYAL**, a market in Hungary, co. Arva, a bank river of that name, 85 m. N. E. of Kézdivásárhely, a townhouse, and school. Manufactures of linen, and a trade in wax and fax. Pop. 1635.

VELJE, a vil. Hungary, prov. and 53 m. N. E. of Veszprém, at the confluence of a stream of same name with the R. Dráva.

It is very irregularly and poorly built of wood; and has one R. Catholic and eight Greek churches, a synagogue, a casino, and a considerable trade in hemp, linseed, and corn. P. 4908.

VELIKALAI, a river Russia, rises in S. of gov. Pskov flows S.E.W. into gov. Vitebsk, then turns suddenly N., crosses gov. Pskov, and falls into the S.E. extremity of Lake Pskov, where a series of about 120 m.

VELIKI LUGA, a tn. Russia, gov. and 123 m. S.E. Pskov, on the Lovat, here crossed by a wooden bridge communicating with a suburb. It is surrounded by an earthen rampart, has seven churches, manufactures of leather and articles in leather, and a considerable trade in these articles and in flax and hemp. Pop. 4000.

VELINO, a river Italy, rises in the W. slope of the Apennines, in the N. of prov. Abruzzo-Ulteriore, Naples flows S.E.W. and W., enters Unbrino, and reaches the sea. It turns N. & W. and discharges over a precipice of about 900 ft. in height, forms the celebrated falls of Turi, and then joins the bank here. Its principal affluents both on the left, are the Salto and Tarnato total course, about 60 m.

VELLANO, a vil. and com. Tuscany comp. Florence, 4 m. N. Pescia, with a church, an old castle, several schools, and a trade in wine oil, and wool. Pop. 2820.

VELLETRI (anc. Velitrae) a tn. Papal States, com. and 21 m. S.E. Rome, at the foot of Mount Artemido. It is surrounded by stituous walls, and is both irregularly and poorly built. It has however one large square, with a statue of Pope Urban VII. and several of its fountains are handsome. The buildings chiefly deserving of notice are the townhall, built from the designs of Bramante, the palace Lanconetti and the palace Borghia, a handsome edifice, but now deprived of its chief attraction—a picture-gallery which has been removed bodily to Naples. Velletri is the see of a bishop, who is a kind of sovereign within his own territory, having a soldiery and treasury of his own and holding a supreme court, where decisions cannot be appealed from by appeal even to the Pope. The foundation of the town by the Volturne, the first inhabitants date from a very early period. It is the original seat of the Octavian family. The Emperor Augustus, its most celebrated member, was born here, and here too several of his successors had magnificent palaces, in which they occasionally resided. Pop. 12,000.

VELLORE, a tn. and extensive fortress, Hindoostan, presid. and 94 m. W. Madras lat. 12° 55' N., lon. 79° 11' E. The town, which lies S. from the fort, is large, populous rather clean and neat, contains a splendid pagoda, and has an exceedingly busy and well supplied bazaar. The fortress is extensive, has ramparts built of large stones and is surrounded by a deep wide ditch cut in the rock, and filled with clear water. It contains barracks, hospitals, magazines, and buildings sometimes occupied by state prisoners. Though the heat of Vellore is very great, the climate is healthy, and debilitated troops from other stations recover strength when sent here. On the fall of Seringapatam, the sons of Tippoo-Bah were sent here, and continued to reside in Vellore from 1799 to 1806, when a mutiny and cruel massacre, perpetrated by the native troops on their officers and Europeans, caused their removal.

VELSEN, a vil. Holland, prov. N. Holland, 5 m. N. Haarlem, prettily situated with two churches and a school Pop. 823.

VELSQUE-BRUCZANOWA, a vil. and com. Belgium, prov. Flandre, 104 m. S. Ghent. It is neat and thriving, and has a church, chapel, three schools, and a convent, manufactures of linen and cotton, and three flour-mills. Pop. 2661.

VELTHERM-BRUCZAN, a vil. and com. Belgium, prov. Brabant, 10 m. N.E. Brussels with a brewery, two flour-mills, and a trade in agricultural produce. Pop. 1802.

VELTHERM a tn. Lower Austria. See FERNSTADT.

VELUWE, a dist. Holland, forming the N.W. part of prov. Gelderland, and comprised between the Zuider-zee, the IJssel, and the Rhine.

VELMEND a vil. Hungary, Thibet. Durbulo, on. Baranya, 1 m. from Bacska. with two churches, and a trade in corn, wine, cattle, and oak- timber. Pop. 1958.

VENENTRY, one of the Shetland Islands, Scotland, in the Bay of St. Magnus, and close to the island of Mainland, from which it is separated by the narrow sound of Rye. It depastures a considerable number of cattle and sheep.

VENADO, a tn. Mexican Confederation, dep. and 46 m. N. San-Luis-Potosi. Pop. 8000.

VENAFRO (anc. Venus-Frugi), a tn. Naples, prov. Larore 51 m. N.N.W. Caserta. It is the see of a bishop; contains a handsome cathedral, six parish churches, three schools, five monasteries, a nunnery and a large hospital. Pop. 2800.

VFNABA, a vil. and com. Italy, Piedmont, div. Turin, prov. and about 8 m. W. N.W. Susa, a pretty place with small square, in which the parish church stands. Pop. 1438.

VERASCA, a tn. Italy, Piedmont div. Aost. prov. and 8 m. S.W. Saluzzo. It is very pretty built, has a court of justice, a parish church, and a marble-quarry. Pop. 2811.

VENCATIGERRY, two tns. Hindoostan, presid. Madras—1. 58 m. W. by N. Arcot—2. 72 m. N. by N. Arcot.

VFNCE (anc. Vincom) a walled tn. France, dep. Var, 6 m. N.W. Nice. It has manufactures of leather oil-mills, and a trade in silver- and fruit. Pop. 3103.

VENDA (Guanay), a vil. on the coast of Brazil, prov. and 8 m. from Rio-de-Janeiro. Belong on the highroad to Minas-Geraes, and having a harbour where barges can land for Rio-de-Janeiro. It commands a good trade.

VENDEE, a river, France, formed by the union of three small streams, the principal of which takes its rise in the forest of Chantenay, in the W. of dep. Deux-Sèvres, enters dep. Vendée; flows S.E.W., passes Fontenay, and joins the Sèvre-Nantaise a little above Marais, after a course of about 45 m., of which 15 m. beginning at Givry-Noyon are navigable.

VENDEE, a maritime dep. France, bounded, N. by dep. Loire-Inférieure and Maine-et-Loire, E. Deux-Sèvres, S. Cherente Inférieure, S.W. and W. the Bay of Biscay greatest length N.W. to S.E., 76 m. breadth 65 m. area 2556 sq. m. The surface is perhaps more diversified than that of any other department, and is divided into four distinct parts—the Bocage, so named from the quantity of wood which covers it, and occupying above one-half the department; the Plaine (trough of land included between the Bocage and the S. limit of the department, dipping gradually down towards the sea, by which, from the quantity of shells and calcareous matters strewed over its surface, it appears to have been at one time covered the Marais, applied to all the S. and W. coasts of the department where marshes prevail, from many of which salt is obtained, and the Ile, four in number—Bouin, Dren, Noirmoutiers, and Piler. The rivers are numerous, and five of them are navigable within the department—the Antenne, Vendée, Lay, Vie, and Sèvre-Nantaise. The Sèvre-Nantaise does not become navigable till it reaches the department Loire-Inférieure. The only navigable canal is that of Lagon. About two-thirds of the land are arable, and one-sixth of it in permanent meadow or pasture. Besides grain which more than suffices for the home consumption, the principal crops are flax and hemp. A considerable quantity of wine is produced, but the quality is almost without exception extremely indifferent. Of domestic animals, the horses only are superior breeds. Goats both large and small abounds, and the fashings in the sea and the rivers are very productive. The minerals include a mine of argentiferous lead, and indications of coal, but there is little iron. There is an excellent millstone-quarry, and also quarries of granite and building-stones. Clay some of it fit for porcelain and fine ware, occurs in many places. The manufactures consist of household linen, coarse woollens, earthenware, and salt, and the trade is in corn, wines of Bordeaux and Anjou, wool, charcoal, ship-timber horses, &c. The inhabitants, particularly those of the Bocage, are remarkable for the simplicity of their manners, and the strong mutual attachment subsisting between the lords and vassals of the soil. The strength of this attachment has more than once signalled itself in modern times in a manner very honourable to the parties themselves, but with very disastrous results. For administrative purposes Vendée is divided into three arrondissements—Bourbon-Vendée (the capital), Fontenay and Les-Baillies-Olonne; subdivided into 80 cantons, and 294 communes. Pop. (1853) 283,784.

VENDEN, a tn. Russia. See WENKOW.

VENDOME (anc. Vincomum), a tn. France, dep. Loir-et-Cher, on the Loir, at the foot of a hill covered with vineyards, 20 m. N.W. Blois. It is regularly and well built, and on a height above it rises the picturesque ruins of the old castle of Vendôme. It is provided with several fine promenades.

also, contains an ancient church, a communal college, public library, barracks, and theatre; and has manufactures of gloves, and woollen and cotton stuffs, tanneries, and cotton and paper mills. Pop. 6700.

YENDOTENA (an. *Pandotena*) an island in the Mediterranean off coast of Naples lat. 40° 42' N. lon. 12° 34' E. It is about 9 m. in circuit, is defended by a strong tower, and has a small harbor. The soil is fertile and well cultivated. Under the Roman emperor it was occasionally used as a kind of state prison. Agrippina, the wife of Germanicus, and Octavia, the wife of Nero, were banished to it. Pop. 800.

YENDRELLA, a town, Catalonia, prov. and 16 m. N. E. Tarragona, 6 m. from the Mediterranean with an assembly room, custom-house, hospital, church, burghing, several schools, and two towers on the coast a cooperage and a distillery. Pop. (including) 4936.

YENERIA a town, Italy Piedmont, div. and 6 m. N. W. Turin, on an affluent of the Stura. It contains of a spacious street, regularly lined by well built houses, and has two parish churches, a large old castle a riding and a communal school, a small hospital, and a charitable endowment. Pop. 5207.

VENEZUELA, a republic of S. America, occupying the N. E. portion of that continent lat. 1° 8' to 12° 16' N., lon. 53° 15' to 75° 17' W. bounded, N. by the Caribbean Sea, E. by the Atlantic Ocean and British Guiana, S. Brazilian or Portuguese Guiana, and N. New Granada. This western boundary does not follow the natural line of demarcation, but rests on a convention between the two republics. It begins on the coast at Cape Chichibacoa lon. 72° 24' W., runs to the sources of the Maimachi, an affluent of the Rio Negro, and is determined throughout chiefly by the junctions and courses of rivers, its whole length being 1100 m. The S. and E. boundaries running through countries but little known, are imperfectly determined. The former of these, towards Brazil, from the sources of the Maimachi in the W. to the junction of the Repunandi and Essequibo in the E., follow the water bounds or ridges separating the basins of rivers which in the present state of our geographical knowledge, can only be represented hypothetically. On the E. the republic assumes that its boundary extends from the river Cuyuni to the mouth of the Moroco on the coast, while the British government claims for Guiana a territory N. of this line and all the coast between the Essequibo and Orinoco. The area of the Republic is about 400,000 sq. m. or double that of France. When Ojeda and Vespucius entered the Lake of Maracibo, in 1499 they were surprised to find there an Indian village constructed on piles over the water, the banks of the lake being thought an unhealthy. They called the lacustrine village *Venezuela* (the diminutive of *Venecia* or *Venice*), a name subsequently given to the lake, and ultimately to the surrounding country.

In variety of surface, Venezuela is nowhere inferior to the other S. American republics; it has, indeed the advantage that its mountains hold a secondary importance, and occupy but a fourth of the whole territory. Its plains (the *llanos*) are easily accessible, and to a great extent extremely productive. In the valley near the foundations of the rivers in the lands of the Orinoco extend far and wide, and the forests are converted into grass. The means or table-lands, varying in elevation from 500 ft. to 1400 ft., are also well developed, and constitute a characteristic of the country.

Mountains.—The E. cordillera of the Andes divides into two branches before it leaves New Granada. The W. branch, which includes the Lake of Maracibo, bears in its different portions, different names—Sierra-de-Oxila, Sierra-de-Purcia (in the middle) and where it reaches the coast at Cape Chichibacoa, *Monte-de-Oca*. It has but a moderate elevation, rarely exceeding 4000 ft., and is nowhere cultivated. The chief forests which cover it in its whole extent shelter the independent Indian tribes, the Cocoraco and the Guajiro. The E. branch enters Venezuela much further S. and stretching N. E. for about 200 m., its general breadth being 60 m. unpopulated on an extensive area comparative sterility. It is an immense pile of rocks, forming ridges narrow at the summit, and rising to the limits of alpine vegetation. The *paramos*, or summit-plains have generally an elevation of 12,000 ft. and the Sierra-Verde-de-Merida, the loftiest of the summits which rise above them, and 15,000 ft. in height, is always covered with snow. When civilization has got a footing on the slopes of these mountains, it succeeds to a height of 3800 ft.

or 3800 ft., the line which separates the cereal crops of temperate climates, wheat, barley, &c., from tropical productions, maize, coffee, the yuca, &c., being at an elevation of about 4000 ft. Breaking off from these mountains near Trinita, the coast-chain runs N. E. towards the Gulf of Venezuela at Valencia, which, enclosed by the mountains, presents the most diversified and beautiful scenery the chain then continues onwards parallel to the sea-coast. Its N. branch, known as the Sierra-de-Maricao, terminates at Cape Codara, rising in the Sierra-de-Caracas, which is a conspicuous object from the sea, to an elevation of 8600 ft. The S. branch known as the Mountains of Guandimo and Tuma, sends a winding chain, Sierra-de-Alta-Gracia, S. to the Orinoco; while towards the E. and S. E., it forms the chains of the Bergantina and Cocollar. The valleys and table-lands of these coast-chains, which have collectively a moderate elevation, are the chief seats of cultivation in Venezuela, and form together the most populous region of the torrid zone in the New World. In the southern part of the state, on the frontiers of Guayana, rises an isolated group of mountains, between the rivers Orinoco and Amazon, divisible into several chains, extending for the most part E. and W., and called collectively the Mountains of Parima. This extensive mountain-region still remains uncultivated, a wilderness overgrown with superb forests. It is known, however, that the Mountains of Parima nowhere attain the elevation of parma (12,000 ft.), so that their summits when cleared of trees, would be capable of yielding the grains of Europe.

Llanos.—From the Mountains of Parima to the coast-chain at Caracas, and from the mouth of the Orinoco to the foot of the Andes, extends an immense plain, with an area of perhaps 300,000 sq. m. having in some places on its margin an elevation of 1800 ft., though a great portion of it is little above the level of the sea, and in the rainy season it is flooded by the rivers to an extent equal to double the surface of the British Isles. Such are the *llanos* (level) of Venezuela. They are generally destitute of trees, which in the most favoured spots occur only in small clusters. The *caecole* (Mauritia) palm is scattered thinly over the waste, which is often quite treeless. The change of level is rarely discernible by the eye, though in some places, patches of rock, showing horizontal stratification, and occasionally some square mounds in extent, rise a few feet above the surrounding plain. In the dry season the greater part of the *llanos* presents to the view a bare arid desert, over which the least agitation of the air whirles clouds of dust. The intense heat is aggravated from the baked ground, the want of landmarks, with the frequency of extensive mirages, and the difficulty of finding water, then render a journey through the *llanos* a dangerous undertaking. But no sooner does the rain fall—and it pours down with the violence peculiar to the tropics—than the scene changes totally; vegetation springs forth and spreads itself abroad with surprising rapidity, the arid waste becomes a rich garden, the mustered earth is seen to heave and open, and forth come the crocodiles and the lion-combrier, slinking off their lethargy, and reclaiming themselves from their temporary imprisonment. The *caecole*, however dry are now quickly filled and their banks lower the waters spread over the *llanos*, forming great seas, which towards the foot of the Andes penetrate even into the magnetic fumes. The plains above the level of the inundation feed cattle and horses in great numbers.

Rivers.—Among the rivers of Venezuela, the Orinoco holds decidedly the first place among the rivers of S. America generally, it ranks third in magnitude. The exuberantly fertile valley of that great river into which flow above 400 other rivers rendered navigable, watering a territory of 150,000 sq. m., offers to advancing civilization all the natural conditions of an opulent and populous state. (See *Orinoco*.) Within the limits of this Republic, the rivers that have a course of at least 100 m. are about 60 in number, the chief of these belong to the basin of the Orinoco (about 50); of the remainder few call for special notice. The Cuyuni runs E. from the Mountains of Parima, S. of the Orinoco, to join the Essequibo in British Guiana. Farther W. the Guaiaco or Rio-Negro, crosses the territory of Venezuela, on its way from the foot of the Andes in New Granada, to the Amazon in the Brazilian Guianas. The rivers flowing into the Caribbean Sea are much inferior in magnitude to those already mentioned; the most important of them are the Zulia, Catumbé, and

Monagas, falling into Lake Maracaibo the Tuyuca, running N. E. between the provinces of Coro and Carabobo the Tuy, running E. through the plain S. of Caracas; the Uare, 50 m. further E., and the Guapichico, which enters the Gulf of Paria. **Lakes and Rivers.**—Above 500 lakes or lagoons are enumerated within the territory of Venezuela, but most of these are the remains of inundation, being only marshes more or less permanently covered. Only two of the whole number are noteworthy for extent or beauty, namely Lakes Maracaibo and Tucaregua (which see). The chief harbours are those of Cumana, at the N. side of the Gulf of Cariaco, and spacious enough to receive and shelter all the fleets of Europe and Puerto-Cabello, which is also roomy and secure. La Guayra owes its importance chiefly to its vicinity to Caracas, and to the population of the neighbouring country.

Climate.—The climate of Venezuela exhibits in the fullest manner the equatorial character. It distinguishes seasons only as they are wet or dry. There are two rainy seasons on the coast: in December and January are the short runs, the long rains fall from April to July. In February and March, and from August till November are the dry seasons. On the coast-mountain the rain is very heavy, and the rank vegetation, combined with the humidity of the atmosphere, renders that region extremely insalubrious. In some parts of the country, as at the foot of the high Andes, the rains never cease entirely, and fall heavily with little intermission for 10 or 11 months of the year. The heat on the coast is generally excessive, and in some places, as La Guayra, almost insufferable. The banks of the Orinoco are said to be cooler than the adjacent llanos, owing doubtless to the rapid evaporation continually going forward in them, and Angaitera, close by that river is refreshed by breezes from the sea above 200 m. distant. The chagras produced in the llanos, by the spreading of the inundation and its return, were at one period said to be healthy. The lowlands about the delta of the Orinoco sicken with pestilential exhalations, and when the first rain falls after the dry season they emit a strong musky odour, like that which characterizes certain animals, as the jaguar the crocodile, rattlesnake, &c. Elephantiasis and gonorrhea seem to be here endemic diseases. The whole of Venezuela excepting the alluvial tracts about the Orinoco is liable to earthquakes. In 1813 devastating shocks, which laid in ruins Cumana, La Guayra, and Puerto-Cabello, were felt along the coast through an extent of 1000 m.

Minerals.—The attention of the first Spanish settlers in this country was forcibly attracted by the gold ornaments worn by the Indians, and their search for mines of the precious metals was not wholly fruitless. The towns of Barquisimeto and Nirgua owed their origin to the discovery of gold-mines in the mountains lying between them. In 1560 were discovered the mines of Los Tegués. In 1584 the city of San-Juan-de-los-Rios was founded on the Tuy and for some years derived wealth and prosperity from the neighbouring gold-mines of Aya and Curaipo. Several other mines enjoyed a transient reputation. But owing to the rapid exhaustion of the supposed treasure, and the ravages of climate, these mines seem to have been all abandoned early in the 17th century, and were soon forgotten. Silver-mines were also discovered at Guandía between Aroa and Nirgua and in the present century silver-ores have been found in the Mountains of Merida, S. of Lake Maracaibo. But the copper of Aroa has proved more valuable than the silver. These copper mines situate in the hills of San Felipe, about 70 m. W. of Puerto-Cabello, are extremely productive. The tin-mines of Barquisimeto were worked for many years on account of the crown, their whole produce being used in casting brass guns; they were at length sold to a private speculator who abandoned them. Coal is said to be excellent and abundant in many of the coast-districts, but chiefly in Coro. Among the mineral resources of Venezuela, salt is not the least important. The salt-mines of Araya facing the sea, on the peninsula N. of Cumana, were discovered by the followers of Columbus in 1499, and as they offered an inexhaustible supply of the purest salt, they continued for some years to attract adventurers of all nations. Asphalt and petroleum are abundant round Lake Maracaibo. At Lagunillas, in Merida, is a lagoon, which, in the dry season, yields a large quantity of the sequi-carbonate of soda, known to European druggists by the African name of *trona*. The Indians use it to mix with their tobacco.

Botany.—Owing to the equatorial position of Venezuela, the variety of its surface, and its humid climate, the flora of that country is one of the richest on the earth. No various indeed are its plants, that even the more common of the more important kinds would occupy more space than can be here devoted to them. It will here suffice to cast a rapid glance at the several gradations of vegetable forms from the sea-side to the snows of the Andes. From the level of the sea to the height of 8300 ft. extends the region of palms. Only three species flourish above these limits, one being the wax palm, which often attains an elevation of 9000 ft. another is the royal palm, remarkable for its great size and beauty. Of the palms in the lower plains, the most important is the *cariche* (*Coccothrinax*) called by the missionaries the bread of life, or the Indian *ago*. This tree produces nearly ground, and is thinly scattered even over the llanos. Every part of it is serviceable: its farinaceous pith, called *purma*, is made into bread, if this be allowed to decay in the tree, it breeds worms, which are considered by the Indians as a great delicacy. The berries, leaves, cortical fibres of the root, and the wood itself of this tree are all converted to use by the Caribs and Guaranas. The *chichiquillo* yields the fibrous tissue of which the natives make their strong and elastic ropes. The *yagua* supplies the place of the olive, two kinds of oil, one of them extremely fine, being made from its fruit. The *chagarrana*, a palm of most elegant and majestic appearance, produces, in immense clusters, a fruit equally palatable and nutritious. Mingled with the palms are the cardons and cast of *candelabra* forms sensitive *palmas*, *pan-de-azúcar* or *cow tree* which yields on incision a nutritious fluid resembling milk. Among the large timber-trees may be mentioned the *baobab*, of colossal size, the *Bombax* *Cuba*, and mahogany. *Sarcocolla*, copals, dragon's-blood and other drugs abound *cambó* (*cazabobón*) from several trunks of different kinds are all produced in the region of palms. In the forests thus richly stored with useful products the plants which chiefly attract the stranger's attention and admiration are the *carobos* (*acacia*), *lombos*, and *laca-ferrá*. *El guineo* at an absolute elevation of 800 (generally of 2000 ft.), and extending up to 9000 ft. are the fibrous plants (*sinchos*) sometimes forming great forests by themselves. It is the native home of many flowering plants now cultivated in the conservatories.

Here also grow wild the aromatic vanilla, the plantain, the *strychnos* or poison plant of the Indians and the mopo, an acacia, of the bruised seeds of which the natives make snuff. Trees grow stunted and rare at the elevation of 8000 ft. where all the graces of temperate regions stand perfect. Alpine plants show themselves at a height of 8500 ft. increasing upwards till they approach their upper limit, between 12 000 ft. and 14 000 ft. Above 11 000 ft. bushes cease and only knobby plants remain. At the height of 13 700 ft. plantaceous vegetation disappears altogether, and only lichens and hepatics cover the rocks as far as the limits of perpetual snow about 1800 ft. higher up. Among the cultivated plants, subservient to the wants of the country, or to the demands of commerce the first rank is due to the cacao. Owing to the remembrance of the colonists however the coats of Venezuela, which are particularly adapted for the culture, were long unable to supply the demands of the mother-country, and in the middle of the 17th century chocolate was even imported into Caracas from the Dutch colony of Coromandel. It was about 1775 that the cacao of Caracas began to attract notice, and towards the end of the century the exportation was very large, but this prosperity was marred by the war of independence, and it is supposed that the cacao-plantations have now only half the extent of those of 1810. The plantain supplies the staple food of the great majority of the population. The species are numerous, and some of them thrive at an elevation of 5000 ft., but lower down the tree is more prolific, and continues bearing for 20 years, loaded with fruit almost all summer. Maize, which at a height of 8000 ft. or 8500 ft. grows slowly, is gathered in four months near the coast, and thus two crops of it are easily taken in the year each producing 340 fold. The yuca is cultivated chiefly by the Indians, who prepare from the root the farinaceous meal called *manioc*. The cacao-nut is now very generally cultivated along the coasts of Venezuela for the sake of its oil, and is found to be more remunerative, in suitable situations, than the cacao. In 1778

the expense or superiority of the royal monopoly of tobacco was established in Venezuela. The privilege thus conferred was abolished, however, in 1833, by the congress. The tobacco of Caracas in 1833 is much esteemed in Europe. Cotton, coffee, sugar, and indigo are cultivated with success, but not to yet to any great extent.

Animals.—The forests of Venezuela are amply stocked with the feathered tribes and with monkeys. Of the species peculiar to this country, it will be sufficient to mention the titi, a diminutive monkey only 6 inches in length, the most elegant varieties of which are found only on the banks of the Casiquiare. While the monkeys occupy in families the upper and mountained regions of the remote forest, the tiger the largest of the American quadrupeds, wanders below in solitude along the banks of the rivers. The jaguar, a kind of wild dog, though much smaller than the tiger, is more formidable and when in large herds, fearfully attacks the hunter. The jaguar or American tiger being hunted for the sake of its highly-prized skin, is growing rare. The puma or lion, prefers the hills and mountain-sides to the deep forests. The chigüire is an amphibious animal resembling a large otter, it is often domesticated in ponds for the sake of its flesh which, being dressed like, is eaten during fasts. Besides dolphins of great size which ascend the rivers, the manatee often weighing 800 lbs. is found in the Orinoco and its affluents at the foot of the Andes, as well as in Lake Maracibo.

Divisions.—Venezuela, in its present extent, dates from 1821, when its limits were assigned by the Colombian congress. It was divided at that time into three departments, namely, Orinoco, Guayana, and Zulia. In 1824 the divisions were re-adjusted and a fourth department, that of Apure, added. These departments were subdivided into 13 provinces. But in 1830, on the dissolution of the Colombian republic, a 15th province, Barquisimeto, was added, and the division into departments was thrown aside. The republic is therefore now divided into the following 15 provinces, namely Carabobo, Carabobo, Barquisimeto, Coro, Maracibo, Truxillo, Merida, Varinas, Apure, Barcelona, Cumaná, Margarita (the island), and Guiana. The last nearly equals in extent all the others. In Carabobo, Apure, Margarita, and Guiana, the capitals are respectively Valencia, Asunción, Anaco, and Angostura. The other provinces all bear the names of their capitals.

Population Race &c.—The population of Venezuela, like that of the other Spanish American colonies, exhibits a singular mixture of the white (European) red (Indian), and black (African) races, and contains in the composition all the elements of dissension. More than half of the population are people of colour that is to say, *Mestizos*, *Mulattoes*, *Zambos*, and other mixed breeds. The *Creoles*, or people of European descent, amount at the present to a fourth. The domesticated Indians make about a sixth. The remainder are negro slaves emancipated by decree of the Republic, dated March 10 1854 now reduced to a small number and independent Indians. The whole amount of the population was in 1839 948,000 having been much reduced to preceding years by intestine war earthquakes and pestilence. At present (1853), it probably does not fall short of 1,250,000. Of this number, about 50,000 are independent Indians, who add nothing to the strength or resources of the state. These are divided into at least 100 different nations or tribes, some of them numbering but 100 people, and speaking apparently different languages, which are doubtless but dialects derived from a comparatively few tongues in the isolation of the forests. Among the nations which may be regarded as parent stems of this various and alienated progeny that of the Caribs holds the first rank. The Caribs are tall, strong, courageous, and intelligent. It is not believed that cannibalism was ever an established custom with these on the continent, though it certainly existed among their brethren in the Antilles. The surviving remnants of their nation in the present day inhabit a few villages in Guiana, on the river Carony, Orinoco, and about the lower part of the Orinoco. The Maracibo, and about the mouth of the river entering the delta of this river and the mouth of the river entering the

sea from the Sierra Guayana, are inhabited by the Guaranis, who are all business trading with Trinidad, and subsisting chiefly on the moriche-palm. Some of them, quitting their woods and gardens, have settled in villages near Flocos in Guiana. The Guianians, also in the neighbourhood of Flocos, are remarkable for their fair complexion and similitude features. Their language resembles that of the Guaranis, but a savage tribe dwelling near the upper falls of the Orinoco. The Magichirana, another light-colored tribe, dwell on the banks of the Yumari and Caura rivers, and trade with Demerara. The Ocumarens, in the plains of the Apure, are a wretched tribe, remarkable for their extreme addition to the savage habit of eating clay. The Guafiroes, on the peninsula W of Lake Maracibo, are still a considerable nation, they cultivate maize, yuca, and sugar-cane, and breed horses, mules, and cattle.

Government.—The constitution of Venezuela, derived on it by the parent republic of Colombia, is a slightly modified copy of that of the U States. The E. Catholic religion is that of the state, but other creeds are tolerated. The clergy are held to be strictly subordinate to the civil power. The papal mission, when required as transmitted through the government, which also administers the patronage of the church. There is very little machinery carried on in the state; the land attracts all the industry, still hardly a fourth of the fertile territory has yet been reached by cultivation. The foreign commerce is chiefly with the U States and Great Britain. In that, as in most of the other E. American states, the development of the internal resources of the country is much hindered by the want of good roads. At the close of the revolution, the debt contracted by loans in England alone, amounted to £2,750,000.—(Humboldt's *Personal Narrative*, Depon, *Voyage a la Partie Orientale de la Terre Ferme en A. M. de 1806*; Lavayna, *Voyage de 1812*; Hippelley, *Expédition de la Guayana de 1813*; Compaigne and Orégon en Venezuela, de 1851; Colucci *Revue de la Géographie de Venezuela*, 1841.)

VENICE [Latin, *Venetia*; Italian, *Venezia*; French, *Venise*; German, *Venedig*] a seaport in kingdom of Italy, cap. gov. of same name on an extensive lagoon in the N W of the Adriatic Sea, near the mouth of the Brenta, and connected by railway with Verona, Mantua, &c. lat. 45° 25' 54" N lon. 12° 20' 12" E (A.) Its site is perhaps the most extraordinary in existence. A long and narrow belt of land, very little raised above the level of the water stretches from E. to

VIEW FROM THE LAGOON, VENICE.—From Mitchell's 1850.

W along a portion of the Adriatic, and at its average distance of about 4 m. E. of the shore. A number of openings in this belt give access to the sea, which accordingly, filling all the space between the belt and the shore, forms a lagoon. In the N portion of this lagoon, a cluster of islets, to the number, it is said, of 82, most at one time have been visible on its bosom, but are so no longer, because the town has been built upon them, or rather on piles driven into them, and connected them from the river by the masses of building which, from whatever quarter viewed, have the appearance of floating on the

tribunal of that name held its sittings; and the Sala del Maggior Consiglio, a vast apartment, 178½ ft. long, 84½ ft. broad, and 61½ ft. high, occupying the greater part of the upper story adorned with splendid paintings, said to be the earliest

entire side of the piazza of San Marco; the Orologio, a lofty tower with a curious clock, in which the hours are struck by gigantic figures in bronze; the Palazzo del Quaresimali, close to the Rialto bridge, and now converted into the Tribunale d'Appello; the Dogana or custom-house, a massive structure of the early part of the 16th century, with coupled arches and arched piers; the arsenal, a vast range of buildings nearly 3 m. in circuit, surrounded by battlemented walls and towers and containing an armory in which are many remarkable curiosities; the Palazzo Foscarini, Cassa d'Oro, Palazzo Grimani, now the post-office; Palazzo Pisani, Palazzo Trevisani, Palazzo Manfrin with one of the best private collections of paintings in Venice, various other palaces, the Doge's Palace, now the academy of painting; six theatres, the public library occupying a handsome marble structure the Zecca or mint, a noble specimen of Italian rustic work by Sansovino; and various establishments of a charitable nature, under the name of Scuole, of which the most interesting of modern, both for the elegance of their buildings, the beautiful paintings which adorn them, and the rich endowments which they once possessed are those of San Marco and San Rocco.

THE GRAND CANAL AND RIALTO BRIDGE, VENICE.—From Piazza San Marco.

specimens of oil painting upon canvas but much injured in its appearance and general effect from having been converted into a museum and a library. The celebrated Ponte de Rialto (Bridge of Fish) connects the palace with the public piazza, a gloomy range on the opposite side of a narrow canal. The edifice next entitled to notice is the church of San Marco, originally the dual chapel and not raised to the dignity of a cathedral till 1817 but justly regarded as one of the grandest and most interesting ecclesiastical structures in Christendom. Its style is mainly Byzantine with an intermixture of Gothic and modern Italian, and its form that of a Greek cross, the nave, 245 ft. and the transept, 211 ft. It is surmounted by five domes, the one in the centre 30 ft. and each of the others 80 ft. in height. The principal front, 178 ft. wide, has 500 splendid columns of precious marbles of diverse shapes and colours, several of them covered with deeply cut Syrian inscriptions and terminates in polished arches surmounted by numerous crosses, statues, pinnacles and spires. Standing in the piazza, quite apart from the church is the bell tower the grand and impressive campanila, 323 ft. high, ever interesting as the spot where many astronomical observations were made by Galileo. The external appearance of San Marco suffers much by the overgrowing of its ornaments; but in the interior, though everything is gorgeous almost beyond description—resplendent cupolas above, rich and variegated pavement below gold ground mosaic spread over roof and wall in such profusion as to make the whole look as if it were lined with gold—the same feeling of overgrowing is not felt. Among the many other edifices deserving notice either for their architecture or the historical associations connected with them, are the lofty and venerable Gothic church of Santa Maria della Salute built in the 17th century filled with magnificent monuments, among which the gorgeous marble structure which now marks the grave of Titian is one of the most remarkable, and adorned with paintings by Titian and Tintoretto; the solemn and majestic church of San Giovanni e Paolo remarkable for its fine painted glass, and the monuments of numerous doges; the church of La Madonna della Salute, once the richest in Venice, but in a dilapidated state; the church of San Pietro di Castello, with a fine campanile and some good paintings and mosaics, the church of San Francesco della Vigna, on a magnificent plan, but only partly finished; the church of the Jesuits, in the theatrical and luxurious style not uncommon in churches of the order; the church of Il Santissimo Redentore, built as a votive offering after the staying of the plague in 1576 and regarded as the finest of Palladio's structures; the church of Santa Maria della Salute another votive offering, erected in 1632 after the cessation of a still greater plague, particularly distinguished by the boldness of its principal cupola and decorated within with many admirable works of art, the Palazzo Reale, originally the Procuratie Vecchie, standing on 50 arches, and occupying one

The manufactures include a variety of articles, but are not individually of great importance. Among others are woollen cloth, serge, canvas, cordage, cloth of gold and silver, velvet, silk hosiery lace, paste, counterpane, glass, mirrors, coloured glass, jewelry, wax-work, &c. The printing-presses of Venice, which in early times became celebrated over Europe for the beautiful editions of the classics which issued from them, are still active and send out more works than any other town in Italy. During the middle ages, before the western nations of Europe had devoted themselves to maritime enterprises, Venice naturally became the great mart for the commerce between the East and West. The progress of discovery having opened up new channels, and other canals occurring, the trade rapidly sunk and has at last dwindled down to a mere shadow. Even in its own neighbourhood it is outstripped by Trieste, and the utmost which it can now claim is a share in the trade of the neighbouring sea, and particularly the Lagoon. Its labour is ample beyond all possible requirements, being nearly co-extensive with its lagoons but the very depth of the openings in the belt of land which follows them does not exceed 16 ft. at the highest springs and at Malamocco, the most frequented of them, there is a bar outside on which the water is never more than 10 ft. The great armaments by which the foreign commerce of modern times is principally carried on are consequently excluded, and though it has been a free port since 1819 both the exports and imports are very insignificant. In 1858 there cleared 816 vessels, tonnage 128,811 besides 8994 coasters, tonnage 329,537 and there arrived 879 vessels, tonnage 134,444 besides 8998 coasters, tonnage 383,651. In 1864, 8092 vessels, of 800,584 tons, entered and 8062 of 807,861 tons, cleared. The imports include colonial wares, dyewoods, wool, silk, oil, sugar, tallow, cane, iron, salt, fish, &c., and the exports, timber, rice, linen, glass, coral, &c.

Venice is the seat of a R. Catholic patriarch, of whom 11 bishops are suffragans; of a Greek bishop and an Armenian bishop the residence of a naval commandant, the seat of a superior appeal court, and of several important public offices and possesses various colleges, educational, literary, scientific, and artistic. Its history extends over many centuries, and has ever great interest from its intimate connection with many of the most important events of which Europe has been the theatre, both in early and in more modern times. Its foundation is attributed to the inhabitants of the surrounding districts, who fled from the cruelty of Attila, king of the Huns, and took refuge among the islands of the mouth of the Brenta. Here, about the middle of the 5th century they founded two small towns called Rialto and Malamocco, and being in a manner shut out from all other modes of expansion, naturally devoted themselves to commerce. In this way they soon became prosperous, and their numbers increased so rapidly, that in 827 they made application to the emperor to be elevated into a holy polity, and obtained

authority to elect a chief, to whom they gave the name of Duke or doge. The town continuing to increase, gradually extended its buildings to the adjacent islands, and at the same time acquired considerable tracts of territory on the main land, then inhabited by the Venetians from whom the name of city is supposed to have borrowed its name of Venice. At a very early period it had begun to trade with Constantinople and the Levant, and though subjected to formidable competition from the Pisans and Genoese, succeeded in engrossing the far largest share of the traffic of the East. The Crusades soon commenced, and giving lucrative employment to their shipping in the conveyance of troops and the supplies of war, greatly increased both their wealth and power, and enabled them to make large additions to their territory. In early times the doges had been elected by the popular voice, and held their office by a very precarious tenure, for, in the case of any reverse or general dissatisfaction, from any other cause, they were not only deposed, but often lost their lives, either by open violence or assassination. The disorders thus occasioned rose to such a height in the 13th century that a change in the form of government became necessary. For this purpose the city was divided into six districts, each of which nominated two delegates, or 12 in all, these 12 nominated 470 representatives, who concentrated in themselves all the powers which had been previously exercised by the popular assemblies. At the same time a senate was appointed, and the doge was provided with a council of six who were nominally to assist, but if so disposed, could easily find means to thwart him. The 470 representatives formed the grand council and receiving their appointment annually from 12 delegates chosen by the popular voice, continued in fact, notwithstanding the change in form, to be dependent upon it. The next change, however, was then far. After a severe struggle the 470, in 1319 succeeded in making their office hereditary and thus converted what had previously been a democracy into one of the most rigid forms of aristocracy. The evils of the system soon developed themselves. The 470 now hereditary nobles, became as jealous of each other as they had formerly been of the people and while appropriating all the great offices of the state had recourse to various methods, many of them of the most despotic nature, to prevent any one of the great families from acquiring a preponderating influence. Among these among the most was the institution of a council of 10, selected from the grand council, and subsequently, in 1454, the selection of three state inspectors from the council of 10. These inspectors, in whom all the powers of the state were absolutely vested, justified the name which had been given them, and in the strictness of their proceedings they have been equalled only by the tribunal of the same name established by the usual oligarchy of the Roman church. This rigid despotism had, however the effect of giving a stern unity of purpose to the proceedings of government, and doubtless contributed in some degree to consolidate the various possessions of territory which had been made into one whole. At this period the Venetians were masters of the coast of Dalmatia, and the islands of Cyprus, Candia, and a great part of the Morea, and had almost monopolized the trade of Egypt and the East. The first great attempt to humble Venice was made in the beginning of the 14th century, by the famous league of Cambray between Pope Julius II the Emperor of Germany and the kings of France and Spain, for the avowed purpose of completely subduing her and partitioning her territories. Dissensions among the confederates more than her own valour saved her from destruction, but not before most of her possessions on the mainland had been wrested from her. A still heavier blow at her prosperity was struck by the discovery of a new passage to the East, which carried its rich traffic into new channels and dried up one of the main sources of her wealth and strength. The work of destruction was all but completed by expensive and ruinous wars with the Turks, at intervals from 1649 to 1718 during which she lost the Morea, the islands of Cyprus and Candia, and with them the ascendancy which she had long possessed in the Levant. The wars of her independence were destroyed in the war that followed the French revolution, during which she became successively part of the Austrian empire, Napoleon's kingdom of Italy, and the Lombardo-Venetian kingdom under Austria, in which last she continued from 1815 to 1866. Her attempts to regain her independence in 1848-1849 were

Vol. II

abortive, but in 1866, in consequence of the misfortune of Austria in her wars with Prussia and Italy the city and province were ceded to Napoleon III. under whose auspices they were united to the kingdom of Italy by a plebiscite. Pop (1867) 118 173.

VENICE, N. W. Trieste, V. Trieste and Trieste S. the capital of the State, and S. 2, and the Adriatic Sea is productive of all kinds of cereals, hay, maize, rice, wine, hemp, and silk and occupying nearly the whole of the littoral portion of the Lombardo Venetian kingdom presents the long series of lagoons which stretch nearly due N from the mouth of the Brenta-Nova to that of the Rile in the old bed of the Piave, for about 25 m. They contain numerous small islands on several of which Venice itself is built, and are separated from the open sea by a long and narrow tongue of land, consisting partly of alluvium brought down by the rivers and sand thrown up by the waves, and intersected by natural or artificial channels giving access to the capital and the coast.

VENICE (GULF OF) See ADRIATIC SEA.

VENICE (LAZARUS OF) See VENICE.

VENISSELUX, a in France dep. Loire, 60 m. N. W. Grenoble. Pop 3040.

VENLO, a fortified in Holland prov Limburg 43 m. N. E. Maastricht, a bank Mass. It is closely built, entered by four gates has three market-places, a townhouse, fish-hall, theatre, two arsenals, and other military buildings, two churches, several hospitals and benevolent institutions and numerous schools manufactures of pipes cigars, leather, oblique beer brandy vinegar and salt, and a good general trade with Germany. It has been several times besieged. Pop 6518.

VENN-OTTEY, par Eng Devon 918 ac. Pop 105.

VENOSA (anc. Venusia), a in Naples, prov Basilicata 24 m. N. Potenza. It is the seat of a bishop, and has many handsome and interesting edifices both private and public. Among the latter are a splendid cathedral five parish churches, an abbey with a handsome church and several fine monuments, four monasteries a nursery an hospital, two almshouses, an exchange, a fine aqueduct, and an old castle in ruins. Venus is the birthplace of the poet Horace. Pop 6000.

VEYRAIJ, or VESLAJ, a vil Holland, prov Limburg 24 m. N. Roermond with a church and two schools. P p (agricultural) 1695.

VENTA (anc. Venta), a vil Spain New Castile, prov and about 60 m from Caceres, 1 bank Gabriel with a church and a primary school manufactures of soap and linen a distillery and two flour mills. Pop 1432.

VENTANA (SERRA), a mountain, La Plaz, prov and 820 m S.W. Buenos-Ayres lat. 38° 5' S. It is of quartz formation bare and jagged, and attains a height of 3,000 ft.

VENTA-S-COS (anc. Venta Aguilera), a vil Spain, New Castile, prov and 18 m S.W. Toledo with a church, courtyards, school, and a trade in charcoal. Pop 1200.

VENTIMIGLIA, or VENTIMILLA (anc. Alipha Intense), a seaport in France dep. Alpes Maritimes, 22 m. S. E. Nice, on the Mediterranean, at the mouth of the Roya. It is surrounded by modern walls, and defended by two forts, but is in general very poorly built. It is the seat of a bishop, has a court of justice, a cathedral, another very ancient church, an episcopal seminary a college two monasteries, a nursery an hospital and several charitable endowments. Pop 5694.

VENTURIN, or WASTURIN, a vil Cashmere, y bank Jialum 20 m S.E. Baramulla. From its extensive ruins it is supposed to occupy the site of a much larger town, which was once the capital of the valley. Among these ruins are two remarkable buildings, a larger called Venimad Devl, and a less called Venimadmal, and both alike remarkable for the simple and massive style of their architecture and the elaborate skill displayed in their construction. All the blocks employed are of immense size, many of them weighing at least 10 tons and one of the gateways, nearly entire, was covered with ornaments, scrolls, and figures.

VENTNOR, a watering-place, England, S. E. shore, Isle of Wight, in the beautiful and picturesque bay of Underhill. It is mostly of recent origin and has many substantial and handsome houses, an elegant and commodious church, situated on a commanding height, and surmounted by a beautiful spire 103 ft. high. Independent and Wellesley chapels, a bathing establishment, a show-mall, and a weekly market. Pop. 2609.

148

VENTOUX a mountain-range, France, in the N.E. of dep. Vosges. It belongs to a branch of the Alps, stretches E. to W., and attains a height of 3440 ft.

VENTRY prov. Irish Kerry, 4429 sq. Pop. 1329.

VENUS (Pompeii) the most N. point of Mt. Tabiti lat. (Mugello) 17° 25' 15" S. lon. 149° 29' W. Upon the situation of this point depend most of the geographical positions of islands in the South Sea.

VENZONE, a vil. and par. Italy Venetia, prov. Friuli, 19 m. N.W. Udine, on the Tagliamento, with a parish and several auxiliary churches, and an active trade, particularly in silk. A battle was fought here between the French and Austrians in 1809. Pop. 3380.

VEPT, or Wyzemsztroer a market tn. Hungary, Thither Danube, co. Kisménz, 4 m. from Szombathely; with a church, and a trade in corn and cattle. Pop. 1169.

VERBOUWEN, a vil. Hungary Hildur Danube co. Bacs, 12 m. from Komor. with a church, and a trade in corn cattle, and wine. Pop. 3946.

VERA, a tn. Spain, prov. Navarra, r bank Bidasoa, 46 m. N. Pamplona with a church, elegant townhouse, primary school, and mines of iron, lead, copper, and other metals. Pop. 1764.

VERA, a city Spain, Andalusia, prov. and 40 m. N.E. Almería, near the Mediterranean. In general, the houses are low and the streets irregular but clean. There are four squares, and in the principal one, in the centre of the town stands the town-house. The other public buildings include the parish church, the flesh-market, hospital various schools, suppressed convent with church open for public worship, and two hermitages. Garrucha, a hamlet on the shore, chiefly inhabited by fishermen is the place where goods are landed and shipped, and where there are also warehouses and custom house. Vera has manufactures of soap, saltpetre, oil and potteryware, and a trade in these articles, and in rice, olives, &c. On the night of November 9, 1818, Vera was entirely destroyed by an earthquake with almost all its inhabitants. It was rebuilt by Charles I. Pop. 10,000.

VERA CRUZ, a maritime dep. Mexican Confederation lat. 17° 56' to 23° 17' N. and consisting of a long and some what narrow belt of territory stretching along the S.W. part of the Gulf of Mexico, and bounded N. and S.W. by dep. San-Luis Potosi and Queretaro N. Mexico and Puebla E. Oajaca and E. Tabasco greatest length, N. to W. to S.E. nearly 500 m. breadth only about 80 m. area, 77,595 sq. m. The coasts are generally low level and sandy, and the streams which fall into them are either obstructed by bars at their mouths, or navigable for only a short distance. The most important are the Tampico, the San-Juan or Alvarado and the Guzmanesco separating Vera-Cruz from Oajaca and Tabasco. Another characteristic feature of the coast is the number of the lagoons. One of these the Tamiquito, in the E., is about 55 m. long, by 50 m. broad, and communicates with the gulf by two streams, which thus form the mouth of Tampico. Within the lagoons are the two islands of Juan-Barrua and El Toro. The lagoons next in size and still farther N. is Tampico, 12 m. long, by 9 m. broad, the largest in the S. is that of Alvarado subdivided into eight smaller lagoons. The interior after the low sandy belt of sea-shore is passed, begins to rise gradually and becomes either clothed with magnificent forests, or covered with verdant pasture, or spread out in cultivated fields of cane or corn. The most mountainous region is near the centre, to W. of the capital, where the volcanic peak of Orizaba, close to the height of 17,097 ft. The climate is almost equatorial on the coast, where from May to November yellow fever always more or less prevails but becomes gradual and healthy in the higher and more inland districts. The products, embracing numerous varieties both of the temperate and torrid zone, cannot easily be enumerated, but include among others, maize, barley, and wheat, tobacco, coffee, sugar cane, naranjilla, vanilla, pine-apples, oranges, bananas, and smaller fruits, dye-woods, and many valuable species of cabinet-wood. The domestic

stock, consisting chiefly of horned cattle, and to some extent also of horses and sheep, are so numerous that their value has been estimated at nearly \$500,000 sterling. For administrative purposes Vera-Cruz is divided into four dep.—Jalapa, Orizaba, Vera-Cruz, and Ameyme; subdivided into 12 dists. Pop. composed of mixed race, chiefly Creoles and Indians, with some Europeans, foreigners, negroes, and on the coast a considerable number of Zambos, 964,725.

VERA-CRUZ, or VILLA RICA, dep. de Vera-Cruz, a seaport tn. Mexico, cap. of above dep., on a sandy, marshy, and unhealthy plain on the S.W. shore of the Gulf of Mexico, 185 m. E. Mexico; lat. (San-Juan-de-Ulloa light) 19° 11' 54" N.; lon. 96° 8' W. (L). It presents an imposing appearance from the sea, is defended by the strong castle of San-Juan-de-Ulloa, built upon an island about 3 m. from the shore; and consists of several squares and regular streets, with houses of coral-limestone, sometimes three stories high, flat-roofed, and gene-

THE PRINCIPAL SQUARE, VERA-CRUZ.—From Hotel, Vantage du Montebello.

rally provided with wooden balconies. The principal buildings are 16 churches, of which, however, only six are in use, though the remains of all still remain, and form very conspicuous objects. The government houses which is tolerably handsome, and some dilapidated monasteries. The harbour is more rounded between the town and castle, on the latter of which there is a brilliant revolving light, 79 ft. above the sea is very insecure, having neither good anchorage nor sufficient protection from N. winds, and the trade, though considerable, is rather declining in consequence both of the unhealthiness of the climate, the scarcity of good water and the superior attractions of the rising port of Tampico. Vera-Cruz was founded in the latter part of the 16th century on the spot where Cortes first landed, and obtained the rank and privileges of a city in 1615. Its castle, which completely commands it, was taken by the French in 1819, and by the U. S. States Americans in 1847. Pop. once about 50,000, now not more than 7000.

VERA CRUZ, a vil. Brazil, prov. Bahia, on the island, and about 2 m. behind the town of Itaparica. It contains a church and a primary school.

VERA PAZ, a prov. or corregimiento, Central America, state Guatemala, bounded N. and N.W. by the Mexican dep. Yucatan S.W. Solima and Totomucapan S. Zacapetago and Guatemala, and E. British Honduras, Bay of Honduras, and correg. Chiquimula area, about 3600 sq. m. It has a surface pretty diversified by mountain and valley, and a climate, which though varied is generally temperate and healthy. The soil, which is for the most part excellent, is adapted to almost every species of agriculture, but owing to imperfect cultivation, does little more than furnish subsistence to a comparatively scanty population. Large tracts remain entirely in a state of nature, but give sufficient indications of their capabilities by the Brazil and other dye woods, mahogany rosewood, and other species of valuable timber which they yield; and the cacao, coffee, indigo, and nopal or *Coccoloba* species, which are all found growing spontaneously. Its capital is Vera-Paz or Coban. Pop. about 68,000.

VERA-PAZ, a tn. Central America. See COBAN.

VERAGUA, a prov. New Granada, dep. Istmo, having the Central American state Costa Rica N. prov. Panama E., the Caribbean Sea N. E., and the Pacific S. and W. lat. 7° 15' to 9° 40' N. lon. 80° 20' to 82° 50' W. It is mountainous and rugged, covered with vast forests beautifully interspersed with luxuriant and fertile valleys. Some of its highest elevations are supposed to attain 9000 ft. The climate is extremely humid, and extremely hot. There are numerous and extensive pastures, on which great numbers of animals are bred. A considerable quantity of gold is obtained in various parts of this province by washing, copper and iron are abundant, and tin and mercury are said to have been found, but very little capital is embarked in the respective works. Veragua was first discovered by Columbus in 1508, and the province was granted to him by the Spanish king, as a reward for his services, with this title of Duke.

VERAGUA, (St. Jacinto), esp. above prov., 1 bank Martin, 29 m. S W Panama. It is well built; and has a considerable trade in gold-dust, copper, cotton, and dyer. Pop. about 5000.

VERANO, a vil. and com. Italy Lombardy, prov. and 16 m. N Milan, with a church, and a trade in corn wine, silk, and dairy produce. Pop. 1378.

VERAPOLI, a m. Hindoostan, Malabar coast, on a small island in an extensive shallow lake, territory and 7 m. N E Cochin.

VERBAS or **VERBATA**, a river Turkey in Europe, rises in the mountains on the N frontiers of Herzegovina flows first N N W., then N N E., passing Banjaluka, forms part of the boundary between Bosnia and Turkish Croatia, and after a course of about 60 m. joins r. bank Sava.

VERBASZ, two places, Hungary:—1, (C. or Old Verbasz), A vil. Elther Danube, co. Bacs, on the Teiskai, 1 m. from Uj Verbasz, with a Greek church and a trade in wheat wine, and excellent cattle. Pop. 2955.—2 (Uj- or New Verbasz), A vil., co. Bacs, near the former with two churches and a trade in corn, wine, and potatoes. Pop. 2810.

VERBENICE, a vil. and seaport, Austria, Thyrin, on the Vagle, with a church, a quarantine station, and some trade. Pop. 1590.

VERBICAGO, a m. Naples, prov. Calabria Citra, V. Paolo. Pop. 3248.

VERBITZ, or **VERBITZ**, a vil. Hungary co. Liptau, r. bank Waag about 1 m. E. St. Matkos. It has a Protestant church, manufactures of linen, dye-works, and some general trade. Pop. 3000.

VERBU, a market in Hungary, co. and 28 m. N W Komar, with extensive manufactures of woollen and linen cloth. Pop. 2668.

VERBOVSEKO, a market in Austria, Civil Croatia, on the Dobra, 23 m. S W W. Carlsbad. The inhabitants are chiefly employed as carriers, transporting goods by pack horses and oxen to Carlsbad and Pluma. Pop. 1000.

VERCANA, a vil. and com. prov. and 27 m. N E Como, at the N extremity of the Lake of Como. It has a church, and some trade in milk, wine, and cattle. Pop. 1043.

VERCELLI or **VERCELLI** (Latin *Fercellus*) a m. Italy, Piedmont, dep. 13 m. S W Novara, esp. prov. near r. bank Sesia. It was once surrounded by walls and ramparts, which have been thrown down and converted into fine boulevards, commanding magnificent views of the Alps. It has generally narrow and winding, with a few spacious and handsome streets, a cathedral or Basilica Romana, built by Palladio Tibaldi, in the 16th century, in the best Italian style, the church of St. Andrea, an ancient Gothic structure, with a Renaissance facade, the church of San-Cristoforo with some of the best works of Gaudenzio Ferrari several other churches, with good frescoes and paintings, the library attached to the cathedral, and containing a great number of rare and valuable MSS., three monasteries and two nuns, several of them in elegant buildings, the royal college, and several other important schools, the castle, now converted into courts of justice; a large and richly-endowed hospital, several other hospitals and charitable establishments, extensive cavalry-barracks, &c. The manufactures consist chiefly of silk, linen and cotton goods, tannery, articles in brass, brimstone, gold, and silver, iron-ware, leather, earthenware, and porcelain; and there are several dye-works, rope-works, silk, flax, and cotton mills. The trade is chiefly

in iron and tannery, and in rice, which is extensively grown on the plains in the vicinity. Vercelli is the see of an archbishop, and the seat of several important public offices. It boasts of a very high antiquity, and many interesting remains have been found in it. Pop. 18,353.—The *rovore*, area, 545 sq. m., is bounded N. by prov. Biella; W. Biella, Ivrea, and Turin; S. Casale and R. Lemania and Novara. The surface in the N. is partly covered by manifestations of the Alps but elsewhere is flat or undulating. It belongs wholly to the basin of the Po, which bounds it on the S., and receives from it the Sesia, augmented by the Airo and Ayro. The soil is generally of great fertility and produces rich crops of corn, hemp, and rice; but the general cultivation of the last makes the districts where it prevails unhealthy. The other principal products obtained are wine and silk. The most important mineral is iron. Administratively the prov. consists of 18 mandamenti, subdivided into 88 communes. Pop. (1859), 185,324.

VERCELLI Bionco a m. Italy Piedmont, dep. Aovara, prov. and 4 m. N E Vercelli, near 1 bank Sesia. It has a court of justice, two parish churches, a palace, occupying the site of the old castle, an elementary school, and a charitable endowment. Pop. 2568.

VERCHERES, a m. Lower Canada, r. bank St. Lawrence, 23 m. below Montreal, with a R. Catholic church, two schools, a grist and saw mill, and several tanneries. P. 1000.

VERD (Gara) Afrak. See GARA VERD.

VERDACCELUM, a m. Hindoostan, prov. Carnatic, 50 m. S S W Poodicherry formerly a small and thinly-inhabited place, but having become the seat of the district-court of South Arcot in 1812 it assumed an improved appearance. In consequence of considerable sums granted by the R. India Company for the erection of public offices and other buildings.

VERDE, several rivers, Brazil, particularly:—1 A river prov. Minas-Geraes, rises S W of the town of Ajuerona, near the source of the Grande, a tributary of the Parana flows continuously first N and then W, receives the Bapendi, Capivari, and several minor streams and after a course of about 150 m. joins r. bank Raynaldi.—2, A sacrificial river, prov. Minas-Geraes rises in the mountains to the W of Serra Grão-Mogor and flows N receiving first several small streams, and then the Guaratiba, by which its volume is doubled. After this junction it proceeds N W till joined by the Paozini, then W on the frontiers of prov. Bahia, and joins r. bank São-Francisco nearly opposite to the mouth of the Japocó and Carimbenda.—3, A river prov. Bahia, which flows N through extensive plains, and mingles its brackish waters with those of the São-Francisco nearly opposite to the town of Philo-Arcado.—4, A river prov. Goias, rises in the N slope of the Serra-dos Pirineos, flows N, and joins l. bank Maranhão.—5, A river prov. Mato-Grosso. It takes a northerly direction across the Cordeiras of Pareta, leaping from fall to fall and after a course nearly parallel with that of the Guapore, joins that river on its r. bank about 100 m. from the town of Mato-Grosso, in 18 It is navigable about 12 m. above its mouth.

VERDELLI or **VERDELLI-MAGGIORI**, a vil. and com. Italy Lombardy prov. and 9 m. S Bergamo cap. dist. It is well built; has two churches, and the remains of an old castle, a remarkable sepulchral monument, several charitable endowments, and a trade in corn and silk. Pop. 1760.

VERDEN, a to Hanover esp. Stade, esp. duchy of same name, r. bank Aller here crossed by a bridge, 19 m. R.E. Bremen. It is walled, has three gates, and was made the see of a bishop by Charlemagne. It contains an old cathedral, one of the finest ecclesiastical edifices of Hanover, two other churches, a gymnasium, town-house, hospital, and barracks and has manufactures of tobacco, some shipping, and a considerable trade. Pop. 4670.

VERDON, a river, France, rises in a branch of the Alps, S.W. Barcelonnette, dep. Lower Alps flows first S.E. to Castellane, then directionally W, forming part of the boundary between dep. Var and Lower Alps, and joins l. bank Durance a little below Vaison, total course, 110 m., of which 50 m. commencing at Castellane, are used for fisheries.

VERDU, a m. Spain, Catalonia, prov. and 21 m. E. Lerida; with a church, church-house, and primary school; manufactures of linen, and a very large annual fair, which lasts eight days. Pop. 1514.

VERDUN-SUR-GARONNE, a *tu. France*, dep. Tarn-et-Garonne, 7 hank Garonne, 15 m. S.W. Montauban with manufactures of sugar, and tanneries. Pop. 1873.

VERDUN-sur-la-Droite or **-sur-Saône** (*anc. Castrum Verdunum*), a *tu. and com. France*, dep. Saône-et-Loire, at the confluence of the Doubs and Saône, 9 m. N.E. Chalon-sur-Saône. The whole of the vicinity is surrounded by a double row of dikes, to protect it from the frequent inundations of the two rivers. It has manufactures of tiles and earthenware, linoleum, and oil-works, a trade in bricks, corn, wood-charcoal, fowls and wine. Pop. 1850.

VERDUN-sur-Meuse (*anc. Verdunum*), a *tu. France*, dep. Meuse, in a valley on the Meuse, which here begins to be navigable, 30 m. N.E. Bar-le-Duc. It is surrounded by walls flanked with bastions, and defended by a detached ramp as a fortress of the fourth class; and is divided into two distinct parts by the river, which, within the town, branches off into five separate streams that unite on quitting it. It is generally well built, but several of the streets are steep, and badly paved with flints. The episcopal, separating the town from the chateau, is surrounded with trees, and forms a fine promenade. The chateau, a fine building, is the residence of a large edifice, finely situated the cavalry-barracks, and public library. The manufactures consist of sugar-plums, mild drapery, and liguers, both of which are famous. There are also woollen and cotton mills, breweries, tanneries, dye-works, and sugar-refineries. The trade is in the above articles of manufactures and variously wine, fruit, oil, tallow, &c. Verdun is the see of a bishop, the seat of a court of first resort and commerce, and possesses a French secondary secondary ecclesiastical school, grammar schools, university, and philosophical and philosophical studies. Pop. 10,538.

VERDUNOIS, *an. d. v. France*, now included in dep. Tarn-et-Garonne and Haute-Garonne.

VERE, a *tu. Holland*, *see* Vliet.

VEREBLY, a market *tu. Hungary*, co. Bars, 1 hank Tisza, 23 m. S.E. Konya. It has a considerable trade in excellent wheat in the district. Pop. 1522.

VEREJA, a *tu. Russia*, gov. and 50 m. N.W. Moscow, cap. circle, on both sides of the Protra, here crossed by a wooden bridge. It is a very ancient place is defended by a castle, surrounded by a lofty stone rampart and a deep fosse, and has a beautiful cathedral, mother stone and two wooden churches, a distillery, a prison, numerous tanneries and tile-works and a considerable trade in corn, hemp, honeyed honey wax, tallow and wool. Pop. (1850) 4920.

VEREA, a *vil. Hungary*, Thutur Danube, co. Stuhlweisensberg 4 m. from Velence with two churches, a trade in corn, wine, and timber. Pop. 1073.

VERFEIL (*anc. Verde Follum*), a *tu. France*, dep. Haute-Garonne, 12 m. N.E. Toulouse. Pop. 2185.

VERGARA, a *tu. Spain*, *see* Vergara.

VERGÈRE, a *city U. States*, Vermont, at the head of navigation on the Otter Creek, 7 m. from its entrance to Lake Champlain, 23 m. S. Burlington with three churches, several mills, and manufactures of iron, woollen stuffs, and leather. The river is here 500 ft. wide and navigable by the largest vessels on the lake. Pop. 1878.

VERGÈRETO, a *vil. and comp. Florence*, on a narrow strip of the Apennines, about 5 m. from Regno. It has a church school, an old castle, and a trade in cattle. P. 1346.

VERIA, a *tu. European Turkey*, 85 m. W. Salonica. Some cotton weaving and dyeing are carried on, and considerable quantities of fruit are raised in the vicinity. Pop. 8000.

VERKHOTURIE, a *tu. Russia*, gov. and 300 m. N.E. Perm, cap. circle, agreeably situated, 1 hank Tura, a little E. of the Ural Mountains. It is an ancient place, surrounded by wooden walls and towers and has five churches, two monasteries, an old castle, a house several tanneries, and a considerable trade with Siberia. Pop. 8000.

VERLAINE, a *vil. and com. Belgium*, prov. and 15 m. N.W. Liège, on the Yser. It has a brewery, and a trade in corn and wool. Pop. 1251.

VERMADON, an ancient dist. France, which formerly belonged to prov. Picardy and is now included in dep. Aisne, and a small part of dep. Somme. Its cap. was St. Quentin.

VERMILJO or **VERMILLO**, a large stream, S. America. It rises in Bolivia, prov. Tarija, flows with a very winding course S.E. across the N. part of La Plata, traversing El

Gran-Chaco, and falls into the Paraguay about 80 m. above the junction of the Paraná. Its chief affluent is the Uruguay or Rio-Grande-de-Lavayon, on the right. A great part of its course, including windings about 1400 m. long, is through a sandy, sterile country. It has been descended in a boat from Oran, a small town in the department of Salta, to its mouth, about 1800 m.

VERMELHO, a river, Brazil, rises in the mountains S.W. of the town of Goyas, which it traverses without being navigable; receives numerous small streams, and after a N.W. course of about 340 m. falls r bank Ataguia.

VERMONT, a *tu. France*, dep. Yonne, 15 m. S.E. Auxerre, r. bank Oure. It has a considerable trade in the wine extensively grown in the district, and wood, which comes from Morvan, and is floated down to Paris by the Yonne and the Seine. Pop. 2171.

VERMONT, one of the U. States of N. America; lat. 45° 50' to 46° N.; lon. 71° 55' to 73° 25' W., and bounded, N. by Lower Canada, W. New York, from which it is partly separated by Lake Champlain, S. Massachusetts, and E. the Connecticut river, separating it from New Hampshire; length, N. to S. 157 m.; breadth, E. to W. 101 m. 1017 sq. miles is for the most part hilly and mountainous, being traversed by the Green Mountains, which give the state its name, and, entering from Massachusetts, stretch across it centrally S. to N. They attain their greatest heights in the N.W., where Camel's Hump, midway between Burlington and Montpelier is 4180 ft., and Mansfield Mountain a few miles further N. is 4280 ft. The drainage is shared between Lake Champlain and the Connecticut. The latter receives its supplies from the E. slope of the mountains by numerous streams, of which the most important are the West River, Quoccy, White River, and Passumpsic, the former, which, in the N. where it is widest, contains several large islands, forms a long expanse of 123 m. narrowing as it proceeds S. from 16 m. to 3 m. receives, among other streams, the Missisquoi, La Moelle, Onion River and Otter Creek, and discharges itself into the St. Lawrence by the Sorrells. Another lake, the Memphremong 30 m. long, though chiefly in Canada, belongs partly to Vermont. The soil is generally fertile consisting more especially in the valleys, of a deep, dark loam, well adapted for grain. The higher lands are most probably covered in granite. The climate though generally healthy has a very wide range of temperature, rising in summer to 84° and sinking in winter as low as 50° below zero. The snow lies from the middle of December to the middle of March, and on the hill-sides is often from 4 ft. to 6 ft. deep. Nearly three fourths of the inhabitants are employed in farming and grazing and manufactures are chiefly confined to a few coarse articles as woollens, linens, &c. The foreign trade, which has its only direct outlet at Burlington, on Lake Champlain is very limited, but the internal and transit trade is considerable, and has recently been much increased by the opening of lines of railroad for above 300 m. The principal religious denominations are Baptists, Congregationalists, and Methodists; but E. Catholics and Protestant Episcopalians are also numerous. The means of education, though considerable, are far short of those provided by Massachusetts and New York. For the higher branches, the universities of Vermont and Norwich, and Middlebury college, are the chief institutions. In 1850 the public school districts were 2647, and the number of scholars 55,616. The government is vested in a governor, executive council, senate, and assembly; all elected annually by universal suffrage. Montpelier is the capital. Vermont was first settled at Fort Dummer by emigrants from Massachusetts, and became a member of the Union in 1791 after the state of New York, which made a claim to the territory had renounced it for a payment of £20000. Pop. (1850) 118,611.

VERNANTE, a *vil. and com. Italy*, Piedmont, dy Coud, 8 m. N.W. Lione. It has a parish church, a public school, and an hospital. Pop. 8171.

VERAZZA, a *vil. Italy*, Piedmont, prov. Levens, on the side of a rugged rock falling into the sea. It has a church a convent, and the ruins of an old castle. The mid-quary Quotino Vercelli was born here. Pop. 1075.

VERENK, a *vil. Prussia*, prov. Westphalia, gov. Minden, circle Bitum. It consists of three distinct parts, and has a R. Catholic parish church. Pop. 1953.

VERNEUIL (anc. *Fernovium*) a tn. France, dep. Eure, in a valley watered by the Arre and a branch of the Ron, 36 m. S.S.W. Evreux. It contains some fine specimens of Gothic architecture, among others the donjon of the castle, known by the name of Tour-Grise, on the bank of the Arre; and the church of Madeleine, with a magnificent tower richly sculptured. The manufactures consist of coarse honery druggs, flannel, ironmongery, nails, and earthenware. The trade is in horses and linen cloth, wool, and leather fur bookbinding. Pop. 3490.

VERNO, a vil and com. Tuscany, comp. and about 24 m. from Florence, with two churches, and an old castle. Pop. 2998.

VERNON (anc. *Vernovium*) a tn. France, dep. Eure, 15 m. N.E. Evreux, r. bank Seine, here crossed by a wooden bridge of 23 arches, communicating with the suburb of Verneuil. Its ancient timber framed houses give it a venerable air, but it is in general very poorly built, and has narrow winding streets. It contains a handsome Gothic church, partly of the 15th and partly of the 16th century, a tall and massive tower placed among the historical monuments of France, and a communal college, and has manufactures of plaster and chalk, and a trade in corn flour, wine, and building stone. Outside the town, approached by a fine avenue, stood the Chateau-de-Bly, one of the finest seats in Normandy destroyed at the Revolution, and replaced by a plain modern mansion, in which the late Louis Philippe often used to reside. 1 5863

VERNON ISLES, three isls lying in the centre of the W entrance of Clarence Strait N.W. Australia lat. 12° 5' S, lon. 151° E

VERNOUX, a tn. France, dep. Ardèche, 11 m. N. Pri vas with a communal college and secondary ecclesiastical school silk-mills and tanneries, and a trade in woollens extensively manufactured in the surrounding districts. P. 1646

VEROCEE, or *VEROVIC*, a market in Austria, Civil Servant, cap. of its name, on the Rada, 66 m. W. N. W. Kank, in a fertile and well wooded district. It has a large and handsome castle, and a Franciscan monastery. Pop. 4111.—The country is bounded W. by con St. George and Barys, E. Bess and Bynia, S. Military Servant, and on Pocon, and W. generally Weraid. greatest length, W. N. W. to E.S.E., 100 m. greatest breadth, 39 m. The surface, though somewhat mountainous in the S.W. is generally level but marshy prevailing, in many places unhealthily. It is well watered, having the Drava for its N. boundary and the Danube on a part of the E. and the soil is generally fertile, producing heavy crops of corn, maize hemp, flax, and tobacco. Fruit also is abundant, and a good deal of wine produced. The pastures are both extensive and rich and rear great numbers of cattle. Pop. 120,000

VEROLA, two nearly contiguous places Italy Lombardy —1 (*Naves*), A vil and com. prov. and 21 m. S. Brescia, on the Strove. It is well built, has a court of justice, a parish church and a trade in corn, hay and flax. Pop. 4399 —2 (*Vecchie*) A vil and com. about 1 m. W. of the former with a trade in corn silk, and cattle. Pop. 3198

VEROLENGO, a vil. and com. Italy Piedmont, 40 and 18 m. N.E. Turin. It consists of a principal street lined with ancient cottages, and five minor streets, which open into it, and has three churches and a sanctuary. Pop. 4761

VEROLI, a tn. Italy descent and 6 m. S.E. Frosinone. It occupies the site of the ancient Verulan, and is the see of a bishop. Pop. 8009

VEROMILIS (Rax) a vil. and com. Ital. Sardina, div. Cagliari, 9 m. N.N.E. Oristano, with a trade in corn cattle and dairy produce. Pop. 1666

VERONA, a tn. kingd. Italy, gov. and 63 m. W. Venice, with which it is connected by railway exp. year. beautifully situated where the best slopes of the Alps merge into the plains of Lombardy, on both sides of the Adige, which traverses the town in a wild and rapid torrent, and is crossed by four noble bridges. The fortifications, constructed by Sarmisbell, were of great strength till dismantled by the French, in virtue of an article in the treaty of Lunville, but the town is still surrounded by lofty walls flanked with towers and bastions, and is watered by five gets, of which those called Porta-di-San-Sisto or Del-Pallo, Porta Nuova, and Porta-di-San-Zeno, are the strongest, remarkable also for solidity and beauty. Few towns surpass Verona in the richness of its services, and the

majestic appearance which it presents at a distance; and the street by which it is approached, though short, is of great width and magnificence. Many other streets are lined by splendid mansions, particularly rich in marble decorations and these are several elegant squares, of which the Piazza-Bra, the Piazza del Signori, the Piazza-del Erbo, and the Piazza-Veneto are most deserving of notice. The public

THE MARKET PLACE, VERONA
From T. M. Richardson's Sketches in Italy &c.

buildings are numerous, and include magnificent specimens of the architecture of the Romans and of the middle ages. The principal Roman structure is the amphitheatre, occupying one side of the Piazza-Bra. It is of vast dimensions, and still to entire in all its parts that it can scarcely be called a ruin. It is in the form of an ellipse, the transverse axis of which is 510 ft. and the conjugate 410 ft., and excepting portions on which the wallings of the outer circuit rested, is wholly of marble. About 25,000 persons might have been accommodated in it. The ecclesiastical buildings include 40 churches, all of them more or less remarkable for their architecture or the objects of interest they contain. Among others are the Duomo or cathedral, presenting one of the most perfect specimens of what has been called the Lombard Romanesque, with a magnificent portal, the columns of which rest on colossal griffins of red marble; the church of San Zeno, similar in style to the Duomo, with an equally magnificent portal a lofty campanile, and a remarkably fine crypt. San-Fermo-Maggiore, a large and ancient structure, with a lofty porch a bold Gothic interior and a curious and richly ornamented wooden roof; San-Fermo, with some remarkable monuments; Santa-Eufemia, with fine frescoes and paintings; San-Sebastiano, with a magnificent front after the designs of Berninelli, and many fine sculptures and San-Giovanni-in Valle, with two very remarkable Christian tombs of an early date. The other more important edifices are the Palazzo-Palacio, a noble building, lined by a long range of rustic arches placed opposite to, and harmonizing well with the amphitheatre, the palace of the Scaligeri, the Jorda of Verone, now converted into municipal buildings from the midst of which a huge campanile rose to the height of more than 300 ft. the Palazzo-del-Consiglio, ornamented with busts of distinguished natives of the town, including among others, Catullus, Cornelius Nepos, Pliny the younger and Vitruvius the Palazzo-della-Ragione or courts of justice, with a fine Latin library, the Casa-del-Mercante, with a statue of the Virgin by Campeggio, and fine but greatly faded frescoes of Corrado, the bishop's palace, almost Oriental in its style, the Castello Vecchio, a vast and solid structure fronting over the city

the Museo-Lapidario, with a valuable collection of antiquities; the Museo-Florentino, the public library attached to the cathedral the opera, with a fine *loggia* portion, several elegant *fontaine*, and the tombs of the *beauties*, consisting of a series of richly sculptured pyramids perfectly unique of their kind. The manufactures consist chiefly of silk, wool, linen and glass, bowery, leather soap, earthenware, and chocolate. There are also numerous silk mills, a considerable trade in the above articles of manufacture, and in silk, grain, rice, oil, and *ammoniac*, two weekly markets and two annual fairs, each of which lasts 15 days. Verona is the seat of a bishop, the seat of several superior courts and public offices and possesses numerous institutions, literary, scientific, artistic, educational and benevolent. It is supposed to have been founded in the 4th, and to have been subjected to the Romans in the 24 century before the Christian era. It afterwards rose to great importance, and was adorned by numerous magnificent structures, of which the amphitheatre still presents a distinguished specimen. On the decline of the Roman Empire, it was taken by the Goths, and made by Theodoric the capital of his empire. In 774 it was taken by Charlemagne, and so long as the power of the emperors in Italy lasted took a lead among the Italian cities. It afterwards became an independent republic, but its liberty was lost to it by its name which ruled it with despotic sway passed through the hands of various masters, and at length, weary of the vicissitudes to which it had been subjected voluntarily ceded itself to Venice, under which it remained till 1797. During the French domination it was annexed to their kingdom of Italy. Verona is celebrated for the beauty of its environs. Pop. 50,000.—The province, in the W of gov. Venice, is bounded N by the Tyrol, E. by the Venetian and Padua, S.E. by the Mantua, and W. by the Mantua and Lake Garda, area, 537 sq. mi. The surface is in the N and the vicinity of Lake Garda is mountainous, but becomes flat between the Minio on the W and the Adige on the E. In the S.W. and S. it is very fertile though somewhat marshy in the latter direction. The principal products are corn, rice, fruit, silk, fax, hemp, oil, and wine. The pastures are rich, the forests abound with game, and both Lake Garda and the rivers are well supplied with fish. The principal minerals are copper and numerous varieties of marble, several of which are very beautiful. Administratively the province is divided into 15 districts. Pop. (1846) 302,902.

VERPOLETHI, a town in Hungary, co. and 6 m. from Haver, with a church, and a trade in excellent tobacco grown in the vicinity. Pop. 1619.

VERREA, a vil. and com. Italy Piedmont, div. and 18 m. E.S.E. Aosta, traversed by the Evance, which here forms a bank Dora, and is crossed by a handsome wooden bridge. It has a court of justice, a church, a monastery, a public school, a castle, and manufactures of iron. Pop. 1132.

VERRUA, a tn. Italy Piedmont, div. and 21 m. N.E. Turin, with a church, and a strong castle, so advantageously situated, that though it has repeatedly been besieged, it has never been taken except by storm. Pop. 2603.

VERSAILES, a tn. France, cap. dep. Seine-et-Oise, is a plain, 11 m. S.W. Paris, with which it is connected by railway it may be regarded as a town of royal construction, having risen up rapidly regularly, and with great magnificence, under the auspices of the sovereignty of France, particularly Louis XIV., who made it the seat of his court, and lavished immense sums on its embellishment. It is justly regarded as one of the handsomest towns in Europe, through the magnificence of its mansions, and the great extent of space occupied by them compared with the population, give it a daily, magnificent, and half-dressed appearance. It is built with the greatest regularity. The houses are almost all elegant and of a uniform height, and the streets, which are remarkably spacious, follow the direction of the four cardinal points, intersecting each other at right angles, and are adorned with numerous fine fountains. It is traversed by three finely planted avenues, which meet in an extensive square, called the Place d'Armes, separated from which by an extensive court is the palace, the most conspicuous edifice in the town. It was built by Louis XIV. under the superintendence of Mansard and Le Brun, who have displayed all their talents in its embellishment. The facade fronting the place is perhaps the noblest part of the building, consisting partly of a facing of brick, forming part

of the original structure, and contrasting awkwardly with the more modern wings. The principal facade is on the other side, toward the garden and park. It has a length of 960 paces, a height of three stories, and is decorated throughout with balustrades, columns, and statues, also insipid as a whole, and beautiful in detail. The galleries and saloons are of great size and splendour, and all that money, labour, skill, and the highest art could accomplish, have been employed in adorning them. It ceased to be a royal palace at the Revolution of 1793, and was rapidly falling into disrepair, when the late Louis Philippe happily conceived the idea of diverting it from its original use, and converting it into a kind of national museum. Accordingly numerous small apartments, formerly occupied by court and state functionaries, have been converted into a few spacious halls, and the whole palace filled with an immense collection of statues and paintings intended to represent all the principal personages and events connected with the French monarchy, from Clovis downwards. The other buildings in Versailles chiefly deserving of notice are the cathedral, the Académie, the prefecture, college, theatre, public library of 48,000 volumes, and civil and military hospital. The manufactures are chiefly tallow and wax candles, potash, glass, and, perhaps, the trade in corn, straw, fruit, &c. Versailles is the seat of a bishop, the seat of a court of first resort and numerous and possesses a diocesan seminary and secondary ecclesiastical school, and a college. The park of Versailles, both in extent and embellishment is a pre-eminence of the palace, attracts crowds of visitors. Pop. (1832) 29,131.

VERSCHELTZ, VERNICA, or VERNICA, a tn. Hungary, Banat, co. Temes, 41 m. S. Temesvár. It is walled and otherwise fortified; and has an elegant Greek church with two towers, a Greek gymnasium, high school, hospital, large barracks, manufactures of silk, and a trade in silk, wine, and rice. (1846) 18,100.

VERSCHELTZ, a tn. Hungary, co. Vesztemar. VERSEMOLD, a tn. Prussia, prov. Westphalia, 24 m. F.N.E. Münster with a church, manufactures of linen and tobacco, and a trade in cattle and dairy produce. Pop. 1331.

VERSOIX, a vil. and par. Switzerland, cant. and 6 m. N. Geneva, S.W. shore of Lake of Geneva. It was founded in the middle of the 18th century by Louis XV. with the view of carrying off the trade of Geneva. It was regularly laid out, and has several handsome houses. Pop. 765.

VERTAILLON, a tn. France, co. Puy-de-Dôme, 10 m. E. Clermont, with the ruins of an ancient castle of the counts of Auvergne. Pop. 2366.

VERTIS, a vil. Hungary, Tithier Themas, co. Bihar, 1 m. from Lota, with two churches, a salt-petre refinery, and a trade in corn, maize and cattle. Pop. 1383.

VERTOVA, a vil. and com. Italy Lombardy, prov. and 13 m. N.E. Bergamo, 1 bank Serio with a beautiful and picturesquely situated and richly decorated parish church, a Capuchin convent, a ruined castle; several iron-forges and silk-works, and woollen manufactures. Pop. 1748.

VERTUIS (see. Verdun), a tn. France, dep. Marne, 17 m. W.W. W. Châlons. It is very poorly built. Its trade is in red wine produced in the district. Pop. 2313.

VERTVIER, a tn. Belgium, prov. and 14 m. E.S.E. Liège, on the Vestro, here crossed by a handsome bridge, and on the railway from Liège to Aix-la-Chapelle. It is divided into a high and a low town, and though containing several handsome houses, it is generally ill built, in narrow and irregular streets. Its principal buildings are the churches of St. Remacle, St. Joseph, and Notre-Dame, the Académie, and the theatre. It possesses several law-courts, a church of commerce, industrial, civil, and other schools, numerous hospitals, and benevolent institutions. The great staple is broad-cloth, in which it is not surpassed. The number of hands employed in the town and neighbourhood is at least 40,000, and the annual produce is 100,000 pieces, valued at £1,000,000 sterling, and largely exported. The other manufactures are cotton, leather, soap, brassware, and sheet-lead, besides dye-works, spinning-mills, brickworks, lincolns, &c. Vertviers existed as early as the 7th century. Its fortifications, once strong, were demolished by Louis XIV. Pop. 20,071.

VERTVIER, a tn. Prussia, co. Posen, dep. Albst, 23 m. N.W. E. Loh. It rises up a hill in the form of an amphitheatre; and has a communal college, and an hospital,

with a chapel, in which are some fine paintings; manufactures of woollens and linens, cambric, paper, and earthenware; and a trade in linen and hemp. Pop. 3510.

VERVY, par. Wale, Cambric, 8062 ac. P. 578.

VERVYAN par. Eng. Cornwall, 5827 ac. Pop. 1488.

VERZUOLO a to Italy Piedmont, prov. and 4 no. S. Saluzzo. It has two parish churches, a public school, and a charitable endowment. Pop. 3901.

VERZUOATO, a vil. and com. Italy Lombardy prov. and 7 m. N. E. Cremona, between the Olmo and the Delmona, with a ruined castle, and a trade in corn, silk, and cattle. P. 2181.

VERZURE, a river runs in the W. of Rhodan. Fruscia, near Expan enters Belgium flows E. past Linsburg and Verriere, and joins R. bank Ourthe a little above Liege. Its course is about 35 m.

VERZIME, a vil. and com. Italy Piedmont, div. Alessandria, prov. Aosta near Bobbio 1 bank Bernola, here crossed by an ancient bridge. It has four churches, and the remains of an ancient castle. Pop. 1156.

VERZUL (anc. Verulha) a town in France, cap. dep. Haute-Saône, 195 m. S. E. Paris. It is generally well built, in wide, regular well-paved and clean streets; and has a parish church with a fine altar, a handsome townhouse, courthouse, a normal and agricultural school, a communal college, theatre, cavalry-barracks, civil and military hospital, manufacturers of calico, druggs, hosiery, and turnery, wax-refiners dye works, and tanneries, and a trade in corn, wine, groceries, iron tools, leather and salt. Pop. (1809) 6666.

VERZULAT, a vil. and com. Italy Piedmont div. and 7 m. S. E. Novara, with two parish churches and an old castle. Pop. 1886.

VESTBYVICK, a seaport in Sweden 140 and 78 m. N. Kalmar on a peninsula in a bay of the Baltic. It is well built and has a handsome church, a good harbour, building-yards, and a considerable import trade in salt and exports of wood and metals. Pop. 2023.

VESTIGNE, a vil. and com. Italy Piedmont, div. Turin near Borgomasino on the W. slopes of Mount Masino with ruined walls, a parish church, and a manor. Pop. 1340.

VESTVICK, a vil. and com. Italy Lombardy prov. and 2 m. N. E. Brescia near R. bank Chiese with a ruined castle, which figures much in the early Italian wars extensive iron works, and a trade in corn and cattle. Pop. 1272.

VESUVIUS, a volcanic mountain Naples, opposite to the bay and 10 m. E. N. E. of the city of Naples. In approaching it from the W. a slope rising gradually from the shore till it attains the height of 3200 ft. above the sea is first ascended. This slope, which is about 3 m. long by 3 m. broad, embraces the volcanic cone, which stands nearly in its centre, and rises from it as a base at a nearly uniform angle of 32° for an additional 1500 ft. making the total absolute height above sea-level 8800 ft. The cone does not terminate in a point, but is truncated so as to leave a summit of about 2000 ft. in diameter. As recently as 1838 this summit presented the form of an uneven plane but an eruption afterwards took place which completely changed its appearance, converting what had been solid plain into a hollow cup with an outer rim, varying in breadth from 400 ft. or 500 ft. on its W. side to not more than 50 ft. on other parts and with an internal surface sloping gradually to a depth of about 500 ft. To the N. beyond the cone and its surrounding plain, called Atroclid Cavallo, is a lofty rural precipice, forming an arc of a circle 1400 ft. high, and 3 m. long, known by the name of Monte Somma. Though precipitous as a wall where it faces the cone, the outer side of Monte Somma slopes gradually at an angle of about 38°.

The lower part of the sloping plain, forming a belt along the shore about 3 m. broad is well cultivated and laid out in vineyards though intersected every few rods by two or three or terraces of black calcareous matter resembling the scoriae of a smelting-furnace, and easily traced upwards towards the central cone from which they have obviously descended in molten lava streams. Higher up, beyond the well-cultivated belt, the whole plain becomes very rugged and covered with scoriae, while the lava terraces already mentioned are seen branching off from the cone with steep sides like those of an embankment, and heights varying from 30 ft. to 80 ft. The scoriae are of all forms and sizes, sometimes forming groups, masses 8 ft. to 10 ft. on their sides and sometimes as small as hazel-nuts. The whole space covered by

these black jagged masses is the most desolate imaginable. The cone itself consists externally of loose sand near composed of scoriae, blocks of lava, and volcanic sand, and has obviously assumed its shape by following the natural law of gravitation the successive showers and streams thrown out by the crater first falling thick around its sides, and then descending gradually till the declivity becomes so small as to allow them a resting-place. In this way a succession of layers are formed and piled up like a pyramid. The regularity of the pyramid has, however been modified, mainly by two causes. First, the lava has not always flowed from the summit of the crater, but has sometimes burst out from its sides nearly horizontally down and sometimes at the distance of 1 m. or 2 m. from its base thus forming a number of minor or parasitic cones. The second great cause of modification is the internal force of the volcano acting on the external crust before it has become completely cooled and solidified. It has been found that currents of lava, in ascending, remain continuous only where the angle of inclination does not exceed 3°, and at any higher angle break up into masses of scoriae. Solid masses of continuous lava are traced up the cone to its very edge at an angle of 30°, and as in the original descent the weight of inclination could not have been more than 3°, it has been inferred that the much higher angle at which they now stand must have been caused by a movement of elevation from within Monte Somma, which is about 1 m. from the centre of the present cone, is supposed to have formed part of a cone of far larger dimensions and probably of comparatively larger height, which once had its circle complete, and consequently a diameter of not less than 4 m. at its base. This original cone has, with the exception of the part now remaining, been subsequently thrown down by the volcanic force, and destroyed in a manner similar to that in which 800 ft. of the present cone was actually carried away by an eruption in 1827. Geologists think they have discerned a difference in the structure and composition of Somma and of the existing cone the fragmentary and stony matter of the former being much more so of crystalline, and spread out in much broader sheets, and it has hence been inferred that Somma, like other traps, has been formed under great pressure at the bottom of the sea, and was in fact a submarine and like Vesuvius a sub-aerial volcano. The inference derives strong confirmation from the fact, that the beds of Somma are found to pass under the marine shelly tufa which forms the surface of the plain of Naples. The earliest eruptions of Vesuvius are lost in remote antiquity and no symptoms of its activity had been evinced within the memory of man till A. D. 63, when an earthquake damaged many of the surrounding cities. In 79 it again began to show symptoms of activity, and immediately thereafter next forth the terrible eruption which buried the cities of Herculaneum and Pompeii. A graphical description of it is extant in a letter by the younger Pliny to Tacitus. A succession of eruptions followed, more especially in 808, 473, 512, and 993, but were not attended with any flow of lava, the ejected matter consisting apparently only of stones, ashes, or volcanic sand, and fragments of older lava. The first recorded discharge of liquid lava took place in 1036. Since then various eruptions some of them extremely violent, have occurred. Among others may be specified those of 1779, 1793, 1834, 1898, 1847, 1850, and 1855.

VESZALLE, a vil. Hungary co. Arva, on the frontiers of Galicia, about 84 m. from Alau-Kibin with a church, and a trade in cattle and flax. Pop. 1332.

VESZPRIM, or Wazsram, a in Hungary, cap. co. of same name beautifully situated near Lake Balaton, among vineyards, partly to a valley on the S. and partly on a lofty and steep limestone-rock 24 m. W. S. W. Székesfehérvár. It is the see of a bishop, and the seat of several important public offices and has a cathedral, a Flavian gymnasium with valuable library, a bishop's palace, finely situated on a hill beside a raised castle a synagogue, hospital, and orphan asylum, and a trade in salt and wax, particularly the latter. Pop. 10 060. — The court is housed, N. by co. Odenburg and Raab; N. E. Komorn. Z. Székesfehérvár B. Tolna, S. B. Nagykanizsa, and S. W. Eisenburg length, N. W. to S. E. 7 m. in breadth about 60 m. is occupied by its centre by the Bakonyer-Wald, and in the S. by part of Lake Balaton. The soil is fertile, and the minerals include among others coal and alum. Pop. 158 000.

VETLUGA a river Russia, rises in the W of gov. Viatka, discharges into Kozlovka flows very circuitously W., then S. past the town of Vetluga, and turning S.E.E., joins I. bank Volga. Its course, about 500 m., is chiefly through vast forests. Its principal affluents are the Volzha, Kozlovka, and Ufa.

VETRALLA, a tn. Papal States, dioc. and 6 m. E. W. Viterbo. Pop. 1070.

VETSCHAU, a m. Prussia, prov. Brandenburg, gov. and 45 m. S. W. Frankfurt-on-the-Oder on an arm of the Spree, with 2 churches, a castle, manufactures of linen, and a trade in cattle. Pop. 1420.

VEVAY (German, Vins; anc. Vildesova) a tn. Switzerland, cant. Vaud, beautifully situated at the N. E. margin of the Lake of Geneva, 11 m. S. E. of Lausanne. It is regularly built, in the form of a triangle, and has spacious streets, and a large market-place lined on three sides by handsome buildings and on the fourth planned so as to form a fine promenade. The principal buildings are two churches, one of them on a lofty height above the town, surrounded with trees, and containing the tomb of Laillier, one of the regicides of Charles I., the town hall (Kornewa), with 18 marble-pillars, the townhouse, and hospital. As an entrepot for the surrounding districts, Vevay has a considerable transit trade. The beauty of the town and neighbourhood attracts many foreign residents. Pop. (1850) 520.

VEVAY a vil. U. States, Indiana, dep. on Switzerland, pleasantly situated on the Ohio, 86 m. S. E. by R. Indianapolis. It was settled by a colony from Switzerland, with a view to the cultivation of the vine and has many neatly built brick houses, a courteous academy and jail. The wine produced resembles claret. Pop. about 1500.

VÉVÉRE, a river France, rises near Chalamont, dep. Ain flows first N., then E. and joins I. bank Saône a little below Mâcon, after a course of about 60 m.

VEVÉRE, or VEVAY-MOIRAY, a tn. France, dep. Puy-de-Dôme, 9 m. S. E. Clermont, with some trade in wine. P. 1845.

VÉVÉRE, two rivers, France — 1. (*Vivier Proper*) Formed by the union of several streams dep. Corrèze flows S. W. past Lazerin, and joins r. bank Dordogne at Lamoignon, after a course of nearly 120 m. After receiving the Corrèze it becomes navigable — 2. (*Vivier Vieux*) Rises in the N. W. of dep. Corrèze flows S. W., and joins I. bank L. Isle, 6 m. above Périgueux after a course of about 50 m.

VEZIN a vil. and com. Belgium gov. and 9 m. E. N. E. Namur, on the Meuse, near the confluence of the Sambre with a blast furnace, oil mill and three flour mills. Pop. 1184.

VEZIR-KORMU or KARA KALAN, a tn. Austria Turkey, gov. Buda, 42 m. S. W. Sautsot It is divided into quarters, sometimes separated by party walls and has Armenian and Greek churches, several mosques, and a hospital or covered market, for silks and fine goods. Pop. about 5000.

VEZON a vil. and com. Belgium prov. Hainaut, 24 m. W. Mons with an agricultural pop. of 1359.

VEZOUZE, a river France formed by two streams from the W. slope of the Vosges, dep. Meurthe flows W., and joins I. bank Moselle, after a course of nearly 45 m.

VEZZA a vil. and com. Italy Lombardy prov. and 66 m. N. E. Bergamo at the Val-Turno, here crossed by a handsome bridge with an elegant church, manufactures of ironware, and a trade in corn and cattle. Pop. 1460.

VEZZA, a vil. and com. Italy Lombardy dep. Cant. prov. Alma, on a lofty hill with several churches, a public school, and a charitable endowment. Pop. 2125.

VEZZANO a tn. Sardinian States, prov. and 15 m. E. Levante, at the confluence of the Vars and Magra. It is partly walled and has two parish churches. Pop. 2638.

VIA MALLA a remarkable defile, Switzerland, cant. Grisons, S. W. Coire, through which the Rhine-Rhein passes, and along which the road to the Saffiggen Pass, &c. has been cut. It is about 4 m. long. The road crosses the Rhine several times at so great a height, that the noise of the tumbling stream below is scarcely heard, while the rocks in some places form a wall on either side 1600 ft. high, and not more than 30 ft. apart.

VIA MALLA a tn. and com. Italy, Venezia, gov. Venice, prov. and 20 m. S. W. Mantua, near I. bank Po. It is well built with principal street lined by arcades; and has 14 churches, an old castle, a gymnasium, elementary school, a theatre, several benevolent institutions, manufactures of or

silvery and fine linen, ordinary and morocco leather, various distilleries, and an important trade in corn. Pop. 5300.

VIADERBO, a mountain-range, Brazil, prov. Goyas, between the Maranhão and the Parana. Its culminating point, which overhangs the pass called Chapéu-de-Vieira, is bare and very lofty.

VIAGRADE, a m. Sledji, prov. and 6 m. N. N. E. Catin, on the S. E. slope of Kna. Pop. 8000.

VIA MAO — 1. A lake, Brazil, prov. São-Pedro-do-Rio-Grande. It stretches N. to S. over a large space between the mouth of the Jacaré and the Lake of Patos; and besides the Jacaré, receives on the N. the navigable São, Cui, Gravata, and a great number of small streams. It contains some islands, and being deep, is navigated by brigs. — 2. A vil. and par. Brazil, prov. São-Pedro-do-Rio-Grande, on the E. shore of the above lake, about 13 m. E. S. E. Porto-Alegre with a magnificent church. Pop. (dec.) 3816.

VIANA, a tn. Spain, prov. Navarra, 46 m. S. W. Pamplona, I. bank Ebro with a large courthouse, two primary schools for each sex, two churches, and three hermitages some cattle-rearing three oil and two flour mills. Pop. 2603.

VIANDEN a tn. Holland duchy and 26 m. N. E. Luxemburg on both sides the Our, here crossed by a bridge, near the Prussian frontier, with a church, a townhouse, and a castle, manufactures of glue, tanneries, and a trade in wine. Pop. 1280.

VIANDEN a tn. Holland, formerly fortified, prov. S. Holland, 7 m. S. Utrecht, I. bank Lek, with a townhouse, prison, two churches, orphan and old man and old women's hospitals, a town's and several other schools. Pop. (agricul. tnal) 2233.

VIANNA two places, Portugal — 1. A tn. and seaport, prov. Minho, 9 m. W. Ponte-de-Lima, near the mouth of the Lima. It is surrounded by ancient walls flanked with towers, and defended by a castle and has two churches, two hospitals, and a small harbour admitting vessels of 150 to 300 tons. It is said to have been founded by Colina Gauls, nearly three centuries before the Christian era. Pop. 6790 — 2. A tn. and par. prov. Alentejo, 30 m. S. S. W. Évora, near the Xarama with a church, several chapels, and two hospitals. Pop. 1360.

VIANOS, a tn. Spain, New Castile, prov. and about 46 m. from Albalade with a church, courthouse, and primary school a tanning and several flour mills, and a trade in corn, cattle, and wood. Pop. 1605.

VIAR, a river, Spain, rises in the mountains of Monasterio near Montemolin, prov. Badajoz, flows about 50 m. S. E., and empties into the Ganges, and joins the Guadalquivir at Castilleja 18 m. N. E. Sevilla.

VIAREGGIO (Latin *Via Regia*) a tn. Tuscany duchy Lucca, on the sea-coast, 13 m. N. W. Pisa. It has straight and spacious streets, lined for the most part with unadorned and even elegant buildings, two parish churches, one in the form of a Latin cross, adorned with a sculptured façade, and capable of holding 5000 persons; a productive saltery, and a trade in corn, wine, oil and chestnuts. Pop. 7600.

VIARIGI a vil. and com. Italy Piedmont, div. Alassio, prov. and 11 m. S. E. Casale, on a gentle slope covered with vineyards with a parish and four other churches, and a trade in wine. Pop. 1779.

VIATKA a river Russia, rises in the E. of gov. Viatka, flows N. W., then circuitously S. W. in the town of Viatka, here it begins to form a vast curve, almost in the form of a semicircle, passing the towns of Orlov and Kotolich, then proceeds S. E. E., skirts the E. frontier of Kasim and at a point where the three gov. Viatka, Kasim, and Orlov touch each other, joins r. bank Kama, after a course of about 500 m. Its principal affluents are the Kobra, Laika, Velika Moloma, and Fyma, and the Volokna and Klonka. It becomes navigable for barges at Viatka, and has a deep stream, with a current of very moderate rapidity and banks well covered with fine timber.

VIATKA or **WIAJKA**, a gov. Russia, bounded, N. by Volodga, E. by Kasim, S. E. by Orlov, S. by Nizhny-Novgorod, W. by Kostroma, and 230 W. Volodga, greatest length, N. to S., 310 m. central breadth, 230 m. area, about 40,150 sq. m. The surface, of an irregularly triangular shape, is much broken by hills, generally low, except towards the N. and E. where some distant ramifications of the Ural chain appear. The strata are chiefly cretaceous. The drainage belongs

wholly to the basin of the Volga, to which it is carried chiefly by the Kama, which, rising near the middle of the R frontier, flows N, and after a long and winding course through Perm, again enters Viatka on its S.E. extremity and forms its S.W. boundary. The other principal streams in that which gives the city its name. The climate winter much, being keen in the N and mild in the S. The soil is generally a strong clay or a calcareous loam, which, though unskillfully cultivated, yields good crops of corn, flax, and hemp, large tracts are under wood and natural pasture, in some parts extensive meadows prevail. The common fruits suffer much from frosts but nuts and walnuts are abundant. In the more densely wooded districts the hunting of fur-animals occupies many persons. Great attention is paid to the rearing of bees. The silkworm, chiefly copper and iron, are not much worked. One important branch of industry is the boiling of boats and barges, for which the forests furnish excellent materials, while the numerous streams give easy means of transport. The only other manufacture of consequence are coarse woollens and linen cloth, leather trowers, and articles in wood. The trade consists in corn, timber, wax, honey, soap, leather, fur, iron, and copper. The chief imports are wine, colonial produce, salt, and tin, the last two brought overland through Persia. Education is so miserably neglected that there is only one person at school out of every 3800 and the gov. possesses only one printing-press, which is the property of the Crown. Viatka is divided into 11 districts. Pop. (1850) 1 698 000

VIATKA a town, Russia, gov. above gov. advantageously situated near its centre, in a beautiful district at the confluence of the Kama with the Volga, 500 m N N E. Moscow. It consists mostly of indifferent wooden houses, is surrounded by walls flanked with towers, defended by a citadel and has 23 stone churches, one of them a cathedral with very costly decorations; two convents, an ecclesiastical seminary, a gymnasium; manufactures of soap, leather, and various articles in silver and copper; a very extensive distillery; and considerable trade in corn, flax, tallow and leather particularly with Astrakhan St. Petersburg and Archangel. P. (1850) 9379

VIATKA a river, France, rises in E. of dep. Aveyron flows easterly N.W. to a river of same name. It forms part of the boundary between dep. Tarn and Aveyron, and joins bank Aveyron, after a course of about 60 m.

VIATKA, or **VIATKA** a town, Russia, gov. and 97 m N.N.E. Smolensk, on a river of same name. It occupies a large area, is surrounded by walls, built almost entirely of wood, and has a fortress or kremlin 12 churches, a monastery

VIATKA.—From a copy of the Commission descriptives du Nord.

two schools, extensive manufactures of leather and gingerbread, and a considerable trade in corn and hemp. In 1812 the French sustained severe losses here and the greater part of the town was burned down. Pop. (1850) 8716

VIATKA, or **VIATKA**, a town, Russia, gov. and 70 m N. Wladimir. It has two churches, a monastery, manufactures of linen, several tanneries, and a trade in fine apples and cherries. Pop. (1840) 2648

VIBOLDONE, or **VIBOLDONE**, a vill and com. Italy, Lombardy, gov. and 8 m from Milan, between the Lambro

and the Olona. It figures much in early Italian history; and has a trade in corn and cattle. Pop. 1327

VIBORG, see **RUSSEN** and **DENMARK** See **WISCONSIN**

VIBARTE, a town, France, dep. Sarthe, 25 m. N N E. Le Mans; with several tanneries. Pop. 1443

VIC (see **PIPE**) a town, France, dep. Meurthe in a narrow valley on the Sella, 15 m. N N E. Nancy. It is well built and has a collegiate church, built in 1240; a castle still more ancient, salt-mines, and salt-works. Pop. 3023

VICANT BISCORRE, a town, France, dep. Haute-Pyrénées, 11 m. N Tarbes. It is well built and has a communal college the ruins of an old castle, fine promenades, manufactures of leather and distilleries. Pop. 8391

VIC-FRANCAIS, or **VIC-FRANCAIS** (see **VIDENSA**), a town, France, dep. Gers, 17 m. N W Auch 1 bank Looze. It is tolerably well built and has manufactures of wax and hoops, tanneries a worsted-mill a dye-works; and a trade in wine, corn, brandy and ship timber. Pop. 1868

VIC-LE-CHATEL, or **VIC-LE-CHATEL**, a town, France, dep. Puy-de-Dôme, 11 m. S E Clermont in a fertile wine-district, P. bank Allier. It is still partly walled; and has an ancient chapel, a much-frequented salt-spring and a fine pottery. Pop. 2352

VICALVARO a vill Spain New Castile, prov. and about 4 m from Madrid; with a church, court-house, prison, primary school, and fine distilleries. Pop. 1808

VICARILLO (see **VICARILLO**) a town, Spain, N W shore of Lake, and about 5 m from the town of Braciano, with the ruins of an imperial villa of the time of Trajan, and mineral-springs, known to the Romans as the *Thermae Aureliae*. It was fortified in the middle ages.

VICARI a town, Sicily, prov. and 8 S E Palermo, finely situated on Mount Ercolano, in a healthy district. Pop. 4500

VICCHIO (see **MUSCULO**), a village in Tuscan comp. and about 18 m from Florence, on a hill near 1 bank Sesto; with a church, a castle, and a school. Pop. 1507

VICENTE-DE LA BARRERA (see **VICENTE**) a town, Portugal, prov. Beira Baixa, 20 m. N N W Castello-Branco, in a mountainous and somewhat barren district. Pop. 1710

VICENTE-DE LA BARRERA (see **VICENTE**) a town, Spain, Old Castile, prov. and 28 m. S.W. Santander. It is walled, has a castle with dungeons, said to have been used as a prison by the kings of Navarre; a handsome Gothic church, primary schools, and custom-house. The harbour is secure, and can admit vessels of considerable burden. Pop. 1028

VICENTE (see **VICENTE**) a town, Spain, Extremadura, prov. and 33 m. N Badajoz, with good and clean streets, a town-house, prison, several primary schools, a parish church, and several hermages; numerous manufactures of coarse hats, leather common cloths and linen oil presses, and flour-mills, exports of dried figs and other fruit to Portugal; imports of hides, and some cattle in cattle and products of industry. Pop. 6760

VICENTE (see **VICENTE**) a town, Central America, San Salvador, cap. dist. and at the E. foot of a volcano of same name, 40 m. E San-Salvador; with extensive plantations of indigo and tobacco in its vicinity. Pop. about 8000

The **VOLCANO**, an enormous isolated mass of irregular shape with numerous projecting eminences, separated by deep chasms is supposed to be about 800 ft. high.

VICENZA (see **VICENZA**) a town, Italy, gov. and 48 m. W Verona, on the railway to Verona, cap. prov. of same name, beautifully situated near Mount Berico, at the confluence of the Retrone with the Etschigione, here crossed by stone bridge. It is surrounded by dry moors, poor partly under cultivation, and by dilapidated walls, and is very well built containing numerous fine mansions, many handsome streets, and several elegant squares, among which the Piazza-del-Signori, with its campanile, not more than 30 ft. in the square and yet more than 200 ft. in height, is conspicuous. The public buildings, though numerous, are somewhat monotonous, being almost all the work of Palladio, who was born here, or of scholars who rather slavishly imitated him. The most remarkable edifices are the Duomo, originally Gothic, but

143

much injured by modern alterations; the Dominican church, also Gothic, with Renaissance capitals; San-Pietro, with a handsome facade by Casanova. Santa-Corona, with two fine paintings; the Basilica, or Palazzo-Santa-Rapina, an excellent Gothic

THE PALAZZO-FRATTAZZO, VICENZA. FROM BURNER'S ILLUSTRATIONS AND ENGRAVINGS.

building, the Palazzo-Frattazzo, in a rich and fanciful Corinthian style; the Teatro-Olimpico, regarded as the most curious if not the finest work of Palladio; the Pinacoteca, the lyceum, public library and numerous hospitals. The manufacturers are silk, woolen, and linen textiles; leather, earthenware, hats, and articles in whichsoever, gold, and silver. The trade is in the above articles, and in corn, wine, and silk. Vicenza was founded about a century before the Christian era; became a Roman municipal town, was pillaged by the Goths, first under Alaric, and afterwards under Attila, passed into the hands of the Lombards; was ravaged by the plague in 1585 and burned down by the Emperor Frederick II. in 1286. It afterwards passed to the Venetians, who retained it till the downfall of the republic in 1798. After forming part of the French Kingdom of Italy it was united to Austria in 1815. Pop., including suburbs, 80,000.—THE PROVINCE, 90 m. long, by 85 m. broad, though partly covered in the N. and W. by branches of the Alps, is generally flat and fertile, producing much corn, maize, hemp, flax, wine, and silk. Pop. 298,000.

VICI (see AUCONE) a city, Spain, Catalonia, prov. and 86 m. N. Barcelona. It has narrow and tortuous streets, several squares, one of which serves as a market-place, the remains of very old towers, and a castle, the latter of which serves as a prison, a townhouse, theatre, cathedral, and four other churches; three almshouses, two hospitals, a poorhouse, an asylum for poor druggists, seven reformatory convicts, a theological school, a free school of design, and various other establishments for elementary and advanced education, manufacture of leather, gloves, soap, chocolate, bricks and tiles, flax and cotton mills, bleaching-works, dye-works, flour-mills, and ironworks. Vich is also famous for its sanguine. This is a place of great antiquity. The modern name, Vich, is a corruption of Vesca, a Roman town which was razed by the Moors, and rebuilt in 798. Many Roman antiquities have been found from time to time discovered, and neglected. Vich is the site of a most ancient bishopric, which was restored in 980, and in 970 was raised by John XIII. to be the metropolis of Catalonia. This dignity, however, reverted to Catalonia, after its re-conquest from the Moors. The cathedral was rebuilt in 1088. Pop. 10,567.

VICHADA a river New Granada, which rises in the Llano de San-Juan, near lat. 4° N. lon. 78° W. flows E. N. E., reaching the coast on the left, and after a course of about 800 m., joins the bank Orinoco near lat. 5° N.

VICHERA, a river Russia, rises in the N. of gov. Perm, in the W. slope of the Ural Mountains, flows S. nearly parallel with the Ural, then S. W., and finally S. E., and joins the bank Kama, after a course of about 240 m. Its principal affluents are on the right the Kolyva, and on the left the Tava. Its course, partly navigable, is through vast forests.

VICHODNA, a vil. Hungary, co. Lipitz, 41 m. E. N. E. Veszprém, with a trade in dairy produce, particularly excellent cheese. Pop. 1300.

VICHTE, a vil. and com. Belgium, prov. W. Flanders, near the Groote-Beka, an affluent of the Lys, 23 m. S. Bruges, with manufactures of linen, a distillery of oil and a flour mill. Pop. 1359.

VICHY, or MONTMORILLON, a town and com. France, dep. Allier, in a beautiful valley of the river of that name, 57 m. S. E. S. Moulins. It was once a place of strength, and is celebrated for its thermal alkaline springs, which issue from a deep fissure, and have temperatures varying from 102° to 112°. Pop. 1881.

VICKSBURG a town, U. States, and a bank river Mississippi, and on a railway connecting it with Jackson, which is about 45 m. W. It stands in a fertile and picturesque district, and though of recent origin, is large and flourishing, with Presbyterian, Episcopal Methodist, and R. Catholic churches; three academies, and a public school attended by about 500 pupils. An active business is carried on in lumber and building-materials, and about 100,000 bales of cotton are annually exported. Pop. (1850), 5075.

VICO several places. Italy, particularly—1. A town, and 8 m. N. N. W. Frosinone. Pop. 5100.—2. A town, Naples, prov. Capitanata, dist. and 81 m. E. N. E. San-Severo, on the side of Mount Gargano, with a collegiate church and three convents.—3. A town, Naples, prov. Lavoro, dist. Nola. Pop. 1130.—4. (Egine) (anc. Egnus) A town, Naples, prov. and 16 m. S. E. Naples on a jutting rock in the Gulf of Naples. It is defended by a strong castle, and has several ancient remains. Pop. 5600.

VICO a vil. and com. Italy, Piedmont, div. Turin, prov. Ivrée, in the valley of Broana, with a court of justice, and a parish church. Pop. 1068.

VICO, or VICO DI MONDOVI, a town, Piedmont, div. Cune, prov. and nearly 3 m. E. Mondovì at the foot of a hill crowned by an old castle, now converted into a modern mansion. It has three churches, a Cistercian monastery, and a superior school. The French gained a victory here in 1796. Pop. 2594.

VICO-PINARO a vil. in Tuscany, comp. and 7 m. E. Pisa, on a slope of Mount Pisano, with an ancient church and a castle. Pop. 1457.

VICOMARINO a vil. and com. Parma, dist. and 17 m. S. W. Piacenza, on a lofty hill, with a trade in corn, wine, fruit, and cattle. Pop. 4508.

VICORAGO, a vil. and com. Italy, Lombardy, prov. and 37 m. from Como on a lofty height above the Trese, with a parish church, and mines of argentiferous lead, copper, and antimony. Pop. 1170.

VICOBA or COMETA, in Brazil, prov. and 140 m. W. Coara, in the Serra-Hibipaba. It consists of about 150 houses, partly of brick, but chiefly of wood and thatched with reed. The greater part of the inhabitants are Indians. Pop. (1850) 5000.

VICOVARO a vil. Papal States, 7 m. N. E. Tivoli, with some remains of polygonal walls, and a fine old hermitical castle. In the vicinity is the ancient bridge of the Claudian aqueduct. Pop. 1050.

VICTORIA (formerly PORT-PHILLIP), a British colony in the S. E. of Australia, between lat. 34° and 39° S., and lon. 141° and 150° E. bounded, N. E. and N. by New South Wales, from which it is separated in the former direction by a straight line drawn from Cape Howe to the nearest source of the Murray, and in the latter by the course of that river to the E. boundary of S. Australia. W. by S. Australia, and S. by Bass Strait, separating it from Van Diemen's Land. Length, E. to W., 600 m.; mean breadth, measured on the parallel of 146°, about 200 m.; area, about 90,000 sq. m., nearly the same as that of Great Britain. The coast is generally low and unbroken in the W. from the mouth of the Glenelg to Cape Otway, between which are situated the available harbours of Portland, Port-Fairly and Warrambool; and in the

E, from the harbour of Port Albert, in lon. 147° to Cape Howe, between which latter points almost the only features which tend to diversify its monotonous appearance are a series of lagoons, of which Lake King is the largest. From Wilson Promontory to Cape Otway a remarkable contrast is presented, and the coast becomes adorned by perpendicular cliffs rising 600 ft. to 1000 ft. above the sea, and containing openings into numerous bays and anchorage. Of these the most remarkable is Port Phillip, which, scarcely 2 m. wide at its entrance, forms a kind of inland sea, stretching from N to S for about 25 m., and expanding from E. to W. near its centre to 60 m., though its average width may not exceed 18 m. Within this spacious basin, covering an area of 875 sq. m., the highest point that ever went to sea might ride in perfect safety. Separated from Port Phillip by a low promontory is the well formed but shallow harbour of Western Port, effectively protected by Phillip or Grant Island, at its mouth, and divided into N. E. and W. arms by French Island near its centre. Still farther E. the most remarkable feature of the coast is Wilson Promontory connected with the mainland by a low sandy isthmus, but consisting of a lofty mass of granite, with summits rising to the height of 9000 ft., and mostly developed in sand. On the N. of this promontory is the last great indentation of the coast, Corner Basin, protected E. and E. by several low sandy islands, of which the largest is La Trobe. The entire sea-board has a S. aspect, and following its external sinuities, is not far short of 600 m.

The interior is well diversified, both by mountains and plains, but is chiefly characterized by the latter, which are often of great extent and so sparingly wooded and free from other obstructions, that it has been said the plough could in some parts be drawn conveniently for 100 m. across tracts well adapted for agricultural purposes. In general however, the surface is better adapted for pasture than agriculture, and wool of the most excellent quality now is and probably will continue to be the staple product obtained from the occupation of the soil. The mountains form two principal ranges near the opposite extremities of the colony. The E. range is a continuation of the long chain which stretches from N. to S. through New South Wales, at no great distance from the coast, and mostly parallel to it. Shortly after attaining its culminative point of 6500 ft. in Mount Kosciusko or Walington, this range under the name of the Australian Alps enters Victoria, and proceeds S.W. with a bold outline but gradually diminishing height to the coast at Wilson Promontory from which it is continued almost visibly by the islands of Bass Strait to Portland Cape, and thence abruptly to the E. extremity of Van Diemen's Land. This range sends out numerous ramifications, chiefly N. and W. and covers an area estimated at 7000 sq. m. The W. range, called the Grampians, commences in Mount Zenn, lat. $36^{\circ} 52'$ lon. $143^{\circ} 50'$ and stretches S. for 54 m., with a breadth of 20 m., to its termination at Mount Sturgeon, which rises abruptly 1070 ft. above the level of the plain, in lat. $37^{\circ} 28'$. It forms three distinct masses or ridges—a N. E., and W. called respectively the Grampians proper, the Serra, and the Western or Victoria range—which have their common nucleus and culminating point near the centre in Mount William, the height of which above sea-level is 4500 ft. The other loftiest summits which occur in the N. are generally bare and rocky, but have some fine timber on their slopes. In the S. one of the most remarkable summits is Mount Albert, a few miles N.W. of Mount Sturgeon. It is 1700 ft. in perpendicular height, contains a crater 445 ft. in breadth, and 80 ft. in average depth, and is described by Sir Thomas Mitchell as rewarding the toil of its ascent with a scene of surpassing magnificence and sublimity. The Grampians and the Australian Alps, notwithstanding their position at opposite extremities of the colony, are visibly connected by these ramifications, so as to form parts of the same mountain-system, and these constitute a continuous water-shed, sending the whole drainage of the colony either N. to the Murray or S. to the ocean. It may be considered as a vast region of primary and transition formations, extending E. to W. for about 300 m., with breadths varying from 100 m. to 150 m. exhibiting numerous cones and extinct craters, apparently subvolcanic, and composed chiefly of metamorphic rocks of granite, slates, quartz gneiss, &c., overlain on their slopes by more recent second

ary and tertiary formations. Within this region lie all the gold-fields which have recently been discovered in Victoria, and have added so suddenly and extensively both to its wealth and population, making it the great centre of attraction for emigrants, not only from the United Kingdom but from various other quarters of the world. The rivers which descend from this water-shed are more numerous than important. In the rainy season they fill their channels, overflow their banks, and have all the appearance of magnificent streams, but as the summer advances they shrink rapidly in their dimensions, and ultimately for the most part, become either altogether dry, or leave only a chain of large and deep, but often unnecessary pools. By far the most important river is the Murray which, so abundantly and from the N. frontier and receives the whole of the drainage of the N. side of the water-shed. Though the magnitude of its volume is small in proportion to its length it would seem from recent trials that its navigable importance has hitherto been underrated and that, at least during the months when it attains its greatest height, it is capable of affording to the timber-travel communication by steam for many hundred miles. Its chief descent, however, comes to it from New South Wales, while Victoria sends it only a few comparatively paltry streams as the Mitta Mitta, and Owen toward the E. and the Gonullara Camp and the Loddon or Yarrowee towards the centre. On the S. side of the water-shed the principal streams are, proceeding from the E. the Snowy River or Margaleme, the Tambo Nicholson, Mitchell, Aron, Macalister and La Trobe which contribute to form a chain of lagoons, the Yarra Yarra, important from having on its banks the capital, Melbourne, to which it is navigable by vessels of 300 tons, and along with it the Mariburnong or Salt Water River Werthebe and Little River all falling into Port Phillip, the Moorabool and Harrow, at the entrance of Port Phillip, and the Glenelg which forms part of the W. boundary its mouth being variously situated on the map by the colonial surveyors, which has caused disputes as to government jurisdiction amongst the colonists. Mitchell places it 30 m. E. of the R. Australian frontier, while Yerra marks it almost on the meridian boundary within Victoria. The latter position is adopted in the government charts. The lakes are so numerous as to form one of the principal physical features of the interior. Few of them however, are fed by personal streams, and hence many which at one season cover large areas, dwindle away at another or become altogether dry. By far the largest, Lake Corangamite, attained 50 m. W. of Geelong, and at the common division of four counties, is of very irregular and serpentine form, about 90 m. in extent, and, though fed by several fresh-water streams is perfectly salt. Lake Colac about 8 m. E. of this, though only 19 m. in extent, is, however, the most important, from the fact of its being fresh and affording water to upwards of 200,000 sheep that feed in its vicinity. For pastoral purposes the colony is divided into five great grazing districts—Gipps Land and the Murray E. Wimmera, and Portland Bay or Geelong district W. and Western Port district between. The climate of Victoria, though liable to great and sudden fluctuations, is on the whole temperate and eminently salubrious, at least to the human frame, though catarrh and other diseases often commit great ravages among live stock particularly sheep. The worst disease in the climate is its hot winds, which commence in November and cease in July. The days however during which these winds prevail average annually not more than 20 and of these only a third are oppressively hot. At Port Phillip the maximum and minimum summer temperatures are respectively 90° and 48° the maximum and minimum winter-temperatures, 69° and 59° the annual mean is 61° nearly that of Naples. The annual fall of rain at Melbourne is about 27 inches, but this is very equally divided over the year, about a fifth of the whole falling in July. The agricultural capabilities of Victoria have been very partially tested, but there cannot be a doubt that though much of the soil is of light texture, it possesses great natural fertility and is capable of raising cereals of the best quality, and in quantity sufficient to maintain a large if not dense population. The vine also thrives well and both the ordinary and many of the finer fruits and vegetables of the N. temperate zone have already become acclimatized and abundant. The following table shows the acres under

crop, with the produce in the year ending March 31 1855—

Crop	Area	Value
Wheat	16,800	998,704
Oats	1	61
Barley	4712	6,831
Maize	1,000	10,000
Peas	1,000	4,000
Turnips	14,100	14,100
Green feed for cattle	401	401
Hay	—	21,000
Total number of acres in crop	36,004	—

In vineyards, the same year, there were 1072 acres, yielding 4500 gallons wine, and 500 gallons brandy. In the year ending December 31 1857, the live stock were 54,021 horses, 431,520 horned cattle, and 6,504,908 sheep. The largeness of the last item proves the vast progress which Victoria has made in the production of what was, previous to the gold discoveries, its only great staple. It now furnishes one-half of the whole wool imported into Great Britain. Its first export of wool took place in 1836, but the quantity probably trifling, is unknown. The following year (1837) it amounted to 275,000 lbs. valued at £14,000. In 1844 it amounted to 1,846 to 10,525,000 lbs. and in 1853 to 30,842,501 lbs. valued at £1,651,871. These results might of themselves establish the pre-eminence of Victoria as a field for emigration but they have recently been in a great measure eclipsed by her mineral treasures. The conformity of the geological structure of the mountain-ranges with that of the Urals, has led Murchison to predict, with confidence, that gold would be found among them, and rumours of its actual existence had repeatedly been spread, on grounds more or less authentic. Its discovery however and the promulgation of it as an ascertained fact, within the colony, dates only from 1851. Since then the number of its known localities have greatly increased and multitudes of diggers have been successfully at work, partly in the E. among the Australian Alps, where among other valuable diggings, notice is due to those on the banks of Lake Ouse, at Mount Gibson near the source of the Mitta Mitta, and on the banks of the Ovens; but chiefly in the W. among the E. ramifications of the Grampians, from 50 m to 100 m N W of Melbourne. By far the largest continuous field yet explored is that which has Mount Alex. under for its centre, and occupies an extensive area between the sources and along the banks of the Campaspe and Loddon. Besides these the diggings which have hitherto acquired most notoriety are those of Ballarat, at the source of the Yarrowee or Lee, 45 m. N N W Geelong, and those of Mount French among the ranges of the Pyrenees, at the source of the Avoca but there are doubtless many others of equal value only remaining to be brought to light. In July 1854, the number of gold-fields in course of being worked was 10, extending over no less than 5° lon. The quantity of gold which passes by private hands, and of which no public return can be made makes it difficult to form even an approximate estimate of the gross produce. The total quantity of gold obtained within Victoria up to the end of 1853 has been estimated at 4,591,000 oz., which at £3. 15s. 6d. per oz., gives a value of £18,941,250. The quantity exported in the same year was 4,568,043 oz., valued at £18,966,407. In 1853 the ascertained and estimated quantity exported was 3,000,243 oz. which valued at £3. 15s. 6d. per oz., the current rate of the colony, gives £12,284,110 or upwards of £30,500,000 as the produce of about 2½ years. The following table gives a detailed account of the gold export on the customs list for that year—

Exported	Ounces	Value
To London	1,718,316	\$5,449,498
Liverpool	418,968	1,296,712
Birmingham	308,000	957,600
Glasgow	460	1,380
Sydney	98,823	298,275
Calcutta	3,892	14,468
Bombay	41,708	125,168
Ceylon	38,710	121,638
New York	10,400	30,775
China	6,400	19,120
Hong Kong	61	183
Total	2,677,723	\$8,786,448

The immense addition thus suddenly made to the wealth of the colony has necessarily produced a complete revolution in its circumstances. The necessity of entering into detail on this subject is saved by the following table, which exhibits a summary of the most remarkable changes—

COMPARATIVE SUMMARY 1850-1855.

	1850.	1851.	1852.	1853.
Revenue general	194,000	180,706	518,284	1,063,000
Revenue, railways	134,768	199,810	750,807	1,543,828
Total revenue	328,768	380,516	1,269,091	2,606,828
Imports	744,900	1,064,407	2,062,096	11,267,087
Exports	1,041,708	1,428,007	7,481,248	11,081,541
Shipping	885	679	1,527	—
Imports	108,083	186,611	408,818	—
Bank deposits, 4th quart.	—	632,234	4,834,841	6,839,897
Circulation, do.	—	180,000	1,397,111	1,919,000
Coin and gold, do.	—	810,796	2,054,136	4,533,000

Valuation of Melbourne	164,000	374,728	688,000	—
Greatest value	78,000	95,000	800,000	823,000
Population 31st Dec.	—	—	—	—

It ought to be observed that gold is not the only source of mineral wealth possessed by Victoria. The copper found so abundantly in N. Australia, doubtless exists here also, in ironstone, granite, and sandstone are already worked in quarries apparently inexhaustible and an extensive field of coal has been traced along the coast, though no mine has yet been opened in it. The want of proper means of communication has been much felt, but three railways, which will bring the principal diggings into connection with Melbourne, Geelong, and Hobson's Bay, are (1854) in course of construction, and efforts are being made to establish a system of telegraphs. With all these sources of prosperity, a splendid future, an doubtless awaits this comparatively infant colony provided the eager pursuit of wealth does not so completely absorb the public mind as to produce an indifference to the most important elements of social greatness. The present population is perhaps the most heterogeneous that was ever taxed into a body politic, and the great danger is that the rising generation, instead of improving upon the present, may, from the neglect of proper education become still more degenerate. In relation to this subject, the statistics of the following tables of schools and churches are full of interest—

Description	No of scholars	No. of teachers	Aid from Government	Average Paid from Melbourne	Total
Dissemination	88	6,886	7,169 17 4	4,402 3 2	11,571 0 6
National	8	833	616 0 0	829 16 6	1,445 0 0
Private	17	573	—	—	—
Total	113	7,811	7,785 17 4	5,231 16 6	13,016 0 6

Description	No of Churches	No. of Persons they are estimated to contain	No. actually attending
Church of England	18	3,180	8,980
Presbyterian Church	7	1,000	1,000
Methodist Church	17	1,970	4,500
Independent Church	8	1,110	1,110
Baptists	3	400	400
Roman Catholics	—	6	2,841
Jews Synagogue	1	80	100
Total	49	10,000	14,830

For administrative purposes the squabbling districts of Upper Land, Western Port, and Portland Bay are divided into 34 counties, of which that of Bourke contains the capital Melbourne. The government, similar to that of the other Australian colonies, consists of a governor, an executive council and a legislative assembly, of which a third is nominated by the Crown and two-thirds are chosen by qualified electors. Port Phillip was first discovered in 1802, and became the general name of the whole colony which after it had been partially settled by emigrants, chiefly from Van Diemen's Land, was formally recognised in 1850, when the first sale of crown-lands took place. It formed the N. division of New South Wales till 1851, when it was separated into a separate colony and, in honour of her present Majesty, assumed its new name. The rapid progress of Victoria in its material

prosperity is unparalleled in the annals of British colonization. Without government aid, it was at first planted by a few private individuals and, nursed by their industrious energies it grew apace, until its financial up was extricated so much by the parent colony, that its growth was being blasted, while at the time of the New South Wales gold discovery its existence was threatened. But its indigenous resources yielded their fruits to the enterprising colonists, and in spite of misgovernment and local jealousies, it has become the most flourishing shoot from the parent stem in the British colonial empire. (*See Supp.*)

VICTORIA—1, A large river Australia, N W coast. (*See AUSTRALIA* *sup.*) 2, A large river, N Australia, discovered in 1848 by Sir T. L. Mitchell, who crossed it in lat. 24° 14' S.; lon. 144° 34' E.—3, (*or Alexander's*), A lake, S. Australia, 45 m. S.E. Adelaide. It is an expansion and may be called the embouchure of the Murray River. It is about 20 m. in extent N to S., and including a reach on the S.E. called Lake Albert, connected by a narrow strait, about 33 m. N.W. to S.E. In shores on the E and S. are undulating and present a few bold headlands, but on the N and W they are low. It contains several islands and is navigable, but the entrance to it by a narrow strait from the sea, at Encounter Bay is obstructed by a sandbar.

VICTORIA A tin China, N side, Isl. Hong-Kong built by the British settlers. It is mostly of stone and brick, and extends nearly 8 m. along the shore of the magnificent bay of Victoria (which affords excellent anchorage), occupying all the land between the water and the hills wherever the activity is not too steep. The principal edifices are the school of the Morrison Education Society the hospital of the Medical Missionary Society, the Hospital and Military hospitals, the chapel and school of the London Missionary Society the government-house, the magistracy and the ordnance and engineering departments, the exchange, and the club-house, the latter a very handsome structure, was opened in May 1847. A substantial and commodious courthouse, public offices, and a colonial church have also been erected. The houses of the merchants are large and elegant, with fine gardens attached. Pop. (1848) 14,000.

VICTORIA, CAMBODGE or CAMBODIA, a harbour at the S.E. extremity of Vancouver's Island, lat. 48° 24' 46" N. lon. 123° 23' 25" W. Though not the best, it is the most important harbour in the western coast. The Hudson Bay Company's settlement, Victoria, with the fort of that name, consisting of a square inclosure with octagonal bastions, is in the immediate vicinity.

VICTORIA, or CONQUISTA, a tn. Brazil, prov. Bahia, 80 m. S.E. Urubiti with a church, a primary school and a considerable trade in cotton and cattle sent to Bahia. It suffers from the aggressions of the wild Indians, who live in the recesses of the forests.

VICTORIA (La) a vi. Canaries N side, la. Tenerife with a church, manufacture of linen, and a trade in fruit and wine. Pop. 1879.

VICTORIA LAND, or S. Victoria. *See* ARCTIC OCEAN.

VICTORIA LAND, an insular tract, British N America, N of lat. 66° N., and extending from about lon. 103° to 110° W. It is separated from the N American continent on the E. by Dease Strait, and from Boothia-Fells on the E. by Victoria Strait. It was discovered and named by Simpson and explored by Dr Rae in 1851.

VICTORIA (Santa), a vi. and com. Italy, Piedmont, div. Cune, prov. Alba with an ancient castle and three rural churches. Pop. 1085.

VICTORIA STRAIT, a broad sea-arm, Arctic regions, separating Victoria-Land, and Prince of Wales Land, on the W from Boothia-Fells and N Somerset on the E. It communicates N by Cunnemy Inlet with Barrow's Strait, W of the entrance to Wellington Channel.

VID or URAR (*anc. Atax*) a river, Turkey in Europe, rises in the N side of the Balkan, in the S.W. extremity of Bulgaria, flows circuitously N.E. between and nearly parallel to the Lakes and Cene, and after a course of 180 m., joins r. bank Danube opposite to Island, about 10 m. above Nikolopol.

VID (Wisse) a vi. Hungary co. Eitengah, on the road from Buda to Fünfkirchen, with a church, and a trade in corn. Pop. 1029.

VIDARCA a river Spain. *See* BRASCO.

VIDAUBAN (*anc. Viza Alescorum*), a tn. France, dep. Yve 2 m. S.W. Dragnignan, L. bank Argens. It suffered much during the religious wars. In the neighbourhood the Argens forms a magnificent cascade. Pop. 1512.

VIDIGUEIRA a tn. and par. Portugal, prov. Alentejo, 28 m. S. by E. Evora. Pop. 2390.

VIDIGULEO a vi. and com. Italy Lombardy prov. and 7 m. N. Pavia, on the Lambro with a trade in corn and cattle. Pop. 1481.

VIDOMIAK or WEDMERKACH a vi. Austria, Transylvania, 4 m. from Krusztal, on a stream of same name; with two churches. Pop. 1100.

VIDOURELLE, a river France, rises near St. Hippolyte, in the W of dep. Gard flows S.E. and after a course of 50 m. divides into two branches the one of which joins the canal of Radelle, while the other falls into the lagoon of Marguio.

VIDE, two rivers, France. The one rises in N.E. of dep. Orne flows N.W. and joins r. bank Dives; total course, 53 m. The other rises in dep. Vendée, a little S. of Bellefleur flows W.S.W. and falls into the Atlantic at St. Gilles total course, 88 m. of which 6 m. are navigable at high-water.

VIECHTACH (two places) Bavaria—1, (*Unter*), A market in Lower Bavaria on the Black Regen, 42 m. N.W. Passau with three churches an ordinary manufactures of linen and tobacco, a mill dye-works and several breweries. Pop. 1489.—2, (*Ober*), A market in Upper Palatinat, 34 m. N.E. Amberg with a church and two chapels, and a trade in flax. Pop. 1245.

VIELSÄLM a vi. and com. Belgium prov. Luxembourg on the Salm, about 39 m. N. Arlon, with slate and whetstone quarries, two tanneries, and four flour-mills. Pop. 8033.

VIENNA (German, *Wien*, Latin, *Vindobona* or *Vienus*, French *Vienne*, Dutch, *Wien*, Wends), one of the principal cities of Europe, and capital of the Austrian Empire, about 2 m. from the main stream of the Danube, but traversed partly by an arm or branch which bears the name of the Viennese Danube, serving the purpose of a canal, and is crossed by five bridges, and partly by an insignificant stream, called the *Wien* or *Wenna*, which empties itself into the arm of the river. The site is 480 ft. above sea-level, lat. 48° 12' 32" N. lon. 16° 23' E., 390 m. W.N.W. Milan, 137 m. N.W. Puth, 240 m. S.E. Berlin 350 m. S.E.E. Frankfurt-on-the-Main, and 600 m. E. by R. Paris. Lake Fera, Vienna stands near the centre of a tertiary basin rich in fossil shells, but of less extent, as the secondary and transition rocks form conspicuous mountain boundaries to the K.W., W. and S., at average distances of 10 m. and 12 m. With exception of

THE HOFBURG PALACE, VIENNA.—From Batty's German Gallery

two suburbs, the whole of the buildings are on the r. bank of this branch of the Danube, rising from it in terraces, which give a considerable facility to many of the streets.

Vienna consists of the town proper, or *Innere-Stadt*, and of 24 suburbs. Its whole circuit, traced for the far greater part

by walls, or as they are called, lines, 19 ft. in height, provided with a ditch and 12 gates or barriers, is about 1.6 mi. The Inner-Stadt, the central nucleus of the town, forms a kind of circle near its centre, and except on the N.E. side, where it crosses the river as surrounded by ramparts from 30 ft. to

elegant streets in the suburbs, particularly in those of Schottenfeld and Neudorf on the W., Mariahilf on the S.W., and Leopoldstadt and Alserdorf on the N.E. In the last in particular, the street of same name, with its Frobergstrasse, forming the great thoroughfare to the Prater, in one of the most showy and animated in Vienna. The dwellings are usually from four to five stories high, and of very large dimensions, soon peopled in date by a number of families, who obtain access by a common stair.

50 ft. high flanked with 11 regular bastions, and lined by a deep fosse, and is separated from the suburbs, partly by the river, but to a much greater extent by a glacis or esplanade about 600 yards wide, furnishing ample space for relaxation in the localities where it is of most importance to possess it. The Inner-Stadt does not cover a tenth of the whole space occupied by the city, but being more closely built than the suburbs, contains more than a seventh of the whole population. It is entered by 12 gates, is divided into four quarters and consists of 127 streets, generally narrow but well paved with granite, and kept clean by a very complete system of subterranean drainage, and of 20 squares, of which the largest is the Hof 430 ft. long by 230 ft. broad. The others most deserving of notice are the Hofmarkt, the Josephplatz, the Burgplatz, the Neumarkt, and the Stephansplatz, all situated within the inner town, which is the court-end and centre of gaiety and fashion. This marks the social aspect of Vienna from all the other great cities of Europe, especially in Britain. In London the nobility shun the confined, old-fashioned streets of the city here, although there is no pretence, may be seen at all times of the day ladies of the highest order, and princely nobles, walking along the streets of the Inner-Stadt. In the inner town also, and nearly in the very heart of it, is the Graben, which is sometimes considered as a square but is more properly a street, 540 ft. long, by 160 ft. broad with a number of narrow outlets from it. It is in the line of the greatest thoroughfare, and contains a number of the finest shops. The other principal streets in the inner town are the Herrengasse and Wallnergasse, where the finest mansions of the nobility are situated, the Kohlmarkt and the Bismarckplatz, situated by the Kärntnerstrasse on the S., and terminated by the Rochenstrasse on the N. There are also many

atmosphere is remarkably pure and balmy and the inhabitants enjoy robust health, without being much attacked with colds, pulmonary affections, and the like, while epidemic diseases pass over the city lightly. Few cities are better provided with the means of relaxation in the open air. The broad glass encircling the inner town has been already mentioned, the Argentinian in the W. and the Belvedere gardens in the E. are equally commodious, but they are all eclipsed by the Prater in the N.E., about 4 m. long, by 3 m. broad, situated between two arms of the Danube, and so beautifully planted, laid out, and otherwise decorated, that it is regarded as the finest public park in Europe. The British traveller is struck with the resemblance of the Viennese to his own country men and women who inhabit large towns, and, on inquiry he finds that there is an affinity by descent between the Austro-Saxon and the Anglo-Saxon races.

Churches.—The first in order is the *Dona-Kirche* or the cathedral of St. Stephen, a lofty, cruciform, Gothic structure, 350 ft. long, 235 ft. broad, and 90 ft. high. It stands in the centre of Stephansplatz, and is built of large blocks of heavy limestone. The W. facade, 110 ft. high adorned with rich tracery and sculpture, and flanked by two crenellated towers, called *Hildenshtürme*, contains the principal entrance, a gigantic portal (*Rosenstock*) with beautiful specimens of Gothic ornament. From the centre of the S. facade rises a magnificent tower, diminishing gradually from its base in regularly retreating arches and buttresses, till it terminates at a point 465 ft. in height, the loftiest in Europe, with the exception perhaps of Strasburg. Its top is reached by a stone-stair of 565 steps, another of wood of 200 steps, and several ladders, and within it is a great ball of nearly 18 tons weight, cast of cannon taken from the Turks in 1711. Besides the

tower there is a dome, the outside of which is covered with several remarkable statues, carvings, and sculptures. The interior, supported by 15 pillars, remarkable for their size and the number of these statues is somewhat gloomy but very imposing, has some beautiful specimens of ancient painted glass, a superb pulpit, a finely sculptured and carved chancel, 80 marble-altars, and various monuments, of which that of the Emperor Frederick IV. with a Pegasus by Sandrart placed over it, is the most gorgeous, and that of the celebrated Prince Eugene the most interesting. Near the Josephplatz is the court parish church (*Hofgärtner-Kirche*) of the Augustines, a finely proportioned edifice, founded by Frederick the Fair in 1586, in fulfilment of a vow made during his imprisonment in the castle of Trevisia, and containing a beautiful monument to the Archduchess Christina by Canova. The Capuchin church is remarkable only as containing the Imperial burying-place the Bernabini or St. Michael's church, for being the most ancient in the city; the church of St. Peter for its not very successful imitation of St. Peter's at Rome, some curious leaden statues and frescoes and the church of St. Laurence, for its excellent organ and its fine music. Of numerous other churches, notice is due only to the castle-chapel, where the mass of the great commanders is regularly performed in the best style, the Scotch church, originally built in 1155 for Scotch Benedictines, though it has long ceased to have anything Scotch about it, the church of Maria Theresia, a handsome structure, with fine painted glass and an elegant tower about 185 ft. high, St. Charles church surmounted by a dome, and so called after Charles Borromeo, whose life is by an odd conceit exhibited in bas-reliefs on two immense isolated pillars, above 40 ft. in height and 15 ft. in diameter and the university-church, with 16 richly decorated marble-columns and a number of fine frescoes. The Lutheran church the requested monastery of St. Theresa, has an excellent organ and the Calvinists or members of the Helvetic Confession, have a handsome church after designs by Hagedorn. The Jews have three synagogues, one of them with a magnificent interior.

Palaces and Government or Municipal Edifices.—The Imperial palace (*Kaiserliche-Burg*), on the S.W. side of the inner town, near the glacis, is an ancient and irregular structure of little merit, consisting of three courts or quadrangles, one in the centre called the Burgplatz, another on the E. side called the Amalienhof, and a third on the W. side called the Schweizerhof. The apartments of the imperial family are in the last. Immediately adjoining and on the bastion is the palace of the Archduke Charles, a splendid structure by Fischer & Erlach. The other principal palaces are the Belvedere consisting of two buildings one at the foot and another at the summit of a gentle eminence with a fine garden between and built by Prince Eugene, who spent the latter years of his life in it, the palace of the Prince of Liechtenstein, conspicuous both by its architecture and its enormous extent the palace of Count Schönborn-Buchheim, Prince Schwarzenberg, Prince Esterházy, &c. The principal government-buildings are the hotels of the ministry the majestic structure in which the states of Lower Austria sit, the townhouse, the national bank, the mint, the Imperial and the civil arsenal, both with collections of ancient armour and the former with 150 000 stand of arms.

Educational Establishments and Libraries.—Among the former the first place is due to the university founded in 1277, but re-organised by Maria Theresa under the direction of Vis Brixia. It occupies a large isolated building in the form of a parallelogram, with a double opening upon a public square, and adorned with two fountains. Its professors, about 75 in number, are all paid by government, and the average attendance of students, the largest in Europe, is nearly 5200. In immediate connection with it are an admirable botanical garden, and several valuable collections. The Josephinum a medico-surgical academy for army-purposes, has a very extensive series of anatomical preparations in wax. The polytechnic institute, occupying a handsome structure facing the glacis, instructs 500 pupils in the arts and practical sciences, as well as trade and manufactures. The normal school, established by Maria Theresa, has the honour of having originated that most important class of institutions, and recently accomplished their utility almost half a century before they were thought of in Great Britain. Other important

educational establishments are the *Benedictinum* or R. Catholic institute, in which the greater part of the best educated priests of the empire finish their education. A Hungarian theological institute or *Parsonage*, a similar Protestant institute, the *Theologicalum*, specially intended for the education of young nobility; the academy of Oriental languages, to qualify for diplomatic appointments in the East, the military geographical institute, three gymnasia, attended by 1550 scholars 14 schools of design, an agricultural and veterinary and a riding school, 29 Volk or common 7 high, and 16 girls schools, at which the average attendance amounts in all to at least 50 000. The Imperial library occupying a handsome edifice which forms one side of Josephplatz, and immediately adjoins the Imperial palace, is one of the largest and most valuable in Europe, containing 806 000 printed volumes, and 16,000 MSS. many of the latter either unique or of extreme rarity. Annexed to the library is an almost unrivalled collection of engravings, originally commenced by Prince Eugene, and now containing 300 000 of the finest prints. The university library has 180 000 volumes, that of the *Theresianum* 80 000 and that of military archives 24,000. Besides these are several valuable private libraries, to which access can easily be had, among others the emperor's private library of 60 000 volumes the *Archiducal Library* 40 000 of Prince Liechtenstein, 50 000, of Prince Schwarzenberg, 40,000; of Prince Esterházy, 30 000, and of Count Schönborn-Buchheim, 20,000.

Museums, Picture-Galleries and other Collections.—The museum of natural history adjoining the Imperial library has one of the largest herbariums in existence, and is particularly rich in ornithology. The cabinet of minerals consists of five divisions—mineralogy geognosy fossilis acroliths, and pictures in mosaic—all excellent and some unrivalled. The cabinet of antiquities contains about 80 000 coins and medals, 12 000 Greek vases, several polished armours and integuments, and an enormous cary, 284 inches in diameter, which formed part of the dowry of Mary of Burgundy, wife of the Emperor Maximilian. The Schatzkammer or treasury contains the Imperial jewels, and among other remarkable curiosities the regalia of Charlemagne, taken out of his grave at Aix-la-Chapelle. The cabinet of Egyptian antiquities is particularly rich in mummies, and the collection of Ambras, so called from a castle in the Tyrol where it was commenced includes a remarkable assemblage of ancient and modern armour, together with a series of antique sculptures, and a museum of natural objects and works of art. Among the latter is the celebrated salt cellar made by Benvenuto Cellini for Francis I. The imperial picture-gallery, in the Upper Belvedere contains about 1200 pictures, among which are excellent specimens of almost all the different schools of painting. The other principal galleries are those of Prince Esterházy Prince Liechtenstein, Count Czernin and Count Schönborn-Buchheim. The sculpture-gallery owes its chief attractions to modern artists, Canova, Thorwaldsen, &c.

Asylums, Correctional, and Charitable Establishments.—These are very numerous, and include a general hospital (*Allgemeine-Krankenhaus*), an enormous pile composed of seven quadrangles containing 2000 beds and annually receiving 16 000 patients connected with it a general lying-in and foundling hospital greatly needed in a city in which according to the statistics of 1849 above one-half of the births are illegitimate, a lunatic asylum, recently completed on a new plan and regarded as a model of its class, a humane society for the recovery of persons only apparently dead by drowning or otherwise, a deaf and dumb institute, a Jewish and various other hospitals particularly those of the Brothers and Sisters of Charity, a large widespread penitentiary and house of correction for the province and an Imperial penitentiary and workhouse a blind asylum, an orphan hospital and various establishments of a similar description; a savings' bank, a *monde-petit*, a society for the relief of widows and orphans, and numerous almshouses and charitable foundations, both public and private.

Societies and similar Assemblies.—The most important are the Vienna academy of sciences, the geological institute of the Austrian Empire the Imperial geographical society, the polytechnic institute or society of arts, with a valuable collection of implements, models, and designs, the academy of the fine arts, including four schools—one for painters and sculptors, another for architecture, a third for engravers, and a

length for manufacturing designs; the imperial agricultural society, the philharmonic society of the Austrian Empire, and the conservatory of music, and various other musical associations.

Public Monuments.—There are neither numerous nor very remarkable. Among the finest are the equestrian and colossal statue of Joseph II., by Kanner in the Josephstadt, the handsome monument of the late emperor Francis I., by Marchetti in the Burgplatz; and above all the marble statue of Theresa, executed by Canova, and set up in the temple of Theresa in the Volksgarten.

Amusements.—Of these the citizens of Vienna are extravagantly fond, and the few that have been created has not failed to call forth a corresponding supply. In all quarters gardens, coffee, and similar establishments, are open, where excellent music, much harmless and not a little vicious pleasure are easily obtained. The more systematic establishments for amusement are an opera-house, where operas and ballets are performed in a style not surpassed elsewhere, and four theatres, one called the Hof or Burg theatre, attached to the palace, and appropriated to the regular drama, another, the Vienna theatre, the largest and handsomest in the city and celebrated for melodramas and spectacles the third, in the Josephstadt, of an interior of description, and the fourth, in the Leopoldstadt, which is the favourite resort of the middle and lower classes, and furnishes, in the humour and rather coarse jokes of the pieces performed, an accurate idea of the popular taste and character.

Some of the most attractive objects belonging properly to Vienna are not within the town, but at a short distance from it, in the environs. The most celebrated of these is Bobolice, about 3 m. distant, and the summer-residence of the emperor. The fine gardens are the great holiday-resort of the citizens. Other places which share with it in this respect are Hitzing, with its scenic beauty; with its Tivoli, Laxenburg, with its palace and its fine avenue connecting it with Schimberg, and Baden with its romantic valleys. The latter are placed at some distance but with other places still more distant, have been rendered easily accessible by the completion of two railways—the one on the N called the Kaiser-Ferdinand Nordbahn and the other on the S. called the Gloggnitzer and Brucknerbahn.

Manufactures and Trade.—Vienna is unquestionably the first manufacturing town in the empire. The most important articles are cotton and silk goods, particularly shawls, military shoes, and other articles in leather, porcelain, made chiefly at the government-factory and distinguished equally by the fineness of the ware the beauty of its designs, and brilliancy of its colours sword-cutlery firearms, and cannon, the latter made chiefly at the government-foundry tobacco, a government monopoly macaroni-pipes, and musical and optical instruments, cutlery hardware, white-lead, bronzes and other metallic goods paper liquors, chemical products, watches, and jewelry. In the arts of letter-press and lithographic printing and in the adaptation of the electrotype process to printing the imperial office has produced specimens not surpassed anywhere. The trade, notwithstanding the disadvantages of an inland position is also very extensive, Vienna being a central depot not only for its own provinces N. of the Alps, but for the traffic between the E. and the W. of Europe. The number of wealthy mercantile houses, many of them in the hands of Greeks, is great, and money transactions to a very large amount are carried on. The national bank, established during the Seven Years war and well managed, has contributed greatly to the commercial prosperity, and its shares bear a high premium.

Bathery.—Vienna appears to have been a Roman station in the 1st century and to have borne the name of Fabiana. It was afterwards included in Upper Pannonia, and received the name of Vinthodum. On the decline of the Roman Empire it experienced the common fate, and was pillaged by the Goths and Huns. It afterwards formed part of the empire of Charlemagne who created it into a bishopric, and contributed much to its prosperity. Under him it became the capital of a margraviate, and the surrounding territory received the name of Austria, or Oster-reich, the Eastern kingdom. Its first margraves were princes of the Babenberg family who afterwards changed their title to that of Dukes, and continued to rule till the 13th century when the line became extinct. Vienna then came into the possession of Ottokar of Bohemia.

By him it was greatly increased in extent, and improved in appearance but in consequence of his refusal to acknowledge the election of the emperor Rudolph, was subjected to a six weeks siege. Not long after it passed, with Austria itself, to the house of Hapsburg. In 1484, Matthias, king of Hungary, gained possession of it, after a siege, and made it the seat of his court. Under the emperor Maximilian I. it became the capital, and has ever since been the habitual residence of the head of the Austrian family. Under Ferdinand I. a host of Turks mustering 120,000 men, and 500 places of cannon, appeared before the walls, burned the suburbs, and battered down a great part of the city, but the defense, though conducted by only 15,000 regular troops, and 4000 citizens, was so valiant that the Turks were forced to retire. Before the disasters which they had caused were repaired, the plague visited the city in 1679, and carried off 120,000 persons in 11 months. In 1685 the Turks re-appeared, with a still more formidable host than before, headed by the grand-vizier Kara-Mustapha. The defense was most valiantly conducted for two months by Count Radiger, of Starhemberg, but had become almost hopeless, when the celebrated John Sobieski suddenly appeared with his Poles, and the Turkish host was almost annihilated. A long period of rest and prosperity followed, and though interrupted by the wars of the French revolution an inundation of the Danube in 1830, the fearful ravages of the cholera in 1832 and the commotions of 1848, Vienna has grown up to be one of the great capitals of Europe; and having recently become the centre of a great railway system promises to advance still more rapidly than it has ever done before. Pop. (1846), 407,980 (1864) 560,000.

VIENNA, a vil., U. States, New York, about 170 m W Albany at the outlet of Champlain Lake, and on the Auburn and Rochester railway with three churches, a female seminary four plaster and saw mills, distilleries, manufacturers of edge tools, &c. Pop. 1800.

VIENNA a tn. Upper Canada, on Otter Creek so and 42 m S.E. London. An improving fast, has three Protestant churches, several schools, and a large trade in lumber with manufacturers of cloth iron leather, chairs, &c. several grist and saw mills, a distillery and a brewery. Pop. 1400.

VIENNE a dep. France bounded N. by dep. Maine-et-Loire and Indre-et-Loire, E. Indre, S. Haute-Vienne and Charente, and W. Deux-Sèvres greatest length N.W. to S.E., 78 m. breadth 53 m. area, 3574 sq. m. The principal river, Charente abundant in the woods, and forms an important resource to the poorer inhabitants. Iron is abundant and there are excellent quarries of marble, granite, millstones, whetstones, lithographic stones, and limestone. The manufactures consist of serge, coarse woollen stuffs, covers, common lace, cutlery, millinery and starch. There are also numerous bleachfields, tanneries, paper mills, blast furnaces, and other iron-works. The cap. of the dep. is Poitiers. Pop. (1831), 217,865.

VIENNE (anc. Vienna Allobrogum) a tn. France, dep. Isère, at the foot of an amphitheatre 1½ h. back above, here crossed by a suspension-bridge leading to the suburb of St. Colomb, 40 m. W N.W. Grenoble. It is a very ancient place, and very indifferently built, having only a few small squares, and narrow, dark, steep and winding streets. The principal edifices are the cathedral, with a W front flanked by two towers, and decorated with numerous but tasteless flamboyant ornaments; the church and cloister of the ancient abbey of St. André-le-Bas, with a fine Romanesque tower; the museum; public library of 10,000 vols the college, a handsome structure, once belonging to the Jesuits; the infirmary, hospital, and work-house. The manufactures are woollens, common laces, green soap, and chemical products. There are also silk-mills, dye-works, tanneries, glass-works,

paper-mills, copper and lead furnaces, iron-mills, and blast-furnaces. The trade, which is important, is in wine, woollen cloth, iron, steel, copper lead, and zinc. Vienne contains

VIENNE.—A half view, looking down the Rhone river.

numerous Roman remains. It is one of the first towns of France into which Christianity was introduced, and makes a considerable figure in ecclesiastical history. Pop. 18,818.

VIENNE (HAUTE) [UTTER VIKEN] a dep. France, bounded N. by depts. Vienne and Indre, E. Creuse S. Corrèze and Dordogne, and W. Charente, greatest length, N. to S., 86 m. average breadth 50 m. area, 2118 sq. m. The surface is covered by numerous hills and mountains, which are highest in the E. and slope gradually to W. At first they are almost destitute of vegetation, but as they descend begin to be covered with brush and pine, and later exhibit extensive forests in which a prominent place is occupied by the chestnut. The unassuming point, Mont Jargeau, 2118 ft., separates the basin of the Loire, to which almost the whole dep. belongs from those of the Charente and Dordogne. The principal rivers are the Vienne, Gartempe, Brance, and Taurion. The climate is cold moist, and variable and hence Limoges, though 5° farther S. than Poitiers, has its mean temperature lower. The arable land is much less than one-half of the whole one-sixth is absolutely waste. Little of the soil being adapted for wheat, the principal crops are buck-wheat, rye, maize, and peas. On the mountain pastures many horses, mules and swine of superior breeds, are reared. A considerable quantity of millstone is produced. The minerals include iron, copper ore, lead, anthracite coal, and an excellent seam of kaolin which is largely employed in the porcelain-works in the neighbourhood of Paris. The principal manufactures are porcelain, common woollen and other tissues paper and leather. There are also many glass-works, blast-furnaces steel and other iron works. Limoges is the capital. Pop. (1882), 219,870.

VIENNE (L.) [anc. Vienne] a river France, which gives its name to two depts. rises on the plateau of Millevache dep. Corrèze, flows W. across Haute-Vienne, passing Limoges, enters dep. Charente, turns first almost due N., then N.W. and joins the bank Loire at Candou. Its principal affluents are, on the right, the Thorton, Isore, and Creuse and on the left, the Combrade, Grande-Brance, Valre, and Clain. Of its course of 220 m., 60 m., beginning at Châtelleraul, are navigable.

VIENNOIS, an ancient dist. France, which belonged to former prov. Dauphiné, and had Vienne for its cap. It is now included in depts. Drôme and Isère.

VIEQUE, one of the Virgin isls. See BRUNCE.

VIERLANDE, the common name applied to a small territory in the N. of Germany comprising the four villages of Altenburg, Curslack, Kirch-Wirder and Neuenburg, belonging jointly to the towns Hamburg and Lübeck, and situated between the Elbe and the Havel. It is protected from the Elbe by dikes. It is remarkably fertile and the inhabitants, who are distinguished alike by the peculiarity of their dress and their language, are mostly engaged in agriculture and cattle-

raising, and in raising vegetables, flowers, and fruits, including immense quantities of strawberries, for the markets of Hamburg and Altona. Pop. 8500.

VIERLINGSBEEK, a vil. Holland prov. N. Brabant, 20 m. E.S.E. Hertogenbosch, near L. bank Maas, with a church, synagogue, school and new townhall. Pop. (agricultural), 808.

VIERNEBIM a vil. Hesse-Darmstadt, princely. Steckenberg 8 m. S.W. Hoppesheim, on a forest of the same name with a church. Pop. 1493.

VIERRADEN a tn. Prussia prov. Brandenburg, gov. Potsdam, 24 m. S.W. Stettin with two churches, and manufactures of tobacco. Pop. 1611.

VILMANSTRAND, or **VILMANSTRAND** a tn. Russia, Finland, on a tongue of land in the S. of Lake Saima, 103 m. N W St. Petersburg. It is walked on the land-side, and defended towards the sea by palisades and has two churches, a school hospital and several windmills. In 1741 a bloody battle was fought here between the Swedes and Russians. Pop. exclusive of garrison only 600

VILNA, or **WILNA**, a gov. Russia, forming part of nos. Lithuania, and bounded, N by Courland, E. by Minsk, S. by Grodno, and W. Poland, Prussia, and the Baltic, greatest length, 270 m.; central breadth, about 110 m. Area, 15,225 sq. m. The surface is generally flat, the hills nowhere exceeding 300 ft. and has as yet been only partially cleared of its primeval forests. Much of it is occupied by moors and meadows, and the soil is generally sandy. The drainage belongs wholly to the basin of the Baltic, which receives it chiefly by the Niemen or Memel, and tributaries the Vilia and Dubissa. The climate is characterized by short but severe winters, wet springs and harvests, and warm sultry summers. In good years the grain raised leaves a surplus for export. Good

crops of hemp and flax are grown. Fruit is scarce, and of bad quality, and hops are seen only in gardens. The forests, though extensive, do not furnish much good timber. The principal mineral is iron-ore. Some amber is found on the coast. Both manufactures and trade are very limited. P 886,000.

VILNA, or **WILNA**, a tn. Russia, imp. above gov., on several hills above the Vilsa, at the confluence of the Vilsa, 415 m. S W St. Petersburg. It consists of a walled city and two large suburbs, generally with old wooden houses huddled together in dark and narrow streets. The principal objects of interest are the cathedral and several other churches, particularly a marble chapel originally belonging to a now ruinous castle; a Mahometan mosque for the use of the Tartar inhabitants; a synagogue, lyceum, theological seminary, medical academy, observatory townhouse, finely situated on a

VIMEIRO, a vil and par Portugal, prov. Estremadura, 45 m. S S W Larcia, in a valley watered by the Macoris, and rendered memorable by the victory gained by the British and Portuguese over the French. Pop 460.

VIMERCATE, a tn and com. Italy Lombardy prov and 14 m. N E Milan, r. bank Melgore. It has a beautiful parish church, a gymnasium, and several other schools, an hospital, a paper-mill, and a trade in corn, wine, and silk. Pop. 8448.

VIMILERO, two places, Portugal; the one, prov. Alentejo, about 3 m. from Braga, pop. 1700, and the other, prov. Alentejo 11 m. W \ W Estremosa pop. 1260.

VIMINES a vil and com. France, dep. Savoie, 3 m. S W Chambéry with quarries of marble and gypsum. Pop 1866

VIMIOSO a tn Portugal prov. Trás-os-Montes, 18 m. S E Braganza, near the Spanish frontier. P 1006

VIMMERBY, a tn Sweden, 18 m. and 78 m. N N W Kalmar near the Stang or Stör. It stands among romantic scenery but is old and unimportant. In its vicinity are the battle of Sotra-Bu. Pop 1343

VIMODRONE, or **Vico-Mondrone**, a vil and com. Italy, Lombardy prov and 6 m. from Milan on the canal of Martesana; with fine villas belonging to the inhabitants of Milan, an ancient parish church, and a trade in wine and dairy produce. Pop 1160

VIMOUTIERS (anc. *Alban Monasterium*) a tn France, dep. Orne, in a well wooded but marshy valley on the Vie, 86 m. N Alençon, with a court of commerce important manufactures of a kind of white linen called *cravattes*, bleachfields, tanneries, and a trade in linen. Pop 2496

VINADIO a tn Italy Piedmont div and 21 m. W S W Cont. L bank Stura with two churches an elementary school thermal-springs, and much of agricultural land. Pop 1114

VINALMOND, a vil and com. Belgium, prov and 18 m. S W Liège, on the Malmeigne with brick works brewhouse numerous blacksmiths, quarries of black marble, and mines of iron and coal. Pop 1144

VINAROS, a seaport, Spain Valencia prov Castellón de la Plana 22 m. S Tortosa, on the Mediterranean Sea. It is surrounded with a good wall a fosse, and seven forts, has generally lofty houses, provided with fine balconies and some good streets and squares, a spacious townhouse, customhouse, theatre, shambles, hospital handsome parish church, several chapels, an almshouse, and various schools. The bulk of the population is engaged in navigation, fishing and ship-building but there are also oil mills, brandy-distilleries, and cooperages. About 600 coasters and 25 foreign vessels, enter and clear annually. Imports, grain, dried cod, seriffines, saeves, &c. exports, wine, brandy, timber &c. Pop 3341

VINGA a tn France dep. Pyrénées-Orientales, 6 m. E \ E Prades. It is walled has numerous fine fountains, a communal college, manufactures of leather, and a trade in corn, fruit, flax hemp, and cattle. Pop 1860

VINCENNES (anc. *Vincos*) a tn France, dep. Seine, about 2 m. E Paris close to the Bois-de-Vincennes. Its large old castle, which is surrounded by lofty walls and deep ditches, was once the frequent residence of the French kings and has long been used as a state-prison. More recently it has been converted into an arsenal, where all the munitions of war have been crowded together, and a strong garison is constantly kept. The Duc d'Enghien, only son of the Prince of Condé was barbarously shot in one of the fosses of this castle. The town is well and regularly built. Pop 3408

VINCENNES, a tn U. States Indiana, on the Wabash, and on the Evansville and Illinois, and the Ohio and Mississippi railways, 100 m. S W Indianapolis. It is regularly built and has several churches, including a spacious R Catholic cathedral, an ecclesiastical seminary female academy, and two orphan asylums, a handsome townhouse, a good marketplace and some manufactures. Pop 2079

VINCENT (Br) a vil and com. Italy Piedmont, div Aosta, 2 m E Chablais, above the Dora, here crossed by a remarkable Roman bridge. It has well built houses, fine walls a parish church and several free schools. Pop 1351

VILNA FROM THE GREEN GATE DU FORT
From Voyage de la Commission Scientifique du Nord

height, a library museum of natural history with botanical gardens; several monasteries, hospitals, and charitable endowments. The manufactures are insignificant but the trade chiefly in agricultural produce sent to Riga, Mamel Königsberg, and Lubau, is considerable. Vilna was founded in the beginning of the 14th century, and became the capital of Lithuania. Many of the nobility still continue to reside in it. Its university was suppressed in 1832. Pop (1849), 52 228.

VILA, two rivers, Bavaria;—1 An affluent of the Rh. which is 11 m. N W Regensburg after a S S E course of about 43 m. — 2 An affluent of the Danube which it joins at Vilshofen, 55 m. S S E Regensburg after an E \ E course of about 70 m.

VILSBURG a market tn. Lower Bavaria, on the Vils 11 m. S E Landshut. It has walls with two gates two churches, a townhouse, infantry saltpetre-works a wax refinery, and a trade in cattle. Pop 1245

VILVETERE, a tn. Spain, Leon, prov and 54 m. W S W Salamanca, with a parish church, a primary school, and a trade in wine, oil and delicious fruit. Pop 1373

VILVORDE (Flemish, *Vilvorde*, anc. *Vilvorde*) a tn, and com. Belgium, prov. Brabant, 6 m. N E Brussels, on the railway to Malines, and on the Senne. It has a handsome and interesting Gothic church with fine wood-carvings a vast central prison, capable of receiving 2000 prisoners, who work at all kinds of trades several boarding and primary schools, an almshouse, a musical society, manufactures of hosiery, printed calicoes, acids, tobacco, varnishes, and glass also brewhouses, tanneries, bleachfields, and oil and corn mills. Pop 4809.

VUL II.

lon. 64° 10' and 65° 40' W. comprising a space of about 100 m. long, by 30 m. wide. Not above a fourth are inhabited and cultivated. The chief exports are sugar, molasses, rum, cotton, and salt, ginger, turmeric, tobacco, plantains and indigo. Vegetables and fruits are abundant. The climate is subject to much fluctuation, and slight shocks of earthquakes are occasionally felt. The islands are exposed to a heavy swell, and the obstacles opposed to the tidal wave between them produce some extraordinary phenomena: the waves sometimes breaking against the shore with great violence, without there being any indication of a previous gale. The Virgin Islands

of the state are the peaks of Otter in the Blue Ridge, 4380 ft. high, but the most remarkable object is the natural bridge over Cedar Creek, near the centre of the state; it consists of a huge rock spanning the river by an arch 90 ft. long, 60 ft. wide, and 200 ft. above the water and supported by high airy abutments gracefully curved. The principal rivers are the Potomac, Rappahannock, York, James, the Big Sandy and the Great and Little Kanawha. The coal-seams occur in many parts. The climate differs much in different localities, and the thermometer has a range from 8° below zero to 98° Among valuable products the great staple is tobacco: cotton and flax

are also raised in large quantities. The principal grain crops are Indian corn, wheat and oats. Sheep, yielding excellent wool, are very numerous, but by far the most important live stock are swine, of which, particularly in the W. districts, the annual slaughter is immense. Considerable attention is also paid to the dairy, and both butter and cheese are largely exported. Minerals have recently been worked to a considerable extent. W. of the Alleghenies, an thrustle bituminous and parrot coal are found over extensive tracts, in connection with iron-ores of the finest quality. Bauxite is found at the base of the Blue Ridge, and lead, plumbago, &c. in

are shared by Great Britain, which has about 50, the principal of which are Tortola, Anegada, Virgin-Gorda, Jost-van Dyke, Guano Isle, Beef and Thatch islands, Priekly Pear Covenas, Cooper's, Salt, St. Peter's, and several smaller islands, Denmark, which has St. Thomas Santa-Cruz, and St. John with a considerable number of islets and Spain, which has Culobra, and several islets. Beques, Vieques or Oak Island, forms a sort of joint possession of the three powers (See Europe). The group was discovered by Columbus on his second voyage in 1494.

VIRGINAL-SAMME, a vil. and com. Belgium, prov. Brabant, on the Samme, near the frontiers of Hainaut, 16 m. S. Brussels. It has manufactures of cotton, lace, and paper a brewery, and oil and flour mills. Pop. 1255.

VIRGINIA, one of the U. States of N. America. lat. 36° 55' to 40° 45' N., lon. 75° 20' to 83° 40' W. and bounded N. by Pennsylvania and Maryland, E. Maryland and Delaware Bay, S. North Carolina and Tennessee, and W. Kentucky and Ohio, greatest length E. to W. 408 m. breadth, 212 m. area, 84,900 sq. m. The surface consists of four parts, distinctly marked by characteristic features. The first, commencing in the E. on the sea-coast, and extending W. to the head of tide water at Fredericksburg, consists of a low alluvial flat, covered with luxuriant vegetation on the river margins, but in some places sandy, and in others marshy. The second division extends from the former to the Blue Ridge, which stretches across the state from S.E.W. to N.E. and presents much wild and romantic scenery. It contains several fertile tracts, but is often stony with a subsoil of tenuous clay; and has much thin sandy land. The third division occupies the long but comparatively narrow valley which lies between the Blue Ridge and the North and Allegheny Mountains, and is bounded with little interruption from the frontiers of Maryland to the N. to those of Tennessee and N. Carolina in the S. The soil rests on a bed of limestone, which is often seen penetrating the surface, and occasionally starts up into sharp, steep, and isolated heights. The head of the valley is fertile, but the sides are often bare and bleak. The fourth division, extending from the Alleghenies to the Ohio, is wild, broken, and generally barren, but has masses of lead, iron, coal, and salt. The culminating points

several quarries the salt works of Kanawha are the most extensive in the Union. Next to iron, which, including machinery, hardware, cutlery firearms &c., is the most important manufacture, are cotton and woollen goods. In 1850 the exports, consisting chiefly of tobacco and flax, and to a more limited extent of shrewed, rosin, turpentine, &c., amounted in value to £280,000, the foreign imports to only £25,800. It is supposed that the costuming is thrice the amount of the foreign trade. In 1850 the length of railroads completed was 565 m., and that of canals and navigation improvements above 200 m. The prevailing religious denominations are Baptists, Methodists, Presbyterians, and Protestant Episcopalians. For higher education, the principal institutions are the university at Charlottesville, Randolph college at Boydston, Bethany college at Bethany and the military institute at Lexington. In 1849 the sum of £14,000 was expended in the education of 30,857 poor children. The government, as fixed by the constitution of 1851 consists of a general assembly, composed of a senate of 50 members elected for four years and a house of delegates elected for two years, all by universal suffrage. Richmond is the capital. The first European settlement in the original U. States was made in 1607, at Jamestown in this state, by Sir Walter Raleigh who gave it this name in honour of Queen Elizabeth. Among the distinguished natives are Washington, Jefferson, Monroe, Madison, and Chief-justice Marshall. Pop. (1850) 1,431,561 of whom 58,829 are free coloured, and 472,593 slaves.

VIRGINE, a cape S.E. extremity of S. America, 150 ft. high, forming the N. entrance of the Strait of Magellan, and the S.E. point of a range of steep, white cliffs about 200 ft. high, which stretches N. to within 8 m. of Cape Fitz-Roy with only one or two breaks where a boat can land.

VIRGINSTOWN, par Eng. Devon. 1274 a.c. Pop. 173. **VIRLE** a vil. and com. Italy Piedmont, div Turin prov. Pinerolo. It is entered by a castellated gate and has a church, two oratories, two castles, an elementary school and a charitable endowment. Pop. 1747.

VIRLE, or **WIRKA**, a market at Austria, Croatia, generally W. of Vienna, about 10 m. from Koprivnica, and near the Drava. It is the headquarters of a frontier-regiment. P. 2694. **VIRLEY** par Eng. Essex; 632 a.c. Pop. 98.

VINTON (ana. Fertensu) a tn. Belgium, prov. Luxembourg, near the French frontier, 12 m. S.W. Arlon; with a church, a chapel, a college with a normal school annexed, a school of design, animal industry, breweries, dye-works, brick, oil, and distilleries, and a trade in wool and lace. Pop. 1784.

VINTJERY or **Wintzen**, a lake, Ransie, in N. of gov. Livonia; greatest length, N. to S., 80 m.; breadth, 9 m. It is property an expansion of the Embach, which enters it on the S., and issues from it in the N.E. to discharge its waters into the Papea. It also discharges itself partly by the Pölla, which falls into the Gulf of Riga.

VIRY a vil. and com. France, dep. Haute-Savoie, prov. Geneva, 3 m. S.W. St. Julien, with a ruined castle, and a trade in cattle and dairy produce. Pop. 1844.

VIRAN a vil. France, dep. Yvelines, 16 m. N.E. Orange. Pop. 1139.

VIRHE, a vil. and com. Italy Piedmont, div. Turin, prov. and 10 m. S.E. Ivrea, on bank Dora-Baleno, with an old castle, and a parish church. Pop. 2154.

VISCIANO, a tn. Naples, prov. Lavoro, dist. and E. Nola; with four churches, two convents, and marble-quarry. P. 1857.

VISE, a tn. Belgium, prov. and 7 m. N.W. Liège, on the Meuse. It has a township, three churches, one of them founded in 793, by Charlemagne's daughter Bertha, a chapel, a college, and a great school; manufactures of woollens and hosiery, brick and tile works, breweries, a beet-sugar factory, a worsted and flax mill, a building-yard, huckling, and a considerable trade. Pop. 3067.

VISEU, a tn. Portugal, prov. Beira-Alta, on a small affluent of the Dão, 44 m. S.E. Oporto, 1200 ft. above sea-level. It is well built and has an excellent cathedral on a commanding height, a seminary with a staircase of a curious construction, two hospitals and a college, some fine promenades, and a number of interesting antiquities. Pop. 6800.

VISHERA a river Sweden. See VIKEN.

VISHINGO, an isl. Sweden, in the S. of Lake Vätter. It is a narrow strip little more than 1 m. wide, stretching about 6 m. N. to S. well wooded with an ancient church and the remains of two old castles of great historical interest.

VISHUGAN a river, Siberia, rises in the E. of gov. Tobolsk, lat. 56° 30' N. flows E.N.E. and after a course of about 170 m., joins a lake Obi about 80 m. below Narin.

VISK, or **Vousova** a vil. Hungary, Thither Thos, co. Monarosa, near the Theiss, 16 m. from Balguth, with two churches, mineral-springs, manufactures of linen, and a trade in corn, cattle, wax, and linseed-oil. Pop. 3026.

VISHU a vil. Hungary Thither Thos, co. Borsod about 20 m. from Miskolc, with a Protestant church, glass works, slate-quarries, and several saw and flour mills. P. 1868.

VISNYOVE, a vil. Hungary, co. Trencsén, about 4 m. from Selmé, with a R. Catholic church, limestone-quarries, and gold and silver mines. Pop. 1112.

VISM, one of the principal summits of the Alps, on the frontiers of France and the Neuchâtel States. Its height is 13,599 ft., and it is the source of the Po.

VISO, several places, Spain.—1, (*del Alcor*) A tn. Andalusia, prov. and 15 m. E. Sevilla, with regular and well-paved streets, a townhouse, several schools, a church, and improved commerce. Pop. (agricultural), 2410.—2, (*del Mar*) A vil. New Castile, prov. and 30 m. S.E. Cordoba; with a townhouse, granary, two elementary schools, a hand some palace, belonging to the Marquis of Santa-Cruz, built of exquisite white marble from quarries in the vicinity, and a church, manufactures of cloths, laces, and serge, oil and flour mills. Pop. (agricultural), 2410.—3, (*del*), A vil. Andalusia, prov. and 60 m. N. Cordova; with a townhouse, two schools, and a church. Pop. (agricultural), 2704.

VISO, two vills. Hungary co. Monarosa.—1, (*del* or *Delo-Vicovo*), in a plain on a stream of same name, 24 m. from Balguth; with a church and a synagogue. Pop. 1826.—2, (*del* or *Vicovo-Farol*), At the confluence of the Vack with the Vise, 30 m. from Balguth; with a church, a synagogue, and mineral-springs. Extensive forests in the vicinity give employment to most of the inhabitants. Pop. 1830.

VISONIA, a tn. European Turkey, Bosnia, 17 m. N.W. Banja-Luka. Near it are iron-mines. Pop. 3000.

VISONIA, a vil. and com. Italy Piedmont, div. Alessandria, prov. and near Aosta, with a townhouse, a parish church, and an oratory. Pop. 1280.

VISP (French, *Vige*, Latin, *Vigula*), a vil. and par. Switzerland, can. Valais, on a torrent of same name, near Lausanne 26 m. N.E. St. Emme; with two churches, one of them with a few staples, and some brass trade. Pop. 1555.

VISSEGRAD, or **Visegrád**, a town, Hungary, on the Danube, 12 m. N.W. Pest, a bank Danube. It is chiefly famous for its ruined castle, which figures in Hungarian history, and was occupied by King Matthias Corvinus.

VISTABELLA DEL-MARFRANCO, a tn. Spain, Valencia, prov. and 27 m. N.W. Castellón-de-la-Plana; with a church, a ruinous castle, courthouse, primary school; manufactures of woollen cloth, numerous flour-mills, and a trade in corn and cattle. Pop. 1289.

VISTORU, a vil. and com. Italy Piedmont, div. Turin, prov. and about 10 m. N.W. Ivrea, on the Chissella, with a handsome church. Pop. 1651.

VISTRITZA, a river, European Turkey which unites with the Vardar immediately before the latter falls into the Gulf of Salonica. Its course, first N.E. and then S.E., is about 80 m.

VISTULA (German, *Weichsel*) a river, Europe, rises in Mount Biala or Schaberg, a branch of the Carpathians, on the frontiers of Austria, Silesia and Galicia, and a little N. of the frontiers of Hungary, at the height of 2000 ft. above the sea. It flows first N. to the frontiers of Prussia, Silesia then E.N.E. past Cracow and Sandomir forming the boundary between Galicia and Russian Poland, enters the latter and proceeds easterly N.W. to Warsaw. About 15 m. below Warsaw it begins to flow W.N.W., and continues in that direction till it joins Bzuran Poland, enters Prussia, and there reaches the town of Thorn. About 20 m. below Thorn it changes its direction to N.E., passes the towns of Cöln and Marlowwerder and 10 m. below the latter, throws off an arm which takes the name of Nogat, and flowing N.E. enters the Frische-Haff by a great number of mouths.

The main stream proceeds N.W., and again divides into two branches, the one of which goes E. to the Frische-Haff, while the other flows W.N.W. to Dantz. It is about 3 m. below the Weichselmündung falls into the Gulf of Dantz. Its principal affluents are, on the right, the Odra, Rawa, Raba, Duna, See, Wloka, Lonia, San Wlopa, Wlopa, Zwitzer, Bug, Kruza, Drowca, and Ossa and on the left, the Dniestr, Nida, Kłodnia, Wrona, Kamienka, Dna, Radziska, Piliha, Bzura, Brza, Solwarswasser, Forca, and Kadziana. Its total course, including windings, is about 680 m. It becomes navigable at Cracow and is of the greatest commercial importance to the countries through which it passes. By a canal connecting the Brza and the Vistula, it communicates with the Oder. At first it descends from the mountains with such rapidity between narrow rocky banks, that the height of its channel, which was 2000 ft. at its source, is no more than 750 ft. when it reaches the frontiers of Prussian Silesia. On quitting Russian Poland, at the junction of the Drowca, a little above Thorn, the height of its channel above the sea is only 96 ft. Accordingly from this point to its mouth, it becomes extremely sluggish, winding slowly along through wide and marshy plains. The area of its basin is estimated at 65,634 sq. m.

VITA, a tn. Sicily in a hilly district, near the source of the Bagli, S.W. Palermo. Pop. 2500.

VITAGLIANO (R.) a vil. Naples, prov. Lavoro, W. Nola, with two churches. Pop. 1554.

VITHEGODA, or **VITZENODA** a river Russia, rises in the N.E. of gov. Volynia, flows first E., then very circuitously W. past the towns of Ust-Nilock and Nermak, and a little below Solvychegodsk unites with the Sushona in forming the N. Dvina, after a course of nearly 450 m.

VITEPSK, **VITENSK** or **VITZENSK**, a gov. Russ. bounded N. by Pskov, N.W. Livonia, W. Courland, K. Minsk and Mohilev and E. Smolensk, greatest length, N.W. to S.E., 220 m.; central breadth, 140 m.; area, 12,002 sq. m. The surface is generally flat, and much occupied by woods and swamps. The whole drainage is carried to the Baltic, partly in the N. by the Lovat and other small streams, but chiefly by the Dvina. The climate is temperate, but is somewhat moist. The soil, generally thin and light, yields rice much better than any other grain. The extensive pastures grow great numbers of young horses and cattle. Fruit, particularly apples and plums, pears and cherries, are abundant. The lakes abound with fish, particularly a kind of carp.

lincs, which are taken in large quantities, dried, and exported, often after being ground into meal. The only mineral of value known. Manufactures have made little progress, but distilleries on a small scale are very numerous, and the trade, greatly facilitated by the Dniep, is considerable. The principal articles are hemp, fish, timber, flax, wool, hides, honey and wax. Pop. 805,400.

VITRUM, a town, Russia, cap. above gov., on the S. Dniep, which is here navigable and crosses the Vitba 35 m. S. St. Petersburg. It has old walls flanked with towers very irregularly built wooden houses, in narrow dirty streets, and has three S. Catholic and 11 Greek churches, three synagogues eight monasteries, a gymnasium infirmary; manufactures of woollen and linen cloth, numerous tanneries and a considerable trade. Pop. (1861) 39,823.

VITERBO, a town, Papal States, cap. deleg. of same name, at the foot of Mount Cimino, 59 m. N. N. W. Rome; has walls flanked with towers, houses generally well built, narrow and dirty, though well paved streets, numerous elegant fortifications, and a pretentious square, surrounded by porticoes. The chief edifices are a Gothic cathedral, on the supposed site of a temple of Hercules, containing the tombs of four popes, and numerous fine paintings, and known to English history as the place where Prince Henry nephew of Henry III. of England, was barbarously assassinated by Guy of Montfort an ancient and greatly dilapidated episcopal palace, a Gothic church with a 'Descent from the Cross' by Sebastian del Piombo several other churches, all more or less enriched with paintings the Palazzo-Pub. where the Palazzo-San-Marino and outside the gate, the Dominican convent. The trade is chiefly in sulphur and iron. Viterbo is supposed to occupy the site of the Fanum Volturnum, where the Etruscan rites held their assemblies and figures much in Italian history during the middle ages. Pop. 18,849. — The DELGATION is bounded, N. by deleg. Perugia, W. the Tyrrhenian Sea and Tuscany S. deleg. Civita Vecchia and comarca of Rome, and E. deleg. Kieti and Spoleto, greatest length, N. to S., 60 m., greatest breadth, 57 m. area, 513 sq. m. The surface in the N. is mountainous towards the centre is finely diversified by hill and dale; and in the S. particularly towards the sea, spreads out into extensive plains. The Tiber forms the greater part of its E. boundary. The higher districts are covered with forests or green pastures; the lower are generally fertile but indifferently cultivated. The only mineral product of consequence is alum, which is largely exported. Pop. 120,578.

VITI, a town, Rhenish Prussia, gov. and 30 m. S. Aix-la-Chapelle, on the Our, with manufactures of glass and leather several mills, and a trade in horses and cattle. Pop. 563.

VITI LEVU the largest of the Fovee islands S. Pacific Ocean, lat. (Hawaii harbour) 18° 10' 50" S., lon 178° 30' 40" W. about 90 m. long, by 55 m. broad. Its N.E. part, which has been explored, is low but little is known of the interior. The Wallava or Fovee, which has been traced about 86 m., to where the mountain-district commences, is said to have its source in a large lake. The country through which it flows is well cultivated. About 8 m. from its mouth is an excellent and secure anchorage, known as the harbour of Bawa, and 6 m. farther up, and about 1 m. from the beach is the town of Bawa, consisting of houses built with posts about 7 ft. high, and with lofty pitched roofs, thatched, and having unornamented poles across the summit. Like all the other large islands of the group, Viti Levu is basaltic. Pop. estimated by Gaimard at 20,000.

VITIGUDINO, a town, Spain, Old Castile prov. and 87 m. W. Salamanca with a church, a court-house a school manufactures of woollen and linen cloth, and a flour-mill. Pop. 1048.

VITIM, a river, Siberia, rises among the mountains which skirt the E. shores of Lake Baikal, gov. Irkutsk flows first W. to lat. 56° N., then very crookedly N.W., and joins the bank Lena at Vitimsk, after a course of about 700 m. Its chief affluents are, on the right, the Karmagha, Kautzika, Jara, and Darichika; and on the left, the Tupa, Karga, the Yerkul Mama, and the Kyal Mama.

VITIMSK, a town, Siberia, gov. and 875 m. N. N. E. Irkutsk, at the confluence of the Vitim with the Lena. It has

a church and in the vicinity, brine-springs, and beds of excellent gypsum. Pop. about 800.

VITO (St.) several places, Italy. — 1. A Naples, prov. Abruzzo-Ultra, 6 m. N. E. Lanciano, on a hill, about 1 m. from the Adriatic; with four churches and an almshouse. Pop. 2000. — 2. A in Naples, prov. Calabria-Ultra II 15 m. S. S. W. Catanzaro. Pop. 3000. — 3. A in Sicily, prov. and 17 m. N. E. Trapani, near the cape of its name; with a church which is much resorted to by pilgrims; an almshouse for small vessels, and a fishery. — 4. A in Italy, gov. Vercelli, prov. Friuli cap. of district, on the Lemene, 22 m. S. W. Udine; with a handsome church, and manufactures of linen and hats. Pop. 4000. — 5. (Lugh-Rahul) A in Naples, prov. Abruzzo 14 m. W. N. W. Brindisi with seven churches, two convents, and an hospital. Pop. 2600.

VITOLANO, a town, Naples, prov. Principato-Ultra, N. W. Avellino; with manufactures of woollen goods and leather, and a quarry of variegated marble. Pop. 5500.

VITTORELLANO, a town, Papal States, deleg. and 8 m. N. N. E. Viterbo. Pop. 1050.

VITORIA a town, Spain, Biscay cap. prov. Alava, agreeably situated on a gentle height overlooking an extensive plain, 60 m. N. W. Burgos. It consists of three portions, a very old, an old and a new. The first and most elevated is surrounded by dilapidated walls, bulwarks, and towers, and more covered with courts and gardens than with houses. The second consists of six streets immediately below the first, and partly encircled it also surrounded by walls which joining the former make one complete inclosure. The first two parts are poorly built, but the third, or new town, is well built in spacious streets and squares, one of which is lined with arcades, forming a favourite promenade. The principal buildings and establishments are four parish churches, one of them a large and ancient structure, in barbed Gothic, and another adorned with a fine altar-piece by Velasquez; three suppressed convents, one of them converted into barracks an existing and two suppressed numerous, a handsome modern palace of deputies a courthouse, ecclesiastical seminary, school of design, lyceum and several other schools, an academy of music, almshouse, civil hospital, theatre, and prison. The chief manufactures are shaded paper, carriages cabinet furniture earthenware hats brushes, combs, leather book-binding, picture-frames, and various articles in iron. The trade, once important, has been almost destroyed by the removal of the custom-house to the frontier. A very ancient origin is ascribed for Vitoria but it makes little figure before the 18th century. The most interesting event in its modern history is the battle fought here in 1813 when the Duke of Wellington concluded his series of great victories in the Peninsula. Pop. 10,566.

VITUS (anc. Vitruvius), A in France, dep. Ille-et-Vilaine on the Cantecle 22 m. E. Rennes, irregularly built and gloomy, with high thick walls flanked with towers. It

THE BATTLE OF VITRUM — From Faint, in Dordogne.

has an ancient Gothic church, an ecclesiastical school, an old castle of the lords of Trémouille, converted into a prison; important manufactures of horsey gear, saddles, harnesses, leather hats, coats, and tannery a trade in wine, brandy,

wax, honey, cattle, and cambrides, found in the vicinity. The Chateau des Rochers, where Madame de Sevigné wrote many of her celebrated letters, is in the vicinity. Pop. 6817.

VITRY a vil. France, dep. Pas-de-Calais, 11 m. S. S. E. Arras.

VITRY-LE-FRANÇOIS [anc. *Vitricorum, Francorum*], a tn. France, dep. Meuse, 26 m. S. E. Chalons. It is surrounded with ramparts, regularly built of brick in spacious streets, kept clean by copious streams from numerous fountains. In a large and regular central square, planted with a double row of lime-trees, is a large and handsome but unfinished cathedral, in the Greek style. Besides manufactures of woollen, there are numerous cotton-mills and oil-works. The trade is in corn, wool, wood, and charcoal. Pop. 7639.

VITRY-SUR-SEINE [anc. *Vitricorum*] a tn. France, dep. Seine, on a hill above 1 bank Seine, about 2 m. S. E. Paris with many fine country-seats, of which the most conspicuous is the Chateau de Vitry, and extensive plaster-quarries. P. 3473.

VITTORE [sic] a tn. Naples, prov. Lavoro, dist. Nola. It contains four churches, an hospital, and almshouse. P. 950.

VITTORIA, a tn. Sicily, prov. and 41 m. W S W Syracuse, on a hill, with a trade in cattle, honey, wax, and silk. Pop. 10,375.

VITTORIA, a tn. Upper Canada, co. Norfolk, 7 m. from Simcoe with three Protestant churches, two schools, several grist and saw mills, two distilleries and manufactures of cloth, iron, and leather. Pop. about 600.

VIV a vil. and com. Italy Piedmont, div. and 20 m. N W Turin on the Chaux. It is well built; and has a large and magnificent church. Near it are quarries of gypsum and millstone. Pop. 3745.

VILZ-DE-MALLER, a vil. and com. France dep. Haute-Savoie, prov. Faucigny. It was nearly buried by a landslide in 1718. Many of the inhabitants make straw-mats. P. 2430.

VIVARAIS, an ancient dist. France, which formed the N. E. part of Langue doc, and is now entirely included in dep. Aude. Viviers was its capital.

VIVE-SAINTE-OLIVE [Flemish *St. Elzev-Yve*] a vil. and com. Belgium, W Flanders, on the Lys, 34 m. S. Bruges with manufactures of linen, cotton cloth and yarn, two breweries, an oil and three flour-mills, and a trade in corn. Pop. 1248.

VIVE-ST-BAYON [Flemish *St. Bayv-Yve*] a vil. and com. Belgium, prov. W Flanders, on the Lys, 2 m. S. S. E. Bruges with manufactures of linen a brewery oil and flour mills, and humkline. Pop. 1900.

VIVEL, a vil. Spain, Valencia, prov. and 27 m. W Castellon-de-la-Piana, 1 bank Ebro, with good streets, high and well-planned houses, a seminary, hospital, two elementary schools, grammar school, three hospitals, oil and flour mills, and brandy-distilleries. Many of the inhabitants are engaged as carriers, conveying grain, timber, wool, charcoal, iron, &c., to Valencia, Aragon, and Castile. Pop. 2067.

VIVERO a tn. Spain Galicia, prov. and 46 m. N Lugo, and 16 m. S. E. Cape Ortegal, near the mouth of the Landrove, here spanned by a bridge of 12 arches. It has narrow, but regular, paved, tolerably clean streets, and three squares, in one of which stands the town-house. There are also a prison, two hospitals, a theatre, several schools, two churches, two seminaries, and two suppressed convents, some manufactures of linen, flour-mills, and tanneries, and a small shipping trade. Pop. including convents, 2825.

VIVIERONE, a vil. and com. Italy Piedmont, div. Turin, prov. and 10 m. S. Biella, on the lake of same name. It has a handsome church. Pop. 1225.

VIVIERES [anc. *Alia Augusta Helorum*] a tn. France, dep. Ardèche, 1 bank Rhone, 23 m. from Privas. It has old walls, with a labyrinth of narrow streets; a cathedral of little merit, a handsome bishop's palace, and a diocesan seminary. The chief employment is in rearing silk-worms. Pop. 1710.

VIVONNE [anc. *Vivonnum*], a tn. France, dep. Yonne, 12 m. S. E. W. Fontenay, at the confluence of the Chaux and the Yonne, with coarse woollen manufactures, and a trade in corn. Pop. 1471.

VIX, a vil. France, dep. Vendée, 6 m. S. E. W. Fontenay-le-Comte with a trade in hemp and flax. Pop. 3104.

VIZA [anc. *Vinea*], a tn. Turkey in Europe, on S. W. slope of the Little Balkan, 70 m. W N W Constantinople.

VIZAGAPATAM, a dist. and tn. Hindostan. The port, one of the strongest of presid. Madras, extends along

the coast, generally called the Orissa coast, in a N. E. direction, from lat. 15° 15' to 15° 30' N., lon. 83° 44' to 84° E. bounded, W. by the E. Ghats, distant 30 m. to 40 m. from the bay; N. E. dist. Ganjam and S. W. Rajahmundry; area, 7650 sq. m. Unlike the other shores, it is mostly mountains and waste; the hills, to 1500 ft. or 3000 ft. in height, are clothed with jungles, and interspersed with fertile valleys, in which rice and dry grains are raised. The coast is bold and rocky the climate is generally healthy. Principal exports are rice, tobacco, betel, cinnamon, oil-seeds, shellfish, fish, and iron; with cotton cloths of a superior kind, jewelry, ivory boxes and chessboards, and articles in silver and brass, for all which manufactures the dist. is celebrated.

It furnishes a large race of palm-leaf-bowls to the rest of the presidency, and many Goida emigrants to the Marathas. Principal towns, the cap., Vizianagaram and Bimpitagan.

VIZAGAPATAM, the cap., stands near the centre of the coastline, on a tongue of land at the mouth of a river and immediately N. a remarkable height called the Dolphin's Nose, about 1500 ft. high, lat. 17° 41' N.; lon. 83° 34' E.; 387 m. N. E. Madras. The fort contains barracks, an arsenal, hospital, court-house, bazaar, and some other buildings; outside of it, on the N. and W. is the native town which has many good streets and well-built houses, but is crowded by being enclosed between the sea and a large swamp. Beyond this are the paragon-ground, many handsome detached villas along the beach, and a good road, stretching 4 m. N. to the suburb Waltair, where all the civil and most of the military officers reside. There is 8 ft. to 10 ft. water on the bar at the entrance to the river, and about 1½ m. from the land a good anchorage during the N. E. monsoon. Pop. (dist.), 1,254,373.

VIZCAYA, a prov. Spain, See BISCAY.

VIZIADROOG a seaport tn. Hindostan presid. and 165 m. S. Bombay after which, it is the best harbour on the Malabar coast.

VIZIANAGRAM a tn. Hindostan presid. Madras, 28 m. N. Vengampet, and 15 m. from the Bay of Bengal. It is large, but mostly built by its inhabitants are chiefly weavers and cultivators of land. The fort is occupied by the redoubt of the rajah, about 1 m. distant are British encampments, where a regiment of native infantry and a detachment of foot-artillery are stationed. The climate from September to March is highly salubrious, and most Europeans remove hither from Vengampet during this season.—(Rep. on Madras Presid.)

VIZILLE, a tn. France, dep. Isere, in a fertile plain, 1 bank Romanche, 9 m. from Grenoble with a ruined castle, which figured in the civil wars of the 16th century, a modern chateau, manufactures of cotton, blast-furnaces, a paper and several cotton mills. Pop. 2512.

VIZZINI [anc. *St. Viti*] a tn. Sicily, prov. and 28 m. S. W. Catania, on a lofty knoll with a college. Pop. 600.

VIAARDINGEN—J., a tn. Holland, prov. 6. Holland 7 m. W Rotterdam, 1 bank Maas, in which it has a harbour furnished with a lighthouse. It has a town-house, weigh-house, flesh-hall, fish-market, two churches, an orphan hospital, a fishery and a trade in herring, fish, salt stockfish, fruit, &c. Four building yards, two rope-walks, two tanneries, two oil-works, and several mills. Pop. 7611.—3, a tn. in Colombia. See MAGABAT.

VLADEIKAWKA, a Russian stronghold, in a plain at the N. foot of the Caucasus, on both sides of the Terek, 80 m. N. Tiflis, and commanding the mountain-pass leading S. to that town. A large garrison is always kept in it.

VLADIMIR, or VLADIMIR, a gov. Russia, bounded, N. by Jaroslavl and Kozlov, E. by Nijni Novgorod, S. by Moscow, W. by W. Tver; greatest length, E. to W., 213 m., breadth, 140 m., area, 15,838 sq. m. It is very near the centre of Russia in Europe, and has an undulating surface, with a general slope towards the E. The drainage belongs wholly to the Volga, which receives it by the Oka and the tributary the Klyazma. The climate, considering its inland position, is moderate. The rivers freeze in the beginning of November, and are again open in March. The soil, partly a stiff clay, partly a light loam, is not of great fertility, the corn raised being short of the home consumption. The principal crops are rye, barley, and oats. Fruit, particularly apples and cherries, is very abundant. The forests, once very dense, have been much thinned. The cattle are neither numerous nor of

good breeds. Fish are scarce. The principal mineral is iron, which supplies several blast-furnaces. Manufactures, consisting chiefly of linen and woollen hosiery, have made considerable progress, and furnish a considerable export. P. 1,371,000.

VLADIMIR, or **WLADEMA**, two towns. Russia.—1. Cap. above gov. on a lofty and wooded bank above the Klamma, 111 m. E. S. E. Moscow. It is one of the oldest towns in Russia; and has walls with six gates, numerous churches, one of them a cathedral, seated on a commanding eminence; a theological seminary, two monasteries, one used as the archbishop's pa-

ENTRANCE TO THE MONASTERY OF ST. ALEXIA, VLADIMIR.
From *Revue des Voyages*, 1840, p. 184.

lacc; a gymnasium, large barracks, manufactures of silk goods, earthenware, and soap, several tantries, and a trade in fruit particularly cherries. Pop. (1849), 13,408.—2. [Polish. *Wladyslaw*] Gov. Volhynia, r bank Lug 200 m W N W Jassy; with several churches a synagogue, a monastery a school and a trade in silk and salt. Pop. (1850) 5,051.

VLADISLOO a vil and com. Belgium, W Flanders, on the Zydelink Vaert, 16 m S.W. Bruges with manufactures of linen a brewery, oil-works, and a trade in corn and cattle. Pop. 1897.

VLAMERTINGHE, a vil and com. Belgium, prov W Flanders, 29 m S.W. by R Bruges, r bank Komalbeke, on a height surrounded by a ruined castle. It is nearly built and has a church townhouse, two schools, oil and several corn mills, manufactures of leather pipes, starch vinegar, and linen and a trade in cattle and grain. Pop. 2780.

VLEDENY, or **VLEDEN**, a vil Austria, Transylvania, dist Krasna; with a Greek church. Pop. 1380.

VLESSENBEEK, a vil and com. Belgium, prov Brabant, 5 m S.W. Brussels with a brewery a flour-mill and a trade in cattle and agricultural produce. Pop. 1178.

VLIE (Zuyd) or **DE VLESSEBOOM** the name given to the current that flows from the N Sea towards the Zuider-zee through the entrances between the islands of Vlieland and Terschelling.

VLIELAND, an isl. Holland, prov N Holland, off the entrance to the Zuider-zee, between Mts. Texel and Vlieland, about 11 m. S.W. to N.E. by about 1 m to 2 m broad. It is low, sandy, and has little height. Pop. 690.

VLIEMAELE, a vil and com. Belgium, prov Limburg, 7 m N Tongres with a brewery an oil and two flour mills. Pop. 1921.

VLIETVELDE, a vil and com. Belgium, prov Flanders, 19 m. S.E. Ghent with a considerable linen trade and manufactures. Pop. 1918.

VLIJMEN, a vil. Holland, prov N Brabant, 8 m. W. Hartogenbosch with two churches, a school, and a trade in agricultural produce. Pop. 2408.

VLISSINGEN, a town. Holland. See *FLUSSING*.

VLIOTHO a villet to Prussia, prov Westphalia, gov and 9 m S.S.W. Minden, l bank Weser. It has two churches, manufactures of salted cloth, starchy soap, and vinegar a sugar-factory some distillery, and a trading house and a saw. P. 1160.

VOBARNO, a vil and com. Italy Lombardy, prov and 30 m N.E. Brescia, l bank Chiese with a church, and a trade in wine, silk, and cattle. Pop. 1800.

VOCKLABRUCK a town Upper Austria, circle Hausruck, at the confluence of the Agger and Vöckla with a church, and manufactures of articles in wood. Pop. 1000.

VODE, or **VOZ**, a river, Turkey in Europe, rises in a mountainous district in Upper Walachia, flows S.E.E. past the town of Harghita and after a course of about 130 m. joins l bank Danube about 7 m below Blajova.

VODNA (see *Edon*), a town European Turkey 45 m N.W. Salonica, on a long wooded ridge with cotton and woollen manufactures. Pop. 12,000.

VODLA a river, Russia, issues from the lake of same name, in the N of gov Olonetz flows easterly S.E.E., then W.S.W., and falls into the E. shore of Lake Onega, after forming a magnificent cascade at the village of Podgoregla, to which it is navigable. Its source is about 100 m. Lake Vodla is about 55 m. long N to S., by 15 m. broad.

VOGELBERG, or **VOGELBERGEN**, a mountain-range, Germany, in Hesse-Darmstadt and Hesse-Cassel, E of the Rhinegorge, and N of the Spesshardt. It commences E of the town of Hohlheim and terminates in the N between Ronneburg and Alsfeld, and is about 86 m. long by 80 m. broad. In the Oberwald or Steden Acher, the culminating point, it attains the height of 2497 ft. The rocks are almost all basaltic, and well wooded. The Vogelberg forms the water-shed between the basins of the Main and the Weser.

VOGHERA, a town Italy Piedmont, div and 21 m E.N.E. Alessandria, cap. prov. l bank Staffora in a fertile plain between the Po and the Apennines. It is mostly of an oval form, and was till recently surrounded by walls, bastions, and other strong fortifications. It is well built, in spacious streets and in squares, one of which, near the centre of the town is lined with arcades and has a collegiate church of very early date, two convents and a monastery, a college or gymnasium, several elementary schools an ordinary and a founding hospital and a trade chiefly in corn and wine. Voghera is supposed to be the ancient *Isa* which under the Romans, was one of the most important towns of Liguria. Pop. 10,708.—The *oro vitor*, area, 800 sq. m., is partly covered by ramifications of the Apennines and is not very fertile, though it produces a good deal of corn fax hemp pulse, wine, silk, and famous almonds. Pop. (1852), 202,032.

VOGOGNA a town Italy Piedmont, div Novara, prov Pallanza 7 m S. Domo-d'Issola, with a very ancient palace, two churches, and an hospital. Pop. 1657.

VOHBURG a market town Upper Bavaria, 9 m. E. Ingolstadt, r bank Danube, here crossed by a bridge; with two churches, a townhouse, school, hospital and several breweries. The famous castle of Vohburg on an adjoining height, was the residence of the unfortunate Agnes Bernauer secretly married to Albert III., hereditary prince of Bavaria. Pop. 1195.

VOHENTRAUSS, a market town Bavaria, Upper Palatinate, 26 m E.N.E. Amberg with a Protestant and a R.C. Catholic parish church and a castle almost consumed by fire in 1895. Pop. 1555.

VOHIMARINA a division Madagascar (whol. sea).

VOHRINGEN, a town Württemberg circle Solms, 23 m from Stuttgart on the Mühlbach, with a church, and a sulphur-spring. Pop. 1667.

VOJAVAZ, a town Asiatic Turkey pass. Anatolia, 50 m E.N.E. Constantinople. Pop. about 2000.

VOIGTLAND a former political division of the Kingdom of Saxony now comprised in the circle of Weizsäcker.

VOIKO, a town France, dep. Isere, 18 m. from Grenoble, on the Morge. It is well built; and has manufactures of woollens, silks, hampden cloth called cloth of Volcos, liquors, straw hats, steel, paper, nails, and leather. Pop. 5650.

VOITSBERG, a town Austria, Styria, circle and 18 m. W. Graz, on the Kalniet, with a church, an hospital, a ruined

card, manufacturers of white-laid, wire-wire, and a paper-mill. Pop. 1000.

VOJE, a lake, Russia, in the N.E. of gov. Novgorod, about 80 m. long N. to S. by 15 m. broad. It may be considered as the source of the river Onega, into which it discharges itself indirectly through Lake Ladoha.

VOJUTZA Votomina, or Pomo, a river, Turkey in Europe, Albania, rises in Mount Politan, on the frontier of Thessaly and Macedonia. Runs W.N.W. past the towns of Konitza, Topolizza, and 15 m. N.W. Valona, falls into the Adriatic Sea, after a course of about 140 m. Its chief affluents are the Lavartina and Thessalia, the Kallia, Derspall, and Sotichina.

VOLCANO, several islands.—1. S. Pacific Ocean, off N.E. coast, Pagan, lat. 5° 5' S. lon. 148° 30' E. It has the form of a truncated cone, about 2500 ft. high, with a diameter of 3700 ft. at the base, and looks as if it had arisen directly from the depths of the ocean. When discovered by Dampier, March 4, 1700, it was in a state of activity vomiting fire and smoke that when passed by D'Urville, in August, 1827, was extinct, and clothed with an agreeable verdure on the E. face.

—2. A group, S. Pacific. The central one, Sulphur Island, lat. 24° 48' S. lon. 141° 15' E. is about 5 m. long, and evidently volcanic.—3. N. Pacific, S.E. Japan, lat. 34° 17' N. lon. 139° 55' E. (p. 1).—4. S. Pacific, one of the Japan Islands, lat. 30° 48' N. lon. 120° 17' E. (p. 1).—5. (or *Barnes Island*) Bay of Bengal, one of the Andaman lat. 12° 16' N. lon. 93° 54' E. (p. 1).—6. S. Pacific Ocean. (See **TYMOCORO**).—7. One of the Lipari Islands. (See **VOLEA**).

VOLCIANO a vil. and com. Italy, Lombardy prov. and 1 m. N. K. Brescia, at the entrance of the Val-Sabbia, a bank Chiese with a trade in wine and silk. Pop. 1000.

VOLCIANDA a tn. Hlondostan, Carnatic, S.W. Pondicherry. It signed during the wars of the Carnatic, being strongly defended by a fort, on a rock rising 200 ft. from a base about 1 m. in extent.

VOLGA, or **WOLGA**, a river Russian Empire the longest in Europe, and with exception of the Danube, possessing the greatest body of water. It proceeds from a small lake on the E. side of the Volga Hills, gov. Tver lat. 57° N. lon. 35° 10' E. at an elevation of 550 ft. above sea-level and falls into the Caspian Sea, by numerous mouths, near Astrakhan. Its basin is estimated at 400,000 sq. m., and its entire course, including windings, at 2400 m. while its fall from source to embouchure is only 633 ft. It flows at first N.E. about 90 m. to Zakhov, thence generally N.E. past Tver to Mologa, thence E. by S. past Jaroslavl, Kostroma, and Nijne-Novgorod to the vicinity of Kazan. Here it turns S. flows curiously S.W. past Simbirsk and Saratov to Georgia, and thence S.E. to the Caspian, into which after dividing into eight branches, including 70 islands, it falls by 65 mouths. It is navigable by barges from its source, but its navigation is much impeded in the dry season by increasing shallows and islands, and for 170 days in the year it is frozen over. Its principal affluents are the Oka and Kama, the one joining it from the S.W., the other from the N.E. The other more important tributaries are, on the left, the Mologa, Shchekna, Ugra, Vetloga, and Vytka; and on the right the Berna. By a judicious system of canals, it communicates both with the Caspian Baltic, and Polar Seas. The banks of the Volga are fertile, and well covered with oak-wood. It abounds in fish, particularly sturgeon, carp, and pike, of extraordinary size.

VOLHYNIA or **WOLHYNIA** (Polesia, Polysie), a gov. Russia, bounded N. by Minsk and Grodno, W. Poland, S.W. Austrian Galicia, S. Podolia, S.E. and E. Kiev greatest length, E. to W. 230 m. greatest breadth, 153 m., area, 20,800 sq. m. The S. is covered by low and well-wooded ridges, which, towards the N., merge into plains generally dry but sometimes marshy. The whole drainage is carried to the Dniester by numerous small streams. The climate is mild, equable, and in general healthy; but locusts from time to time appear in hordes, and commit great ravages. The soil is almost all remarkably fertile, producing abundant crops of all kinds of grain, particularly wheat, which yields among the best of Polish growth. Other crops are hops, mustard, and saffron. Fruit abounds, particularly apples, pears, cherries, and plums. Of the last much liquor is made. The pastures feed great numbers of fine cattle, and horses much used for heavy cavalry. The woods, chiefly in the N. and N.E., furnish a considerable export both of timber and fuel. The hills in

the S. are rich in iron, chiefly bog-iron ore, which supplies several blast-furnaces. In other quarters saltpetre abounds. There are few manufactures. The principal exports are wool, hemp, hemp-seed and hemp-oil, potash, pitch, tar, linseed, maltre, wool, hides, fat cattle, horses, honey, and wax. It is in the capital. Pop. (1860), 1,474,000.

VOLKACH, a tn. Bavaria, Lower Franconia, 1 hank Main, 15 m. N.E. Würzburg, with two churches, a chapel, townhouse, hospital, and poorhouse, manufactures of linen, second mills, a fishery and a trade in wine and fruit. P. 1864.

VOLKERAAR or **VOLEKRAAR**, the stream coming out of Holland's lake, between the islands of Overflakke and Schouwen, and emptying into the S. Holland from Zealand.

VOLKERMARKT or **VÖLKER**, a tn. Austria, Illyria, circle Klagenfurt, with a church, a townhouse, barracks, and important corn and cattle markets. Pop. 1000.

VOLKERSHAUSEN a vil. Saxo-Weimar circle Eisenach on the Oesna, 3 m. S.W. Vech, with a church, and manufactures of woollen cloth. Pop. 1185.

VOLKHOV a river Russia, issues from the N. extremity of Lake Ilmen, close to the town of Novgorod. Runs N. N.E. and falls into the S. shore of Lake Ladoga, after a course of about 40 m. Its current is generally deep and rapid, but when the water is low the navigation is impeded by extensive shoals.

VOLKMARSEN a walled tn. Hesse-Cassel, Niederhessen, on the Twiste, 18 m. W. N. W. Cassel; with two churches, a courthouse, hospital, manufactures of woollen cloth, hosiery and leather; and an excellent spring. Pop. 3618.

VOLLENHOVE, a tn. Holland, gov. Overijssel, 31 m. N. N. W. Drenthe on the Zinder-see; with a castle, townhouse, three churches, and several schools. Inhabitants engaged in cattle-rearing, fishing, hawking-smoking, and some cattle-breeding. Pop. 1815.

VOLLEKEEL, a vil. and com. Belgium, prov. Brabant, 16 m. S.W. Brussels with a brewery, a flour-mill and a trade in agricultural produce. Pop. 1775.

VOLMAR, or **WOLMAR**, a tn. Russia, gov. Livonia, 4 hank As, 63 m. N.E. Riga, with a church, a school, and some trade. Vladimir II. king of Denmark, in 1230, gained a signal victory here over the pagan warriors. P. 1860, 1235.

VOLMERDINGEN a vil. Prussia, prov. Westphalia, gov. Münster, with a church. Pop. 1258.

VOLVO a gulf in the Archipelago, S.E. coast, Turkey in Europe. Its entrance by the channel of Trilker has a width of only 4 m. but its afterwards assumes somewhat of a circular form, with a length and breadth of about 50 m. Its E. and S.E. shores are bordered by the mountain-rings of Zagora or Pelion which sends down numerous torrents into it.

VOLVO a tn. Turkey in Europe, at the N. extremity of the gulf of same name, in Thessaly 20 m. S.E. Larissa lat. (corr.) 39° 24' N. lon. 22° 56' 50" E. (p. 1). It is defended by a castle, and has a mosque and a synagogue and a port with a considerable trade. Pop. about 4000.

VOLVOCHA a market in Austria, Istria, on the bay, and 7 m. N. N. W. Trieste, with two tolerable harbours, a fancy fabric, docks, and a trade in fruit and wine. P. (corr.) 18,000.

VOLGODA a river, Russia, rises in a meadow in the S.W. of gov. Volgoda, flows past the town of its name, and 18 m. below joins r. bank Schchena, total course, about 90 m. Its navigation by barges gives Volgoda continuous water-communication by the Moucha and N. Drina to Archangel.

VOLGODA, or **WOLGODA**, a gov. Russia, bounded N. by gov. Archangel, E. the Ural Mountains S.E. gov. Perm S. Vieda, Kostroma, and Jaroslavl W. Novgorod; and N.W. Olonets greatest length, N.E. to S.W. 760 m., breadth, 580 m., area, 111,505 sq. m. The surface consists generally of a plateau covered with woods, lakes, and moraines, and high only in the E., where it approaches the Ural chain. The drainage, except a small part received by the Volga, wholly belongs to the basin of the Western Ocean, which receives it chiefly by the N. Drina and the Petchora. The climate is tolerably temperate in the S.W. but severe in the N. and N.E. In the S. a good deal of wheat and barley are grown, but cease towards the N. and E. The great wealth of the gov. is in its forests, which, besides timber, furnish charcoal both for common fuel and blast-furnaces; potash, tar and pitch. The chief minerals are iron and copper. P. (1850), 888,000.

VOLGODA, a tn. Russia, esp. above gov., on the Vs. logda, in a beautiful district extensively occupied with gar-

dens, 846 m. E S.E. St. Petersburg. It consists chiefly of old wooden houses and has 51 churches, a theological seminary, a gymnasium, a monastery, a museum, a school, several chapels, manufactures of silk goods, linen, plain and printed; sailcloth, soap, leatherware, white-linen, candles, and various articles in gold and silver, numerous tanneries, and an extensive trade. Pop. (1849) 13,714.

TOLPEDO a to. Italy, Piedmont, div Alessandria, prov and 6 m E Tortona, on a slope above r bank Orsuno with a church, and a charitable endowment. Pop. 1070

TOLPIANO a to. Italy, Piedmont, div and 11 m N N.E. Turin, on a hill above the Malone. It has four fortified palaces, a dilapidated castle and two churches. P. 3663

TOLSK or **TOLSC**, a to. Russia, gov and 70 m. N.E. Tver, on bank Volga, with three churches, a superior educational establishment and manufactures of earthenware, tin-ware, tile-works, and an important trade in corn and fish. Pop. 11,000.

TOLSTOCHOK (Vikars), a to. Russia, gov and 72 m N W, Tver, on the canal which, by uniting the Tver and the Tana, gives a continuous water-communication between the Baltic and the Caspian. It is surrounded by a fosse, regularly built, and has an imperial palace, three churches, a school, two hospitals, a handsome bazaar, and a very active general and retail trade. Pop. (1851) 9,125

TOLFA a to and com. Italy, prov and 11 m N N.W. Mantua, near r bank Mincio. It has many fine mansions, a parish church, primary schools, a charitable endowment, and a trade in corn, wine, and silk. Pop. 5000

TOLIA AEWANA, or **ADUKI** a river W Africa rises in the mountains of Koug flows easterly S.E.E. forming the E. frontier of Achantia and falls into the Gulf of Guinea on the Slave Coast. The chief settlements are the Hami which joins it on the right, and the Loka on the left. Its course exceeds 500 m. but is well circumscribed.

TOLIAGGIO a vil. and com. Italy, Piedmont, div Genoa, prov and 34 m. S.E.E. Novi, at the foot of the Bocchetta with three large squares, a church, a ruined castle, an hospital, and an endowed school. Pop. 2180

VOLTAIRE, a cape, N Australia, lat. 14° 15' S., lon. 125° 45' E. (n.)

VOLTAN, a cape, S. Africa, at the S. entrance of the Orange River; lat. 28° 44' S., lon. 18° 33' E. (n.)

VOLTERRA (Latin, *Folterra*), a to. Tuscany, 23 m S.W. Florence, on a plateau above l. bank Era. It is an ancient Etruscan city, well surrounded by Etruscan walls, within which is the modern town, which has a separate enclosure of walls, is defended by a citadel and entered by five gates. The principal buildings are the cathedral and parish church, town house, court-house, college, doctress' seminary, museum rich in Etruscan antiquities, mint, and hospital. The manufactures are chiefly articles of alabaster and of silk. Pop. 4679

VOLTURINO, a to. Naples, prov Capitanata, dist Foggia, on a hill in a fertile district. Pop. 1580

VOLTUYA, a river, Spain, rises in the S.W. of Old Castle flows N.W. then easterly N.E., and joins l. bank Kraus 15 m. below Segovia, after a course of nearly 60 m.

VOLTRI, a to. Italy, Piedmont, prov and 10 m. W. Genoa, at the mouth of the Cervo in the Gulf of Genoa. Its walls have disappeared, but it is still entered by two ancient gates and has two handsome and richly decorated parish churches, with good paintings; a convent, and a dilapidated castle. Pop. 9271

VOLTSCHANSK or **WOLTSCHANSKA**, a to. Russia, gov and 45 m. N.E. Karkov on the Voltschanka, an affluent of the Severn-Dnester, with two wooden churches, and a trade in agricultural produce. Pop. (1849) 5970.

VOLTURARA two places, Naples—I, a to. in prov Capitanata, 36 m. W. Foggia. Pop. 1150—2, a to. Principato-Ultra, 13 m. W. W. San-Angelo de Lombardi with four churches and several chapels. Pop. 4000

VOLTURNO (ana. *Vulturnus*) a river Naples, rises in the W. slope of the Apennines, near Castellana, prov Larino flows easterly S.E.E., till it reaches the Calore, when it turns W. to Capua, and about 15 m. below, falls into the Tyrrhenian Sea, total course, about 80 m.

VOLVERA, a vil. and com. Italy, Piedmont, div Turin, prov Fianarda, near Sene, l. bank Cuneo with a parish church and courthouse. Pop. 1938

VOLVIO (ana. *Volvicium*), a to. France, dep. Puy de Dôme, at the foot of an old volcanic cone, 5 m. from Riom, with a handsome church, a fine old feudal castle, and extensive lava-querries, in which most of the inhabitants are employed. Pop. 3264

VOMO the north-easternmost of the Angas group, belonging to the Fojos Islands, in the S. Pacific, lat. 17° 58' S., lon. 177° 10' E. It is 2 m. in extent, and famous for its turtles, which abound from December to March

VONITZA, or *Vonizza* (ana. *Zonizza*) a seaport in Greece, Livadia, at the mouth of a small stream, on the S. shore of the Gulf of Arta 80 m. W. W. Lepanto. It is partly surrounded by a double wall, and has a good harbour with some trade in olive-oil and corn, but is very poorly built.

VOOREBURG, a vil. Holland, prov S. Holland, 6 m. N. Delft, a station on the railway to the Hague, with three churches, and several schools. Pop. (agricultural) 2316

VOORDE a vil. and com. Belgium, prov E. Flanders, 24 m. S.E.E. Ghent with a flour-mill, and manufactures of linen. Pop. 1109

VOORMEZELER, a vil. and com. W. Flanders, 27 m. S.S.W. Brugem with manufactures of starch and tobacco, and a flour-mill. Pop. 1106

VOORU, an is. Holland prov S. Holland, bounded N. by the Old Nassau, W. the North Sea, S. the Helder-vliet and separated E. from Bollenland by the Rijn. It is about 17 m. E. to W., by 8 m. broad, and contains the towns of Brille and Hellevoetsluis

VOORSCHUTEN a vil. Holland, prov S. Holland, 3 m. S.W. Leyden, near the Delftse-Vliet and the railway to Rotterdam, and with three churches, some building-yards, a rope-walk, limakins &c. l. op. 1093

VORARLBERG, a circle, Austria, Tyrol, but once an independent territory. It is bounded N. and N.E. by Bavaria, E. the circle of Oberland, S. the Swiss cantons of Graubünden, Linth-Rodan and can. St. Gall, area, 746 sq. m. The surface is very mountainous in the E. and the S. where the Arlberg a chain of the Alps attains the height of nearly 10,000 ft. and forms part of the great European watershed, sending a small part of the drainage to the basin of the Danube and the rest to the basin of the Rhine, which forms the N.W. boundary of the circle. The land is tolerably fertile, but much more pastoral than arable. Much wine and fruit are produced, the forests are extensive, and iron is largely worked, Vörsberg has still its own state. Regens is the capital. Pop. 98,831

VORCHEIM, a to. Bavaria. See *FORCHEIM*.

VORDATE, an is. Indian Archipelago, Banda Sea, N.E. side of Lusat lat. 7° 50' S., lon. 152° 18' E., about 10 m. long N.E. to S.W. It is the north-easternmost of the Thunor Laut group and has an anchorage on the N.W. side.

VORDERAHERG a market to. Austria, Tyrol, circle and 19 m. W. N. W. Bruck with a fine villa belonging to the Archduke John from mines and extensive ironworks. P. 1630

VORINGBOEG a to. Denmark. See *WORINGBOEG*

VORREPE, a to. France, dep. Isere, on the Rhois, 9 m. W. Grenoble with manufactures of hats and leather oil and corn mills and a trade in the sand for glass. Pop. 1314

VORIA, a river, Russia, rises near Gjat, gov Smolensk flows S.S.W., and joins l. bank Ugra; total course, 60 m.

VORMS, an is. Russia at the entrance of the Gulf of Finland and close to the N.W. coast of gov Rosthonia, about 9 m. long E. to W. by 6 m. broad. Its inhabitants, about 1100, are of Swedish extraction, and live by fishing and agriculture.

VORONA, a river Russia, rises in the S. of gov Perm, flows first W. then turns S. traversing gov Tambov N. to S., and joins r. bank Chugva after a course of about 280 m., partly navigable.

VORONEJ a river Russia, formed on the frontier of gov Russia and Tambov by the junction of the Lason-Vorony and the Potoroi Voronej flows through the W. of gov Tambov enters gov Voronej, passes the town of that name, and a little below joins l. bank Don, after a course of about 280 m. Though somewhat obstructed, it is navigable, and by means of a canal between it and the Rassa, an affluent of the Oka, communicates indirectly with the Volga.

VORONEJ, *VORONSKA*, or *WONONSKA*, a gov Russia, bounded N. by gov Tambov; N.E. Saratov, E. and S.E. Don

Comstock, S. Kharlovskiy; and W. Kharlov, Kourch and Orlov greatest length, N to S, 385 m. central breadth, 160 m. area 16,406 sq. m. The surface, generally flat or undulating, belongs wholly to the basin of the Dnie, which enters it in the N., traverses it very obliquely in a S.E. direction, and drains the far greater part of it directly. The other principal streams are its two tributaries, the Choper and the Dnestr. The air is clear and healthy and the climate temperate, though the rivers freeze for about three months. The soil, a heavy loam, is remarkably fertile, producing all kinds of grain in the greatest abundance even without the aid of manure. Large quantities of hemp, flax, and tobacco are grown, melons and other fruits are very abundant. The pastures rear vast numbers of cattle and sheep, and the forests are covered with magnificent timber. The principal minerals are iron and saltpetre. Manufactures, though of recent origin, have made rapid progress, and considerable quantities of woolen and linen cloth are made. Distilleries are very numerous. The principal exports are corn, cattle, hides, honey and wax. Pop. 385,000, 1,691,000.

VORONEZ a *tu*. Russia, gov. above gov. on a height above the Voronez river in confluence with the Dnie. 396 m. S.E. Moscow. It consists of a high town, a low town, and an extensive suburb, is tolerably well built; and has 18 churches, two monasteries, an episcopal palace, townhouse gymnasium diocesan seminary annual hospital and poorhouse manufactures of woolen and linen cloth, soap and vitriol, numerous tanneries, a considerable trade in iron and tallow, and a large wool-flee which lasts about a fortnight. On a little sandy island here Peter the Great erected buildings-docks in which he intended to construct ships of war for the Black Sea, but on the acquisition of new territory on the shores of the sea itself, a better situation for the purpose the idea was abandoned, and not only the docks but the palace which he had caused to be erected have almost entirely disappeared. P. (1842) 43,800.

VORUSMART a *vil* Hungary Thaurer Danube, co. Baranya, near the Danube, 4 m. from Herceg-Stulics with two churches, and a ruinous castle. P. p. 1597.

VORUSPATAK a *vil* Austria, Transylvania on both sides of the Tura, 25 m. h. W. Karlsburg. It consists of about 500 well-built houses, almost all inhabited by Walachians, and is famous for its gold-mines, which have been wrought from an early time, and are still valuable.

VORSELDY a *vil*. Brandenburg, on the Aller 20 m. h. E. Brunswick with a parish church tanneries and distilleries, and three annual fairs. Pop. 1661.

VORSKLA, a river Russia, rises N. W. of Kharlov Bors 88 W., passing the town of Poltava, and after a course of about 140 m. joins the bank Dnieper.

VORSELELE a *vil* and com. Belgium prov. and 24 m. N. Antwerp, on the As with manufactures of wax-tapers, two breweries, a malt and a flour mill. Pop. 1767.

VORST a *vil* and com. Belgium, prov. and S. Antwerp with a brick work, tannery and flour-mills. Pop. 1894.

VORST a *vil* Rhodan France, gov. Dilsdorf, circle and 6 m. S.E. Kempen with a R. Catholic church. P. 1079.

VORSES (German, *Vogesen*, *Nogosa* Latin, *Vogesia* *Mons*) a mountain-chain, in the N. h. of France, and Palatinates of Bavaria, stretching S.E. W. to N.E. between the source of the Moselle and that of the Laster, for about 150 m. with a breadth varying from 20 m. to 45 m. Its loftiest summits called from their rounded form *beils*, are nearly 6000 ft. the culminating point, Ballon-de-Guebwiller is 4686 ft. The slopes, particularly the E. are very precipitous, but generally well covered with past-forests the prevailing strata are igneous; the minerals include argillaceous lead, copper lead and above all salt. The principal rivers of the chain are the Ill on the E. and the Moselle, Sarre, and Meurthe on the W. slopes.

VORSES, an E. dep. France, bounded, N. by dep. Meuse and Meurthe, E. by the Rhine and Haut-Rhin, S. Haute-Saône and W. Haute-Marne greatest length, E. to W., 76 m., mean breadth, 39 m., area, 2350 sq. m. It derives its name from the mountain-chain which bounds it on the E. and sends out ramifications over the greater part of its surface. Its S. portion is traversed E. to W. by the chain of the Fossiles. Several mountains exceed 4000 ft., and the culminating point, Ballon-de-Guebwiller is 4686 ft. The mountains are generally well wooded. Only a narrow zone on their lower slopes is cultivable. In the lower grounds, on an elevated but toler-

ably flat tract, grain, hemp, flax, and potatoes are extensively raised. The wine produced is indifferent, but the department has long been famous for its kirsh-wasser, made from the produce of extensive cherry-plantations. The principal rivers are the Meuse, Moselle, Vaire, Madon, Meunier, Saine, Fave, and Meurthe but none of them are navigable within the department. The minerals include argillaceous lead, copper lead, argillaceous cobalt, marble, willamite, slate, kaolin, and blue apatite. The chief manufactures are cotton and linen cloth, iron, various instruments, tannery and wooden shingles, nails, iron, steel and iron ware, paper, leather, pottery and glass. Epinal is the capital. Pop. (1832) 457,409.

VOSKRESENSK, a *tu* Russia, gov. and 85 m. W. N. W. Moscow 1 bank Istra, pleasantly situated, and celebrated for its large and handsome monastery, founded in 1656. P. 1008.

VOSMAERISBAAT (De), a bay, Indian Archipelago, E. coast, Isl. Celebes, in the Gulf of Tomali or Tofo, with a small fort on its N. side.

VOSTITZÁ [anc. *Apollina*] a seaport in Greece, Morea, on a height above the S. shore of the Gulf of Lepanto. The harbor though not capacious, has depth of water for the largest vessels and has considerable commerce in currants and timber. The modern town is struggling and ill built. Of *Agynis* which was once the head of the Arabian league, few vestiges remain. Pop. about 4000.

VOTKA or *WOTKA* a *tu*. Russia, gov. and 180 m. S. E. Vitebsk, on the D., with a church, hospital school and extensive iron works, which employ about 8000 workmen. About 70,000 workmen are annually made. Pop. 6000.

VOTTEM a *tu* and com. Belgium, prov. and 2 m. N. Lodge, on an affluent of the Meuse, with manufactures of all kinds of hardware, including firearms. Pop. 1748.

VOUGA a river Portugal runs in the N. h. of prov. Beira, flows E. and falls into the Atlantic at Aveiro, after a course of about 48 m.

VOULTE or *VOULTE* (La) [anc. *Vella*], a *tu*. France, dep. Ardèche, 10 m. E. N. E. Privas, on a steep hill above the Rhone with a large old castle, in which Louis XIII. resided for sometime and extensive iron-works. Pop. 3079.

VOLZHEN a *tu* France dep. Ardennes, 1 bank Aune, 30 m. S. Metz, with manufactures of leather-work, bleaching, and oil and a trade in corn wine, oil and cattle. P. 3639.

VOLZBURCH par Eng. Harford 2690 ac. P. 823.

VOLLENK, a *vil* and com. Belgium prov. E. Flanders, 23 m. N. E. by E. Ghent. It is well built and has a large church, with some fine tombs, a townhouse, three schools, an hospital dye-works, breweries, and cotton manufactures and a trade in grain, fruits, and cattle. Pop. 5532.

VALLA or *VALLEYA* a river Italy rises on the E. slope of the Maritime Alps, a little S. W. of Monte-Via, flows N. to Castiglione, then S. N. E. and joins the bank Po about 5 m. above the confluence of the Marsa.

VRANA, a *vil* Austria, Delnata, prude and 19 m. S. E. Zara, with the ruins of a castle, in which the grand master of the Templars once resided.

VRANA, or *VIVANNA*, a *tu*. Turkey in Europe, in the S. of Servia, in an angle formed by the confluence of the E. Morava and Vitar 70 m. E. S. E. Sophia. Pop. 3000.

VHANYUCZ, a *vil* Hungary Thither Thiem, co. Krassova, 8 m. from Oradea, with a church, and a trade in wheat, maize and cattle. Pop. 1108.

VRFDEN a *tu* France, prov. Westphalia, gov. and 35 m. W. Münster on the Beckel, with three churches, manufactures of linen and sherry and some cattle. Pop. 2598.

VRLEWYK a *vil* Holland, prov. and 6 m. S. Utrecht on the Lek, where it has a good harbour. It has a church and a school, and the inhabitants are chiefly occupied in suffering and the transit trade. Pop. 1142.

VRICEKO, or *VRICENIK* a *vil* Hungary, Thither Danube, co. Thurocs, 18 m. from Budao, with a church, and a trade in dairy produce and cattle. Pop. 1512.

VRICKENVEEN, or *VRICKENVEEN*, a *vil* Holland, prov. Overijssel, 34 m. N. E. Deventer; with three churches and a school. Pop. (agricultural), 3708.

VRISLAND a *prov* Holland, *de FRIJSLAND*.

VUGHT, or *VUGT*, a *vil* Holland, prov. N. Brabant, 2 m. S. Hertenbosch, 1 bank Donceel; with a townhouse, two churches, two breweries, four tan-pits, and several mills. Pop. (agricultural), 1018.

VUKOVAR, a market in Austria, Civil Servants, at the confluence of the Vuka with the Donau, 26 m. S.E. Enns. It is well built and has a R. Catholic and two Greek churches, a Franciscan convent, and silk-mills. Pop. 6900.

VULCANO, or **VOUGAZO** (anc. *Vulcanus*), the most S. of the Lipari isle 5 m. S. Lipari, 12 m. off the N coast of Sicily lat. 38° 21' N; lon. 14° 53' E; length, N to S, 7 m; breadth, 7 m. Its surface is covered with mountains, the chief of which is Mount Aetna, containing two craters, from which dense whirling clouds of smoke are incessantly sent forth. It has two good roads, but no inhabitants.

VUNA, one of the principal of the Fijee isle S. Pacific, lat. 17° 2' S lon 175° 50' E. It is 35 m long and 5 m broad. It rises gradually to a central ridge 2552 ft. high, and is fertile. Pop. 7000. On the N.V. side is the principal town, Somo Somo consisting of about 200 houses.

VUOXEN, a river Ruusla rises near lat. 64° N., in the N. of Urolo Kuopio, Finland, and proceeding S.E. through a series of lakes, forms a magnificent cascade, and turning N falls into the W. shore of Lake Ladoga at the town of Kexholm; total course, about 300 m.

W

[For names not found under W, look under V]

WAAG a river, Hungary, formed in the F. part of eo. Lipan by the White Wag and Black Wag which descend from the Carpathian flows W N W to Zolna. S.E. W to Leopoldstadt, and S.E. to Komorn where it joins the Danube after a course of about 230 m. It receives on the right the Arva Kluska, and Druvay and on the left the Thurose and Nentra. Its upper course is through a narrow valley its lower through wide and level plains.

WAAGO, one of the Fibre Islands (about 400).

WAAL (Du) [Latin *Vallis* or *Valleis*, French *Vallée*], a river Holland being the S arm or bifurcation of the Rhine, which branches off about 12 m. S.E. Arnhem flows W by past Nijmegen and Tiel, and joins the Maas at Gornsbach about 17 m. above which there is also a connection with the Maas. The Waal is very much obstructed by sandbanks.

WAALWIJK a market in Holland, prov. N. Brabant, 11 m. W Hartogenbosch with a Reformed and an elegant R. Catholic church. It has water-communication with the Maas, a trade in grain and cattle some shipping, breweries, canneries &c., and six annual fairs. P. (agricultural) 2945.

WABASH, a to U States, Indiana, pleasantly situated on the Wabash river and on the Wabash and Erie canal 73 m. N by F. Indianapolis, with several churches, a court house, jail, and a large trade. Pop. 1199. —The river rises in the S.W. of Ohio flows W and S across Indiana, then nearly S between Indiana and Illinois, and falls into the Ohio of which it is the largest tributary after a course of about 400 m. It is navigable for steam-boats to La Fayette about two-thirds of its course, and connects Lake Erie with the Ohio by the Wabash and Erie canal.

WABREN, a vil. House Cassel prov. Niederhessen, circle and 4 m. E.S.E. Friedlar, with a church and castle. P. 1085.

WACHENWATHE par Eng. Comb, 1901 as 1 212.

WACHLAWAY, a river, U States rises from a lake of the same name in the S. of N. Carolina, flows first S.E. then S.W. into S. Carolina, and falls into the estuary of the Great Pedee nearly opposite to Georgetown total course, about 80 m.

WACHBACH, a vil. Württemberg, circle Jaxt, 5 m. S. Mergentheim with a church and a castle. Pop. 1201.

WACHENHEIM, a market in Bavaria Palatinate, at the foot of Mount Hardt, 12 m. N. W. Spire. It contains a church, and has a trade in wine. Pop. 920.

WACHTENDONK, a vil. Rhensish Prussia, gov. and 24 m. N. W. Düsseldorf, on an island formed by the Rhine, Net, and Heesbeek with a church and an hospital, manufactures of ribbons, woollen and flannel cloth and a bleachfield. P. 1160.

WACHTERSBACH, a to. House-Cassel prov. and E.N.E. Hünna, on the Künze, with a castle and a Latin school, and several mills. Pop. 1863.

WUPABUCU, a lake, Brazil prov. Minas-Geraes, near the frontiers of prov. Bahia, on the top of Mto. Sinão, a mountain-ridge belonging to the Cordillera-des-Almoraes. It was once celebrated for its gold and emeralds, though it does not possess much of either.

VUREN a vil. Holland prov. Gelderland, 24 m. W. R. V. Tiel on the Waal dyke, with a church. P. (agricultural) 965.

VUSITRIN or **VITOMIRITZ**, a to. Turkey in Europe, in the S.W. of Servia, in a mountainous district on the Ther an affluent of the Morava, 35 m. S.E. Novi Bazar. P. 3000.

VYNCKT, a vil. and com. Belgium, prov. S. Flanders, 12 m. W Ghent with a church, school, brewery starch-factory, three oil and several flour mills. Pop. 2219.

VYTERA, or **WYTERA**, a to. Russia, gov. Olenets, on the Vytyra which is here navigable, 53 m. S.E. Petrozavodsk. It has two churches, manufactures of candles, brick-works, building-yards, and an important transit trade. Pop. 2600. —The river rises in the S. of gov. Olonez, flows N.W. and falls into the S.E. shore of Lake Onega. The Marinsk canal connects it with the Kojva, and through it with Lake Ilkio and the Volga. Its course is about 70 m.

WACKEV, a vil. and com. Belgium, prov. W. Flanders, 19 m. S.E. Bruges. It has wide and straight streets a fine square, a school, two schools, four breweries, four distilleries, several saws and oil mills, and manufactures of linen and cotton fabrics, leather, starch hie, and tobacco. Pop. 3559.

WACKTFFWACK, a vil. and com. Belgium prov. E. Flanders, 10 m. N.E. Ghent, on the canal thence to Moerwaert with a church, chapel, townhouse, various schools, three breweries a bleachery, oil and flour mills, manufactures of linen, leather, pottery and mustard, and a trade in grain, cattle, timber &c. Pop. 3947.

WACION par Eng. Hereford 1602 ac. Pop. 120.

WACION (Siamoa and FANVA) par Eng. Norfolk, 1042 ac. Pop. 561.

WAD-MEDRA, or **OUAD-MEDRA**, a to. Egyptian dominions in the S. of Nubia, 1 bank Blue Nile, about 80 m. S.E. Khartoum. It is of considerable importance, and was once regarded as the capital of E. Sudan, having for that purpose been substituted for Senaar though it was itself afterwards supplanted by Khartoum. Pop. including the garrison nearly 4000.

WADAI, or **OUADAI**, a country in the interior of Africa, S. of the Great Desert, and E. of Darfur. It is called Waddy in Persian in Barbary and Morocco; but the natives themselves, though they often use the name Waddy, or Waddai, prefer that of Der Sakeh while their neighbours in Darfur, Kordofan and Bornu, call it Bardi, or Bardi. The name Waddai, given to it by some writers, seems to be derived from a particular tribe in Waddy and to belong properly to a single district, or perhaps to the tract situated along the right or N. bank of the river which flows from Waddy W. to Lake Fitra.

Waddai —The geographical position of Waddy or of its capital Waddai, cannot be assigned with even tolerable exactness for that country has not been yet visited by any Europeans and the itinerary distances mentioned in the routes of native pilgrims passing through it between Agroland and Egypt differ so widely, as to render satisfactory inference from them impossible. If the position assigned by Browne to Kobbé, the chief town of Darfur, be assumed as correct, and also the distance (144 days journey), which he sets between Kobbé and Waddai, then the latter place will lie 220 geo. m. at the nearest W. of the former, or in about 24° 20' E. lon., whereas the best authorities concur in setting it farther W. and recently, Dr. Barth, with abundant native information, places Waddai in lat. 14° N lon. 22° E a position which is perhaps rather too far W., but near the true meridian.

Waddai, Nature, &c. —The extent of Waddy according to the best Arab and native authorities, is about 30 days' journey N to S, and 24 E. to W. These must be understood as

pedestrian journeys of 6 m. or 8 m. Wady is a larger territory than Darfur which is sterile and in some places of water. The hills which diversify the surface run chiefly in chains E. to W., these forming two hollows, the more of which is styled Baha—that is, the valley or lowland; the more N., Boteiya, the diminutive of Baha. From the Magalyt Arabs, who dwell near the Baha, this river is supposed to take the name of Malika, and to be the Nile of the Bahr. Through these valleys flow from the highland on the E. confines of Wady, two streams, so copious in the rainy season as to overflow the adjoining plains, and in the dry season never wholly exhausted. They unite, lower down, to form the river (Bahr-el-Ghazal) which periodically rushes and converts into a lake the hollow plain of Fitra, about 500 m. W. of Wady. Ascending to the Shalib-el-Toumy, another river the Bahr-el-fer, far exceeding in magnitude those already mentioned, flows N. W. through Wady from the mountains of Marrah, S. of Darfur. But the Bahr-fer does not figure in the Arabs' account with the vividness and emphases of detail which seem to belong to the natural importance of a great river in a tropical country. Its name, too, seems borrowed from the rivers of Bagharm, and, finally it disappears altogether from the information concerning Wady collected with unexampled industry by Dr Barth.

Deserts.—The strip of desert on the E. side of Wady, separating it from Darfur is by no means utterly inhospitable, but lying within the limits of occasional rains, it affords pasture, and has in many places trees; yet it is wholly untraversable. For, owing to the deep-rooted nomadism existing between wandering tribes on the one hand and a settled population on the other, the interval of three or five days' journey (as the width of that tract is variously estimated) would not allow either party to feel secure. On the N. Wady has the mountains and rocky desert of the Tibboos. The plains on the W., towards Fitra and Bagharm, with an extent of eight or ten days' journey, resemble the desert but not quite and not on the E., and are occupied by numerous tribes of Arab or Berber race. Towards the S. the country merges occasionally in luxuriant vegetation, copiousness of water and variety of aspect, till at last the forests of habash and ebony and numerous communities of pagan negroes, mark the limits of the horse and camel keeping Mahometans of Wady.

Production.—In respect of fertility Wady is said to be much superior to Darfur producing in abundance durra, dohln, maize, and the other grains as well as fruits of that zone. It has also a better climate, though often visited by violent hurricanes during the rains. The cold N. winds during the winter diminish the evaporation, so that the rivers in general never wholly dry up. The banks of the Baha and Boteiya are lined with a broad mass of trees, behind which spread well cultivated plains, annually irrigated, and teeming with abundance. Cattle and horses are reared in great numbers, and the various tribes and races inhabiting the country find such a suitable spot for its peculiar husbandry, whether pastoral or agricultural.

People.—Of the various tribes or nations composing the population of Wady five are considered as primitive and chief, namely the Magalyt, the Myynah, Dajo, Kaashmrah, and Gordin. These are probably of Tibboos or Berber origin. Then come the Kikah, the Jekashrah, and the Birghid. The Magalyt, a bronze-coloured people of mixed origin, occupy the borders of the country on the N. E. and N. W., and are numerous in Wady as well as in Darfur. The Myynah and Dajo both dwell in the S. parts of the country, and are quite black. The Kaashmrah speak a peculiar language, they are industrious, docile, and orderly, with comparatively light complexions. They cultivate the valley of Boteiya, sowing, besides their grains, onions, coriander, pepper, and other condiments. Their villages are all ranged along the S. border of the valley, and wear an appearance of abundance and plenty. The Gordin are a pastoral tribe, alienated in some degree from the other tribes of Wady by the ferocity of their complexion. The Kikah, in the E. of Wady are a pastoral people, distinguished for personal beauty, and who, on the present, furnish the sultan and the opulent chiefs of the N. with female slaves; for the five primitive tribes are alone exempt from servitude. The Jekashrah speak and still remained from the sultan's slaves, are distributed in groups throughout the country. The Birghid are the guides of Wady, mules and herders, and in corruptible thieves, they are thrust beyond the pale of civility,

and consequently acknowledge no moral restraint. This enumeration of the elements of a motley population might be easily lengthened, and all these various nations are distinguishable at once by physical appearance, and by differences of language. They have also their separate chiefs or kings, who, though owning subjection to the Sultan of Wady, are not on that account less despotic within their petty domains. Around Wady, again, are numerous tribes of Bedwin, nearly all affecting a noble Arab descent, and doing homage to the Sultan of Wady with more or less sincerity. The Zabadah, the Areyat, and the El Bahr (river-tribe) are the chief Arab Bedwin on the W. On the N., the Mahamid feed immense droves of horses and camels. Further E. the Bidiya, of negro origin, imitate the manners of their Arab neighbours, and submit on camels' milk. Towards the S., parties of the widely-spread nation of the Follahs, or Follay, keep immense herds of cattle wherever the pasturage attracts them.

Customs.—In manners, dress, and mode of life, the Mahometan inhabitants of Wady resemble those of Darfur. Their houses, however are said to be superior, being often of good masonry (in Wara probably) whereas in Darfur they are constructed wholly of straw. The people of Wady have the reputation of great generosity and of courage, in which latter quality the Darfurians are almost always deficient. It is remarkable that, anticipating the doctrines of Gall and Spurzheim, they have always held that the organ or seat of courage is a protuberance behind the ear, and consequently, those who have distinguished themselves in battle are considered to bear, as a badge of merit, large tumours artificially raised behind the ears by cupping. The court ceremonies, elaborate, and for the most part humbling to the subject, never so much of barbarous despotism, yet it is said that the inspection of all official accounts, rigidly enforced as a public right, effectually maintains a pure administration. It is said that the sultan's body-guard the Oobda, amounts to 4000 men, and that 1000 of these in slanks and round iron-helmets, and armed with clubs, keep watch every night round his palace in Wara, the people of which town do not exceed 40,000.

Industry.—There is little manufacturing industry in Wady. The people know how to spin and weave cotton, and can dye their wool, which are inferior however, in texture and colour to those of Bagharm, they can work iron, and make coarse implements for their own use, but the manufactured articles chiefly in demand, and most prized by them, are imported from Egypt or Barbary. They thus obtain beads and other glassware, cloth caps, printed cottons, woollen and silk stuffs, guns, swords, and artillery of all kinds, saddles, paper, copper, tin, and Spanish dollars, on which last the importers always realize a large profit. In return they export gum, ivory, ostrich-feathers, manure, skins, and make water-bags and slaves. These last form, in truth the chief merchandise of Wady. Hunted down in the S. countries by private adventurers, who buy a licence of the government, the poor captives are driven across the deserts to Barbary and Egypt, the greater number of them perishing on the way. This is the dark stain which defaces the otherwise fair picture of Wady. Richly endowed with the gifts of nature, this country is almost cut off from intercourse with, and gloried in a trade condemned by, the civilized world. Under these circumstances, Wady seems destined to be soon impoverished by the social improvements going on around, and to be the last reached by the benefits that flow from their train.

Rulers.—The origin of the Wadyan dynasty is involved in a cloud of traditional fables, separately plausible, but collectively inconsistent. It is said, among other things, that the Samawry, a noble tribe dwelling on the mountains Ab-Sawin, are descendants of the Abbasids caliphs, or rather, were adopted by a wandering member of that family. The Samawry became afterwards intimately allied with the Malahab, the Malahab, and Madalah, and these now form the four royal tribes of Wady, from one of which the sultan must be derived. Notwithstanding this nobility of descent, it does not appear that the Wadyan dynasty can be traced in history beyond the sixth generation anterior to Abd-el-Karim, who succeeded to the throne in 1803 and whose personal history is, in European eyes, the only interesting portion of the Wadyan chronicles.

Recent History.—Sultan Abd-el-Karim, nicknamed Selim (son, a highly-prized luxury in those countries) subdued the mountaineers of El-Tamali, a rocky district N. E. of Wady

and leading an army S.W. into Baghdad, he deposed the pro-Syrian sultan of that country. In the success of his arms consisted in less than his strenuous efforts to open communications with Egypt and the shores of the Mediterranean. Sensible of the disadvantages attending his secluded position, the road on one side being commanded by Dair, on the other by Baghdad and Bors, or by the powerful tribes seated round Fitra and Kameh, he resolved on exploring new and more direct routes across the desert. With this view he sent an envoy to Mohammed-Ali, the pasha of Egypt, who met his wishes, and despatched in return a caravan to Wadky. This, however, never reached its destination, being seized and plundered by the Dairians. A caravan sent directly N. from Wadky by a new route to Bagdad, was hardly more fortunate. The goods eventually arrived at the seaport, but the people nearly all perished having lost their way, and wandered long in the desert. The experiment, however, has been since repeated frequently, and with tolerable success. Baldwin, naturally disposed in favour of enlightenment, determined that one of his sons should be qualified by education to promote in Wadky the interests of civilization. For this purpose he sent Ishtar, a youth of thirteen, to go to Egypt by way of Bagdad; but the caravan was pillaged and the prince detained 10 or 12 years a captive in Tripoli, till at length, through the influence of the English consul, he obtained his liberty, and reached Cairo in 1827. His story published at the time in an English periodical, was deemed by many a romance, and by some was it the roughly understood. It is now however, ascertained that the young captive was the favourite son of the Sultan Abd-el-Kerim. The latter died about 1815 and has been followed on the throne by a son a grandson and lastly by a brother. Ishtar, however, it appears, had attempted prior to 1846, to drive his uncle from the throne, and, in 1849, he was in a hostile attitude in Dair, awaiting an opportunity to assert his claims.

WAELEEM, a vil. and com. Belgium, prov. and 13 m. S. Antwerp, on the Nothe and the Dyle, with manufactures

of linen, an oil and a flour mill and a trade in hay, corn cattle, and poultry. Pop. 1076

WAELENG, a tn. China, prov. Che-ling near the frontiers of Kiangnan, on the left bank of the Hsuey-river, and S.W. Hang-show. It is surrounded by walls, and otherwise fortified. Pop. about 150,000.

WAELEGHEM, a vil. and com. Belgium prov. W. Flanders, 9 m. N.E. Courtrai, with extensive linen manufactures. Pop. 6975

WAELEMAERDE, a vil. and com. Belgium prov. W. Flanders, on the Scheldt, 28 m. S.E. E. Bruges, with manufactures of linen, a brewery, a flour and a mustard mill, and a trade in agricultural produce. Pop. 1838

WAELECHOUT, a vil. and com. Belgium, prov. E. Flanders, on the Liefre, 8 m. N.W. Ghent, with extensive linen and cotton manufactures two breweries, a dye-work, two oil and four flour mills. Pop. 6095

WAELE (PAYS DE), an anc. dist. Belgium, prov. E. Flanders, nearly included between the Scheldt from Ghent to the village of Doet, a little below Antwerp, and a line drawn from that village to Zelanda. It is one of the most fertile and best peopled tracts of its extent in Europe, and was formerly called the pleasure-garden of Flanders.

WAELEMSVELD, a tn. and com. Belgium prov. E. Flanders, 16 m. E. by N. Ghent, 1 bank Durme. It has wide and paved streets and a handsome market-place, a richly decorated church, a townhall, convent, almshouse, several primary schools, manufactures of linen, cotton, and woollen fabrics, hosiery, leather, blue starch, vinegar, candles, chi cory, &c. and a trade in cattle and grain. Pop. 5393

WAELENDUSSEL, or **WAELENDUSSEL**, a vil Hungary co. Zips, dist. and 18 m. S. Lentschan, in a deep mountain-hollow, 1 bank Glinthay, with important iron-mines. P. 3383.

WAGNFELD, a vil. Hanover S.E. Dropholz, with manufactures of linen and a flax-mill. Pop. 2754

WAGNINGEN, a tn. Holland prov. Gelderland 9 m. W. by N. Arnhem on the railway thence to Utrecht, and near the Rhine. It has a number of fine-looking houses, a townhall, two churches, a Latin and several other schools, a library, and several markets for cattle and sheep, and a trade in the tobacco grown in the vicinity. Pop. 2165

WAGEE RIVER, a large river, Brazil N. America, N.W. of Hudson's Bay, its entrance is about lat. 59° 45' lon. 67° W.

WAGHEN or **WAWN** par Eng York 5085 ac. P. 347

WAGRAM or **DEUTSCH WAGRAM**, a vil Lower Austria, 1 bank Danube 12 m. N.E. Vienna, famous for the victory gained here by the French over the Austrians in 1809

WAGSTADT, a tn. Austria, Moravia, circle and 16 m. S.P. Troppau on the Wagbach. It is walled and has a parish church a castle, an hospital; manufactures of woollen and linen cloth and tanneries. Pop. 2409

WAGLERN, a vil and par Switzerland, can. and 9 m. S.W. Bern above r. bank Saane. Pop. (agricultural) 4975

WALLERSHAUSEN, a vil Hesse-Cassel underhessen circle Cassel with two castles, one of them a fine old ruin and three mills. Pop. 1478

WALLSTATT, a vil. Prussia, prov. Rhine, gov. and 10 m. S.W. Irgmutz. Near it, in 1241 the Duke of Lorraine defeated the Tyrars and in 1813 the Prussians defeated the French.

WAHRING, a vil Lower Austria, co. near Vienna so as to be almost one of its suburbs. It has a parish church with a beautiful cemetery in which Heusthorin is buried and manufactures of ordinary and morocco leather, refined wax, and Japan ware. Pop. 2800

WALA, one of the Feejee isls. N. Pacific; lat. (peak) 17° 17' 30" S. lon. 177° 43' E. It is high and rugged; with a peak about 1841 ft. high. Though apparently a rugged rock, it is said to be fertile. Pop. about 3000

WALBINGEN, a tn. Württemberg, circle Hechingen, on the Rems, with a Latin school and manufactures of articles in wood, tapestry, and several mills. Pop. 2700

WALBISDADT, a tn. Baden, circle Lower Rhine, on the Rodenbach S.E. Mannheim. It was once an important place, and rose to be a free-town. Pop. 1864

WALDHOFEN, two places, Lower Austria:—1, (under-Alb), 45 m. W. S.W. St. Pölten. It consists of a walled town with five gates, and of two suburbs; and has a church,

a stable, extensive iron-works, and manufacture of anything, wire, and hooks. Pop. 8000.—3 (on-the-Thames) A. m. 81 m. N. W. Krome with a castle, a parish church; manufacture of ribbons and cloth stuff. Pop. 1460.

WAIKATZ, or **WAKATZ**, or **WAKATZ**, or **WAKATZ**, an Indian Archipelago, off N. W. coast, Papua, from which it is separated by Dampier Strait lat. (S.E. pole) 0° 31' S. lon. 151° 10' E. (n.) It is about 70 m. long E. to W., by 20 m. broad; and forms two peninsulas, united by a narrow neck of land, formed by an arm of the sea, called Chabrol penetrating N. W., and almost intersecting the island. In the centre the island is high and hilly, and well covered with woods. Many small streams flow towards the coasts, which are well supplied with good harbours and bays, those of Boni and Oika, on the N. side, have anchorage for large vessels. The principal hill is Djohy Monopie, which is visible 50 m. off at sea, and there are three other peaks of a like magnitude. Though on the equator, the climate tempered by sea breezes and the moisture of the land is not particularly hot. The products include sugar, sugar-cane, pimento, cocoa-nuts, sweet-potatoes, calabashes, and probably likewise opium; wild swine are plentiful and there are birds of paradise, cockatoos, crows, doves, and wild barn-door fowls. The inhabitants consist of

NATIVE OF WAIKATZ.—From Papua. Voyage across the World.

Malays on the coast, Alfores in the hills, and Papuans the last build their large houses raised on bamboo pillars. The lower classes go quite naked, but the upper classes wear jackets and other clothes of Chinese materials, and turbans. Their arms are bow and arrow and pikes with iron points. A considerable barter trade is carried on with China, and sundry Chinese merchants have settled here and trade with Papua. Pop. 100,000.

WAIKATO a river New Zealand, N. m. issues from the N. E. extremity of Lake Taupo flows N. W. to Waikato marino, then turns suddenly W. and falls into the ocean, forming the harbour of Waikato. Its chief affluent, Manu, joins it on the left. It is navigable for 100 m. by vessels of 80 tons.

WAINFLEET a market in England on and 83 m. E.S.E. Lincoln, on the Steeping which is here navigable. It consists of three principal streets as well built of brick and has three parish churches, Wesleyan and Friends chapels, a grammar and another endowed school. Pop. 2556.

WAINAU a river New Zealand Middle Island, rises in the Snowy Mountains, flows E. N. E. and falls into Cleddy Bay Cook's Strait. It is navigable for several miles.

WAIROA New Zealand. See Hawke Bay.

WAITZEN or **WACK** (Latin, *Waccon*) a tn. Hungary, on and 31 m. N. West, L. bank Danube, which here forms the island of St. Andrew. It is beautifully situated among vineyards at the foot of the lofty Nagy-Szén and though long and narrow, is regularly built. Its principal buildings are a cathedral, built on the model of St. Peter's at Rome and considered, after that of Gram, the finest in Hungary; three other E. Catholic churches, a Protestant and an Armenian church, a bishop's palace, with two gardens, two churches, an episcopal seminary, a Franciscan college, and gymnasium, with library a large and well-endowed deaf and dumb institute

a high and two normal schools, a convent, and an orphan hospital. The trade is chiefly in wine and cattle. P. 11,371.

WAKEFIELD a town and port town and par. England, W. Riding, and 37 m. S. by W. York, beautifully situated on a slope rising from the Oulder, here crossed by a handsome bridge of eight arches, and on the Manchester and Leeds railway. It consists of three principal and several minor streets, not generally either well formed or well kept, though some, chiefly of modern construction, are spacious and regular, and has a fine old church, situated on a height, and conspicuous at a distance by its tower and a spire; four distinct churches, one of them a handsome structure crowned by a dome, Quaker, Baptist, Independent, Methodist, Unitarian, and E. Catholic chapels a handsome edifice of the Ionic order containing an assembly-room and music-school; mechanics institute, library &c. a courthouse, and house of correction public baths, a theatre a free grammar-school, in buildings equally handsome and commodious, a gross-merchant's, and several other schools a lunatic asylum for the W. Riding, numerous provident and charitable institutions, and literary and geological societies, the latter with a valuable museum. Woolen cloth and worsted long the staple manufactures of the town, though less important than formerly still employ many hands and there are also large iron-works, engineering, book-binding, paper, roping, foundries, machine, copperworks, and starch works. The market is one of the most important in the kingdom and to accommodate the dealers warehouses capable of containing 200,000 quarters have been erected. The trade in wool is also very extensive and large cattle-markets are held every fortnight. The celebrated classical scholar Dr. Bentley Dr. Potter Archbishop of Canterbury Dr. Hadcliffe, founder of the Radcliffe library at Oxford, and Joseph Bingham, author of the *Origines Ecclesiasticæ*, were natives of Wakefield. It sends a member to Parliament. Pop. (parl. bor.), 27,057. Area of par. 9311 ac. Pop. 83,117.

WALACHIA or **WALLACHIA** (German, *Walachei*, Lat. *Valachia*, French *Valachie* or *Valachie*, Dutch *Walachee*) a principality, Turkey in Europe, lat. 43° 40' to 45° 40' N. lon. 27° 30' to 28° E. and bounded, N. and N. W. by the Carpathians, separating it from Transylvania and the Banat of Hungary, W. E. and E. by the Danube, separating it from Moldavia, and N. E. by Moldavia, from which it is chiefly separated by the Sereth and its tributary Mulkow. It is thus remarkably well defined by great natural boundaries, and is of an irregular oval form, with a conjugate axis from W. to E. of 260 m. and a transverse of 130 m. vast, about 27,000 sq. m. Its surface may be regarded as a vast inclined plane, sloping from the Carpathians towards the Danube. In the W. and lower portion, called Little Walachia, the slope is nearly due S. E.; in the E. and larger portion, called Greater Walachia, it is S. E. Among the mountains of the N. and W. the elevation, which averages from 2000 ft. to 4000 ft., rises in particular summits to 7000 ft. and in Mount Bontschetsch N. of Kimpolung exceeds 8000 ft.; but this elevation is soon succeeded by a region of hills and undulating plains, and finally sinks down into extensive flats, often swampy and fringed near the banks of the Danube by a chain of shallow lakes. Many of the loftier summits are composed of gneiss and mica-schist; in the hilly region, though the lower part of the secondary formation appears to be wanting, the cretaceous system is largely developed, and is overlain by tertiary conglomerates, clays, marls, and sandstones. In the S. and E. shelled gravels, and alluvial deposits of great depth, form large and fertile plains. The most valuable mine of Walachia is salt, the mines of which were almost inexhaustible. Petroleum and asphalt are also abundant; sulphur is found in more limited quantities. The only metal of consequence is copper, which has been worked to some extent, gold is washed from the sands of several streams. The drainage belongs to the basin of the Danube, which receives it on its left bank, both directly and by numerous affluents, particularly the Buhuy, Aluta, united Yedé and Tollerama, Argech or Ardpuh, Jalomitza, and Sereth. The climate, in the more mountainous districts, is severe and cruel on the plains the winter continues long. The Danube and its tributaries are regularly

troops over for about six weeks. The soil is remarkable for its fertility, and with few exceptions the whole principally consists of being cultivated like a garden. With very imperfect culture, wheat, barley and maize are everywhere raised in abundance. Tobacco, hops and flax are also extensively grown; the vine thrives well and there is a profusion of all ordinary fruits. Cattle, sheep, and goats are reared in vast numbers. Manufactures are insignificant; the trade is principally in raw produce, exchanged against coffee, sugar, pepper, foreign wines, furs, and various manufactures, chiefly from Germany, Russia, and Great Britain. The inhabitants, chiefly pure Walachians, who are believed to have descended without much intermixture from the ancient Dacians, have lost almost all their better qualities during long misgovernment, and have now few qualities to compensate for their prevailing indolence, sottishness, cunning, and revenge. They belong generally to the Greek church, which provides very imperfectly either for the religious or moral education of its adherents. Walachia, with the adjoining principality of Moldavia, is nominally a dependency of Turkey to which it pays an annual tribute, and till recently was under an unfeigned kind of Russian protectorate. The prince, or *koyser*, is elected for life by the boyars or nobles, who hold a kind of legislative diet, by which the sovereign power is modified. Administratively the principality is divided into 18 districts, 18 in Great and 5 in Little Walachia. Pop. about 2,000,000.

WALAJANAGUR, a large town in Hindoostan, Carnatic on the Palour 55 m by S. by S. Madras lat. 11 40° N. lon. 78° 5 E. One of the cleanest and most neatly built towns in India. The houses are large, but are only one story high, and roofed with tiles. It has an extensive trade.

WALCHEREN, an isl Holand, prov Zealand at the mouth of the Scheldt, forming an irregularly shaped circle of about 11 m in diameter. It is a fine island in some parts well wooded, but generally consisting of fertile meadows, yielding corn and madder in great plenty. Fruit is abundant. There are some breweries soap-works salt-reworks, and saw and corn mills, &c, but the inhabitants are chiefly engaged in agriculture. It contains the towns of Fishing, Middelburg (the capital) and Veere. It is protected from the sea by strong dikes, which have frequently been ruptured. In 1806 the water burst the dikes and committed great damage, the country being in some places laid under water to a depth of above 30 ft. On July 30, 1809, the British expedition under Lord Chatham landed near Veere, and took Middelburg and Fishing, but had to retire the December following, after losing 7000 men by fever. Pop 40 000

WALDAPPEL, a town Home-Cassel Niedersachsen on the Werra, 30 m S.E. Cassel. Pop 1904

WALDECK, a principality Germany, forming the 80th state of the Germanic Confederation. It consists of two distinct parts — Waldeck proper so called, and the principality of Pyrmont. Waldeck proper is bounded N and W by the north Prussia, and S and E by Home-Cassel. Pyrmont, situated about 30 m. N. on the bank of the Weser, is enclosed by the territories of Prussia, Lippe-Detmold, Hanover and Brunswick. Area of Waldeck Proper, 547 sq. m. of Pyrmont 24 sq. m. The surface is mountainous, particularly in the S.W. of Waldeck where it is covered by ramifications of the Egegebirge, Rothaar-gebirge, and Habicht-gebirge, some of the summits of which attain a height of about 2500 ft. Some of the mountains are composed of slate, but the greater part of them are sandstone. In several districts basalt occurs. The rivers, of which the Eder in the N, and the Diemel in the S. of Waldeck Proper, are the principal all belong to the basin of the Weser. The climate is rather cold, but healthy. Nearly one-half of the whole surface is available for cultivation, though not remarkably fertile. Much of the remainder is covered with wood. The only minerals now worked are ironstone, lignite, slate, schist, black marble and alabaster. The chief manufactures are linen, beer and brandy. For ad miscellane purposes Waldeck Proper is divided into five bailiwicks — Twista, Diemel, Warde, Eder and Elsenberg. Pyrmont forms a single bailiwick of its own name. P 58,765, almost all Protestants

As part of the British Empire, and especially of England. Wales has been generally described under those two titles, but its comparatively isolated position, and its very marked features, both physical and moral, demand for it a short additional notice. It is composed of a peninsula, with the island of Anglesey situated at its N.W. extremity, and separated from it by the Menai Strait, now crossed by two very re-

markable bridges, and with a number of smaller islands chiefly at a short distance from the S.W. coast. The peninsula, washed N and W by the Irish Sea, and E. by Bristol Channel, and bounded W by the four English counties, Cheshire, Shropshire, Hereford, and Monmouth, is 185 m. long; whose widest 95 m. and whose narrowest only 35 m. broad, and has an area of 7289 sq. m. It is very mountainous, particularly in the N. division, where Snowdon, the culminating point of E. Britain, rises to the height of 3571 ft., is intersected by beautiful valleys traversed by numerous streams, including among others the Severn, which has its source within it, and in such is minerals, particularly copper in the N., and coal and iron partially there also, but much more extensively in the S. The Silurian formation, so called after the Silures, the ancient inhabitants of the principality, covers more than two-thirds of the whole surface, extending continuously from the mouth of the Conway to the vicinity of St. David's Head; but is succeeded in the E. by the old red sandstone, above which lies, first the mountain limestone and then the large and valuable coal field already mentioned.

Besides the Severn already mentioned, the principal rivers are the Dee, which has part of its lower course in Cheshire

COSTUMES OF WELSH WORKERS.

the Clwyd, in Denbigh and Flint; the Conway forming the boundary between Denbigh and Caernarvon; the Dorey and the united Rhedol and Tyfrith which have their mouths near the centre of Cardigan Bay the Teify separating Cardigan on the N. from Caernarvon and Pembrokeshire on the S. the Cloddy and Cloddon, remarkable chiefly from contributing by their position to form the splendid estuary of Milford Haven, the Towy and Bury, which both fall into Carmarthen Bay, the Elyw and Taf which have a common estuary in Bristol Channel the Ecnany which forms part of the boundary between Wales and England and the Uak and Wye, which, though rising in the principality, have only the earlier part of their course within it. The lakes are numerous, but the largest, that of Bala, is only 4 m. long and scarcely 1 m. broad. The climate is on the whole moderate and equable, though somewhat keen in the better districts. In all the counties, but more especially in the maritime, humidity is in excess, the average fall of rain in the principality being 84 inches, while that in England is only 25. Hence both climate and surface conspire in rendering Wales much more adapted for pasture than agriculture. The soil, too, seldom possesses great natural fertility, except in some of the valleys of which those of the Clwyd in the N., and of Glamorgan in the S., are celebrated for productiveness. The latter, rather a plain than a vale, is of great extent, and grows excellent wheat. The system of agriculture, however notwithstanding recent improvements, continues on the whole indifferent. The minerals, as already observed, are very valuable, and the S. contains some of the largest coal and iron works in the

kingdom, as well as the smelting-works of Swansea, probably the most extensive in the world. Of manufactures, properly so called, by far the most important are woolens. The prin- ciple articles are flannels, for which the principal place has long been furnished chiefly by a considerable number of small manu- facturers.

The inhabitants long struggled manfully first against the Romans, and afterwards against the Anglo-Saxons. They be- came tributary to England in the 10th century and after vari- ous vicissitudes, in which their attempts to throw off the yoke only riveted it more firmly, were finally and completely incorpo- rated with the English monarchy in the reign of Henry VIII. Both in language and manners however, they continue to be a distinct people, and give undeniable evidence of a Celtic origin. Their dialect bears a marked affinity to the Gaelic or Irish, but is much more closely allied to the ancient Cornish dialect, and that which is still exclusively used by the peasantry in the W of the French prov Bretagne. Welsh is one of the most ancient languages now spoken in Europe, and has also a literature composed chiefly of the poetical effusions of bards, some of whom flourished as early as the 6th century, but partly also of prose, of which the translation of the Bible, completed in 1588, is considered one of the best specimens. Among the peculiarities which characterize the people, one of the most striking at least to a stranger is the female dress, consisting generally of a plain or checked gown, a mantle or napkin of grey flannel or cotton around the neck and shoulders, and a black bonnet or hat, either cylindrical, like that worn elsewhere by men, or broad-brimmed and tapering to the form of a truncated cone. All classes are distinguished by civility and hospitality and though among the lower ranks very loose ideas prevail as to the privileges which a declared lover may claim, when once the marriage-knot is tied the duties of married life appear to be faithfully performed. Many curious superstitions, handed down by immemorial custom, still retain their hold, and even the gross impostures of Mor- monism have found many followers particularly in the mining districts, but none of the labors of the established clergy, those of the Methodists have been equally successful in diffus- ing a knowledge of religion, and the great body of the people belonging to what are called the Calvinistic Methodists, and one of their principal sources of enjoyment either as teachers or taught in the primitive services of their church or in the Sunday-school almost invariably attached to it.

WALLERBRUCK a tn. Rhinisch Prussia, gov Minden with a parish church. Pop. 1073.

WALLENDORF, or OLAWA, a vil. Hungary co. Zips, near r bank Hornad 12 m. S. E. Leutschau, with a Protestant and a K. Catholic church; a high school, a copper-mill and valuable mines of iron and copper. Pop. 3144.

WALLENFELD, a market tn. Bavaria, Upper Fran- conia, on the vil. Reichel, 91 m. N. N. Bamberg, with a parish church, a ruined castle, saw and other mills; a trade in wood, and mines of iron. Pop. 1131.

WALLENSTADT —1 A tn. Switzerland, cant. and 21 m. S. S. W. St. Gall in a marshy and unhealthy district, r bank Rees, about 1 m. E. Lake Wallenstadt. It is well built but is dull and ill built, and has a parish church, chapel, and school, and a considerable transit trade, as the chief entrepot between Zürich and Italy. Pop. 1793 —2 (Wallen- stätter or Wallen-Ged), A lake, Switzerland, chiefly in the S. of cant. St. Gall but partly also in the N. of cant. Glarus. It is of a long but somewhat oval shape, about 12 m. long E. to W., and nowhere above 3 m. wide; 1285 ft. above sea-level, and about 500 ft. deep. Its chief feeder is the Rees, of which it is only a wide expansion; it discharges itself by the Linth canal. The precipices on the N. side, rising precipitously from its edge vary in height from 2000 ft. to 3000 ft. Owing to sudden gusts of wind, the navigation of the lake is con- sidered dangerous.

WALLERFANGEE, a vil. Rhinisch Prussia, gov Treves, on the Saar, with a synagogue, a weekly market, and man- ufactures of linen. Pop. 1003.

WALLER a market tn. Bohemia, circle Pisek, 86 m. S. S. W. Pisek, with a church chapel, and castle. Pop. 3036.

WALLERS, a vil. France, dep. Nord, 6 m. N. W. Valenciennes. Pop. 2691.

WALLERSTEIN a market tn. Bavaria, circle Swabia, on the Eger 39 m. S. S. W. Anspach, with a palace, in which the Prince of Oettingen-Wallerstein resides; a K. Catholic church, a synagogue, Latin school, and ruined castle. P. 1960.

WALLINGFORD —1 A port and town, New England, on the N. side of Long Island Sound, 10 m. N. W. Reading. It has two principal streets, a spacious market-place, two churches, both fine edifices several dissenting chapels, a number of schools, a good townhall a mechanic institute, a horticultural society, and some business in sailing. The borough returns a member to Parliament. Area of par. 631 an. Pop. 122. Pop. (mun. bor.), 2819 (incl. bor.), 6004.—2, A vil., U. States, Connecticut, 11 m. N. by E. New Haven, on the railway to Hartford, with four churches a school, and manufactures of lard, wooden staves, &c. Pop. 3000.

WALLINGTON, two parts. Eng.—1, a tn. and par. 1850 an. Pop. 354.—2, (see Thorpeham), North. 1460 an. Pop. 36.

123

WALLIS, a *ms. Switzerland*. See VALAIS.

WALLIS ISLANDS, a group, S. Pacific Ocean, lat. 18° 24' S. lon. 170° 10' W. (4). They are also in number, varying in extent from 1 m. to 10 m. and insulated with one extensive reef. The land is in general high. The principal island, Uvea, is the only one inhabited. About 350 of the natives are Protestants, and 7700 R. Catholics.

WALLISCHIRKEN, a *tn.* Bohemia, circle Prácheň, about 80 m. S. W. Prague; with a parish church, a chapel, a castle, an hospital, a synagogue, and a porcelain; manufacturer of woollen and flannel cloth, potash-works, tile-works, a distillery and saw, walk, and other mills. Pop. 2162.

WALLIS, par Scot. Shetland. Pop. 2442.

WALLIS and FLORIN, par Scot. Orkney; 7½ m. by 6 m. Pop. 1667.

WALLSEND a *vil.* and par England co. Northumberland. The village, which is about 2½ m. E.N.E. Newcastle, has a spacious green in the centre, and some good houses. The church, a stone building with a spire, is situated on the tumpet-road, at some distance from the village. Area of par 2787 ac. The pop. 5771 are chiefly engaged in collieries, ironworks, in manufacturing copper and earthenware, and in ship-building. Large quantities of Walmsend coal, which is of a very superior quality are exported annually to London.

WALLSTADT, two *vils.* Bavaria, Lower Franconia, h. Obernburg. 84 m. W.W. Würzburg.—1 (Green). I bank Main has a parish church, a chapel, quarries of building-stone, and iron-mine. Pop. 1317.—2 (Klein). On the opposite side of the river has a church, chapel, castle, oil-mills, and a trade in wood. Pop. 1905.

WALLSTOWN, par Ire. Cork 8050 ac. Pop. 531.

WALMER, a *vil.* and par England co. Kent about 3 m. S. Deal on the road to Dover. It is surrounded with numerous handsome mansions, villas, and much frequented for sea-bathing. The celebrated ancient fortress, Walmer castle, a little S. from the village, is now appropriated as a residence for the lord-warden of the Cinque-port. The Duke of Wellington, who held that office, died in it, Sept. 14, 1852. Area of par, 1079 ac. Pop. 2165.

WALMGATE, par Eng. Lincoln 920 ac. Pop. 79.

WALNEY ISLAND, Irish Sea, Lancashire, N. of the entrance to Mersey-mouth Bay, and separated from the mainland by a narrow strait, known as low-water lit. (Rise on S. point) 64' 2" 64' N. lon. 10° 10' 30' W. (4). It is 10 m. long, and generally about 1 m. broad, sandy and comparatively barren; and so low that the waves sometimes threaten to roll directly over it, and instances are on record of the sea raking across it in one or two places. The isl. of Walney is a chapel in the parish of Dalton-in-Furness. Pop. 921.

WALPOLE, three parts. England.—1 Suffolk 1750 ac. Pop. 543.—2, 28 Andover Norfolk, 2494 ac. Pop. 787.—3, (St. Peter), Norfolk; 6982 ac. Pop. 1581.

WALPOLE, a *vil.* An isl. in the N.E. of Lake St. Clair Canada West about 10 m. long N. to S. by 4 m. broad. It contains much fertile land and is occupied by Chippewa, Potawatomi, and Ottawa Indians, who live partly by the chase, and partly by cultivating the land. Pop. about 1040.—2, An isl., S. Pacific Ocean, S. from the S.E. extremity of New Caledonia, lat. 22° 29' S. lon. 160° 16' E. Discovered by Captain Butler in 1774.

WALSALL, a market *tn.* and *pari.* and *town.* for England, in the E.E. of co. Stafford, 6 m. N.W. Birmingham, on the side and summit of a Hummock-ridge, above a stream of the same name, which joins the Trent a little below, on the Old Birmingham, and Wyrley and Eccleshall canals, and on the London and North-Western, and the South Staffordshire railways. The services, presenting much daily diversified scenery, are followed by numerous villas, are very pleasing, and the town itself though not regularly laid out, contains several spacious streets, well paved and well lighted, and superior to most towns of the same magnitude in the number of substantial and handsome dwellings. The more important buildings and establishments are a handsome modern parish church, on a commanding height, with well-proportioned tower terminating in a lofty spire, a Methodist chapel, in the early English style; a chapel of ease, Independent, Wesleyan Methodist, Baptist, Unitarian and two R. Catholic churches, one of which is land-owning; a free grammar, two- and three-class, national, infant, and

other schools, a townhall and jail, a public library and dispensary, adorned with a handsome Doric colonnade; several dining-houses, and other suitable accommodations. The situation of the town, on the E. edge of the S. Staffordshire mineral-dell, nearly to the immediate vicinity of that of Warrington, gives it great advantages for carrying on the iron manufactures, which accordingly forms its great staple; the chief articles denoting of all kinds of addition, ironmongery, including coils and carriage harness mountings, buckles, chains, mufflers, spurs, locks, keys, screws, files, edge-tools, firearms, gun-tubes, &c. There are also several brass and iron foundries, machine-shops, large mending-establishments and in the vicinity extensive lime-works, and both coal and iron pits. Wealth is of considerable magnitude, and had at one time a castle, said to have been built in the early part of the 10th century, by Ethelred, Countess of Mercia, and daughter of Alfred the Great but the existing town is almost entirely of modern origin. It is governed by a mayor five aldermen, and 18 councillors and sends a member to Parliament. Area of par, 1812 ac. Pop. 25,222. Pop. town and pari. bor., 25,000.

WALSCHLEBEN a *vil.* Prussia, prov. Saxony, gov. Erfurt, with a parish church, and a trade in cattle, and several annual fairs. Pop. 1230.

WALSHEAM, two *vils.* par Eng. Norfolk.—1, (South St. Lawrence). Pop. 244.—2, (South St. Mary). Pop. 443. United area, 2149 ac.

WALSHAM a *vil.* and par England co. Norfolk, on Suffolk in a picturesque valley, 4 m. E. by N. Norwich. It has a spacious parish church, with a rievty-ground roof and a square embattled tower; Baptist, Independent and Wesleyan chapels, and a national school. Area, 2800 ac. P 1297.

WALSHAM (NORTH), a market *tn.* and par England co. Norfolk. 15 m. N.N.E. Norwich, on an embankment. It consists of three streets leading to a central square, and has a large and elegant church, four Dissenting chapels, a grammar and a national school. Area, 4253 ac. Pop. 3711.

WALSINGHAM (GUYAR), par Eng. Norfolk; 2170 ac. Pop. 476.

WALSINGHAM (LITTLE), a *vil.* and par England co. Norfolk in a valley isolated by lofty heights, 2½ m. N.W. Norwich. It has a large parish church, with an embattled tower and lofty spire. Independent, Primitive and Wesleyan Methodist chapels, a free grammar-school, a house of correction, and the remains of a celebrated monastic church. Area, 680 ac. P 1907.

WALSOKEN, a *vil.* and par England co. Norfolk, close to the town of Walsoken with a parish church, in the Norman style, with an embattled tower and lofty spire. Primitive Methodist chapel, and a charitable endowment. Area of par, 4556 ac. Pop. 2140.

WALSHODE, two places, Hanover.—1, A *tn.*, gov. and 46 m. S.W. Lüneburg on the Böhme, with manufactures of woollen and linen cloth, yarn, salt-petre and gunpowder, a paper-mill and dye-works. Pop. 2061.—2, A *vil.*, near the former, with a manseory. Pop. 1523.

WARREFF, a tn. W. Africa, on the delta of the Niger, 55 m. S. Benue lat. 5° 25' N. lon. 5° 25' E.

WARREN, par Wales, Pembrokeshire; 1169 ac. Pop. 134. **WARREN** numerous places, U States.—1, A vil. Maine, 85 m. S.E. Augusta, on the St. George, with a courthouse, an academy and considerable manufactures. Pop. 2438.—2 A vil. Massachusetts, on the Chittopos, and on the Western railroad, 73 m. W. Boston, with two churches, and some manufactures. P. 1776.—3, A vil. Rhode Island, E. side of Narragansett Bay 10 m. S. by E. Providence with several churches, an academy a harbour for vessels of 300 tons, and building yards. Pop. 8103.—4, 6 m. Pennsylvania, r bank Allegheny, on the Fawcett and Erie railway, 180 m. N. E. Pittsburgh, with wide straight streets, county buildings, an academy and numerous mills. Pop. 1913.—5, A tn. Ohio, on the Mahoning 160 m. N. E. Columbus, with six churches, two foundries, two machine-shops, an oil a falling, and two flour mills. Iron-ore and coal abound in the vicinity. Pop. (1833) 2000.

WARRENPOINT a seaport and par Ireland on. Down near the head of Carrigford Bay 25 m. S. E. W. Belfast. It is well built, generally of stone, and has an Established church in the early English style, a handsome R. Catholic and several other Dissenting chapels, eight schools, and an excellent harbour with a considerable trade, partly carried on by regular steamers to Liverpool. Pop. (in), 1760. Area of par 1042 ac. Pop. 2162.

WARRENTON, a tn. U States, Virginia, 100 m. N. by W. Richmond, with a handsome courthouse three churches, and two academies. Pop. 1000.—2 A vil. N. Carolina, 24 m. W. S. W. Gaston, on the railway to Raleigh, with three churches. Pop. 1232.

WARRINGTON, a market in man. and part bur., and par England co. Lancaster, r bank Mersey here crossed by a bridge, and on the London and North Western railway of which it is an important station 16 m. E. by S. Liverpool. It consists of four principal and several minor streets, generally narrow though tolerably straight and well kept, and lined with houses sometimes of wood and interesting for their antiquity but usually well built of brick, and covered with slate is lighted with gas and well supplied with water, both from springs and by pipes from a distance and has three churches, one of them a spacious cruciform structure, with a central tower or Norman crypt, and a well decorated chancel. Baptist, Independent dissenting M. Methodist, Quaker R. Catholic, and Unitarian chapels, grammar blue-coat national British orphan, infant, and other schools, a townhall, market-hall, tradeshall, assembly rooms, theatre a library and museum, a mechanics and a church institute, a natural and a mutual society a savings bank and several churches. The main factories are chiefly cotton goods, sailcloth glass, pins, coned deters, staple, glass, cordage, leather soap iron castings and iron-ware. The breweries have long been famous for their ale. Pop. 22,561. Area of par, 12 168 ac.

WARSAW [Polish, *Warszawa* German, *Warschau* French *Varsovie*] the capital city of Russian Poland, partly on a flat and partly on a height rising gradually from 1 bank Vistula, here crossed by a bridge of boats, 1570 ft. long commencing, with the city or suburb of Praga, 335 m. E. Berlin, with which and Leszno it is connected by railroad lat. 52° 13' 30" N. lon. 21° 24' E. (L.) It consists of the city proper and several suburbs, enclosed for the most part along with a rampart and fosse, entered by 10 gates, and defended or overgrown by a vast space which the Russians have recently crossed. In the older parts the streets are narrow, and the houses, generally of very indifferent appearance, are huddled together without any order. In the newer part, and more especially in some of the suburbs, the streets are often spacious, and many ranges of handsome buildings are seen, but the impression produced is by no means favourable, and Warsaw, as a whole is decidedly ill built, badly paved and very dirty. It has, however several large public squares, among which that of Sigismund, adorned with a bronze equestrian statue of the third king of that name, is particularly deserving of notice and the vicinity is well provided with beautiful promenades.

The more remarkable public buildings are the cathedral, a huge structure adorned with a fine altar piece, the church of the Holy Cross more distinguished by magnitude than any more attractive feature the church of the Carmelites, interesting as the spot where the league was sworn between

Charles XII of Sweden and Stanislas Leszinski; numerous other churches, among which the Lutheran church stands conspicuous and is justly regarded as one of the finest structures of which the city can boast the Janak or ancient palace of the Polish kings, still occupied by the court on occasional visits and forming a huge pile, which towers above the other houses, on a height overlooking the Vistula; the palace of Czestoch occupied by the university till its suppression, and adorned in front with a statue of Copernicus the Russian palace with fine gardens attached to it; the Krasiński palace, occupied partly by the superior courts of law and partly by government-offices several other palaces similarly occupied, the townhouse, arsenal, mint, custom-house exchange, barracks several theatres, particularly the national; and the bazaar of Mariaville consisting of a large square lined with arcades, somewhat in the style of the Palais Royal at Paris.

CHURCH OF ST. NICHOLAS III. WARSAW.—From a Lithographic Engraving.

Since the suppression of the university which was on a very complete scale, and had a library of 150,000 volumes, which has been removed to St. Petersburg, the principal educational establishments are a Flakus college, a college for nobility a lyceum and many other superior and elementary schools. Among the benevolent institutions are a town and a military hospital, both very large establishments, a foundling hospital a deaf and dumb, and two lunatic asylums. The manufactures consist of woollen dress and cotton goods, hats, hosiery leather saddlery, carriages, hardware, paper, refined wax, chemical products, and tobacco. There are also numerous breweries, distilleries, tile-works, and mills. The trade is very extensive, Warsaw being by far the most important commercial emporium of Poland, and carrying on a large traffic both with the interior and with Thron and Danzig, by means of the Vistula. Besides a well-frequented weekly market, at which great numbers of cattle are sold, there are two large annual fairs, each of which lasts three weeks. Warsaw though a very ancient town did not become the capital till about the middle of the 16th century. Its history alone, though full of incidents, is properly identical with that of Poland. Pop. (1851), 164,116, of whom above a fifth part are Jews.

WARSAW, a river-port, U States, Illinois, on the Mississippi, at the foot of the lower rapids, 115 m. W. N. W. Springfield. The largest steamers ascend to the port. There is a considerable export and import trade. Pop. (1853) 2000. **WASCO**, a vil. and par. England, co. Nottingham, on the Maden, 5 m. N. E. Mansfield; with a substantial parish church an endowed school, and limestone-quarries. Area of par 6710 ac. Pop. 1398.

WANSTEIN, a tn. Prussia, prov. Westphalia, gov. and 14 m. E. Arnsberg; with a Protestant church, manufacture of copper-ware, and a paper mill. Pop. 1610.

WARTA, a river rises in the S.W. of Russian Poland about 30 m N W Cracow, flows arcuately N N W to Kolo, then generally W into Prussia, passing Posen, till it enters prov Brandenburg and at Gutsin joins r bank Oder after a course of about 400 m. Its principal affluents are, on the right, the Wkra, the Rya, Welka, and Heta; and on the left, the Prosa and the Odra. It generally traverses low plains, and forms several extensive marshes.

WARTA, a tn Russian Poland, 97 m E Kaluch, on the Warta. It has a Bernardine school and manufacture of woollen and linen cloth, hats, and hosiery. Pop. 1181.

WARTAU, a vil and par Switzerland, can. and 23 m S E E. St. Gall. h bank Rhine; with two iron-mills, a saw-work, and the ruins of an ancient castle. Pop. 1787.

WARTBERG, or DECEVRA, a market tn Hungary co and 12 m from Pressburg with a synagogue, an orphan hospital, tile-works, and a trade in cattle. P. 1781.

WARTBURG a castle, Baxe Weimar. See *EMMENTHACH*.

WARTENBERG (OBER) a tn Bohemia, circle and 22 m N N W Boudaux with a parish church, an hospital, and a trade in cattle. Pop. 1304.

WARTENBERG (PODERMAN) a tn Prussia, prov Silles gov and 82 m E N E. Breslau with a Protestant and two R. Catholic churches, two castles with gardens and an hospital, manufactures of linen, and tile-works. Pop. (1857), 2542.

WARTENBURG a tn Prussia, prov E Prussia, gov and 61 m S. Königsberg at the confluence of the Pisch and Kirmas, which here form the Wading. It has two R. Catholic churches a Bernardine monastery, several mills and a trade in linen and cattle. Pop. (1857) 2567.

WARTHA par Eng York 7000 ac. P. 438. **WARTHA** a tn Prussia, prov Silles, gov and 45 m S.W. Drosau. It has a R. Catholic parish church, a town-house, and hospital. The chief employment is in making oranges and similar articles for the numerous pilgrims visiting the church. Pop. (1857) 1038.

WARTHILL, par Eng York 860 ac. Pop. 169.

WARTLING par Eng Sussex 4738 ac. Pop. 1070.

WARTON par Eng Lancaster 1141 ac. Pop. 2093.

WARUNGUL, a tn Hindooistan, Nizam's dominions, 86 m N E Hyderabad the ancient cap. of Teligana, of which little now remains but four gateways of the temple of Siva.

WARWICK a central co. England, bounded, N by Stafford, Derby and Leicestershire, E by Northampton, S. by Oxford and Gloucester, and W by Worcester, Herefordshire, N to S 80 m central breadth, 26 m area, 881 sq m. It has a large projection both at its S. and N. extremity, and an indentation on its W. side, but is otherwise of a compact shape. The surface, nowhere elevated, is finely diversified by gentle hills and valleys and is well watered chiefly by the Avon, flowing S. to the Severn and the Tamme, flowing N. to the Trent. A small part of the S. E. belongs to the basin of the Thames. Rocks belonging to the new red sandstone occupy the far larger part of the county, both in the E. and S. those of the olden series prevail, and a coal-field forming a long and narrow trough stretches N N W, from the vicinity of Coventry to that of Tamworth. The climate is mild and salubrious, and the soil with the exception of some cold stiff clays on the higher grounds, is very fertile, consisting chiefly of a strong red or of a sandy loam, the one well adapted for wheat and beans, and the other for barley and turnips. Much land is kept in permanent pasture, chiefly for grazing, and fine timber both in plantations and hedge-grows, is abundant. The most valuable minerals are coal, limestone, sandstone, and blue flagstone. The manufactures, both of hardware and silk goods are very important, the former having their central locality at Birmingham, which, in its peculiar departments, is almost without a rival, and the latter at Coventry which has long been famous for its ribbons. The other leading manufactures are watches, made also at Coventry, gloves, hats, linen, yarn, horn combs, fishhooks, and needles. In carrying on these manufactures and the extensive trade connected with them the natural deficiency of river-communication has been amply compensated by canals and railways, which traverse the county in all directions, and bring it into close connection with all the great

thoroughfares, towns and ports of England. Warwickshire sends 10 members to Parliament—four for the co. and two each for Warwick, Coventry, and Birmingham. P. 475,012.

WARWICK, a bor and market tn. England, esp. above co. r bank Avon 90 m N W London pleasantly situated on an eminence rising somewhat abruptly from the river. Its seven principal streets are spacious, regular, and well kept, and the houses chiefly of brick but partly of stone are generally well built. Its principal buildings and establishments are three churches, one of them elegant several dissenting chapels the townhall county jail, bride-well, market-house, and the Earl of Leicester's hospital a very ancient structure enlaced grammar-school national British and other schools numerous charities, several libraries, and a scientific institution. The only manufacture is hats, but the trade in cattle, corn

WARWICK CASTLE.—From Glasgow, Illustrated Catalogue of Warwicks.

and provisions is considerable. The principal object of interest in Warwick is its ancient and magnificent castle, situated on the S. side of the town. It encloses within its walls an area of nearly 3 a. and the plot surrounded by the moat is upwards of 5½ a. It is said to have been founded before the Norman conquest and it is still in perfect preservation, and the residence of the Earl of Warwick. Pop. 10,1973.

WARWICK par Eng. Camberland 1845 ac. P. 865. **WARBY**, a small protected estate Hindooistan, in the N W of prov Gujarat. It is watered by the Bernas. Pop. chiefly Jats, about 30,000. The town of its name is in lat. 23° 47' N. lon. 71° 29' E.

WARA a tn Russia Finland. See *VARA*. **WARLETON**, or *WARLEWORTH*, a tn. France dep. Bas Rhin 15 m W N W Strasbourg. It has a large manufactory of woollen hosiery, calicoes, and black soap, paper and worsted mills, glassworks, and tanneries. Pop. 2635.

WARSH (Tze), a bay of the German Ocean on E coast, England, between co. Norfolk and Lincoln, about 25 m long by 15 m broad. It is much encumbered by sandbanks, but drains an area of about 6000 sq m., chiefly by the Witham Welland Nene, and Ouse.

WARSHBOURNE a vil and par England, co. and 2 m N E. 1 m from the Witham which is here navigable. It has a large and handsome church, with a lofty tower a Wesleyan chapel and an endowed school Area of par., 0,190 ac. Pop. 1180.

WARSHINGLEY, par Eng Huntingdon, 1260 ac. P. 88.

WASHINGTON a vil and par England, co. Durham on irregular broken ground above the Wear, 8 m S E. Gateshead with a neat parish church manufactures of magnesia and other chemical products, and fine stone-quarries. The family of the great Washington are said to have come from it. Area of par. 5335 ac. Pop. 8455.

WASHINGTON par Eng Sussex, 3182 ac. Pop. 884. **WASHINGTON** the cap. of the U. States N. America, dist. Columbia, pleasantly situated on a point of land formed

by the confluence of the Anacostia with the Potomac, here navigable from the Atlantic by ships of the largest class. Lat. (Capital) $38^{\circ}53'24''$ N., lon. $77^{\circ}2'W$ (s.). It occupies a site which Washington himself selected, but the original plan con-

templated has been carried very partially into effect. It extends N. W. to S. E. about 4½ m. and E. to W. about 2½ m. and is laid out in spacious streets, which cross each other at right angles in the direction of the cardinal points. The regularity of this arrangement however is much broken by 15 large avenues from 120 ft. to 160 ft. wide which by a grand device, bear the names, and point in the directions of the earliest states of the Union. One of the most striking features in the place is the vast quantity of ground which remains blank. Much of this is intended to be sooner or later covered with buildings but much also has been judiciously reserved for parks and other places of recreation. Among the objects deserving of special notice the first place is due to the Capitol where Congress holds its sittings. It stands conspicuously near

THE CAPITOL, WASHINGTON, from the West. - From Lithograph, after Augustus Hittor.

the centre of the city in a beautiful and highly ornamented space of 22 ac., on an eminence about 70 ft. above the river in built of white freestone, and forms an imposing pile, consisting of an original centre and two wings, and considerable recent additions. A low dome covers each of these wings, while a third dome, of lesser height and greater dimensions rises magnificently from the centre, and forms the roof of the

Rotunda, a splendid hall 95 ft. in diameter and 95 ft. high, adorned with bas-reliefs and paintings, and a colossal statue of Washington. The Senate-chamber with the Supreme Court beneath it, and the House of Representatives occupy the N. and S. wings respectively, and immediately W. of the Rotunda is a library of about 50,000 vols. The whole length of the building, 552 ft. exhibits a vestibule basement forming the ground story and two other stories completed in a Corinthian elevation of pilasters and columns, and the main entrance is by a splendid pillared portico. The President's house, or White-house about 1 m. W. of the Capitol is a handsome edifice, ornamented in front with a beautiful Ionic portico, and behind facing the garden, with an Ionic circular colonnade on each side of it, but separated from it, are the principal government-offices. The other principal buildings and establishments are numerous churches, among which the fine Gothic Trinity church (Episcopal) stands conspicuous, the general post-office, the patent-office, the city hall, the Washington and Jackson monuments, the observatory the Smithsonian Institution, the Columbian college, numerous schools and seminaries, the Washington and the navy yard, the national cemetery two orphan asylums, and other benevolent institutions, several theatres, assembly-rooms &c. The manufactures of Washington are unimportant, but it has a considerable trade with the surrounding country and ample means of communication with it by bridges across the Potomac and Anacostia, the Chesapeake and Ohio canal and branch-rail ways leading both N. and S. Pop. (1850), 40,001.

WASHINGTON a territory U. States, America, in the N. of Oregon, formed in 1853, and bounded N. by British America and the Straits of San-Juan-de-El-Norte, separating it from Vancouver Island W. the Pacific S. Oregon, from which it is partly separated by the Columbia and the Rocky Mountains, greatest length E. to W. about 600 m. breadth, about 309 m. area 120,000 sq. m. It is nearly in the form of a parallelogram, is drained by the Columbia and its tributaries and with several fertile flats and valleys, has for the most part an elevated and mountainous surface, with summits rising from 5000 ft. to 12,000 ft. and 13,000 ft. Olympia, at the head of Puget Sound, is the capital.

WASHINGTON numerous places, U. States, particularly - 1. A flourishing town in Pennsylvania on the Pennsylvania railway 25 m. W. Pittsburgh, with elegant public buildings, including a courthouse, several churches a female seminary and the Washington college, founded in 1800. Pop. 3562. - 2. A vil. N. Carolina, 1 bank Tar 127 m. E. by S. Raleigh. Vessels drawing 8 ft. ascend to this village. Pop. 1400. - 3. A vil. Texas 7 bank Dragon 120 m. E. Austin with an academy and two female schools. It is well situated for trade as the head of the steam navigation. In 1856 the Independence of Texas was proclaimed here, this place having been the capital of the republic at the time of its annexation to the U. States.

WASHINGTON or Umpqua one of the Marquesas Is. N. Pacific lat. $8^{\circ}50'N$, lon. $139^{\circ}33'W$ (u). It is about 9 m. long and of striking appearance, the land rising so as to form in the middle a mountain 2450 ft. high. Towards its W. extremity, a cluster of islands and rocks forms the only bay where landing seems practicable.

WASHINGTON a river U. States, N. America, rises in the Missouri Mountains, Arkansas, about lat. $34^{\circ}45'N$ and flowing S., falls into the Red River 40 m. E. Alexandria, after a course of 406 m. It receives the Tenness, Saline, and Bartholemey from the N. E., and the Catahoula and some smaller streams from the W. and N. W.

WASIL, a tn. Russia, gov. and 58 m. E. Nijnei-Novgorod, at the foot of a hill, 7 bank Volga, at the entrance of the Sura, with wooden houses, a church and a trade in corn and fruit. Pop. 1400.

WASING, var Eng. Hants 60 m. Pop. 88.

WASMES, a vil. and some, Belgium, prov. Hainaut, 6 m. W. Mons, with rich coal mines, employing many of the inhabitants two chalk-quarries, a forge, tannery, three breweries, and three flour-mills. Pop. 6084.

WARMES-ANDEMETZ-BRUFFOIL, a vil. and com. Belgium, prov. Hainaut, 7 m. S.E. of Tournai with a brewery, a flour-mill, and a trade in cattle. Pop. 1090.

WASPEKTON par Eng Warwick, 1618 ac. P. 292. **WASPEK**, a vil. Holland, prov. N. Brabant, 14 m. W. Middelburg with some good houses, and two churches. Inhabitants engaged in horse and cattle rearing and in hay-culture. Pop. 1667.

WASSELGE, a vil. and com. Belgium, prov. and 20 m. W. Liège on the Meuse, with a saw-mill, a tannery, a flour-mill and a trade in corn and cattle. Pop. 1020.

WASSENAAR, a vil. Holland, prov. S. Holland, 5 m. W. Leyden, and 3 m. from the North Sea, from which it is separated by sand-dunes. It has two churches, and two schools. Pop. (agricultural) 1793.

WASSERBURG a in Upper Bavaria, a bank Inn here crossed by a bridge, 80 m. S.E. Munich. It is walled and has five churches, a castle, townhouse, hospital, infirmary, house of correction, a manual school, with bath and a trade in fruit, hemp and hops. Pop. 2383.

WASSERLEBEN a vil. Prussia, prov. Saxony gov. and 12 m. W.E.W. Magdeburg on the Elbe with a church and oil and other mills. Pop. 1150.

WASSOTAH a strong hill fortress Hindoostan, prov. Bhopoor among the W. Ghats, 30 m. S.W. Satara, at the end of a narrow valley on a rocky height, two sides of which present precipices from 2000 ft. to 3000 ft. high. The adjacent scenery is of the grandest description.

WAST WATER a lake, England, co. Cumberland, in the West-Dele, at the foot of Skiddaw. It is about 5 m. long by not more than $\frac{1}{2}$ m. broad and discharges itself into the Atlantic by the Ir.

WASUNGEN a in Bazo-Münster, r bank Weser, at the confluence of the Kalkwasser 5 m. N.W. Münster with two churches, a school and an hospital, two mills, and a trade in tobacco. Pop. 2407.

WATCHEP a seaport and market in England on Somerset, 15 m. N.W. Taunton on an alluvial near the Bristol Channel with a fine ancient parish church, about $\frac{1}{2}$ m. from the town. A Baptist and a Methodist chapel, several private schools, a considerable coasting trade, building yards, an iron foundry and paper-mill. A sea wall of great strength, forming an esplanade of 600 ft., has been built here.

WATEE an isl. Pacific Ocean one of the Harvey group lat. 19° 58' S. lon 158° 5' W., 8 m. long by about 5 m. broad. It is hilly but fertile.

WATER-NEWTON par Eng Hunts 853 ac. Pop. 199.

WATERBURY par Eng Cambridge 555 ac. P. 1440.

WATERBURY a city U. States, Connecticut, on the Housatonic railroad, 28 m. S.W. Hartford. It is remarkably neat, has a fine central square, seven churches, some of which are very elegant, a commodious high school and several other educational institutions, a young men's institute and several benevolent societies, rolling mills for brass and copper and manufactures of machinery, metal buttons, daguerrotypy, porcelain, &c. Pop. 7000.

WATERBURY par Eng Norfolk, 758 ac. Pop. 39.

WATERDOWK, a vil. and township Canada West Gore district, on a small stream 22 m. S.W. Toronto. It has a woollen factory, a tannery, and several saw and flour mills, and in the immediate vicinity are fine quarries of freestone. Pop. about 600.

WATERER, a river, U. States. See CATAWA.

WATERFALL, par Eng Stafford 1520 ac. Pop. 521.

WATERFORD a co. Ireland, prov. Munster, bounded N. by Tipperary and Kilkenny, being separated from the greater part of the one and the whole of the other by the Bar. It is situated from which it is separated by Waterford Harbour, W. Cork, and E. the Atlantic length E. to W. 50 m., greatest breadth, N. to S., 37 m.; area, 712 sq. m. The coast is in general bold and rocky, but besides the harbours of Waterford and Youghal at its E. and W. extremities respectively, has the deep indentations of Dungarvan Harbour and Tremore Bay. The interior is very rugged and mountainous, being covered by the Comeragh range which in Mallow valley rises to 2595 ft., and in Knockmoyle to 2700 ft. The strata of the latter heights are composed chiefly of slate,

overlain occasionally by rocks of the old red sandstone formation. In the valleys the prevailing rock is carboniferous limestone. The minerals include copper, partially worked; lead and iron, once worked but now abandoned; potash, clay and marble. The principal rivers are the Suir, navigable to Waterford by large and to Carrick-on-Suir by small vessels and the Blackwater by which vessels of 100 tons ascend to the junction of the R. Ide, and 70 tons to Cappagh. The climate is moist, and the surface partly covered with bog is much better adapted to pasture than agriculture. The principal crops are wheat and oats, but the dairy is the most important branch of rural economy and furnishes a large export of butter. The only other large export is bacon. The fishermen on the coast employ about 1500 men and boys. Waterford sends five members to Parliament—two for the county, two for Waterford city and one for Dungarvan. Pop. 158,874.

WATERFORD a city parli. bur. and seaport, Ireland cap. above on 97 m. S.W. Dublin, with which it is connected by railway r. bank Suir here crossed by a wooden bridge 833 ft. long opening in one place to allow vessels to pass, and communicating with the wharf of Ferrybank. It stretches along the Suir for about 1 m. contains

1. Cathedral 2. St. Mary's 3. St. John's 4. St. Peter's 5. St. Paul's 6. St. James' 7. St. George's 8. St. Andrew's 9. St. Nicholas 10. St. Martin's 11. St. Michael's 12. St. Patrick's 13. WEALD-BAMERT (NORTH) par Eng. Essex 3377 ac. Pop. 845

WEALD (SOUTH) par Eng. Essex 5037 ac. P. 2599

WEALD (THE) extensive level tract in the S.E. of England, occupying parts of Kent, Sussex, and Surrey. Its limits are not very exactly defined but it is generally understood to stretch W. from Romney Marsh to Putworth a dis-

tance of about 65 m., with a breadth varying from 8 m. to 15 m., and to have an area of nearly 1000 sq. m. The South Downs bound it on the S., and the chalk-hills of Kent and Surrey on the N. The soil consists for the most part of a stiff heavy clay well adapted for wheat, and particularly favourable to the growth of the oak which is still very abundant and appears at one time to have covered the whole country, giving it its name, which in Saxon meant well, forest or close. Geologically it consists of middle secondary strata of fresh water origin, and has given its name to what is called the Wealden formation, consisting of Wealden clay Hastings sands, and Farbock beds, resting on oolite, and overlaid by the lower greensand

WEAR a river England co. Durham, rises in the W. angle of the county flows E. to Halop-Auckland, then N.E., nearly enclosing the city of Durham and at Sunderland falls into the North Sea. total course, about 70 m.

manufactures of the end earthenware, linchpins, slate and marble carrier, and three mills. Pop. 1124.

WEIMAR (Latin *Wernar*), the cap city of the grand duchy of Saxe-Weimar, 1. bank Elm, here crossed by two bridges, and on the Thüringen railway, 18 m W Erfurt. It stands in a beautiful valley surrounded by hills, on ground partly hilly and partly flat, and though no longer walled, is entered by six gates, and defended by several forts. It is not well built, and notwithstanding the presence of the court, has a dull and lifeless appearance. Its public edifices most deserving of notice are the ducal palace, a handsome structure seated on a height; the Stadtkirche, or town church, with two towers, a good organ, an altar piece, one of the finest works of Lucas Cranach, in which he has introduced portraits of himself and Luther and Melancthon; the graves of 44 members of the ducal family and a bronze statue of Herder who is also buried here the St. Jacob's or garden church, in which Cranach and the poet Muskus are buried the Belthaus, townhouse library of 140,000 vols. museum, gymnasium, theatre, normal and other schools, the blind asylum, deaf and dumb institutions, the houses of Goethe and Schiller (in former several hospitals, and other benevolent institutions. Weimar has neither trade nor manufactures of any consequence, but, as the capital of the duchy, is the seat of the legislature, and of all the more important courts and public offices, and has long occupied a much more conspicuous rank in Germany than its political importance could have secured in consequence of the enlightened patronage which the Duke Charles Frederic (died 1853) afforded to distinguished literary characters, thus associating the town with the names of Schiller, Goethe, Herder and Wieland, the first two of whom are buried here, and entitling it to be regarded in respect of literary distinction as the German Athens. It is also the birthplace of Kotzebue P 11 444

WEINFELDEN a vil. and par Switzerland, can. Thur gau r bank Thur here crossed by a handsome bridge 10 m K.N.E. Fribourg. It is well built and has a large church, a townhouse, in which the grand council meets every second year and a considerable transit trade. Pop. 2148

WEINGARTEN—1 A vil Baden circle Middle Rhine 19 m N.W. Karlsruhe with two churches Pop. 5097—2 A vil Bavaria, Palatinate circle Germersheim, with a Protestant church. Pop. 1136

WENDY par. Eng. Cambridge 947 ac. Pop. 164.

WENER, the largest lake of Sweden, and after that of Ladoga, the largest in Europe, situated centrally between Lina Carlsted, Wenersborg, and Mariestad. It is 114 ½ above sea-level and of very irregular shape. Its greatest length N E. to S W. is about 100 m., and its breadth may average about 30 m., though at the widest it is not less than 50 m., and in its lower part, where two peninsular stretch far into it from opposite directions, it is not more than 10 m. This distance is still further narrowed by a group of small islands and hence the part of the lake above these peninsulas is sometimes considered as Wenar proper, while the part below is called Lake Dalbo. The area covered by both is estimated at 763 sq. m. The far most important feeder is the Klar, which pours into its N. above the accumulated water of a course of more than 250 m. By a canal it communicates with Lake Wäster, but its only proper outlet is at Wenersborg at its S W. extremity, where the superfluous waters are received by the Trollhättan or Götha. In summer steamers and other vessels ply regularly upon the lake. In winter it is frozen for several months, and crossed by sledges. It abounds with fish, particularly trout, which sometimes weigh 40 lbs.

WERNERSBORG a tn. Sweden, cap. lin of same name or Ellsborg (which see), beautifully situated on a tongue of land which projects into Lake Wener from its S. extremity 48 m. N N E. Gothenburg. It was never burned down, and though previously handsome, has been rebuilt on a more regular and improved plan with many excellent houses of two stories. The only public building of any consequence which escaped the fire was the governor's residence. The trade in iron, deals, and other produce, is considerable. P. 2500.

WESENBERG a walled tn, Mecklenburg Stralia, on Lake Wolbitz, 8 in. S.W. Neu-Stollitz, with a church a burglar school, and manufactures of woolen and linen cloth P 1370

WESSEL (Latin *Vesuvius*), a river Germany formed by the junction of the Fulda and Werra at Minden, on the borders of Hanover and Hesse Cassel flows very circuitously first N.W. forming part of the boundary between these two territories, then N.W. between Westphalia and Brunswick past the towns of Hildes and Holzminden and W.N.W. past Hameln and Eintracht before the latter it enters Prussia, gov. Minden flows N past Minden into Hanover turns W.N.W. traverses the town and the territory of Bremen forms the boundary between Hanover and Oldenburg at Elsfleth turns almost due N. and falls by a wide mouth very much encumbered with sandbanks, into the German Ocean. Its whole course is about 200 m. Its chief affluents are on the right, the Aller, segmented by the Leine and the Wümme and on the left, the Dümme, Netze, Emmer, Werra, Aue, and Hunte. At Minden, where it is formed, it has a width of about 800 ft. It flows through a hilly country till it reaches Minden where it begins to flow through level plains. Between Minden and Bremen it is about 7 miles from 500 ft. to 700 ft., at its mouth it is about 7 m. broad. It forms large alluvial deposits, and in the lower parts of its course requires strong dikes to protect the adjacent country from inundation. The navigation for vessels of large size ceases about 10 m. below Bremen. The basin of the Weser has an area of 12,912 geo sq m.

WENJEGONAK or **WENJEGONAK** a tn, Savin, gov. and 178 in N.E. Trer, at the confluence of the Reem with the Moiege. It has two churches two schools, an hospital extensive manufactures of nails and a trade in wood 1 9000

WESSELL ISLANDS, a group of 4 Australia, at the N.W. entrance to the Gulf of Carpentaria, extending for 50 m. S.W. to N.E. The principal island is 30 m. long by 6 m. or 7 m. broad lat. (N. point Cape Wesel, 10° 58' S., lon. 150° 45' E.).

WESSELBUREN or **WESSELBUREN** a vil Denmark dusky Holsten in N. Dymmarb. It was recently walled and has a considerable trade in grain P 1900

WESSELI a tn, Austria Moravia, 4700 and 11 m. S.W. Hradisch, on the March with a church a castle with a park and the buildings of an old monastery 1 op 543

WESTMALLE a vil. com. Belgium prov. and 13 m. S. E. Antwerp, on the Tapelbeck or Havelbeek with a re-warehouse a brick and tile work two breweries, a flour mill &c. In the vicinity in the midst of a wild heath, is a Trappist monastery. Pop. 1064.

WESTMANNA a group of 14 islets, off the coast of Iceland lat. 63° 30' N. long. 20° 30' W. The principal is. Hinnar has a harbour called Westmann. The whole group is about 100.

WESTMATH a tn. on Ireland Limerick bounded N. by Co. Limerick W. Longford W. Roscommon, S. Kings co. and E. and N.E. Meath greatest length, E.N.E. to W.S.W. 43 m. greatest breadth 26 m. area, 678 sq. m. The surface is hilly in the N. where some heights exceed 700 ft. but elsewhere undulates gently. The strata consist entirely of carboniferous limestone, and the rocks accompanying that formation.

The drainage is shared between the Shannon and the Boyne. The former with its expansion, Lough Nea, forms the W. boundary of the co. and receives its drainage for the most part directly but to some extent also by a remarkable chain of lakes of which Lough Derragh is the largest. The latter receives its share of the drainage chiefly by the Dood. The climate is mild equable, and healthy. The soil is light and somewhat in the W. and in the E. usually consists of a heavy loam. The principal grain-crop is oats, but the far larger part of the available surface is devoted to grazing, and rears black cattle which are considered the best in Ireland. Considerable attention is also, paid to the dairy. Important means of communication are furnished by the Shannon, the Royal canal a branch of the Grand canal and the Great Western railway from Dublin to Galway. Westmarch sends

two members to Parliament—one for the county, and the other for Athlone. The capital is Mullingar. Pop. 111 409.

WESTMESTON, par. Eng. Sussex 4074 ac. P. 617.

WESTMILL L., par. Eng. Hertford 3187 ac. Pop. 880.

WESTMINSTER a city, England, co. Middlesex, but properly the S.W. part of London, being bounded, N. by Oxford Street, from its junction with Tottenham Court on the E., to Kensington Gardens on the W., W. by an irregular line running S.E. from Kensington Gardens towards Chelsea Hospital S. and E. by the Thames, and N. S. by the City proper. It communicates across the Thames with the Surrey side by the Suspension, Waterloo, Westminster, and Vauxhall bridges and contains Buckingham Palace St. James Palace, the House of Parliament, Westminster Abbey the Supreme Courts, and most important government offices, the town-residence of the principal nobility and gentry. Chelsea Hospital and Kensington Gardens Hyde Park, the Green Park, and St. James Park. As a city, it sends two members to the House of Commons and is governed by a high-steward with a high bailiff of his appointment, both holding the office for life and by 18 burgesses, each having jurisdiction like an alderman, over a separate ward. Pop. 241 611.

WESTMORELAND a co. England bounded N. and N.W. by co. Cumberland N.W. by Lancaster and Morecambe Bay S. by Lancaster E. York and N.E. Durham greatest length, N.N.E. to S.W. 30 m. greatest breadth, E. to W. 32 m. area 758 sq. m. The surface with the exception of a small portion in the S. sloping to Morecambe Bay is very mountainous. The Pennine chain entering it at Cruse-Fall on its N. frontier stretches across it in the N.E. and then curves round forming the boundary between it and Yorkshire, while the principal chain of the Cambrian mountains forms its boundary from Helvellyn to Bow Fell and sends a lofty branch nearly across its centre. Much of the celebrated lake-scenery of England is within the limits or on the borders of this co. The streams, which run generally in narrow romantic dales are numerous, but comparatively unimportant. The Eden, the largest flows 30 m. and the Ure, the next in size, 27 m. within the county without becoming navigable. The Trent, though not so long as either, is more important, from forming the broad cataraque which terminates in Morecambe Bay. The strata belong in the W. to the lower and in the centre to the upper Silurian formation in the E. mountain limestone is largely developed and forms some of the loftiest summits; in the N. granite occurs particularly near Ulverston where a low isolated mountain is composed of a small granitic species containing large brilliant crystals of red felspar still further N. in the vale of the Eden around Appleby the red red sandstone appears in connection with a small troubled coal-field. The minerals include graphite for which Borrowdale was long famous excellent roofing-slate marble, coal, lead, and copper. The arable land is mostly confined to the valleys, where the soil usually consists of a dry gravelly loam well adapted for turnips. The far greater part of the remaining surface is in natural pasture, or under wood. The only manufactures of any consequence are the coarse woollens of Kendal &c. The principal means of communication are the Lancaster canal and the Preston Lancaster and Carlisle railway with a branch from Kendal to Bowness. Appleby is the cap. Westmoredale sends two members to Parliament. Pop. 58,373.

WESTMORLAND, an island co. New S. Wales, 57 m. long and about 80 m. in breadth, sloping towards the middle, where it does not exceed 20 m. It is traversed by a portion of the Blue Mountains, which at one point are 4000 ft. high.

WESTON a township and chapelry England co. Derby forming a salient of S. Shildon, and the famous residence of its wealthy merchants and ship-owners. P. 18,842.

WESTON, a vil. and par. England co. Somerset, near the Great Western railway, 2 m. W. N. Bath, with two hand some churches Wesleyan and Congregational Methodist chapels, and limestone-quarries, with many remarkable fossil remains. Area of par. 2550 ac. Pop. 8068.

WETTA or WETTER, an Island Indian Archipelago.

N. of Tumor from which it is separated by a channel about 30 m wide E. of Umbay from which it is separated by the

Ombay Passage about 85 m wide and the best route from Europe to Pitt's Passage and the N Pacific Ocean. Two islands

is about 65 m long, by 25 m broad. Its interior has not been explored.

WITTEN, a lake Sweden about 24 in S.F. Lake
Wener and extending in a long and somewhat crescent

shape between the Iliu Mariental Özlüro, linking and Jökumung lat 57 47 to lat 58 53 N greatest length

N \ E to S.S.W 80 m medium branch about 15 m
area. 272 gms. 27 m. Its link lit above the level of the

area, 272 sq. mi. Its height above the level of the Baltic is about 360 ft. but its depth is in some parts above 400 ft. or 120 ft. below the Baltic level. Its water is so very

clear that the bottom is distinctly visible in 80 ft to 85 ft water. It has periodic rises and falls independent of the

water. It has periodic rises and falls independent of the wetness or dryness of the season and is subject, even in the coldest weather to violent underground swells. When these

take place in winter, the sounds emitted by the ice in cracking and breaking up are often tremendous. An underground river

is traceable throughout the whole length of the lake, from N to S, and its culminating points form the few islands which are

8 and its culminating points form the low islands which appear above its surface. The largest of these is the Viangxau in the S. The Hsiao-feng is part of a general line of moun-

in the S. The Weller forms part of a general line of navigation, which extends across the kingdom from E. to W. and from the interior. By the (—) of the canal it communicates with

far into the interior. By the Grohla canal it communicates with Lake Waner and by the Motale canal with the Baltio. The surface of the lake is in many places magnificent, the shore

scenery of the lake is in many places magnificent. The chief towns on its shores are Motala, Radsdala, Carlsherg, Grenna, Jönköping, Åre, and Åbohus.

WETWANG par Eng York 5740 ac. Pop. 750.

WETZLAR a Rhine prov Prussia, gov and 41 m. E. N. E. Cologne in a valley 1 bank Lahn. It has walls with six gates, magnificent houses, two R. Catholic churches, one of them a fine Gothic cathedral with an ancient portal and several curious monuments, three Protestant churches, a synagogue, and gymnasium, manufactures of leather, bones, gloves, and tobacco, numerous mills, and a trade in iron. Weidlar is the scene of Goethe's *Servants of Mystery*. It was an early a free imperial town and the seat of the imperial chamberlain from 1080 to 1240. Pop. (1852) 5153.

WETZLAR a vil. Bohemia, circle Bunzlau, 3 m. from Friedeburg. Pop. 124.

WETZLIGHM a vil and coast Belgium prov W. Flanders 4 m. S. W. Courtrai 1 bank Iyze with a church, chapel, three schools, three breweries, two mills and two corn mills and manufactures of linen and cotton fabrics, leather, rope, candles, and oil. Pop. 4159.

WETZLINGHUSEN a vil. Rhine prov Prussia, gov and 4 m. Dillendorf 7 bank Elbe with two churches, manufactures of linen, leather, distilleries, vinegar-works, and 4 saw-mills. Pop. (1852) 1212.

WEXFORD a maritime co. Ireland prov Leinster bounded N. by co. Wicklow, E. and S. by George's Channel and W. co. Waterford, Kilkenny and Carlow, greatest length 55 m. breadth 34 m. area, 576,588 ac. The E. coast is dangerous, being without harbours or other shelter and with a range of sandbanks near the shore. Off the S. coast are the islands of the Saltees, Kinnegbeg and Kinnegbeg. The surface is hilly rising into a ridge on the N. W. declining into a level peninsula to the S. E. The strata belong to the clay-slate formation extending along the E. portion of Ireland. The Firth Mountains near Wexford consist principally of quartz-rock granite appears in many places, and greenstone and porphyry also occur. The chief rivers are the Slaney and Barrow the latter navigable for large vessels to New Ross and the former for barges to Enniscorthy. The climate is very temperate. The prevailing soil is a light or buff clay generally well cultivated and producing oats, wheat, barley and potatoes. Barren are numerous, and much better exported. The fisheries also are important. A small quantity of woolen cloths, checks and coarse linens are manufactured. The co. contains 144 parishes and returns four members to Parliament—two for the county and one each for Wexford and New Ross, the two principal towns. Pop. 179,970.

WEXFORD a port and mun. bor. and seaport in Ireland cap above or picturesque situated, 7 bank Slaney, 1 m. S. W. of Wexford Harbour, 73 m. S. Dublin. It is generally built but along the quays and in the more modern streets, are many good houses. The public buildings consist of two established churches, three R. Catholic, and several Protestant dissenting chapels, a county-courthouse, townhall, theatre, union workhouse, hospital, infirmary and prison. The harbour is spacious and of very irregular form. The entrance which is between the extremities of two long narrow sandy peninsulas, is rendered extremely inconvenient by a bank of shifting sand that leaves sufficient water for small craft only. The Slaney opposite the town is crossed by a raised causeway, and a movable wooden bridge in the centre.

The exports in cattle, poultry, butter, grain, and other agricultural produce, are considerable, carried on chiefly by steamers to Liverpool. In 1861 there entered 547 sailing vessels, tonnage 59,551, and 45 steamers, tonnage, 10,454 and there cleared 418 vessels, tonnage, 55,141; and 47 steamers, tonnage, 10,896. Wexford was once surrounded with walls, remains of which, as well as of several such architectural edifices, still exist. It was a member to Parliament. P. 12,810.

WEXHAM par Eng Bucks 670 ac. Pop. 201.

WEXHO or **WEXHO** to Sweden, cap. lin of same name, sometimes called Kronoberg, on the Sudra, and a little S. of Lake Halsa, 208 m. S. W. Stockholm with a small old cathedral a gymnasium, with a library of 10,000 vols. and a cabinet of minerals and natural history, a handsome Episcopate palace, a governor's house and manufactures of carpets, and paper-mills. Pop. 1844. The last also called Kronoberg, area, 7851 sq. m. is part of the ancient division of Småland. It is bounded N. by län Jönköping, R. Kalmar, S. Carlskrona and Christianstad, and W. Halmstad is well watered, contains several lakes, of which Amnen, 18 m. long, by 1 m. to 10 m. broad is the chief and extensive forests furnishing fuel to numerous iron-forges, supplied by the rich mines of the district. It is fertile, yielding all the ordinary grain-crops and depositories cattle, of which many are exported. Pop. 12,185.

WEXHO a river England rises near Alton in Hampshire flows N. N. E. past Guildford, and joins a bank Thames below Chertsey after a course of about 40 m. It is navigable to Godalming.

WHITBY, a seaport, par. North York, at the mouth of the Esk, which

divides it into two nearly equal parts, connected by a hand-

some drawbridge lat. 54 29' N. lon. 0° 36' 45" W. (s).

It consists of brick or stone houses, ranged on level acclivities,

in narrow, steep streets and has an ancient cruciform church,

on the verge of a lofty cliff, seven Dissenting chapels a news-

rooms, assembly rooms public baths a subscription library

and a literary and philosophical society. The harbour is spa-

cious and commodious, having 15 ft. to 16 ft. water at spring,

and 10 ft. to 12 ft. neap tides wet and dry docks, and slips for

ship building. There are also numerous yards for boat-build-

ing, manufacture of sailcloth and ropes, and productive sea-

factories. The imports consist chiefly of timber, wooden

wares, hemp and flax from British America and the Baltic

The foreign exports trade is inconsiderable, but the coasting

trade is extensive, consisting chiefly in the produce of the

alumina in the vicinity and in large quantities of fro-stones, sandstones, whinstones, limestones, and brownstones. The chief articles imported consist of green and blue bones, and coal. In 1879 the port obtained the privilege of landing for which spacious warehouses have been erected. Whitley sends a member to Parliament. Area of par. 15,918 ac. Pop. 1,875.

WHILBY or **PORT-WHILBY** a town and port of entry Canada West, cap. co. and on N shore of Lake Ontario, 22 m E Toronto. It is well built and has four Protestant churches, several schools, a newspaper, a brewery, a tannery and many saw and flouring mills, a harbour, on which government export about \$55,000 and a large and increasing trade in lumber and agricultural produce. Pop. 1750.

WICKLOW a maritime co. Ireland, prov. Leinster bounded N. by co. Dublin, E. St. George's Channel S. co. Wexford, W. Carlow and K. Limerick greatest length, 40 m. breadth 35 m. area, 781 sq. m. The coast is mostly precipitous and dangerous from sandbanks. The surface is diversified and picturesque, rising into high ground the highest of which is Luganquilla 3039 ft. high and is covered by deep and romantic valleys. The sea cliffs and most of the interior of the county consist of clay-slate, the central mountains have a nucleus of granite protruding through the slate. Wicklow is the only Irish county which has no limestone. Its minerals include a little gold in the streams and copper ores and pyrites in considerable quantities. The principal rivers are the Slaney, Vartry and Drooge. The climate is exceedingly mild and agreeable. The principal agricultural products are oats, potatoes, and some wheat. The pastures are extensive but the fisheries are neglected. The scenery of this county are quiet and industrious, and are said to be generally handsome with Roman profiles. Wicklow returns two members to Parliament, both for the county. Its chief towns are Wicklow, the cap. Arklow and Ballinglass. Pop. 98,979.

WICKLOW, a seaport in Ireland cap above co. on a small bay at the mouth of the Vartry, here crossed by a bridge of eight arches, 2 m. S.E. of Dublin. It has narrow streets, a county gaol, jail, infirmary, fever hospital, parish church, St. Catharine Methodist and Quaker chapels, a school and parish schools. Harbour with only 9 ft. water at springs, some imports of timber, iron, coal and limestone, and exports of copper-ore and corn. 1 op 3141.

WICKMILL par Eng. Norfolk 1 op 303.

WICKWAR, a market vil. and par. England, co. and 13 m. S.W. Gloucester. It contains chiefly of a main street, with tolerable stone-houses and has a church, two Dissenting chapels, and an endowed grammar-school. Area of par., 2367 sq. 1 op 966.

WIDDEBURN a in Wittenberg circle Nuecker 6 m. K. Oettingen, with a church and school. Pop. 1419.

WIDDIN, Widen or Viden a in Turkey in Europe Bulgaria, cap. nakap of same name on a wide plain formed by a sweep of E. bank Danube, opposite to Kalesia in Walachia and 190 m. S.E. Belgrade. It is in the form of an irregular pentagon with a double line of fortifications, and batteries which reach down to the river, and, both from its strength and its admirable position, covering the approaches of Vienna, and the road through Nuss and Sophia to Adrianople, and commanding Little Walachia and the defiles of

Transylvania, is regarded as one of the most important military stations in Turkey. Its appearance at a distance is very imposing, but its interior by no means attractive. It consists of a tolerably well-built inner town, inhabited exclusively by Turks and a very indifferent outer or Christian town. Its principal buildings are the pasha's palace, several mosques with tall minarets, and a range of barracks lining the main street. The trade is chiefly in corn, wool, salt. In 1689 the Turks were signally defeated by the Imperialists before the walls of Widdin and in 1834 under cover of the guns, the Ottoman army crossed the Danube, which is here about 1 m. wide, and strongly entrenched themselves on an island close to Kalesia. This town, which may thus be considered as an outwork of Widdin is walled, and consists of about 2000 houses, including three churches, a townhouse, custom house, quarantine and cavalry barracks. On two heights in its plain the Turks created very extensive and formidable redoubts. 1 op of Widdin about 25,000.

WIDDINGTON par Eng. Essex, 2038 sq. Pop. 147.
WIDE BAY a bay New S. Wales, entering between Great Sandy Island and Double Island, lat. 25° 50' S. It receives the river Mary.

Kook and Bobrownik and after a course of about 140 m. joins r bank Vistula, 60 m. S.E. Warsaw.

WIERDE, a vil. and com. Belgium, prov. and 4 m. S.E. Namur on a stream of same name. It has limekilns, and some trade, and a bed of pipe-clay. Pop. 1168.

WIERDEN a vil. Holland, prov. Overijssel, 18 m. N.E. Deventer with two churches and a school. Pop. (agricultural), 1704.

WIERINGEN an isl. Holland, prov. N. Holland in the Friesland-sea, 11 m. S.E. the Halder about 11 m. N.E. to S.W. by 2 m. broad. It is protected from the sea by dikes, strengthened by a sea-groove called *mer* whence the name of the island. It is fertile, yields all kinds of grain, and has excellent meadows, on which numerous sheep depasture, from whose milk a considerable quantity of cheese is made. Wieringen farms are much prized. Besides agriculture, a few of the inhabitants are employed in fishing and sea-faring. It contains the villages of Hylpeltshoek which is the chief one, and Oever Oosterland Broed and Westerland. Pop. 1605.

WIERZ, a vil. and com. Belgium prov. Hainaut, on the canal of Antwerp, 22 m. W. Mons; with two flour-mills and some trade. Pop. 3340.

WIERZBOLOW, or **WYRZALEN** a tn. Russian Poland toward Augustow, near the Prussian frontier, 40 m. N. Suwalki with an old monastery, and a transit trade. P. 1630.

WIEBADEN [anc. *Aqua Matronae*] the cap. city of duchy Nassau, beautifully situated among vineyards and orchards, in the valley of the Balzbach and on the railway to Mainz and Frankfurt, 70 m. W. S.W. Frankfurt. It was once walled and is indifferently built with only one principal street which can be considered handsome in the residences of the duke and the seat of government and annually attracts about 15,000 visitors from all parts of Europe by its baths which were well known to the Romans. The most remarkable edifice is the Kurhaus, a handsome chateau of a large and splendid saloon forming the E. side of a square, while the N. and S. sides are lined by colonnades, filled with gay shops, and surmounting a promenade and a terrace. The other buildings of note are a very ancient townhouse, an old and a new palace, a Protestant and a R. Catholic church, infantry and artillery barracks a library of 50,000 volumes, a museum mist, mil-

WIESELBURG, or **MOOSBURG**, a market tn. Hungary cap. of same name, r bank Leitha, 21 m. S.E. Pressburg with manufactures of woollen cloth a saltpetre refinery and important corn markets from which Vienna is chiefly supplied. Pop. 3000.—The convent about 86 m. E. to W., by 20 m. broad is almost throughout a rich and fertile plain with Lake Neusiedel on the W. and the large masses of Hauzlag on its S. boundary. Pop. 35,200.

WIESENBORN a vil. Bavaria, Lower Franconia, near Kitzingen; with a church a ruined castle and a trade in wine, corn, and fruit. Pop. 1080.

WIESENSTEIG, a tn. Wurtemberg circle Donau, on the Rh. 20 m. N.W. Ulm, with a church, a castle, manufactures of musical instruments and a paper-mill. Pop. 1396.

WIESENTHAL a vil. Bohemia, circle Jung-Bunzlau, about 10 m. from Kolinberg with a school manufactures of glass and glass beads and polishing and other mills. P. 1720.

WIESENTHAL ID, a market tn. Bavaria, Lower Franconia, 20 m. E.N.E. Würzburg with a church chapel and castle and a trade in corn, hops, and fruit. Pop. 1091.

WIESELÖCH a tn. Baden circle Lower Bithin, on the Lahn, 16 m. S.E. Mannheim, and on the railway to Carlsruhe, with a church and old ducal palace, now used as a state-prison. Pop. 3721.

WIEZEL, a vil. and com. Belgium, prov. E. Flanders 18 m. E.S.E. Ghent. It has a distillery, a thread mill, a brick-work and some trade. Pop. 1803.

WIGAN a market tn. and mun. and pari. bor. England, Lancashire, 17 m. W. W. Manchester on the Douglas, which has been made navigable to its junction with the Ribbles, on the Leeds and Liverpool canal and on the North Union and other connecting lines of railway. It consists of an old town, built chiefly on the right and the more modern suburb of Becholes on the left bank and communicating with it by a bridge. Both are irregularly and indifferently built, and though many improvements have been made, and even entire streets of good houses have risen up the general appearance of the town continues to be by no means prepossessing. It is lighted with gas, and well supplied with water. The objects most deserving of notice are the original parish church, a stately structure with a handsome square tower and a spacious and handsome interior. St. Catherine's church, on the opposite side of the river, with an elegant spire several other fine brick churches and chapels connected with the Establishment, or belonging to the Presbyterian Wesleyan Methodists Independents, Baptists and R. Catholics grammar blue coat, national, infant, and Sunday schools, a mechanics institute, a library and museum, townhall and jail, dispensary, &c. An extensive and valuable coal field round the town and the easy means of transit by water and railway give peculiar facilities for manufactures, which are carried on to a large extent, and consist chiefly of calicoes, flannels and other cotton goods, linens, checks, cotton twist, &c. In addition to these, are manufactures of spades and edge tools various articles in brass and pewter iron-foundries, chemical works, and corn and paper mills. From the junction of three Roman roads at Wigan, it is supposed to occupy the site of a Roman station but seems rather to owe its origin to a castle built during the Saxon period and said to have

WIEBADEN.—From Lange, *Annalen von Deutschland*.

tery and ordinary hospitals, a theatre a polytechnic and other schools. The springs, which are alkaline, and among the most powerful of their class are very numerous, and have temperatures varying from 118° to 156° Fah. The last is the tem perature of the Kochbrunnen the principal spring, which seems in violent ebullition, from the vast quantity of carbonic acid gas which is continually rising and escaping in bubbles. Pop. 12,259.

WIESE, Wiesner, or **WYSA**, a river, rises on the Feldberg, in the S. of Baden, and flows about 45 m., first S.W., then W.S.W., and joins r bank Rhine about 2 m. below Basel.

WIERE (*Gieseler*), a vil. Prussia, prov. Silesia, reg. Oppeln, circle Neustadt, on the Prodnika with a castle and two mills. Pop. 1504.

VOL. II

been the scene of some sanguinary struggles between the Saxons and native Britons. It is a borough by prescription. During the great Civil war Wigan as one of the principal stations of the Royalists, suffered from a series of struggles between them and the Parliamentarians. It is governed by a mayor 9 aldermen, and 20 councillors, and sends two members to the House of Commons. Pop. of bor., 51,941 Area of par. 25,493 ac. Pop. 63,287.

WIGHT (Hants) (see *Wight*) an is off the S coast, England on and opposite to mainland Hants, being separated from it by the road of Spithead on the E., and by the "silent on the W." It is of a rhomboidal form about 23 m. long E. to W. by 15 m. broad east, about 70 m. area, 164 sq m. Some of the coasts, particularly of the E., are high, and terminate in steep cliffs overhanging a beach covered with vast fragments of rock, which the waves have undermined and thrown down. The whole series of the strata which compose the Isle of Wight are exhibited in its prospective cliffs, consisting chiefly of chalk in the entire overlain by the immediately ascending strata in the N. and the immediately descending strata in the S. and S.E. The general appearance of the country is exceedingly diversified presenting a constant succession of hills and dale, intermingled with woody tracts and well-cultivated lands. The air is exceedingly salubrious, and its mildness is evinced by the luxuriant growth of myrtles and other delicate plants in the open air. The district called *Widely* has long been much resorted to by pulmonary invalids. Only a small portion of the surface is waste. The dunes which cross the island N. to W. and form excellent *de-spruils*, separate it into two districts which in their general character contrast with each other the soil on the N. side being generally a stiff cold clay and on the S. side a fertile sandy loam. On the N. side the prevailing rotation is fallow wheat oats clover for one rarely two years on the S. side the Norfolk or four-course system of turnips, barley clover and wheat. The principal exports are wheat flour and white sand and dints admirably adapted for the manufacture of glass and porcelain. The Isle of Wight returns three members to Parliament. The chief towns are Newport (the capital) East and West Cowes Ryde, Newlyn Breding and Yarmouth. Among its antiquities the most interesting

WIGHY a lake, Russian Poland, volvod Augustowo, about 6 m S.E. Suwalki, greatest length, N to S. 6 m; main breadth, rather more than 1 m. On an island in the lake, approached by an embankment is a fine old monastery, now the residence of the Bishop of Lithuania.

WIGTON MANRA a vil and par England, co and 3 m S.E. Letchmore on the Leicester canal and the M. & L. railway with a parish church, an Independent chapel a lunatic asylum, an hospital and manufactures of stockings. Area of par 3780 ac. Pop. 2441.

WIGTOFT par Eng Lincoln 8800 ac. Pop. 741. **WIGTON** or **WIGTONHIRE**, a maritime co. Scotland occupying its S.W. extremity; bounded, W. and S. by the Irish Sea, N. Argyshire, and E. Kirkcubright area, 198 780 ac. of which about one-third is supposed arable. The coast is indented by numerous deep and spacious bays of which Wighton Looe, and Loch Ryan are the most important. The surface is hilly but the heights vary only from 400 ft. to 900 ft. The chief rivers are the Cress and Bladenoch, both partially navigable. Generally the surface is better adapted for pasture than tillage. It is divided into three districts—the Mearns, extending from Wighton to Port William to the Burrow Head the Rhyma, comprising the peninsula formed by Loch Ryan and the Bay of Looe terminating in the Mull of Galloway on the S. and Corranall Point on the N.; and the Moors, or upper district. The soil of the first two is for the most part a heavily loose dry and well adapted for the turnip-husbandry, near the town of Wighton there is a considerable extent of rich alluvial land. The Moors are bleak and barren. Oats and barley are the principal crops, wheat, also, and potatoes are largely cultivated. The breed of cattle is excellent. The county returns a member to Parliament, and its burghs of Wighton, Withern and Stranraer unite with that of New Galloway in Kirkcubright, in returning a member. Pop. 48,359.

WIGTON, a royal and par bur and market town, Scotland cap. above on a hill above the W. side of Wighton Bay 94 m S.W. Edinburgh. It has three main streets straight and well kept an Established church, a Free and a U. Presbyterian church a normal and other schools, two libraries, and a clothing-society handsome county prison, and an elegant Gothic market-cross of granite. The harbour distant about 1 m. admits vessels of 800 tons. The chief export is agricultural produce. Along with Withern &c., it sends a member to Parliament. Pop. 2131.

WIGTON, a market tn. and par England, co. Cumberland, on a gentle acclivity 10 m S.W. Carlisle, with which it is connected by railway. It consists of two main streets, with a central market-place; is well built of stone, and has an elegant parish church, four Dissenting chapels, a free grammar-school, an hospital for six indigent widows of Protestant clergymen, a mechanics institute, for which a neat Corinthian edifice has been built; extensive manufactures of gungams and shawls, and a woollen-mill. Area of par, 11,800 ac. P. 6329.

WIHERIES, a vil and com Belgium, prov. Hainaut, 2 m S.W. Mous, with manufactures of tobacco, two breweries, and a trade in agricultural produce. Pop. 1614.

WIJCHEN a vil Holland, prov. Gelderland, 6 m S.W. Nijmegen, with two churches, two schools, and a fine old quadrangular castle, with an ornamental tower in the center, and surrounded by a broad ditch. Pop. (agricultural) 936.

WIJHIF a vil Holland, prov. Overijssel, 9 m N. Deventer, on the IJssel, here crossed by a ferry. It has a church and school considerable manufactures of Bologna sausages and smoked meat, brick-kilns, linseed-oil mills, and a good general trade. Pop. 11 840.

WIJK or **WUZZ-AT** HEMBOER a vil. Holland, prov. N. Brabant, 11 m N.W. Hertogenboech, with a church and a school. Inhabitants engaged in agriculture, and in horse and cattle rearing. Pop. 1229. — (Du Wijk) A vil, prov. Drenthe, 80 m S.W. Assen. Pop. 640.

CARTERBROOK CASTLE, ISLE OF WIGHT. — From Muller's Telegraph

is Carterbrooke Castle, which stands a little S.W. of Newport and though now only a heap of picturesque ruins has many historical associations. It is supposed to have originally been a fortress of the Britons: was afterwards repaired and enlarged by the Romans, was considerably strengthened by a general of Cerdic, who founded the kingdom of the West Saxons: received many improvements from Pitt-Osborne, one of the principal knights of William the Conqueror: was rebuilt by Richard de Bures East of Devonshire, in the reign of Henry I.; and in the reign of Edward IV., passed to the crown. During the last civil war it became the asylum of Charles I. on his escape from Hampton court, and afterwards his prison. The castle and the grounds around it, forming a beautiful and commanding promenade, cover about 30 acres. Pop. 50 524.

WIGHTON par Eng Norfolk 2937 ac. Pop. 562.

WILTTS, or WILTSHIRE, a co. England, bounded, N. and N.W. by co. Gloucestershire S.W. Somerset, S. Dorset, and Dorset, E. Hants and Berks great length, N. to E. 60 m., middle breadth, 23 m., area, 1352 sq. m. It is of a compact and nearly quadrangular form, and is divided by the Upper Avon and Kennet, and the canal between them into N. and S. divisions, distinguished from each other by a con-

considerable extent by distinct physical features, the N. consisting principally of a fertile flat, with scarcely any perceptible slope, except on the N. front, where it begins to rise in the direction of the Cotswold Hills, and near the centre, where it is broken by a ridge of downs and the S., though presenting at a distance the appearance of an almost uninterrupted plain, having in fact on undulating surface, both broken by downs and intersected by some fertile and well-watered valleys. In this S. division is Salisbury Plain an elevated plateau, for the most part uninclosed and uncultivated, covered with a spongy herbage, well adapted for sheepwalks, and presenting as its most remarkable feature the Dringdon

STONEHENGE, WILTSHIRE.—From Huggins' Colfax Series

remains of Stonehenge, situated about 9 m. N. Salisbury and those of Avebury about 5 m. W. Marlborough. Stonehenge is particularly on which much antiquarian research has been not very successfully expended consists of an assemblage of enormous stones, some weighing at least 50 tons, and two of them 70 tons each inclosed within a circular embankment of 300 ft. in diameter and partly arranged in rough hewn monolith pillars, connected by superincumbent slabs, so as to form a kind of double circle. The strata of the country are principally cretaceous, belonging to the great central chalk district of England. The oolitic formation overlies by the chalk is developed in a long and narrow belt, chiefly on the W. and N. The strata belongs to three distinct basins—the Thames which receives a small portion directly and a still larger portion by the Kennet. Bristol Channel, which receives it by the Upper Avon and the English Channel, which receives it by the Lower Avon, and its tributaries Bourne, Wilbyourne, and Nadder. Though the arable land is of considerable extent, and large quantities of turnips, wheat, and barley are grown, a far larger proportion of the surface is kept in natural or artificial pasture, devoted chiefly to the N. division to be resting of sheep and in the N. to cattle-grazing and the dairy. The staple manufacture is woolen goods for which the principal localities are Salisbury (the capital) Wilton, famous particularly for carpets, Bradford Treasury Wetherby &c. Excellent cutlery and steel goods are made at Salisbury and silk have made some progress at Devizes. Ample means of communication are furnished by the Thames and Severn, the Kennet and Avon and the Wilts and Berks canals, and by the main line as well as several branches of the Great Western Railway. Wilts returns 16 members to Parliament—two for each of its div. alone, and 14 for boroughs. Pop. 854,921.

WILTZ is in Holland prov and 31 m. N.W. Luxembourg with a church, a chapel a townhouse an hospital an old castle, and a considerable trade in grain, leather, paper, wood, and cloth. Pop. 2580.

WINCHILSTER (Latin *Vindis Vindorum*) an episcopal city England, Hampshire pleasantly situated on a slope rising gradually from r bank (then here crossed by a handsome stone-bridge, and on the London and South Western railway, 13 m. N.N.E. Southampton. It consists of the city proper and of part of the liberty of Soke which nearly inclose it on every side. The former, one of the most ancient places in England was once walled, and entered by four principal gates. Parts of the walls and ditch still remain, and the west gate, completing of a wide gateway with a massive Norman tower over it, though somewhat defaced by modern alterations, is still entire. The High Street which traverses the town centrally from E to W and has in its centre an elegant pyramidal cross, richly ornamented and 49 ft. high, is intersected by several minor streets at right angles, and the houses, many of them of great antiquity are in general subterranean and well built. All the streets are well paved and lighted with gas, and the supply of excellent water is abundant. By far the most important public edifice is the cathedral, which occupies a large open space towards the S.E. and is at once one of the largest and most interesting in England. It was first completed in 948, but about 870 suffered so much from the ravages of the Danes, as to have become almost ruinous. The present structure commenced in 1078 was completed in 1098, but has since received so many additions, and undergone so many alterations, as to have lost much of its original unity of design, and assumed a form which makes it difficult to say whether the early Norman or the later English is predominant. It is in the form of a cross, with a square tower rising from the point of intersection to the height of 183 ft. though not more than 26 ft. above the roof. The whole length, from the W. entrance to the Lady Chapel, at the E. end, is 545 ft. the width of the transept, 186 ft. The most imposing part of the

structure is the W front, consisting of three deeply recessed and highly enriched bays with an ornamental gallery above, a large and beautiful window with rich mouldings, several massive buttresses and pinnated towers and a gable termination crowned by a unopposed statue of William of Wykeham. The interior consists of a nave 54 ft. long and 78 ft. high aisle separated from it by a double range of pillars 13 ft in diameter a choir, 40 ft. wide, occupying the lower part of the central tower and lighted by clear-story windows and transepts, containing several very beautiful chapels and altars. The roof is elaborately groined and enriched with delicate tracery, arched bosses, and other ornaments; the throns, prebendal stalls, and pulpit present excellent specimens of carving over the altar is a painting of the Raising of Lazarus, by West there are numerous monuments, among which those of Hardham and William Rufus, Bishops Fox (Gardiner) and Wykeham possess much historical interest. The whole building is in the highest state of repair and a new powerful organ, and several handsome memorial windows, have recently been fixed in. In other editions and establishments deserving of notice are the ancient church of St. Lawrence, with a lofty tower. St. Maurice's a handsome modern edifice with an ancient tower, several other churches, Baptist, Independent, Wesleyan and St. Catholic chapel the last with a Benedictine monastery in its immediate vicinity the college, founded by William of Wykeham, in 1387 richly endowed, celebrated for the number of eminent scholars which it has produced and accommodated in a large range of buildings, among which the chapel, hall and library are beautiful specimens of architecture, the town hall, with a handsome projecting clock the old castle the chapel of which has been converted into a county hall and contains the celebrated round table fabulously attributed to King Arthur a spacious new county prison military barracks for 2000 infantry in a splendid building intended for a palace by Charles II a county hospital or infirmary said to be the first establishment of the kind in the kingdom St John's house, which once belonged to the Templars, and is now used partly as a public room for public assemblies and concerts, and partly as a schoolroom in a fine public library and museum and a flourishing mechanics institution with a library of 8400 volumes 87 monks' college or Christ's hospital and the hospital of St. Cross, beautifully situated about 1/2 m S of the city on the banks of the Itchen. This last hospital which was founded in 1123 occupies an elegant range of buildings, including an ancient and interesting cruciform church was richly endowed and has recently attracted considerable attention in consequence of a parliamentary inquiry as to the alleged abuse of its endowments. There are no manufactures or trade of any consequence but the weekly corn-market, for which a handsome corn-exchange affords excellent accommodation is important and there are four annual fairs, one of which, for sheep, is much frequented.

Windscheow originally a British town under the name of Caer-Gwent (White City) became an important Roman station, and continued to flourish till their final departure from Britain in 519. Cerdic the Saxon made it his capital and in 837 when Egbert was crowned in its cathedral as sole monarch of the Saxons his territory it became the capital of his whole dominions. Alfred made it his chief residence and in the reign of Edgar the celebrated Windsor basket, still preserved in the city museum, was made the legal standard corn-measure. Canute on dividing the kingdom with Edmund Ironside, fixed his residence here and William the Conqueror not only imitated him in this respect, but built a strong castle which was blown up by Cromwell in 1646. Another castle, built by Henry de Blois, continued to be a place of great strength till the demolition of its fortifications in the reign of Henry II when it was converted into an episcopal palace. Its property was greatly injured by the removal of the court to London and the wars of the subsequent reigns, more especially the last civil war when, after the battle of Naseby it stood a week a siege from Cromwell. It received its first charter of incorporation from Henry II in 1181 and since the 23d Edward I when it first obtained the election franchise, has returned two members to Parliament. It is governed by a mayor, five aldermen and 18 councillors. Pop. 18,704.

WINDCHESTER, two towns U States.—1 A tn Virginia, in a beautiful and fertile district, at the terminus of the

Winchester and Potomac railway, 65 m. W by N Washington It is regularly and substantially built, and has twelve churches, a lyceum, an academy, and a large transit trade. Pop. 4500.—2, A vil. WIRBOLOW a market tn and par England, co. and 13 m. N N W Donkey in a valley nearly surrounded with hills. It has a handsome church in the later English style, a free Dissenting chapel, a free grammar-school, almshouses, manufactures of cotton goods, hats, and hosiery and malikins. The inhabitants are chiefly employed in the lead-mine in the vicinity. Area of par 14 154 ac. Pop. 7430

WIRTEMBERG country Germany See WIRTEMBERG

WIRSEACH or WAMM -1 A market tn. and par England, in the Vale of Ely, on the Great Ouse, on the bank over which is a handsome stone bridge. It has five principal streets, of good width, well paved and wall kept, two market-places, and a handsome crescent. It is generally well built of red brick well lighted with gas and tolerably supplied with water and has a parish church, chapel of ease, six Dissenting chapels a museum of natural history and antiquities, seven workhouses, a grammar two national two British, two infant, and several other schools a literary society with a library of about 5000 volumes a scientific association and a machine manufactory a large cotton-mill an extensive brewery, a foundry, and a trade, chiefly in agricultural produce and imports of coals and timber. Owing to the improved navigation of the Great Ouse, vessels of 500 tons have, in spring-tides discharged their cargoes near the town. Among the natives are Clarkson the fellow labourer of Witherforce, and William Godwin. Area of par 6133 ac. Pop. 10 594.-2 (St. Mary) par Cambridge 8616 ac. Pop. 2115

WIRSHOUCH-Glaucus a vil and par England co. Sussex 20 m. N N E. Chichester on the Arun. It has a parish church with a tower and lofty steeple, spire a chapel of ease, and an Independent chapel. Pop. 1740. Area, 8484 ac.

WIRY or WURY a tn Sweden esp. and on the W shore of ut Gotland which sometimes takes its name. It is one of the oldest towns in the N of Europe, and was once a leading member of the Hanseatic league and with its walls and towers almost as entire as in the 13th century presents a striking appearance. In its building it exhibits a curious combination of ancient and modern architecture. The chief objects of note are the Dom or cathedral, built in 1190 the Heilige-Ande-Kirche (church of the Holy Ghost) built in 1046, and an interesting specimen of early Gothic architecture a gymnasium, a large hospital and workhouse. The manufactures are chiefly leather and tobacco. The harbour is good, and has an active trade. Steamers ply regularly between Wiry and Stockholm. Pop. 4260

WISLAU or WISLOW a tn Austria, Moravia, circle and 19 m. N E E. Brunn on the Mauts. It has three churches and a castle, manufactures of woollen and linen cloth, and five mills. 1 op. 3264

WISCONSIN a river U States has its sources in several small lakes on the N frontiers of Wisconsin state flows first S. then S W. and joins the bank Mississippi at Prairie du Chien after a course of about 300 m. It is obstructed by many shoals and bars.

WISCONSIN, one of the U States of N America lat 42° 30' to 47° N. lon. 87° to 92° W. bounded, N by Lake Superior E by Michigan E. Lake Michigan R Illinois, S W Iowa, and W Minnesota length, 300 m., breadth, 240 m., area, 53 924 sq. m. It forms an irregular pentagon, and consists of an undulating plateau, varying from 600 ft. to 1600 ft. above sea-level. The highest land stretches centrally from N N W to S S E, dividing the waters carried to the lakes, from those carried to the Mississippi. From this highland the descent in the N to Lake Superior is very abrupt, and the surface is much broken by korrens and cañons. The principal river is the Mississippi, which with its tributary St. Croix forms the greater part of the W and the whole of the N W boundary, and is augmented by numerous other streams of which the most important are the Chippewy and the Wisconsin. The only stream of any consequence not belonging to the Mississippi, is the Menomonee, which forms part of the N E. boundary and falls into Green Bay a considerable branch of Lake Michigan. Besides the large forest-lands, many others are scattered over the surface. Of these, by far the largest is Winnebago, which discharges itself by Fox River into Green Bay. In some districts are extensive swampy tracts. The mean temperature of the year is between 46° and 47°, but the range is very great, the thermometer

sometimes descending in winter to 40° below zero, and rising in summer to 100°. The air is said to be generally salubrious. About nine-tenths of the inhabitants are employed in farming, and grazing. The most important mineral worked is lead, which occurs in the S.W. copper is found in the N.E. and from more or less in almost every district. Manufactures have made very little progress, but the trade is important. To increase its facilities, several important works among others, the Forthage canal to communicate between Lake Michigan and the Mississippi, and the Milwaukee and Galena railroad are now in progress. Madison is the capital. 1 (1850) 306,191

WISLEY, par Eng Surrey, 1821 ac. Pop. 107

Glasgow with a chapel of ease 1 Presbyterians, Reformed Presbyterians, and Baptist churches, a savings bank several schools a mechanics institute a large distillery a flax mill and extensive works. Many of the inhabitants are employed in the coal mines and iron-works of the vicinity. Pop. 8271

WISHFORD (Gwent) par Eng Wilt 1510 ac. P. 478

WISLAKA, two rivers, Austria, Galicia. — 1. Rises on the N. slope of the Carpathians flows very circuitously N.E. and joins R. bank V. style, after a course of about 70 m. — 2. Rises also in the Carpathians a few miles E. of the former flows N.E. and joins the San near Grotzau

WISMAR, a seaport in Mecklenburg-Schwerin at the mouth of a small stream which forms the outlet of the lake, and 17 m N. of the town of Solwerin. It is surrounded by walls and ditches, entered by four gates, and is built on an oval form with houses of a curious and picturesque appearance. It has four churches, two of them handsome, and one a fine Gothic structure of the 14th century a townhouse, ornithological gymnasium, and other schools, infirmary orphan hospital and numerous charities. The manufactures are in significant, but the trade, favoured by one of the best harbours in the Baltic, is considerable. The principal exports are butter and corn, imports, wine, salt, coals and herrings. Wismar lost much of its importance from the rise of Lübeck, and suffers greatly from the competition of Rostock. P. 11,860

WISNICA, or Wisnauca, a town Austria, Galicia, circle Galicia on the side of a conical hill crowned by a castle with five towers, 76 m S.E. Cracow. It has wooden houses a church and an old Carmelite monastery used partly as a courthouse and partly as a house of correction

WISOWITZ, a town Austria Moravia, circle Fiuman, on the Dravuska, 19 m N.E. Radseck, with a church a castle, a monetary manufactures of coarse woollens, and a paper mill. Pop. 8713.

WITTENBACH a vil Switzerland can St. Gall with a good school and a post-office. Pop. 1884.

WITTENBACH a tn. Prussia prov Saxony gov and 47 m N W Merseburg a bank libe, here crossed by a long wooden bridge, and near the railway from Berlin to Leipzig it consists of the town proper and two suburbs, and is a place of considerable strength, being both surrounded by walls with three gates, and defended by a fort and a strong castle. It is very indifferently built, and so both dirty and ill paved, but possesses high claims to notice, as having been the cradle of the Reformation. In one celebrated university now removed to Halle Luther was professor of philosophy and theology, and on the doors of one of its churches he hung up the celebrated theses, by which the dissonance which followed on them, the greatest abuses and impostures of the papacy were overturned. The principal buildings and objects of interest in the town are the hollendokirche in which both Luther and Melancthon are buried as well as their faithful friends and protectors the electors Fred rich the Wise whose

start-on-the-Oder with two churches a poorhouse, manufactures of linen and hosiery and a trade in cattle, and several mills. Pop. (1852), 2390.

 Brabant, on the Woluwe 4 m. E. Brussels. — 1, (St. Lam-
 bert) with a brewery, distillery, two flour-mills, and some
 trade. Large numbers of peats are cut in the vicinity. Pop.
 1111 — 2, (St. Pierre) with a flour-mill and a brewery.
 Pop. 1164

WOLVERHAMPTON, a market to and man and pari-
 lor England, co. Stafford, 13 m. N. W. by W. Birmingham.
 It is here situated, upon the summit of an eminence com-
 manding a picturesque view and is substantially but very
 irregularly built. During the last ten years, however it has
 made extraordinary progress, and many public buildings have
 been erected as it works of general utility carried on. The more

important edifices and objects of note are eight churches, of
 which the principal is the collegiate church of St. Peter, a
 fine stately structure with lofty embattled tower, and many
 features of great interest, several excellent Dissenting chapels
 an exchange, a very capacious market-hall, a public subscrip-
 tion library of about 10,000 volumes, a very elegant school
 of practical art, opened in 1854, a noble hospital, a townhall,
 a very large and convenient orphanage, mainly founded by
 Mr. John Lees, an infant school and merchant, a theatre, a me-
 chanics institute, a free grammar, blue-coat, ragged, national
 and other schools, various other charitable institutions, a union
 workhouse, a cemetery race-course, cattle-market, subscrip-
 tion-baths, &c.

Situated in the heart of the great midland mining-district,
 Wolverhampton derives its wealth from the extensive beds of
 coal and ironstone which abound in its vicinity and the work-
 ing of which gives abundant occupation to large numbers of
 its population. The smelting of iron-ore and its conversion
 into pig, railway sheet, hoop, rod, and nail iron, boiler-plates,
 iron-castings, &c., constitute its staple manufactures and trade,
 but it has from an early period obtained a high name for the
 skill and ingenuity displayed by its artisans in the manufac-
 ture of locks and keys. — Almost every article produced from
 steel, brass, and tin is made here to a greater or less extent.
 Among other articles may be principally enumerated kingly,
 latches, bolts, axes, spades and garden-tools, vices, anvils,
 coffee and malt mills, fire-arms, grates, &c. Paper, mangle
 and japanned and tin wares are very extensively made, and
 notice is also due to the manufactures of tin-plates, enamelled
 ordinary utensils, chemicals, varnishes, &c. All the goods
 thus produced are justly celebrated for the beauty and ex-
 cellent character of their workmanship. The facilities enjoyed
 in carrying on this important trade are very ample. The
 advantages of canal-communication has long been possessed,
 and latterly the town has become the focus of the London
 and North Western, Shrewsbury and Birmingham, Oxford,
 Worcester and Wolverhampton and other railways, for which
 two handsome and commodious stations have been provided.
 Besides two weekly markets, an annual fair, granted by
 Henry III. in 1208 is still held during three days.

Wolverhampton is of considerable antiquity although little
 can be ascertained of its history till 990, when Wulfstan, or
 Wulfstan, master of Ethelred II. and father of Athelstan
 Duke of Northampton, founded and endowed here the church
 and college of St. Mary afterwards rededicated to St. Peter.
 Originally Hampton afterwards Wulfstan's Hampton, it has
 long since been corrupted to its present name.

The municipal borough was incorporated in 1847, and is
 divided into eight wards bearing the names of its eight
 churches. The parliamentary borough which includes Bil-
 ston appoints two members. Area of par., 10,690 ac. Pop.
 52,587. 1 op. (ann. hor.), 49,985

WONK, a ruined N. Hinduism, prov Candahar; with eight large and four small pagodes of hewn granite, and a pyramidal form with numerous carvings, decorations, and colossal statues

WONKESHI a vil. and par England, co. Surrey 8 m. S. E. Guildford on the Way and Aron canal. It has a parish church with a tower picturesque situated in the Park of Lord Grantham two independent chapels, and a mill for dressing leather. Pop. 1390 Area, 4427 ac.

WONGHOWIE, or WASNOWIE, a tn. Prussia prov Posen gov. and 41 m. S.W. Bromberg on the Wilna and a small lake, with a R. Catholic church a monastery and a synagogue. Pop. (1857) 2724

WONSTON par Eng. Hants 4160 ac. Pop. 715.

WONTERGHEM, a vil. and com. Belgum, prov E. Flanders, on the Oude-Wandel an affluent of the Lys, 15 m. W. S.W. Ghent with manufactures of linen and cotton. Pop. 1075.

WOOD-STAN regarded by the Chinese as one of the most sacred spots of the empire, in the N.W. of prov Fokien, in the Bohai-tai district, 420 m. N.E. Canton. It consists of a collection of abrupt and almost vertical heights the loftiest about 1000 ft., scattered apparently by some great convulsions of nature over an extensive plain. They are covered with numerous Buddhist temples the largest of which properly itself a collection of temples in beautifully situated on the sloping side of a basin scooped out of the highest summit, with a lake in its centre, and tea plantations and dense forests on its sides. The rocks are composed in their lower parts of clay-slate and sandstone conglomerates intersected in all directions by masses or veins of quartz and granite. The latter, of a very dark colour caused by the abundance of fine deep black-black mica which it contains, forms the summit, and hence, probably, also the nucleus of the principal mountains in this part of the country

WOOLEVY a vil. and par England co. Bucks. on a small stream 8 m. W. S.W. Beaconsfield with a handsome parish church, independent and Wesleyan chapels manufactures of bone-lace, and paper and flour mills. Area, 2850 ac. Pop. 2026

WORCESTER an inland co England, bounded N by

Salop and Stafford W Hereford S Gloucester and E War-

wick with some separated portions, enclosed by the Severn

Gloucester and Warwick. Area, 7958 sq m. The surface,

generally level or gently undulating has some extensive and

beautiful valleys, the principal of which is that of the Severn is

20 m long and 3 m to 1 m broad. On the S W are the

fine eminences called the Malvern Hills, the loftiest of which

is 1315 ft. above sea level. The strata consist for the most

part of new red sandstone lias, and oolite, other formations

are visible in the chain of the Malvern Hills and some other

districts. The soil composed chiefly of clay and loam, is of

great fertility. The principal crops are wheat, barley, oats,

beans, peas, vetches, turnips, hops and carrots. The orchards

are celebrated for their apples and cider. The value consists

of meadows and rich pastures. The sheep are of the Leicester

breed. Coal is found in the N, the blue springs at Droit-

wich supply immense quantities of salt iron, &c. are manu-

factured at Dudley carpets at Kidderminster and porcelain,

&c. at Worcester. Worcester sends 12 members to Parlia-

ment—four for the county and eight for the boroughs of Wor-

cester (the capital), Evesham, Droitwich, Dudley, Kiddermin-

ster and Bewdley. Pop. 276 926.

WORCESTER a tn England cap above on pleasantly

situated on a gradual slope above the Severn which is

here crossed by a handsome bridge communicating with the

city of St. John and on the Oxford and Worcester

and the Bristol and Birmingham railways, 109 m W N W

London. It is approached through a rich and beautiful country,

and is in general well built, consisting of several spacious

streets, which intersect at right angles, the houses being

chiefly of red brick but in some of the more ancient parts of

the city, they are cross timbered and gabled, from two to three

centuries old. The principal street, formed by the junction of

High Street, Foregate Street, and the Tiding presents a

straight and level line, about 1 m long, and remarkable for

its picturesque appearance, and many of the houses and shops

are both substantial and elegant. The principal edifice is

the cathedral a spacious but externally plain structure, in the

form of a double cross, with a noble square tower which is

enriched with canopied niches and statues, and rises from its

centre to the height of 198 feet. The interior has an early

English choir with surrounding chapels, much admired for

the sharpness and delicacy of their mouldings a groined roof

and an altar-screen and pulpit, both of stone and finely sculp-

tured. The nave, separated from the choir by richly clustered

columns, is lighted by a range of clerestory windows. The

chancel, situated on the S, forms a spacious transept and

the chapter-house, externally in the form of a decagon, but

chamber within, has a finely grained roof supported by a central column, and contains the cathedral library. The other objects of note include 18 churches, besides chapels attached to hospitals and to the infirmary several of them with handsome spires, among which that of St. Andrew's is particularly admired various dissenting chapels belonging to Independent Primitive and Wesleyan Methodists, Lady Ingham's Congregational, Baptist, Quakers, &c. Catholic, &c. the abbey hall a handsome classic building with massive Ionic columns; the townhall, of brick with stone quoins colonnades, and ornaments large county and city jails, a museum of the Natural History Society three large market-halls a collegiate school Queen Elizabeth's grammar-school national, British Sunday infant, and other schools an Athenaeum a government school of design, a music-hall a subscription library, a law-library a theatre, a city and county infirmary with two hospitals fronted, good internal arrangements, and a considerable extent of garden and pleasure ground, a dispensary an ophthalmic institution house of industry, a female asylum, St. Oswald's hospital and a great number of almshouses and charities. The manufactures are chiefly porcelain, for which the town and vicinity have long been celebrated, leather gloves, once the most important staple, hair cloth, lace, iron-ware, gin, vinegar and British wine. The trade, which, besides railway-communication and the river has the advantage of the Worcester and Birmingham canal, consists principally in coal iron mack, steel, and tin-ware and in supplying a large surrounding district with many of the ordinary articles of consumption. Besides two weekly markets, one of them for corn there are monthly fairs, of which the most important are for cattle and hops. At Fitzhards, the principal place of summer resort there is a race-course, where races are held twice a year Worcester has three newspapers, and the remarkable taste for music which prevails among the inhabitants is evinced by the fact that there is no town in England of the same size, where musical entertainments are so frequently and successfully given. The state of the fortress of Worcester is traced back to the time of the ancient Britons, from whom it was wrested by the Romans, who made it an important station. In 628 it was taken by Penda, king of Mercia, and in 679 its first bishop was consecrated. After being destroyed by the Danes it was rebuilt in 894 by Ethelred a Mercian prince, to whom Alfred had given his daughter Elfreda in marriage. Shortly after the Conquest, a commanding height overlooking the Severn became the site of its extensive castle of which a square fortification called Edgar tower upwards of six centuries old, is all that now remains. The first charter of incorporation was given by Henry I. It afterwards suffered severely both from intestine feuds and incursions of the Welsh it was also repeatedly ravaged by the plague. In the last civil war its strong loyalist feelings made it the scene of several keen combats and repeatedly provoked the vengeance of the Parliament. Its corporation consists of a mayor 12 aldermen and 85 councillors. It returns two members to the House of Commons. Among its distinguished natives are St. Wulfstan the monk, historian Heming and Florence and the great Lord Somers. Pop. 27,528.

WORLETT, a tn. L. Essex, Massachusetts, in a valley on the Blackstone canal, and on several lines of railway. It is considered one of the finest towns in New England, and has a spacious public green, and several elegant streets, one of which about 1½ m long is straight broad and shaded with beautiful trees. The public buildings include seven churches, a fine courthouse, the hall of the American Antiquarian Society forming a handsome edifice with a vaulted library and museum, a B. Catholic college, several academies and schools, and the state lunatic asylum beautifully situated on a height E. of the town, amid extensive and highly ornamented grounds, and managed so as to be a model for similar establishments. The manufactures are cotton and woollen fabrics, which are the staples carpets, paper wire castings, railroad and other carriages, machinery, brass and tin ware, musical instruments, hats, straw-hats, shoes, harness, &c. The trade has greatly increased since the opening of the railway to Boston. Pop. (1860) 17,059.

WORCESTER, a Cape Colony ttp. division of same name, beautifully situated on an extensive plain near the confluence of the Hex and Breeds, 62 m E N E Cape Town. It

is regularly laid out in spacious streets, which cross at right angles, and each of which is supplied by a stream of beautiful clear water brought by a main water-course from the Hart. The divisions, bounded, N by Glenwillow, E. Beaufort, S.E. George, S. Swellendam, and W. Stellenbosch and the Cape, is 180 m long E to W, by 82 m broad, and has an estimated area of 20,000 sq m. The surface generally elevated is covered in the W by the Bokkeveld Mountains, in which the climate is pleasantly cool in summer, and sharp and cold in winter, seasons much well adapted for agriculture, raised in abundance excellent apples pears, and cherries and is tolerably well watered by the Doorn the Great Berg and the Drakens.

WORDINGBORG (Latin, *Ordingburg*) a tn. and seaport, Denmark, on the S.E. point of Isl. Zealand 52 m S S W Copenhagen. Its winter-haven, of the fifth class, enables it to carry on some trade. A small Garrison is kept in it. It is very ancient, with a lofty tower the remnant of a strong castle, in which several of the Danish kings resided and a harbour with some trade. Pop. 1500.

WÖRDL, a tn. Bavaria, Lower Franconia, on the Main near Kleinheubach, with a church, two chapels, a castle and a building yard. Pop. 1672.

WORKINGTON a market tn. seaport and par. Eng. land, co. Cumberland at the mouth of the Derwent at the entrance to the bolwhey Firth 5 m S S W Maryport. It is irregularly built, but has some spacious streets several handsome houses and shops two churches, one very handsome St. Dunstan's chapel, a savings bank, national infant, industrial, and other schools a dispensary three libraries, a new-room a mechanics institute an assembly-room extensive building yards employing together between 300 and 400 men an iron chain anchor, and cable factory a tin-plate factory a rope-work and a trade chiefly in exporting coal to Ireland and line to Scotland. A few large vessels are employed in the N. American timber trade. Pop. (in 1857) 5837. Area 8310 a. Pop. 7159.

WORKHAM a market tn. and par. England co. and 25 m N Nottingham, on the Ryeon huro crossed by the Chesterfield canal in a well-wooded and picturesque district, near the N. extremity of Sherwood Forest. It consists of a long street, with others branching from it; is in general well built, and has a beautiful Norman church, part of which originally belonged to an Augustinian priory of which there are some old remains Wesleyan and Primitive Methodist, independent, and B. Catholic churches national schools, an ancient building called the Woodhall a corn exchange with a large hall or assembly room and a considerable trade in malt. Pop. (in 1858) 6058. Area of par. 18,320 a. Pop. 7315.

WORTHUM (formerly WORTHUM and WALTHAM) Latin *Worthum* — 1 A tn. Holland par. Friesland, 10 m S W Sneek, near the North Sea, with which it communicates by a canal. In its centre is a fine market-place, on which stand the townhall, the weighhouse, and the principal church. It has also three other churches, several schools, and an orphan hospital. It is the birthplace of the antiquary and Greek scholar Lambert Bos. Inhabitants chiefly engaged in suffering. Pop. 2470 — 2 A tn. N. Hrabst. (See WORMSREUTER).

WORKWAY one of the Arva mts. containing the vils of Vieux Affars, Ond Affars, Goot Longar and Truc. It is noted for the productiveness of its treping-fisheries.

WORMS (anc. *Dorbetomagus*) a tn. Hesse-Darmstadt,
 prov Rheinhessen 1 bank Rhine here crossed by a flying
 bridge, 28 m. S. E. Mainz. It consists of a walled town,
 with massive towers and seven gates, and of three suburbs
 and has several squares and main streets of which only a few
 are spacious and well built. The public buildings are a plain
 massive Dom or cathedral of red sandstone, partly Byzantine

leather, lacquerware, best-root sugar and tobacco, and the
 trade is in corn wine, and oil. Worms has long lost the im-
 portance which it had when it was a free Imperial city the
 chosen residence of emperors and the frequent meeting-place
 of imperial diets. Even at the end of the Thirty Years' war,
 its pop. was 40,000, but is not now above 9400, chiefly Pro-
 testants.

WULD, a small vil. Hindostan in a plain of the same name, prov. Chulian. lat. 87° 19' N. lon. 66° 31' E. Though a small wretched place, it is the capital of one of the most numerous tribes of Hindoostan and contains the royal mounds of two sardars or chiefs.

WUDWAN, a considerable tn. and fort, Hindostan, prov Gujar, lat. 22° 42' N. lon. 71° 47' E., with a transit trade in glass, hemp, and leather, brought from Patana.

warms, and carried hence to Ehwangger, on the Gulf of Cambray.

WUKUMOTO a town in Japan prov Fian, lat of Kintan, lat 32° 50' N, lon 130° E. At this place there is a coal pit, entered by an easy staircase of 120 steps and containing seams of bituminous coal.

WULFLINGEN a vil and par Switzerland, can and 12 m. N. E. Fribourg. It is overhung by an old castle, and has a church with interesting tombs. Pop. 1030.

WULFATH a vil Rheinhessen, prov Düsseldorf. 6 m. W. N. W. Fribourg, with a church and manufactures of woollen and linen goods. Pop. (1857) 1098.

WULLFESDORF a market in Lower Austria, on the Schmelz 24 m. W. N. W. Hornburg, with a church and a castle. Pop. 1000.

WULLH, or WULLER, a lake. Cashmere formed by an expansion of the Jialun 18 m. N. W. Bernagur, greatest length N. to E., 21 m. breadth, about 0 m. It is much frequented by water-fowl, is well supplied with fish, and produces singara or water nuts so abundantly as to yield a rent of about £12,000 to the government, and submit a large part of the population. These nuts the roots of the *Tropea* is species, are obtained by dredging between two boats, as for oysters on our coasts. On a small island in the lake, are extensive ruins of a very old Buddhist temple.

WULFELINGHEM a vil and com Belgium, prov Flanders, on the canal from Lou and Bergues to Furnes 5 m. S. Furnes, with a rope work, a brick work, a brewery, three flour-mills, and some farms. Pop. 1037.

WULMF, river. Germany, rises in the V. of go. J. in the Harz, flows N. W. then S. W. then nearly due W., forming part of the boundary between Hanover and the territory of Bremen and unites with the Hamme in forming the Lesum an affluent of the Weser after a course of about 70 m.

WUNNENDEP, a walled in Prussia, prov Westphalia, gov and 84 W. Menden on the 1a wila a R. Catholic church, a chapel, paper and other m. Pop. 1058.

WUNNENDEP, a vil and com Prussia, prov Posen, gov and 52 m. S. W. Breslau, on the Pusa or Losen. It has walls with three gates, a R. Catholic church, town house hospital and manufactures of woollen and linen cloth. &c. The chapel of St. Andrew in the vic. attracts thousands of pilgrims. Pop. (1857) 1067.

WUNNENDEP, a vil in Hanover, prov Hildesheim, on the confluence of the Kappas and Sals, with a church, Latin school barracks an old manufactory woolen manufactures and tanneries. Pop. 1054.

WUNNENDEP, a vil in Bavaria, prov Franconia, on the Danube, 20 m. N. E. Fribourg. It has walls with four gates, several regular and well built streets, three churches, a castle hospital, Latin industrial, and agricultural schools, manufactures of linen and cotton goods, also works worsted-wool iron works beds of pipe-clay and quarries of limestone and marble. Joan Paul Richter was born here and has a monument here. Pop. 3500.

WUNNENDEP, or WUNNENDEP, an active volcano Japan, lat. Kintan. It rises 4119 ft. above sea-level nearly in the centre of the peninsula of Simabara. A terrible eruption from this mountain took place in 1792 when the northern peak of the mountain was blown into the air and a stream of basalt, water issuing from the gap poured down to the sea, which at the same time overflowed its banks. The whole face of the country was changed, and 53,000 persons are said to have perished.

WUNNENDEP, a vil in Austrian Silesia, circle and 37 m. N. W. Troppau, on the Oppa, with a chapel, a normal school, manufactures of linen, firearms, and iron-wire, smelting furnaces dye works, &c. Pop. 2200.

WUNNENDEP, a river, Hindoostan rises in the Sonogor and Nerbudda territory near Mosley, flows S. E., forming the boundary between Nagpore and the Nizam's dominion, and after a course of about 250 m. joins the bank Wyn-Ganga. Its chief affluent is the Paya-Ganga, which nearly doubles its volume. During the rains it is navigable for 100 m. by moderate-sized boats.

WUNNENDEP, a vil and par Switzerland, can. Aargau 6 m. N. W. Baden, with a parish church and a parsonage. Pop. 1008.

WURMLOS, a vil and par Switzerland, can. Aargau 8 m. N. E. Baden, on an important torrent which joins the Lammat, and is here crossed by a handsome bridge. A great number of Roman coins and other antiquities have been found in the neighbourhood. Pop. 768.

WURMLOS, a lake, in the S. of Bavaria, between the Ammer and the Isar, about 16 m. S. S. W. Munich, greatest length N. to S., 12 m., mean breadth, about 3 m. Its outlet is into the Ammer.

WURMLINGEN two places Wurtemberg, circle Schwarzwald—1. A vil. and 2. N. E. Rothenburg. On a neighbouring height is a chapel visited by numerous pilgrims. Pop. 1061—2. A vil. and 3. Tübingen on the Elbe with a church, a castle, and several mills. Pop. 1293.

WURM, a river Hindoostan, presid Bombay. It rises in the W. Ghats, lat. 17° 18' N., lon 75° 46' E., flows S. E. separates Saltara from Kolapore and falls into the Krishna total course, 80 m.

WURM, a river in Central Africa, about 17 m. N. E. Bechuanaland, on the Ilmo. It is the residence of the Follist emperor, and was founded by Belle in 1831. Pop. (1855) 12,000 to 15,000.—(Barth's Letters to Adenham.)

WURTEMBERG a kingdom in the S. W. of Germany ranking as the sixth state in the German Confederation and bounded S. E. and N. by Bavaria N. W. and S. W. by Baden, and R. by Baden, Hohenlohe which it nearly encloses and the Lake of Constance, which separates it from Switzerland greatest length N. to S. 140 m. central breadth 100 m. area 10,000 sq. m. For administrative purposes it is divided into four circles, of which the names, area, and population are given in the following table.—

C. name.	Area, sq. m.	Pop. 1855.
Neckar	998.72	801,054
Schwarzwald, or Black Forest.	1,287.82	445,873
Danube	1,212.04	413,444
Jura	1,489.90	874,918
Total	4,988.54	1,735,289

Except a few levels tracts in the S., the surface is throughout hilly and even mountainous. In the W. the Schwarzwald or Black Forest, forms part of the boundary with some of its loftiest ridges and sends ramifications far into the interior. In Wurtemberg however it is neither so high nor so steep as on the side of Baden and its ridges are generally clothed with forests. Much steeper and more unshapely are the mountains of the centre and the E. where the Alb or Middle Alp, forming part of the Franconian Jura, covers an extensive tract. This mountain mass, when at its greatest height spreads out on an elevated desolate plateau. Towards the S. its descent is rapid and abrupt, but towards the N. it slopes down very gradually. Beyond the N. slope other heights begin to rise, and sink at last with outliers of the Odenwald.

The drainage is shared between the basins of the Danube and the Rhine, and hence, part of the great water-spread of the European continent is found in Wurtemberg, being evidently formed by the Alb and its plateau, the N. and W. sides of which give rise to several tributaries of the Rhine, while those of the E. and S. E. send a much smaller portion to the Danube, which in the latter direction is the only river of importance. The Rhine carries off part of the S. drainage by the Lake of Constance and receives that of the S. W. W. and N., by a number of important streams, more especially the Neckar and its tributaries, Lanter, Fils, Rems, Murr, Kocher, Jura, and Enz. Besides these, a small portion of the N. is drained by the Tauber, a tributary of the Main. The Lake of Constance, of which only a small portion belongs to Wurtemberg, is the only lake worthy of the name.

Notwithstanding the general ruggedness and elevation of the surface, the climate is decidedly temperate, though it is necessarily varied much with locality, and cannot be the same on the ridges of the Schwarzwald and the plateau of the Alb as in the lower valley of the Neckar. In respect of vegetation it has been divided into three regions—from the lowest level up to 1000 ft. from 1000 ft. to 2000 ft., and from 2000 ft. upwards. All of these grow grain but the characteristic products are—in the third, forest-wood, in the second the hardier fruits, and in the first, the more delicate fruits and the

vine. The last region is almost confined to the northern slopes of the Jura and the Neckar, where the fig and melon ripen perfectly in the open air, and the vine, cultivated on an extensive scale, produces several first-class wines. Here the soil is generally of great fertility, and both maize and wheat are raised in such quantities as to be extensively employed in making beer. In the second region, the largest of the three, the soil is seldom alluvial, but generally contains a considerable proportion of vegetable mould and disintegrated trap and limestone. Consequently, however, its granularities into clays and sandstone, which yield profitable returns only when managed with equal industry and skill. In both these qualities the inhabitants of Württemberg are by no means deficient, and their agriculture, even under unfavorable circumstances, equals that of any other part of Germany. In ordinary seasons the grain produced leaves a considerable surplus for export. Besides grain potatoes are grown in almost every district, and hemp and flax on the spots best suited for them. Artificial meadows yield abundant crops of hay for feeding or dairy purposes, and considerable attention is also paid to the rearing of stock. The third region, though under partial cultivation, derives its chief value from its natural pastures and forests, the latter, both of pine and hardwood, climbing the loftiest ridges of the Schwäbischwald, and giving valuable returns, not only in their timber but the heads of swine which they feed. In oak mountain districts, bees are often reared on an extensive scale. Of minerals by far the most valuable is salt, obtained chiefly from springs. The other minerals deserving of notice are limestone, gypsum, slate, coal and lignite in very limited quantities; slate, malstone, iron-ore, and potter's clay.

Manufactures have made considerable progress in recent years. They consist chiefly of linen and cotton goods, paper, wooden clocks, toys, articles in gold and silver, and chemical products. There are also numerous breweries, distilleries, bleachfields, and cotton-mills. The trade, in addition to the above articles of manufacture, is in cattle, wool, corn, timber, wax, gypsum, and salt. The principal coin in use is gold, the *gulden* is 32, and in silver the *gulden* or *thaler* is 16. 82 marks. All accounts are kept in *gulden* which, for smaller values, are subdivided into 15 *denari* or 60 *kreuzers*. The commercial pound which is double the gold and silver weight, is somewhat larger than the English pound—100 being = 108 1/2 lbs avoirdupois. Corn is measured by the *schefel* = 5.081 bushels. The foot is equal to 11.26 inches English and the ell to 24.08 inches. The *marques* of land equal 1 acre, 1 rood, and 24 perches.

The government is an hereditary constitutional monarchy. The executive power is lodged in the sovereign, the legislative, jointly in the sovereign and a parliament, composed of an upper and a lower chamber—the former hereditary, the latter representative, consisting of 94 members mostly elected every six years by the principal towns and rural districts. As a member of the German Confederation Württemberg holds the sixth place, and has four votes in the plenum. Its contingent of men is 13,985 and of money 128,731 florins. The revenue, obtained in nearly equal proportions by direct and indirect taxation, is 10,888,994 florins (283,613,675 francs) as administered by a supreme tribunal, which sits at Stuttgart and has jurisdiction over the whole kingdom, and by inferior courts attached to each circle and district. There is no properly established religion but the three great bodies of Lutherans, Catholics, and R. Catholics, are recognized and partly paid by the state. The great body of the people are Protestants, and education is so generally diffused, that it is rare to meet with a person who cannot read and write. Crime and pauperism are comparatively rare, the tone of morals is high, and the people generally are in comfortable circumstances. Besides Stuttgart (the capital), the chief towns are Tübingen, Heilbronn, Ellwangen and Reutlingen.

Württemberg is composed of a number of separate territories, which once belonged to the Alemanni and Franks, and afterwards formed various independent states. The first inhabitants, said to have been Celts, were gradually uncrushed upon by the Germans, and finally fell with them under the Roman yoke. After the decline and fall of the Roman Empire, the country was incorporated with the kingdom of the Franks who governed it by dukes. The dukedom thus estab-

lished subsisted till the end of the 11th century when it was broken up, and partitioned among counts, who declared themselves independent. Among these was the Count of Beaulieu-Württemberg; whose family gradually gained the ascendancy. One of its members built a castle at Stuttgart, and another built the castle of Württemberg, which has given its name to the whole kingdom. In this family, towards the end of the 16th century the dukedom was restored. Duke Ulrich succeeded in 1504. At first he gave promise of a wise and peaceful reign, but soon he fell into, and in consequence of a rebellion was obliged to flee. The Swabian League purchased his dukedom, and secured the sovereignty of Austria. The Reformation now began to make rapid progress, but was strenuously opposed by the Austrians. Ulrich who had taken refuge at the court of the Landgrave of Hesse, had embraced the Reformation now returned to his country at the head of a powerful army and became its real sovereign, though Austria retained a nominal supremacy. Ulrich was succeeded, in 1550, by his son Christopher who had been brought up at the court of France and had obtained the principality of Montbéliard. After a very patriotic reign, he died in 1608. The line of Ulrich became extinct in 1633. Frederick, belonging to a collateral branch, succeeded, and completely established the independence of Württemberg, by forcing it even from Austria's nominal supremacy. He died in 1698 and was succeeded by his son in whose reign began the Thirty Years war, which often caused great misery in Württemberg. The succession continued uninterrupted and the country had rapidly advanced in prosperity when the French revolution broke out. Württemberg became the theatre of war and was overrun by the French armies. Ultimately however the duke gained the favor of Napoleon and with it a great accession of territory, as well as the title of King. These did not prevent Württemberg from taking an active share in the war of independence, and hence, in the subsequent arrangement of the European states, the territorial acquisitions were confirmed and the king's title formally recognized.

WÜRZBURG a tn Württemberg circle Danube, bail and near Lestzhausen, on the Aisch with a parish church, and a castle. Pop. 1032.

WÜRZBURG a tn Rhenus-Lobenstein circle Elberfeld, bail and near Lobenstein with a parish church, three mills, and a weekly market. Pop. 1460.

WÜRZBURG a cm Bavaria, cap circle Lower Franconia, pleasantly situated on bank Main, here crossed by a handsome bridge leading to a large suburb 140 m. N. N. W. Munich, on the railway from Fiume fort to Bamberg. It is regularly fortified by walls and bastions, and defended by the strong citadel of Marienberg, and when approached from a distance, presents a most imposing and attractive appearance. It is entered by six gates, and though consisting chiefly of narrow streets, with overhanging houses, and pointed gables, is a fine specimen of the municipal architecture of the middle ages. Many modern improvements have been introduced, but the chief interest of the place continues to be derived from its antiquity. Having been for more than 1000 years the capital of a principality ruled by bishops who were princes of the empire, it naturally abounds in ecclesiastical structures. Not fewer than 30 churches are counted, but many of these are not in use, and some are devoid of any claim to particular notice. The most important edifices are the cathedral or Dom, erected in the 10th century, with two towers at each end, and containing numerous interesting monuments, the Marienkirche, an elegant structure of pointed Gothic, with tall lancet windows, and numerous fine carvings; the royal palace, a large and magnificent building occupied by the emperor the day before their coronation at Frankfurt, the Julius hospital, with a range of 62 windows in front, having all the appearance of a palace, but furnishing in fact, a noble asylum for the sick and aged poor; the university, possessed of a library of 100,000 vols., and of some celebrity as a school of medicine, but rather in a declining state; the townhouse theatre, gymnasium, theological and other seminaries, several monastic establishments, numerous hospitals and charitable endowments. The manufactures consist chiefly of woolen and linen cloth, leather and lacquerware surgical instruments, cutlery, glass, brims, musical instruments, and ironmongery, and there are numerous breweries, malt, tobacco factories, &c. The trade, both general and transit, is extensive, and greatly facilitated both by

the Main and two canals connected with it. The principal articles, besides the manufactures, are wine, oil, cattle, corn, and other agricultural produce. Würzburg dates from the 7th century, when the dukes of Thuringia often made it their

From the German Museum at Darmstadt.

residence. It afterwards passed into the hands of bishop-electors, who, in welding with the temporal and the spiritual power carried matters with a high hand, and were often at deadly feud with the citizens. Their rule did not terminate till 1796, when, by the peace of Luneville, the town and territory passed to Bavaria. Pop. 26,811.

WÜRZBURG, a vil. Saxony circle and 10 m. E. Leipzig, r. bank Main, and on the railway from Leipzig to Dresden. It consists of the town proper and four suburbs, and has a town or cathedral with two towers, another church, with a lofty spire, an old castle used as a courthouse, several superior schools, manufactures of linen, lace, and tobacco, and some general trade. Pop. (1849) 4668.

WURTH, F.F., or MICH, a mountain range, Balochistan, prov. Mekran, stretching E. to W. about lat. 28° N. and between lon. 62° and 64° E. and separating the sandy desert on the N. from the more elevated and fertile part of Mekran. Its name of Misch or date, is owing to the great quantities of excellent dates produced in its valleys.

WURSTEN (GUEZ and KINDEZ), two nearly contiguous vil. Lippe-Deinold, bad. Schenker, with a parish church. They are occupied chiefly by peasants. Pop. 2069.

WUSLEBACHMEN, a market in Bavaria, Lower Franconia, on the Ulster River crossed by a bridge, 47 m. N. Würzburg, with a parish church, saw, oil and other mills, and a trade in cattle. Pop. 1160.
